The markets from the 23rd to the 27th were under the influence of the heat wave, and when penny fans are at a premium in Mark Lane business is seldom very brisk. The thunderstorm of Friday broke over the Corn Exchange just as the new market was closing, and the day's trade had been done without thought of a break up of the heat. Saturday maintained a high temperature; it was cool only by comparison with the great heat which had previously ruled. Wheat has not lost ground since Thursday, but on Tuesday and Wednesday was decidedly in buyers' favour. The yield is not so much the question of the hour as the prospect of new crop deliveries a full fortnight earlier than had been looked for even so recently as the end of June. The supply of English wheat of the old crop is now, of course, small, but there is not that complete exhaustion which has marked the fourth week of July in some years. The holders of American spring wheat are firmer at Mark Lane than at the Term Market; there is a "bear" movement at the latter, though it has not gone very far. The trade in American red winter wheat new crop is not much reported as yet, but it exists all the same, and will become of consequence very soon. The increased quantity of Russian wheat afloat is a minor feature of the week.

The following quantities of wheat are now on passage to the United Kingdom:

From California	1,068,000	qrs.
„ Atlantic Ports	230,000	„
„ Argentine	533,000	„
„ Russia	100,000	„
„ Australasia	220,000	„
All other Countries	60,000	„
Total	2,205,000	„
July 23, 1899	2,310,000	„
„ 1898	2,925,000	„
„ 1897	640,000	„
„ 1896	1,470,000	„
„ 1895	3,115,000	„

The large shipments from Argentina would make the present total heavy but for the absence of Roumania, Chilé, and India from the list. These countries, as far as we can recall, have never before this season been simultaneously absent from the list of our sources of prospective wheat supply.

Of flour there are now on passage:—

	Sacks.
American	270,000
Californian	18,000
Hungarian	10,000
All other Countries	10,000
Total	308,000

The imports and supplies of breadstuffs last week were as follows:—

	Qrs.
Foreign wheat	187,000
„ flour	137,000
Total imports	324,000
English wheat	60,000
Total	384,000

The stocks of wheat in granary on July 28 were estimated as follows:—

1900	2,496,000 qrs.
1899	2,158,000 „
1898	972,000 „

France holds in her merchants' granaries 540,000 qrs. of wheat; Germany and the Low Countries, 503,000 qrs.; and Russia, 650,000 qrs. All these quantities are independent of farmers' holdings. America holds 9,870,000 qrs. of wheat, against 7,936,000 qrs. a year ago, and 3,540,000 qrs. two years since.

Of maize there are on passage the following quantities:—

	Qrs.
Flat	475,000
Round	145,000
Yellow	205,000
Total	825,000
A year ago	665,000
Two years ago	610,000

Present expectations are very fairly liberal, but a prospective supply of a million quarters does not depress the maize market in winter, and the present dull state of the trade in Indian corn must be put down to the summer and the hot weather.

The quantity of barley on passage on 28th inst. was:—

	Qrs.
Malting	160,000
Grinding	80,000
Total	240,000
Last year	115,000

The malting is mainly Californian; the feeding is Russian, Roumanian, and Persian.

Of beans 9,500 qrs. are on passage, compared with 22,000 qrs. at this period of last year.

Imports of barley last week were only 29,000 qrs. and small as is this arrival it seems to have been sufficient for current enquiry. Barley prices, though no lower, are certainly no better on the week. The failure of Chili to ship any barley was noted, for July is the period when Chilian new crop shipments should be in evidence.

Imports of maize last week were 287,750 qrs. as a full supply. American shipments continue to dominate the whole position of this trade, but the decline of 1s. on flat corn has been succeeded by a rally of 3d., so that the net alteration of the week is 9d. Oats, with 213,500 qrs. imported, are slow of sale, but value is not altered for either 304lb. or 320lb. sorts.

New English trifolium is on offer at 26s. to 27s. per cwt., and new French at 28s. to 29s. New red clover seed: English is quoted at 60s. to 70s. per cwt.; French, 40s. to 50s. per cwt. English canary-seed is on offer at 33s. to 35s. against 30s. to 32s. for Turkish. That useful appetiser and condiment for stock, fenugreek, is obtainable at 9s. per cwt.

Imports of beans last week were only 3,180 qrs., but sales have been, if anything, smaller, and, at all events, trade has run somewhat in buyers' favour. Peas, with 7,000 qrs. imported, have been a fair trade. English maple and Canadian white are the two sorts in best request.

THIS DAY'S MARKETS.

MARK LANE, MONDAY.

[FIRST REPORT.]

The market to-day was dull but not weak, for there is no excess of spot offers either of foreign or of home produce. English wheat was quoted at about 30s.; the finer sorts of American still exceeded 33s. per quarter, and even common Argentine was not below 29s. Maize was firm at the recent decline. Oats had a quiet sale. All sorts of barley were slow at currencies. Calcutta linseed had buyers at 54s., and good English at 60s. Roumanian rapeseed made 41s. There were buyers of fine Australian white peas at 40s. per quarter, of Odessa beans at 29s., of Mexican at 28s. 9d., of brewing barley from California at 26s. 6d., and of Turkish maize at 21s. 6d. per quarter. Some barley from Gaza made 24s., but scarcely any Outchak or fine Asiatic was obtainable.

CLOSE OF THE MARKET.

By Telephone, 2 p.m.

THE MARKET CLOSED WITHOUT CHANGE. AS NEXT MONDAY WILL BE A HOLIDAY THERE WAS A FAIR RETAIL SALE TO-DAY TO CARRY OVER THE INTERVAL OF FOURTEEN INSTEAD OF SEVEN DAYS.

THE FLOUR TRADE.

MARK LANE, JULY 30.

The price of London makes are not much changed from Monday last, but Town Households were occasionally obtainable at 6d. decline. The American patents and bakers' kinds came at varying prices, but, on the whole, were fairly steadily held. Buyers were not numerous. Red Dog, a feeding American flour, was in fair request at about 14s. per sack. Fine Cascadia made 23s. to 24s. per sack, Australian about the same. Odessa flour made 22s. or thereabouts. A few samples of Argentina were to be seen, the price ranges from a guinea upwards. Fine Canadian patent flour was held for 24s. with buyers at 23s. 6d. per sack.

LONDON TERM MARKET.

This market is held twice a day at South Sea House, and is open to elected members only. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 centals.

The name of the month stands for guaranteed delivery (if required) on or before the last day of that month, and the following have been the prices per cental recently made :—

WHEAT.—	July.	Aug.	Oct.	Dec.
	s. d.	s. d.	s d.	s. d.
July 23 noon	6 5 .. 6	6 .. 6	8 .. 6	9

To-day noon	— .. 6	7 .. 6	8 .. 6	9

Maize futures made 4s. 1d. for Sept. and Oct. delivery.

The Term Market standard wheat is No. 1 Northern Spring American sold on the Duluth certificate. Other sorts of wheat can be bought at the above prices plus or minus agreed difference between the other sort and the standard quality. Quotations are by the "true hundredweight" or cental of 100lb. We do not give fractions of a penny per cental. Delivery is understood as being guaranteed on or before the last day of the month named in the quotation. The maize quoted on the Term market is flat grain from the United States

PROVISIONS.

London, Monday.—The arrivals from Ireland last week were 2,638 bales bacon, and from foreign ports 10,652 bales bacon. The bacon market was a steady one last week for both Irish and Danish, with an improved demand, but Canadian only went with a very slow trade. Irish ranged from 56s to 58s up to 68s; Danish, from 48s to 59s up to 66s; and Canadian, from 46s to 50s up to 59s. The butter market was firm, with Danish from 102s to 112s; Irish, 94s to 106s; Canadian, 100s to 104s; French, 84s to 108s. Lard a quiet market, with no change in prices.

SEEDS.

London, Monday.—Messrs. John Shaw and Sons, seed merchants, of Great Maze Pond, Borough, London, S.E., write that business in seeds, as is usual at this season, is just now confined to narrow limits. The new trifolium is of good quality; but prices continue very irregular. Meantime the demand is small. Some thousand-headed kale of this year's growth is now offering, whilst samples of new mustard seed are also showing. There is no change this week in rapeseed. Blue peas and haricot beans move off slowly on former terms.

GRAIN AND FLOUR FACTORS' REPORTS.

Flour.—A dull trade at last Monday's prices.—T. S. MEDILL, Mark Lane.

There is very little to report about our market. There is a little business doing in trifolium, but no general demand at present. There is no change in clovers of any kind. High prices are asked for new trefoil. Bird seeds are quiet.—JOHN PICARD AND CO., Mark Lane.

The demand for milling offals is firm on a small supply, and prices remain unchanged from last week. Nice rains last Friday have freshened up the grass land and root crop. Harvest is progressing and some little wheat has been cut.—RICHARD DOGGETT, Mark Lane.

Wheat, moderate arrivals. Red wheat unchanged. White rather dearer. Flour unaltered in value. No change in value of maize, barley, and oats.—COVENTRY, Mark Lane.

Bran and offal markets are firmer, with a disposition to buy forward, specially for best qualities. Weather continues exceptionally warm and favourable for the growing crops.—GREENHILL BROTHERS, Belfast, July 28.

Flour: The market is steady, but most brands are reduced a further 6d. per sack. Grain: Indian corn not being plentiful on spot is firm. Peas are again 3d. down. Beans slow. Foreign oats continue depressed. Oilcake unchanged. Oatmeal dull. Mill stuffs: There is a fair inquiry at unchanged prices.—MCKINNON AND MCDONALD, Glasgow, July 28.

Wheat firm with a moderate trade at ½d. per cental over last Tuesday's prices. Flour a quiet retail trade at last market day's rates for both foreign and home milled brands. Maize was in very fair request. Mixed American, which had given way in the interim, is stiffer, has recovered the intermediate decline, and is now steady unchanged from last market day. European quiet, but steady. River Plate firm. Barley moves slowly, but is steadily held at late rates. Beans in moderate demand at recent rates. Peas quietly steady, without change in prices. Oats firm for British, but very quiet for American. The demand for both is, however, trifling. Oatmeal quiet, unchanged. Oilcake not in brisk demand on the spot, but recent rates are maintained.—ROSS T. SMYTH, Liverpool, July 28.

THE BALTIC, MONDAY, 1 p.m.

STATE OF TRADE.

Wheat cargoes were a trifle steadier than on Saturday, and there was a better demand for American maize cargoes for August and September shipment. Barley, on the other hand, was weaker, especially for October shipment of Russian. Oat cargoes were very steadily held, both Russian and American.

BUSINESS DONE.

WHEAT.—No. 2 Red Winter, 29s., September shipment; ditto, 30s., December shipment; No. 1 Northern, 30s, on passage; ditto, 31s, September shipment; New Zealand, 29s 9d, September shipment; Australian 30s 9d, September shipment; Californian, 30s 9d, prompt shipment; Odessa Gherka, 29s 6d, prompt shipment; Azima, fine, 31s 6d, prompt shipment; Argentine, 29s, September shipment; Hard Winter, 28s 9d, August shipment; Hard Duluth, 32s, August shipment.

—ROBT. AND JOHN HEWETSON.

HOPS.

London (Borough), Monday.—Messrs. W. H. and H. Le May, hop factors, 67, Borough High-street, London, S.E., report: The market is now in a quiet state. Attention is fixed on the coming crop, which is improving generally, although mould is threatening in many gardens.

CATTLE.

Metropolitan Market, Islington.

Monday, July 30th, 1900.

	British.	Total, July 31st, 1899
Beasts	1,129	1,129
Sheep and lambs	6,520	6,520
Calves	10	10
Milch cows	70	70

Quotations per 8lbs (sinking the offal).

ENGLISH.	Inferior.	Second.	First.
	s. d.	s. d.	s. d.
Beasts	3 2	4 4	5 0
Sheep	3 0	5 4	6 0
Lambs	5 6	6 2	6 10

Milch cows, per head, £16 to £22.

British arrivals include as follows:—Scotland, —; Eastern Counties, 81; Midland, Home and Western Counties, 977; Devon, 30; Ireland, 32.

The supply to-day in the beast market compared with Monday showed a decrease of 100 head, these chiefly consisting of Herefords and Shorthorns. Trade on the whole was of a firmer and steadier nature, and a clearance is expected; trade for fat cows and bulls was very dull; for the former sales had to be forced at a reduction of 2d per 8lbs. The Irish arrivals were from Dublin, the first this season.

The following are top quotations per 8lb. (sinking the offal):—

	To-day.	July 31st, 1899
Devons	4s 9d to 4s 10d	4s 8d to 4s 9d
Herefords	4s 10d to 5s 0d	4s 6d to 4s 8d
Norfolks	4s 7d to 4s 8d	— —
Runts	4s 9d to 4s 10d	4s 2d to 4s 4d
Lincolns	4s 4d to 4s 6d	4s 2d to 4s 4d
Irish	4s 6d to 4s 8d	— —
Fat cows	3s 8d to 3s 10d	3s 6d to 3s 8d

There was a decrease of 1,680 head in the sheep market, compared with Monday last. Trade for both wethers and ewes was of a brisker nature at a slight advance; lambs being scarcer and with a greater demand sold easily at an advance of 2d per 8lb. The supply consisted of 180 Scotch, 1,450 from the Eastern Counties, and 700 Irish.

Undermentioned quotations are at per 8lbs. (sinking the offal), and are for the best of each class penned :—

	To-day.	July 31st, 1899.
7½ to 8-stone Downs	5s 10d to 6s 0d	5s 8d to 5s 10d
9-stone ditto	5s 10d to 6s 0d	5s 6d to 5s 8d
10-stone half-breds	5s 4d to 5s 6d	5s 4d to 5s 6d
12-stone Lincoln	5s 0d to 5s 2d	4s 10d to 5s 0d
10-stone Irish	5s 2d to 5s 4d	5s 0d to 5s 2d
10-stone Down ewes	4s 4d to 4s 6d	4s 0d to 4s 2d
11-stone half-bred ditto	4s 2d to 4s 4d	3s 8d to 3s 10d
5-stone fat Grass lambs	6s 4d to 6s 6d	6s 0d to 6s 2d
6-stone half-bred ditto	5s 8d to 5s 10d	5s 8d to 5s 10d

Calf trade not worth noting.

London Central, Monday. — Short supplies; trade very slow. Beef (carcases), 3s 10d to 4s; hindquarters, 4s 4d to 4s 8d; roastings, 4s 8d to 5s. Sheep: Ewe, 3s 8d to 4s; wether, 4s 10d to 5s 2d; hindquarters, ewe, 4s 4d to 4s 8d; wether, 5s 8d to 6s. Pigs: Large, 2s 4d to 2s 8d; small, 3s to 3s 4d.

St. Ives (Hunts), Monday.—Beasts, 285; sheep and lambs, 173; pigs, 265. Beef, 7s 3d to 8s; mutton, 7s to 9s 4d; lamb, 8s to 10s; pork, 5s 6d to 6s 6d. Fat and store cattle fair. Fat and store sheep better trade. Fat and store pigs fair. Milch cows fair show, better trade; prices £14 to £22.

FOREIGN CATTLE.

Deptford, Monday.—Beasts 1,481. To-day's supply, compared with Monday last, showed an increase of 544, and consisted of 1,039 from the United States (amongst these being some big Colorado beasts), and 442 Canadian including a few Ranchers. Trade was of a slow nature at a slight advance on Saturday's rates. Besides the above number 428 more were withheld. The best States beasts made 4s 3d, and occasionally 4s 4d per 8lb., offal given in; second quality, 4s; best Canadians, 3s 10d to 4s. Ranchers, 3s 8d. The following were the numbers on offer on the corresponding day last year, with the current top rates: Beasts, 2,200, 3s 8d to 3s 11d per 8lb, to dress about 720lb. Sheep, 1,030, 4s 2d to 4s 4d per 8lb.

Sheep Killed by Lightning.—During the terrific thunderstorm which broke over the Berkshire downs on Friday afternoon, twenty-seven valuable ewes, belonging to a flock of 500 or 600 at Hodcott Farm, West Ilsley, on the estate of Lord Wantage, were killed by the lightning. The carcases were found lying beneath a large oak tree. The remainder of the flock, which were in the open, escaped unhurt

LIVE STOCK AND MEAT TRADE REVIEW.

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

Trade in London.

The trade at the Islington market on the principal day of the week opened fairly steady, but finished off very dull at a decline of 2d. per 8lb. more, especially for second quality, this being entirely due to a slacker demand, caused by so many families being away from town, this notwithstanding a shorter supply from all parts, there being rather more demand for fat butchering cows; these were firm in price, whilst fat bulls favoured the buyer. Little or no demand for the few rough cattle on sale, owing to so many being seized of late by the veterinary surgeon on account of tuberculosis. As usual at this season of the year, the majority of the fat beasts consisted of Herefords and Shorthorns from the Midland counties. At Deptford markets were held again on three separate days, viz., Monday, Wednesday, and Saturday, thus causing great dislocation of trade, which on the latter day was most dull and dragging, a clearance being impossible, even at a reduction of fully 2d. per 8lbs. The total number of beasts offered for sale at both markets was 5,281, consisting of 1,270 British (decrease 50) and 4,011 foreign, these latter comprising 2,671 from the United States (increase 928) and 1,340 from Canada (increase 905). It should be noted that the above numbers of foreign beasts do not include all arrivals, as 1,243 more were on Saturday withheld. The following were the top rates paid per 8lbs. (sinking the offal):—90-stone Herefords, 4s. 10d. to 5s.; 100-stone ditto, 4s. 9d.; 95-stone Runts, 4s. 8d. to 4s. 9d.; 90-stone polled Norfolks, 4s. 6d. to 4s. 7d.; 100-stone Lincolns, 4s. 6d.; 110-stone ditto, 4s. 3d. to 4s. 4d.; 100-stone Irish, 4s. 4d.; 90-stone States, 4s. 4d. to 4s. 6d., 4s. to 4s. 2d. on Saturday; 95-stone Canadians, 3s. 10d. to 4s.; 100-stone fat cows, 4s.; 100-stone fat bulls, 3s. 4d. Though there was a lighter supply of sheep at Islington trade all round ruled dull and dragging, wethers making 2d. per 8lbs. less money, ewes being more difficult to sell even at a reduction of 4d., this being due to the large number at Deptford, where rates also ruled lower to a similar extent to those at Islington. There being a shorter supply of lambs these sold to rather better advantage, especially those of best quality. The total number penned at both markets was 15,982 (increase, 1,952), consisting of 13,320 British (decrease, 170), and 2,662 Canadians (increase, 2,122). Best pens made per 8lbs. as follows (sinking the offal):—7½ to 8 stone Downs, 6s.; 8-stone Scotch, 5s. 10d. to 6s.; 9-stone Downs, 5s. 8d.; 10-stone ditto, 5s. 6d.; 10-stone half-breds, 5s. 4d. to 5s. 6d.; 10-stone Irish, 5s. 2d. to 5s. 4d.; 11-stone Lincolns, 5s. to 5s. 2d.; 10-stone Down ewes, 4s. 2d.; 11-stone half-breds, 3s. 10d.; 5-stone fat grass lambs, 6s. 2d. to 6s. 4d.; 6-stone half-breds, 5s. 8d.; 8½ to 9 stone Canadian sheep, 3s. 8d. to 4s. The calf trade, with a full average supply, consisting of 150 head, was rather firmer, the best on offer making 5s. 2d. per 8lbs. (sinking the offal).

Trade in the West.

The "scorching" weather we are now experiencing is not without its effect on trade, though so far its adverse influence has only affected operations in fat stock, which have been somewhat curtailed during the week, butchers buying only very sparingly, and that, too, of the very best grades, coarse, overfat animals being much neglected, and where sales have been forced at some sacrifice in price. The nicer weights of home-grazed steers and heifers have ruled on the whole very firm at prices showing scarcely any alteration in value, from 11s. to 12s. being still obtainable for the best bullocks, and 10s. 6d. for seconds. Best wether mutton is mostly in demand at 8d. to 8½d. per lb., but coarse, heavy ewes are neglected and difficult to move, except at considerably reduced rates. Anything well finished in the way of Down or crossbred lambs finds a quick sale at 10d. to 11d. per lb., but poorer qualities are far from saleable at 9d. to 9½d. Veal is a quieter sale on lowest terms, and heavyweights in pigs have declined 6d. to 1s. per score, but medium-sized porkers and baconers are still making 9s. to 10s. In store things prices as yet rule firm, milch beasts in particular, the demand for which it is difficult to meet, though prices for the best now rule from £16 10s. to £22. Barreners are also selling pretty freely from £20 to £30 per pair, but should the present brilliant weather, which was broken on Friday by a heavy thunderstorm, continue, there will soon be an outcry for keep, and both barreners and store sheep will be the first to suffer. A good storm or two would, however, speedily put things right, and at the same time ensure a good crop of roots.

Trade in Ireland.

With an average market of both cattle and sheep in Dublin last Thursday, the former might be said to be just a shade better for prime qualities, but very slack for the coarser kinds, while sheep met with a very disappointing sale. Best heifer and ox beef was worth from 57s. 6d. to 61s. per cwt. for extra good lots; second class beef, 52s. to 56s.; and other descriptions from 45s. to 50s. A clearance was effected, but rough cattle had to submit to a reduction of from ½10s. to 20s. per head in the evening. In the mutton department all classes receded fully 2s. per head, with the exception of some prime wethers and extra good lambs for Liverpool and Manchester. Buying for London was particularly slow. Best wether mutton, from 6¼d. to 6¾d.; ewe, 4¾d. to 6d. Good lambs sold well, best making up to 7¼d. per lb. The number of cattle on the market was 2,353, and of sheep 10,262. Milch cows still keep up good prices for best, but ordinary sluggish; store cattle in active demand. Pigs were a rather limited supply, and even in the face of very cautious inquiry late rates were well sustained at from 45s. to 48s. per cwt. for choice pigs, down to 35s. for coarse.

Trade in Scotland.

John Swan and Sons, Limited, give the following as their report on above for the current week:—The numbers of fat cattle on offer have been small, though rather larger than last week. There has been a very dear trade throughout, and in most cases the high prices current last week have been exceeded this week. Small numbers of fat cows have also been dear. A large and good supply of fat sheep and lambs, though not so many as last week, have met a good trade, and an easy clearance has been effected at satisfactory prices, only heavy ewes have made less money. Fat calves have been an exceedingly good show and have sold well, while pigs have met a much dearer trade. In the store market there have been light supplies of sheep, and with plenty of inquirers trade has been good, especially for the best descriptions. Store cattle have been a small show, and have met a fairly good demand, and notwithstanding the high prices asked by exposers have nearly all been sold at good prices. A remarkably light supply of milch cows have met a very dear trade.

LONDON.

London Central, Wednesday.—Trade remained without improvement, supplies being of fair extent. Arrivals of beef included 30 tons Scotch, 320 Liverpool sides, 1,000 hindquarters and 600 forequarters American refrigerated. Quotations: Beef: Scotch short sides, 4s 6d to 4s 10d; long, 4s 2d to 4s 4d; English, 3s 10d to 4s; American Deptford-killed, 3s 8d to 3s 10d; Liverpool, 3s 8d to 3s 10d; American refrigerated hindquarters, 3s 8d to 3s 10d; forequarters, 2s 4d to 2s 6d. Mutton: English wethers, 5s; ewes, 3s to 3s 4d; English lamb, 5s to 5s 4d. Veal: English and Dutch, 3s 8d to 4s 4d per 8lb.

London Central, Friday.—Fair supplies on offer, and trade ruled rather firmer. Beef: Scotch, short sides, 4s 8d to 5s; long, 4s 2d to 4s 6d; English, 4s to 4s 2d; American, Deptford killed, 3s 10d to 4s; Liverpool, 3s 10d to 4s; American, refrigerated hindquarters (best), 3s 8d to 4s; seconds, 3s 8d; forequarters (best), 2s 10d; seconds, 2s 6d to 2s 8d. Mutton: Scotch, 5s to 5s 4d; English wethers, 5s; ewes, 3s 8d to 3s 10d; Canterbury, 2s 6d to 2s 9d; Wellington, 2s 6d to 2s 8d; Sydney and River Plate, 2s 2d to 2s 4d; English lamb, 5s 8d to 6s. Veal: English and Dutch, 3s 8d to 4s 4d per 8lb.

Islington, Thursday.—Beast arrivals were on a moderate scale, and met a quiet demand, the bulk as usual on this day consisting of fat bulls and rough cattle. Sheep supplies were of fair extent, but a slow demand existed for both wethers and ewes, prices marking no appreciable change. 7½ to 8-stone Down wethers, 5s 8d to 5s 10d; 9-stone, 5s 6d to 5s 8d; 10-stone half-bred, 5s 2d to 5s 4d; 10-stone Down ewes, 4s to 4s 2d; and 11-stone half-bred, 3s 8d to 3s 10d. Lamb trade quiet. 5-stone fat Downs, 6s to 6s 2d; 6 stone half-bred, 5s 6d to 5s 8d. Calves, in good supply, met a fair demand, the best making 4s 10d to 5s per 8lb, offal given in.

COUNTRY.

Ashford, Tuesday.— Beef trade steady at late rates. Mutton, 2d to 4d per 8lb cheaper, a clearance not being effected. Veal much cheaper, not much selling at over 4s per stone. Lamb was not in request, and sales took place at 6s to 6s 2d per 8lb. Very little demand for pork, and roasters and large hogs alike sold at about 8s per score.

Basingstoke, Wednesday.—At Raynbird and Sons' saleyard there was a good attendance of buyers to meet a supply of 38 fat beasts, 103 calves, 602 fat sheep and lambs, 134 pigs, and 95 head of dairy and store cattle, for which the following prices were realised:—Fat beasts, £14 to £23; fat calves, 7os to 95s; small, 20s to 45s; fat wethers, 36s to 52s 6d; fat ewes, 32s to 48s; fat lambs, 26s to 44s; fat porkers, 26s to 45s; store pigs, 9s to 17s 6d; dairy cows, £9 to £22 5s. Notwithstanding the extreme heat fat beasts met a good inquiry, the biddings were well kept up, and every lot sold, Shorthorn steers making £21 15s; heifers, £17 10s; cows, £18; and bulls up to £18 10s; prime Devon oxen reached £23, and cows, £18; polled steers up to £20 5s, etc., etc. The trade for heavy and over-fed fat sheep and big lambs was further depressed to-day by the drought and extreme heat, which both lessens consumption and makes the butchers' business a very difficult one. Prime quality small sheep and choice sucking lambs are still cleared without difficulty at full prices. Best quality Hampshire Down wethers and ewes made 48s, 51s, 52s 6d, 44s 6d, 46s, 44s, 46s, 50s 6d; 17-months old ditto, 47s, 46s 6d, 45s 6d, 42s; 7-months old lambs, 40s 6d, 43s 6d, 30s, 40s 6d, 36s, 30s 6d, 35s, 25s, 26s, 37s, 41s, 40s, 37s; 3-months old sucking lambs, 25s 6d, 30s, 32s; Scotch ditto, 14s 6d; old ewes, 32s, 37s 6d, 35s 6d; rams, 44s, 46s, 55s, 40s; black face Scotch wethers, 39s, 28s; Cheviot wethers, 35s 6d. A clearance made with the exception of one or two consignments. There was a good demand for milch cows, with a clearance at satisfactory prices to the vendors. Store cattle are much cheaper. Fat porkers met a better trade than last week. Store pigs also sold well. Fat calves met a dull trade at last week's prices. Ruling values:—Prime Devon and polled beasts, 7d to 7¼d; ditto shorthorn, 6¾d to 7d; bulls, cows, and inferior beasts, 5½d to 6d per lb. Best quality sheep and big lambs, 8½d to 9d; second ditto, 7¾d to 8d; old ewes, rams, and inferior sheep, 5½d to 6¾d; 3-months old sucking lambs, 9d to 9¼d per lb. Fat porkers up to 9s 6d per score. Fat calves, 6d to 8d per lb.

Cambridge, Monday.—The stock exhibited for sale at this market and the prices obtained were as follows:—Beasts, 203; sheep, 991; pigs, 326; horses, 13. Beef, 6s 9d to 7s 9d per stone; mutton, 4s 2d to 5s 6d; pork, 5s 3d to 6s 3d. Very few store beasts and trade slow. Fat beasts, a good number to hand, prices lower. Fat sheep, a little better trade. Stores, some very good lots shown and trade slow. Fat pigs, not so many to hand; prices unchanged. Stores, a good trade all round.

Calne.—Present prices for prime pigs, in lots of not less than 10, on rail within 100 miles of Calne:—

Prime stores.	Thickness of fat in any part of the back.	Price per sc.
6 sc 10 lbs to 9 sc 10 lbs	2½ in. and under..	9s 6d
Under 10 sc 10 lbs	Not exceeding 2¾ in.	9s 0d
Under 11 sc 10 lbs	Not exceeding 2¾ in.	8s 6d
Under 12 sc	Not exceeding 3 in.	—

Any pigs outside these limits at their value. Half truck, 12 pigs. Whole truck, 25.—CHARLES AND THOMAS HARRIS AND CO., Limited, Calne, Wilts.

Canterbury, Saturday.—Supplies were very limited, but there was not much demand. Prices in consequence continued at their recent levels, ewes selling at from 25s to 32s, and lambs making up to about 20s apiece for the best.

Carlisle, Saturday.—Smaller show of Irish store cattle, between 200 and 300 heifers being offered on The Sands. Fair attendance of buyers, and trade steady at £5 5s to £8 10s for the smaller beasts, up to £16 10s for the best specimens. Pigs a small show; slow sale, at 21s to 25s.

Chichester, Wednesday.— Smaller supply of fat stock, with a slow trade at rather lower prices. Large supply of store sheep, but here again business ruled dull without improvement in values.

Dorchester, Saturday.— A good all-round supply, especially of fat stock. Trade was dull, except for the best descriptions. Heifers and calves sold well at £16 to £20; cows and calves, £11 to £15; barreners, £9 to £14 10s; fat cows, £14 to £17; store bulls, £9 to £15. Mutton in fair demand; ewes, 36s to 46s; wethers, 42s to 49s; lambs, 28s to 33s.

Dublin, Thursday.—Quieter trade all round for cattle. Prime qualities scarcely maintained last week's rates; thinly meated and inferior descriptions considerably lower in price and difficult to clear. Sheep rather a dragging trade at prices favouring buyers. Lambs easier sold at a slight advance for best qualities. Cattle (best), 32s to 35s per cwt; others, 27s to 31s per cwt. Mutton, 5½d to 7d per lb. Lambs, 18s to 36s each.—GANLY, SONS, AND CO.

Dumfries, Wednesday.—Large supply of stock, and good attendance of buyers. Best bullocks, to 39s 6d per live cwt; horned bullocks, to £19; ditto heifer, to £16; polled bullocks, to £13; ditto heifers, to £19; Galloway bullocks, to £15; Highland bullocks, to £16; Ayrshire cows, to £13. Large supply of sheep, which sold at late rates.

Edinburgh, Wednesday.—Large supplies of both cattle and sheep. Cheviot hogs, to 38s; greyfaces, 30s to 38s; best horned bullocks, £11 11s to £15 15s; stirks, £7 to £9. Large show of milch cows, but slow sale; best shorthorns, £22 to £24 10s; secondaries, £19 to £20; Ayrshires, to £18, and down to £14 10s.

Gisburn, Wednesday.—Moderate number of cattle, principally English bred, with an average turnover in business at about unaltered prices. Lambs, 24s to 28s 6d; Scotch sheep, 23s to 26s; beef, 7s to 8s per stone.

Glasgow, Wednesday.—Supplies small. Trade better. Prices firmer. Top Scotch cattle, 72s; secondary, 64s to 66s; top Irish, 64s per cwt. Top mutton, 9d to 9¼d; secondary, 8d to 8½d; lamb, 8d to 9d per lb. Dead meat slow; values keeping well up, as supplies are short; best States cattle, 6d to 6½d; best cows, 5½d to 7¾d, and 8d per lb.

Hereford, Wednesday.—Return of stock brought to the cattle market this day:—Bullocks and cows 330, calves 100, sheep 1,696, lambs 1,172, pigs (fat and sows) 6, sucking pigs 4, pigs (stores, not more than ten) 143, pigs (stores, more than ten) 75, horses 4, colts 1. Prices of stock: Best beef, 6d to 7d per lb; wether sheep, 6¾d to 8d per lb; ewes, 5½d to 6d per lb; veal, 9d per lb; lamb, 9½d per lb; pork, 4½d to 5d per lb; bacon, 4d to 5d per lb.

Ipswich, Tuesday.—Messrs. Robt. Bond and Sons report a good supply of cattle, which included a considerable proportion of medium weights. Distant and local buyers were well represented and all the best descriptions sold freely at last week's rates, but secondary sorts realised less money, the best animals making up to £23. Fat lambs were not so numerous and only the best maintained recent values. Fat sheep were fairly represented and prices ruled slightly in favour of buyers. In the store sheep department there was a large entry of lambs and ewes, over a thousand being penned; trade was very slow, and prices appear to go from bad to worse, but nevertheless breeders had made up their minds to sell and in consequence nearly every lot was disposed of, the best lambs making up to 28s 9d. A large entry of calves, which sold at lower prices. Weaning calves made up to 48s, those for killing £3 17s 6d. Fat swine were well represented, but few stores were on offer; prices ruled lower all round. Several cows were on offer and sold well up to £19. Numbers at sales and market:—Horses, 29; beasts, 482; sheep, 4,035; swine, 885; calves, 73.

Leicester, Saturday.—Smaller supplies of stock in good condition. Milch cows in good demand, but bullocks neglected at lower prices. Milch cows made £17 to £23 per head; bullocks, £10 to £13. Calves a very slow trade.

Lincoln, Friday.—Small show all round. A milch cow made £22, but the ruling figure was from £15 to £20 each. Other classes of beasts made late rates.

Newcastle, Tuesday.— Large supplies, prices drooping. Numbers:—Cattle, 122; sheep and lambs, 9,129; calves, 93; pigs, 500. Prices (sinking the offal):—Beef, 5s 6d to 8s 10½d per stone; pork, 5s to 7s 9d per stone; mutton, 6½d to 8¾d; lamb, 8½d to 9d; veal, 5d to 8d per lb.

Norwich, Saturday.—The show of store beasts here to-day was moderate; trade was quiet at late rates. The supply of fat beasts was larger than for some time past; trade was dull at 7s 6d to 8s 2d and 8s 3d per 14lb. The supply of store sheep showed some falling off; business was quiet at about former terms, lambs making 16s to 34s, and keeping shearlings 36s to 45s per head. Fat sheep, which were in moderate supply, were dull at 5s 6d to 6s per 14lb.

Romford, Wednesday.—There was about an average supply of fat beasts, and trade was very bad. Best animals made 4s 6d to 4s 8d, and middlings 4s to 4s 2d per stone. Calves were in average supply, and sold at 4s 8d to 5s per stone. Sheep were in short supply, and trade was slow. Best sheep made 5s 4d to 5s 6d, and middlings 5s to 5s 2d per stone. Lambs were in short supply, and trade was a little better at 6s to 6s 4d per stone. There were no store beasts on offer. The pig trade was bad.

Salford, Tuesday.—There was an increase in the number of cattle on offer. Trade ruled slow, and prices were in favour of the buyer. The supply of sheep and lambs was smaller, the bulk of the decrease being in lambs. There was a better trade for both at last week's full prices. A smaller supply of calves, and a fair demand at about last market day's prices. Quotations: Cattle, 5d to 7½d; sheep, 6¾d to 9d; lambs, 8d to 9d; calves, 5d to 7d per lb. At market—Cattle, 1,634; sheep and lambs, 16,338; calves, 145; pigs, 48.

Sheffield, Tuesday.—The supply of milch beasts was small, but there was a fair demand. The best lots made from £17 to £21; others, £13 to £16.

Shrewsbury Tuesday.—Store sheep better. Cows with calves good. Store cattle slow. Pigs and beef fair. Small supply all round. Quotations—Lamb, 7d to 9½d; beef, 6½d to 7½d; mutton, 6d to 8½d; and veal, 8d to 9d per lb. Porket pigs, 8s 6d to 10s, and baconers, 8s to 9s per score. Cows, with calves, up to £21 15s. Numbers offered—141 cattle, 48 cows, with calves, 1,780 sheep and lambs, 115 calves, 19 fat, 82 porket, and 242 store pigs, 27 horses.

Spalding, Tuesday.— There was a good show of both beasts and sheep, but trade in both departments was affected by the weather. Beef, 7s to 7s 6d, being 6d per stone less money. Sheep were difficult to sell, and the price for mutton dropped to 7½d per lb, for the best sorts.

Stockton, Wednesday.—There were on offer 186 cattle, 4

calves, 255 sheep, and 233 lambs. The market was quiet throughout. A small show of best cattle made 8s 6d; rougher kinds, 7s to 7s 6d per stone; calves, 6d to 8d; young sheep, 8½d; lambs, 8¾d to 9½d; ewes, 7d; tups, 5d to 6d per lb.

Taunton, Saturday.—Small supply, moderate attendance, and slow trade.

Thame, Tuesday.—There was a large supply of stock at market, but the intense heat had a depressing effect upon trade, which was in buyers' favour as compared with the last few weeks. Mr. Bond's sale comprised 94 fat beasts, 59 fat and weaning calves, 358 fat sheep and lambs and stores, and 59 fat and store pigs. Fat bullocks made £17 to £20; fat heifers £16 to £21 5s; fat wethers, 45s to 50s; fat ewes, 33s to 48s; fat lambs, 31s to 40s; store lambs, 25s to 27s 6d. Fat pigs, 9s 6d per score. Stores made late prices.

Wakefield, Wednesday.—Trade slow for both beef and mutton, butchers indisposed to buy heavily. Best beef made 7d per lb and other kinds 5d to 6½d. Best small sheep made up to 8¼d; large sheep, 7d to 7¼d. Ewes and tups, 5½d to 6d; lambs, 8d to 8¾d per lb. Numbers penned:—Fat beasts, 1,381; sheep, 4,592.

Wakefield. Wednesday.—The continuance of tropical weather caused trade to rule very dull, more particularly for beef, butchers chiefly operating in lamb, small mutton, and veal. To supply the limited wants of buyers, of whom there was not an average attendance, there were 1,381 fat beasts, against 1,411 and 1,405 at the two preceding markets, and 4,592 sheep and lambs, against 4,762 and 4,914. Choice beef was scarce, but other qualities were freely offered. Heifers and prime bullocks 7d per lb., good useful beef 6½d to 6¾d, and inferior lots 5d to 6d. Lambs met with a fa rly good inquiry at 8½d to 9d, choice small sheep moved off steadily at 8d to 8¼d, good strong sheep 7d to 7½d, and ewes, tups, and heavy and fat sheep were nearly unsaleable at 6¼d to 6¾d per lb. A fair supply of fat calves at 5½d to 7¾d per lb, breeding calves 20s to 25s each. Milch cows were freely offered, and met with a seasonable demand at prices ranging from £16 to £23 each.

Wolverhampton, Wednesday.—Large supply, with very slow trade all round. Beef, 6½d to 7¼d per lb; mutton, 7d to 8¼d per lb; veal, 6¼d to 7½d per lb; lamb, 7d to 8¼d per lb. Bacon pigs, 9s 6d per score; porkets, 9s 6d to 10s per score; sows, 7s per score.

Worcester, Saturday.—Market well supplied, but the hot weather checks trade. Beef sold slowly at late rates. Mutton quiet and unaltered. Both fat and rearing calves sold at improved prices. Beef, 7d to 8d; inferior, 5d to 7d. Wether mutton, 7d to 8d; ewes, 5d to 6d; and calves, 7d to 8d per lb.

Worksop, Wednesday.—Fair show of beasts, and large show of sheep, the former selling at fully late rates, while sheep were down in price. Best beef, 7s 6d to 8s 6d per stone; shearling mutton, 7d to 8d; ewes, 5d to 6d per lb.

York, Thursday.—Beef, 7s 6d to 8s per stone; mutton, 7d to 8d per lb. Very small number of stock, both English and Irish store cattle being scarce; but as there was a very moderate attendance the supply was equal to the demand. Most business was done in three-year-old bullocks, which made up to £15.

FOREIGN.

Yorkhill, Tuesday.—A sale of Canadian cattle was held in the afternoon, when there were penned in the lairages 427 cattle landed by the Brazilian (s), from Montreal. Bullocks, as regards quality, were fully up to the average, many of them being prime beasts in a well-finished condition. Bulls were fully up to the usual standard, and showed well. There was a large attendance of local buyers and a number from the surrounding districts. The dead-weight quotations were rather higher than those ruling last week, and may be given as follows:—Best bullocks, 65s per cwt; and for really choice up to 68s; secondary and heavier or rougher animals, 63s; best bulls, 56s; and secondary, 54s.

FEEDING STUFFS.

Mark Lane, Monday.—Linseed Cakes: There is a very small quantity of foreign on offer, but sufficient to meet the demand, which continues extremely limited. At the same time the market remains firm at last Monday's prices for Russians, Americans, and Calcutta. London made move slowly, but are fully as dear. Cotton Cakes.—Stocks of Egyptian are light, but a steamer parcel nearly due offers on slightly easier terms, while for November-April shipment sellers ask last week's prices. London are unaltered. Decorticated cake and meal sell steadily and are unchanged, but there are sellers of September-December meal at 5s per ton less money. Rape cakes neglected. Maize germ meal is still scarce on spot and needy buyers have to pay an advance of 1s 3d for American, but some business has been done at a reduction of 5s for July-August despatch. Rice meal is again dearer, 2s 6d per ton more money having been paid for July-August shipment.

—PINNOCK BROS., Mark Lane.

London, Thursday.—Linseed.—The market has been quiet and prices rather easier. Calcutta, spot, London, is quoted 54s 6d, passage 54s 6d to 55s, according to position, July-August, 53s 6d; August-September, 53s 3d; September-October, 53s. Hull.—Linseed continues neglected, spot and passage, Calcutta, 55s 6d. Duluth, September-November 48s 6d. Azov, Black Sea, September-October 49s, accepted by re-sellers. To the Continent, Bombay is quoted March-May 47s 9d. Calcutta to Hamburg, July-August, 55s; August-September, 54s 9d. Linseed oil.—The demand has fallen off, causing prices to decline considerably. We quote spot, pipes, £33 5s; barrels, £33 10s; August, £32 15s to £33; September-December, £29 15s to £29 17s 6d; January-April, £27. Hull spot, naked, month, £33 10s; August, £32; September-December, £28 10s; January-April, £26. Linseed cakes continue firm. London made £7 17s 6d to £8 2s 6d. Russian, £7 7s 6d to £7 12s 6d ex dock. American Westerns at £7 5s to £7 12s 6d. Cotton cakes quiet and unchanged. London made £4 5s to £4 7s 6d. Rapeseed continues neglected.—To the Continent brown Calcutta afloat to Hamburgh has been sold at 40s. Yellow Cawnpore, July-August, is held for 44s. Brown Cawnpore, 42s. Danubian market, July-August, 38s 9d. Ravison to Hull September-October, 28s 6d. Cottonseed.—Firm in Alexandria, but very slow here, passage London, £6 8s 9d sellers; July, £6 8s 9d; August, £6 8s 9d; November-January, £6 2s 6d. Hull quiet, Spot, we quote £6 5s; August, £6 6s 3d; October £6 7s 6d nearest value, November-January, £6 1s 3d. Cargoes, October, £6 12s 6d. November, £6 10s.—THE PRODUCE BROKERS COMPANY, LIMITED.

Hull, Tuesday.—Linseed.—The arrivals are 4,619 qrs from Petersburg. The market has been quiet throughout the week. Calcutta, arrived, offering at 55s 6d, without buyers. Black Sea quoted at 49s 3d, 49s would buy if bid. Petersburg, quite nominal, 52s asked July-August, 51s September-October. Riga, Libau, and Konigsberg on re sale at 47s 6d. American Duluth, 48s 9d nearest. River Plate, nothing offering. Cottonseed.—The market has been firm during the week, but the amount of business passing very insignificant. Small lots on spot and this month's shipment sold at £6 3s 9d to £6 5s, and August made £6 5s to £6 6s 3d. A few sales, November-January, transpired at £5 18s 9d to £6 1s 3d, with sellers to-day at latter price, and occasional buyers at £6. Oils.—Export for the week ending July 17th, 1900.—Linseed oil: 36 Germany, 10 Sweden; total, 76 tons. Cotton oil: 14 Belgium, 35 Denmark, 7 France, 115 Germany, 45 Holland, 21 Norway, 2 Sweden; total, 239 tons. The market is: Linseed oil: 33s 3d spot, 33s month, 28s 6d September-December, 25s 9d January-April. Cotton oil: 22s 6d spot, 18s 7½d November-April. Rape oil: Black Sea naked, 26s spot, first quality naked, 27s spot. Oil seed cakes.—A very quiet demand at previous rates. Hemp.—Very firm.—KEIGHLEY MANSTED AND CO.

WATERLOO ROUND FEEDING CAKES, £6 17s 6d PER TON; WATERLOO ROUND 97 PER CENT. PURE LINSEED CAKES, £8 17s. 6d. PER TON; WATERLOO ANGLO SHAPE 97 PER CENT. PURE LINSEED CAKES, £8 15s. 0d. PER TON; WATERLOO 97 PER CENT. PURE EGYPTIAN COTTONSEED CAKES, £4 7s 6d PER TON. ALL F.O.R. HULL.

HAY AND STRAW.

Whitechapel, Saturday.—Short supplies of hay and straw were received, and a fair business was done, prices being steady. Best clover, 85s to 100s; inferior ditto, 80s to 85s; specially picked hay, 90s; good ditto, 80s to 95s; inferior ditto, 50s to 60s; mixture and sainfoin, 70s to 87s 6d; and straw, 25s to 30s per load.

Cumberland. Saturday.—Best selected hay, 80s to 90s; good ditto, 75s to 80s; inferior ditto, 50s to 75s; prime clover, 85s to 97s 6d; good ditto, 70s to 85s; inferior ditto, 60s to 70s; best mixture, 84s to 90s; straw, 30s to 36s per load.

FOREIGN HAY AND STRAW.

London, Saturday.—Owing to the stock of old clover being exhausted and the new crop not being yet ready for shipment, there is nothing practically passing in this article, and prices are consequently merely nominal. Hay has been arriving rather more freely, and commands full prices. Straw in good demand. We quote Canadian timothy and clover mixture, 82s 6d to 85s; Dutch and French clover, 82s 6d to 85s (nominal); good Dutch hay, 67s 6d; common Dutch, 60s; large bale French wheat straw, 48s; small ditto, 44s 6d; small bale oat straw, 43s. All these prices are per ton delivered by barge alongside.—FULLER AND PRENTIS, 9 and 10, Great Tower Street, E.C.

MANURES.

Liverpool, Friday.—The customary quietude prevails in the market for fertilizers and feeding stuffs, and the following are the current values:—Nitrate of soda, best quality, i.e., guaranteed 95 per cent. pure, in bags, £8 2s 6d to £8 7s 6d per ton; East India bone meal, in bags, £4 5s per ton; kainit, prime, 23 per cent., in bags, £2 7s 6d to £2 10s per ton; linseed cake, American thin oblong, fair to prime, in bags, £7 7s 6d to £7 15s per ton; linseed cake, English, prime, in bulk, £8 to £8 5s per ton; linseed cake, foreign round, prime, in bags, £8 per ton; cottonseed cake, N.A., decorticated, prime, in bags, £6 10s to £6 15s per ton; cottonseed cake, English, decorticated, prime, soft, in bags, £6 18s 9d to £7 per ton; cottonseed cake, English, undecorticated, prime, in bulk, £4 5s to £4 7s 6d per ton; cottonseed (crushed), 20 to 25 per cent. oil, prime, in bags, £6 15s per ton; maize germ meal, English, prime, in bags £5 2s 6d to £5 5s per ton; rice meal Rangoon, as imported, in bags, £4 5s to £4 8s 9d per ton; Indian meal, coarse to fine grinding, prime, in bulk, 11s 3d to 11s 6d per 240lb; linseed, fine bold feeding, in bags, £2 19s 6d to £3 per qr 416lb; N.A. cloverseed, new red, fair to good, in bags, nominal; D.N.S. brand, superphosphate of lime, guaranteed, 25 to 27 sol., in bags, nominal; ditto, ditto, guaranteed, 30 to 31 sol., in bags, nominal; ditto, ditto, guaranteed, 35 to 36 sol. in bags, nominal; basic slag, prime quality, guaranteed 30 to 35 per cent. phos., in bags, nominal; ditto, ditto, guaranteed 35 to 40 per cent. phos., in bags, nominal; ditto, finest quality, guaranteed 38 to 45 per cent. phos., in bags, nominal.—H. JONES LANGAR AND CO.

THE BALTIC.

The hot weather has made it difficult to place arrived cargoes, but the following sales have occurred:—Californian wheat at 30s. 3d., Argentine wheat at 28s., Persian barley at 17s. 3d., Libau 320lb. oats at 14s. 6d., and 304lb. at 13s. 3d. With respect to cargoes actually afloat the following prices rule:—

ON PASSAGE.	To-day. s. d.		A Year Ago. s. d.
Australian wheat	31 0	.....	29 0
Californian „	30 6	.....	29 6
Argentine „	28 0	.....	26 9
No. 1 Northern wheat.....	30 6	.....	28 0
American maize.....	18 9	.....	16 6
Argentine „	19 9	.....	17 0
Russian „	22 6	.....	19 6
„ barley	20 0	.....	18 0
Persian „	17 6	.....	17 0

As all nine articles show a rise on the twelve-month, the floating cargo trade may be held to be in a fairly healthy position.

Sales for future shipment have been as follows:—Wheat: Californian, 30s. 9d.; Australian, 30s. 9d.; New Zealand, 30s.; No. 2 Red Winter, 29s. 6d.; No. 1 Northern, 30s. 3d.; Argentine, 27s. 9d.; and Odessa Ghirka, 29s. 6d. per qr. Maize: Argentine, 20s. 6d.; American, 18s. 9d.; and Roumanian, 22s. per qr. Barley: Azoff, 18s. 6d.; Persian, 17s. and Californian brewing, 26s. per qr. Beans: Saida, 30s.; Smyrna, 28s. 3d.; and Morocco, 26s. 6d. per qr. Peas: Canadian white, 27s. 9d.; and Wisconsin, 46s. per qr.

Cargoes of oilseeds are not much in favour, but fairly high prices rule current. Calcutta linseed has made 54s. arrived. Ravison rapeseed, 29s. for September shipment. For the new Egyptian crop of cottonseed, Nov. shipment, £6 per ton is now accepted.

Of linseed 140,000qrs., of rapeseed 5,000qrs., and of cotton-seed 17,000 tons are on passage. A year ago 129,000qrs. of linseed, 5,500 qrs. of rapeseed and 4,000 tons of cotton seed were afloat.

The arrivals of grain and seed laden vessels at ports of call for the week were 7 wheat, 1 Buenos Ayres, 1 Colastine, 1 Concepcion del Uruguay, 2 Rosario, 1 San Francisco, 1 Santa Fé); total, 7.

The sailings of grain and seed laden vessels from ports-of-call for the week were 7 wheat (1 Brightlingsea, 1 Cork, 1 Emden, 1 Galway, 1 Hull, 1 Limerick, 1 Montrose); total, 7.

Since January 1, 1900, the total arrivals have been 205 wheat, 13 wheat and barley, 6 flour, 8 maize, 1 maize and oats, 21 barley, 14 beans, 7 locust beans, 1 linseed, 2 canary-seed, 5 valonea; total, 283.

Last year during the same time the arrivals were 176 wheat, 8 flour, 3 maize, 6 barley, 1 barley and beans, 1 rye, barley, and oats, 6 beans, 1 locust beans, 4 linseed, 4 canary-seed, and 7 valonea; total, 217.

LETTER TO THE EDITOR.

Sheep Scab.

Sir,—At the recent meeting of the Herefordshire County Council, I carried, with great unanimity, the following resolution: "That as hitherto the efforts for rendering the flocks of the United Kingdom free from sheep scab have proved futile, this Council earnestly prays that the Board of Agriculture will enforce such regulations that the flocks of the country may be rendered free from the disease which has for so many years inflicted such serious losses upon the owners of sheep throughout the kingdom."

The necessity of rendering the flocks on the mountains and common lands of the country free appears to have been felt so far back as the thirty-eighth year of the reign of George III., when an Act was passed enabling the local authorities of the country to impose a heavy fine upon any one who may turn sheep with the disease upon these lands.

But it does not appear to have been enforced, and they are become the established nurseries of the disease. Mr. Chaplin, when President of the Board of Agriculture, obtained power to prohibit the importation of sheep from foreign countries that sent us large numbers of sheep with the disease, but, unfortunately, he did not put in force any regulations for rendering the home flocks free. Powers were since given to local authorities to prohibit sheep being admitted from the area of other local authorities without being dipped in some well-known composition for killing the acari. Under that arrangement, a great interference with the trade of the country took place, and much heartburning was the result. It was then thought an extensive area could be formed with this object in view, and the counties of Denbigh, Flint, Montgomery, Radnor, Salop, Worcester, and Hereford united. That arrangement acts fairly satisfactory for the counties entirely within the area, but seriously interferes with the trade in the surrounding markets. In fact, it is a piece of patchwork legislation that cannot be approved of in a free country, and reflects upon the intelligence of the age in which we live.

The Chief Constables have to make a return of the disease in each county, which must be furnished to them by the owners of the sheep. The following appears as the returns of the month ending September 30th, 1899: Denbigh, two cases; Hereford, no case; Montgomery, ditto; Radnor, ditto; Salop, one case; Worcester, no case; Flint, no return, but four cases admitted. The returns for January 8th, 1900: Denbigh, twenty-three cases; Flint, ten; Hereford, nine; Montgomery, twenty-six; Radnor, ten; Salop, twenty-five; Worcester, six. This shows how little reliance can be placed upon the returns after upwards of 100 years of legislation, and strikingly contrasts with the result of some six years' legislation in the Australasian colonies, which were rendered free in that period, with their almost boundless areas of unenclosed lands and enormous flocks of sheep.

Some years ago, when writing on the subject, I suggested the construction of swimming-baths at convenient intervals. That the sheep on common lands should be assembled and placed to pass through a swimming-bath, that some arrangement be used to tie the water, so that any not dipped may be readily noticed in order to ensure all being done. I again throw that out as a practical suggestion for the local authorities in the district where so much of the evil exists.

Although all good flockmasters regularly dip their sheep once, if not twice, every year, for which they are well remunerated by the well-doing of the sheep in both meat and wool, yet I know [illegible] reasons against imposing on ordinary flocks which would need such regulations which would not apply to the sheep on the [illegible]

Holme, Hereford, July 26th. T. DUCKHAM.

The June number of the "Agricultural Gazette of New South Wales," which is issued by the direction of the Hon. J. L. Fegan, M.P., Secretary for Mines and Agriculture, contains its usual large amount of interesting and useful matter pertaining to the agriculture of New South Wales, and there are several fine illustrations.

LIVE STOCK.

OUR ILLUSTRATIONS.

The Shorthorn Aldsworth Jewel, page 155, is the property of, and was bred by, Messrs. R. and W. T. Garne, Aldsworth, Northleach, R.S.O., Glos. She was born on January 24, 1898, her sire being Now or Never 67544, and her dam Rosedale Jewel, by Martinet 59455. At the Oxfordshire Agricultural Society's Show at Oxford in May she won first prize in her class, and the champion prize for the best cow or heifer eligible for entry in Coates's Herd Book, whilst at the Bath and West Show at Bath she again won first in her class, but at the Royal Show at York she was only reserve and highly commended. At the Gloucestershire Show last week she, however, came into second position.

The Hackney stallion Rodasor, page 152, is a three-year-old chestnut by Rosador 4964 out of Garton Primrose 7905, by Garton Denmark 3618, and is the property of Mr. George Wilson, Cedar House, Garton, Driffield, York, his breeders being Mr. G. Wilson and Mr. E. T. Barber, Haverfield, Patrington, Hull. At the Hackney Horse Society's Show at the Royal Agricultural Hall, Islington, in March last, Rodasor won first prize in the class for three-year-old stallions not exceeding 15.1 hands; whilst at the Royal Agricultural Society's Show at York he won first prize in his class and was reserve for the Hackney Horse Society's champion gold medal for the best Hackney stallion.

As will be seen from a report on another page, Mr. Henry Dudding, Riby Grove, Great Grimsby, last week again obtained the fine sum of 1,000gs. for one of his shearling rams. This ram of which we give a portrait on page 149 was born on February 23rd, and at the Royal Show at York was awarded the first prize in its class, and also the Lincoln Long-wool Sheep Breeders' Association's champion prize for the best Lincoln ram.

STOCK AND SHOW NOTES

By Herdsman.

In connection with the forthcoming show of the Warwickshire Agricultural Society at Coventry, for which £1,200 is offered in prizes, I beg to remind intending exhibitors that the entries close on August 4th, and with double fees August 7th.

The eleventh annual show of the Oxted and Godstone Agricultural Association takes place on Monday next, in the Recreation Ground, Oxted. Handsome class prizes and also several silver medals are offered for hunters, Hackneys, and Shire horses, and also liberal prizes for all kinds of live stock and other farm and garden produce. There will be driving competitions, jumping trials of hunters, and the band of 1st V.B. the Queen's Royal West Surrey Regiment will provide pleasant music throughout the day. The London, Brighton, and South Coast Railway Company have arranged for several cheap excursions from various surrounding towns, and also one from Victoria.

Mr. J. J. Cridlan, of Maisemore Park, Gloucester, has favoured me with a copy of a private herd book of his well-known herd of Aberdeen-Angus cattle. I see that at the present time he has four stock bulls, nine bull calves, a little over twenty-five cows, four two-year-old heifers, eight yearlings and ten heifer calves. This herd, I may mention, can be seen at any time by appointment. The farm is situated in the rich valley of the Severn, about two miles from the Gloucester railway station.

I beg to call attention to the fact that to-morrow (Tuesday) is the date of the Cambridgeshire and Isle of Ely Agricultural Society's annual show of horses, cattle, sheep, dairy produce, etc., which will be held in Mr. H. Coy's paddock at New Barns, Ely. From the copy of the programme I have had sent me, I see there will be jumping competitions for both ladies and gentlemen riders, also butter-making competitions, lectures, and demonstrations, etc. It will thus be seen that there are plenty of attractions for visitors, and if the weather is favourable, there will undoubtedly be a big attendance.

It is exceedingly difficult (says the *Standard*) to make foreigners understand the necessity of the most stringent regulations for preventing the importation to this country of even a single animal affected with a contagious or infectious disease. Their own interest warps their judgment, and they think that we should strain a point to promote their advantage. For example, there are many persons in Argentina who plead that, as foot-and-mouth disease is nearly extinct, or said to be so, in the province of Buenos Ayres, cattle and sheep from that province should be allowed to land in England. But, apart from the fact that the disease must be entirely stamped out in a tract of country before it is a safe source of imported live stock, it would be the height of culpable recklessness on the part of our authorities to import from one province of Argentina while the disease was rife in adjoining ones. The former might be free from disease to-day, and subject to several outbreaks to-morrow, and infected animals might be shipped before their infection was known.

Dr. Otto Voges, Chief of the Argentine Bacteriological Department, on being interviewed upon the subject by a representative of the *Buenos Ayres Standard*, declared that it was unreasonable on the part of the British Government to keep our ports closed against Argentine animals. He calculates that the country is losing two million paper dollars a month through the exclusion, counting only the difference between the receipts for meat and the amount that the animals alive would realise in British markets. He suggests that a competent commission of veterinary surgeons should be appointed in Argentina, or sent there, to see that only sound animals are shipped; but we learned long ago that to trust to inspection, in a disease spread by mediate infection, is to lean on a broken reed. He urges, further, that we ought to be anxious to get cheap meat for our working classes; but, as a matter of fact, we get cheaper meat by obtaining it in carcase form than by importing animals alive.

This, however, is a side issue, and the main point to consider (adds the *Standard*) is sanitary safety. We should lose ten times as much by allowing foot-and-mouth disease to obtain a foothold in this country as we miss through excluding Argentine live stock, and Dr. Voges may feel assured that we shall not open our ports to those animals until the whole of Argentina is entirely free from the disease.

A French dairyman has recently stated that he can increase the yield of milk per cow to the extent of 25 per cent. by giving the animal daily a bucket of warm water in which is mixed a pint of salt. Anyone might make a trial without disadvantage. But the question of quality arises. Will the milk be less rich per cent. in butter-fat? An up-to-date dairyman might try the salt and warm water, and then test the milk. Afterwards, let me know the result.

Mr. Cary Cole, of Manor House, Winterbourne Stoke, Salisbury, has this year only exhibited a few pens of his well-known Hampshire Down sheep at the Wilts County, Royal Counties, and Royal Shows, and at the Salisbury Great Prize Sheep Fair, but the sheep shown have very fully sustained the good reputation of this choice flock, seven prizes for lambs and three for older rams, besides reserves, h.c.'s, etc., having been won, amongst them first for old rams at Winchester, first and reserve champion for best Hampshire Down ram at York, first prize and twenty-five guinea challenge cup for best pen of Hampshire Down ram lambs at the Salisbury Great Prize Sheep Fair on the 16th inst. The Salisbury challenge cup is looked on by Hampshire breeders as one of the most valued prizes in consequence of pens of eight lambs being shown, and there being several of the leading flocks near Salisbury, it provides a very severe test of the average quality of the ram lambs just previous to the sales.

This year the Royal, Bath and West, and Royal Counties prize winner, entering with a pen from one of the best flocks beyond London, made the competition very keen. The judges being so quickly unanimous as to the winners of the challenge cup proved the excellence of the exhibit from Winterbourne Stoke. This flock is very popular with exporters, and since the Royal Show five consignments have been sold for the United States and South America, amongst them being twenty shearling rams, many of which Mr. Coles has repurchased from his clients at his 1899 sale. There is no doubt that the sheep to be offered on Friday, August 3rd, will prove the auctioneer's remarks on the sale catalogues, "that they will comprise the best selection ever placed before the public by Mr. Coles," and intending purchasers of first-class sheep should be well repaid by attending this sale.

That Messrs. Alfred Mansell and Co., the well-known live stock exporters of Shrewsbury, have been busy in their particular line of business during the month of July is fully borne out by the fact that from the 14th to 24th inst. they shipped stock to Canada, the United States, the Argentine, and Australia which they insured to over £10,680, the following being a brief summary of their shipments during that period:—

On Saturday, July 14th, the ss. "Lakonia" (Donaldson Bros.) sailed from Glasgow with 56 cattle and 223 sheep on board, bound for Quebec. The cattle were all Scotch Shorthorns, while the sheep comprised 123 Shropshires, 10 Oxfords, 41 Cotswolds, 32 Hampshires, and 17 Lincolns, the whole making one of the largest shipments which has left these shores. Nine of the Cotswolds were on account of Mr. McGillivray, and the remaining 214 sheep and 56 cattle were for Mr. Robert Miller, of Canada, who personally accompanied the stock.

The ss. "Lycia" (Elder Dempster Line) sailed on Thursday, July 19th, having on board 106 sheep, all Shropshires, which were purchased on acount of W. C. Edwards, Esq., M.P. The ss. "Lycia" was also bound for Quebec.

New York was the port for which the ss. "Bovic" (White Star Line) was bound, that ship sailing from Liverpool on Friday, July 20th, with 109 sheep—Shropshires, Hampshires, Oxfords, and Cotswolds—this being a select shipment on account of Mr. Geo. Allen, Mr. R. J. Stone, and Mr. J. Milton, the latter of which gentlemen sailed per the "Bovic."

The following day, Saturday, July 21st, Mr. H. T. Harding, of Buenos Ayres, sailed in the ss. "Highland Chief" for that port, having on board five Shorthorn and one Hereford bulls, 47 Shropshire rams and ewes, six Hampshire rams, and one Romney Marsh ram. Messrs. Mansell also purchased on account of Mr. Harding about 20 head of Plymouth Rock, Minorca, and silver Wyandotte fowl.

The first shipment of this firm for the present season to Australia was made on July 24th, when Mr. G. Sauerbier sailed per the ss. "Wilcannia" from London, acompanied by 17 Shropshire sheep of high quality, and four Southdowns, the latter purchased from the Pagham Harbour Company. The port in this instance is Adelaide.

I may publish further particulars of each of the above shipments. I hear Messrs. Mansell and Co. have still large shipments to make to Russia and Germany, and further ones for Australia, the States, and Canada.

The Buenos Ayres correspondent of the *Times* says: "A trial shipment is being made by the steamer 'Southern Cross' of fresh meat preserved by sterilising air in a special chamber. The Argentine Government and stockbreeders attach enormous importance to this new discovery."

Sale of Polo Ponies.—Much interest was manifested in Messrs. Tattersall's sale at Albert Gate on Monday, for in the catalogue were included some of the most famous of the late Lord Kensington's polo ponies. The unfortunate nobleman, who recently lost his life in South Africa, was an enthusiastic polo player, and his stud of ponies, which was one of the finest in the country, included those champion animals Policy and Sailor, for each of which he gave 750gs., which has the distinction of being the record price ever realised by polo ponies. As the polo season is rapidly nearing a close, however, the prices were not so high on Monday. In fact, Policy was withdrawn at 140gs., but Sailor reached 430gs., and Sermon, a weight carrier, was knocked down for 510gs. Draughts from the polo stables of Sir Patteson Nickalls, Lord Villiers, and Mr. Arthur Rawlinson were also on offer. Pearly, who won the polo scurry at Ranelagh on Saturday afternoon, ridden by Lord Villiers, fetched 400gs., and Gunshot, one of Sir Patteson Nickalls' lot, went up to 160gs., but otherwise there were no really big prices.

CATTLE.

Sale of Riby Grove Shorthorns and Lincoln Longwool Sheep.

Another Thousand Guinea Ram.

The annual sale of a large portion of the herd of Shorthorns and flock of Lincoln sheep belonging to Mr. Henry Dudding, which took place on Tuesday at Riby Grove, brought together a large company of breeders and exporters. The cattle were brought out in their usual good condition, and most of the highest priced lots were purchased for shipment to South America. The highest priced cow, Lady 21st, a capital roan, made 360gs., the purchaser being Mr. F. Miller, and the same price was paid for the roan bull Victorious, Mr. E. A. Hambro being the buyer. Many of the others also made good prices, as the list of the lots sold will show. The sheep were a magnificent lot. The first animal out in the ring was a yearling ram (sire Sharpe Riby), which won first and champion prizes at the Royal Agricultural Society's show at York and at the Nottinghamshire Show, and the first prize as one of a pair and the champion prize at Leicester, first and champion at the Lincolnshire Show at Spalding, and first at the Yorkshire Show at Doncaster, 1900. Bidding commenced at 100gs., but soon rose to 500gs., and finally reached 1,000gs., at which figure it was purchased

1,000 Guineas was the Price paid for this Champion Lincoln Ram at Mr. Dudding's Sale on Tuesday.

by Mr. Miller, of Birkenhead, for exportation. The sale was most successful all round, the cattle averaging £63 10s. and the rams £77 18s. We give below a complete sale list:—

Total proceeds of sale [illegible]

Sale of Mr. Bickley's Shorthorns.

The fine herd of Shorthorns belonging to Mr. E. K. Bickley was disposed of by auction at The Fields, Ellesmere, on the 20th inst., the auctioneers being Messrs. Alfred Mansell and Co. (in company with Messrs. Parry and Bailey). Mr. Bickley has been well known as a breeder of pedigree stock for the last twenty years. He began with judicious purchases from the herds of Messrs. Thompson, Hobbs, Evans, Edmonds, Kendal, Chesters, Garne, J. Dodd, Willis, and Tremaine, and by making use of high-class bulls and selecting cows of proved quality as milk and beef producers, has won for his herd a great reputation in the Midlands and North Wales. Several of the bulls have been sold for exportation at a high figure, and although showing has not been largely followed, the young animals occasionally sent to the county and local shows have invariably met with success. It may be mentioned that at the recent show of the Shropshire and West Midland Agricultural Society Mr. Bickley was placed first, second, and third in the class for two-year-old heifers. The sale was held because of Mr. Bickley's time being occupied in his increased business.

After partaking of an excellent luncheon, the company adjourned to the sale ring. Mr. Mansell occupied the rostrum. After drawing attention to the high quality of the animals offered for sale, he said that during the last twenty years there had never been a more healthy demand for pedigree stock, and specially for Shorthorns, than there was at the present moment. They were buying with the certainty that they had a good home demand, supplemented by an equally good foreign demand, and the present satisfactory position of the market was more likely to improve than to fall off. He mentioned as a remarkable fact that out of a dozen animals taken at hazard from the herd and tested only one had re-acted. There was a keen demand, and prices satisfactory alike to buyers and sellers were realised. The top figure of the sale was fetched by Sarah, a fine two-year-old roan by Paraclete—Sallie, which was bought by Mr. Kellock for 65gs. She was a first prize winner at Oswestry Show in 1899, and again at the West Midland this year, the only two occasions on which she has been shown. Countess of Clarence and Lady Brailes, both promising heifers of the right type, each sold for 40gs. Of the six fine young bulls included in the sale, Dairyman's Choice, by Dairyman—Gipsy Lass, was most sought after, and he was ultimately knocked down for 38gs. There was also keen competition for Romeo, a roan by Paraclete—Coy Juliet, which was secured by Mr. Swan for 31gs. The averages were as follows:—Cows, £27 9s.; two-year-old heifers, £27 18s.; yearling heifers, £15 11s.; bulls, £28 1s. 9d.

The following is the sale list:

HORSES.

Pedigree Hackney Sale at Bishop's Stortford.

Few Hackney studs have been more prominently to the front at the leading shows than Mr. John Barker's, and the dispersal of his young stock at the Grange Stud Farm, Bishop's Stortford, on Tuesday, attracted a large gathering of well-known breeders from all parts of the county. The proceedings began with a luncheon in a large marquee. Sir Walter Gilbey, Bart., presided, and happily submitted the loyal toasts and "The health of Mr. John Barker and success to his sale." Sir Walter said he was pleased to meet so many interested in horses, and, although he had no bee in his bonnet as to hunting, he wished to point out that the breeding of Hackney horses and the bringing them up to perfection was a matter for the nation's good. Up till about the year 1812 the number of carriage horses imported into this country was between 3,000 and 4,000 per annum; the number of foreign horses imported in 1899 was about 44,000. This represented a value of £1,100,000, or £95,000 per month, paid by this country for foreign horses. Although not grudging the foreigner for sending his horses here, he thought the breeding of carriage horses ought to be encouraged in this country. He did not wish to pose as a philanthropist, but as a practical breeder of horses he said, "Let Hackney horses be bred at home." He was quite willing that the breeding of hunters should continue in Ireland, if they could bring people to see the good qualities of English-bred Hackneys. He believed that Mr. Barker was trying to stimulate the breeding of stud horses, and he had great pleasure in proposing his health. Mr. John Barker, who was heartily received, said he was obliged to confess that he had undertaken the breeding of Hackneys upon business lines, and he expected it to pay. The sale was then proceeded with, the filly and colt foals, which were a very good lot, making exceptionally high prices. The proceeds of the sale amounted to 2,471gs., an average of about 46½gs. Below we give a list of the various animals sold, the prices they realised, their purchasers, etc.:—

Important Sale of Hackney Ponies near Mansfield.

A large and representative company attended an important sale of pedigree Hackney ponies, the property of Mr. W. Hollins, of Berry Hill, Mansfield, which were offered on Wednesday by Messrs. Sexton, Grimwade, and Beck, auctioneers, of Peterborough. There were in all 64 lots, 37 being brood mares and foals, 16 harness horses, two three-year-old fillies, five two-year-old fillies, three yearlings, and one stallion. The highest price was paid by Sir Gilbert Greenall, Master of the Belvoir Hunt, who gave 410gs. for the brood mare Windsor Snorer. This splendid mare was foaled in 1889, and has won prizes in the Hackney Show, Royal Show at Leicester, Manchester, Birmingham, and Maidstone, etc., whilst her bay filly foal, foaled in 1900, was also purchased by Sir Gilbert Greenall for 150gs.

Among the other prices given for brood mares was 85gs. by Sir Gilbert Greenall for Eva Jones, foaled 1894; 82gs. by the same purchaser for Polly Perkins, foaled in 1890; and 66gs. by Mr. Morton for Lady Jane, foaled in 1891. The harness ponies also realised good prices, Mr. Morton paying 190gs. for Little Britannia, foaled in 1896, and the winner of numerous prizes at the Royal and many of the leading provincial shows. Camille and Trilby's Model, both roan mares, the former foaled in 1891 and the latter a year later, were bought by Mr. Taylor for 155gs., whilst 150gs. was the price paid by Mr. Hill for two brown geldings, foaled in 1895 and 1896 respectively; and 140gs. by Mr. Cockburn for Black Pearl, foaled in 1892, and Dame Agnes, foaled in 1894. The three-year-old fillies realised 32gs., 31gs., and 23gs.; and the two-year-olds, 40gs., 35gs., 28gs., and 25gs. The last lot offered was the brown stallion, Portwood Confidence, foaled in 1888, also an extensive prize-winner, which was secured by Mr. Nix for 72gs.

A Farmer Found Shot.—Mr. Thomas N. Marr, farmer, of Thornton Dale, near Scarborough, was found dead on Sunday near his house. He left his home with a gun, with which he was in the habit of shooting on the farm, and an hour later was discovered dead with a shot wound in the mouth and head.

SHEEP.

Birmirgham Show and Sale of Shropshire Sheep.

The breeders' sixty-eighth show and sale of Shropshire rams and ewes was conducted by Messrs. Lythall and Walters, on Thursday, July 26th. Mr. Charles Coxon, of Elford Park, Tamworth, judged, and his awards were as follows:—

Class 1.—For single Shearling Rams: 1st, Mr. M. Williams, Whiston Hall, Albrighton; 2nd, Mr. Denston Gibson, Harbury, Leamington; 3rd, Mr. E. Nock, Sutton Maddock, Shifnal; res. no., Mr. R. P. Cooper, Shenstone Court, Lichfield; h.c., Mr. H. Williams, Newton-on-the-Hill, Shrewsbury.

Class 2.—For pens of five Shearling Rams: 1st, Mr. R. P. Cooper; 2nd, Mr. M. Williams; 3rd, Mr. A. Bradburne, Moat Bank, Lichfield; 4th, Mr. G. L. Foster-Harter, Puckrup Hall, Tewkesbury; 5th, Mr. Denston Gibson; res. no., Mr. E. Nock; h.c., Mr. C. H. Jolliffe, Godlicote, Stratford-on-Avon.

Class 3.—For pens of thirty Shearling Ewes: 1st, Mr. M. Williams; 2nd, Mr. A. Bradburne; 3rd, Mr. A. S. Berry; 4th, Mr. E. Nock; 5th, Mr. H. C. G. Parker; res. no., Mr. D. Gibson.

Mr. A. Bradburne's made up to 12gs., Mr. E. Nock's up to 12gs., Mr. M. Williams' up to 33gs., Mr. H. Williams' up to 10gs., Mr. R. P. Cooper's 13gs., 11gs., 10gs., Mr. Denston Gibson's ewes made up to 56s., Mr. Arthur Bradburne's up to 55s., the Earl of Dartmouth's 53s., 51s., etc., Mr. A. S. Berry's 55s., 55s., 54s., 54s., 53s., 50s., Mr. M. Williams' 63s., 62s., 60s., Mr. E. Nock's up to 50s., and Mr. H. C. J. Parker's up to 50s.

Several rams were purchased for exportation to Buenos Ayres and Patagonia, and three gentlemen residing in Norfolk, Dorsetshire, and Buckinghamshire each purchased fifty ewes to found a flock.

Marham Hall Cotswolds.

The annual ram letting at Marham Hall took place on Thursday, when Messrs. Salter, Simpson, and Sons let by auction 100 lamb and seventy shearling pedigree Cotswold rams, the property of Messrs. Thomas Brown and Son. There was a large attendance of flockmasters, and the competition was very keen. Mr. W. H. Salter conducted the letting, prior to which a large company sat down to luncheon, and several speeches wer made. At the sale ring good prices were obtained, both lambs and shearlings showing an increase on last year. They were not so high as in 1898, however, when it will be remembered lambs were very scarce and dear. One hundred lamb rams averaged £8 19s. 6d., as against £8 10s. in 1899 and £10 18s. 7d. in 1898. Seventy shearlings averaged £10 19s. 11d. per head as compared with £9 7s. 6d. last year, and £11 8s. 1d. in 1898; £6 6s. was the lowest price for a lamb, and £14 14s. the highest, while in the shearlings the lowest price paid was £8 8s., and the highest no less than £32 11s.

Markshall Annual Ram Letting.

There was a good attendance on Wednesday at Markshall, when Mr. Nash (of the firm of Clowes and Nash, Norwich) conducted the fortieth annual ram letting of forty-two long wool and Oxford Down shearling rams and thirty-two ram lambs, the property of and bred by Mr. Thomas Allen. The quality of the animals was fully equal to any former year, which means that they were quite as good as careful breeding and a judicious selection could make them, and on the whole the prices obtained were in excess of last year's amounts. After partaking of luncheon the large company adjourned to the ring, where the various lots were put up, and some brisk bidding ensued. Twenty-five excellent long-wool ram lambs were knocked down at an average of £4 4s. per head, a decrease of 8s. per head as compared with last year's prices. The highest price obtained for this class of animal was £4 15s. Seven Oxford Down ram lambs were next brought under the hammer, and averaged £5 6s., a substantial increase upon last year, when the average price was £4 18s. The top price was reached at £6 10s. The next to be reviewed were thirty-five superior long-wool shearling rams, the average price per head again exceeding the amounts fetched last year—£7 1s. 6d., as against £7 at the last annual sale. The highest price was £9 10s. Seven Oxford Down shearling rams were knocked down at an average of £7 8s., as compared with £6 on the last occasion. The top price in this set of rams also was £9 10s.

Tring Park Hampshire Downs.

The annual sale of ram lambs and young and draft ewes took place at the Home Farm, Tring, on Tuesday. Lord Rothschild's flock has been well to the fore of late in the showyard, and the sale sheep were well brought out, showing wonderfully good quality both of wool and flesh, and many of them were of good size. A large number of the ram lambs were twins, which rather lowered the prices for the average, namely, for the seventy-two let and sold £8 17s. 1d. There were also a grand lot of ewes, which made satisfactory prices. Buyers were not present in such large numbers as last year, when so many of the sheep were sent abroad; this year only one lot of eight was bought for South America. The top price given for a ram lamb was 34gs., and he was a true typical sheep, bought by Mr. Alexander Henderson, M.P. Others were taken by Colonel Blake, Welwyn, at 19gs. and 18gs.; Mr. C. T. Hoare, Bignell, Bicester, at 17gs.; Mr. A. W. Montgomery Campbell, Bennington Park, Stevenage, at 16½gs.;

Mr. Scott-Murray, Hambleden, Henley-on-Thames, at 13gs.; and eight were bought for Major Porteus for South America at from 9gs. to 17gs. A large number went to Oundle and Thrapston, in Northamptonshire. The two-tooth ewes averaged 57s. 6d., the top price being 65s. for the pick of the sheep, bought by Mr. A. W. Richman for Sir Blundell Maple. The full-mouthed ewes sold very evenly, and to a great extent were purchased by Mr. Cyril Harrison for Lord Rosebery, who took several lots of five at 50s., others going to Colonel Blake and Sir J. B. Maple, the average being for full-mouthed ewes 47s. 2d.

Halesworth.

The annual lamb sale at Halesworth, largely representative of half-bred flocks, was held on Wednesday, well on for 6,000 lambs and sheep being consigned. Trade was much about the same as that experienced at other dispersals, if anything a slight improvement on the demand for half-breds at Saxmundham. A pen of forty first-cross ewe lambs, from Mr. John Lee, Bramfield, made 37s. 6d., and his average for over 200 was something above 29s., including four ram lambs, which averaged exactly 60s. A pen of sixty first-cross ewe lambs, from Mr. Herbert S. R. Stanford, under whose bâton, as auctioneer, the sale is held, realised 31s., and his quartette of ram lambs £4 apiece. The following were some of the prices realised:—

First-cross Lambs: Mr. Edward Wigg, Walberswick, 100 ewe 26s. 9d., 40 22s., 20 18s. 6d., 120 wether 23s. 10d., 180 mixed 19s. to 13s. 6d.; Mr. John Lee, Bramfield, 80 ewe 32s. 6d. (top 40, 37s. 6d.), 80 wether 28s. 3d., 40 mixed 21s., 4 ram 60s.; Sir Ralph Blois, Bart., Hinton, 80 ewe 26s. 3d., 60 wether 25s., 120 mixed 19s. 8d.; Mr. C. J. Colman, Westleton, 80 ewe 28s. 6d. (top 40, 30s. 6d.), 120 wether 26s. 6d.; Mr. H. S. R. Stanford, Walpole, 60 ewe 31s., 40 wether 28s. 6d., 80 mixed 24s. 3d., 19 17s. 6d., 4 ram 80s.; Mr. Rayner Runnacles, Reydon, 20 fat 35s., 80 ewe 25s. 9d., 80 wether 24s. 3d., 40 mixed 24s. 6d., 18 18s. 6d.

Half-breds: Mr. C. M. Smith, Wangford, 40 fat 25s. 3d., 150 mixed 26s. 10d., 74 24s. to 21s. 6d.; Mr. J. W. Le Grys, Heveningham, 80 24s. 6d., 22 15s. 9d., 20 full-mouthed ewes 24s. 6d., 20 crones 16s.; Mr. Frank Gooda, Mutford, 200 21s. 10½d., 32 14s. 6d., 60 breeding ewes 17s. 6d.; Mr. S. R. J. Chilvers, Spexhall, 120 22s. 8d., 18 14s., 7 full-mouthed ewes 14s., shearling tup 19s.; Mr. Harry Davy, Laxfield, 124 21s. 6d. to 15s. 6d., 27 shearling ewes (sucklers) 44s.; Mr. H. Freeman, Ubbeston, 20 25s.

Black-faced: Mr. Charles Tacon, 30 ewe 32s. 6d., 20 wether 25s. 6d., 22 mixed 23s.; Mr. Frank Gooda, 120 wether 22s. 8d., 30 18s.; Right Hon. the Earl of Stradbroke, Henham Hall, 140 wether over 23s. 2d., 20 20s.; Mr. Rayner Runnacles, 7 4-shear ewes 40s., 6 26s., 7 full-mouthed 19s., 5 crones 20s.

Half-bred Sheep: Mrs. Gray and Son, Wenhaston, 100 grazing shearlings, 31s. 5d.; Mr. W. F. Neave, 10 shearling, 38s. 6d.; Mr. W. Catling, 10 shearling ewes 43s., 16 36s. 6d., 3 and their 3 lambs 37s. 6d.; Mr. H. C. Catling, Stradbroke, 12 shearling ewes 29s.; Mr. R. Minter, Huntingfield, 70 first-cross shearling ewes, nearly 36s. 3d. (top 20 40s.), 80 shearling wethers over 33s. 6d.; Mr. William Balls, Cookley, 20 shearling ewes 35s., 18 26s.

Black-faced Sheep: Mr. W. F. Neave, 40 shearling ewes 42s. 9d.; Mr. R. J. Berry, Cookley, 60 ear-marked shearling ewes 57s. (top 20, 60s.), 18 47s. 6d.; Mr. H. C. Catling, 20 shearling ewes 47s.

Kesgrave.

Kesgrave lamb sale, which is the oldest of any held in East Anglia, took place. This, the oldest of the East Anglian lamb sales, was held for the forty-fifth year on Friday, on the well-known ground opposite Kesgrave Bell Inn, and, like well-nigh all the dispersals which preceded it this year, was marked by a lack of animation, prices declining considerably as compared with last year, this being in some measure due to a falling off in the condition of the consignments. There was a heavier entry than a year ago, and buyers were present from Norfolk and Essex. Mr. George Blencowe brought the consignments to the hammer, and expressed the pleasure the firm experienced from the fact that after the Kesgrave sale had been held for forty-five years, they had a larger entry than for several years past, there being one new consignor, Mrs. Reade, of Martlesham, and an old supporter of the sale, Mr. G. W. Hunt, of Seckford Hall, having renewed his connection with it. In all they had 4,700 penned, and he thought the lambs were quite up to the average. The following items will give some idea of the prevailing prices:—

Registered Suffolk Flocks: Mr. J. P. Skeet, Hill Farm, Rushmere, 92 ewe lambs, nearly 34s. (top 20, 44s. 6d.), 60 wether, 34s. 4d., 34 26s., 17 crones and ewes 25s.; Mr. S. R. Sherwood, Lux Farm, Playford, 60 ewe lambs, nearly 40s. 5d. (top 20, 47s.); Mr. J. Dupuis Cobbold, Holy Wells, Ipswich, 90 ewe lambs 31s. 8d. (top 20s, 35s.), 80 wether 30s., 30 23s. 6d., 23 crones 22s.; Mr. Daniel Day, Bell Farm, Kesgrave, 120 ewe lambs 33s. 2d. (top 40, 36s.), 80 wether 34s. 1½d. (top 20, 40s., the best price for wethers at the sale); Mr. H. A. Reynolds, Street Farm, Bucklesham, 90 ewe nearly 37s. (top 20, 55s., bought by Mr. Ernest Prentice, secretary of the Suffolk Sheep Society, this pen being the leading one of the day, as was the case with the same flock last year), 90 wethers 30s. 4d.; Capt. E. G. Pretyman, M.P., Hall Farm, Brightwell, 100 ewe 25s. 5d. (top 20s, 28s.), 100 wethers 25s. 10d.; Mr. G. W. Hunt, Seckford Hall, Woodbridge, 15 shearling ewes 41s. 6d., 60 ewe lambs 28s. 3d. (top 30, 31s. 6d.), 60 wethers 24s, 30 mixed 16s. 6d.

Unregistered Suffolk Flocks: Mrs. Reade, Hall Farm, Martlesham, 100 ewe lambs 25s. 3d. (top 20, 30s. 6d.), 100 wether 20s 3d.; Mr. R. J. Dawson, Kirton Hall, 100 ewe 32s. (top 30, 37s.), 100 wether nearly 31s. (top 30, 36s.); Messrs. Hunt and Sons, Alnesbourne Priory Farm, 120 ewe 25s., 120 wether 23s. 10d., 40 mixed 15s. 6d.

First-cross: Mr. B. S. King, 20 ewe 34s., 30 27s. 6d., 20 wether 31s., 30 26s.; Mr. R. L. Everett, 80 ewe 30s. (top 40, 33s.), 80 wether 28s., 40 mixed 24s. 6d., 21 17s. 6d.; Mr. W. W. Hunt, 120 ewe 28s. 8d. (top 40, 33s.), 85 wether over 26s. 6d., mixed 18s.; Messrs. Hunt and Sons, Pond Hall, Naeton, 130 ewe nearly 24s. (top 50, 25s. 6d.), 100 wether 25s., 40 22s 9d., 50 mixed 15s.; Captain E. G. Pretyman, M.P., Hall Farm, Foxhall, 240 ewe 25s. 6d. (top 40, 31s.), 40 wether 28s., 150 23s. 5d.; Mr. G. Denn Turner, Hall Farm, Newbourn, 50 ewe 26s., 50 mixed 23s. 6d.; Mrs. Reade, 30 ewe 22s., 30 wether 20s. 6d.

Mr. W. M. Harris's Hampshire Downs.

On Wednesday Messrs. James Harris and Sons conducted the annual sale of ram lambs from Mr W. M. Harris's Long Sutton flock at Basingstoke There was a somewhat smaller attendance of buyers than last year and correspondingly smaller prices, in sympathy no doubt with the depressing state of the sheep trade in general at present. The prices given ranged from 4½gs. to 16½gs., the top price being given by Mr. Welch (Cambridgeshire), who also purchased at 12gs., 11½gs., 10½gs., 7½gs., etc. Mr J. Silvester (Wield) secured No. 5 at 16½gs. and No. 9 at 13gs. Mr. S. Tanner (for Sir C. Shelley, Bart.) bought at 10½gs. and 5½gs. Lord Calthorpe at 10gs., 7gs., and 5gs. Mr. Musselwhite (for A. C. Scott, Esq.) at 7½gs. and 5½gs. Mr. Earwaker at 6gs. Mr. Garrett several at 5½gs. and 5gs. There were seventy lambs catalogued, but the auctioneer, towards the end of the sale, finding the demand slackening, withdrew about twenty. A two-tooth ram, which was hired as a lamb by Mr. C. B. Barton, was now secured by him at 15gs. The average of the forty-nine sold was a trifle over £7.

Mr. T. Fowell Buxton's Hampshire Downs.

The annual letting and sale by auction of ram lambs, rams, and draft ewes from the well-known registered Hampshire Down flock of Mr. Fowell Buxton took place on Monday, at Little Briggen's Farm, Stansted Abbotts, the auctioneers being Messrs. Waters and Rawlence. There was a fairly numerous company present, who as usual first partook of an excellent luncheon. Business commenced with the letting of seven ram lambs at an average of £30, Mr. J. Flower hiring No. 3 at 90gs., Mr. Vernon (for Mr. Scott-Murray) No. 2 at 32gs. and No. 1 at 25gs., Mr. G. Judd No. 5 at 15gs. and No. 4 at 13gs., Mr. J. Clarke No. 6 at 14gs., and Mr. Emson No. 7 at 11gs. Of the selling lambs, Mr. Dibben bought at 20gs., Mr Judd at 18gs. and 10gs., Mr. Duckworth at 15gs., 12gs., and 11gs., Mr. Dawe at 15gs., Mr. Fordham at 10½gs., Mr. Death at 11½gs., 10gs., etc., Mr. J. Carpenter at 13½gs., Mr. Bartlett at 10gs., Mr. Brown (for Earl Cowper) at 12½gs., Mr. Emson at 10gs., etc., Mr. Palmer at 10gs., Mr. F. Smith at 10½gs., 10gs., etc., Sir Hereward Wake at 10gs., the average of eighty lambs let and sold being £10 2s. The draft shearling ewes made 65s., 63s., 62s., and 53s. each; two-shear ditto, 63s., 51s., and 50s.; three-shear ditto, 55s. and 54s.; full-mouth ewes, 62s., 60s., 58s., 57s., 55s., 54s., and 47s., the average of the draft of 137 being 56s.

Weyhill Fair.

This annual sheep fair took place on Friday, when trade was very dull, prices being down from 2s. to 3s. per head as compared with Stockbridge, and towards the end of the auctions it was difficult to get bids at anything like a figure. Very few of the lambs were in condition fit for the butcher.

Mr. Allan Herbert, of Andover, was the first of the auctioneers to commence business, he having 3,500 entrusted to him, when the head prices were as follows:—Mr. W. Coleman (Chute), two-tooth ewes 41s. 6d., two-tooth wether sheep 41s., two-tooth ewes and wethers 35s.; Mr. F. A. Clark (Vernham), two-tooth ewes 36s., two-tooth wethers 36s. 6d.; Mr. F. W. Evans (Upton), mixed lambs 22s.; Mr. E. P. Nutley (Clanville), draft ewes 24s., mixed lambs 25s 6d.; Messrs. Quick and Mills (Vernham), regular draft ewes 27s., draft ewes 24s. 6d., ewe lambs 21s., wether lambs 23s., mixed lambs 18s.; Mr. R. Dowling (Foxcotte), regular draft ewes 37s. 6d., two-tooth ewes 37s. 6d.; Mr. C. Edwards (Appleshaw), draft ewes 28s. 6d., 29s., 26s. 6d., and 23s. 6d.; Mr. C. B. Gwyer (East Chalderton), two-tooth ewes, 37s., two-tooth wethers, 36s.; Mr. H. Gwyer (Longparish), mixed lambs 25s.; Mr. G. Neale (Charlton), mixed lambs 30s. 6d., four-tooth ewes 41s. 6d., six-tooth ewes 40s. 6d., regular draft ewes 36s.; Mr. R. Wallis (Tedworth Down), ewe lambs 30s., wether lambs 29s.; Mr. H. Merceron (East End Farm), wether lambs 33s., mixed lambs 24s. 6d. Mr. Herbert also sold several head of cattle and a few horses.

Messrs. F. Ellen and Son had 5,500 in their auction sale, and among the prices realised were:—L. F. Loyd, Esq. (Doles Farm), two-tooth ewes 39s. 6d. and 33s. 6d.; Mr. A. T. Christmas (Chilbolton Down), wether lambs 26s., chilver lambs 28s. 6d.; Mr. F. Alexander (Everleigh), two-tooth ewes 48s. 6d., 47s., 44s. 6d., and 41s. 6d.; Dr. B. Lyne Stivens (Enham Home Farm), chilver lambs 30s. 6d.; Messrs. Briant Bros. (Hurstbourne Tarrant), chilver lambs 27s. 6d., wether lambs 28s., mixed lambs 20s.; Mr. John Eyles (Stoke), two-tooth ewes, 40s., 41s., and 39s.; Mr. S. H. Allen (Eastover), draft ewes 37s.; Mr. E. A. Wolfe (Monxton), regular draft ewes 43s., draft ewes 36s. 6d.; Mr. H. E. Nuth (Longstreet), draft ewes 38s., draft ewes 24s. 6d.; Mr. R. J. Berry (Falconers), four-tooth ewes 35s. 6d.; Mr. J. Bound (Hurstbourne Tarrant), maiden ewes and wethers 47s. and 37s. 6d.; Mr. W. Cole (Wallop), draft ewes 37s. 6d., two-tooth ewes 40s.; Mr. L. C. Pickering (Gratelv), draft ewes 35s.; Mr. J. Dalton (Clatford Oakcutts), draft ewes 34s., chilver lambs 30s., wether lambs 28s. 6d.; Mr. J. A. Green (Hurstbourne Tarrant), two-tooth ewes 35s. 6d.; C. F. Rudolph, Esq. (Kimpton Farm), wether lambs 25s., draft ewes 33s., two-tooth ewes 28s. 6d.; [illegible] Farm, wether lambs 2[illegible]; J. Eyles (Upper Wyke), wether lambs 31s. 6d., chilver lambs 31s., mixed half-bred lambs 26s. 6d.; Exors. of the late Mr. J. Reeves (Collingbourne), draft ewes 40s., 37s., and 30s. 6d.; Mr. J. Carey (Overton), two-tooth wethers 34s. 6d. and [illegible], both ewes 36s. and 35s. 6d., two-tooth wethers 32s. 6d.; Mr. S. Harris (Knockwood), mixed lambs 31s. 6d. and 26s.; Mr. J. Dance (Whitchurch), draft ewes 30s. 6d., draft ewes 25s. 6d.; J. East, Esq. (Longstock), draft ewes 35s. and 30s., four- and six-tooth ewes 42s.; Mr. F. Hurford (Longstock), wether lambs 21s. 6d.; Mr. A. Spratt (Wherwell), draft ewes 26s. 6d. Messrs. Ellen and Son also conducted the sale of a draft of ram lambs from Mr. S. H. Allen's flock.

Alresford Fair.

Alresford Sheep Fair took place on Thursday, and, like preceding fairs, this year was most disappointing to the sellers, and the prices obtainable for the sales were with but few exceptions 1s. to 2s. per head all round less than at other fairs held in Hampshire lately. The auctioneers had the [illegible] of the sheep consigned to them. In the open fair Mr. W. Stubbs, of Alresford, was the largest penner, and had a lot of good sheep, and a few lots unsold at the end of the fair. Mr. F. Rawlins, of Salisbury, had some grand pens of two-tooth ewes on offer, some of which also left the fair unsold. There were a few small lots of young beasts on the ground, but, like the sheep, the trade for them was very slow, and scarcely any lots were sold. Messrs. James Harris and Sons' sale catalogue contained about 12,000 ewes and lambs, being about 2,000 short of last year, and at the last about 1,000 of these were struck out, and the pens left empty, the owners no doubt anticipating a bad trade, and hoping for better times to come on. The sale proved to be one of the dullest of recent years, many of the principal dealers being absent, and the auctioneer had a very up-hill task in disposing of the various lots, even at low prices. There were a few exceptions, when the biddings were fairly brisk for the best ewes and lambs, but generally the trade must be chronicled as slow and bad. Among the prices realised for regular draft ewes Mr. A. Arnold (Bramdean) obtained 46s., Mr. W. M. Harris 40s., Mr. W. Twitchin 40s., Sir C. Shelley, Bart., 40s., 38s., and 36s., Mr. J. Twitchin 39s., Mr. Arthur Arnold 39s., Lord Ashburton 39s., 38s. 6d., and 36s. 6d., Mr. H. G. Godwin 38s. 6d., Mr. A. E. Philippi 38s., Mr. J. Godwin 37s. 6d., Mr. H. Dutton 37s., and Messrs. Noyce 35s., others selling down to 30s. For draft ewes Mr. J. Bonham-Carter made 43s. 6d. for a little lot of 40, Lord Ashburton 39s. for 100, and 35s. 6d. for 50, Mr. H. Le Roy Lewis 36s., Mr. G. S. Prior 34s. 6d., others ranging from that figure to 26s. An entry of over 1,000 wether lambs from Lord Ashburton's various farms included [illegible] Chilton Farm, 45s. 6d., 35s., and 29s. 6d.; Brown Candover Farm, 42s., 35s. 6d., 31s. 6d., and 30s.; Northington Farm, 43s. and 34s. 6d.; Itchen Farm, 40s. and 30s. Sir C. Shelley, of Avington Park, sent 400 wether lambs, selling at 33s. to 25s. 6d., Mr. J. A. Wilson 100 at 37s., and 50 at 32s. 6d., Mr. W. Twitchin 33s., Messrs. Mills 32s. and 30s., Mr. A. Arnold (Bramdean) 31s. 6d., Hon. A. H. Baring 31s., Mr. Jervoise 30s. and 25s. 6d., Mr. J. Singleton 29s. 6d., Mr. Philippi 29s. 6d., Mr. Arthur Arnold 29s. 6d., Mr. A. Kingdon 28s. 6d., Mr. Hoddinott 28s. Ewe lambs of Mr. J. Bonham-Carter 31s. 6d. and 28s.; Messrs. Noyce 30s. 6d., Mr. F. Dear 29s., Lord Ashburton 28s. and 24s. [illegible]; and mixed lambs brought from 31s. to 22s. 6d. Mr. W. Cory sent 140 two-tooth ewes, and sold at 48s. 6d., 43s., and 40s. 6d.; Mr. H. J. Hope 250 at 43s. 6d. to 36s. 6d.; Lord Ashburton 47s., 42s., and 41s.; Mr. J. Godwin 42s. 6d.; and for a little lot of six-tooth ewes of Mr. H. Turner 41s. were obtained. Twenty-five ram lambs of Mr. J. Silvester, of Wield, made from 5gs. to 8½gs. each.

Messrs. Hall, Pain, and Goldsmith, of Petersfield, Portsmouth, and Fareham, [illegible] a selection of 100 ram lambs from Mr. James Goldsmith's Blendworth flock. Nine [illegible] were sold from 4gs. to 10gs., the following [illegible] among the chief purchasers—Messrs Warner, 5½gs., 5gs. (two), and 4gs.; Sillence, 6gs., 6½gs.; Taylor, 6gs.; Bailey, 5gs., 4½gs.; Long, 10gs., 7½gs., 6gs., 5½gs., and 5gs.; Preston, 6gs.; [illegible], 4½gs.; Arnold, 4½gs.; [illegible]; Peak, 4½gs.; Butler, 5gs.; R. Westbrook, 5gs.; [illegible]; Cliff, 5½gs.; Knight, 5gs.; [illegible]; Noyce, 5gs., 4½gs.; Bugg, 10gs.; J. Westbrook, 6gs., 5½gs., 5gs., 4½gs.; [illegible].

Messrs. Watts and Rogers sold a selection of ram lambs from Mr. Whalley-Tooker's Hinton flock, there being [illegible] offered, with the result that [illegible] average of £8, the [illegible] ranging from 16gs. to 10gs., 9gs., and 8½gs. downwards to 5gs., for three lambs only. Mr. J. Bonham-Carter's seventy ram lambs and one shearling [illegible] the [illegible] commission, showed [illegible] and good breeding, and the whole were sold [illegible] ring from nine guineas [illegible] £6.

ROYAL LANCASHIRE SHOW AT ROCHDALE.

The Rochdale Show of the Royal Lancashire Agricultural Society must be written down as a success. The attendance of visitors has been quite up to the average, while the total entries are, almost to a unit, the same as at Blackburn a couple of years ago. Altogether they number 2,331, including 179 cattle, 247 light horses, 96 heavy horses, 104 sheep, and 90 pigs, not to specify the entries in the miscellaneous classes comprising farm produce, dogs, poultry, and implements. Comparison with previous shows is not easy, for the reason that this year's schedule includes "local exhibits," of which there are 137. The following table of entries in the various sections for the past few years speaks for itself:—

Section.	Preston, 1895.	Southport, 1896.	Barrow-in-Furness, 1897.	Blackburn, 1898.	Liverpool, 1899.	Rochdale, 1900.
Farms	11	7	23	10	12	—
Cattle	151	173	157	188	229	179
Light horses	399	346	325	301	319	247
Shires, etc.	146	156	188	116	156	96
Local exhibits	—	—	—	—	—	137
Sheep	91	96	171	86	172	104
Pigs	—	78	51	88	70	90
Goats	50	40	39	40	25	—
Potatoes	5	—	—	—	—	—
Cheese	80	83	60	90	108	54
Butter and dairy	84	66	115	109	135	119
Dogs	194	193	117	195	205	148
Poultry	495	670	573	658	850	613
Pigeons	250	306	221	236	293	302
Honey	59	39	44	21	105	42
Eggs	38	22	33	27	46	31
Horse shoeing	—	—	—	—	—	—
	2,053	2,275	2,117	2,165	2,784	2,162
Implement stands	187	192	121	165	309	169
Total	2,240	2,467	2,238	2,330	3,093	2,331

A special general meeting of members of the society was held in a marquee near the horse ring, on Thursday, under the presidency of Colonel Royds, M.P. The President said that the principal business was to decide upon the place at which the show of 1901 is to be held, but it had been considered better that this should be postponed until the annual meeting of the society, which would take place in October. They had to convey to the Mayor and the members of the local committee an acknowledgment of their work. He moved a vote of thanks to the Mayor and the members of the local committee, among whom he desired particularly to mention the chairman, Alderman Turner, for his untiring efforts.—The motion was passed, and Alderman Turner responded.—The Chairman announced that the largest number of season tickets had been sold that day that had ever been known in the annals of the society. That he thought promised well for the success of the show. The formal enrolment of thirty-eight new members afterwards took place, and this was stated to be the largest number ever obtained on such an occasion.

Cattle.

There is usually a good show of Shorthorns at the Lancashire, and it is satisfactory to note that Lancashire breeders have once more held their own against competitors from other parts of the country. The bull class was particularly well filled, no less than nineteen fine animals being turned into the ring for the inspection of the judges. The winner was Carlisle Wellington, a roan three-year-old shown by Mr. Miller, of Liverpool, whose fame as a breeder is well established. Carlisle Wellington was also awarded the Derby Challenge Cup as the best bull in the show. He is a wonderfully massive animal, with very fine covering and mossy hair. Mr. W. Bell, of Alnwick, was a good second with Baron Abbotsford, another magnificent roan, and the third award went to Mr. Miller's Duke of Barrington LIII. The female classes, though not quite so large, contained some excellent material. Here Mr. George Harrison, of Darlington, was well to the front. He secured the cup for the best cow or heifer in the show with his roan two-year-old Welfare, which had beaten Mr. W. Bell's more mature Lady Clara III., a winner at Doncaster a fortnight ago. The John Halsall Challenge Cup, for the best animal in the show exhibited by a Lancashire tenant farmer, went to Mr. Thomas Atkinson's Baron Budkirk, a red and white yearling, which has won largely at Lancashire shows this year. Strangely enough, the Baron, though given first place in the district class, was only highly commended in the class for young bulls, being placed below Mr. Adamson's Dunottars Style, which occupied the third position. When, however, it came to a question of awarding the cup, the judges did the Baron full justice, and gave Dunottars Style the reserve ticket. Among other prominent prize-winners was Mr. Victor Cavendish, M.P., whose Lady Albreda, a useful red cow that was noticed at Doncaster, secured him three awards in as many classes. Mr. R. A. Yerburgh, M.P., Mr. W. Heaton (of Lostock), and Mr. T. M. Crook (of Haughton) were also to the fore with some capital Shorthorns.

In the Channel Islands section, Mrs. Cyril Greenall, Warrington, practically swept all before her with her beautifully modelled animals.

Horses.

Shire Horses.

Shire horses, as usual, made a first-rate show. Lord Rothschild won the Earl of Derby's challenge cup for the best Shire stallion or entire colt in the show. Anchorite, who secured the trophy, was bred by the Prince of Wales, and is a fine massive colt, just the sort one would expect from a son of Harold. Reserved to him was Mr. Arthur Nicholson's Leek Monarch, second to him also in the class of stallions foaled in or before 1897. Another plum went to Lord Rothschild, in Sir Gilbert Greenall's challenge cup for the best mare or filly in the section. Alston Rose has won all over; indeed, nothing less than a Southgate Charm can beat her. If the Tring Park representative had not pulled off the championship it would have gone to Mr. Muntz's grand Prince Haro'd brood mare—Lockinge Bell, who in her class led the way to Lord Rothschild's Hendre Sunlight (another of Prince Harold's stock) and Mr. Peter Blundell's (Kirkham) Melbourne Starlight, the winner in the district competition. In Warton Drayman Messrs. E. and J. Whinnerah have a genuine prize, for this young Royal Victor stallion not only topped a strong class, beating Earl Egerton's Tatton Victorious and Mr. Muntz's Dunsmore John o' Gaunt, but carried off the John Halsall challenge cup as the best Shire in the show exhibited by a tenant farmer in the county, and also the Shire Horse Society's gold medal for the best stallion or entire colt bred by or in the possession of a resident or occupier of agricultural land in Lancashire. The corresponding medal for females went to Tatton Godiva, a nice Calwich Prince filly, owned by Lord Egerton. The best draught horse of four years old or upwards, the property of a tenant farmer, was declared to be Kelvedon Gem, by Prince Harold—sent from the neighbourhood of Lancaster by Mr. John Fox. Two first awards in the Shire horse section came over the border into Yorkshire—Mr. J. H. Bryar's Harold colt, Farmer's Advance, who won for the Sheffield exhibitor a second prize at the Yorkshire Show at Doncaster, and Mr. Wm. Jackson's Holker R.I., from Knottingley, who at Doncaster the other day also occupied a second position. The last-named animal was bred by Mr. Victor Cavendish, M.P., who was not well represented, his only score being a third with a Hendre Crown Prince foal. Three famous Shire breeders met in the class for fillies foaled in 1899. Earl Egerton won with Lockinge Athene (repeating his Royal and Yorkshire victories). Mr. Alexander Henderson, M.P., came second with Lady Buscot Keele, and Mr. P. A. Muntz, M.P., made a good third with Dunsmore Luck.

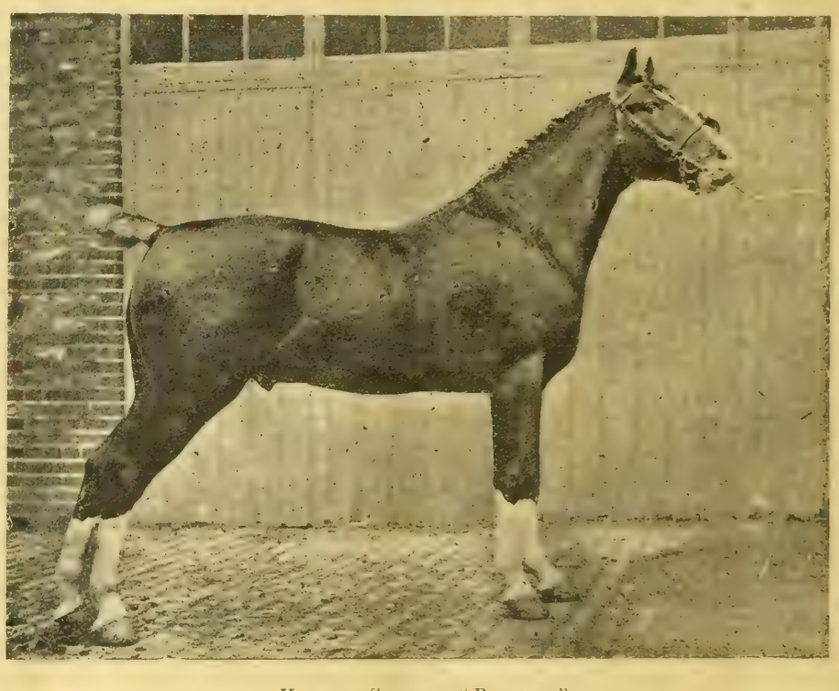
Hunters.

Hunters were not very numerous; in fact, on the whole a poor collection. Mr. Charles Griffiths, of Northwich, won the gold medal offered for the best hunter brood mare with his aged bay Lady Templar, whilst both the Hunters' Improvement Society's silver medals went to Mr. J. L. Irving's Thomasina, a shapely chestnut bred by the exhibitor.

Hackneys.

In the Hackney brood mares the feature was the meeting of Mr. Harry Livesey's celebrated Orange Blossom and Mr. C. E. Galbraith's Rosadora. The former has won numerous honours as a brood mare, and the latter as a filly carried all before her. To some surprise the latter appeared at the Yorkshire show as a brood mare and beat the more famous but that decision was yesterday reversed. Third honours went to Mr. W. Ferguson, of Prestbury, near Macclesfield, whose exhibit was Hollyhock, by Caxton. Orange Blossom's foal, however, could get only a third card, first place being assigned to the springy little chestnut Leila, by Demas, with all her sire's quality and style, owned by Mr. C. V. Haworth, Poulton-le-Fylde, whilst next in order of merit was a chestnut by Caxton bred by Mr. R. M. Birley, Hoghton. Mr. Livesey again won in the three-year-olds with Welcome, the bouncing daughter of Connaught, whose nearest competitors were Mr. W. H. Oates's Ryburn Bell, from Halifax, and Mr. W. Lawson's Zaverda, from Blackpool, which has gained numerous cards this year. In two-year-olds precedence was accorded to Mr. C. V. Haworth's Blackpool Flower, by Ganymede, formerly in the possession of Mr. Lawson, who had now to be content with second prize for Blackpool Countess. Mr. Lees Knowles, M.P., was third with Salford Miranda. The handsomely-moulded yearling filly Oldfield Rosalind, by Rosador, which won distinction at Doncaster, again won for Mr. A. C. Sparkes, Altrincham, easily beating Paddock Princess, by Forest King, entered by Messrs. Cockayne, Sheffield. Five pony mares showed their paces, with the result that Mr. J. Makeague, Newton-le-Willows, was adjudged the winner with Encore, which was preferred to Princess Royal, owned by Mr. Levi Fish, Preston, whilst bringing up the rear was Mr. H. T. Parke's Olive Model, from Withnell, and Mr. J. Halstead's Lucy Gordon, from Worsthorne. Mr. Parke sent in the ring Lady Love and Cassius, but had to be content with third honours, Mr. Wand's well-known Fernielhurst Frivolity and Frivolous being considered the best in the pairs, with Mr. J. H. Jones's Lady Lathom and Lord Knotty next.

The ground spoiled the exhibition of the single harness classes, Mr. Tom Mitchell's Sam Weller, although he won in his class, being far below his form, and Mr. A. L. Goodson's Conceit only securing the reserve position. Mr. T. B. Syke's mare Zaizan travelled in her usual wefty style, and came in second, whilst Lady Love was third. Mr. Norman Read won in the under 15 hands class with Ready Money, which was followed by Mr. C. E. Tunnicliffe's brown mare from Leigh, and Mr. G. Ledson's Surprise from Bromborough, whilst in harness ponies the winners were Mr. R. Whitworth's Pom Pom and Mr. Wand's Amendment.



Hackney Stallion "Rodasor."

The three classes of Hackney stallions were fairly well filled, and nearly every exhibit was a noted prize winner. In the class for stallions foaled in or before 1897, Mr. Harry Livesey was first with his handsome chestnut McKinley, a son of Garton Duke of Connaught. Strangely enough, the second award went to Acid Drop, a chestnut roan shown by Mr. James Yates, of Bilton, near Hull, which also claims Garton as his sire. Mr. Norman Read, of the Feniscowles Stud Farm, came third with his Lord Ganymede. Among a choice little band of two-year-olds, Mr. C. E. Galbraith's Atbara was an easy first. Like the winners in the older class, he is a son of Garton Duke of Connaught. He was third in his class at the Royal Show at York, and had previously been noticed at Islington in the spring. Mr. Lees Knowles's Salford Felix was placed second to Atbara, and the third prize went to a handsome chestnut shown by Messrs. Cockayne Brothers, of Sheffield. The yearlings were headed by Commerce, a promising chestnut by Ganymede, bred by Mr. Robert Whitworth, of Market Weighton. Mr. W. Ferguson, of the Prestbury Stud, Batley, was second in this class with Pretoria, a likely son of Chocolate Junior, and Mr. R. M. Birley, of Hoghton Hall, was third with his Breeze Hill Sir Hugo, whose

sire was Sir Hugo III. When they came to award the special prizes the judges were apparently unanimous in deciding that M'Kinley was the best Hackney in the show. Not only was he awarded the Ainscough gold challenge cup, but he also received the plate offered for the best stallion. In the first case he was even preferred to his stable companion, Orange Blossom, which won the female championship at the Royal, was first in the brood mare class on Thursday, but was now only considered worthy of a reserve ticket. The Hackney Horse Society's gold medal for the mest mare or filly went to Mr. W. Ferguson's Holly Lock, which had been placed third in the brood mare class on the previous day; Mr. Clement V. Haworth, of Poulton, was given the reserve ticket for his aged chestnut, Wild Rose.

There was comparatively little competition in the pony stallion classes. Mr. Alfred S. Day's Lord Berkeley, an excellent representative of the Berkeley stud, secured the premier award in the class for stallions over three years old, beating Whitegate Swell, the bay with which Mr. John Jones, of Wrexham, carried off the first prize at the Royal. Mr. William Mitchell, of Oakham, came third with his Golden Drop 3rd. In the class for three-year-olds the only exhibitor was Mr. W. Ward Hargrave, of Parbold, whose bay Parbold Sourer thus had an easy triumph.

In the riding classes a prominent winner was Mr. A. L. Goodson's Heathfield Concert, which repeated the successes previously gained at York and Doncaster. Mr. G. E. Franklin, of Derby, supplied the winner in the class for animals not exceeding 14 hands, and among other successful exhibitors were Mr. George Tyson, of Halifax, Mr. Alfred S. Day, Mr. Walter H. Oates, of Halifax, and Mr. M. E. Shaw, of Ashton-under-Lyne.

Sheep.

In this section, although there were not many entries, a representative lot came before the judges. With Leicesters Mr. George Harrison had practically his own way all through, and the successful Wensleydale breeders include the executors of the late T. Willis (who got the champion prize for the best ram or pen of ewes among Leicesters and Wensleydales), Mr. James Rhodes, of Stockeld, and Lady Henry Bentinck. Messrs. Walton Bros., of Rawtenstall, gained the championship among the Herdwicks and Lonks. The chief exhibitor of the former breed was Mr. John Rothery, of Cockermouth.

Pigs.

The show of pigs—thanks to the absence of swine fever restrictions—was the best which has been seen at the Lancashire in recent years. As was to be expected, most of the principal awards have gone to Sir Gilbert Greenall and Mr. Sanders Spencer.

Butter Making, Etc.

During the day the butter-making competitions in the working dairy were ontinued, and again proved a source of great interest to visitors to the show. There were also practical lectures on bee-keeping in the Bee Tent by Mr. F. H. Taylor, of the British Bee Keepers' Association; while Mr. Henry Digby lectured in the Poultry Tent upon the birds exhibited in the table poultry and duckling classes.

Judges.

CATTLE.—Shorthorns: Mr. Henry Dudding, Stallingborough, Lincolnshire. Shorthorn Dairy Cattle: Mr. John Howard, Gargrave. Channel Islands Cattle: Mr. C. W. Brierley Brimfield, Herefordshire.

HORSES.—Hunters: Mr. William Wilson, Lowdham, Nottingham. Hackneys, Ponies, and Harness Classes: Mr John Rowell, Bury, Huntingdon. Leaping Competitions: First day, Mr. Robert Burrow, Kirby Lonsdale, and Mr. J. Marshall Tyson, Cark-in-Cartmel; second day, Mr. W. Bainbridge, Lancaster, and Mr. J. T. Pilling, Rochdale; third day, Mr. Arthur Radcliffe, Rochdale, and Mr. William Mason, Grange-over-Sands. Shire and Agricultural Horses: Mr. Edward Green, Welshpool, Montgomeryshire, and Mr. J. W. Rowland, Fishtoft, Boston, Lincolnshire.

SHEEP.—Shropshires: Mr. William Barrs, Odstone Hall, Atherstone. Leicesters and Wensleydales: Mr. Robert Ewbank, Lawkland Green, near Settle. Herdwicks and Lonks: Mr. George Dewhurst, Southport.

PIGS: Mr. William Dracup, Shipley.

LOCAL EXHIBITS.—Cattle: Mr. George Ashburner, Kirkby-in-Furness. Light and Heavy Horses and Turnouts: Mr. Peter Blundell, Weeton, Kirkham. Pigs: Mr. Philip Ascheroft, Rufford, near Ormskirk.

Durham County at West Hartlepool.

The fifty-sixth annual exhibition of the Durham County Agricultural Society took place at Foggy Furze, West Hartlepool, on Wednesday, and in all circumstances of entries, weather, and attendance of visitors, was well above the show held at the same town ten years ago, and compared favourably with the exhibitions of the past few years. About £1,000 was offered in prizes, and this drew just over a thousand entries. In one or two departments, hunters and Hackneys, for instance, the numbers were not equal to those of the Durham meeting, but these deficiencies were atoned for in other sections, notably in agricultural horses and cattle. The 147 entries in the heavy horse classes represented an advance in merit as well as in number. The Seaham Harbour Stud sent some of its best blood, and the produce of Lord Stewart and other noted progenitors carried off a substantial share of the spoil, especially among the younger stock. The older ones included that grand mare Essence, who, besides heading her class, took the challenge cup open to breeding animals in the section; the Holyrood mare Necklet and the four year-old gelding Laffy. Brood mares were one of the best classes, with a splendid entry of fifteen. Here was found the winner of the challenge cup for the best breeding animal belonging to a tenant farmer. It was Mr. Ralph Holwe's Lady Rullan that earned the distinction, and she was also reserved for the open championship. Queen of Gretna, a Scottish bred mare and winner of many prizes, made a promising bid for second place in the class. Her owner, Mr. J. T. Peacock, had several successes, particularly in the local competitions. In nearly all the agricultural classes special prizes, equivalent in value to the open awards, were given to local exhibitors.

An entry of forty-nine hunters in ten classes was not at all satisfactory. Any age hunters, of either sex, were a nice lot. In putting Mr. Jordison's Mowbray Huntsman before Mr. Smallwood's John Peel the judges showed their disagreement with their confreres at the Cleveland Show. Messrs. T. and H. Ward's Lord Clare, winner of the Cleveland Hunt prize and Edinburgh champion, was here reserved. The Pinchingthorpe representative had already had his colours lowered by Mr. Hodgson's Volunteer, an old showyard victor. The three-year-old gelding class was notable for the triumph of Mr. Darrell's Silverdale over Messrs. Ward's Blackthorn. At the Yorkshire, at Malton, and at Peterborough, the chestnut was beaten by the Irish-bred gelding. Neither of these winners was eligible—both coming from Yorkshire—to compete for the Championship Challenge Cup or the Hunters' Improvement Society's medal, both of which trophies were bestowed upon Mr. John Beech's stylish Gordon gelding, Tally Ho! a chestnut that had a place at the Northumberland Show a year ago. With his Golden Ruby, Mr. Darrell topped the three-year-old filly class, beating Mr. Wilson Horsfall's Queen Mary, a handsome bay, by Khartoum. Two-year-old fillies were but a couple, and there could be no doubt about the superiority of Jessie Skillen, who added to many victories by earning for Mr. Hague a first prize and the Hunters' Improvement Society's medal for females. Geldings of the same age were better represented, and the pick of them was found in Messrs. Ward's Blackbird, whose third place at York and Doncaster may be regarded as about equivalent to his premier honours at Middlebrough and Otley. Yearlings were small in number, but promising as to quality.

Hackneys, if smaller in number than might have been expected, included a few noted winners. It was almost a foregone conclusion that Mr. John Robinson's famous Mornington Cannon would carry off the trophy. The Saxon gelding shows at his best in the saddle, and he was not entered in the harness class, where Mr. Eustace Smith's Marvellous, whom Mornington Cannon beat in the riding class, was brought to the front. Mr. Smith's name frequently crops up in the prize list, and his many successes on Wednesday included the Hackney Society's medal. Ladies' hacks were only a moderate collection, and ponies not much to boast about.

The Shorthorns made a capital display. Bulls were best. There were many well-known showyard heroes. Among the bulls above two years old was Mr. George Harrison's Favourite of Sanquhar, who, however, had to take second place—a corresponding position to that which he held in the young class at Doncaster and also at Alnwick—being here defeated by an older bull, Mr. Midgley's massive, well-fleshed Marvel, from Stamford Bridge, who in the older class at the Yorkshire took third prize, and was reserved at the Royal. At the Northumberland Show Mr. Henderson's Erlington Stamp, here third, was placed before the second prize winner. Fifteen bulls under two years made a first-rate show. Baron Abbotsford, a bull of fine proportions and rare quality, which was first at Doncaster and at his home at Alnwick, had no difficulty in maintaining his position. His most formidable rival was Mr. George Harrison's First Favourite, to whom was accorded the Shorthorn Society's special district prize. The female classes were not well filled, but the lots were choice. Mr. Bell's Lady Clara 3rd, a beast of the Abbotsford strain, got the 50 guinea challenge cup as the best breeding animal in the cattle classes. The Polled Angus representatives numbered several of more than ordinary merit. The sheep classes were thin, and in many cases there was practically no competition.

Judges.

CATTLE.—Shorthorns: Mr. John Patten, Alnwick, and Mr P. G. Hughes, Brampton Brian, Hereford. Polled Angus: Mr. Henry Lindsay, Glamis, Forfarshire. Dairy and Grazing Cattle: Mr. James McLaren, Sunderland, and Mr. Walter Ridley, Stocksfield.

SHEEP.—Border Leicester and Half-breed: Mr M Bailey, Haydon Bridge, and Mr A Wood, Cambridge. Black-faced Sheep and Mule Sheep: Mr J Dawson, West Newlands, and Mr. R. W. Lambert, Warcup, Westmorland.

HORSES.—Agricultural: Mr. Nathaniel Clark, Chester-le-Street, and Mr. W. Park, Bishopton. Hunters: Mr. J Walton, Guisborough, and Mr. J. S. Rigg, Appleby. Hackney and Harness Horses and Ponies: Mr. Henry Moore, Burn Butts, Hull, and Mr. W. Jordison, Thirsk.

Champion and Special Prizes.

Champion challenge cup, value 30 guineas, for the best breeding animal in the cattle classes: Mr. Bell, Ratchelugh (Lady Clara).

Shorthorn Society's district prize of £15 for the best Shorthorn bull calved in 1899, located in the county of Durham: Mr. G. Harrison, Gainford (First Favourite).

Champion challenge cup, value 25 guineas, for the best breeding animal in the age classes: Mr. [illegible] Hartlepool Stud Co. (Essence).

Champion challenge cup, value 25 guineas, for the best breeding animal in the county belonging to a tenant farmer: Mr. [illegible] (Lady Rullan).

Champion challenge cup, value 25 guineas, for the best animal in the Hackney classes: Mr. J. B. Hall.

Hackney Horse Society's silver medal for the best Hackney, a prize more highly valued than the champion challenge cup, as it has to be won three times before registration in the Hackney Stud Book: Mr. [illegible] Smith, Benton House.

Champion challenge cup, value 25 guineas, for the best hunter: Mr. J. [illegible] Beech, Tally Ho!

Special prizes for the best hunter gelding, the property of a bona-fide tenant farmer, residing and farming in the county of Durham: 1, Mr. F. W. [illegible] Eggleseliffe; 2, Mr. W. Dent, Darlington; 3, Mr. J. Scarrell, West Auckland.

The Hunters' Improvement Society's silver medals—one for the best hunter filly and the second for the best hunter gelding—were awarded to J. B. Hague's Jessie Skillen and John Beech's Tally Ho!

Prize List.

CATTLE.

Bull, above two years: 1, James Midgley, Buttercrambe, Stamford Bridge (Marvel); 2, G. Harrison (Favourite), Darlington; 3, W. Hodgson, Pinchingthorpe (Volunteer); 4, W. Henderson, Erington Hall, Haydon Bridge (Erington Stamp); 5, T. Lowden, Elrington Hall, Haydon Bridge (Cornwallis); r, W. Bell, Ratchelugh, Alnwick.

Bull, under two years: 1, William Bell (Baron Abbotsford); 2, G. Harrison (First Favourite); 3, W. Henderson (Lord Tees); r, W. Henderson.

Bull, under one year: 1, W. Bell; 2, [illegible]; 3, [illegible]; r, [illegible].

Cow or heifer, in milk or calf, which has produced a calf within the last twelve months: 1, W. Bell (Lady Clara); 2, G. Harrison (Welcome); 3, W. Heaton, Lostock Junction, Bolton (Daisy); 4, G. Harrison.

Heifer, not exceeding two years: 1, G. Harrison (Village Queen); 2, G. H. Procter (Fairy Ring); 3, W. Bell (Clara); 4, W. Henderson (Lady Cornelia).

Heifer, not exceeding one year old: 1, W. Henderson (Bessie); 2, G. H. Procter; 3, [illegible]; 4, G. H. Procter (Royal Rosebud); 4, Lord Barnard.

POLLED ANGUS.

Bull, over two years: 1, T. H. Bainbridge, Ezbott Hall, Felton (Annesley); 2, Seaton Delaval Coal Company, Limited (Golden Ear).

Bull, under two years: 1, Seaton Delaval Coal Company, Limited (Luminant); 2, C. Perkins and Partners, Birtley (Prince of Benton).

Cow or heifer, in calf or with her produce at foot, or calf within the last twelve months: 1, T. H. Bainbridge (Sibonna); 2, C. Stephenson, Sunderland (Miss Nessie); (Elite of Benton); 3, C. Perkins and Partners (Pride of Cortachy).

Heifer, under two years old: 1, C. Stephenson (Exemption); 2, Seaton Delaval Coal Company (Exploit); 3, C. E. Hunter, Schlig (Jessie of Seaton); 4, C. Perkins and Partners (Maud 2nd of Aberlour).

DAIRY.

(Confined to Tenant Farmers and Dairymen in the County of Durham.)

Cow, any age or breed, in milk best for dairy purposes: 1, H. Lamb, High Throston (Dairymaid); 2, T. Swinburne, West Hartlepool (Pride of Durham).

Best dairy cow, in calf, any age or breed, to produce a fully matured calf within [illegible] months of show: 1, G. H. Procter (Bella); 2, T and 3, T. Swinburne (Bella).

SHEEP.

BORDER LEICESTERS.

Ram, any age: 1, J. E. Nicholson.

Ram, shearling: 1, 2, and 3, J. E. Nicholson.

Pen of three ewes: 1, J. E. Nicholson; 2, T. Murray, Haswell.

Pen of three gimmers: 1, J. E. Nicholson.

Pen of three gimmer lambs: 1, J. E. Nicholson.

BLACK-FACED CHEVIOT AND HALF-BRED.

Best pen of three ewes: 1, T. Murray; 2, P. Oswald, Washington.

BLACK-FACED.

Ram, any age: 1 and 2, J. Vickers, Tow Law.

Ram, shearling: 1 and 3, Crawford Brothers, Rothbury; 2, J. Vickers.

Ram, lamb: 1 and 2, J. Vickers.

Pen of three ewes: 1 and 2, J. Vickers.

Pen of three gimmers: 1 and 2, J. Vickers.

Pen of three gimmer lambs: 1 and 2, J. Vickers.

MULE.

(Open to tenant farmers in the county of Durham.)

Pen of three ewes: 1, W. [illegible]; 2, [illegible] Harrison, Sheraton, Castle Eden; 3, R. Crowe, Cornsay.

Pen of three gimmers: 1, R. Crowe; 2, T. M. Reed, Brandon; 3, W. Hutchinson.

HORSES.

AGRICULTURAL.

Brood mare, with foal at foot: 1, R. H. [illegible], Moors, Sinderland Hall, Rainton; 1st special, [illegible] and Sons; 2, John T. Peacock, Low Newport, Silksworth (Queen of Gretna); 3, Earl of Strathmore (Queen of Beauty); r, R. Shepherd, Crossgate Moor (Lady Blossom).

Colt foal: 1, Seaham Harbour Stud Company; special 1st, P. P. Petch, Skelton-in-Cleveland (Baden Powell); 2, R. Holme; special 2nd, T. Seymour.

Filly foal: 1, Seaham Harbour Stud Company; special 1st, M. Clark, Hallgarth, Pittington; 2, Earl of Strathmore; special 2nd, R. Shepherd, Crossgate Moor (Ladysmith); r, The Earl of Durham.

Colt or filly foal, the property of a bona-fide tenant farmer, residing and farming in the county of Durham: 1, [illegible] Earl of Strathmore; 2 and special, M. Clark, Pittington.

Yearling filly: 1, Seaham Harbour Stud Company; r and special 1st, Hugh Munro, Low Fell; 2, Herbert Webster, Fence Houses; special 2nd, F. Thompson, Swalwell.

Yearling colt, filly, or gelding, the property of a bona-fide tenant farmer, residing and farming in the county of Durham: 1, [illegible]; special 1st, J. [illegible]; 2, [illegible]; special 2nd, M. [illegible]; r, John Clark, jun.

Two-year-old filly: 1, H. Webster; 1st special, Thomas Smith and Sons; 2, [illegible]; special 2nd, T. Smith and Sons (Fairy); 2nd special, W. Liddle Walker; r, H. B. Howie, Bowsell.

Two-year-old gelding: 1, H. Webster; 2 and 1st special, T. Smith and Sons; r and 2nd special, Turnbull Brothers, Chester-le-Street.

Foal, [illegible]; 1, [illegible]; 2, W. [illegible]; r, [illegible].

The Earl of Durham's (Yearling Mare) [illegible] special, T. Smith and Sons; r and 2nd special, T. Seaham Harbour Stud Company.

Three-year-old gelding: 1 and 1st special, W. T. and T.

Snowdon, Wingate; 2, Seaham Harbour Stud Co.; 2nd special, T. W. Best, Castle Eden; r, J. B. Short, West Hartlepool.

Draught mare in foal, and to produce a living foal: 1, Seaham Harbour Stud Co.; 1st special, T. Nesbit, Witton-le-Wear; 2, H. Webster; 2nd special, W. Liddle Walker.

Gelding or mare, any age, for agricultural purposes: 1, Seaham Harbour Stud Company (Necklet); 2 and special, J. T. Peacock, Silksworth (Queen May); 2nd special, W. L. Walker.

Pair of horses or mares, for agricultural purposes, not under three years old: 1, Seaham Harbour Stud Company; r and 1st special, W. L. Walker; 2, H. Webster; 2nd special, J. T. Peacock.

For the best gelding, any age over four years, suitable for town work: 1, Seaham Harbour Stud Company (Laffy); 2, John Reay, Gosforth (Rizzie).

Three animals, bred and owned by one exhibitor, the property of a tenant farmer in the county of Durham: 1, W. L. Walker; 2, M. Clark, Pittington; 3, E. J. Weightman, Middle Herrington.

HUNTERS.

Brood mare, with foal at foot or in foal: 1, T. Swales, Yarm-on-Tees; 2, J. Ingledew, Bedale; 3, W. Dent, Darlington.

Colt or filly foal: 1, J. Ingledew; 2, W. Dent; 3, J. Ingledew.

Yearling colt or gelding: 1, R. W. Breeks, Westmoreland (Old Canbat); 2, R. Thompson, Thorpe Thewles (Dare Devil); 3, N. Robinson, Houghton-le-Spring.

Yearling filly: 1, W. Dent; 2, J. Hague, Stockton (Lady Ruby); 3, J. Ingledew.

Two-year-old gelding: 1, T. and H. Ward, Pinchinthorpe; 2, F. W. Smith, Manor House, Eaglescliffe, R.S.O.; 3, J. E. Rogerson, Mount Oswald, Durham (Gridsdale).

Two-year-old filly: 1, J. R. Hague (Jessie Skiller); 2, R. W. Breeks, Hilbeck Hall, Westmoreland (Carmine).

Three-year-old gelding: 1, James S. Darrell, West Ayton, Yorks (Silverdale); 2, T. and H. Ward; 3, J. Beach (Tally Ho).

Three-year-old filly: 1, James S. Darrell (Golden Ruby); 2, F. Wilson, Potto Grange, Northallerton (Queen Mary); 3, W. Dent.

Hunter, four years old: 1, E. Hodgson, The Hollows, Bridlington (Volunteer); 2, T. and H. Ward; 3, G. Martin, Muscoates, Kirby Moorside (First Flight).

Hunter, any age: 1, W. Jordison (Mowbray Huntsman); 2, D. Smallwood, Whitby, Yorks (John Peel); 3, T. and H. Ward.

HACKNEYS.

Brood mare, with foal at foot or in foal: 1, Eustace Smith, Newcastle-on-Tyne (Dowdrop); 2, John Burton and Sons, Copthwick, Ripon (Miss Derwent); r, Mrs. F. Robson (Sweet Lavender).

Foal, colt, or filly: 1, E. Smith; 2, W. Owde (Mobile); r, J. Burton and Sons.

Yearling colt, gelding, or filly: 1, R. Mowbray (Lady Salferia).

Two-year-old gelding or filly: Mrs. F. Robson (Lavender Bouquet); 2, J. Burton and Sons (Derwent Lilly).

Three-year-old gelding or filly: C. W. B. Wally (Winniemeyde).

Hackney, exceeding 15 hands in saddle: 1, J. Robinson (Mornington Cannon); 2, E. Smith (Marvellous); r, T. M. Chaytor, Demsterville, Felling (Lightheart).

Hackney, not exceeding 15 hands in saddle: 1, E. Smith (Wild Lucy); 2, John Robinson; r, W. H. Ferens (Lady Neville)

LADIES' HACK.

Best horse or mare, any age: 1, C. W. Dixon-Johnson, Oakwood, Croft (Monica); 2, E. Owsnett, Darlington (Oracle II.)

PONIES.

Best pony brood mare, with foal at foot, or in foal, not exceeding 14 hands: 1, Eustace Smith (Echo).

Pony foal: 1, E. Smith.

Pony mare or gelding, not exceeding 14 hands: 1, E. Smith (Neva); 2, A. Phillipson (Cassino II.); r, G. Wade (Lady).

Pony mare or gelding, not exceeding 12.2 hands: 1, T. S. Petch, Loftus; 2, Sir Riley Lord, Gosforth (Royalty); r, S. Rowe (Dandy Dick)

SHETLAND PONIES.

Best brood mare, with foal at foot, or in foal: 1, Seaham Harbour Stud Company; 2, T. Murray (Haswell).

HARNESS HORSES.

Best horse or mare, 15.2 hand and over, driven in harness: 1, E. Smith; 2, J. B. Hodgkin; r, G. Wade.

Horse or mare, under 15.2, driven in harness: 1, Smith; 2, A. E. Scanlon, Middlesbrough; 3, G. Wade.

Horse or mare, not exceeding 14.2, driven in harness: 1, E. Smith; 2, A. Philipson; r, R. W. Paley, M.R.C.V.S., Middlesbrough.

Horse or mare, not exceeding 13 hands, driven in harness: 1, E. Smith (Mena); 2, T. S. Petch; r, Sir Riley Lord.

Tradesmen or tenant farmers' class, 15 hands and over, driven in harness: 1, G. Wade; 2, George E. Gibson

Tradesmen or tenant farmers' class, under 15 hands, driven in harness: 1, A. Philipson, Dipton; 2, J. Henderson; 3, W. H. Ferens, Neville Court, Durham.

LEADING

Best horse or mare, any age: J. Freeman, Viewley Grange; 2 and 3, T. E. Lavin, Ripon.

Horse or mare, any age, which has not won a first prize (confined to the county of Durham): 1, D. Cussons, Old Cornforth; 2, J. Coding; 3, T. Swales, Yarm-on-Tees.

Gloucestershire.

The three-day exhibition of the Gloucestershire Agricultural Society opened at Gloucester on Wednesday in beautiful weather, which also prevailed on the other days, and the attendance of visitors was a very large one. The site of the showyard was an extensive meadow known as the Oxleaze, the property of the Corporation, and admirably situated on the bank of the Severn, close to Westgate Bridge. The local committee were responsible for the provision of the showyard, and in addition the citizens subscribed £350 towards the general prize fund of about £1,000, of which £150 was allocated in local prizes. The total number of entries of stock was 344, a decrease of forty-eight when compared with last year's show at Cirencester, but the difference is to be accounted for by the fact that on the present occasion there was no display of pigs, owing to the existence of swine fever in the county. The entries show a falling off when contrasted with the last Gloucester exhibition in 1897 of fifty-nine, but in that year there were fifty-five entries of pigs, so that the aggregate this time compares favourably with past shows. Of the grand total 141 entries were of cattle, an increase of twenty-one over last year, while the 151 horses were thirty-one below the number twelve months ago, and there were three fewer pens of sheep. Many well-known exhibitors were represented, and the general competition was very keen, the quality of the animals being above the average. In addition to the stock there was an excellent exhibition of dairy produce, and of agricultural implements and machinery.

Cattle.

The cattle section was headed by the Shorthorns, and a very excellent display was made in the aggregate, many of the leading exhibitors in the county forwarding the best of their herds. In the class for old bulls there were nine capital animals. The first position was given by the judges (Messrs. P. A. Evans and Rowland Hood) to Alto, the well-known roan bull of Mr. Richard Stratton; and Mr. Sidney Hill, of Langford, was a good second with Puck, also one of Mr. Stratton's breeding. For bulls calved in 1898 eleven entered, and the win of Mr. G. F. King with his roan, Chewton Oxford Cornelius, was a popular one; Mr. Sidney Hill again took second, this time with Langford Lavender, and Mr. J. Deane Willis was placed third. In this class Lord Fitzhardinge was h.c. with Lord Barrington Bates 4th. In a capital class of fifteen yearlings, Mr. J. T. Hobbs, Maiseyhampton, Fairford, was placed at the head with New Year's Gift, a squarely-built youngster which was purchased recently from the herd of Mr. W. J. Hosken. A very useful bull, Wanderer's Prince, obtained for Mr. A. Henderson, M.P., Buscot Park, Faringdon, the third honours, he being beaten by Bapton Consul, bred by Mr. Willis, and shown by Mr. G. Freeman, Northleach. The best bull calf was a roan, Bapton Arrow, sired by Sittington Archer, and bred by the exhibitor, Mr. J. D. Willis, while Mr. R. Stratton's Hildebrand, a smart son of Highflyer, ranked next. Mr. Freeman's Bapton Consul also received the Shorthorn Society's special prize for the best Shorthorn bull in the counties of Gloucester and Monmouth. The cow class was exceptionally well filled, but Mr. C. W. Brierley carried off the two principal prizes with Autumn Queen and Ingram's Queen, well-bred daughters of Joe Ingram. Both were brought out in beautiful condition, and they have won a considerable number of prizes this season at the county shows. A strong milker, Snowdrop 8th, secured Lord Tredegar the third prize. Mr. A. Henderson, M.P., headed the three-year-old cows or heifers with a handsome red cow, Grace Darling, the winner on several occasions recently, second place being awarded to Mr. C. W. Brierley's red Lavender Queen. Mr. J. D. Willis's White Heather was the best of the two-year-old heifers, while the class for yearling heifers was conspicuous by reason of the winner, Lord Tredegar's Lassie 3rd, being awarded the female Shorthorn championship. It was surprising, and at the same time disappointing, that there should only be two classes of Herefords, and still more surprising that there should have been only one exhibit. This was Lord Coventry's Mercury, a red and white two-year-old bull well known in the show ring, and he was given a first prize. The Jerseys looked well, and the contests for the prizes were keenly fought. Colonel McCalmont, M.P., Ross, was first in the old bull class with the dark brown Golden Spring, second honours going to Mr. A. Gibbs, Bristol. The best of the young bulls was exhibited by the Duke of Marlborough, and his Grace also secured leading honours in the two-year-old heifer class. Colonel McCalmont, M.P., showed the first prize cow, and Mr. A. Gibbs the best of the yearling heifers. In a single class of Dexters there were three entries, all by Colonel Stallard, Malvern Link, who received the first prize with a five-year-old cow. The competition in the dairy classes was not very strong, but a number of useful milkers were exhibited.

Sheep.

Sheep were an average show numerically, but the entries ought to have been far larger considering the number of classes in which prizes are offered. For instance, in three classes of Cotswolds there were only four entries, all by Mr. Russell Swanwick, Cirencester, and he took the prizes. There was a better representation of Southdowns, but Lord Sherborne, Northleach, and Colonel Sir Nigel Kingscote, Wootton-under-Edge, were the only exhibitors. The former secured all the first prizes and the champion medals, and the colonel had to be content with two second prizes. It was very much the same in Oxford Downs, Mr. J. T. Hobbs, Maiseyhampton, being the principal winner. In Hampshire Downs Mr. A. Henderson, M.P., Buscot Park, took the first prize for yearling rams, but was beaten in the ram lamb class by Mr. L. H. Baxendale, Newbury, who won the champion prize. Mr. Baxendale was the only exhibitor of ewe lambs, and Mr. Jeffery Matthews, Winterbourne, Bristol, was the most successful exhibitor of cross-bred sheep.

Horses.

The horses were as a whole an exceedingly good lot, but the competition was somewhat unequal, the merits of not a few being much below the average. Of the Shire stallions foaled in or before 1897 Lord Tredegar carried off the first prize with the five-year-old Valentine of Hothfield, second prize going to Lord Fitzhardinge for The Syndic, four years old. Mr. R. W. Hudson, Great Marlow, continued his show success by taking first prize in the two-year-old stallion class with the massive Danesfield Prince. Second prize went to Lord Wantage with the smart, useful Lockinge Soudan, which was also awarded the silver medal of the Shire Horse Society, previous winners being debarred from competing for the trophy. A thick-set, stalwart youngster, Blaisdon Prince, a son of Prince Harold, owned by Mr. Peter Stubbs, Newnham, was at the head of the yearling stallions, Lord Bathurst's firm and compact Cicester Bellman ranking next. In a good class of mares with foals Mr. A. Henderson, M.P., secured the premier position with Moors Cambria, a grand-looking five-year-old, with a splendid foal at foot, and Lord Wantage received the second with Tatton Flower, a Staffordshire-bred four-year-old, with a foal by the well-known Hendre Crown Prince. The tenant farmers' class was not well filled, but a highly useful mare, Jolly, with a nice foal, credited Mr. M. B. Stubbins, Bristol, with the chief prize. In the class for yearling mares or geldings Mr. A. Henderson, M.P., was placed first with Lockinge Harriet, which also won the silver medal offered for the best Shire female. Mr. P. Stubs was second, but in the next class for two-year-old mares or geldings he was promoted to first place. A heavy upstanding mare belonging to Mr. R. W. Hudson led in the class for three-year-old mares or geldings; and Mr. R. H. Norman, Tewkesbury, showed a useful tenant farmer's horse, which took first prize in the class for mares and geldings, rising five years. Light horses made a capital display, the hunters being especially good for a country show. In the class for brood mares, Mr. Cave Browne Cave, Malvern, was first with a well-sized Irish grey mare, The Geisha, and the best of a fine collection of yearling mares or geldings was a brown horse of showy character and pretty style belonging to Mr. William Till, Ross. In this class Mr. Holt Needham, Castle Cary, Somerset, was second with a chestnut mare, Chorus Girl, but this exhibitor came off better in the two-year-old class of mares and geldings, taking the highest position with his chestnut mare, Dancing Girl. The second honour went to Mr. F. W. Barling, Ross, with Lucky Box. In the previous class, the winner and the reserve—Mr. Till and Mrs. Nichols—were objected to on the ground that their animals did not comply with the conditions of the class in which they were entered—Class 78. The objections were sustained, and Mr. N. H. Needham's Chorus Girl was placed first. Mr. Holt Needham was again successful in the three-year-old class of mares and geldings, his winner, a chestnut filly, Killarney, also receiving the silver medal of the Hunters' Improvement Society for the best hunter filly not exceeding three years old. Mr. J. H. Stokes, Great Bowden, won in the four-year-old mare or gelding class, and Mr. J. Nixon, Cardiff, in the collection a year older. A number of good hacks and ponies were entered. Mrs. A. K. Apperley, Cheltenham, being the most successful exhibitor of riding horses over 14 hands 2 inches, and Mr. E. R. Apperley, Cheltenham, of similar horses under that height. Mrs. Apperley not only owned the first-prize pony in the class, 13 hands 2 inches and under, while Mr. W. Howels, Brecon, was first in the collection of ponies not exceeding 12 hands 2 inches. For the first time, thanks chiefly to the influence of the secretary, Mr. Townsend, polo matches were arranged in connection with the show, and they proved a great attraction

Judges.

CATTLE.—Shorthorns and Herefords: Mr. P. A. Evans, Welshpool, and Mr. Rowland Wood, Thrapston, Dexters: Mr. T. R. Herbert, Worcester. Jerseys: Mr. G. P. Mead, Shrewsbury. Dairy Cattle and Dexters: Colonel Curtis-Hayward.

SHEEP.—Cotswolds and Cross-breds: Mr. T. E. Hobbs, Worcester. Southdowns: Mr. R. Aubrey-Fletcher, Cirencester. Oxford Downs: Mr. John Beavan, Witney. Other Sheep Classes: Mr. Jos. Beach, Wychwood. Hampshire Downs: Mr. Joseph Dean, Codford, Wilts.

HORSES.—Cart Horses: Mr. H. Percy Thompson, Bedworth, and Mr. Jos. Paisley, Wateley. Local Classes: Mr. Robert Grew, Sherborne. Hackneys: Mr. Algernon Rickhout, M.F.H., Moreton-in-the-Marsh, and Mr. T. Butt Miller, M.F.H., Cricklade, Wilts. Hacks and Ponies: Mr. C. Morrell. Driving, Jumping and Tradesmen's Classes: Major H. H. Calvert, Messrs. W. F. Hobbs, Beach, R. J. Tidswell, H. M. Wilson, M.F.H., H. C. Ll. Baker, and H. L. Hardwicke.

Champion and Special Prizes.

Shorthorn Society's diploma prize of £5 for the best Shorthorn bull calved in 1899, in the counties of Gloucester and Monmouth: Mr. George Freeman, Bapton Consul, Lord Tredegar (Prince Ali).

Champion prize for the best bull: Mr. J. T. Hobbs (New Year's Gift).

Shorthorn Society's special prize for the best Shorthorn cow, in milk, of any age: 1, Mr. Alexander Henderson, M.P. (Dowager 13th); 2, Mr. G. F. King (Countess 40); r, Mr. Richard Read Jones, Ulleskelf (Mr. Alexander F. Marsh (Grange Osberton and Victoria Nicholas); c, Mr. John Little (Red Rose 3rd).

Champion prize for the best female: Lord Tredegar (Lassie 3rd).

Shire Horse Society's silver medal for the champion stallion over three years: Lord Wantage, K.C.B., V.C., Lockinge Sandiway.

Shire Horse Society's silver medal for the champion female: Mr. Alex. Henderson, M.P. (Lockinge Harriet).

Prize List.

CATTLE.

SHORTHORNS.

Bull calved in 1894-5-6: 1, Mr. Richard Stratton (Alto); 2, Mr. Sidney Hill (Puck); 3, Mr. Charles W. Brierley (Ben Ledi); r, Mr. J. Dean Willis (Silver Plate); c, Mr. William Edward Bolston.

Bull calved in 1898: 1, Mr. George F. King (Chewton Oxford Cornelius); 2, Mr. Sidney Hill (Langford Lavender);

3, Mr. J. Deane Willis (Granite Chip); r, Mr. Richard Stratton (Union Jack); hc, Mr. John Garne (Prince Pioneer), Mr. C. H. Joliffe (Ruddigore), Lord Fitzhardinge (Lord Barrington Bates 4th).

Bull calved in 1899: 1, Mr. James T. Hobbs (New Year's Gift); 2, Mr. George Freeman (Bapton Consul); 3, Mr. Alexander Henderson, M.P. (Wanderer's Prince); hc, Mr. G. F. King (Chewton Favourite), Mr. H. G. Bush (Bitton Augustus); c, Mr. W. E. Bolston (Merman).

Bull calved since September 1st, 1899: 1, Mr. J. Deane Willis (Bapton Arrow); 2, Mr. Richard Stratton (Hildebrand); 3, Lord Fitzhardinge (Barrister); hc, Colonel Sir Nigel Kingscote, K.C.B. (Lord Kingscote Gwynne 8th); c, Mr. A. John Bloss (Lord Bourton), Mr. W. S. Dowding (Longney Duke), Mr. W. H. Tremaine (Baron Sherborne 14th and Duke of Gloucester 2nd).

Cow in milk: 1 and 2, Mr. Charles W. Brierley (Autumn Queen and Ingram's Queen); 3, Lord Tredegar (Showaway 8th); r, Mr. John Little (Ruby); hc, Mr. Alexander Henderson, M.P. (Dowager 13th); c, Mr. C. H. Joliffe (Lady Jane Pitlivie), Mr. Benjamin Read (Jeannie 11th), Mr. G. F. King (Countess 40), Mr. Arnold Hall (Tulip Leaf 19th).

Cow or heifer calved in 1897: 1, Mr. Alexander Henderson (Grace Darling); 2, Mr. Charles Brierley (Lavender Queen); 3, Mr. John Bloss (Pancake); r, Mr. John Little (Moss Rose 2nd).

Heifer calved in 1898: 1, Mr. J. Deane Willis (White Heather); 2, Messrs. R. and W. T. Garne (Aldsworth Jewel); 3, Mr. Charles W. Brierley (Queenley Duchess); c, Mr. John Garne (First Favourite).

Heifer calved since September 1st, 1899: 1, Lord Sherborne (Scottish Countess 2nd); r, R. and W. T. Garne (Patience); r, Lord Sherborne (Daisy Marie 6th); hc, Mr. George Freeman (Freshwater).

HEREFORDS.

Bull of any age: 1, The Earl of Coventry (Mercury).

JERSEYS.

Bull above two years old: 1, Colonel H. McCalmont, M.P. (Golden Spring); 2, Mr. Antony Gibbs (Black Prince); r, Mr. John Dearman Birchall (Omburman).

Bull above one and under two years old: 1, The Duke of Marlborough (Dewey); 2, Colonel H. McCalmont, M.P. (Chief Justice); r, Mr. Herbert O. Lord (Hazel).

CROSS-BREDS.

Three wether lambs: 1 and 2, Mr. Jeffery Matthews; r, Mr. Francis Scott.

Three ewe lambs: 1 and 2, Mr. Jeffery Matthews; r, Mr. Francis Scott.

HORSES.

CART HORSES.

Shire stallion: 1, Lord Tredegar (Valentine of Hothfield); 2, Lord Fitzhardinge (The Syndic); r, Earl Bathurst (Coaster Beau Harold).

Shire stallion, foaled 1893: 1, Mr. R. W. Hudson (Dunsfield Prince); 2, Lord Wantage, K.C.B., V.C. (Lockinge Soudan); r, Mr. Peter Stubs; c, Mr. Alex. Henderson, M.P., and Mr. Bertram Hutchinson.

Shire stallion: 1, Mr. Peter Stubs (Blaisdon Prince); 2, Hon. Earl Bathurst (Cicester Bellman); r, Mr. G. F. King; c, Mr. R. W. Hobbs and Mr. F. W. Rigg.

Mare, with foal at foot: 1, Mr. Alex. Henderson, M.P. (Messrs. Cambria); 2, Lord Wantage, K.C.B., V.C. (Lockinge Flower); r, Mr. W. H. Godding; c, Mr. Peter Stubs (2), and Mr. G. F. King.

Mare and foal: 1, Mr. M. B. Stabbins (Jolly); 2, Mr. J. G. Rymer (Bell); r, Mr. Samuel Phelps (Candbury).

Mare or gelding: 1 and c, Mr. Alexander Henderson, M.P. (Lockinge Harriet); 2, Mr. Peter Stubs (Blaisdon Lofty); r, Mr. R. W. Hudson.

Mare or gelding: 1, Mr. Peter Stubs (Blaisdon Rose); 2, Mr. R. W. Hobbs (Kelmscott Venus); r, Earl Bathurst (Cicester Chime).

Mare or gelding: 1, Mr. R. W. Hudson (Markedon Wild Wave); 2, Mr. Peter Stubs (Blaisdon Minnie); r, Lord Wantage, K.C.B., V.C. (Lockinge Helen); vhc, Mr. F. W. Vines (Monarch); c, Mr. Martin Crump (Colonel), Mr. John L. Brookes (Noble); hc, Mr. Samuel Phelps (Norman).

Mare or gelding: 1, Mr. Rowland Henry Norman (Lion); 2, Mr. F. W. Vines (Excelsior); r, Mr. John L. Brookes (Jolly); c, Mr. Fred Morgan (Blossom).

Mare or gelding, foaled in 1898, the property of the exhibitor residing within fifteen miles of the Gloucester Cross: 1, Mr. John L. Brookes (Prince).

Special prize, cart mare or gelding, ditto, within twelve miles of the Gloucester Cross: 1, Mr. M. B. Stabbins (Jolly); 2, Mr. Frederick J. Chamberlayne (Duke).

HUNTERS.

Brood mare: 1, Mr. R. Cave-Browne-Cave (The Geisha); 2, Mr. W. H. Barber (Sunbeam); r, Mr. Leonard H. Taylor (Platyplus); hc, Mr. William Till (Silver Sand).

Mare or gelding: 1, Mr. William Till (Whisperer); 2, Mr. Oliver Needham Holt-Needham (Chorus Girl); r, Mr. Edwin Nichols (Flying Fox).

Mare or gelding (1898): 1, Mr. Oliver Needham Holt-Needham (Dancing Girl); 2, Mr. F. W. Barling (Lucky Box); r, Mr. Edwin Nichols (Jeddah); hc, Miss Amelia W. Edwards (The Misty Sun).

Mare or gelding (1897): 1 and silver medal, Mr. Oliver Needham Holt-Needham (Killarney); 2, Mr. John Clem Barton (Sportsman); r, Mr. William Till (Aroma).

Mare or gelding (1896): 1, Mr. J. H. Stokes; 2, Mr. T. D. John (Donoraile); r, Mr. E. F. Blackwell (Baron); hc, Mr. Martin Crump.

Mare or gelding, five years old and over, equal to carry 15 stone: 1, Mr. John Nixon (Colonel); 2, Mr. J. W. Stokes; r, Mr. H. B. Chandler.

Mare or gelding, five years old and over, equal to carry 13 stone: 1, Mr. John Nixon (Sportsman); 2, Mr. J. H. Stokes; r, Mr. Thomas Cook (Ronald).

Mare or gelding, not exceeding five years old, tenant farmer's class: 1, Mr. J. Clem Barton (May Be); 2, Mr. Martin Crump; r, Mr. E. F. Blackwell (Baron).

HACKS AND PONIES.

Riding horse, over 14 hands 2 inches and not exceeding 15 hands 2 inches: 1 and 2, Mrs. A. K. Apperly (Fancy and Nobleman); r, Mr. E. S. Godsell (Worbury Squire).

Riding horse, 14 hands 2 inches and under: 1, Mr. E. R. Apperly; 2, Mr. F. C. Burroughs (Southam); r, Mr. W. B. C. Burdon (Wise Girl); vhc, Mr. James Farmer.

Pony, for riding, 13 hands 2 inches and under: 1, Mrs. A. K. Apperly (Black Prince); 2, Mr. F. W. Butt (Hartpury Model); r, Mrs. A. M. Budd (Little Nipper); vhc, Messrs. Woolliams Brothers (Dandy).

Pony, for riding, not exceeding 12 hands 2 inches: 1, Mr. William Howels (General); 2, Mr. Herbert R. Hall (Tattoo).

SINGLE HARNESS HORSES.

Horse, over 14 hands 3 inches: 1, Mr. E. S. Godsell (Heathfield Squire); 2, Mr. E. S. Godsell (Lord Bath); r, Mr. Robert Jackson (Masterpiece).

DOUBLE HARNESS HORSES.

Pair, 15 hands and over: Mr. E. S. Godsell (Lord Bath and Duke of York).

JUMPING.

Best jumper in hunting classes: 1 and 2, W. W. Grundy (Horse, 15 hands and over); 1, Mr. C. A. Dennis (Nonconformist); 2, Mr. Francis W. J. Larkins (Artist).

DRIVING CLASSES.

Single horse turn-out (to be made up): 1, Mr. F. M. Vines; 2, Messrs. Blinkhorn and Son; 3, Mr. E. G. Moffatt.

Single horse turn-out (trade): 1, Mr. F. W. [illegible]; Mr. Michael Bass; 3, Messrs. B. Bannister and Son; r, Messrs. Walter Weaver and Sons.

Horse exceeding 15 hands 2 inches and not exceeding 15 hands 3 inches (open): 1, Miss A. K. Apperly (Silver Star); 2, Mr. G. H. Godsell (Lady Abingdon); r, Mr. David Lewis (Kitty).

Tandem, 14 hands and over: 1, Mr. E. S. Godsell (Norbury Squire and Heathfield Squire); 2, Mr. G. H. Godsell (Cameron and Lady Abingdon).

TROTTING.

The fastest trotter not exceeding 15 hands high (local): 1 and 2, Mr. Michael Bass (Classic B and Baby Bee).

Pony not exceeding 13 hands 2 inches: 1, Mr. Ben Sims (Fear Not); 2, Mr. James F. S. Sanders (Parched Pea); 3, Mr. Herbert R. Hall (Little Dot).

For horses that have never won a first prize value £5, the property of a tenant farmer: 1 and 2, Mr. E. R. Apperly.

SHORTHORN HEIFER "ALDSWORTH JEWEL."

Cow in milk or in calf: 1, Colonel H. McCalmont (Wigton 6th); 2, Mr. Antony Gibbs (Buttercup 3rd); r, Mr. Pickering Phipps (Trust 4th); hc, Colonel H. McCalmont, M.P. (Swift 3rd), Mr. Antony Gibbs (Lass of Jersey 2nd), Mr. Arthur C. P. Gurney (Phillis).

Heifer calved in 1898: 1, The Duke of Marlborough (Phyllis); 2, The Duke of Marlborough (Buttercup 4th); r, Colonel H. McCalmont, M.P. (Toupee); hc, Colonel H. McCalmont, M.P. (Twilight); c, Mr. J. Dearman Birchall (Lady Bird).

Heifer calved in 1899: 1, Mr. Antony Gibbs (Alice Tynte); 2, The Duke of Marlborough (Bright Quack); r, The Duke of Marlborough (Myrobella); hc, Colonel H. McCalmont, M.P. (Hopscotch).

DENTERS.

Bull: 1, Colonel William Stallard (Malvern Signor).

Cow or heifer in milk or in calf: 1, Colonel William Stallard (Malvern Smart).

DAIRY CATTLE.

Dairy cow, in milk, any breed: 1, Mr. Lawford Pullen (Cricket); 2, Mr. A. D. Mitchell (Strawberry); 3, Mr. Joseph Bennett; r, Mr. A. D. Mitchell (Cherry); hc, Mr. Joseph Bennett.

Bull, cow, and offspring: 1, Mr. William Arkell; 2, Mr. G. F. Cullimore.

Shorthorn cow and calf: 1, Mr. Lawford Pullin; 2, Mr. G. F. Cullimore; r, Mr. William Arkell.

SHEEP.

COTSWOLD.

Yearling ram: 1 and 2, Mr. Russell Swanwick.

Three ram lambs: 1, Mr. Russell Swanwick.

Three ewe lambs: 1, Mr. Russell Swanwick.

SOUTHDOWN.

Yearling ram: 1, medal, and r, Lord Sherborne; 2, Colonel Sir Nigel Kingscote, K.C.B.

Three ram lambs: 1, Lord Sherborne; 2, Colonel Sir Nigel Kingscote, K.C.B.

Three ewe lambs: 1, 2, and medal: Lord Sherborne.

OXFORDSHIRE DOWN.

Yearling ram: 1 and r, Mr. J. T. Hobbs; 2, Mr. R. W. Hobbs.

Three ram lambs: 1, Mr. William J. P. Reading; 2 and r, Mr. R. W. Hobbs.

Three ewe lambs: 1, Mr. R. W. Hobbs; 2 and r, Mr. J. H. Large.

HAMPSHIRE DOWN.

Yearling ram: 1, Mr. Alex. Henderson; 2, Mr. Basil Hanbury.

Three ram lambs: 1, Mr. Lloyd H. Baxendale; 2 and r, Mr. Alex. Henderson, M.P.

Sussex County at Brighton.

It will be remembered that last year's show of the Sussex County Agricultural Society, which was held at Eastbourne, was opened by H.R.H. the Prince of Wales, and that the total number of entries received —708—constituted a record in the annals of the Society. At the show held on Wednesday and Thursday last, however, another record was set up, as the entries of stock numbered no fewer than 720. Preston Park, Brighton, was the site of the exhibition, and no more suitable ground could hardly have been secured, for not only did it offer entirely ample accommodation, but the surroundings were most picturesque. A programme of a very attractive nature to the general public, apart from the interest it had to those concerned in agricultural matters, had been drawn up, and the weather being all that could be desired on each day, there was a very good attendance of spectators. The total for the two days was about ten thousand, which number, though below that of last year, is slightly above the average.

Some capital exhibits, numbering forty-two in all, were shown in the section devoted to horses, the agricultural animals being especially fine. Their quality, in fact, has not been excelled in any previous show, although the horses have always been one of its most notable features. The silver medal offered by the Shire Horse Society for the best Shire mare was won by Messrs. J. and H. Robinson, of Ilford, Lewes, with their bay mare Queen B. The exhibits in the Hunters' Class also displayed a uniform excellence of quality, Mr. E. P. Warren's Menilla carrying off the gold medal offered by the Hunters' Improvement Society for the best hunter brood mare. There were some very smart and elegant turnouts in the driving competitions, while the judges of the jumping had no easy task in front of them, owing to the closeness with which the events were contested. Thirty classes were devoted to cattle, and attracted no fewer than 247 entries. Jerseys were particularly well represented, some superb specimens of this breed being shown, and the judges considered they were some of the finest they had seen in the United Kingdom. The Blythwood Challenge Bowl, presented by Sir James Blyth, Bart., for the best Jersey cow or heifer in milk, was won by Lady Rothschild's May Queen. There were also some fine specimens of pure-bred Shorthorns on view. The classes for Guernseys attracted some good exhibits, the champion prize for the best Guernsey bull in the show being secured by Mrs. Montefiore's Signalman 2nd. The only sheep exhibited were Southdown, and the quality of this famous Sussex breed is so well known that it need scarcely be said some very fine exhibits were forthcoming in this particular section. The champion prize of £10 10s. for the best ram or ram lamb in the show, presented by the Southdown Sheep Society, was won by Mr. Francis N. Hobgen, of Appledram, Chichester. The exhibits of dairy produce included butter, eggs, and table poultry (dead), and all were well represented.

The butter competition proved a great attraction, there being large and interesting crowds around the butter tent while they were in progress. They were, as usual, confined to pupils who have been through the course of dairying instruction given by the East Sussex County Council, and were under the experienced direction of Miss Bainbridge.

The Judges.

HORSES.—Agricultural: Mr. A. H. Clark, Moulton; Mr. Eingate, Spalding, Lincolnshire; and Mr. F. B. Beaufoy, South Somercotes, South Lincolnshire. Hunters: The Hon. A. F. Parker, Dorset; Berger [illegible], Isle of Wight; and Mr. Owen Wales, West Haddon, Rugby. Hackneys: Mr. Alfred Rowell, West Rudham Hall, King's Lynn, Norfolk. Riding and Driving: General Sir H. Ewart, K.C.B., Royal Mews, Buckingham Palace, London, S.W., and Mr. James Hornsby, Laxton Park, Stamford. Jumping: The Hon. [illegible] Forester, Mr. H. Ernest Gretton, Bridge Place, Bridge, Mr. [illegible] E. Mytton, Bridge.

CATTLE.—Dairy: Mr. H. J. Gibbs, Milford, Salisbury, and Mr. George Adams, Walker House, Farnham, Surrey. Sussex: Mr. William Wood, [illegible] Hassocks, and Mr. William Mason, Wivelsfield Green, Haywards Heath. Mr. C. C. Tadgell, The Cedars, West Tarring, and Mr. W. Budgett, Henbury, near Bristol. Guernsey: Mr. G. Titus Barbam Sculpt, Park Farm, Hooton, and the Hon. and Rev. Andrew Carey, Hooton, Les Quennevais, St. Sampson's, Guernsey.

SHEEP: Sussex: Mr. H. J. Gyngell, Church Norton, Selsey, and Mr. Hugh [illegible], Kingston, near Lewes.

Pope, Beresford Manor, Plumpton (Reinette Beresford); Mr. Francis Barchard (Daisy Sweet).

Cow, calved in or previous to 1897, in calf or in milk: 1, Col. Walter A. Hankey (Silver Crown IV.); 2, Capt. A. B. S. Fraser, Worthing (Maggie 5th); 3, Mr. R. J. Streatfeild (Cora Beresford); r and vhc, Capt. A. B. S. Fraser (Countess of March); hc, Mr. R. J. Pope (Borice Beresford); Mr. F. Barchard (Daisy Sweet).

Cow, calved in or previous to 1897, in calf or in milk, bred in England (open): 1, Lady de Rothschild (May Queen); 2, Col. Walter A. Hankey (Silver Crown IV.); 3, Mrs. Charlotte McIntosh (Havering Morn 5th).

Heifer, calved in 1898, in calf or in milk (open): 1, Mr. C. W. Armitage (Flora's Daughter); 2, Lady de Rothschild (Carol); 3, Mrs. Charlotte McIntosh (Clementine IV.); c, Capt. A. B. S. Fraser (Sirius); hc, Lady Brassey (Dorothy); Mr. J. Spencer Evans (Fern's Success); Mr. R. J. Pope (Winnie Beresford); Mrs. A. F. Perkins (Miss Garfield).

Heifer, calved in 1898, in calf or in milk: 1, Capt. A. B. S. Fraser (Sirius 11th); 2, Mr. J. Spencer Evans (Fern's Success); 3, Capt. A. B. S. Fraser (Aristocracy); r and vhc, Mr. J. Pope (Winnie Beresford); hc, Capt. A. B. S. Fraser (Sirius 11th).

Heifer, calved in 1898, in milk, bred in England (open): 1, Mr. C. W. Armitage (Flora's Daughter); 2, Lady de Rothschild (Aston Clinton); 3, Capt. A. B. S. Fraser (Aristocracy); r and vhc, Col. Walter A. Hankey (Alaska); hc, Mr. Pickering Phipps, Rushton Hall, Kettering (Lady of the Lake).

Heifer, calved in 1899, bred in England (open): 1, Mr. C. W. Armitage (Belle of Leyland); 2, Lady de Rothschild (Briar); 3, Mrs. Charlotte McIntosh (Havering Lady II.); r and vhc, Mrs. A. F. Perkins (Mrs. Bardell); vhc, Captain A. B. S. Fraser (Grace); hc, Mr. C. W. Armitage (Sylvia); Mr. F. Freeman-Thomas, Ratton, Willingdon (Jauntlet); Mr. Freeman Thomas (Balm); Mr. Pickering Phipps (Speck); Mr. T. Phipps (Winsome); Mr. R. J. Streatfeild (Coral Bead); c, Mr. R. J. Streatfeild (Marry-come up).

Bull, calved in or previous to 1898 (open): 1, The Hon. T. S. Brand, Glynde Place, Lewes; 2, Mrs. A. F. Perkins (Spot Stroke); 3, Lady Brassey (Curfew); r, Hon. C. Brand (Ratton Lad); c, Lady Brassey (Perini); Mr. F. Freeman-Thomas (Leader's Prince); Mr. Pownall Ades (Holy Combe II.).

Bull, calved in 1899 (open): 1, Capt. A. B. S. Fraser (Reminder); 2, Mrs. A. F. Perkins (Bobby); 3, Mrs. Charlotte McIntosh (Halburton Prince); r, and vhc, Lady de Rothschild (The Duke); vhc, Mrs. McIntosh (Why Not); hc, Mr. J. Spencer Evans (Bahadur); Admiral the Hon. T. S. Brand (Ethelred and Egbert).

Bull, calved in 1899, bred in England: 1, Capt. A. B. S. Fraser (Maggie's King); 2 and 3, Admiral the Hon. T. S. Brand (Ethelred and Egbert).

GUERNSEYS.

Cow or heifer, calved in or previous to 1897, in calf or in milk (open): 1, Mr. E. A. Hambro (Charmante of the Grove); 2, Mr. H. Fitzwalter, Plumptre (Muriel VI.); 3, Mrs. Montefiore; r and hc, Mr. W. A. Glynn (Jessica IV.); hc, Mr. F. Hargreaves (Anneville Beauty).

Heifer, calved in 1898 (open): 1, Mrs. Montefiore (Lily of the Forest); 2, Mr. W. A. Glynn (Fairy 9th); 3, Mr. F. Hargreaves (Queen of Holland).

Heifer, calved in 1899 (open): 1, Mr. E. A. Hambro (Hayes' Princess III.); 2, W. A. Glynn (Phyllis 3rd); 3, Mr. F. Hargreaves (Cecilia); r and vhc, Mr. E. A. Hambro (Hayes Primrose); c, Mrs. Montefiore (Claremont Flora).

Bull, calved in or previous to 1898 (open): 1, Mrs. Montefiore (Signalman II.); 2, The Earl of Ashburnham, Ashburnham Place, Battle (Lord Everlasting); 3, Mr. W. A. Glynn (Clio); r and hc, Mrs. Montefiore (Lord Bobs); hc, Mr. J. Toogood Parsons, jun., Ashurst Place, Langton, Tunbridge Wells (Lord Kitchener).

Bull, calved in 1899 (open): 1, Mr. E. A. Hambro (Hayes Prince); 2, Mr. W. A. Glynn (Billy 8th); 3, Earl of Ashburnham (Lord Jones); r and hc, Mr. H. Fitzwalter (Plumptre Benjamin); c, Mr. Frank Hargreaves (Kimberley).

SHEEP.

SOUTHDOWNS.

Pen of nine Southdown ewes, three two-tooth, three four-tooth, and three six-tooth, drawn from a hill farm flock of not less than 300 ewes: 1, Mr. J. A. Miller, Michelgrove, Worthing; 2, Mr. John Kenward, Hamsey Place, Lewes; 3, Mr. C. G. S. C. Duke, Lee Farm, Angmering; r, Admiral the Hon. T. S. Brand.

Pen of nine Southdown ewes, three two-tooth, three four-tooth, and three six-tooth, drawn from an under hill flock of not fewer than 100 ewes: 1, Mr. F. N. Hobgen; 2, Mrs. Montefiore; 3, Pagham Harbour Company; r and hc, Mr. W. Toop, Westergate, Aldingbourne.

Pen of nine Southdown stock ewe lambs, bred by the exhibitor from a hill farm flock of not fewer than 300 ewes: 1, Mr. J. A. Miller; 2, Mr. J. Kenward, Hamsey Place, Lewes; 3, Admiral the Hon. T. S. Brand; r and hc, Mr. C. J. S. C. Duke.

Pen of nine Southdown stock ewe lambs, bred by the exhibitor from an under hill flock of not fewer than 100 ewes: 1, Mrs. Montefiore; 2, Pagham Harbour Company; 3, Mr. F. N. Hobgen; r and hc, Mr. W. Toop; hc, His Grace the Duke of Devonshire, K.G., Eastbourne, and Mr. J. Tompkins, Angmering.

Southdown two-shear ram (open): 1, Pagham Harbour Company; 2, Mr. W. Toop; 3, Mr. Allan Cooper, Norton, Bishopstone, Lewes (Buller).

Southdown shearling ram (open): 1 Mr. F. N. Hobgen; 2, Mr. W. Toop; 3, Pagham Harbour Company; r and hc, Mr. Alfred Heasman, Court Wick, Littlehampton; hc, Mr. Alfred Heasman and Mr. Hugh Penfold.

Southdown ram lamb (open): 1, Mr. W. Toop; 2, Mr. Hugh Penfold; 3, Mr. A. Heasman; r and hc, Mr. F. C. Hobgen; c, Mr Hobgen and Mr. A. Heasman.

Herts.

Beautiful weather was associated with the annual show of the Herts Agricultural Society, held at Hatfield on the 19th inst., but the attendance of visitors showed a considerable decrease when compared with the total of those who patronised last year's exhibition. It was estimated that 3,460 entered the show ground, the admission money amounting to £170, as against £223 taken last year. The falling off was therefore considerable, and is attributed to a large extent to the effects of the present trouble abroad. The entries of stock also showed a decrease on last year, the total being 1,351 against 1,543 last year, a decrease of 192, which, when all things are taken into consideration, is by no means an alarming decrease for a show of the magnitude of that annually held in connection with the county. While, however, there was this decrease in numbers, there was maintained an excellent standard of quality, and the show must be said to have thoroughly well maintained its reputation. Mr. A. J. Sherriff, as usual, placed his field in Newtown, covering some fifteen acres, at the disposal of the Society for the purposes of the show, and personally supervised the erection of pens, show rings, stands, etc., which were conveniently and compactly arranged, although some of the stock suffered during the day from their exposure to the powerful rays of the sun.

Horses.

The Shire horses were regarded by the judges as an extremely good lot. There were five or six "outstanders" in the classes which took a great deal of separating. Lord Rothschild's mare, The Nun, is an extraordinarily good animal, with remarkable legs and feet, every hair being in its proper place. She was by no means brought out for show purposes; but she nearly won the championship. This honour, however, went to Southgate Charm, the property of Mr. F. Crisp, which beat Lord Rothschild's mare in size, and was brought out in the pink of condition. Sir J. B. Maple's Stanney Commotion, which took first prize in her class, is a good, all-round useful mare, but was hard-pressed by Lord Rothschild's Sweet Echo, which was, however, placed second in her class. An extraordinarily good mare belonging to Sir J. B. Maple, Grand Duchess, carried all before her in three-year-old classes. This is the animal which was purchased by Sir J. B. Maple of Mr.

Greffin at Peterboro' for a thousand guineas. At the head of every class in this important section of the show were animals belonging to many of the best-known breeders in the Shire horse world. The tenant farmers showed up well both in regard to the number of their entries and the excellent quality of the animals sent by them, which included several noted prize-winners at other shows. Lord Rothschild had a notable exhibit in his entire colt, Hertfordshire, which took first prize in its class, while Sir Blundell Maple showed another uncommonly good colt foal, Old Times, which will undoubtedly hold its own throughout the season.

The pony classes did not fill up so well this year as last. In some years they have numbered as many as twenty-seven, but this year there were only seven. The nag classes, however, were satisfactory. The best class of all was unquestionably that for tradesmen's light horses and vehicles, which were excellent. Messrs. E. and J. Flack's Athol is a very nice horse, which was selected for first prize from among several very nice horses in the class. Mr. J. B. Joel's Venus was also a very nice Hackney mare, taking first place in the class for hack, mare, or gelding between 14 and 15 hands. The classes in this section were as a whole fairly well filled, and the exhibits comprised a very nice lot of Hackneys. The exhibits were as a whole a good, useful lot, shown in capital condition. Mr. S. Brunton, of Park Street, was a very successful exhibitor in the light horse classes, securing no fewer than eight first prizes, besides other minor honours. Mr. F. W. Silvester secured Mr. W. Burdett-Coutts' special prize with his Hedges Lord Roberts, a son of Hedges Laura, which has taken first and second prizes at this show for the past ten years. Great interest was, as usual, manifested in the jumping competition. An immense crowd surrounded the large ring in which the contests were brought off, and they witnessed some very good sport. A score of horses were entered in the two competitions. The first class was open to mares and geldings 15 hands and over. B. Robins, on Sterling, won first prize; the same rider took the second prize with Relaxation, and W. Chappell on Mike was third. In the second competition, for mares and geldings under 15 hands, W. Ward was easily first, his horse making not a single mistake. The second prize was won by W. J. Wright on a bay mare.

Cattle.

There was a marked falling off in the entries of polled cattle, which was chiefly accounted for by the fact that Mr. F. Crisp, a large exhibitor in previous years, was not represented, and the herds of Mr. Greenfield and Mr. Loder were not represented. In spite of their small numbers, some splendid animals were shown, especially those from Sir J. B. Maple's herd, which the judge (Mr. J. Evens) described as being "as good as man could wish to see." The pairs of dairy cows were big and good, and the single dairy cows also were five excellent animals, especially the first prize-winner, Lord Rothschild's Princess II., which was looked upon as a first-class pure-bred dairy cow, showing grand milking qualities. Mr. C. E. Wodehouse's Countess Mary 8th took second place to Princess II. Kaiserin, the grand heifer calf which excited such keen competition at Mr. Sherriff's recent sale, and was eventually purchased by Sir J. B. Maple for 80gs., carried off second prize amongst the heifers calved since 1898, and was also first for Mrs. Ross's prize of £5 for the best heifer calved in 1900.

The Jerseys were not so strong as a class as last year, but many excellent animals were shown, the honours of the day going for the most part to Lord Rothschild. There were seven exhibits in the class for bulls, amongst which Lord Rothschild won with his well-known winner, Butter Test, with which he secured honours at the Bath and West Show. In the young bull class, Lord Rothschild again carried off premier honours with Tudor Boy, a splendid specimen of the breed, second and third prizes going to Bismarck's Boy and Spectator, a couple of exceptionally good dark-coloured animals belonging to Viscount Enfield. These animals, which were brothers, were exceptionally well bred. There was very little to choose between the first and second prize-winners, and the judges had considerable difficulty in arriving at a decision as to the direction in which first honours in this class should go. In the cow class, Lord Rothschild was again to the fore with Ellen 2nd. There were only two entries here. In the class for cows calved previous to 1897, the Tring herd was again conspicuous, Guarantee 4th securing the red rosette, with Bretonne, a good typical animal, the property of Mr. S. F. Berry, of Hitchin, second. Jewel, a distinguished representative of the well-known Oxford tribe, secured for Lord Rothschild first prize amongst the heifers calved in 1897, and Viscount Enfield's Spec, one of the distinguished Spectator blood, was an excellent second. Mr. S. F. Berry was third with Upland Belle 5th. In the class for heifers calved in 1898 Lord Rothschild again came first, this time with Golden Lass, with Mr. Stride second with Meadow Sweet. Third prize also went to Lord Rothschild for his Oxford Sunrise, another capital representative of the Oxford breed. Yet another prize went to Lord Rothschild in the following class, for heifers calved since 1898, where he took second place to Lord Enfield's Liza with his Grace Darling. This was a strong, well-filled class, and embraced several excellent animals. Lord Enfield was again first in the heifer class, which contained a number of very good exhibits, and competition was keen. In the class for pairs of cows of the best milking qualities, young and old cows had to compete together, and this gave the judges some considerable difficulty. It would be better for both competitors and judges if two separate classes could be devoted to these exhibits. Lord Rothschild carried off both first and second prizes.

Sheep.

The sheep, taken as a whole, showed an advance in the quality of previous years. All breeds were well represented, and especially the Hampshires. The quality of the latter also was particularly good. Mr. Abel H. Smith, M.P., the president, was remarkably successful. He entered four Southdowns for competition, and secured three prizes. Mr. R. A. Smith scored two successes in the same section. Mr. T. F. Buxton's exhibits carried off no less than ten cards in the various classes. The champion cup was also awarded to this gentleman for his exhibit of three ram lambs. The two reserve cards in the competition were placed on sheep owned by Mr. Buxton.

Pigs.

There was good competition among the White pigs, though none of the exhibits were of a special character. The winners in the class for sows other than Berkshires, and for pair of yelts other than Berkshires were spoken of as a very good lot of pigs. All the Berkshires were good, and the class for sows farrowed in 1899 was quite the best in the show. In the next class the winning pair of Berkshire yelts were good, but the others were only medium. Mr. C. A. Barnes carried off the championship with Oxford 8th.

Staffordshire.

Previous to last week the Staffordshire Agricultural Society had not visited Stafford since 1892. The show on Tuesday and Wednesday was a good one, and proved in every way satisfactory. The showyard, which was compactly arranged, covering about twenty-one acres of fairly level turf land, was pleasantly situated on the New Common, Stone Road, with easy access of the town and railway stations. The total number of entries of live stock was 507, only three below the aggregate last year, when the exhibition was held at Wolverhampton, and 89 in advance of the total two years ago at Burslem, while the falling off compared with the last Stafford meeting was but 37. The principal feature of the exhibition on this occasion was the grand display of horses, the total number of entries being one of the largest ever experienced by the society. No fewer that 232 horses were catalogued, 65 more than last year, about a hundred above the aggregate at Burslem two years ago, and 133 in advance of the poor total at the last Stafford Show. On the other hand, there was an almost corresponding falling off in the exhibition of cattle. The entries number 180, or 109 below the total at the county town in 1892, 47 fewer than last year, and 20 below the aggregate at Burslem. Indeed, it is many years since the entries of cattle were so few as they were this year. The 72 entries of sheep were scarcely up to the general average, but the twenty pens of pigs were five better than at Wolverhampton. In addition to the stock there was a capital entry of farm produce, including butter, cheese, poultry, honey, and bee appliances. The total amount offered in prizes exceeded £1,000, that sum including £235 given to hunting horses, £290 to agricultural and Shire horses, £250 to cattle, £120 to sheep, and £55 to pigs. At a council meeting of the Society, held on Tuesday afternoon, it was decided to hold next year's show at Newcastle-under-Lyme.

Horses.

There were eight classes of hunters, and the animals generally were of a thoroughly representative character. The heavy-weight hunters headed by Sir Peter Walker's Curlew only numbered seven. Mr. T. Bradburn was second with a horse that did not get placed at Newport. Twelve-stone hunters were a nice class. Sir Peter Walker again took first prize, this time with a well-known hunter, Rocket. Mrs. Murphy's second did not go quite so well as the first. A pretty mare of Mr. James Meakin's was third. The four-year-olds were a very small class, and Mr. Wood and Mr. R. S. Wilkinson were well at the top. There were five three-year-olds, headed by Mr. Bernard Wall's chestnut gelding that was first at Leicester. The second gelding belonged to Mr. Whitehead. Two-year-old geldings or fillies were a good class, and, in fact, were better than at previous years' shows. Sir Peter Walker won with a rather plain looking bay by Cruiser, that had free action, and Mr. Haslewood was second with a filly, Four Poster. There were only half a dozen yearlings. The first was the property of Capt. Heywood Lonsdale, and was a big, well-grown youngster by his stud horse Withernam. The second was an exceedingly well-bred mare of Mr. Watkins's, of Lichfield. The 14st. hunters were all shown by tenant farmers. Mr. W. F. Wilkinson won with a strong hunter that moved well, and Mr. Bourne's second, by Savoy, well deserved his place. The class for brood mares and foals could not be considered thoroughly representative of a hunting county. Mr. C. Miles won with a capital sort of mare, that has been hunted with the Meynell regularly. Messrs. Furner and Burton were second with a neat horse by their blood stallion, Dirk Hatteraick, whilst Mr. A. C. Twyman was h.c. for his entry by Beggar Boy.

It has become the custom now to take the Hackney and Cob classes on the second day of the show, an innovation that certainly adds considerable interest to the proceedings and gives visitors a little more for their money. In the seven classes there were only thirty-two entries. Col. Swinfen-Broun won in the under 15.2 class with a beautiful mover. Mr. Webb was second with a powerful animal with not quite the quality of the first. Mr. F. J. Batchelor's smart chestnut by Master of Ballantire, would have had an easy win in the four-year old class under 15 hands if he had had the fortune to be under 15 hands. The conditions of this class are rather curious, the stipulation being "under 15 hands." It might be suggested that this should be altered another year to "15 hands and under." The disqualification of Mr. Batchelor let in Mr. C. H. Wright's Empress. The second then went to Mr. Wiggin's dark-brown Bobs. Col. Swinfen-Broun's was the only exhibit in the bigger harness class. A particularly smart cob headed the under 15 hands class shown in harness. This was a roan entire of Mr. A. H. Pooler's of Tibberton, sired by M.P. Ponies not exceeding 14 and over 12 hands were headed by a well-known animal of Mr. Wm. Foster's. He had really no difficulty in winning in the class of five, and was followed by a strong colt not quite so classy as the first. Mr. A. H. Pooler easily headed the harness class with his roan horse, and was a worthy winner of the Mayor of Stafford's prize. A very useful brown gelding from a local exhibitor—Mr. W. Brown, of Stafford, was second, and these two were well in front of the class. The brood mare class brought out five nice harness horses. Mr. Batchelor won with his first and champion at Shrewsbury that had with her a capital strong foal by Royal Danegelt. Mr. G. H. Watkins's well-known old mare, The Abbess, was second, and she showed very well. The Hackney Society's silver medal went to Mr. Batchelor's chestnut, disqualified in the 15 hands class.

The section devoted to agricultural horses was a satisfactory one. There was only a small class of older stallions, and the Cannock Agricultural Company had little trouble in winning with Xerxes 2nd. They also took second with Highthorn. There were only four three-year-old stallions, and they were headed by Mr. T. Appleby's Hixon Royal Stamp, which was well followed by an improving horse from the Cannock Stud. Two-year-old stallions were again a small class, and Mr. Cambridge won with a smart bay, but not too big. He was well followed by Mr. Morris's horse. Mr. Eadie's yearling had the nicest quality of anything in the class, a useful Pride of Blagdon colt of Mr. Whitehurst being second. In the four-year-old class Messrs. Lowndes' Rolleston Fuchsia was an easy first, Sir Oswald Mosley being second with a weighty good filly. A famous gelding headed the four-year-old gelding class, but at the same time he had some good horses behind him. Mr. Eadie's Barrow Waggoner has, of course, a record from far larger shows. The Cannock Agricultural Company were well to the front with their pair of dray horses, and they were two well-bred, active, heavy horses. A particularly pretty mare headed the three-year-old class. This was Mr. James Eadie's Holker Betty, a daughter of Calwich Heirloom. Mr. Ratcliff was second with a daughter of Wolseley 2nd. Three-year-old geldings were only a small class, but there was a very good horse at the top. This was Mr. Appleby's Hixon Waggoner, a son of his own smart stallion that has had some considerable showyard success locally. Two-year-old fillies were a more numerous class than most of the previous ones. Mr. Brandon's Xerxes filly, first at Newport, won here again. The second filly of Mr. Lewis Dodd was not so good below as the winner. Two-year-old geldings were a very small class, and Mr. Holdcroft won with a nice reachy horse. There was quite a creditable class of yearling fillies, both as regarded numbers and quality. Both the first and second prizes went to daughters of Harold, and the first prize winner is a particularly smart animal. There were but four yearling geldings, and Mr. Done won with a Ridware Ranger colt that has plenty of weight and substance. There was a capital class of colt foals, and it was one of the best sections of the show. The Cannock Company's Cannock Paxton headed this good class, and was followed by a Harold colt of Mr. John Blunt's. There were several good foals in the class. Filly foals were another nice lot, and numbered over a dozen. It was impossible to get away from Mr. Eadie's bay, by Barrow Victor, an animal of nice quality. Mr. McCalmont's exhibit made a very good second. At the Staffordshire Show the Shire brood mares and foals are generally a strong class. This year the numbers numbered a dozen, and they included some well-known dams. A famous mare was at the top in Mr. Eadie's Hendre Fairy, and she stood well in front of many more quality than Mr. Egerton Orme's black mare that was second. Mr. John Orme was third with a neat young mare, and it speaks for the excellence of the class when the

Cannock Company could only get reserve with their smart British Standard filly.

As already stated, there was a considerable decrease in the number of cattle this year, but neither in Shorthorns nor in dairy cattle was this accompanied by a falling-off in general excellence. In the class of Shorthorn bulls over two and under five years old, the three only competitors had each a prize. Mr. R. P. Cooper's light roan, Duke Carolus 13th, bred by Lord Lathom, secured first place very easily, and he well deserved the society's silver medal; Mr. H. Ker Colville's Prince Edward, being four and a-half years old, had the disadvantage of having lost some of his youthful bloom, but fairly won the second prize; Mr. C. W. Kellock secured the third prize with Prince of May, bred by Major Barton. There was a full entry of bulls under two years. In a somewhat uneven lot, Mr. W. F. Inge with his roan Edward 8th won the first prize and the society's silver medal. This useful youngster was bought at Bingley Hall last March for 65gs. Mr. T. C. Heath won second prize with Rearguard, and Mr. Gerrard Hindlip, Worcester, the third prize with his roan Dragon Fly. Mr. R. P. Cooper, with his red Saturn, bred by Lord Lovat, was somewhat unlucky in missing a prize and having to put up with the reserve. In bull calves there was a fair competition. Mr. C. W. Kellock, with his nine-months roan, out of a cow with which he won Lord Hatherton's first prize for in-calf dairy cows, had no difficulty in taking first place in bull calves. Both cow and calf were purchased at Mr. P. H. Chester's sale. Both second and third prizes fell to Mr. C. E. Morris for bulls bred at Wood Eaton Manor, Nobleman, a roan, being placed before Dairy Boy, a red. Shorthorn cows in calf or in milk were a good class. Mr. H. Ker Colville had in Baschurch Sybil a large-framed animal with good dairy qualities and well deserving her first prize, though she was no higher than reserve at Shrewsbury. Mr. C. W. Kellock, with Bingley Musical 3rd, took second prize. Mr. H. Ker Colville was again successful with his roan Lady Agnes Bates, which secured third prize. Heifers under three years were good, and here Mr. Ker Colville gained another first prize with Lady Bellaport, Mr. J. Wood, Marchington, running him close with his red Daisy Foggathorpe. All nine exhibits in heifers under two years were favourably noticed by the judges. The first prize went to Mr. H. Wynne, Droitwich, for a heavy-fleshed roan, bred by himself, Messrs. Green having the second prize with another roan, and Mr. H. Ker Colville being reserve with a red. The two entries from Shenstone Court brought two high commendations to Mr. R. P. Cooper, and the four entries from Rolleston gave the somewhat barren satisfaction of one high commendation and three commendations to Sir Oswald Mosley. The old bulls in dairy cattle to be exhibited in store condition by tenant farmers keeping at least ten cows competed for a 10-guinea prize given by Lord Burton, and a second prize of 5gs. given by Mr. J. Robinson, Westwood Hall. Messrs. Rawes secured Lord Burton's prize and the society's silver medal with a three-and-a-half-year-old red named Royal Seal. Another red, exhibited by Mr. Chas. F. Hobson, Eccleshall, got the second prize, Mr T. A. Brown, Tarporley, with his roan New Member had the reserve, and a high commendation went to Mrs. Ann Dewhurst for her roan Staffordshire Duke, bred at Wood Eaton Manor. For bulls under two years, Mr. T. C. Heath and Messrs. Rawes were strong competitors, the former getting into chief place with Right Baron, a red with little white, and the latter, with a good-fleshed roan named Good Boy, being a good second. Mrs. Ann Dewhurst again came near a prize with her reserve, May King's Farewell. In the class for bull calves exhibited and bred by a tenant farmer, Mr. T. C. Heath was awarded first prize for Right Sort, Mr. A. Stretton, with another roan, having the second place.

We now come to the two best classes in the show. It may be said generally that the females were better than the males in the dairy cattle. Specially good were the cows both in milk and in calf. In the class for dairy cow over three years, in milk, having produced a calf within twelve months, no fewer than seven were kept in for favourable notice after the work of weeding-out had been done. For the first place there was a keen fight between the roan Shorthorn shown by Mr. J. A. Brown, Tarporley, and the roan shown by Mr. T. C. Heath. The former eventually was placed first and the latter second. All the exhibits in the class were of Shorthorn type, and the struggle for place went on step by step until all the three prizes and the reserve had been fixed upon. Mr. J. Bunch, with his red-and-white Gay Lass, took the third prize, and the reserve went to Mr. C. F. Hobson, Eccleshall. The competition for dairy cow over three years, in calf, seemed to be a labour of love to the judges, and much time was taken over the awards. Thirteen cows, all good, came up for judgment, and only five were weeded out. The eight roans left in were wonderfully good specimens of farmers' cattle. Mr. C. W. Kellock, with his Rosy Morn, dam of the first-prize bull calf, was placed first. Mr. A Stretton, Wichnor, had second prize, and Mr W. Jackson, Barlaston, the third prize, and was also commended for another animal. The offer by Lord Norton of £5 for the best pair of cows exhibited in the dairy cow classes the property of a tenant rather complicated the situation. Eventually the award went to Mr. T. C. Heath's roan. Another special prize of £5 given by R. A. Watkins, Tillington, for the best cow for dairy purposes, the property of a tenant farmer residing within five miles of the show and exhibited in store condition, was taken by Mr. R. Brown's roan. The best heifer under three years, bred and shown by a tenant farmer, was shown by Messrs. Rawes, Mr. H. Wynne being second. In heifers in milk, under three years, bred and shown by a tenant farmer, there was only one exhibit by Mr. H. Wynne. Messrs. Day and Sons' prize of a £5 medicine chest for the best pair of heifers exhibited in the in-calf and in-milk classes went to Mr. A. Stretton's pair. A capital show of heifers under two years bred and shown by a tenant farmer attracted favourable notice from the judges. Of the six which came before them the best was Mr. J. A. Brown's, the second being Mr. J. Bunch's. In heifers under one year, bred and shown by a tenant-farmer, the competition is very good. And here Mr. T. C. Heath, with a beautiful white, got first. Mr. A. Stretton, with a roan, the second, and Mr. T. C. Heath, the reserve.

There was only one class of Jerseys, but several capital milkers were on view. The best was Red Fern, a three-year-old fawn, belonging to Mr. J. R. Walker, true to type; while an older cow, Warren Maid, displaying plenty of Jersey character, the property of Mr. L. G. Gisborne, was second. This gentleman also was reserve, and Mr. Walker got a commendation. Aberdeen-Angus cattle made a pleasing show. In the class for bulls over two years old Mr. F. Vaughan Williams, Eccleshall Castle, won first prize, Mr. G. E. Meakin the second, and Mr. L. A. Macpherson, Wyrley Grove, the reserve. The same exhibitors came again in bulls under two years, and this time Mr. Meakin was first, Mr. Vaughan Williams second, and Mr. L. A. Macpherson reserve. In cows in milk or in calf Mr. Vaughan Williams had two entries and Mr. Macpherson three, the former taking first prize and reserve and the latter the second prize. For similar prizes in heifers under two years Mr. Meakin put in an appearance, but unsuccessfully, Mr. Macpherson taking first prize and Mr. Vaughan Williams the second and also the reserve. Mr. Macpherson offered a challenge cup, value £10, to the exhibitor in the Aberdeen-Angus classes gaining the greatest number of points (each first prize to count as two points and each second prize as one point). The cup has to be won three years by the same competitor before it becomes his property absolutely. Messrs. Meakin and Vaughan Williams have this year each scored six points, and the challenge cup remains in the custody of its donor.

There were seven entries of cows in calf or in milk grazed on Stafford Common. Mr. Clarke had two, and he took first prize and a high commendation. Mr. Richard Perry won the second prize, and Mr. T. Clayton had the reserve and also a commendation. For heifers under two years grazed on Stafford Common the first prize went to James Sutton and the second to A. Jervis.

The show of sheep was confined to the Shropshire variety, and the display was of a very creditable character. The number of entries was 72, a smaller total than used to be found at the Staffordshire shows a few years ago, but larger than in recent years. Twelve months ago, at Wolverhampton, the aggregate rose to 97, but for some reason there was a reduction of 25 on the present occasion, although the total was 30 more than the poor entry which was obtained two years ago at Burslem. Winners of prizes at the Royal Show were debarred from competing, but a number of very useful animals were penned. In old rams Mr. R. Raywood, Much Wenlock, won the first prize with a good sheep, which beat Mr. J. Harding's reserve at the Royal; Mrs. Barrs had the reserve. As is usual, the competition in shearling rams was more interesting than in old rams. In single shearlings, no fewer than five entries failed to put in an appearance. The winner of the first prize and the Society's silver medal was an excellent specimen of Mr. J. Harding's (Shiffnal) flock. Mr. F. W. Inge took the second prize with a shearling, and Mr. George Brown, Wolgarston, secured the third prize and the reserve. For shearling rams in pens of five three very good pens entered. Mr. Barrs here succeeded in carrying off first honours, but Mr. R. P. Cooper had an exceedingly good lot in the winners of the second prize. In single ram lambs, besides the three prizes and the necessary reserve, the judges gave a high commendation and a commendation. Mr. Bernard Wall, Coleshill, was the winner of the first prize with a capital specimen of the Shropshire lamb. Mr. J. Harding had two entries, and won the second prize and a high commendation. Mrs. Barrs, with a pretty youngster, secured the third prize, and Mr. R. P. Cooper the reserve with a nice but rather small lamb. There is a disappointing lack of competition in pens of five breeding ewes which have reared a lamb in 1900. But the only two pens are good, Mr. R. P. Cooper taking first prize and Mr. Geo. Brown the second. Again, in pens of five shearling ewes the competitors were only equal in number to the prizes. It is true that all three prizes are well deserved, as the class was probably the most perfect among the sheep. Mr. R. P. Cooper had some capital theaves, and secured the first place over Mr. W. F. Inge, Mrs. Barrs coming third. Mr. Bernard Wall won first prize in ewe lambs shown in pens of five, Mrs. Barrs taking the second prize, and Mr. R. P. Cooper the third. Considering the early period of the season the lambs shown were more forward than might have been expected. Two prizes were given for ram lambs in pens of five, and the first went to Mr. J. S. Harding, Catstree House, Mr. R. P. Cooper taking second, whilst Mr. Bernard Wall had to be satisfied with the reserve. The remaining classes in sheep competed for prizes offered by the Stafford Local Committee and by other local donors. In a moderate class of breeding ewes in pens of five that have suckled lambs in 1900, Mr. A. E. Chadderton, The Heamies, was awarded the first prize, and Mr. F. J. S. Griffin, Preston Vale, the second. In the class for theaves in pens of five there was a better competition, and more favourable notice from the judges. Mr. Herbert Mitchell, Longnor Hall Farm, was the first prize winner, and Mr. W. H. Heath, Huntington Farm, the second. Two prizes were given for ewe lambs in pens of five, and these attracted a fair competition. The Duke of Sutherland, who had only to be satisfied with commendation in previous classes, now came to the front. Mr. F. J. S. Griffin was second, and Mrs. Alice Stubbs, Weeping Cross, reserve, and highly commended. The sheep classes closed with only one pen of singularly good fat wethers, shown by Mr. Herbert Mitchell, and well worthy of the first prize bestowed upon it.

Pigs.

Owing, very probably, to the prevalence of swine fever, and in some measure to the disinclination of pig breeders to go to the trouble of exhibiting their stock, the entries of pigs were much less numerous than usual, while the extreme heat of the weather had the result of still further reducing the number of the exhibits present. There were only two entries of Large White boars, both from the noted Barrowfield herd. Topsman, a two years and four months old, of great depth, was selected for first prize, and afterwards won the society's medal as the best boar in the yard. Barrowfield Eclipse, a younger and much longer pig, was a choice specimen of the Large White. There was only one Large White sow shown, and this a moderate specimen, but she had a capital litter, and the judge gave her a first prize. All four of the Middle White pigs shown were from the well-known Castlecroft herd. The sows were much better in character. Castlecroft Ladybird won first well; her sister, placed second, was, like her, good in hair and skin, but not so stylish or level. None of the four Berkshire boars put in an appearance, and the only two sows were from Mr. A. O. Worthington's herd, and he was awarded first and second prize. There was but one Tamworth boar of good colour, but not in first-class condition, and only one sow of the breed, a good typical one, both belonging to Sir Oswald Mosley. In pens of three breeding pigs first prize was allotted to a very smart pen of Whites, shown by Mr. Twentyman, and second to Tamworths, belonging to Sir Oswald Mosley. In pens of three young pigs of the Berkshire breed not restricted to breeding properties, Mr. Worthington showed both pens, which were of the same litter, but the best had been kept for feeding, and these won first, the other taking second.

Bedfordshire.

The ninety-ninth show of the Beds. Agricultural Society, held on Thursday last, was a very successful gathering. The entries of cattle, sheep, and horses totalled 381, as against 252 in 1899. In 1898 the figure was 329, in 1897 it was 358, in 1896 it was 237, and in 1895 it was 363. In the cattle section there was the greatest increase, there being seventy-one entries as against an average for five years of fifty-one. There is no comparison in the figures relating to the pig section, on account of the frequent enforcement of the swine fever regulations.

Not only were the entries good, but the quality was excellent. This was particularly noticeable of the horses: a finer collection was never seen in the society's show yard. The cattle section was not so full as the horses. Among the competitors for the first time were Dexters. Sheep were a good average show, and it was noticeable that some of the older prize takers had this year to stand aside in favour of younger competitors. Pigs, after a lengthy absence, were once again allowed to appear.

Judges.

CART HORSES: Mr. Henry Smith, The Grove, Coppenhall, Barlaston, Stone, Staffordshire.

HUNTERS: Mr. H. Lupton, The Ayscoughfee, Mr. George Taylor, Cromwell, near Newark.

CATTLE: Mr. J. A. Preece, Drayton, Thimpston; Mr. Arthur Bretton, Great Billing, Northampton.

SHEEP AND PIGS: Mr. Thomas Rigby, Mawdesley Hall Farm, Saffron Walden.

Prize List.

CART HORSES.

Class 1 (Mares or Geldings, the property of a resident in the county). 1. Spencer Draper, Crow Hill Farm, Wilden; 2. Benjamin Hawkins, Bromham; 3. H. Chapman, Bolnhurst.

Class 2 (Mares or Geldings, the property of a resident in the county). 1. George Stone, Marston Lady Hill; 2. J. J. Malden, Stockbrook Farm, Keysoe; 3. W. H. Heath, Shenstone Court, Stourbridge.

Class 3 (Mares or Geldings, the property of a resident in the county). 1. Spencer Draper, Duke; 2. Spencer Draper, Prince; 3. Robert Long.

Class 4 (Mares or Geldings, bred in and the property of a resident in the county, exempt by Mr. H. H. Gibbs). 1. J. J. Malden (Stockbrook Jewel); 2. James Day, Roxton (Gay Lass); 3.

George Street (Maulden Countess III.), 1, James Day (Roxton Garnet).

Gelding, foaled in 1897, the property of a Bedfordshire tenant farmer: 1, Robert Whitworth, Bolnhurst; 2, W. S. Brocklehurst, Meadow Farm, Kempston (Kempston Actor); 3, Benjamin Hawkins (Grace); he, John Brown.

Mare foaled in 1896, the property of a county resident: 1, Benjamin Hawkins (Bloss 3rd); 2, John Batt, Mid Farm, Willington (Bluey); 3, J. King and Sons, Broom (Broomfield Duchess); he, John Brown; c, James Day (Worsley Princess IV.)

Gelding or mare, four years old and upwards, the property of an Oxfordshire resident or an adjoining county: 1, A. Ransom, Hitchin; 2, Spencer Draper (Woodham Royal); 3, C. Sheppard Marsh, Little Offley, Hitchin (Speedwell); he, Bryan Welch, Leighton Buzzard.

Pair of geldings or mares, any age, the property of a bona fide tenant farmer residing in the county: 1, J. King and Sons, Broom (Nightshade); 2, Benjamin Hawkins (Duke); 3, Spencer Draper (Punch); r, John Batt, Willington (Peaches); he, James Day (Roxton Cherry).

Pair of geldings or mares foaled before 1897: 1, A. Ransom, Hitchin; 2, Benjamin Hawkins (Duke); r, S. Spencer Draper (Punch and Captain).

Mare and foal: 1, Sir J. Blundell Maple, Bart., Childwick, St. Albans (Stanney Connection); 2, Miss Alice de Rothschild, Waddesdon (Lily); 3, C. Sheppard Marsh, Little Offley (Brookfield Bonny); r, A. Ransom; he, J. King and Sons, Broom (Jet), J. Henry Clark, Eyeshey (Pytchley Countess).

Mare and foal, the property of a bona fide tenant farmer, residing in the county: 1, J. King and Sons (Jet); 2, James Day (Roxton Beauty); 3, George Street (Maulden Jewel II.); r, Charles Franklin; he, George Humphreys; George E. Brown, Marston Mercaine (Victoria of Worsley VI.); c, James A. Horsford, Dean (Flower).

Colt foal, the property of a resident in the county: 1, Charles Franklin; 2, James Day; 3, Samuel Harrison; r, George Humphreys; he, James Day.

Filly foal, the property of a resident in the county: 1, Bryan Welch; 2, J. King and Sons; 3, James A. Horsford, Dean; r, James Day; c, John Brown.

A silver medal, offered by the Shire Horse Society for the best Shire mare, filly, or filly foal, registered or eligible for registration in the Stud Book: 1, Sir J. Blundell Maple, Bart.; r, A. Ransom, Hitchin.

HUNTERS, HACKNEYS, COBS, AND PONIES.

Mare, suitable for breeding hunters, with foal at foot, by a thoroughbred horse, the property of a resident in the Oakley or adjoining hunts: 1, Executors of Thos. Phipps Speer, Kempston; 2, Robert Long, Upper Sound an (Lady-smith); r, W. Mills, Cardington (Conquest); c, Hugh E. Browning, Clapham Park (Hilda).

Three-year-old gelding or mare by a thoroughbred horse for hunting purposes, bred in the counties of Bedford or Huntingdon: 1, Lewis Walker, junr., Stagsden (Hilda); 2, Frederick W. Gostling, Oakley, (Marigold); r, Frederick Newbery, Milton Ernest; he, Charles Hawkins, Hardwicke Hill Farm, Elstow (Mayflower).

Four-year-old gelding or mare for hunting purposes, bred in the county of Bedford, or the property of a bona fide tenant farmer or his son residing within the county: 1, Charles Brooks, Mursley Hall, Winslow; 2, Christopher Ingle, Bletsoe Park; r, Emery Cranfield, Elstow.

Hunter not above eight years old, adapted for hunting purposes, and up to a weight of not less than 13 stone: 1, J. H. Sedgley, Church Langton, Market Harborough (Loyal); 2, William Manning, West Park, Wing; 3, William Whitehead, Shelton (Baronet); r, G. W. Sumner, Desborough (Sportsman); he, Alfred J. Cumpion, Bletsoe Castle (Hurricane); Robert Long (Hagar); c, W. H. Allen, Bromham House (Irish Oak).

An oil painting, in gilt frame, value £10 10s., being the portrait of the best animal exhibited in Classes 14 to 17: 1, J. H. Sedgley; r, William Manning.

Cob, not exceeding 15 hands: 1, John A. Bouverie, Hardingstone House, Northampton (Rufus); 2, J. F. Hatfield Harter, Cranfield Court (Beauty Bright); r, T. Tirrell, Avenue Hotel, Kettering (County Swell); he, Sydney Brunton, St. Albans (Harebelle); c, William Manning.

Hackney, of any age, over 13½ hands, the property of a resident in this or an adjoining county: 1, John A. Bouverie (Dimples); 2, T. Tirrell (Gladys); r, Edward Haigh, Ellesmere, Shakespeare Road, Bedford (Sportsman); he, Percy H. Buller, Leighton Buzzard (Fleshlights); c, George Hawkes (Lunkar); Miss Barnett, Stratton Park (Jacob).

Horse, exceeding 15 hands, shown in single harness: 1, Sydney Brunton, St. Albans (Witcham Empress); 2, Percy H. Buller (Dark Daisy); r, Mrs. Dixon, Cresbrook Hall, Monsal Dale; he, Percy H. Buller (Fleshlight); F. E. Hurst Hodgson, St. Mary's Abbey, Bedford (Ladysmith); c, A. Cribbs, Brewham Road, Bedford (The Comet); Miss Barnett (Jacob).

Cob, not exceeding 15 hands, shown in single harness, the property of a resident in the county: 1, Robert Whitworth; 2, William Folkes; r, George Claridge (The Tiger); he, William Meares (Ticklerd); c, Alfred Cox, Wilstead (Tom); John Lee Shelton Rectory (Speed); Miss E. M. Pope, Sandy Park; George Tansley, 111, High Street, Bedford.

Pony, not exceeding 13 hands, shown in single harness, the property of a resident in the county: 1, George Walker, junr., Jackman's Farm, Bedford (Starlight); 2, Daniel Richardson, Snow Hill, Maulden; r, E. J. Welhead, Bedford (Beauty).

Pony, not exceeding 13 hands, shown in single harness: 1, C. H. R. Stock, Shotover Cottage, Headington Quarry, Oxford; 2, Sydney Brunton (Surprise); r, T. Tirrell (Bobs); he, George Walker, jun (Starlight); c, H. S. Tasker, Riversfield, St. Neots.

Driving competition, with obstacles: 1, Miss E. M. Pope (Donovan); 2, C. H. R. Stock; r, Sydney Brunton (Surprise).

Horse of any age, that jumps his fences in the best manner: 1, Benjamin Robins; 2, C. Jerome, Sutton Coldfield (Comet); r, Charles Brooks, Winslow.

Horse, of any age, that jumps his fences in the best manner being the property of a resident in this or an adjoining county: 1, Benjamin Robins; 2, James Francis (Phyllis); r, Charles Brooks.

BULLS.

Bull, above eighteen months and under three years old: 1, Miss Alice de Rothschild, Waddesdon (Royal Prince); 2, W. H. O. Duncombe, Waresley Park (Highland Ranger); r, John Britten, Abington, Northampton (Barrington Duke); he, F. A. W. Wythes, Ravensden House (Executor); c, A. S. Thornton, Minor House, Muggerhanger (Bright Star).

Bull, above one and under two years old, the property of a resident in the county: 1, Arthur S. Thornton (Bright Star); 2, Rev. P. W. Wyatt, Austin Canons (Kempston Abbott); r, F. A. W. Wythes (Baron de Vere).

District prize of £10, given by the Shorthorn Society of Great Britain and Ireland, for the best Shorthorn bull in the counties of Bedford, Hertford, and Middlesex, calved in 1899: 1 and r, Arthur S. Thornton (Bright Star and Dancing Duke).

COWS AND HEIFERS.

Heifer, above one and not exceeding two years old (prizes by Mr. J. E. Platt): 1, Leopold de Rothschild (Mayflower 8th); 2, W. H. O. Duncombe (Ruby Robe); r, Miss Alice de Rothschild (Starlight); he, William Jackson, Hitchin (Sherborne Girlie); c, Hipwell and Sons, Sharnbrook (Dulcie Bell 3rd).

Cow or heifer, in calf or in milk, not exceeding three years old: 1 and 2, Miss Alice de Rothschild (Rose of Underley 6th and Miss Burnaby); r, Leopold de Rothschild (Princess Irene); c, C. Sheppard Marsh (Honey Bag)

Dairy cow, in milk or in calf, the property of a bona-fide tenant farmer residing within the county: 1, Benjamin Howkins; 2 and r, Charles Ibbott.

Two dairy cows of one herd, in milk or in calf, the property of a bona-fide tenant farmer residing within the county: 1, John Brown, Houghton Conquest; 2, Benjamin Howkins; r, George Humphreys.

Dairy cow, in milk or in calf, the property of a bona-fide tenant farmer residing in the county or within fifteen miles of the Shire Hall: 1, J. C. H. Robinson, Newport Pagnell; 2, Benjamin Howkins; r, John Brown; he and c, Charles Ibbott.

Cow, of any age, in calf or in milk: 1, W. H. O. Duncombe; 2, Miss Alice de Rothschild (Bructer Queen); r, Leopold de Rothschild (Mayflower 3rd); c, Benjamin Howkins; Arthur S. Thornton (Honeydew 4th).

Dexter cow, of any age, or in milk: 1, Joseph Paisley, Waresley; r, Rev. Paul W. Wyatt, Bedford.

SHEEP.

Short-woolled shearling ram: 1, 2, and 3, T. Fowell Buxton, Waters Place, Ware; r, W. B. Greenfield, Flamsteadbury; c, Mrs. Elizabeth James, Cople.

Five breeding ewes, of any age or breed, which shall have suckled lambs up to the 1st of June, 1900: 1, E. W. Baird, Exning House, Newmarket; 2, T. Fowell Buxton; r, Benjamin Howkins.

Ten cross-bred theaves, the property of a Bedfordshire tenant farmer, to be fresh or suckling gueaves. To running in any form to be a hospital case: 1, M. A. E. Woodward, Yelvs, Lyon Warden; 2, H. Compton; 3, Benjamin Howkins, Bromham; r, M. F. Bliss, Cranfield.

Ten breeding ewes, of any age or breed, which shall have suckled lambs up to the 1st day of June, 1900, the property of a bona fide tenant farmer residing in the county of within fifteen miles of the same: 1, Robert Long, Howkins; 2, W. S. Brocklehurst; r, Robert Long.

Three ram lambs, the property of a bona fide tenant farmer residing in the county: 1, H. H. Green; 2, George Street; r and he, H. H. Green.

Five ewe lambs, the property of a bona fide tenant farmer residing in the county: 1, W. B. Greenfield; 2, T. Fowell Buxton; he, George Street; c, E. W. Baird.

Ten wether lambs, the property of a bona fide tenant farmer residing in the county: 1, Benjamin Howkins; 2, Robert Long.

Ten ewe lambs, the property of a bona fide tenant farmer residing in the county: 1, Benjamin Howkins; 2, Mrs. Elizabeth James; r, Robert Long; c, Samuel Seabrook, Ampthill.

PIGS.

Boar, above twelve months: 1, Rouse Orlebar, Hinwick Lodge, Wellingborough; r, W. S. Brocklehurst, Kempston (Fair Trade).

Boar, under two years old, intended for use, the property of a resident in the county: 1, Rouse Orlebar.

Sow and her pigs, the property of a resident in the county: 1, W. S. Brocklehurst (Montford Heroine).

Breeding sow, the property of a resident in the county: 1, W. S. Brocklehurst (Kempston 2nd).

Three sow pigs, under twelve months old, suitable for breeding purposes, the property of a resident in the county: 1, Rouse Orlebar.

New Agricultural Patents.

Specially compiled for the MARK LANE EXPRESS by Mr. G. D. Howard (Hughes, Son, and Co.), Patent Agent, 38, Chancery Lane, London, W.C., of whom all information relating to Patents, Designs, and Trade Marks may be obtained free of charge.

12479.—Thomas Bowman, jun., Bradford, for an invention of "A new or improved device for lifting hay and like horticultural products."

12484.—Franz Ritter von Dahmon, Berlin, Germany, for an invention of "Improvements in apparatus for supporting young trees."

12496.—Guglielmo Ponchelli, London, for an invention of "Machinery or apparatus for automatically sorting eggs, applicable also for the automatic sorting of fruits and other agricultural or trade products."

12507.—Edward Henry Nicholson and William Mather, London, for an invention of "Improvements in horse rakes."

12541.—William Yarrow, Ely, for an invention of "The complete corn cleaning machine."

12640.—Andrew Sloan and William Wilson, Kilmarnock, N.B., for an invention of "Improved appliance for lifting, elevating, and discharging cut crops, fibrous or granular material, or goods in bales or bags."

12652.—John Scoular, Glasgow, for an invention of "An improved cultivator for agricultural purposes."

RAILWAY ANNOUNCEMENT.

AUGUST BANK HOLIDAY ARRANGEMENTS.

THE GREAT NORTHERN RAILWAY COMPANY announce that on each Wednesday until September 19th inclusive cheap excursions will be run for 8 days to Skegness, Sutton-on-Sea, and Mablethorpe, from King's Cross (G.N.) at 8.45 a.m.; also for 8 days to Sheringham, Cromer (Beach), Mundesley-on-Sea, and Yarmouth (Beach), from King's Cross (G.N.) at 3.30 p.m.

Each Saturday until September 29th inclusive (for 3, 8, 10, 15 or 17 days), to Skegness, Sutton-on-Sea, Mablethorpe, Grimsby, New Clee, Cleethorpes, Bridlington, Filey, Scarborough, Whitby, Robin Hood's Bay, Saltburn, Redcar, Tynemouth, Whitley Bay, Cullercoats, Liverpool, Southport and Douglas (Isle of Man).

On Friday, August 3rd (for 4, 10, and 16 days), cheap excursions will leave London for Northallerton, Darlington, Richmond, Durham, Newcastle, Alnwick, Berwick, Edinburgh, Glasgow, Helensburgh, Dumbarton, Stirling, Perth, Dundee, Dalmally, Oban, Fort William, Montrose, Aberdeen, Inverness, and other stations in Scotland. Passengers holding 4 day tickets return on Tuesday, August 7th; 10 day tickets on Monday, August 13th; and 16 day tickets on any day within 16 days, including date of issue and return.

Saturday, August 4th, for 1, 3, or 4 days, and Bank Holiday, Monday, August 6th, for 1 day, to Skegness, Sutton-on-Sea, Mablethorpe.

Bank Holiday, August 6th (for one day), to St. Albans, Hertford, Wheathampstead, Harpenden, Luton, Dunstable, Hitchin, Baldock, Royston, Cambridge, Biggleswade, Sandy, Tempsford, St. Neots, Huntingdon, and Peterboro'.

The cheap week-end tickets usually issued each Friday and Saturday will be issued on Friday, August 3rd, and Saturday, August 4th, available for return on Sunday (if train service admits), Monday, Tuesday, or Wednesday, August 5, 6, 7, or 8.

To prevent inconvenience from crowding at the Company's principal terminal station, King's Cross tickets dated in advance will be issued

AGRICULTURAL EDUCATION.

UNIVERSITY COLLEGE OF NORTH WALES, BANGOR.
A constituent College of the University of Wales
AGRICULTURAL DEPARTMENT. IN-COLLEGE COURSES. 1. A complete course in theoretical and practical Agriculture extending over two years, and suitable for farmers and land agents. 2. Advanced course for a third year in Agricultural Chemistry. 3. Short course of eleven weeks, commencing in October, and consisting of Agriculture, Chemistry, Book-keeping, and Land Surveying. The degree of B.Sc. in Agriculture of the University of Wales may be taken by students who pursue a three years' post matriculation course of study at the College. LLEDWIGAN FARM (360 acres) has been taken by the College for teaching and experimental purposes. Diploma (two years) and Degree (three years) students will in future follow courses for at least one year at the farm under the supervision of the Professor of Agriculture. Special arrangements will be made to take farm pupils for practical instruction only. The College is recognised by the Surveyors' Institution as a place of approved professional instruction for land agents. The cost of board and lodging, with tuition fees, varies from £30 to £40 for the College year. The Scholarship examination will commence on September 18.
Prospectus, with full particulars as to Scholarships and Diplomas, may be obtained from
JOHN EDWARD LLOYD, M.A.,
Secretary and Registrar.
July 17th, 1900.

TUESDAY, AUGUST 7TH, 1900.

UNRESERVED SALE AND FINAL DISPERSAL of one of the MOST NOTED AND SUCCESSFUL PRIZE-WINNING SOUTHDOWN FLOCKS in existence, Registered No. 9 in Southdown Flock Book.

MR. WILLIAM TOOP, having decided to relinquish Sheep Breeding, has favoured MR. C. STRIDE (of the Chichester Auction Co.) with instructions to SELL BY AUCTION, on the Farm, without reserve, on
TUESDAY, AUGUST 7TH NEXT,
THE WHOLE of his FAMOUS REGISTERED trade-marked SOUTHDOWN FLOCK, consisting of about
370 EWES AND EWE LAMBS of the usual flock ages, and
70 RAMS AND RAM LAMBS.
Mr. Toop established this flock in 1883 by purchases of Ewes and Rams from many of the leading Southdown Breeders; reduced in numbers by a public sale in 1895, its history has been a continuous and unbroken record of success.
A very large proportion of the Ewes, particularly the younger ages, trace back to "ROYAL CAMBRIDGE" (No. 1,450, Vol. IV.), by that wonderful old ram "WATERBEACH" (No. 304, Vol. I.), bred at Goodwood, winner of many prizes at the Royal and other shows, without ever having been beaten. A most impressive sire, who imparted to his descendants to an extraordinary degree his own marvellous constitution and fine quality.
During the past 17 years 244 PRIZES have been awarded to this famous flock at the various leading Shows, including Champions, Group Prizes, and Breed Cups, but not including R.N.'s, H.C.'s, or C.'s, or other minor distinctions, medals which many prizes have been awarded to sheep entered therefrom at the chief foreign shows.
EVERY SHEEP OWNED BY MR. TOOP is included in the Sale, and every lot will be sold WITHOUT RESERVE.
Westergate is five miles from Chichester and one mile from Barnham Junction on the L.B. and S.C. Railway.
The flock [illegible]
Luncheon at One o'clock. Sale immediately after.
Catalogues of Mr. TOOP, or of the Auctioneer [illegible] and Estate Agency Offices, 4, East Street, Chichester.

REGISTER OF BRITISH LIVE STOCK BREEDERS.

HORSES.

HACKNEYS.

MOORE, HENRY, Burn Butts, Cranswick, Hull. — Pedigree Stud of HACKNEYS, including many prize-winners; yearlings, two years, and others.—Can be seen on application to Henry Moore.

HACKNEYS. — JOHN N. ANTHONY, Sedgeford, near Lynn, Norfolk, breeder of Pedigree Hackneys. On hand, Colts and Fillies by most of the leading sires.

LLOYD, WALTER, Heaselands, Hayward's Heath, Sussex.—Small but select Stud of PEDIGREE HACKNEYS, Mares, Fillies, and Colts of best blood, including stock by Champion Ganymede, Agility, Winnal Fireaway, Model II., and other noted Stallions, at moderate prices. Appointments to view the stud (which is 1½ miles from Hayward's Heath Station, L.B. and S.C. Railway) on application to the owner, as above.

CLEVELANDS.

HORSFALL, F. WILSON, Potto Grange, Northallerton.—Breeder of pure-bred CLEVELAND BAY and YORKSHIRE COACH HORSES. This stud has won far more prizes than any other again this year, and has won twice as many as any other during the last fifteen years with Clevelands. Many Royal and Great Yorkshire prize-winners for sale. One of the Stud Horses is Champion Broomgrove Pride 1249—first and champion R.A.S.E. Show, Maidstone, 1897; first R.A.S.E. Show, Birmingham, 1898; first and champion Great Yorkshire, Leeds, 1898; only times shown; fee £5 5s. Also breeder of pure-bred Shorthorns. Bulls and heifers for sale. Amongst others added to this herd in 1899 were Daisy Perfection, Richmond Daisy, and Highland Daisy, all bought at the Duke of Northumberland's Sale, at 210 guineas, 72 guineas, and 72 guineas respectively. Also breeder of Sussex black pigs, and several breeds of white poultry.

SHIRES.

MUNTZ, P. ALBERT, M.P., Dunsmore, Rugby—SHIRE-BRED STALLIONS, COLTS, MARES, and FILLIES. About a hundred of all ages. Prize-winners London and other leading shows. Also high-class Shropshire SHEEP, winners first prize at Royal Agricultural, 1886, second in 1887, and first in 1888.—Apply, THOMAS EWART, Dunsmore Farm, Rugby.

CONCHAR, JOHN, Wylde Green, Birmingham.—Breeder of SHIRES and HACKNEYS. Some good Colts and Fillies for Sale. Five minutes from Station.

TAUNTON, H. PERCY, Redlynch, near Salisbury, Wiltshire. Shire-bred STALLIONS MARES, FILLIES, and GELDINGS of the most fashionable breeding always for sale at moderate prices. The animals are kept entirely out of doors and in natural condition.

PONIES.

THE LARGEST STUD of SELECTED WELSH PONIES IN WALES.—Dinarth Hall Pony Stud Farm, Colwyn Bay, North Wales. Over 120 Ponies now on hand, including forty Brood Mares of the pure Welsh type, and several high-class Ponies, great goers, with style and action. 150 prizes won in 1898 and 1899. Ponies purchased from this Stud have won first prizes at Manchester, Birmingham, and Maidstone Royal Shows; also first and medal Crystal Palace, 1899. Sale in 1899 included two Entire Ponies purchased by the Government for Cyprus, several to America and France. Stud Horse JULIUS CÆSAR II. 5666, sire of first prize two-year-old pony filly, the first of his produce exhibited, London Hackney Show, 1900.

MILLER, W. S., Forest Lodge, Brecon, S. Wales, extensive Breeder and Exporter of the best class of WELSH MOUNTAIN PONIES and COBS. References and particulars on application.

MONTEFIORE, REV. D. B., Mursley, Winslow, Bucks.—POLO PONY STALLION "MOOTRUB" (Polo Pony Society 32); winner of many prizes; three times reserve champion; service fee, £3 3s., and 5s. the groom.—Particulars on application.

CATTLE.

SHEEP.

LINCOLN LONGWOOL.

DUDDING, HENRY, Riby Grove, Gt. Grimsby, Lincolnshire, has always for inspection and sale a large flock of pure LINCOLN LONGWOOL SHEEP, including many prize-winners, having taken the leading prizes for many years at the Royal and other shows for both rams and ewes, including champion medals at both the Paris Exhibitions, Vienna, Amsterdam, Canada, Australia, New Zealand, and all the leading prizes at Chicago; also the first for the best collection of Lincoln fleeces of wool at the Royal Windsor Show, which proves the character of this flock, which is most famous for their great size and 125 years' good breeding. Rams from this flock made the highest average on record last year. Riby Grove is seven miles from Great Grimsby, and three from Stallingboro' Station. Telegrams, "Dudding, Keelby."

FIELDSEND, C. S., Belmont, S. Willingham, Lincoln. Flock No. 59. Pedigree RAMS and EWES for SALE.

LINCOLN LONGWOOL.

ANDERSON, JOHN, Chapel Farm, Barton-on-Humber, Lincolnshire. Breeder of pure-bred LINCOLN LONGWOOL SHEEP. Flock Book 106. These sheep are noted for having hardy constitutions, true character, and long, lustrous wool. — Telegrams: "John Anderson, Barton-on-Humber."

HOYLES, GEORGE, Manor House, Skidby, near Hull.—Pure LINCOLN LONGWOOL SHEEP. Registered Flock 136. Sires used: Skidby Constitution 3069, sire Skidby Conservative 1346, g. sire Old Constitution 308; Skidby Tory 1583, sire Riby A 358; Leconfield Pride, sire Casswell (16) 1753; Skidby Friar, sire Abbot 1—from the celebrated flocks of Messrs. Henry Dudding, J. Casswell, Hy. Smith, jun., etc. Heavy-wool Sheep for export. Also prize and prize-bred Polled Angus, Shire Horses, and English Ponies for inspection and sale.

T. C. DIXON, Brandesburton, Hull.—Pure LINCOLN LONGWOOL SHEEP, of best blood. Wool a speciality, with quality and size combined. F.B. 69. Rams, Ewes, and Lambs for Sale. Inspection invited. Telegrams as above.

HAMPSHIRE DOWN.

FLOWER, JAMES, Chilmark, Salisbury. Undoubtedly the leading flock of the day; in show yard records at all the largest shows, including the Challenge Cup at the Salisbury Great Prize Sheep Fair six years in succession; also highest average for same period for 100 ram lambs at annual sale, at Britford Fair, August 12.

The Flock is one of the oldest existing combining fine quality, strength, constitution, and true character.

"Fossil," sire of the highest-priced Hampshire Down Ram ever sold, was bred at Chilmark, and in service there last two seasons.

COLES, CARY, late C. and T., Manor House, Winterbourne Stoke, Salisbury.— Registered HAMPSHIRE DOWNS, prizewinners at the Royal, Bath and West, Royal Counties, and other shows. July 16th, at the Salisbury Great Prize Sheep Fair, this Flock won the challenge cup for pens of ram lambs, beating the Royal, Bath and West, and Royal Counties' prize winners of this year.

Annual Ram Sale on the premises, Friday, August 3rd.

SHROPSHIRE.

COOPER, WILLIAM, AND NEPHEWS, "Cooper's Dip" Works, Berkhamsted, England. Breeders and Exporters of pure Shropshire Sheep. First and Third Prize for Ewes, Royal Show, 1898. Five hundred breeding Ewes. The largest export flock of Shropshires in England. The sires used present season include 310 Guinea Champion "Royal Record," Two First, One Second, and One Third Royal Show Prize winners.

LIVE STOCK AGENTS.

INVERNESS, WEST HIGHLANDS.—JAMES ARNOTT, Scotch Live Stock Agent, Ellandonan, Inverness, established 1870, selects and supplies on commission all classes of SCOTCH STOCK. He attends all the leading markets to purchase Stock at lowest rates. References can be given if desired to customers who have been annually supplied. All orders are personally attended to. List of classes and approximate prices sent on application. Reference required; terms cash. Telegrams: "Arnott, Inverness." J. A. is now booking orders. N.B.—Polled Angus or West Highland Heifers for crossing or feeding, in truck loads, at moderate prices. Fat Stock of all classes also purchased.

LARGEST Live Stock Agency.—Practical farmers in 57 counties (whose testimonials will be sent on application) testify their complete satisfaction with the live stock with which they have been supplied by E. GOODWIN PREECE, who attends leading fairs and sales to buy on commission CATTLE and SHEEP, for feeding, dairy, or wintering. Personal buying.—Address, Portland House, Shrewsbury.

SUSSEX.
STOPHAM, near PULBOROUGH.

TO LET from Michaelmas, 1900, the MANOR FARM, with fine old-fashioned Farmhouse, substantial and well-arranged Farm Buildings, and about 163 acres Arable and 153 acres Meadow and Brookland. Rent £300.—Apply, W. B. HOY, Stopham Estate Office, Pulborough.

TO BE LET, from Michaelmas, 1900, a valuable SHEEP and DAIRY FARM, known as Sutton Hall in the County of Suffolk, containing thirteen hundred and twenty-seven acres two roods and eighteen perches, of which five hundred and sixty-three acres two roods and two perches are permanent pasture marshes, and heath land, and seven hundred and sixty-four acres and sixteen perches arable.

There is a first-class residence with bailiff's house, several sets of farm buildings, all in good and substantial repair.

The whole of the land is in a high state of cultivation, having been farmed by the late owner for many years; the pasture land, together with the marshes, is very rich grazing ground, and the heath land is a healthy sheep run.

The farm is within four miles of Melton Station on the Great Eastern Railway, and has its own quay on the river.

For further particulars, apply to PETER HAY, Bawdsey Estate Office, Woodbridge, Suffolk.

CORN MERCHANTS. — Old-established lucrative BUSINESS. — Ample premises, at moderate rentals, and occupying good positions in thriving watering-place, south. Large proof returns excellent profits. Total ingoing about £1,100, or partnership can be arranged with a practical man having £500 or £600 cash to invest.—Messrs. WICKENDEN, Tunbridge Wells

AUCTION SALES.

ON THURSDAY NEXT, AUGUST 9 (2 o'clock).

REGISTERED SHROPSHIRE SHEEP.

MR. T. S. MINTON'S ANNUAL SALE.

ALFRED MANSELL AND CO. will SELL BY AUCTION, at MONTFORD, four miles from Shrewsbury,

40 GRAND SHROPSHIRE RAMS.

The continued success of Mr. Minton's sheep in all the principal breeding and Fat Stock Shows points to the fact that sires may be secured at Montford. Amongst the Rams will be found several of the highest breeding, with strong masculine heads, calculated to suit the requirements of the most fastidious ram breeders, whilst the great size, length, bone, muscle, and depth of lean flesh combined with close, dense wool and great activity, should attract the attention of the tenant farmer.

Conveyances will meet the morning trains at Shrewsbury Station.

Catalogues from ALFRED MANSELL AND CO., College Hill, Shrewsbury, who will execute Commissions.

SHROPSHIRE SHEEP.

THORPE HALL, five miles from TAMWORTH.

Where conveyances will meet trains.

LYTHALL AND WALTERS will SELL BY AUCTION, without reserve, on WEDNESDAY NEXT, August 8, by direction of W. F. Inge, Esq.:—

31 GRAND SHEARLING RAMS
and
50 BEAUTIFUL SHEARLING EWES,

Including the 3rd prize pen of 5 Shearling Rams at the R.A.S.E. at York, and other winners at the S. and W.M., B. and W. of E., Leicestershire, Royal Counties, Peterborough, and Staffordshire Shows.

Several of the Rams are suitable for the most careful ram breeders, and all possess immense scale, close, heavy fleeces, well-covered heads, and clear cherry skins, and the Ewes have been most fashionably and carefully bred, being sisters of this year's 1st prize Shearling Ewes at the Royal Show.

Luncheon at 1. Sale at 2 o'clock.

Catalogues from the Auctioneers, Bingley Hall, Birmingham, who will execute Commissions to Purchase.

Kent.—Within two miles of the excellent Market Town of Ashford, 1¼ hours from London, and easy distance of the Kent Coast.

MR. ALFRED J. BURROWS will SELL by AUCTION, at ASHFORD, on TUESDAY, AUGUST 14th,

NINE FREEHOLD SMALL FARMS,

And other holdings varying from 11 to 63 acres, principally grass, with possession at Michaelmas next, and well adapted for Poultry or Dairy Farming, or ordinary husbandry.

Particulars, with plans, of the Auctioneer, Ashford, Kent.

OXFORD DOWNS, 1900.

THE KELMSCOTT FLOCK, the property of ROBERT W. HOBBS, Kelmscott, Lechlade.

RAM LAMBS
or
SHEARLING RAMS

from this old-established flock will be SOLD by AUCTION at the undermentioned Fairs :—

OXFORD, AUGUST 8th.
IPSWICH, AUGUST 22nd.
CIRENCESTER, SEPTEMBER 3rd.

BANKS, INSURANCES—*continued.*

LONDON and COUNTY BANKING COMPANY (LIMITED).

Registered under "The Companies Acts." Established in 1836.

CAPITAL, £8,000,000, IN 100,000 SHARES OF £80 EACH.

REPORT ADOPTED AT THE HALF-YEARLY ORDINARY GENERAL MEETING, THE 2ND AUGUST, 1900.

W. McKEWAN, Esq., in the Chair.

The Directors, in submitting to the Shareholders the Balance-sheet for the half-year ending 30th June last, have to report that, after paying interest to customers and all charges, making provision for bad and doubtful debts, and allowing £35,338 14s. 9d. for rebate on bills not due, the net profits amount to £370,583 9s. 4d. From this sum £125,000 has been carried to Reserve Fund, leaving £245,583 9s. 4d., which, with £69,176 9s. 10d. balance brought forward from last account, leaves available the sum of £314,759 19s. 2d.

The Directors have declared a Dividend for the half-year of 10 per cent., together with a Bonus of One per cent., which will require £220,000, leaving the sum of £94,759 19s. 2d. to be carried to the Profit and Loss New Account.

The Dividend and Bonus, amounting together to £2 4s. per Share, free of Income Tax, will be payable at the Head Office, or at any of the Branches, on or after Monday, 13th August.

WM. HALL, Chief Accountant.

London and County Banking Company, Limited.
13th July, 1900.

We have examined the foregoing Balance-sheet and Profit and Loss Account, have verified the Cash Balance at the Bank of England, the Stocks there registered, and the other investments of the Bank. We have also examined the several Books and Vouchers showing the Cash Balances, Bills, and other Amounts set forth, the whole of which are correctly stated; and we are of opinion this Balance-sheet and Profit and Loss Account are full and fair, properly drawn up, and exhibit a true and correct view of the Company's affairs, as shown by the books of the Company.

(Signed) E. H. CUNARD, HY. GRANT, THOS. HORWOOD, } Auditors.
London and County Banking Company, Limited.
19th July, 1900.

LONDON AND COUNTY BANKING COMPANY, LIMITED.

NOTICE IS HEREBY GIVEN, that a DIVIDEND on the Capital of the Company at the rate of 10 per cent. for the Half-Year ending 30th June, 1900, together with a Bonus of 1 per cent., will be PAYABLE to the Shareholders either at the Head Office, 21, Lombard Street, or at any of the Company's Branches, on or after Monday, the 13th instant.

By order of the Board.
21, LOMBARD STREET, 3rd August, 1900. J. H. ATKINSON, Secretary.

AUGUST BANK HOLIDAY ARRANGEMENTS.

THE GREAT NORTHERN RAILWAY COMPANY announce that on each Wednesday until September 19th inclusive cheap excursions will be run for 8 days to Skegness, Sutton-on-Sea, and Mablethorpe, from King's Cross (G.N.) at 8.45 a.m.; also for 8 days to Sheringham, Cromer (Beach), Mundesley-on-Sea, and Yarmouth (Beach), from King's Cross (G.N.), at 3.30 p.m.

Each Saturday until September 29th inclusive (for 3, 8, 10, 15 or 17 days), to Skegness, Sutton-on-Sea, Mablethorpe, Grimsby, New Clee, Cleethorpes, Bridlington, Filey, Scarborough, Whitby, Robin Hood's Bay, Saltburn, Redcar, Tynemouth, Whitley Bay, Cullercoats, Liverpool, Southport and Douglas (Isle of Man).

On Friday, August 3rd (for 4, 10, and 16 days), cheap excursions will leave London for Northallerton, Darlington, Richmond, Durham, Newcastle, Alnwick, Berwick, Edinburgh, Glasgow, Helensburgh, Dumbarton, Stirling, Perth, Dundee, Dalmally, Oban, Fort William, Montrose, Aberdeen, Inverness, and other stations in Scotland. Passengers holding 4 day tickets return on Tuesday, August 7th; 10 day tickets on Monday, August 13th; and 16 day tickets on any day within 16 days, including date of issue and return.

On Saturday, August 4th, cheap fast excursions for 3, 6, or 8 days will leave London for Accrington, Bacup, Blackburn, Bolton, Burnley, Burton, Bradford, Bridlington, Boston, Cambridge, Chesterfield, Cleckheaton, Cromer, Darlington, Darwen, Derby, Doncaster, Durham, Edwinstowe, Egginton, Elland, Filey, Grantham, Grimsby, Halifax, Harrogate, Hartlepool, Huddersfield, Hull, Horncastle, Ilkeston, Kimberley, Keighley, Leicester, Lincoln, Liverpool, Lynn, Leeds, Manchester, Mirfield, Melton Mowbray, Middlesboro', Mundesley-on-Sea, Newark, Norwich, Nottingham, Newcastle-on-Tyne, Oldham, Pontefract, Preston, Pudsey, Peterboro', Retford, Richmond, Ripon, Rochdale, Rotherham, Scarboro', Sheffield, Stamford, Stoke, Stockton, Stockport Sunderland, Spalding, Sleaford, Sutton-in-Ashfield, Thirsk, Todmorden, Thornhill, Thornton, Tynemouth, Wakefield, Whitby, Warrington, Wigan, Worksop, Yarmouth, York.

Saturday, August 4th, for 1, 3, or 4 days, and Bank Holiday, Monday, August 6th, for 1 day to Skegness, Sutton-on-Sea, Mablethorpe.

Bank Holiday, August 6th (for one day), to St. Albans, Hertford, Wheathampstead, Harpenden, Luton, Dunstable, Hitchin, Baldock, Royston, Cambridge, Biggleswade, Sandy, Tempsford, St. Neots, Huntingdon, and Peterboro'.

The cheap week-end tickets usually issued each Friday and Saturday will be issued on Friday, August 3rd, and Saturday, August 4th, available for return on Sunday (if train service admits), Monday, Tuesday, or Wednesday, August 5, 6, 7, or 8.

To prevent inconvenience from crowding at the Company's principal terminal station, King's Cross tickets, dated in advance, will be issued

BIBBY'S "CREAM EQUIVALENT" for CALVES.

An Ounce of Fact is worth a Ton of Theory.

A STRIKING FACT.

In our Spring number of "Bibby's Quarterly" we reproduced the photographs of two groups of Calves which are now being reared at the Horuby House Farm, Bedale, Yorks, by his Grace the Duke of Leeds.

One of the groups is being fed on New Milk and the other on Separated Milk and "Cream Equivalent."

We asked our readers to tell us which of these groups were fed on New Milk, and 707 Farmers, Farmers' wives, their sons and daughters competed for a small prize which we offered to those who guessed correctly.

445 selected the wrong, and 262 the right group.

We think the above striking FACT speaks volumes for "Cream Equivalent."

The "Cream Equivalent" can be had at 15s. per cwt., carriage paid to nearest station.

MILLERS AND ENGLISH WHEAT.

The part that millers played in the historic Free Trade battles of the first few years of Her Majesty's reign is not one upon which they can look back as a body with much satisfaction. That cheap food meant cheap labour was the maxim of that day, and the milling interest did much to turn the scale against the unfortunate farmer, whose demand for protection never outran the contention that grain should not be driven down by foreign competition below a profit price on home culture. But millers have long since come to realise that their policy in the "forties" was short-sighted; neither is unlimited Free Trade the fetish that is was of yore.

The National Association of Millers are fully alive to the menace to millers implied in local scarcity of British wheat, and of late years they have given much attention to the subject. Their recent annual meeting was remarkable for a resolution to vote a prize for the best type of English-grown wheat from the roller millers' point of view, and for a further resolution to ask the Royal Agricultural Society to co-operate with them in doing their best to keep up the production of British wheat. The millers, it may be remarked in passing, can have had little practical knowledge of the R.A.S.E. as now constituted, or they would not have expected that egregious body to co-operate in anything. Anyhow, they met with a refusal, and relations between the two organisations are now somewhat strained.

We hope the millers will not be discouraged. Perhaps they might try the Farmers' Club or Central Chamber, or, better still, the Ministry of Agriculture itself, for it does not yet seem to be fully appreciated how far ahead in many respects the Government office is of the older voluntary societies of an agricultural nature.

It is essential that the prizes offered should be substantial, that the experiments should be thorough, and that the farmers should feel sure that the millers would buy the wheat grown. At present, "No. 1 Northern," a type of red spring wheat, grown mostly in Manitoba, Minnesota, and Dacota, is the standard type of wheat at Mark Lane and at the "Baltic." This replacing of English wheat on English soil is in itself regrettable, but the markets act out of no want of patriotism. It is useful in the extreme to have as a standard the sort of wheat for which there is the steadiest demand, otherwise speculation in some particular kind may frequently usurp the place of legitimate trading on the basis of intrinsic milling value.

Thus the standard has passed from English to American wheat, and "the last Term Market price" is turned to by many millers and other operators who have never bought a ton of wheat for speculation "forward" in their lives. The Millers' Association are now asking farmers to consider whether the standard may not be regained for English wheat, and considering that the American type averages 3s. per qr. higher price than the English type, the matter is of no small importance.

We would suggest that a useful preliminary step would be for the Millers' Association to send a circular to each member asking: (1) Do you consider the American standard wheat worth 3s. per qr. more to you than average English? (2) If not so much, how much is it really superior? (3) If English wheat of the American type was in fair local supply, would you buy it in preference to foreign produce? (4) What mixture of English average and American No. 1 Northern wheat would you suggest as good working flour for the baker? and (5) Do you suggest any third element as desirable?

The farmers' societies and committees for local shows meanwhile might offer prizes to their own members for (1) samples of wheat grown in the county, and approximating most nearly to the analysis of No. 1 Northern wheat; (2) samples of home-grown wheat giving most satisfaction to a jury of millers; and (3) samples of home-grown wheat making the best loaf in combination with a fixed proportion of foreign.

The climate of North America favours spring wheat, and that of Great Britain does not, but the date of the sowing is not, as lawyers would say, "of the essence of the contract." The miller does not care when the farmer sowed or when he reaped, and it has yet to be shown that the exact chemical balance of elements giving satisfaction in the fine American wheat cannot be fully obtained in English-grown grain. It would not be any great thing for the Ministry of Agriculture to vote £1,000 a year for ten years in order that a steady effort should be made under proper direction to grow the most appreciated foreign types of wheat on English soil. A July mean temperature of 70 degrees is said by the best judges to have much —perhaps most—to do with the fine milling value of American spring wheat, and the mean July temperature in Great Britain is only 63 degrees. But already the English wheat is by no means seven points in 63 inferior to the American, and it does not appear beyond the resources of agricultural science to produce a type of wheat which would give under a temperature of 63 degrees a milling quality equal to that grown at present in America with the aid of 70 degrees. It has to be remembered that the American farmer is only able to produce 15 bushels to the acre of this highly appreciated wheat, whereas English farmers grow 30 bushels of the less highly appreciated. If some transference of energy from quantity into quality could be effected by means of the sort grown or the method of its manuring, the balance of advantage would almost certainly be left on the side of the English farmer. Already his wheat attains 90 per cent. of the value of the best American, and he grows twice as much of it to the acre. But he must not rest content under this apparent balance of advantage, for what the more marketable quality of the American wheat gives the American is a constant and steady sale at a profitable price, and this is precisely *the whole aim of wheat growing*. It is the "fluctuating market" and the "difficult sale" which discourage our farmers, and to remedy these two evils in the English wheat trade is a task worthy the best efforts both of millers and of agriculturists.

SAMPLES.

By a Man of Mark Lane.

Considerable dissatisfaction is expressed amongst agriculturists in Lincolnshire, says the *Yorkshire Post*, at the action of the railway companies in withdrawing privileges which have been extended for years, and in imposing harassing restrictions with regard to the conveyance of agricultural produce. Farmers and merchants in the Spalding district have had notice that from August 1st the railway companies do not intend to allow the rebate upon clover, hay, and straw. This rebate, which amounted to 2s. per ton, had its origin as a commission for traffic, and had been allowed for twenty years by all the railway companies that run into Spalding, with the exception of the Great Eastern. In districts where there is no railway competition it has not been given.

What local merchants complain of especially is, says our contemporary, the withdrawal of the rebate at such short notice. Another point which is causing considerable commotion is an intimation that the rules as to sack hire are to be strictly carried out, and the privileges which have been tacitly conceded for many years have been suddenly terminated. The effect of the companies' action, it is believed, will result in merchants providing their own sacks. The companies are now also strictly enforcing the regulations with respect to truck hire and demurrage. Already strong protests are being made.

The Secretary for War has approved of embodied militiamen being granted furloughs with the special object of enabling them to take part in harvesting operations, the furloughs (of not more than one month, and between the 1st inst. and the end of September) being only granted to men who have completed the musketry course and company and battalion training, and not more than 50 per cent. of a unit's strength being allowed to be absent at one time. The men will be subject to recall, should their services be required, at seven days' notice, and will be allowed to wear plain clothes whilst on furlough, and the regulated pay and allowances as sanctioned for regulars on furlough will be granted when the men rejoin.

The receipts on account of Revenue from April 1st, 1900, when there was a balance of £3,517,047, to July 28th, 1900, were £33,129,453 against £34,267,259 in the corresponding period of the preceding financial year, which began with a balance of £8,919,173. The net expenditure was £56,666,104, against £37,573,972 to the same date in the previous year. The Treasury balances on July 28th, 1900, amounted to £3,627,195, and at the same date in 1899 to £3,523,180.

AGRICULTURAL POLITICS.

By a Lobbyist.

One thing has now been placed beyond all doubt, and that is that the Agricultural Holdings Bill is safe. The reading of the Bill a third time in the Lords and the certainty of no conflict with the Commons mean that the Royal Assent will be given after but a mere formal delay. Upon this fact I heartily congratulate the Government and Mr. Walter Long, and I as sincerely congratulate the agricultural members of the House of Commons. Had they been too insistent in giving the Bill a perfect character—let us frankly admit that it is susceptible of improvement—they would have endangered, if not wrecked it. As it is, the limit of time was nearly exhausted. Reform by instalment—this should be the future legislative method in connection with all agrarian and tenure problems. This Bill is an excellent instalment, and it is in that light that many of its warmest friends regard it.

I heard an ill-omened rumour in the House of Commons this week. Mr. Walter Long is, it is suggested, much less anxious than are his political friends that a future seat should be found for him. In other words, it is whispered that his continued bad health—over which every member of the House of Commons sympathises with him—has almost induced a desire for a spell at least of private life. Moreover, it is said that Lady Doreen Long sympathises with him in this desire. Now, I pray this be not true. I dare assert that Mr. Long's indisposition is not the result of his public responsibilities. He has given absolute devotion to his Ministerial task, but he has done so with an undisturbed mind and unagitated conscience. The gravity of his position has not affected his mental serenity. He has worn the harness of office—I will not say lightly, but at least without himself necessarily increasing the burden. Mr. Long would be, I am persuaded—and I say this as an admirer of his—no better in the permanent

physical sense for his withdrawal from public life. His natural humour is attuned to the responsibility of affairs. At all events, his withdrawal would be a distinct loss to agriculture.

Now, there is a means of retaining him in public life whilst relieving him of the harassing worry of contested elections. Mr. Long's predecessor was elevated to the House of Lords. Why should not Mr. Long be made a peer? I can, of course, understand a Walter Long desiring to retain a name which has been for so many generations so honourably known in connection with the county history of Wiltshire. The society of that county would outwardly hardly be the same if it possessed not a "Walter Long of Rood Ashton." Still, "Lord Rood-Ashton" would be a sufficient compromise, and not make identity absolutely impossible. Besides, the peer's eldest son would become "the Hon. Walter Long," and would thus perpetuate a graceful family tradition. At all events, this idea has been prevalent in the House of Commons. That it should be so is another tribute to Mr. Long's popularity. Our legislators, friend and foe alike, are anxious to themselves retain him in politics. "If," once said a man whose name is now a famous one in the Parliamentary annals, "I win not a great position in politics, I pray that I may secure a position of esteem." Mr. Long has secured a position of esteem.

Now, the last days of the present session have been disturbed by a petty exhibition of ribaldry, of which our friend Mr. Chaplin has been the victim. Mr. Chaplin is a reminiscence of the stately style of oratory. He brings to debate a sonorous voice, a dignified manner and flowing periods, and he indulges in perorations. He is a little out of harmony with the taste of a House which has been fed on the crisp methods of what I may describe as the Chamberlainic style. Still, why, what is in Sir William Harcourt but a choleric word should become in Mr. Chaplin sheer blasphemy, I cannot for the life of me understand. The Radicals will go into rhapsodies over Sir William's ebullitions, and those ebullitions after all follow on the lines Mr. Chaplin affects; but towards the end of this week they treated Mr. Chaplin with a scantiness of respect that was as discourteous as it was discreditable. Heaven forfend that I should prevent any Radical indulging in hobbledehoyism; but he should pursue it at fitting opportunities. This was not a fitting opportunity. Mr. Chaplin is one of the veterans of politics; and the length of his public services, not to speak of their value, entitle him to respect. Mr. Gladstone would have curbed the spirits of the loud-voiced brigade of the Radical benches.

I find that the Parliamentary movement whose purpose is to give a compulsory character to the agricultural returns has received a more disciplined character. It is now widely perceived that the fact that a farmer can please himself whether he makes the returns or not goes a long way towards depriving those returns of any authoritative character. This year, too, there has been a growing indisposition shown to making them; and hence it is at last perceived that no, or little, reliance whatever can be placed upon the tabulated statement as providing an actual evidence of the present condition of agriculture. May I advise the leaders of the movement to go a step further? The collection of these returns is imposed upon Inland Revenue officers, and they perform the work without any payment whatever. This is another matter which tends to impair the value of the returns. My suggestion is thus—pay the Inland Revenue officers.

Now, Lord Heneage was absolutely wise in bringing the reduction in the amount of the special grant to the rural schools to the attention of the House of Lords. I am not going to weary my readers with a recapitulation of the debate, but I am going to place emphasis upon one point in it. It will be recalled that the "special aid" grant was allocated on the basis of 3s. 3d. per rural child and 5s. 9d. per town child. Now, during the three years which have elapsed since the passing of the Act, the Church of England village schools have lost some £80,000—compared with the amounts they would have received under the 5s. per head arrangement contemplated in the Act. Of this £46,000 has gone in the three years to the Church of England schools in London, Liverpool, and Manchester; about £24,000 to the Roman Catholic schools; and about £12,000 to the Wesleyan and British schools. But why should the villages lose this sum? Surely this is a point worthy of inclusion in any future rural election programme.

However, I still hold to my old opinion. There will be no election this year.

PRACTICE WITH SCIENCE.

The Yorkshire College Chair of Agriculture.

The vacancy caused by the resignation of Professor J. R. Campbell of the Chair of Agriculture at the Yorkshire College, consequent on his appointment to an important position under the Irish Board of Agriculture has been filled by the election to the College Professorship of Mr. Robert S. Seton, B.Sc., the present head of the Agricultural Department of the Harris Institute, Preston. Before coming to Leeds, Professor Campbell held the same office under the Lancashire County Council as his successor is now vacating. Another interesting coincidence is the fact that they are both Scotchmen.

Corbett Agricultural College.

A memorandum has been issued explaining the delay which has arisen in giving effect to the proposal of Mr. John Corbett, of Impney, to found an agricultural college for Worcestershire, for which he has expressed his intention of giving £10,000. The college will be on very different lines to any existing college, by far the larger portion of the money being used to provide an endowment fund which will enable sons of farmers to obtain practical instruction on model farms at the cost of a few shillings per week for board and lodging. He proposes also to give 150 acres or 200 acres of land in the centre and most valuable part of his estate, which, in the event of the college not succeeding, would revert to the estate, in which case the endowment fund would be devoted to charitable objects. Considerable legal difficulties arose in the initial stages of the scheme, and Mr. Corbett came to the conclusion that the object he had in view would be best safeguarded under the provisions of a short Act of Parliament. Notices were given of an application for leave to bring in such a Bill, and a draft Bill was prepared, but it had not been further proceeded with owing to the exigencies of pressure of Parliamentary work due to the South African war, and to the deliberations of the Agricultural Education Committee, which was at the time obtaining valuable information on the suggested reorganisation of agricultural education under the control of the Board of Education. Mr. Corbett is hopeful that all the difficulties which have presented themselves will be shortly set aside, and that the work of organisation and provision of an agricultural school will soon be an accomplished fact.

Spraying Charlock.

Herewith I forward you a report on our charlock spraying experiments of the present season, which owing to the prevalence of thunder showers have not proved so successful as those of last year. Both copper and iron sulphates were used at different strengths and quantities per acre.

Plots 1 and 2 were sprayed on the 6th of June with a 2 per cent. solution of copper sulphate, sixty-five gallons per acre on plot 1 and fifty gallons per acre on plot 2. It, unfortunately, rained heavily during the night after the plots had been sprayed. The results of all the plots were compared early in July. About 80 per cent. of the charlock was destroyed on plot 1, and about 40 per cent. on plot 2.

It was a windy day when these plots were sprayed. Plot 1 was sheltered by the fence, whilst plot 2 was quite on the open, and a considerable amount of the spray was shaken from the tops of the plants; this was one reason for the difference in the results of the two plots.

Plots 3 and 4, sprayed on 8th June; plot 3, 8 per cent. solution of iron sulphate, sixty gallons per acre; plot 4, 14 per cent. solution of iron sulphate, forty-five gallons per acre. It rained heavily the night following the spraying. About 35 per cent. of the charlock was destroyed on plot 3, and about 50 per cent. killed on plot 4.

Plot 5 was sprayed on June 11th with a 3 per cent. solution of copper sulphate, sixty gallons per acre. It rained during the afternoon, and spraying was discontinued. Very little rain fell during the night following. For some days the oats appeared to be badly affected by the spray, but soon recovered, and in the beginning of July were quite as robust as the unsprayed part, whilst 99 per cent. of the charlock was destroyed.

On account of the very showery weather spraying was discontinued until the 20th of June, by which time the charlock was in small pod, and the oats almost ready for bursting the sheath. It was decided to spray a small plot in order to test the effect of the spray on both the charlock and oats at these advanced stages.

Plot 6, 3 per cent. solution of copper sulphate, sixty gallons per acre. On examining the plot in July the charlock appeared to be completely killed, but on opening the fullest of the pods a few very small seeds appeared to be living, but it is doubtful if any of them would be mature enough to produce plants. As would be expected the oats which were most advanced in this plot were rather badly affected by the spraying.

Conclusions. Charlock spraying is more likely to be successful on a still than a windy day. In order to get the best results the spray should stand on the plants for about three or four days without rain. A 2¼ per cent. solution of copper sulphate at the rate of fifty gallons per acre, if properly applied, will completely destroy the charlock in fine weather. If the weather is showery good results may be obtained by the use of a 3 per cent. solution of copper sulphate at the rate of sixty gallons per acre.

HENRY F. HILL.

The Agricultural College, Aspatria,
25th July, 1900.

THE DAIRY.

Lancaster Cheese Fair.

The August cheese fair at Lancaster was held in the covered market on Wednesday, and attracted a pitch of 44 dairies and 707 cheese, as against 45 dairies and 717 cheese at the coresponding fair last year. There was a large attendance of both buyers and farmers. The quality was remarkably good all round, though farmers were fortunate in a beautifully cool morning, which had the effect of keeping the cheese hard and improving its selling value. Prices ranged between 60s. for the best varieties and 49s. for the poorer qualities, of which there were but few. A speedy clearance was effected.

Nantwich Cheese Fair.

The pitch at this fair, held on Thursday, was about fifty tons. All the large centres were represented, and the best lots found a ready market. Compared with a month ago prices were up to 2s. per cwt. Best lots fetched from 50s. to 57s., and medium, for which there was a good market, made prices down to 44s.

Preston Cheese Fair.

Preston July Cheese Fair took place on Tuesday, when the pitch consisted of 104 lots, comprising 1,566 cheeses, an increase of 26 lots and 491 cheeses compared with the corresponding fair last year. There was a good attendance, with a brisk demand at an advance of 2s. 6d. to 5s. upon prices realised last fair, and a clearance was effected within an hour from the opening of the fair. Quotations:—Best, 55s. to 60s.; medium, 50s. to 52s. 6d.; common, 45s. to 47s. 6d.

Butter at the Sussex Show.

There was a very fine collection of butter at the Sussex County Agricultural Society's Show at Preston Park, Brighton, the week before last, and the butter competitions proved one of the greatest attractions of the exhibition. No fewer than 89 competitors entered for the butter prizes, and 32 in the butter competitions, whilst the quality was so good that the judge, Mr. Richard Fowler, Broughton Farm, near Aylesbury, had the greatest difficulty in deciding to whom to award the prizes. In three cases he had to divide the prizes, the competitors gaining 100 points each.

Analysis of Sour Milk.

The paper on "The Analysis of Sour Milk," written by Mr. F. J. Lloyd, F.C.S., consulting chemist to the British Dairy Farmers' Association, and which appeared in the last issue of that Society's journal, has now been published in pamphlet form. The paper is such a useful and at teh same time interesting one that we reprint the greater part of it. Mr. Lloyd opens by stating that from the rumours which are afloat, it seems evident that the Committee appointed by the Board of Agriculture to fix a standard for milk, intend to adopt a higher standard than has hitherto guided the Public Analyst. This, Mr. Lloyd continues, will materially affect dairy farmers. It will necessitate the producer taking every possible precaution, and adopting all known means to secure uniformity in his produce. In other words, he will have to eliminate, or modify, all those elements which tend to the production of poor milk, or milk of uncertain quality. As a result of such legislation the purchasers in towns will demand a guarantee from the farmer that the milk he supplies is above the standard. It is also highly probable that there will be an increase in the number of samples of milk taken by inspectors under the Food and Drugs Act, and that this increase is not likely to be temporary, but permanent. Should milk fall below the standard the Food and Drugs Act particularly stipulates that the farmer may in defence prove that the milk was sold as it came from the cows. This is not by any means easy. It may be a fortnight or even a month after

the original sample was taken before the farmer hears that he is to be prosecuted for selling milk said to be adulterated. To appeal to the cows then would perhaps prove nothing, for in the meantime three may have been very considerable changes in the weather, in the herbage, or even in the stall feeding. Some have suggested that the farmer, to protect himself, will have to take samples daily, so that in case of prosecution he may be able to produce a sample of the milk before it left the farm on the day on which the samples were taken by the inspector. Such sample would, of course, be sour, and would have undergone considerable changes. It may be said that these samples should be analysed when fresh, but if they were sent to an analyst the cost would be prohibitive, and any analysis made by the farmer himself could scarcely be accepted as evidence.

The purchasers in towns are in a very similar position. My past experience warrants me in stating that the majority will keep the duplicate samples left them by the inspector until they hear the result of the Public Analyst's report. If this be favourable they will send the reserve sample, when sour, to an analyst, and if the result of his analysis does not agree with that of the Public Analyst the probability is they will ask for the third reserve sample to be submitted to Somerset House. Even in the past I have received every year a fair number of such sour samples, while in the future they are likely to increase, for this reason: the very low standard hitherto adopted has caused prosecutions to be instituted only against palpably adulterated samples. As the changes which take place in a sample of milk would cause it to appear even worse than it was when fresh, it has been only rarely that I, and probably other analysts also, have come to a conclusion adverse to the Report of the Public Analyst; and this is probably the reason why comparatively few samples have been submitted to Somerset House, it being generally well known in the dairy trade that unless some gross error has been committed by the Public Analyst and in my experience this now very rarely happens—the analysis of the reserve sample is not likely to help them.

But the adoption of a standard, and especially of a higher standard, will materially alter the condition of affairs. It will then become a question as to whether a sample of milk did or did not contain, when fresh, a certain proportion of solids and of fat. The question therefore arises, and will be of very serious importance, is there any method of analysing a sour sample of milk which will enable an analyst to say with certainty what the composition of that milk was when fresh.

The usual method of estimating the solid matter in a sample of sour milk is to neutralise the acidity of the milk with soda, then evaporate to dryness, and weigh the residue. At times the solid residue so obtained will remain constant in weight between successive weighings, but at other times, and more frequently, the solids lose in weight constantly. The best method to adopt is to dry for a reasonable and definite time; the subsequent loss is certainly not moisture. Deducting the weight of the alkali added, we obtain the true weight of the solids. The following results well indicate what are about the usual changes in the weight of the solids which take place when milk is kept. A sample of milk contained when fresh 12.40 per cent. of total solids, when one week old 12.01, when two weeks old 11.82, and when five weeks old 11.73 of total solids.

I have been, from time to time for some years past, studying the changes which take place. My object now, however, is not to enter into this subject, but to keep strictly to the practical question—how far can an analyst estimate the changes which have taken place? I will now give the results of a series of experiments which may help to determine this. Nearly all these experiments were made in the following manner, and when not so made the difference will be mentioned. A large sample of milk having been obtained, a series of bottles, holding generally six to eight ounces, have been carefully filled, or partly filled, with the milk, well corked, the cork tied down and the bottles labelled. The samples have been, mostly kept at the ordinary temperature of the laboratory. Each sample for analysis was taken from a bottle freshly opened for the purpose, and not from a bottle which had been previously opened. As the changes may not always be alike in two bottles, and the difficulty of thoroughly mixing so as to take a fair sample of six to eight ounces of sour milk is considerable, there will at times be slight discrepancies in the results.

Table No. 1 gives the results of an experiment made in 1896. The acidity of each sample of milk was estimated, and calculated as lactic acid. The loss in total solids, it appears, is very nearly one-half the total quantity of lactic acid present, and that by adding one-half the lactic acid found in a sour sample to the total solids found, a close approximation to the original total solids is obtained.

The next series of analyses were made with milk to which 20 per cent. of tap water had been added to determine whether an adulterated sample underwent the same changes as genuine milk. The results were not quite so satisfactory as with genuine milk, and there can be little doubt but that, in introducing water into the milk micro-organisms may be, and are, also introduced, which affect the changes taking place. These changes are undoubtedly confined to the solids other than fat, and it was thought desirable in order to study them more closely to next make a series of analyses, using machine skimmed milk for the purpose. The results showed that the allowance of one-half the lactic acid present is also a fair criterion of the loss on pure skimmed milk. They also brought out a fact which I shall have to refer to again—that at times the loss for the first fourteen days may be only one-third the lactic acid present. In one single instance out of very many analyses I have known this to occur up to the 21st day, but never beyond that period.

The next series was made with separated milk containing 25 per cent. of tap water added. As in the results with whole milk to which water had been added, the allowance of one-half the lactic acid present did not make up for the loss in total solids. It would thus appear that the changes in adulterated milk—that is, milk containing added water—are greater than those which generally take place in genuine milk. This fact I have had frequent occasion to confirm. As the changes are undoubtedly due to micro-organisms, my next series of experiments was carried out to determine if possible the effect of some of those most likely to be present in milk. A number of analyses had shown that the change produced in forty-eight hours by the curdling of milk invariably resulted in a loss of total solids equal to only one-third of the lactic acid present. The following is a typical example of the changes which ordinarily occur. On February 27th, 1897, skimmed milk contained total solids 10.96; on March 1st, that is forty-eight hours after, the milk was curdled, the sample yielded acidity 0.63 per cent., total solids 10.74. So that, allowing one-third lactic acid, we obtain 10.95 as the calculated original solids.

I, therefore, determined what would be the prolonged action of the lactic acid bacillus on the solids of milk. The milk was sterilised, then inoculated with a pure culture, and the bottles put aside. In due course analyses were made. In view of the very great difficulty of obtaining exact results with sour milk, the results were satisfactory proof that the total action of lactic acid is, even after five weeks, such as to cause a loss of solid matter equal only to one-third the acid produced, just as happens in forty-eight hours. An indirect result of these figures is the proof they afford that the old notion of the change by which lactic acid is produced is erroneous. It has been assumed that one part of milk-sugar was simply split up into two parts of lactic acid. If this theory were correct there would be no loss of total solids. The fact that invariably there is a loss proves the inaccuracy of the theory.

Such is the action of the lactic bacillus alone, but the results of many experiments made in my laboratory have convinced me that the loss in solids in ordinary milk amounts to one-half the lactic acid present. I have had many opportunities of comparing my analyses of samples of sour milk with the analyses of duplicate samples analysed when fresh by a public analyst. The results have been at times remarkably close, and I have only once known a wide discrepancy, a discrepancy so considerable, that I do not believe the samples were duplicates. It will be seen that by this method it is almost impossible to calculate the solids as being higher than they actually were in the original sample. This is of considerable importance. But if a standard of total solids is fixed, then it becomes of imperative necessity that no method of analysing sour milk shall be adopted likely to yield results materially lower than those obtained with the milk when fresh.

Unfortunately, milk at times is contaminated with micro-organisms which bring about very active and powerful changes in the constituents. The rapidity with which these changes are brought about is also very materially increased by a rise in temperature. Let me quote two examples. The first was skimmed milk containing no special organism, and which, being kept at the temperature of the laboratory in January (about 45 degrees F.) lost in twenty-one days .44 per cent. solids, and contained .86 per cent. acid, so that the allowance of .43 almost exactly equalled the loss. But a duplicate sample kept in an incubator at 67 degrees F. lost .75 per cent. solids, and produced only 1.26 per cent. lactic acid, so that the allowance of half acid failed to make up for the loss. Hence I find that samples taken in hot weather and kept at a high temperature sometimes lose far more than can be calculated from the amount of acid present. This inability to calculate the changes which have taken place is most striking when the sample contains a special organism capable of decomposing milk sugar.

In order to determine how far the destruction of the lactic acid bacillus would affect the changes produced in milk, a series of experiments were made. The tubes containing the milk were very carefully pasteurised at 150 degrees F. for twenty minutes, and subsequently kept in an incubator at 70 degrees F.

From the results obtained it is evident that pasteurisation destroyed the lactic acid by bacillus, there being no increase of acidity after two days. It is also clear that in such instance the acidity has no fixed relation to the loss. I am of opinion that this milk contained the bacillus [illegible] which is found in milk, and which, though it has the power of effecting very considerable [illegible] in milk, does so, at first, more slowly than the lactic acid bacillus. This impression is confirmed by the results of an investigation made by Mr. Arthur Harden, and reported in the Transactions of the Jenner Institute. He finds that the products of decomposition produced by the bacillus *coli communis* are as follows:

	A.	B.
Sugar used	[illegible]	[illegible]
Produced Alcohol	[illegible]	[illegible]
Lactic Acid	[illegible]	[illegible]
Volatile Acids	[illegible]	
Gas	[illegible]	[illegible]

He draws attention to the fact that the [illegible] produced amounts to about half the weight of sugar decomposed. These results are very similar to those given in Table V., where, after fourteen days, the loss is nearly double the acidity, instead of being, as usual, half the acidity, such being the nature of the changes which take place in milk when kept. It appears evident that an analysis of sour milk, even with the greatest precaution, may not by any means represent its composition when fresh, and that the present system of keeping reserve samples which may be submitted to Somerset House is unsatisfactory.

It is obvious that if satisfactory reference is to be made to Somerset House these reserve samples must be properly treated. My experiments have shown that merely pasteurising the milk at a temperature sufficient to kill the lactic acid bacillus is not sufficient to preserve the sample. Experiments on sterilising in my ordinary steriliser I have made only once, in 1898. The results showed in this instance that milk when sour can be so sterilised as to undergo scarcely any further change. In fact, I am inclined to attribute the apparent changes solely to the difficulty of getting accurate results when working upon sour milk. As evidence of the constancy of such sterilised milk, the following results are interesting. The samples were bottled on 7th March, 1898, the milk containing 12.40 per cent. solids; on 29th the solids were 12.37, and on 15th April 12.28. The acidity was constant during this period.

There is another advantage which would accrue from sterilising the milk. By far the most difficult estimation in a sample of sour milk is that of the fat. There are times when the fat separates from the other solids in such a manner as to defy any attempt to again incorporate it with the rest of the milk, so as to permit a fair sample being taken. Such separation happens more especially in samples which have been taken from place to place, and it is not so marked in any experiment samples which have been employed in these investigations. But even among these I have found it far more difficult to get reliable and similar fat determinations than it has been to get reliable and similar solid determinations. I have found that at times the only reliable method with a sour sample, is to take the whole contents of the bottle, evaporate to dryness with sand, and extract the powdery residue with ether. But it is not satisfactory to have this unnecessary and tedious work, and yet the estimation of the fat is as important as the estimation of the total solids.

The practical conclusion which I wish to impress upon all interested in dairying is this. Reserve samples of milk kept by inspectors should be sterilised. The cost and difficulties are as nothing compared to the effect on a farmer of being wrongly prosecuted for selling adulterated milk when the milk has not been tampered with. A steriliser which would take four to six bottles of milk would cost about £2 to £3. The bottles would cost very little more than those at present in use. But they would require to have indelibly marked on them, either in the make or by sand blast, a distinctive number. Apart from the question of sterilisation, I am certain that such an indelible mark on sample bottles is greatly needed. The way in which some samples that come into my hands, though taken by inspectors, are marked is a disgrace. Not only does it permit of the label being transferred from one sample bottle to another, but I have very strong reasons to believe that this has been done, and done not merely in one instance, but in several instances, and in different parts of the country. Such accidents would be rendered impossible by the adoption of my suggestion. The dairy farmer and milk seller have a right to demand that every necessary precaution shall be taken by the authorities, and I trust that these experiments will prove that it is not asking too much for all reserve samples of milk to be efficiently sterilised.

Rural Labourers' League.—At a committee meeting of the Rural Labourers' League held at Birmingham on Monday, Mr. Jesse Collings, M.P., intimated his intention of retiring from the presidency at the next annual meeting. Mr. Collings has been president of the league from its foundation in 1[illegible]

During a severe thunderstorm, a few days ago a mill belonging to Mr. [illegible], of Stratford, a village near Salisbury, was struck by lightning and ignited. The [illegible] was summoned, but the flames spread with startling rapidity, and the mill and adjoining cottages were totally destroyed. The damage is estimated at about one hundred pounds. In the stables considerable damage was done to [illegible] stock, a large number of cattle being killed. The [illegible] south at Dyrham [illegible]. A [illegible] named Mundy, working on the farm of Mr. R. Lavis, at North Newnton, was struck by lightning and killed on the spot. The horse he was driving was also killed, but a young [illegible] had a marvellous escape.

Agricultural Wages Abroad.

"The First Annual Abstract of Foreign Labour Statistics" issued by the Board of Trade contains some information relating to the wages of agricultural labourers in foreign countries. The countries dealt with in the abstract are France, Hungary, Russia, Sweden, and the United States.

For France the particulars relate to the years 1882 and 1892. The average daily wages of day labourers are given as follows:—

	Labourers with board.		Labourers without board.	
	1882.	1892.	1832.	1892.
	s. d.	s. d.	s. d.	s. d.
Men—				
Summer	1 7	1 5⅜	2 6	2 4½
Winter	1 0½	1 0½	1 9½	1 7½
Women—				
Summer	0 11	0 10½	1 6	1 5
Winter	0 7½	0 7½	1 1½	1 1
Children—				
Summer	0 7	0 6½	1 0½	0 11⅜
Winter	0 5	0 4½	0 9	0 9

The information relating to wages of Russian labourers is compiled from "The Industries of Russia: Agriculture and Forestry," published in 1893 for the World's Columbian Exposition at Chicago, by the Russian Ministry of Agriculture and Crown Domains. The period to which the wages relate is stated to be "during late years" (*i.e.*, preceding 1893) in the case of annual wages, while the daily wages relate to the period 1882 to 1891.

The average annual wages of adult labourers engaged by the year ranged from £3 to £10 8s. per annum for males and from £2 10s. to £6 for females.

The highest average rates were paid in the Southern Steppe Governments and St. Petersburg, Courland and Astrakhan. The wages are exclusive of the value of board and lodging, which are stated to be provided free by the employers in the case of workpeople engaged by the year.

The range in the average daily wages of labourers engaged by the day is shown below:—

	Average daily wages.	
	d.	s. d.
During spring sowing	7 to	1 5½
During haymaking	10 to	2 0½
During wheat harvest	9¾ to	2 7¾

In these cases, also, the highest wages were paid in the Southern Steppe, Baltic, and Lake Governments. The average daily wages are those of labourers engaged by the day and not providing their own teams and implements. The wages paid to those men who provide their own teams and implements are stated to be from 33 to 50 per cent. higher than those recorded above.

According to the "Journal" of the Russion Ministry of Agriculture and Crown Domains, the range in the average daily wages of day labourers in the agricultural districts of Europeon Russia in 1899 was as follows:—

	With board.	Without board.
	d.	d.
During spring sowing	3·6 to 8·4	4·8 to 10·8
During haymaking	4·8 to 10·8	6·0 to 13·2

These figures do not apply to labourers providing their own teams and implements, whose wages are much higher.

The Abstract does not furnish details of the wages of agricultural labourers in Belgium, but information on this point was collected at the Belgian Agricultural Census of 1895. In that year the average wages for day labourers or ordinary service were 1s. 7d. a day without board, and 11½d. a day with board. For women the average daily wages were 11¾d. without board and 6¾d. with board.

For Sweden, particulars are given of the wages of farm servants and agricultural labourers for a number of years from 1865 to 1897. The rates at intervals of five years and for 1897 are given as under:—

Years.	Yearly Wages.			
	Yearly cash wages commonly paid to servants boarded by their employer.		Value of servant's yearly wages in kind and money.	
	Male.	Female.	Male.	Female.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.
1865	6 10 0	2 17 9	15 14 5	9 13 4
1870	5 12 3	2 11 1	15 10 0	9 15 7
1875	9 15 7	3 11 1	22 6 8	12 14 5
1880	7 15 7	3 10 0	20 6 8	11 16 8
1885	8 3 4	3 15 7	19 15 7	11 5 7
1890	9 2 3	4 4 5	21 12 3	12 3 4
1895	9 18 11	4 17 9	22 15 7	12 10 0
1897	10 11 1	5 6 8	23 14 5	13 0 0

For the United States statements are given of the average wages per month, by the year or season, of the ordinary daily wages for casual labour, and of the daily wages at harvest. The general averages for all the States and Territories are as follows:—

MONTHLY WAGES OF AGRICULTURAL LABOURERS.

	Without board.	With board.
	£ s. d.	£ s. d.
1866	5 12 0	3 12 9
1875	4 1 8	2 13 0
1885	3 15 3	2 11 5
1890	3 16 5	2 11 11
1892	3 17 6	2 12 8

The highest rates are returned from the Pacific and Mountain States, and the lowest from the Southern States.

The average daily wages for casual labourers at ordinary times and at harvest are given below:—

	Average daily wages for ordinary service.		Averages daily wages at harvest.	
	Without board.	With board.	Without board.	With board.
	s. d.	s. d.	s. d.	s. d.
1875	4 6	3 3	7 1	5 7½
1885	3 9½	2 9½	5 10	4 7
1890	3 10	2 10	5 5	4 3
1892	3 10	2 9	5 5	4 3

In 1892 the range in the wages of day labourers on ordinary service without board was from 2s. 7d. in South Carolina to 7s. 1d. in Washington; with board, from 1s. 10½d. in North and South Carolina to 5s. 9d. in Washington. The range of the averages of harvest wages in the same year for labourers without board was from 3s. 11d. in South Carolina to 9s. 4½d. in California and North Dakota and for labourers with board 2s. 11d. in from Mississippi to 7s. 1d. in California, Minnesota, and North Dakota.

It will be noticed that there was a marked reduction in the wages paid for agricultural labour in the United States between 1875 and 1885, but since the latter year there has been apparently little change, although there has been a considerable fall in the value of agricultural produce.

For Denmark certain statistics of wages were published in the "Tidskrift for Landokonomi" in 1893. From these it would appear that, in that year, the average wages of labourers engaged by the day on Danish farms were as under:—

	Summer.	Winter.	Harvest.
	s. d.	s. d.	s. d.
Day farm labourers without board	1 4½	2 1½	2 5½
Day farm labourers with board	0 8¾	1 4	1 8½

For farm labourers engaged by the year, the rates were as follows:—

	Total wages per annum.
	£ s. d.
Adult male labourer	11 2 8
Cowman or herdsman	11 5 0
Dairymaid	6 1 6
Housemaid	5 13 0

In 1893 wages were highest in Fyen, West Jylland, and Schleswig, and lowest in Hjorring, Aalborg, and Thisted districts.

The difference in the wages of an adult labourer in these districts ranges from 43s. 4d. to 65s. yearly. It seems that complete statistics of annual average wages for the whole kingdom are wanting for earlier years, so that a comparison can only be made for certain districts. According to a statement by Captain la Cour, formerly secretary of the Royal Danish Agricultural Society, the wages of labourers engaged by the year in Fyen in 1872, 1883, and 1893 were as follows:—

Year.	Adult Male.	Woman.
	£ s. d.	£ s. d.
1872	7 11 8	4 1 3
1883	9 4 2	5 19 2
1893	12 1 7	6 3 6

As regards the wages of day labourers, a comparison can be made for a longer period. The average wages of day labourers, finding their own board, were 1s. 1¼d. a day in 1871, 1s. 4¾d. in 1883, 1s. 5½d. in 1888, and 1s. 10¼d. in 1893.

The Increasing Consumption of Maize.*

A noteworthy feature of our import trade in grain and grain products has been the remarkable increase during the past few years in the supplies of maize. Since 1895 our annual receipts of this product in the form of grain have risen from 33,944,000 cwts. to 62,700,000 cwts., while in the same interval the entries of maize meal have risen from 164,000 cwts. to 1,815,000 cwts. In each of the past four years our imports of the whole grain have exceeded 50,000,000 cwts.; whereas the annual entries prior to 1895, while frequently exceeding 30,000,000 cwts., only twice show an importation of more than 40,000,000 cwts. In 1890 the quantity of maize grain imported was 43,438,000 cwts. The course of these imports for the past twenty-five years may be seen from the quinquennial averages, which are as follows:—1871-75, 19,663,000 cwts.; 1876-80, 37,104,000 cwts.; 1881-85, 27,961,000 cwts.; 1886-90, 33,436,000 cwts.; 1891-95, 32,884,000 cwts.; and 1896-99 (four years), 56,357,000 cwts. The milled product, on the other hand, was, until 1897, always an insignificant item in this trade, but in that year maize meal suddenly figured to the extent of over 1,000,000 cwts., and in the past twelve months the total consignments were almost double that quantity.

The maize imported into this country is used for the most part as feeding stuff for live stock, though some of it is employed in the brewing, distilling, and other industries, and in the manufacture of proprietary foods and confectionery. Its cheapness as compared with other feeding grains has no doubt stimulated the growing demand for it amongst stock owners, for during the past three or four years the average value of maize grain has been from 6d to 1s. per cwt. lower than that of the cheap imported feeding barleys.

The chief source of our supplies is the United States, whence we have received in recent years over 60 per cent. of the entire annual importation, and among the remaining purveyors of maize to our markets the principal are Argentina, Roumania, and Russia. Canada is also credited with a considerable contribution in the annual Statements of Trade, but the shipments from the Dominion consist almost entirely of grain produced in the United States. From the latter country we received in 1899 direct consignments amounting to over 39,000,000 cwts.; Argentina furnished 7,731,000 cwts.; Roumania, 7,354,000 cwts.; and Russia, 2,640,000 cwts. Practically the whole of the maize meal imported is supplied by the United States.

Maize occupies a larger area than any other crop in the United States, its acreage usually ranging from 75,000,000 to 80,000,000 acres, with a production approaching 2,000,000,000 bushels annually. Of this large production about 90 per cent. is retained for home consumption, and of the remainder over three-fourths is distributed amongst European countries, mainly the United Kingdom, Germany, Netherlands, and Denmark; while Canada takes most of the balance.

In the United States, as elsewhere, maize is chiefly utilised as food for stock, especially for pigs, but it also enters largely into human consumption in various forms, and in the southern States maize bread is a popular diet. Other uses to which this grain is put in America include the manufacture of starch, glucose, whisky, and alcohol. The quantity of maize annually consumed in the United States in the manufacture of glucose is estimated at 40,000,000 bushels, and practically the whole of the starch of commerce for the entire country is derived exclusively from the same grain. Apart from the grain, the stalk and blades are also valuable as feeding materials and for other purposes, though these portions of the plant are generally left on the field to be burned before the planting of the next crop. The following passage from a report† by the Department of Agriculture at Washington presents a concise description of the economic value of maize from an American point of view:—"It is predominantly the characteristic cereal crop of the United States, and its money value is, perhaps, greater than that of any one crop, with the exception of cotton. It has been shown that it is a valuable food for man, and that it is the chief food of the domestic animals of our great country. In addition to this, large quantities of starch are made from it, and also glucose and grape sugar. It not only serves as our food, but also furnishes a part of our drink, in the form of the various grades of Indian corn whisky. In addition to this, it is the source of an immense industry in the manufacture of alcohols, high wines, and Cologne spirits. The stalks, which a few years ago were considered an injurious residue, have been found to possess most valuable properties as cattle food. Especially is this true of the outer shells. The inner portion of the stalk—the pith—possesses remarkable properties as an obturator in the manufacture of battleships. It possesses a high degree of reliance and porosity, and when perforated by a shot or shell it instantly closes the aperture made by the projectile, and thus prevents the entrance of water into the vessel. It also has peculiar properties rendering it suitable for the manufacture of pyroxylin varnishes, gun-cotton, and high explosives. By reason of the nature of its construction it is easily nitrated."

In Argentina the cultivation of maize is extending, though at a slower rate of progress than in the case of wheat. According to the Argentine Census of 1895 this crop occupied 3,073,000 acres, or 1,093,000 acres more than in 1888, when the total area under maize was estimated at 1,980,000 acres. In 1899 over 1,122,000 tons of maize were shipped from Argentine ports to various countries, of which the principal were the United Kingdom, France, Belgium, Brazil, and Germany.

Among European countries the production of maize has found its greatest development in Hungary, Roumania, and Italy. In Hungary the crop occupies roughly 6,000,000 acres, and approximately 5,000,000 acres are devoted to its cultivation in both Roumania and Italy. Russia has something over 2,000,000 acres under maize, and France and Austria cultivate 1,600,000 acres and 800,000 acres respectively.

The maize produced in Austria-Hungary is consumed within the Empire, into which there is also a small net annual importation of about two million cwts. of this grain; it is utilised largely for feeding stock, chiefly pigs, and for the manufacture of spirits. Roumania exports about thirteen million cwts. annually, or approximately a third of the crop grown in the country, her principal customers being Belgium, Austria-Hungary, and the United Kingdom. After Roumania, Russia is the principal exporting country in Europe, the total production amounting in a fair season to over twenty million cwts., of which on the average of the last five years for which figures are available nearly nine million cwts. have been exported. There is a fluctuating export from Bulgaria varying from one to six million cwts. yearly.

With regard to importing countries, Germany would appear to be the principal maize importer after Great Britain, her annual net receipts amounting to eighteen million cwts. in addition to a home

* From the "Journal" of the Board of Agriculture.

† Compendium: Maize. U.S. Department of Agriculture. 1898.

production of 6,900,000 cwts. Denmark, which does not grow maize to any extent, has since 1897 imported a considerable quantity from the United States and Russia, mainly as a cheap feeding stuff for swine, the net importation in that year amounting to 8,357,000 cwts., and in 1898 to 8,387,000 cwts.

The net importation of maize into France has averaged 6,540,000 cwts. in recent years, whilst the quantity grown has amounted to about 14,319,000 cwts. Holland and Belgium are also importers of this grain to the amount of several million cwts. annually.

LETTERS TO THE EDITOR.

Swine Fever—Foot-and-Mouth Disease.

Sir,—When the Agricultural Department first scheduled swine fever in 1879, and cast upon the local authority the task of exterminating it, I protested, as I believed it was an indigenous and not a foreign disorder. It was known in my boyhood as a kind of typhoid fever, and it went by the name of "the soldier," I suppose in consequence of its red, eruptive spots. For fourteen years the local authorities fought against this disease with no prospect of ultimate success. We did our best in Norfolk—slaughtered all the diseased pigs and those in contact with them, paid thousands for compensation, restricted movement, stopped markets, and disinfected pigsties, dealers' carts, etc., but made no headway. All we got for our pains was severe criticism from the central authority, and abuse from all the pig-jobbers and small market authorities. So, after this double apprenticeship, I strenuously advocated the Veterinary Department taking over swine fever, remarking that I was sure that they would discover it was "much easier to find fault than to mend." So, in 1895, the task of eradicating swine fever was taken in hand by the Government, the expenses for which were promised to be provided by Parliament. In the last year of the local authorities' reign the outbreaks numbered 2,748—in the six years the Board of Agriculture have managed swine fever, over £800,000 has been spent, and more than 300,000 pigs slaughtered, with the result that in 1899 the outbreaks had been reduced to 2,182.

The President of the Board of Agriculture thinks swine fever "could be as satisfactorily dealt with as other diseases had been," while Mr. Cope, the Chief Veterinary Inspector of the Board, and the only survivor of the triumvirate which for so many years governed that Department, tells us that "the final extinction of the disease must be far from within reach." And I was told by a great veterinary authority that the only way to get rid of swine fever was to kill every pig in the United Kingdom.

But the worst of it is that this £800,000 has not been specially voted by Parliament, but has been abstracted from the Local Taxation Fund—a fund absolutely apportioned for the relief of rates. But the President of the Board of Agriculture is so popular in the House of Commons that he is "congratulated on his success in grappling with swine fever." I call it a disastrous and costly failure, and taking the money from the Local Taxation Fund nothing short of political dishonesty. I have strongly advocated placing swine fever under the general conditions of the Contagious Diseases Animals Act, and directing the attention of the Board of Agriculture to the extirpation of sheep scab, which could be accomplished, say, in four or five years, at a tithe of the money they now yearly expend in their fruitless efforts to rid the country of swine fever.

The Veterinary Report of the Board of Agriculture may not be published until June, 1901, by which time, in all probability, the recent outbreaks of foot-and-mouth in Suffolk and Norfolk will be forgotten by the public. So I take upon myself to record a few facts relating to this great calamity. Upon the first discovery of foot-and-mouth at Fritton the Board of Agriculture ordered the diseased animals to be slaughtered, but, before that could be carried out, the order was changed into one for strict isolation. This was effectually done, but, as a further outbreak occurred on the same premises within a fortnight, the disease was carefully nursed, and, as a local inspector said, "germs were multiplied in sufficient numbers to infect the whole kingdom." From Suffolk the disease spread to Norfolk, and although the homestead was on a high road, and the Department knew of the outbreak on the Thursday, no order for slaughter was received until Saturday, and then only at the remonstrance of the county authority. The other neighbouring outbreaks which followed were stamped out by immediate slaughter, and the plague was stayed; but only for a time. Although the Board scheduled one-third of the county of Suffolk and almost half Norfolk, prohibiting movement of all stock, stopping markets, etc., instead of gradually reducing this huge area and drawing a strict cordon and maintaining it around the infected farms, all the restrictions were kept on for seven or eight weeks, and then the whole at once removed. After inflicting this grievous loss upon the stock-owners of East Norfolk, the Board committed the astounding folly of allowing the man who originally introduced the disease into the county, not only to restock his farm, but, knowing he was a butcher and dealer, to send those cattle where he pleased. No wonder that the bullocks, which had been placed in the very yard where the first diseased cattle were slaughtered, should, upon their removal to the Yarmouth marshes, develop foot-and-mouth. Vigorous slaughter again proved effectual, but a comparatively large area was again infected, and as the spring was now far advanced, the restrictions were ten times more vexatious and costly than they had been in the winter. Grass was growing on one side of the road, and stock were starving on the other; and because the magistrates only imposed nominal fines upon those unfortunate farmers who moved their stock to prevent starvation, the Board of Agriculture threatened to prevent the movement of all stock throughout the whole county.

It would appear from Mr. Long's speech "that the action of the Norfolk magistrate," which he "so profoundly deplored," was connected with swine fever, whereas it was entirely confined to the cruel restrictions imposed on a large district in consequence of the second outbreak of foot-and-mouth; when those restrictions were modified, allowing movement for feeding, etc., the law was rigorously enforced.

Norfolk men considered this letter to the justices was adding insult to the injury for which the Board was responsible; but in Parliament Mr. Long was congratulated upon his vigorous measures for stamping out these outbreaks, and the President complimented his officials upon the efficient manner in which they had been carried out. They certainly carried matters with a high hand. They threatened the magistrates, ignored the local authority, played fast and loose with slaughter, and certainly disregarded the warning of the French Minister of Agriculture "that the specific organism of the foot-and-mouth retains its virulence for several months." Had they known and acted upon this sage advice there would have been no second outbreak in Norfolk.

CLARE SEWELL READ.

Phosphate of Alumina—A Disclaimer.

Sir,—My attention has just been drawn to a notice in the MARK LANE EXPRESS, of November 20th, 1899, on Phosphate of Alumina. The notice states that "some years ago experiments were made by Professor Jamieson in Scotland with most satisfactory results, but owing to the uncertain supply at that time of the raw material they were not followed up." As this statement is diametrically opposed to the results that I actually found, I trust you will be good enough to insert this letter; and as the misleading statement has arisen in your columns, you may be good enough to specially ask colonial papers to copy this refutation. This seems necessary, as my attention was drawn to the matter by a writer from New Zealand, who had observed the misleading statement repeated in the *Otago Witness*, and I understand it caused no little surprise there, and therefore, probably, elsewhere.—I am, yours, etc.,

THOMAS JAMIESON.

Agricultural Research Association, for the North-eastern Counties of Scotland, 10, Belmont Street, Aberdeen, July 28th, 1900.

[*** We hope that not only our colonial, but other contemporaries who copied the article, will reprint this disclaimer. We have asked Professor Jamieson to be kind enough to put the true state of the case before our readers, and we hope he will comply with our request. We must express our annoyance at having been misled by a contributor whom we believed to be reliable.—ED. *M. L. E.*]

Rural Depopulation.

Sir,—It is very satisfactory to find that you have in your valuable paper of 23rd inst., directed particular attention to the shifting away of the labourer from agriculture to the more remunerative work connected with the needs of the constant aggregation of our town populations, and to the various excitements of civic life.

We have much to thank Mr. Rider Haggard for in urging more general attention to this most important subject. It is to be hoped that the thoughts of statesmen, philanthropists, economists, and other of our powerful thinkers, and all desiring to maintain and add to the welfare of our country and our race, will take this subject into serious consideration.

Now, as to the bearing of this problem upon the industry of agriculture: the needs of the farmer of the land, under the special conditions of his industry, will still more tend to promote this exodus of the labourer; the farmer will have to acquire and use more manual labour-saving machines, and to grow less costly work crops, which will tend to stifle weeds, and have, with artificial manures, nutritious qualities equal to the more expensively cultivated turnip, raised under present culture routine. And, if he has to hold his own, he will have more extensively to pursue the breeding and rearing and feeding to maturity to the larder of the consumer, the best breeds of sheep adopted to localities, and he will have to secure more directly into his exchequer the cash the consumer pays, through many convenient channels, indirectly to him for his various produce. Why not toll free and open markets conveniently situate be established in every town?

The cheapening of transit also for the farmers' produce and other requirements for cultivation of the land needs the agriculturists' earnest attention. Our canals should have retaining walls to widen their flotation area, with towing ways on both sides, and vastly improved lock arrangements. Water conveyance is the least deteriorating conveyor, and the most convenient system for loading and unloading arrangements, and might be the cheapest. Our highways also need attention to bring them to a more uniform level to cheapen haulage power.

It would be taking too much of your valuable space at this time for me to specify other means of securing more remuneration to agriculture, which only could be brought by the joint efforts of landowners and occupiers, and it might be to prevent further depression to both.

But Mr. Haggard takes wider and more philosophical views of this exodus of the labourer from agriculture, and his crowding into the town. He bids us look at the young you see there, sharp, puny people certainly, not what their grandfathers and grandmothers were who came from the country. For warning, open the book of ancient history of Rome before Rome fell. And he goes on to tell us the trend of this exodus is the same in Syria, in Australia, and the Cape. Well, then, is it not vain to try to resist these irrestible tendencies; fortunately for us, the resources of civilisation are not exhausted, to migrate, if not to prevent the disastrous consequences which supervened in the long past ages from inability to apply our more matured knowledge in the various sciences connected with the subject. There is no reason why with these applied with judgment in full measure to our towns that they should not, with recreation grounds for cricket, football, tennis, and all other manly and athletic exercises, together with cheap means for locomotion, give to Britain as strong and healthy a people as could be reared in our rural villages.

ALFRED WELCH.

Southall, August 1st, 1900.

THE WEATHER.

MONDAY (July 30th).—Fine weather prevailed in most parts of our Islands, and the barometer had risen briskly over the western portion of the kingdom under the influence of an anticyclone, which was spreading over us from the Atlantic. Rain was measured in the morning at all the northern stations as the result of the fall in the preceding twenty-four hours, but the amounts were mostly small, while in the South of England the rainfall was scarcely appreciable. The temperatures were still somewhat above the average in the southern districts; but there was a good north-west breeze blowing, and the air was generally pleasant. There were several hours of bright sunshine in most parts of England. The day was very fine and bright in London, and the temperature, which had fallen to fifty-seven degrees in the early morning, rose shortly after midday to seventy-six degrees.

TUESDAY (July 31st).—The weather was fine in most parts of our islands, but there was a good deal of cloud reported, especially from the northern and western districts. Rain was measured in the morning at a few places in the extreme north and west, but elsewhere the weather had continued dry. The midday temperatures were high at a few places in the south of England and at some of the island stations; in the north of Scotland, however, the thermometer scarcely touched sixty degrees. The early part of the day was bright in London, while the afternoon was somewhat cloudy. The temperature in the Metropolis rose to seventy-eight degrees.

WEDNESDAY (August 1st).—Showery and unsettled weather prevailed over the greater part of the British Islands, and a further decrease of temperature was experienced. A moist south-westerly current of air was blowing over the entire country, and rain had fallen generally, the largest amounts being measured in the north and west. In the south of England the temperature during Tuesday night did not fall below 60deg., but owing to the cloudy sky there was very little increase during the day. The midday readings nowhere touched 70deg., and in many places they only slightly exceeded 60deg. Rain fell heavily in London at times during the day, and the highest temperature was 66deg., 25deg. colder than a week ago.

THURSDAY (August 2nd).—Fine weather prevailed over the southern portion of the kingdom, but the sky was cloudy in the north and west, with rain at a few places in Scotland and Ireland. A shallow disturbance was passing across Scotland, and strong westerly winds were general over the country, the force mounting to a moderate gale at exposed positions on our west coasts. Rain was measured in the morning, as the result of the fall in the preceding twenty-four hours, in nearly all parts of the islands, but the amounts were not generally large. There was no material change in the temperature, except that the midday readings were somewhat lower in the south of England. In London the day was fine and although the sky became more cloudy in the afternoon, the shade temperature rose to 74deg.

BARLEY AND MALT.

By Hordeum.

Harvesting.

Assuming every good barley-grower has done his best thus far to secure fine barley fit for malting, we have now reached the critical stage when skilful and well-considered action is most wanted. The harvest time has come, and with it many fine fields of waving grain of fair promise. Human skill is now requisite to secure the results that will crown the year's patience and toil with meet reward.

Ignorant want of skill will cause loss and disappointment. The best type of skill is the outcome of much accumulated experience, combined with the power, if needs be, to originate something fresh. Barley-growing for brewing purposes has probably been uninterruptedly practised for double or treble the length of time that covers the historical period since the First Dynasty in Egypt. Yet the present generation of toilers have made distinct advances in the double direction of improvement on the hitherto good and approved characters, and still more by the

Avoidance of Evil.

Good barley still depends much more upon leaving undone the things that ought not to be done than doing the things that ought to be. This is one of the few positions where omission is better than commission. There is not yet sufficient understanding or power to combine amongst the many would-be advisers of growers to indicate quite the best points desired by brewers in malt. Even if such knowledge existed, it is useless to disguise the fact that other considerations are allowed to exert influences contrary to the attainment of the end. It is rare to find growers advised disinterestedly.

In recent articles I have shown the varied motives in hurrying grain to market. Much more could be said about it, but other more urgent matters claim attention first.

When to Cut

is the most important or urgent point in many districts. About this there should be no difference of opinion, although there may be rather wide divergence in practice. Few fields mature regularly, either if carefully examined so far as a few closely clustering ears are concerned, or in many fields of irregular surface, so far as bands or patches run.

In such cases, if the whole field is cut at once it is not probable that a good or uniform sample will be secured.

The little extra trouble of cutting such a field on two or more different dates is, or should be, well repaid. Practically such fields are better if not devoted to barley. Yet, with proper attention when cutting goes on, they can be so used with satisfaction.

Irregularities in character and quality of the undergrowth are often greater from this cause than any apparent difference in the barley itself. These merit attention, as they directly affect the very important questions of the shape, form, and

Size of Stack.

Stacking influences are exceedingly important. It cannot be too generally known and firmly believed that a large part of the superiority of British barley has arisen in the past, and still depends upon our almost insular habit of putting barley into sound, dry barns, and good-sized stacks. How to build a stack, and accurately determine its bulk so as to secure the best results, still remains one of the severest tests of a farmer's skill. No other operation on the farm calls for more careful determination either for hay or barley. Even here there is the difference that heat capable of benefiting much hay of the mixed or rougher type would be certain death to barley.

Fortunately brewers' advisers have learned to place vitality first on the list of the necessities of good barley. Nothing else can give the true condition of sound and vigorous life in grain equal to the glow of a full fair sweat in rick.

Kiln Drying

is unduly and improperly lauded. Useful and beneficial it unhappily is in far too many cases, and comparatively little grain is now sent to market that does not repay the extra labour and cost of sweating. For all that no practical man can really contend that any artificial treatment on kiln can effect the same purpose as proper stacking or heating in barn.

There is another and indirect advantage arising from the practice of which sight should not be lost. A stack soundly made and tightly thatched should be left intact sufficiently long to make sure that there is not the premature rushing to market which cannot be too strongly deprecated. Threshing in the field to save thatching is a shockingly poor economy.

The position of stacks calls for care. Far too frequently the sole consideration is convenience. Local custom has a good deal to do with carting to the homestead or leaving in field. But wherever a stack may be placed its form ought to agree with its surroundings. It should be obvious that a thin, narrow stack fares differently to a wide high one. Yet on a bleak exposed ridge, free to every wind that blows, a twelve yard stack will keep cooler than a seven yard will in a warm, snug, sheltered hollow. Both descriptions can be much influenced by the quality of the herbage and weeds present, or by the absence of them, as the case may be.

HOPS.

By Lupulin.

Plantation Reports.

Special to the Secretary, N.A.E.H.G.

MAIDSTONE.—I think we shall have about half a crop, but it is too early to estimate for certain. Some pieces are very good, some middling, and some very bad. Cultivation of some grounds is very bad and with dry weather will no doubt send hops off very fast. There is still some vermin to be found.

FRANT.—Many hops in this district are suffering from drought and aphis blight. Gardens may be seen completely black, and almost past redemption, though it is difficult yet to say what effect the recent storms may have, but as the hops are out in burr, the crop cannot possibly be influenced to any great extent.

TONBRIDGE.—There may be a fair crop where hops have been well washed and manured, but the best yield cannot exceed about two-thirds of last year's growth. Many gardens look like complete failure, and on the whole the crop must be very short.

CANTERBURY.—Much benefit is discernible from the hot weather and the recent thunderstorms. More vigour is seen in the gardens, and the laterals are looking healthy. But fresh fly arrives, and some mould is to be found. The unwashed grounds are going to the bad altogether. On the whole the bine is, in my opinion, too light to grow out any more than a very moderate crop.

EWHURST.—Well washed hops improve, but are very short of bine. Vermin still troublesome, mould on the increase in spite of hot weather. We shall not grow half of last year's crop.

ALTON.—Hops are much improved where washing and cultivation have been followed up, but where neglected they have gone black. The thunderstorm freshened up the bine. The crop looks like half of last year's or less.

TEYNHAM.—The bine looks much fresher from the rain last week, and there is now very little vermin to be found. The general aspect of the well-cultivated grounds has improved, and with continued favourable weather we shall do fairly well, though the yield will be considerably short of last year.

CHARTHAM.—Although a little vermin and mould are still to be seen in some patches, the bine may now, I think, be called clean. Goldings and Bramblings are fast coming into burr, and in some places into hop, but generally we are short of bine, and it is most probable that our yield will be only moderate, certainly not more than a small average.

HEADLEY.—The hops in my parish are looking very bad; in fact, I have never seen them worse, very short of bine, and not worth washing. The vermin has disappeared the last few days, but we cannot grow more than 2cwt. or 3cwt. per acre.

WYCHAM.—The weather has favoured the hops, vermin has practically vanished, but mould continues to run to a moderate extent. The unwashed gardens are in a poor plight, and can produce next to nothing.

FARNHAM.—The hot weather, followed by the thunder rain, has helped our gardens very considerably. Burr is coming out well, and in grounds that have been looked after the prospect for the crop is in favour of an average, but in some neglected pieces I do not think there will be sufficient hops to pay for the picking.

GODDHURST.—Observations in this parish and through some of the surrounding country enable me to say that the general aspect of the plantations at present is fairly favourable for a crop which will probably come out very near to an average. But it is impossible to be certain in forecasting the final result, as so much depends upon the weather that may prevail in August. The present change to coolness with drizzling rain is not desirable, and will, if continued, very likely promote the increase of mould, which is already too evident to be pleasant. If we can be favoured with bright, clear atmosphere, not too hot, we shall do well, otherwise our prospects will be materially altered.

WEST WORCESTER.—The hops this season have gone through one of the worst aphis blights I have ever known, some planters washing four and five times. Yards that were not washed have gone black. Taking an average, we cannot grow more than two-fifths of last year's crop, and that will depend upon the weather we get this month.

STOCKLEY.—Hops vary a good deal, but nearly all are short of bine, and where it is plentiful I am afraid it will be rendered to a great extent abortive by repeated washing. I have not heard of any mould to speak of, and think the thunderstorm on Friday night cleared off most of the aphis. Not more than two-thirds of last year's crop can be anticipated at best.

KYRE, TENBURY.—Hops in this district have improved during the past two or three weeks. Persistent washing has cleared the plants of aphis, and if the present favourable climatic conditions continue we shall grow a little over half of last year's crop.

All official reports and notices of the National Association of English Hop Growers will be printed in the MARK LANE EXPRESS, *which will also contain all current information likely to be of interst and benefit to the members of the society.*

Foreign Notes.

Nuremberg.

The heat wave, which has affected the greater part of the European Continent, has benefited the breweries in increasing the demand for beer, which some of them have found it difficult to cope with. The utmost limits of productive capacity have been exceeded in several cases by the orders received, consequently in every direction activity has prevailed, and the consumption of materials has seriously reduced the stock on hand. This is felt in the hop market in the anxiety shown by brewers to purchase further supplies, but owing to the small holdings of dealers the actual business is confined within very narrow limits, and such transactions as could be effected have been done at prices showing substantial advances upon the rates recently current. The tone of the trade is necessarily very firm, and this condition is intensified by the

Reports from the Plantations,

which are not, on the whole, so satisfactory as were previously expected. The almost tropical atmosphere, which lasted so long, has proved to be very trying to the plants in several districts. It has been actually disastrous in some localities, and even in those which are generally best able to endure continuous heat there are signs that without rain the growth and the produce would suffer. Happily for all concerned the parched grounds and the failing plants have been partially relieved by thunder showers, which fell generally about a week ago. It now remains to be seen how much of the bine possesses sufficient vitality to recover from the trials through which it has passed, and recent intelligence on this point arouses fears that the average yield will be diminished from the estimate previously formed, and that the present season's crop will barely suffice to meet the requirements of brewers during the coming year.

Belgium.

The market is still firm at previous quotations, which are 65 to 67½ francs for Alost, and 60 to 62½ francs for Poperinghe hops. Business is quiet in native growths, as there are so few left on sale.

The prospects of the new crop have improved in most districts, the heat having been very beneficial where the bine was in good condition; it has also helped forward the weaker grounds, although it is very doubtful whether in such cases the improvement will be permanent. The probable crop is variously estimated, but there seems to be no possibility that it can exceed that of last year and it is questionable whether it will attain to the same figure.

The imports of hops into Belgium for the six months ending June 30th amounted to 572.633 kilos (about 11,500 cwts), which is within a trifle of the same quantity imported during the corresponding period of 1899. But the analysis of the supplies shows some marked changes. In 1899 the U.S.A. sent nearly 70,000 kilos to Belgium, and this year only 8,442 kilos. Last year the receipts from England were about 75,000 kilos, this year they are over 92,000 kilos. On the other hand, Belgian exports to England this year are under 4.000 kilos, while last year during same period they approached 50.000, and in 1898 were nearly 220,000 kilos. There is, however, but little difference in the total exports of the two periods, although the imports exceed the exports by 110.000 kilos, or about 2,200 cwts.

France.

The official returns of the *Commerce Spécial* for the first six months show that France imported 994.000 kilos of hops for the use of native brewers, and only exported 82.000 kilos of her own produce, the imports exceeding the exports by over 18,000 cwts.

America.

Very limited arrivals at New York and a steady demand from local brewers have resulted in the maintenance of a firm tone, recent prices being easily realised.

Some crop reports are to hand, from which I extract the following:—

LIVINGSTON, Co., N.Y.—Hops not arming well on account of dry weather. Vines are free from insect pests.

WATERVILLE, N.Y.—Severe wind storms have lowered the prospect of yield, which now points to a light crop, although more recent showers have cleaned and brightened the vines.

COOPERSKILL, N.Y.—The effect of wind storms is evident in the badly whipped arms, and previous estimates of only half a crop this year are still supported.

KING, Co., WASH.—Present acreage is about 30 per cent. less than last year. Vines in good condition and comparatively free from vermin. Labour

is high, and some yards will be neglected unless the outlook for prices improves.

PIERCE CO., WASH.—Nearly seventy-five acres ploughed up in Orting district. Vines are flourishing and fairly free from vermin.

WASHINGTON CO., OREGON.—Prospects are discouraging at Cowlitz. Vines are weak, with many dead hills.

LANE CO., OREGON.—Acreage same as last year. Many hills destroyed by grub. Shortage in yield is anticipated.

CALIFORNIA.—General reports point to a lighter crop than last year, although the acreage is about the same.

FARM PROSPECTS

Cumberland.

All root crops are good in spite of the wireworm, helped by much rain. Corn is above the average in all well-managed land, but some lands have not had their due, and, ergo, the crop is short and thin. The hay is very abundant, and much of it is already saved. Meadow mowing is not yet over, while corn is ripening fast, so that the work for it will follow quickly on the heels of the other. Scarcity of field labour has more to do with hay slackness than has the weather, though showers are frequent. As well as labour, living is becoming costly also. One man from this parish is getting £9 a month and his keep for hay-making. You can't eat your pie and have it. If nations will fight and go soldiering by hundreds of thousands—well, the whistle is a dear one, and must be dearly paid for. Were music hall heroes forced to 'make hay while the sun shines," or even to pay out of their own pockets for the work, we would have more value from our soil, and be less dependent on foreigners for what goes into British mouths without defilement.—H. M. K. (Aug. 2nd).

Dorset.

The summer weather of the last three weeks has resulted in a large quantity of excellent meadow hay being put together, and with few exceptions the hay is all got in. Harvesting has commenced, and the crops to all appearance seem fairly good; the quality will have to remain an open question; if fine weather still prevail it will be a good, if not quite an average crop. Rain, no doubt, is wanted in many districts for the roots as well as for the grass. Both cattle and sheep have done well, and this morning we are blessed with a nice rain, which doubtless will harden the values of all kinds of cattle and sheep, and increase the somewhat shortness of grass feed. Both fat cattle and fat sheep have been making less money, probably owing to the great heat, and the losses incurred by country butchers during such extremely hot weather.—G. S. (Aug. 1st).

Pembroke.

As to prospects of the present season, up till now it is most difficult to come to any definite idea. Speaking generally, corn is looking well, a fair crop of hay has been saved, and dairy and grazing farmers have had a fairly good season.—(Aug. 1st).

South Somerset.

The hay crop (our Chard correspondent writes) has been very nearly a record one, for although the shears have been slightly under the average this has been more than made up for by the rapidity with which the produce has been gathered in, with a minimum expenditure in labour. Meadows which in previous years have taken so many weeks to cut and stack the produce have this year been completed within as many days. Copious local showers have much improved the appearance of the growing cereals, which are now looking exceedingly well, and promise an abundant yield. The mangel plant, where it was well established before the drought set in, is flourishing, and, whatever may be the fate of the cruciferous roots, the prospects of the most valuable of our root crops seem assured. Swedes are fighting a somewhat unequal battle, as in some cases they are smitten with mildew, and in others they are struggling against the attacks of those voracious pests, the surface caterpillars and the cut "worms," as the American farmers term them. The fruit crop is also abundant, and the orchards of Somerset bid fair to satisfy the most sanguine hopes of the cider merchants. A blight was at one time threatened in the potatoes; but this has apparently disappeared, and whilst early and second early kinds have yielded well there is every likelihood of the late potatoes proving high standard croppers. With the 1st of September looming in the near future it is pleasant to hear that birds appear in large coveys, and are already strong on the wing.—*Bristol Times and Mirror.*

Suffolk (East).

The prospect of wheat is below an average, cutting just commenced. Barley I consider above an average, with the prospect of a fairly good quality. Oats not quite an average. Beans and peas nothing to complain of. Potatoes not many grown. Hay fair, the later crop well secured. Roots are now more promising, but not so free from weeds as is desirable. Live stock healthy, but the store stock is a dull trade, especially for lambs. On account of the scarcity of labour more machinery is in use, and to a certain extent will be a considerable help.—J. S. (Aug. 2nd).

Ulster (East).

The weather has been, and is, unsettled. There was a spell of dry, warm weather early in July, which broke in a thunderstorm, followed ever since by a vapour-loaded atmosphere and frequent showers.

Potato Crop.

The disease of the potato has developed rapidly during the close, warm, damp weather, and at the present time every patch of early potatoes presents a withered, blasted appearance. The later kinds have not yet suffered to the same extent, but the presence of the disease is manifest in very many places. Spraying has not been as universal as it should have been—in fact, farmers with small farms have not the means for each to possess a spraying machine, so that the men least able to bear the loss suffer most, while farmers with large holdings use the spraying machines freely, and consequently suffer little from potato disease.

Cereals.

The principal grain crop in this country now is oats, and it generally looks well, and farmers speak hopefully of it. The other crops of barley and wheat also look pretty well, but their results cannot much influence the farmers' prospects.

Hay.

Grass has been an abundant crop, and, where saved early, the hay is good, but large quantities are now spread out over fields and meadows under the heavy rains of the past ten days, and much meadow grass is yet uncut.

Root Crops.

Mangel wurzel appears healthy, and gives promise of heavy crops. Swedes are much improved, and the promise of a good crop is much more hopeful than it was three weeks ago. Aberdeens and Globe turnips are not sufficiently advanced to form an opinion yet.

Flax.

Not much flax is now grown in this district, but rather more than last year. I have seen a few fields of excellent quality of Riga flax, and, as there is improved machinery for scutching, manufacturers may be able to give such prices as may induce Ulster farmers to take more interest in the growth of this crop.—E. U., 2nd August, 1900.

The Crops in Germany.

The following report of the crops throughout the empire was issued by the Imperial Bureau of Statistics in the middle of July. No. 1 represents very good; 2 is good; 3 an average; 4 below an average; 5 bad. The condition of all crops was considerably improved owing to the plentiful rains in the beginning of July, followed by warm weather. Prospects are, however, not so good as last year for winter rye, clover, and hay. Those for potatoes have not been so good as this year's since 1893. Prospects for summer crops are better than in most of the seven years; winter wheat also comes up to the average during that period. Harvest will be rather later than usual. Injuries from hailstorms are reported from Hesse, Bavaria, and Baden, and from thunderstorms in Alsace Lorraine. Ravages of mice and caterpillars are reported from Wirtemberg and Baden.

Reports on winter rye are fairly uniform from all parts of the empire; it is thin, short in the haulm, but the ears are well filled and grain well developed. The yield will not be very large. The crop will be below an average in Brunswick, Saxony, and East Prussia; prospects are good in Bavaria. Reports on winter wheat are better than for rye, except in a few places where it is below an average. The rainfalls had a beneficial effect on the development of summer crops, especially barley and oats, and only one report out of eighty-two is below an average. This is not the case with summer rye, and the note is much below that for the empire in Prussia, Posen, Pomerania, and Brandenburg.

Potatoes are in much better condition than for the last seven years, and reports are above an average from all parts. Those from South Germany are especially good. Disease has appeared in a few places in early potatoes. A good crop is expected everywhere.

Reports are very unfavourable concerning the first crop of clover. The year of fodder famine, 1893, is the only one that was less favourable. The note for the empire is below an average, that from Bavaria, Saxony, and Thuringia is good, and from Anhalt, Schaumburg Lippe, Hesse, Wirtemberg, and Baden it is above an average. The first crop was spoilt by the wet, and the second crop will be very small.

The results for lucerne are better than for clover. Rain at the beginning of July hindered the harvest and spoilt the quality of the fodder. The present weather is favourable to a second crop.

Hay harvest was hindered by the rain, [illegible] the quality of the crop was affected. The yield was largest in Bavaria. The second crop promises to be better than the first.

Prussia.

The following report concentrating [illegible] throughout the Kingdom was issued by the Royal Bureau of Statistics in the middle of July. No. 1 represents very good; 2 good; 3 an average; 4 below an average; 5 bad:—

Kingdom of Prussia	Wheat.	Rye.	Barley.	Oats.	Potatoes.	Clover.	Lucerne.	Hay.
	w.	s.	w.	s.				
July, 1900	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
June, 1900	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
May, 1900	2.8	2.7	3.3	3.0	2.8	2.8	2.0	3.2	2.9	2.3
April, 1900	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
July, 1899, against	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
July, 1899	2.3	2.5	2.5	2.8	2.5	2.6	2.7	2.8	2.6	2.8

The condition of winter wheat is about the same as that of last month. A good average crop is expected. Winter rye is generally thin, but the grain is well developed. Summer barley will be a satisfactory crop. Prospects for oats are good. Potatoes promise a good crop. The first crops of [illegible] were small and not of good quality, and many [illegible] was spoilt by the rain, before it could be cured.

THE GARDEN.

The days are drawing in rapidly now—too quickly from one point of view, as when the evenings "begin to cut," as they say about here, it is a sign that the autumn is not far off. An old and valued friend of the writer's used to say that he always disliked to see scarlet runners brought to table, simply because when they became plentiful the best of the summer was over, and autumn at hand.

These same scarlet runners have grown with wonderful rapidity of late, my own lot, though not sown very early, having climbed the sticks in very short time and being now in full bloom and setting. They are not much grown about here, but like peas, succeed remarkably well as a rule, and realise much better prices than are to be had anywhere near London. The points of the plants should always be pinched out as soon as they reach the tops of the sticks; this throws the vigour of the plants into the axillary trusses of blossom below, and also promotes the formation of lateral or side shoots, which bear flower and fruit freely.

These beans require a deep, mellow, and well-enriched root run, with a fair but not excessive amount of moisture; in very wet periods they are apt to drop their blossoms badly, instead of setting them. If very early produce is desired, some of the tuberous roots should be taken up in the autumn before being injured by frost, wintering them in some cool but frost-proof place, like dahlias, and either starting them in a gentle warmth in the spring or simply setting them out in a dormant condition about the end of April, with some littery manure laid over the rows to prevent injury from late frosts. These old plants grow very quickly when once started, and produce the flowers and pods very early and freely.

Unless a sowing of cabbage seed of one or more early varieties has already been made this should be done at once, to provide plants for the earliest cuttings next season. Even if one sowing has been made it is advisable to sow again during the next week or so, as the very early-sown plants are liable to "bolt" in the spring, instead of hearting, more particularly in the warmer or more southern parts of the country. In cool late districts the plants from seed sown the third or fourth week in July will often do well, but elsewhere it is safer not to sow [illegible] second week of August.

Turnips may be sown freely now, August being probably the best month to sow this crop for winter use, especially when very large roots are not required. But these never stand severe weather as well as smaller ones do, as even when [illegible] a kind of decay, and then they rot away rapidly. It is much better, for several reasons, to sow in drills than broadcast, and the seed [illegible] should not be scattered too [illegible] early-sown batches as required, [illegible] day, if possible.

A first sowing of the prickly or winter spinach may also be made now, and a bed be prepared in which to sow onions to stand the winter presently.

Speaking generally, [illegible] have proved quite as good a crop as usual, in spite of the persistently unfavourable weather. Many growers say that the plants made [illegible] foliage, and when this [illegible] set [illegible] well. The early good crops were [illegible] from that popular variety Royal Sovereign, but the old favourite Sir J. Paxton [illegible] usually as well as usual.

It is getting late to plant [illegible] now; if plants established in [illegible] can be obtained they may yet do fairly well, but no time should be lost even with these. Ordinary runners planted after the present time will afford little or no fruit to speak of [illegible]

The best flavoured strawberries [illegible] are

British Queen, Dr. Hogg, Countess, and Keen's Seedling, the last being also a very vigorous kind and a heavy cropper, but British Queen is what we gardeners term a "miffy" subject, and requires both the best of soils and very careful culture. Dr. Hogg is a good grower, and usually crops freely as well, so that where the other does not thrive it should be grown.

Proceed with the budding of roses as fast as possible. Showery weather is favourable for this work, but when the weather is very wet the buds are liable to rot instead of "taking."

Carnations also should be layered as fast as the work can be done. The growth is usually late this season, but even if the plants are still in bloom it is better to get the layers put down in good time. Early-sown seedlings should be pricked out singly into a bed of good, sandy soil, either in a frame or pit, or in the open.

The present time is a very suitable one for sowing the seed of hollyhocks to flower next season. Start it in one or more boxes of light loamy soil, with some leaf mould, etc., and good drainage. Keep the soil evenly moist, and when the plants are 2in. to 3in. in height place them in single pots, 3½in. or 4in. in diameter. In these they may be wintered in a cool pit or frame, moved into larger pots in the early spring, and planted out in deep, rich soil in April, when they will flower well the same year.

New Agricultural Patents.

Specially compiled for the MARK LANE EXPRESS by Mr. G. D. Howard (Hughes, Son, and Co.), Patent Agent, 38, Chancery Lane, London, W.C., of whom all information relating to Patents, Designs, and Trade Marks may be obtained free of charge.

12,835. Max Blaskopp, Manchester, for an invention of "An improved process for conservation of plants."

12,842. Julius Zobel, Berlin, for an invention of "Machine for clearing and 'assarting' roads, fields, and the like."

12,867. Maurice Kane, London, for an invention of "Improvement in finger bars for mowing machines."

12,895. Carl Roth, London, for an invention of "Improvements relating to artificial manures."

13,022. John Byrom, Liverpool, for an invention of "Improvements in watering cans or garden engines."

13,208. Emil Blumschein, London, for an invention of "Improvements relating to turnip thinning machines."

Patents Sealed.

6,607. J. F. Carroll, Massachusetts, U.S. America, for an invention of "Improvements in cultivators, hoes, hand potato diggers."

7,196. C. Hamblin, Bath, Somersetshire, for an invention of "Improvements in hay collectors."

Contagious Diseases of Animals.

NOTE.—The figures for the current year are approximate only.

Lumbering in Canada.

The great fire a few weeks ago at Ottawa, and the destruction of so many fine mills and an immense quantity of timber, called special attention to the great lumber trade of Canada. This fire, which left 18,000 persons homeless and burned down some 2,400 houses, also destroyed 12,500,000 cubic feet of timber valued at £600,000. The valley of the Ottawa River was a comparatively short time ago a vast virgin forest, but all the district round there was deforested, and the lumbermen have now to go from 100 to 200 miles up country to procure timber fit for the saw mills. The Ottawa River is well situated for the lumber trade, and some of the finest mills in Canada are on it. For instance, those of the Messrs. Hamilton Brothers, at Hawkesbury, below Ottawa, where 2,400,000 cubic feet of deals are sawn annually for the British market. The magnitude of the business of this firm may be judged from the fact that they employ eight hundred hands, six hundred horses, and cultivate twenty-five farms solely to grow wheat, beans, etc., and to fatten cattle and pigs solely for the use of the men whilst engaged in felling timber in the woods. All stores and clothing must be sent up to the "lumber camp" at least nine months or a year before being required, as the forests are so remote from roads and navigable streams that advantage has to be taken of the snow in winter to get up the stores for the following winter and spring. The men usually leave Ottawa for "the camps" in September, and are absent for nine months. Most of the lumbermen are French-Canadians, as they are far more expert with the axe than an Englishman. The men are fed well in "the shanties," the favourite ration being pea soup and baked beans and pork, and grand food it is where the temperature is generally down somewhere about zero, and the work hard and constant. The usual allowance per man is 1½lb. of meat, 1½lb. flour, besides potatoes, beans, rice, etc., so it can be understood what a business it is to provide the commissariat for such an army of men, to say nothing of the horses. Often the big lumbermen send up from £10,000 to £15,000 worth of provisions and clothes. Nothing is done in the way of lumbering till the snow falls, and it would be a national calamity if there came a Canadian winter with little or none of "the beautiful," as it would be simply impossible to carry on the work in the rough forests without a good deep covering of snow. On some of the smaller rivers in the Province of Quebec a great deal of lumbering is done, but not on the same gigantic scale as on the Ottawa. Take the St. Francis River, for instance, which rises in the States and flows through the beautiful Eastern townships into the St. Lawrence, at Lake St. Peter. On the St. Francis are a large number of saw mills, and one has a good opportunity of watching the different phases of lumbering In September a great many French-Canadians will be seen going by road and rail to reach the lumber camps, where they will be at work all winter. Towards the close of the winter, and before the roads get bad—that is, the snow soft and hard to travel—you may see the big sleds, each with a large boat like a whale boat mounted on them, being taken up country. These are for the use of the boatmen who afterwards come down the river with the logs. When the logs are cut on the timber "limits" they are drawn to the edge of the river, or one of its tributaries, by horses and sleighs; or, where the ground favours it, sent down on a slide-way. Water has to do all the duty of transportation down country, and the logs must be as near as possible to a river, ready to be thrown in the instant the ice breaks up. The ice "goes out," to use the Canadian term, generally some time towards the middle or end of April, and a grand sight it is to see, with the huge blocks and sheets of thick ice crashing and plunging along in the wild rush of water, for a big flood invariably comes down with the breaking up. It is always an anxious time, for where there is a heavy flood and thick cakes of ice, the chances are that one or other of the many bridges will carry away, on account of the ice jamming in the arches. A day or two sees the flood moderating, and then a pioneer log will be seen coming down, and in a few days more the river will be covered with them sailing down. On the islands and rocks in the river and on the banks and flats a great number of logs will be stranded and left high and dry. The logs on the St. Francis and such rivers are not so large as on the big rivers, but handy lengths of from 12ft. to 15ft., and about 1½ft. to 2ft. in diameter.

In a week or a fortnight, when the river has gone down to nearly its normal level, we may be on the look-out for the logmen. On the St. Francis the gang would be about from 100 to 120 men, not counting the cooks and camp attendants. The boatmen, in the large boats holding about a score of men, paddle down the river, launching into the current any logs caught on the islands or rocks, while gangs of logmen keep on either bank, releasing the logs caught in trees, etc.

Sometimes, at a rocky or crooked part a "jam" will take place, and hundreds of thousands of logs get piled up. Releasing a "jam" is very dangerous work, and many a life is lost in this way. The "key log" which is causing the jam has to be discovered and cast loose, and often the daring man who does the deed is swept down in the wild rush of timber, and smashed and battered so as to be almost unrecognisable when his body is recovered miles down the river, or more likely he is never seen again. At each mill down the river there is a large harbour constructed to float the logs into, and a boom across to stop the logs that they may be sorted. Each log is stamped on the end with the brand of the mill it belongs to, and gangs of men sort these out, and let the others go on down. Sometimes a boom breaks, and all the logs rush past. This is a serious misfortune to the mill where it happens, as it means the loss of a season's work. There is no earthly chance of getting them up-stream again, and all that can be done is to sell them to the mills below. It is really wonderful to see the logmen at work on the floating timber. They wear spiked clamps on their boots, and standing on a single log, with a boathook in their hands, will balance themselves and sail along as securely as if in a boat. Each night the logmen camp on some island or field near the river, the cooks having preceded them in the morning, and a very interesting sight it is. The farmers in the neighbourhood send them milk, eggs, etc., and in return receive a hearty welcome to camp, where they will probably be asked to try the very best of pea soup and the excellent pork and baked beans. The advent of "the logmen" is always a pleasing event to the Canadian farmers along the rivers.

LITERARY NOTICES.

We are in receipt of a copy of the report presented at the twenty-sixth annual general meeting of the British Chamber of Commerce, Paris, held on February 2nd. The report, which is in pamphlet form, is accompanied with comparative statistics of Anglo-French trade for 1898-1899, with a compendium of French legislation in 1899 and tables of ship brokerage charges.

The sixth annual report on field experiments carried out by the Agricultural Department of Reading College in co-operation with the County Councils of Berkshire, Dorset, Hampshire, and Oxfordshire, has now been issued. It is edited by Mr. Douglas A. Gilchrist, B.Sc., and gives detailed accounts of the various field experiments in the counties above named during 1899. It is published at sixpence, and the farmer who purchases a copy will get good value for his money.

There has come to hand from the Agricultural Department of the University College of North Wales, Bangor, a prospectus of the session 1900-1. The session consists of three terms which have been fixed as follows:—Autumn term, October 2nd to December 19; Spring term, January 9th to March 23rd; and Summer term, April 10th to June 29th. The prospectus, which can be had on application to the Secretary of the College, Mr. John Edward Lloyd, M.A., gives full particulars of the classes and lectures, rules of admission of students, fees, etc.

Some time since there appeared in the columns of the *Christchurch Weekly Press* (New Zealand) a series of articles on agriculture in that colony. The articles were written by thoroughly practical men, and based upon actual experience in their respective districts, and of the methods of farming which experience had led them to adopt. The points dealt with were: (1) Character of the soil; (2) best method of working the soil; (3) most suitable rotation of crops; (4) growing of root and other fodder crops; and (5) use of artificial manures. These articles were so much appreciated that they have now been published in pamphlet form, and we have been favoured with a copy. Of course they appeal more particularly to agriculturists in New Zealand, but they would afford interesting and may be instructive reading to farmers in this country also.

NEWS NOTES.

Those who travel on the Midland Railway will appreciate the "Midland A. B. C. Time Table," just issued by the company. It is of a size suitable for the coat pocket, and gives, in alphabetical order, the names of the various stations, times of trains to and from St. Pancras, also fares, etc.

We have received a copy of an illustrated pamphlet, entitled, "Soils, and the Maintenance of their Fertility Through the Growth of Legues." It was written by Mr. F. T. Shutt, M.A., F.I.C., F.C.S, F.R.S.C., chemist at the Dominion Experimental Farms, Canada, and was read by him before the Natural History Society of Montreal.

The London and County Banking Company's balance-sheet for the half-year ending 30th June last shows that, after paying interest to customers and all charges, making provision for bad and doubtful debts, and allowing £35,338 14s. 9d. for rebate on bills not due, the net profits amount to £370,583 9s. 4d. From this sum £125,000 has been carried to Reserve Fund, leaving £245,583 9s. 4d., which, with £69,176 9s. 10d. balance brought forward from last account, leaves available the sum of £314,759 19s. 2d. The directors have declared a dividend for the half-year of 10 per cent., together with a bonus of 1 per cent., which will require £220,000, leaving the sum of £94,759 19s. 2d. to be carried to the profit and loss new account.

CORN MARKETS.

LONDON.

Mark Lane, Monday. –Malt: There has been a quiet trade during the week. Barley unaltered. Wheat rather easier on the week. Oats remain steady. Maize dull at about last week's prices. Flour about the same.—NIXON, GOWER, AND CO.

Mark Lane, Wednesday.—There is very little old home-grown wheat now left, and attention is now paid to cuttings. Samples of the new crop may be expected to be submitted in the course of about ten days. Fine white, 32s 6d ; and good red, 31s 6d (63lb.), delivered. American descriptions were generally adverse to sellers, but last rates were maintained, more especially respecting whites. No. 1 Northern Spring quoted at 32s 6d ex ship, 33s landed. No. 1 hard Manitoba, 33s in the former, and 33s 9d in the latter position. Hard Duluth, 34s ex ship. Russian and Indian nominal. Consumers of flour again failed to render relief to the late monotonous course of the market. The London Millers' Association made no alteration at this afternoon's meeting Town households, 25s 6d ; whites, 28s 6d per sack. American first patents quoted at 25s 6d to 26s 6d ; second ditto, 23s 6d to 24s 6d ; first bakers, 21s 6d to 22s ; and seconds, 19s to 20s. Hungarian 29s 6d ; Cascadias, 24s 3d per sack ex store. Australian first patents, 21s 6d to 22s 6d per 280lb. Among feeding stuffs, Persian barley still supplies wants, and is steady at last week's decline, at 17s 6d ex ship, 18s 6d ex quay. Black Sea and American remain off the market. Round corn steady. Odessa nominally 21s 6d ex quay. American oats in good supply, but there was no disposition to give way in prices. Mixed clipped, 14s 3d ex ship, 14s 9d ex quay ; white clipped in these positions, 15s 3d and 15s 6d 38lb respectively. Russian scarce, and in sellers' favour. St. Petersburg, 14s 3d to 14s 6d ex quay 38lb ; Revals nominal in absence of offers. No. 1 Canadian white, 15s 6d. Maize fairly maintained. American mixed held for 19s 6d ex ship, 20s ex quay. Odessa, old, 24s 3d ex quay ; old Plate maize, 22s ex ship, 22s 6d ex quay. Beans and peas are unaltered.

COUNTRY.

Ashford, Tuesday.—Trade very quiet at late rates, best white wheat making 30s to 32s, and red 29s to 31s per quarter.

Banbury, Thursday.—Wheat (white), 29s to 30s per qr ; wheat (red), 28s 6d to 29s 6d per qr ; beans 32s to 33s ; oats, 22s to 25s per qr. Very small supply of wheat at about last week's rates.

Birmingham, Thursday.—The market was poorly attended, and very little business was doing. Wheats were reported as having a slow trade at unchanged prices. English from 30s to 30s 6d per qr., and among foreign sorts hard Duluths were 6s 8d, and No. 1 Northern Duluths 6s 5½d per cental Liverpool. Grinding barley was 6d cheaper. Azoff, 19s 6d to 19s 9d ; American, 18s 9d to 19s ; and Persian, 17s 6d to 18s at Bristol. Maize, too, was easier, flat selling at 19s to 19s 3d, and Odessa 23s at Bristol, and Plate 21s 6d to 22s. English oats and beans showed no change in price, while foreign oats were a trifle easier.

Boston, Wednesday.—A very small show of all kinds of grain, and but little business doing. Wheat, 30s to 30s 6d ; grinding barley, 26s ; oats, 22s to 24s ; beans, 33s to 34s ; maize, 22s to 24s 6d.

Braintree, Wednesday.—Very little corn on offer, and prices unchanged. Red wheat made up to 31s per qr, and white wheat 32s.

Devizes, Thursday.—The supply to-day was very small. Prices are about the same as last week. The first sample of the new crop was exhibited—winter oats by Mr. Stratton, of Alton, and Mr. Slade, of Market Lavington ; winter barley by Mr. Burry, of Fittleton ; and rye by Mr. Alexander, of Easterton. Wheat cutting has commenced on many farms, and will be general next week. The rainfall of the past week has done an immense amount of good, but it is to be hoped that fine weather will now again prevail, as a continuation of wet weather, now that the harvest has commenced, would be most disastrous. Prices : Best wheat, 15s to 16s ; secondary, 14s to 15s ; grinding barley, 20s to 24s ; oats, 18s to 23s ; beans, 16s to 18s ; fine flour, 24s 6d to 25s 6d ; extra fine, 26s to 30s ; best bread, 10d.

Gainsborough, Tuesday.—Small show of wheat, and slow trade, prices being 6d per qr less than last week. White wheat, 29s 6d to 30s 6d ; red ditto, 28s 6d to 29s 6d ; white oats, 20s to 22s ; black ditto, 18s to 20s ; grinding barley, 23s ; English beans, 30s ; peas, 23s ; small maize, 26s ; flat ditto, 23s per qr.

Glasgow, Wednesday.—There was a thin attendance at our Corn Exchange to-day. Wheat and flour quiet at last week's prices. Indian corn 1½d per boll dearer, owing to scarcity on spot. Canadian peas and grinding beans dull, but unchanged. Foreign oats 1½d to 3d per boll cheaper, owing to liberal arrivals. Home oats and oatmeal steady. Barley steady, but quiet. Bran and thirds firm, and the turn dearer. —GIBSON AND CLARK.

Hereford, Wednesday.—Quiet trade in English wheat ; values against sellers, but transactions were few. Barley, nothing doing. Oats dull at recent rates, though somewhat better. Maize a turn in buyers' favour. New samples of grain expected next week.

Ipswich, Tuesday. –Fair supply of wheat, trade quiet at about last week's prices, reds averaging 29s 6d per quarter. No barley on offer. Maize rather cheaper. Oats slow trade. Nothing doing in beans and peas. With fine weather harvest will be begun next week.

Leeds, Tuesday. —With lighter shipment and less settled weather, the trade, notwithstanding weak American advices, keeps very steady. Red wheats are held for late rates, whites are rather dearer than last week. Maize 9d lower. Beans and oats slow.—DUNN AND CO.

Manchester, Thursday. –A quiet week throughout has been the experience of sellers. English wheat repeats last week's prices, but the tendency is in favour of the buyer ; foreign descriptions are unchanged. Flour has met a slow demand all the week, and prices when tested are scarcely firm. Oats are steady. Peas show no change. Beans are slightly easier. Indian corn has gained about ½d per cental during the week.

Newark, Wednesday.—Wheat a quiet trade at last week's prices. Oats and beans repeated last week's full prices ; other grain at previous rates.

Newport, Wednesday.—Wheat firm at last week's rates. Very little trade in English wheat, millers waiting new crop. Flat maize dearer on the week ; round quiet and unaltered. Beans firm at last week's prices. Barley, 3d easier. Mill offals, slow sale ; prices unchanged. Trade quiet, demand being slow for all articles. Flour, 24s.

Plymouth, Thursday. — Market quiet. Oats, 17s 6d (Irish) ; 15s 6d (American). Maize, 22s (round) ; 21s (flat). Barley, 21s 9d ; Persian, 20s. Wheat, white, 32s 6d ; red, 30s 6d.—ORLANDO DAVIS AND CO.

Ripon, Thursday.—Oats are very scarce, and very little doing this week ; moderate attendance. Wheat, English, 29s to 30s ; ditto, foreign, 31s to 35s. Barley, grinding, 24s to 25s. Oats, 22s to 25. Round maize, 25s to 27s ; flat maize, 23s per qr. Beans, 11½d per stone.

Romford, Wednesday.—Wheat trade unchanged from last week. A very small supply. Red wheat made 30s to 31s, and white wheat 31s to 33s per qr.

St. Neots, Thursday.—There was a fair quantity of fresh thrashed old wheat on offer, for which last week's prices were asked, but the inquiry was only small, and an abatement of 6d per qr took place in some instances. –ELWOOD AND SON.

Salisbury, Tuesday. At to-day's market the supply of all grain was short, in most cases last week's prices being realised. Wheat made from 28s to 32s ; oats, 18s to 24s ; and beans, 32s to 38s. A few samples of new rye, in very fair condition, were to hand, and realised from 24s to 30s.

Scarborough, Thursday. –Small attendance. Very little grain on offer. Wheat, 28s 6d to 29s. Barley nil. Oats rather dearer on the week.

Sheffield, Tuesday.—There was a small attendance. In order to transact business a reduction of 6d per qr had to be taken for wheat. Oats firm at late rates, and beans and Indian corn retained last week's prices. Flour 6d per sack lower on the week. Quotations : —Wheat, white, 33s to 33s 6d ; ditto red, 32s to 33s per 504lb ; oats, old white, 24s ; ditto old black, 22s per 336lb ; peas, grinding, 23s to 29s ; ditto blue, 53s to 70s per 504lb ; beans, Egyptian, 34s ; ditto, English (new), 31s 6d to 32s per 532lb ; barley, grinding, 23s to 24s 6d ; ditto malting, 27s to 35s per 448lb ; Indian corn, small, 27s to 30s ; ditto American mixed, 22s 6d to 23s per 480lb.

Spalding, Tuesday.—English wheat advanced 6d per qr., selling at 29s. Trade was slow. Oats were a firm trade, at 21s to 22s per qr. Not much doing in barley. Small show of other articles.

Stockton, Wednesday.—Owing to the farmers being busy haymaking there were no samples of English wheat showing. The foreign wheat trade was very quiet, and prices showed no quotable change from last week Maize and oats were about the same.

Wolverhampton, Wednesday. — There was a small attendance, and business ruled slow. English wheat, 12s 6d to 13s per 216lb, springs 6s 3d, Duluths 6s 5d to 6s 6d per cental ; oats, 13s 6d to 14s 6d ; beans (new), 13s to 14s ; ditto (old), 15s 6d to 16s per 196lb ; flat maize, 21s 6d to 22s 3d per 480lb.

Worksop, Wednesday. –Moderate attendance and good show of wheat for the time of the year. White wheat, 29s to 30s ; red wheat, 28s to 29s ; grinding barley, 26s to 28s ; white oats, 21s to 23s ; black oats, 20s to 22s per qr.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

August has come in with somewhat unsettled weather, but the July records show what a truly remarkable period we have come through since the end of June.

	July, 1900.	Average.
Rainfall	1·20 inches	2·58 inches.
Sunshine	240 hours	166 hours.
Temperature	71 degrees	62·4 degrees.

July has below an average in its rainfall for now five consecutive years; the last wet July was in 1895. It will be seen that the thirty-one days have accumulated 266 degrees of extra heat. The Continental records show maxima of heat in the shade of 110 degrees at Seville and of 108 degrees at Vienna. These are the highest records at these cities since observations have been made. London with 93 degrees in the shade and Paris with 98 deg. on their hottest days have not quite surpassed all former experiences, as London recorded 96 deg. in July, 1891, and Paris 100 deg. in 1868. But the mean heat of the entire month was most exceptional all over Europe and the United States. The wheat shows few shrivelled grains in France or Austria-Hungary; doubtless it was the good June rainfall which saved the situation from an agricultural point of view. The wheat harvest may from to-day be regarded as really begun in Great Britain, and with fine weather it should progress very rapidly. The implement makers have risen to the situation, and the scarcity is not of machines, but of men. The want of labour, however, has itself been exaggerated.

The extreme heat in Central Europe is now said to be telling on the growing maize, which will indeed take a steady heat of ninety degrees with advantage at this time of year, but to do so requires constant watering. This, over any large area, is work that must be left to nature, and where refreshing rains do not arrive the maize soon goes off in growth. The American maize fields are of splendid promise, a good fall of rain during the last fortnight having put them in heart. This rain has alternated with forcing heat, and has not been good for the condition of the newly-harvested winter wheat. The effect on the growing spring wheat has been varied It has forced growth, but at the same time bred different fungoid and insect plagues. The reports from Canada and Manitoba do not indicate a yield of more than twelve to fourteen bushels per acre in the Dominion.

The markets of Great Britain during the past five days have been steadier in England than in Scotland. On Wednesday Mark Lane and Boston were decidedly better markets than Edinburgh and Glasgow. On Thursday Bristol, Birmingham, and Manchester were more confident than they had been on that day week, and all imported grain was held for full prices at Plymouth. The buyers of wheat took up English, American spring, and also the finer Argentine samples, but Californian, Australian, and New Zealand do not move off well, and far too much of the wheat from La Plata arrived in a dirty state, which depresses the demand and price alike.

The sales of foreign wheat for the eleven completed months of the cereal year have been as follows, and thus compare with the same period in previous campaigns:—

	Qrs.
1899-1900	13,726,000
1898-9	13,967,000
1897-8	14,041,000
1896-7	14,284,000.

It will be seen that whether it be due to increased imports of flour, increased production of English wheat, or diminished consumption of bread, the yearly "tribute" to the foreigner for food in the form of wheat has diminished.

The imports of flour for the eleven months witness to an increased demand as compared with three years ago, but a reduced inquiry by comparison with last year.

	Sacks.
1899-1900	7,956,000
1898-9	8,323,200
1897-8	7,512,000
1896-7	7,493,009

Sales by English farmers are not easy to reckon, as the vigilance of 196 local inspectors is not a fixed quantity, and the ratio of the 196 statute markets to the 304 markets whence no returns are demanded is constantly varying. The usual estimate gives the following figures for the eleven completed months of the harvest year:—

	Qrs.
1899-1900	7,005,000
1898-9	7,520,000
1897-8	5,887,000
1896-7	5,404,000

The eleven months have managed on a total supply of about 27,360,000qrs. of breadstuffs, and if we reckon 2,280,000qrs. for August requirements we shall have a total of 29,640,000qrs. for the cereal year. This is in very close correspondence to the estimates both of supply and demand which were formulated a year ago.

Last week's supplies were:—

	Qrs.
Foreign wheat	269,000
Foreign flour	140,000
Total imports	409,000
English wheat	74,000
Breadstuffs	483,000

The stocks in granary on August 1 were thus estimated:—

	Qrs.
August 1, 1900	2,412,000
,, ,, 1899	2,175,000
,, ,, 1898	880,000
,, ,, 1897	1,510,000

These figures infer that food wants, including seed, are distinctly under thirty million quarters per annum, for at a rate of 29,640,000 quarters stocks at least are not diminished on the twelvemonth.

The imports of spring corn have been as follows for the week:—

	Qrs.
Maize	223,000
Barley	40,000
Oats	210,000

The receipts of maize and oats are large, but of barley singularly small. The supplies on passage on August 1 were as follows:—

Wheat	1,997,000 qrs.
Flour	328,000 sacks
Maize	740,000 qrs.
Barley	160,000 ,,
Beans	9,000 ,,
Linseed	140,000 ,,
Cottonseed	18,000 tons

The wheat comprised 915,000 qrs. of Californian, 440,000 qrs. of Argentine, and 210,000 qrs. of North American; the flour 300,000 sacks of American; the maize 410,000 qrs. of American and 225,000 qrs. of Argentine; the barley 100,000 qrs. of Californian and 40,000 qrs. of Persian; the beans 4,000 qrs. of Egyptian, and the linseed 80,000 qrs. of Indian. All the cottonseed now on passage to this country is Egyptian.

Total linseed shipments for the seven completed months of 1900 are thus returned by comparison with the same period of the two preceding seasons:—

	Qrs.
Jan. 1-July 31. 1900	2,671,000
,, ,, 1899	3,021,000
,, ,, 1898	2,464,000

American exports for the American crop year ending July 31 are thus estimated. The figures are subject to revision, but the main totals are sufficiently reliable to form a guide. The totals are in each case in bushels:—

Breadstuffs	151,000,000 bushels
Maize	209,000,000 ,,
Oats	44,000,000 ,,
Barley	24,000,000 ,,
Rye	2,359,000 ,,

The exports of breadstuffs and of rye have been below the average, but those of maize and oats have been extremely heavy, and in the case of oats they form a new record or maximum. The shipments of barley are not very heavy in themselves, but appear heavy by comparison with the previous crop year, when less than four million bushels altogether were exported.

In the spring corn trade English and Scotch oats are in request, but the sales all over the country probably do not exceed 10,000 qrs. a day at this season, there being scarcity of old crop everywhere, and in many counties practical exhaustion of reserves. The sales at the statute markets have dwindled to less than 800 qrs. per diem, but the oat returns have always been small, and do (it is usually reckoned) not exceed one-twelfth of the business done for the whole of the United Kingdom. The price paid for old black oats, 336lb. to the qr., is a full 22s. There have been some arrivals from the White Sea, the first of the present season, and 16s. has been asked. As, however, the weight does not exceed 304lb., 15s. 6d. is the best offer from buyers. The pulse trade is not so inert as usual at this season — in fact, for maple peas there is a good sale, and Canadian are by no means neglected. Wisconsin grows some beautiful peas, the price of which at our ports is 46s. to 49s. per quarter, and there are also some excellent peas grown in South Australia and New Zealand. These when imported into England fetch 40s. without difficulty. Maize and barley prices are little if at all changed from July 28.

Offers for August shipment from America come lower for the chief Minneapolis makes of flour, and this naturally weakens the spot trade. The holders of London made flour ask former prices, but find them by no means easy to obtain. Country flour keeps steady in request, and value is certainly no lower on the week.

THE BALTIC.

Wheat cargoes were weak on July 31, but steady on August 1, and the close before the holiday was firm. Sales include Walla Walla at 28s. 6d., hard Duluth at 31s. 10½d., hard Manitoba at 32s., No. 2 hard Winter at 28s. 9d., New Zealand at 30s., South Australian at 31s., fine Californian new crop, August shipment, at 31s., No. 1 Northern, prompt shipment, at 31s., Odessa Ghirka at 30s., Taganrog at 29s., and Argentine at 28s. per qr.

Maize is a quiet trade, but 22s. has been paid for a cargo of Roumanian, 18s 6d. for American, and 20s. 3d. for fine yellow Argentine.

Barley has made 17s. 3d. for a cargo from Persia, and 19s. for one from the Lower Danube. A cargo on passage from Caucasia (Novorossisk) has made 17s. 9d., and one from Syria (Gaza) found a buyer on Wednesday for 25s. 6d. per qr. Oats have been steady. A cargo on passage from the Euxine has made 14s. 6d., while two cargoes of Canadian have made 15s. 6d. and 15s. 1½d. respectively. Other cargo sales since August came in comprise Saida beans, on passage, at 30s., newly arrived Calcutta linseed at 53s. 9d., and white Canadian peas for September shipment at 27s. 9d. per qr.

The following is a table of the grain and seed-laden vessels due to arrive within a week:—

GRAIN AND FLOUR FACTORS' REPORTS.

Wheat: A quiet market, without change in prices. Flour has been in quiet demand, and no quotable change is made in values of either foreign or home milled brands. Maize has been in moderate demand, but sellers of mixed American held steadily at late rates. River Plate firm at full prices. European steady, without change. Barley quiet for malting, but steady at full prices for grinding owing to scarcity. Beans a fair trade at the quotations. Peas quietly steady at last Friday's prices. Oats steady for British, but quiet for foreign. Oatmeal quiet, unchanged. Oilcake a slow business, and frequently 2s. 6d. per ton easier.—ROSS T. SMYTH, Liverpool, August 1.

LATEST MARKETS.

CORN.

Mark Lane, Friday.—This morning's market was extremely restricted, but the trivial business passing showed no material change in prices, which kept generally steady during the day. Old home-grown wheat remains unaltered while new samples are now awaited with interest. Good red 31s 64 lb delivered. American in moderate supply, and holders are not pressing at present. No 1 Northern Spring quoted at 32s ex ship. To induce business in flour consumers would be favoured, but neither English nor American were actually altered, remaining much the same as last Friday. American first patents about 25s 6d to 27s 6d per sack ex store. Persian barley still supplies the same wants respecting grinding, at 17s 9d ex ship; 18s ex quay. Oats 3d lower for American. White clipped, 15s 6d ex quay, 38lb. Russians scarce. Flat maize 3d easier since last Wednesday. Mixed American, 19s ex ship. The market for beans and peas calls for no mention. Arrivals of grain this week:—English and Scotch wheat, 1,440 qrs.; foreign wheat, 102,790; barley, 360; oats, 97,120; peas, 2,590; beans, 690; maize, 21,530 qrs.; flour, 8,410 sacks.

Derby, Friday.—Small attendance and little doing. Wheat unchanged in value. Wheat, whits, 32s 6d to 33s; red, 31s 6d to 32s.

Leeds, Friday.—With a further downward tendency in values of American wheats, millers still confine their purchases to pressing wants. There is little business doing, without any material change from Tuesday's prices, either for English or foreign flour and oats. Barley, maize, beans, and peas all firmly held.

Lincoln, Friday.—Small supply of English wheat. Trade steady, at last week's rates. Reds, 29s to 30s; whites, 30s to 31s. Foreign wheats quiet. Oats made full money—black, 19s to 20s; white, 20s to 21s. Maize, peas, and beans firm.

Liverpool, Friday.—Wheat moderate trade at full prices. Californian, 6s 2d to 6s 3d. Flour, oats and meal small business without change. Maize, old mixed American, 4s to 4s 2d; new, 3s 10½d to 3s 10¾d; Yellow Plate, 4s 7d to 4s 7½d; Yellow Cinquantina, 5s 11d to 6s; Odessa, 4s 9½d to 4s 10½d. Peas, Canadian, 5s 7d; Saidi beans, 28s 3d to 28s 6d per qr. There was rather a poor attendance.

Wakefield, Friday.—Small attendance at market. Wheat steady at last week's price. No alteration in feeding stuffs.

CATTLE.

Islington,, Friday.—Supplies this morning were of good extent, but trade ruled slow. Beef, however, remains firm. Scotch beef quoted 4s 2d to 5s; English, 4s to 4s 2d; American, Deptford killed, 3s 10d to 4s; Liverpool, 3s 10d to 4s; American refrigerated, hindquarters, 4s 2d to 4s 6½; average, 4s 4½; seconds, 4s; forequarters, 2s 10½d to 3s; average, 2s 11d; New Zealand hindquarters, 3s to 3s 2d; forequarters, 2s 2d to 2s 4d. Mutton: Scotch, 5s 2d to 5s 6d; English wethers, 4s 8d to 5s; ewes, 3s 4d to 3s 8d; Canterbury, 2s 4d to 2s 7d; Wellington, 2s 3d to 2s 6d; Sydney and River Plate, 2s 2d to 2s 4d. Lamb: English, 5s to 5s 8d; New Zealand, 2s 10d to 3s 2d. Veal (English and Dutch), 3s 8d to 4s 4d. Pork: English, 3s 6d to 3s 10d; and Dutch, 3s 1d to 3s 6d per 8lb.

POULTRY AND PROVISIONS.

Smithfield, Friday.—Heavy supplies were offered this morning, and met a slow demand, prices ruling lower. Quotations.—Fowls: Yorkshire, 2s 3d to 2s 9d; Essex, 2s 6d to 2s 9d; Boston, 2s to 2s 4d; Surrey, 2s 9d to 3s 6d; Sussex, 2s 6d to 3s; Irish, 1s 6d to 2s 3d; Welsh, 2s to 2s 6d; Aylesbury ducklings, 2s 9d to 3s 3d; country ducks, 2s to 2s 6d; goslings, 4s to 5s; Egyptian quail, 10d to 1s 3d; Bordeaux pigeons, 10d to 1s; feathered, 7d to 9d; tame rabbits, 10d to 1s 3d each; Australian, 6s to 7s 6d per dozen; venison, haunches, 18s to 21s each; ditto forequarters, 3d per lb.

FRUIT AND VEGETABLES.

Stratford, Friday.—There was a good supply of vegetables on offer at market this morning, and, with a fair attendance of buyers, an average trade was done at late rates. Prices:—Potatoes: English, kidneys, 70s to 95s; ditto Hebrons, 95s to 100s per ton; Dutch rounds, 2s 6d to 3s; ditto kidneys, 2s 9d to 3s per bag. Green peas, 2s to 2s 3d per sieve, and 3s to 5s per bag; broad beans, 2s to 2s 6d per bag; running beans, 5s to 5s 6d per sieve; mustard and cress, 1s 6d to 2s 6d per doz punnets; lettuces, 4d to 9d per score; cucumbers, 1s 3d to 2s 6d per doz; horseradish, 13s to 16s per dozen bundles; Egyptian onions, 3s 6d to 4s per bag; Valencia ditto, 5s 3d to 5s 6d; and Oporto ditto, 5s 6d to 5s 9d per case; carrots, 9d to 1s 6d, onions, 2s to 2s 6d; leeks, 2s to 2s 6d; parsley, 1s 6d to 2s; and mixed herbs, 3d to 3s 6d per dozen bunches; tomatoes, 4s to 5s per dozen lb; vegetable marrow, 2s to 3s per tally; English apples, cooking, 1s 9d to 2s 3d; and dessert, 2s 6d to 4s 6d per half sieve; gooseberries, 1s to 1s 3d; cherries, 3s 6d to 6s; plums, 3s to 4s; greengages, 4s 9d to 5s; red currants, 2s 6d to 3s 6d; and black currants, 7s to 7s 6d per half sieve.

London, Thursday.—Haricot beans; the new Hungarian crop opened for September shipment to London at 37s to 38s for parcels of 100 qrs and upwards. Italian new crop was offered at 41s to 42s for small and 46s to 47s for large. Demand is expected to be better after the holidays.

SEEDS.

London, Wednesday.—Messrs. John Shaw and Sons, seed merchants, of Great Maze Pond, Borough, London, report a thinly attended market, with almost a complete absence of business. New English trifolium is in moderate supply, and meets as yet with only a small inquiry. The French are reported to have been buying yearling cloverseed from America. New mustard and rape seed are now offering, and this year's thousand-headed kale is also selling. New home-grown rye is wanted. The bird seed trade is quiet, but firm. There is no alteration this week in either blue peas or haricot beans.

LONDON TERM MARKET.

This market is held twice a day at South Sea House, and is open to elected members only. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 cwts.

The name of the month stands for guaranteed delivery (if required) on or before the last day of that month, and the following have been the prices per cental recently made:—

Wheat.—		Aug.	Oct.	Dec.
		s. d.	s. d.	s. d.
July 30	noon	6 7	6 8	6 9
	4 p.m.	6 7	6 8	6 9
July 31	noon	6 6	6 7	6 9
	4 p.m.	6 6	6 7	6 9
Aug. 1	noon	6 6	6 7	6 8
	4 p.m.	6 5	6 7	6 8
Aug. 2	noon	6 5	6 7	6 8
	4 p.m.	6 5	6 7	6 8
Aug. 3	noon	6 5	6 7	6 8

Maize futures have made 4s. per cental for Sept. and Oct. delivery.

The Term Market standard wheat is No 1 Northern Spring American sold on the Duluth certificate. Other sorts of wheat can be bought at the above prices plus or minus agreed difference between the other sort and the standard quality. Quotations are by the "true hundredweight" or cental of 100lb. We do not give fractions of a penny per cental. Delivery is understood as being guaranteed on or before the last day of the month named in the quotation. The maize quoted on the Term market is flat grain from the United States.

LIVE STOCK AND MEAT TRADE REVIEW.

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

Trade in London.

The trade for fat beasts at Islington for both prime and second quality on Monday opened firmer and steadier at a slight advance in value, but later in the day, because of a slower nature at less money, a clearance being more or less forced. As usual at this season of the year, the majority consisted of consignments from the Midland Counties, chiefly Herefords and Lincoln Shorthorns. From Ireland we note the first consignment of beasts from Dublin, which were of very good quality, mostly consisting of polled cattle. Though fat butchering cows were in light supply, rates ruled lower by fully 2d. per 8lbs. owing to a smaller attendance of country buyers. Fat bulls must also be written lower, whilst for rough cattle there was but little demand. At the foreign cattle market there was up to Thursday a decline of over 2,000 head compared with last week. Here trade ruled dull and dragging, rates ruling in favour of the buyer, a clearance on each market day being more or less forced. The total number of beasts offered for sale on both markets up to and including Thursday was 4,562, consisting of 1,170 British and 3,392 foreign, these latter comprising 1,780 from the United States and 442 from Canada. The following were the top rates paid per 8lbs. (sinking the offal): - 90-stone Herefords, 4s. 10d. to 5s.; 100-stone ditto, 4s. 9d.; 95-stone runts, 4s. 9d. to 4s. 10d.; 80-stone Devons, 4s. 10d.; 90-stone Norfolks, 4s. 6d. to 4s. 8d.; 90-stone Irish (Dublins), 4s. 8d.; 100-stone Lincolns, 4s. 6d.; 110-stone ditto, 4s. 2d. to 4s. 4d.; 90-stone States, 4s. 3d.; exceptionally, 4s. 4d.; 95-stone Canadians, 4s.; 100-stone fat cows, 3s. 10d.; 100-stone fat bulls, 3s. 2d.; With regard to the sheep trade, both wethers and ewes, rates were firm and steady, especially the latter, which on both market days cleared early. Lambs on Monday were dearer by 2d. per 8lbs., but on Thursday not only met a slower sale, but ruled fully 6d. per 8lbs. in favour of the buyer. The foreign trade is not worth noting. The total number of sheep and lambs penned on both markets was 12,890, consisting of 12,650 British and 240 Canadians. The following were the top rates paid per 8lbs. (sinking the offal):—7½ to 8 stone Downs, 6s.; 8 stone Scotch, 6s.; 9-stone Downs, 5s. 10d. to 6s.; 10-stone Downs, 5s. 8d.; 10-stone half-breds, 5s. 6d. to 5s. 8d.; 10-stone Irish, 5s. 4d. to 5s. 6d.; 11-stone Lincolns, 5s. 2d.; 8 to 9 stone Canadians, 4s.; 10-stone Down ewes, 4s. 6d.; 5-stone fat lambs, 6s. 8d. to 6s. 10d. on Monday, and 6s. 4d. on Thursday. The calf trade with a smaller supply, numbering 120, ruled firmer, at an advance of fully 2d. per 8lbs., the best making 5s. 4d. Pigs, owing to the cooler weather, made more money, small breeds being quoted at 4s. 4d. per 8lbs.

Trade in the West.

With the advent of much cooler weather on Wednesday, following on a welcome rain, which seems to have been pretty general in this part of the country, trade, which at the beginning of the week rather favoured buyers, assumed a much firmer tone, and prices generally had an upward turn, fat beef, mutton, veal, and pork all participating to a greater or less extent, good class mutton at Wimborne making ½d. to 1d. per lb. more money, and beef was proportionately dearer, the beef steers and heifers again touching 11s. 6d. to 12s. for the best grades, whilst choice weights in wether mutton realised fully 8½d. Lamb is again in active request (for the holiday season) at 10d. to 11d. for best Downs and cross-breds. Veal is also in considerably improved request at extreme values; and all the better qualities of fat pigs are selling exceedingly well, after the check business received an outcome of the phenomenally hot weather which has been experienced; best neat weight porkers now sell at 9s. 6d. to 11s., with a quick trade at the price. The cooler weather since the rain also imparted considerably more life to operations in store stock, barreners being the first to benefit from the rainfall, best young, well-fleshed bullocks commanding a very free sale at from £24 to £30 per pair. Milch beasts continue to bring high rates, especially the younger class of beasts, which are in eager request at from £17 to £21 each. Store sheep, which were a quieter trade at Weyhill and other fairs, are also benefitting from the rain, which has in many places assured the root crop, the plant having greatly benefited, as the rain came at a critical moment when considerable breadths were beginning to flag under the tropical heat, which has so greatly jeopardised the chances of a good crop since the weather set in so scorchingly hot, and causing a great check to vegetation of all kinds, except on the strongest lands. The outlook now is most encouraging all round.

Trade in Scotland.

John Swan and Sons, Limited, give the following as their report on above for current week. The supplies of fat cattle on offer this week have been fully an average, but the quality generally has not been so good as of recent weeks. The best descriptions of fat bullocks have met a very good demand, and for these very high prices have been got. The majority of cattle offered, however, not being the best quality, have been cheaper, reductions of from 1s. to 2s. per cwt. live weight being taken. Fat cows and bulls have not been quite so dear. Supplies of fat sheep and lambs have been large and good. A steady demand has been experienced throughout, but any alteration in price would favour the buyer. Fat calves a large show and have sold well, while pigs, also more numerous, have met a considerably dearer market. In the Store market, sheep have been offered in much larger numbers, and the trade has been rather quieter. Lambs, however, are shown in much better condition, and prices are considerably above those of last year. Fair supplies of store cattle have been more sought after, and an easy clearance has been effected at satisfactory prices to the exposer. Milch cows have again been offered in small numbers, and they have met a good trade at as nearly as possible last week's prices. Quotations:—Top price best beef from 8s. 9d. to 9s. 3d. per stone; current from 8s. to 8s. 9d. per stone; mutton from 8d. to 9d. per lb.

LONDON.

London Central, Wednesday.—Beef was firm; mutton was rather quiet. Beef: Scotch, short sides, 4s 8d to 5s; exceptionally, 5s 2d; long, 4s 2d to 4s 6d; English, 4s to 4s 2d; American Deptford-killed, 3s 10d to 4s; Liverpool, 3s 10d to 4s; American refrigerated hindquarters, 4s to 4s 2d; forequarters, 2s 8d to 2s 10d. Mutton: Scotch, 5s 4d to 5s 8d; English wethers, 4s 8d to 5s 4d; ewes, 3s 8d to 4s; English lamb, 5s 4d to 5s 8d. Veal: English and Dutch, 3s 8d to 4s 4d per 8lb.

Islington, Thursday.—Only a moderate number of beasts, and although consisting for the chief part of fat bullocks and rough cattle, trade ruled generally steady. Sheep entries were heavy, and a slow demand prevailed for both wethers and ewes, prices, however, remaining without appreciable change. 7½ to 8-stone Down wethers quoted 5s 10d to 6s; 9-stone, 5s 10d; 10-stone half-bred, 5s 4d to 5s 6d; 10-stone Down ewes, 4s 4d to 4s 6d; 11-stone half-breds, 4s to 4s 2d. Lamb trade dull, and rates 2d per 8lb lower. 5-stone fat Downs, 6s 2d to 6s 4d; 6 stone, 5s 8d per 8lb to sink the offal. Calf trade about steady.

COUNTRY.

Ashford, Tuesday.—Beef sold slowly at about late rates of 12s to 12s 6d per score for prime beasts, and 11s to 11s 6d for good average quality. Mutton fell off later to last week's rates. Half-bred wethers made up to 5s 4d per 8lb; and Kent up to 5s 2d. Lamb was cheap on the whole, although a sale was recorded at 9½s 6d a head, or nearly 7s per stone. Veal made 4s 6d to 5s per 8lb; and pork, 9s to 9s 6d per score.

Basingstoke, Wednesday.—At Raynbird and Sons' saleyard there was a good attendance of buyers to meet a supply of 43 fat beasts, 91 calves, 665 fat sheep and lambs, 117 pigs, and 108 head of dairy and store cattle, for which the following prices were realised:—Fat beasts, £14 to £21 15s; fat calves, 65s to £3 10s; small, 15s to 45s; fat wethers, 37s to 54s 6d; fat ewes, 34s to 38s; fat lambs, 31s to 45s 6d. There is no fresh feature in the trade for fat beasts, all the prime lots of moderate weights meeting a good trade. For extra fat and inferior cattle there is not much enquiry. A clearance nearly made. Prime Devon steers made up to £21 15s; Shorthorn steers, up to £18 10s; heifers, £18 10s; cows, £19; bulls, up to £19. Polled Angus cows, £15. Prime quality fat young sheep and choice sucking lambs were readily sold at last week's full prices, overfed sheep, old ewes, and inferior sheep and lambs were worse to sell. A clearance made. Hants Down wethers and ewes made 43s 6d, 52s, 54s 6d, 54s, 46s, 41s, 41s 6d, 40s 6d, 43s, 44s 6d, 50s, 49s, 42s; 19-months old ditto, 49s, 50s, 36s 6d, 44s, 42s 6d; 7-months old lambs, 37s, 32s, 40s 6d, 45s 6d, 44s 6d, 32s 6d, 45s, 29s, 38s, 42s 6d; Southdown lambs, 33s; 3-months old sucking lambs, Southdowns, 33s; Southdown and Exmoors, 30s; Exmoors, 31s 6d; old ewes, 34s, 37s 6d, 36s 6d, 35s, 34s 6d, 38s; Southdown wethers, 32s 6d; black face Scotch wethers, 35s 6d, 28s 6d. Prices ruled brisk for all best class milch cows and heifers. Store cattle with little inquiry met a slow trade. Fat calves of all descriptions made more money, a clearance being effected. Fat porkers were a short entry and were disposed of at satisfactory prices. Store pigs met a ready sale. Ruling values:—Prime Devon beasts, 7d to 7½d per lb; ditto Shorthorn ditto, 6½d to 7d per lb; bulls, cows, and inferior beasts, 5½d to 6d per lb. Best quality sheep, 8½d to 9d per lb; second ditto, 7½d to 8d per lb; old ewes, rams, and inferior, 5½d to 6½d per lb; 3-months old choice fat sucking lambs, 9d to 9½d per lb. Fat calves, 6d to 8½d per lb. Fat porkers up to 9s 6d per score.

Boston, Wednesday.—Very few buyers were present, and trade was consequently slow. No beef on offer, and only a few in-calvers. Cows, £18 to £22; heifers, £15 to £18; calves, 55s to 60s. Small show of sheep.

Bristol, Thursday.—There was a moderate supply of beef, for which trade was slow. Best qualities made 63s, second qualities 60s per cwt. There was a short supply of sheep and lambs, and trade was firmer. Light wethers were 8d to 8½d, ewes 6½d, and lambs 8½d to 8¾d per lb. Six hundred pigs were on offer, baconers making 9s 6d per score, porkers 9s 9d to 10s. Scarcely any store cattle were on offer.

Cambridge, Monday.—The stock exhibited for sale at this market and the prices obtained were as follows:—Beasts, 235; sheep, 944; pigs, 448; horses, 8. Beef, 6s 9d to 7s 9d per stone; mutton, 4s 4d to 5s 8d; pork, 5s to 6s 3d. Very few store beasts to hand, trade slow. The harvest caused a small attendance. Fat beasts a good show, prices unchanged. Fat sheep, trade quite up to last week. Stores a much larger show, but trade was not very brisk. Fat pigs, a good number to hand, prices unchanged. Stores, a fair trade all round.

Chester, Thursday.—Good supply of all descriptions of stock, with large attendance of buyers. Trade was dull, only the best classes being in demand, even reduced rates failing to attract purchasers. Milch cows, £14 to £20; calvers, £12 to £18; barrens, £9 to £18; heifers, £8 to £14; stirks, £5 to £9; sheep, 22s. to 27s.

Derby, Tuesday.—There was a moderate supply of stock, and the following prices were realised:—Beef, 6½d to 6¾d; mutton, 7d to 8d; veal, 6d to 7d; lamb, 8½d to 9d per lb.

Doncaster, Tuesday.—Good supply of cattle, and fully an average supply of sheep. Trade fairly active, but at a slight reduction in price. Beef, 7s to 7s 9d and up to 8s per stone; ewes, 5½d to 6d; shearlings, 7d to 8d; lambs, 8d to 9d per lb.

Dublin, Thursday.—Numbers in market: Beasts, 2,436 (increase 83); sheep, 10,694 (increase 432); calves, 45 (decrease 22). More animation prevailed in the cattle department owing to the presence of some additional buyers, but prices cannot be quoted any better, and rough descriptions did not clear. Quieter trade prevailed for sheep and lambs, best qualities only making last week's prices. Cattle (best), 34s to 35s per cwt; other descriptions, 27s to 31s per cwt. Mutton, 5d to 7d per lb. Lambs, 13s to 34s each.—GANLY, SONS, AND CO.

Dumfries, Wednesday.—Beef in good demand, making 35s to 37s per live cwt; horned bullocks, to £18; horned heifers, to £15 15s; polled bullocks, to £15 12s; ditto heifers, to £15 17s; Ayrshire cows, to £14 10s; Ayrshire heifers, to £13; sheep, half-bred hoggs, to 40s 3d; lambs, to 33s 3d.

Glasgow, Wednesday.—Sheep liberally offered. Values easier. Top mutton, 8½d to 8¾d; secondary, 7¾d to 8d; lambs, 8¾d to 8¾d per lb. Top Scotch cattle, 68s to 70s; secondary, 62s to 64s; Irish, 60s to 62s per cwt. States and Canadians are the finest offered in Glasgow for years, and realised 56s to 60s per cwt. Dead meat slow; States beef, 5½d to 6d per lb.

Hereford, Wednesday.—Return of stock brought to the cattle market this day:—Bullocks and cows 346, calves 116, sheep 1,277, lambs 949, pigs (fat and sows) 4, sucking pigs 18, pigs (stores, not more than ten) 142, pigs (stores, more than ten) 126, colts 10.

Newcastle, Tuesday.— Large supplies, prices steady. Numbers:—Cattle, 1,465; sheep and lambs, 10,235; calves, 674; pigs, 547. Prices (sinking the offal):—Beef, 5s 6d to 5s 9d per stone; pork, 5s to 7s 9d per stone; mutton, 6½d to 8½d; lamb, 8d to 9½d; veal, 5d to 8d per lb.

Newport, Wednesday.—Good supply except lambs, which were very short. Good all-round trade. Best beef, 6½d; seconds, 5¾d to 6d. Best wether mutton, 7¾d to 8d. Lamb, 8d; ewes, 6¾e to 7d. Veal, 7d to 9d. Porker pigs, 10s 3d to 10s 6d.

Preston, Wednesday.—Good attendance and very large supplies of stock, but trade was quiet all round. Beef, heifers and bullocks, 6¾d to 7d; cows and bulls, 5d to 6d. Mutton, hoggs, 8d to 8¾d; tups and ewes, 6d to 7d; lambs, 8d to 8½d. Calves, 5½d to 6½d. At market: 270 cattle, 2,630 sheep, and 110 calves.

Romford, Wednesday.—Trade was a trifle better all round. Best fat beasts made 4s 4d to 4s 8d, and middlings 4s to 4s 2d per stone. Sheep were in rather short supply. Best sheep made 5s 8d to 6s, and middlings 5s 2d to 5s 6d per stone. Ewes were a slow trade at 4s 4d per stone. Calves, in rather short supply, made from 5s to 5s 6d per stone. No store beasts on offer. The pig trade was about the same.

Salford, Tuesday.—There was a slight decrease in the number of cattle in market. A fair demand was experienced at last week's prices. The supply of sheep and lambs was larger. Choice sheep met with a good demand and late rates were maintained. The trade for lambs was fairy good at about late prices. The supply of calves was about the same as this day week, with a slow sale at unchanged prices. Quotations: Cattle, 5d to 7½d; sheep, 6½d to 9d; lambs, 7½d to 9d; calves, 5d to 7d per lb. At market—Cattle, 1,563; sheep and lambs, 17,831; calves, 154; pigs, 56.

Sheffield, Tuesday.—A very small supply of cattle, for which there was a good demand, the best quality of milch beasts making £18 to £23; secondary, £15 to £18.

Spalding, Tuesday.—In the cattle market there was a good show of beef, which made up to 8s per stone, light weights selling well. Stores fetched fair prices; cows were dear. In the sheep market, where there was a large show, mutton made 7½d per lb. There was also a large show of lambs, which fetched good prices.

Thame, Tuesday.—With cooler weather and a large attendance of buyers trade was decidedly firmer all round, especially for mutton and lamb, and a clearance was effected at improved prices. Mr. Bond's sale comprised 98 fat beasts and down calving cows, 275 fat sheep and lambs and stores, 60 fat and weaning calves, and 88 fat and store pigs. Fat bullocks made £16 to £17 10s; fat heifers, £14 to £21 10s; down calving cows, £17 10s to £21 10s; fat wethers, 47s to 52s; fat ewes, 35s to 48s 6d; fat lambs, 31s to 43s 6d; store lambs, 24s to 25s 6d; fat calves, £3 to £5 1s; cow calves, 28s to 60s; bull calves, 17s to 49s; fat pigs, 10s per score. Stores a better trade.

Wakefield, Wednesday.—There was a small attendance of butchers, and owing to the hot weather they bought sparingly. Choice beef was very scarce, and sold at 6¾d to 7d per lb, inferior sorts, including a large number of Scotch cows, were freely offered, and made 5½d to 6½d per lb. Of the 1,394 fat beasts on offer a large proportion were useful Irish animals. There were 4,564 sheep and lambs, against 4,532 last week. Lambs and choice small and young sheep met with a good inquiry at 8d to 9d per lb, strong sheep 7d to 7½d, and heavy and fat sheep moved off slowly at 5½d to 6½d. Fat calves met with a slow sale at 5d to 7d per lb, and breeding calves sold at 20s to 25s each. Milch cows were very freely offered, but buyers were scarce, trade heavy, and prices about £1 per head lower. The best milkers sold at £18 to £21 10s each, and inferior £13 to £17.

Wakefield, Wednesday.—Business was slow and dragging this morning There were 1,394 beasts, and these made up to 7d per lb for superior stuff; 4,564 sheep were penned, and these moved very slowly at last week's rates. The trade in calves ruled slow, the 51 on offer being cleared up to 7½d per lb.

Wolverhampton, Wednesday.—Beasts a fair supply, moderate trade. Sheep a good supply, slow demand. Lambs good show, fair trade. Calves a small supply. Milch cows a large supply, price a little cheaper, fair demand. Beef, 5½d to 7d per lb; mutton, 6d to 8½d per lb; lamb, 7¾d to 8¾d per lb; veal, 6½d to 8d per lb. Bacon pigs, 9s to 9s 6d per score; porkets, 9s 6d to 9s 9d per score; sows, 7s per score.

Worksop, Wednesday.—A good all-round show of stock, fair attendance of buyers, and trade on the whole brisk. Best quality beef showed a slight downward tendency, and made from 7s 9d to 8s; inferior kinds, 6s 6d to 7s per stone. Keener trade for sheep; best, 8d to 8½d; ewes, etc., 5½d to 6½d; lamb and veal, 8d to 10d per lb.

FOREIGN.

Yorkhill, Monday.—At the usual weekly sale of American cattle there were in the lairages 193 cattle landed by the Indrani (s), from Baltimore, and 106 ex Assyrian (s), from Philadelphia, which were held over from last week; also 402 cattle by the Peruvian (s), from Boston. The cattle as regards quality were rather above the average, many of the bullocks being extra fine animals, and were as good as the finished Scotch. There was a large attendance of buyers, wholesale and retail, and business during the sale was of a good character. There were not sufficient bulls for the requirements of the trade, and they met a sharp demand, and sold dear. The dead-weight quotations may be given as follows:—Best bullock, medium weights, 60s per cwt, and for really choice up to 62s; heavy prime, 58s; secondary and heavier, 57s; bulls (very dear), 53s to 55s, according to quality and finish.

Yorkhill, Tuesday.—A sale of United States and Canadian cattle was held in the afternoon, when there were penned in the sheds 356 cattle landed by the Alcides (s), from Montreal, and 511 by the Buenos Ayrean (s), also from the same port. Bullocks, as regards quality, were fully up to the average, and were in a well-finished condition. Bulls were above the average as regards quality, and were very suitable for the requirements of the trade. There was a large attendance of buyers, but trade was not so good as that ruling on Monday. The demand was slower, a fact due to the increased supplies. The dead-weight quotations may be given as follows:—Best bullocks, best medium weights, 56s per cwt; and for really choice up to 58s; secondary and heavier animals, 54s; and bulls, 52s to 54s, according to quality and finish.

HAY AND STRAW.

Leeds, Tuesday.—The business in the warehouses for hay and straw continues steady, with prices firm and unaltered. Meadow hay, 6½d; clover hay, 7d to 7½d; wheat straw, 5½d; oat straw, 5d; rye straw (retail), 7d per stone; green clover, 3d to 3½d per bundle.

Bristol, Wednesday.—Clover hay, 75s to 90s; meadow hay, 65s to 75s; straw, 45s to 50s.

BUTTER.

Tuesday.—Bedale : 1s 9d to 1s 10d per roll of 24oz. Leeds : Danish, 108s to 114s per 112lb ; Irish creameries, 100s to 104s ; York lump, 12s to 12s 9d per stone ; ditto long rolls, 1½lb, 1s 6d to 1s 7d ; fresh butter in 1lb prints, 1s per lb. Settle : 11½d to 1s 0½d per lb. Sheffield : 1s 2d to 1s 3d per lb. Spalding : 1s 2d per lb.

Wednesday.—Barnsley : 1s 2d to 1s 3d per lb. Boston : 1s 3d to 1s 6d per lb. Colne : 1s 1d per lb. Goole : 1s 1d to 1s 2d per lb. Hereford : 1s to 1s 6d per lb. Kirbymoorside : 1s to 1s 3d per lb. Knaresborough : 1s 9d to 1s 11d (wholesale), 2s to 2s 1d (retail) per roll of 24oz ; Louth : 1s per lb. (wholesale). Market Drayton : 1s 8d to 1s 4d per lb. Market Weighton : 1s 1d per lb. Masham : 1s 5d to 1s 6d per roll of 24oz. Northallerton : 1s 8d to 1s 9d per roll of 24oz. Stockton : 1s 1d to 1s 3d per lb. Uttoxeter : 1s 2d to 1s 3d per lb. Whitby : 1s 1d to 1s 2d per lb. Worksop : 1s 6d per lb. Dorchester : 11d to 1s 1d per lb.

Thursday.—Birmingham : 1s 1d to 1s 3d per lb. Brigg : 1s 4d to 1s 5d per lb. Driffield : 1s per lb. Kidderminster : 1s 2d per lb. Penistone : 1s 1d per lb. Ripon : 1s 11d to 2s 3d per single roll of 24oz. Scarborough : 1s 2d per lb. Wetherby : 1s 4d to 1s 5d per lb.

EGGS.

Tuesday.—Bedale : 12 for 1s. Leeds : Yorkshire, 9s to 9s 6d per 120 ; Irish, 7s 6d to 8s ; Danish, 7s to 8s ; Austrian blues, 5s 9d to 6s 3d ; ditto reds, 4s 8d to 5s. Settle : 14 or 15 for 1s. Sheffield : 12 or 13 for 1s. Spalding : 14 or 15 for 1s.

Wednesday.—Barnsley : 11 or 12 for 1s. Boston : 14 or 15 for 1s. Colne : 1s 6d per score. Goole : 16 for 1s. Hereford : 15 for 1s. Kirbymoorside : 14 or 15 for 1s. Knaresborough : 13 or 14 for 1s. Louth : 16 for 1s. Market Drayton : 13 or 14 for 1s. Market Weighton : 16 for 1s. Masham : 14 for 1s. Northallerton : 15 for 1s. Stockton : 11 or 12 for 1s. Uttoxeter : 1s 5d to 1s 6d per score. Whitby : 12 or 13 for 1s. Worksop : 1s 8d per score. Dorchester, 9½d to 1s per dozen.

Thursday.—Birmingham : 11 to 12 for 1s. Brigg : 13 to 14 for 1s. Driffield : 16 or 17 for 1s. Kidderminster : 12 for 1s. Penistone : 12 for 1s. Ripon : 12 or 13 for 1s. Scarborough : 12 or 13 for 1s.

FEEDING STUFFS.

London, Thursday.—Linseed.—Owing to a failure the market has been somewhat disorganised, and quotations are considerably lower. Calcutta, spot, London, is quoted 53s, passage 53s ; July-August, 52s 9d ; August-September, 52s 6d ; September-October, 52s. Hull.—Linseed continues neglected, spot and passage, Calcutta, 55s. Duluth, October-November, 48s 6d. Azov, Black Sea, September-October 49s 6d asked by by shippers. To the Continent, Bombay is quoted July-August, 58s ; January-February, 51s 3d ; February-March, 49s ; March-May 47s 9d. Calcutta to Hamburg, July-August, 54s 6d ; August-September, 54s 6d. Linseed oil is firm and prices well maintained in all positions. We quote spot, pipes, £33 10s ; barrels, £33 15s ; August, £33 10s ; September-December, £30 5s ; January-April, £27 15s to £28. Hull spot naked, month £33 5s ; August, £32 ; September-December, £28 12s 6d ; January-April, £26. Linseed cakes quiet, unchanged. London made £7 17s 6d to £8 2s 6d. Russian, £7 7s 6d to £7 12s 6d ex dock. American Westerns at £7 5s to £7 12s 6d. Cotton cakes quiet. London made £4 5s to £4 7s 6d. Rapeseed quiet, prices unchanged.—To the Continent brown Calcutta afloat to Hamburgh 40s. and to London 39s 6d. Yellow Cawnpore, July-August, is held for 44s. Brown Cawnpore, 41s. 9d. Danubian Navette, August-September, 39s 6d. Ravison to Hull, September-October, 29s. Cottonseed.—Easier in all positions, afloat London, £6 6s 3d ; July, £6 6s 3d ; August, £6 6s 3d ; September, £6 6s 3d ; October, £6 3s 9d ; November-January, £5 18s 9d. Hull quiet, easier for new crop. Spot, we quote £6 3s 9d ; August, £6 5s ; October £6 2s 6d ; November-January, £5 16s 3d. Cargoes, October, £6 7s 6d ; November, £6 5s. The import into London for the week has been nil, and since January 1st, 28,893 tons, against 18,905 tons corresponding time last year. Rape oil is rather steadier at the decline. We quote brown oil spot in barrels £28 10s ; September-December, £27 5s. Refined spot, £29 15s. Ravison oil naked spot, £26 ; September-December, £24 10s ; November-April, £24 5s. Cotton oil continues steady at the prices quoted last week. Crude spot, £22 10s ; August, £22 10s ; November-April, £18 15s. Refined spot, £24 10s to £25 10s according to make and package. Hull weak. Refined spot, £22 17s 6d ; August, £22 10s ; November-April, £18 5s to £18 10s. Tallow.—At the public sales yesterday, 1,776 casks were offered and 1,101 casks were sold, prices showing an occasional rise of 3d. Market keeps very steady. The stocks at the public wharves have increased by about 1,500 casks. —THE PRODUCE BROKERS COMPANY, LIMITED.

Hull, Tuesday.—Linseed.—The arrivals are 28,799 qrs from Archangel, 2,730 qrs from Calcutta ; total, 31,529 qrs. Linseed, throughout the week, has been steady, with a slightly firmer tone. Calcutta, arrived, is still to be had at 55s 6d. Azof and Black Sea is quoted 49s 9d to 50s for Aug-Sept, Sept-Oct 49s 3d to 49s 6d, and 49s for Oct-Nov. Petersburg, business done back to shippers at 52s, and 52s 3d July-Aug, Sept-Oct 51s the value. Riga, Libau, and Königsberg, 48s asked. American Duluth, 48s to 48s 6d. River Plate, nothing offering. Cottonseed.—There has not been much business doing in old crop, a few sales spot and passage transpiring at £6 5s, and August done £6 6s 3d, whereat still sellers. New crop has offered more freely in all positions. September Fayoumi, after £6 10s paid, has been done at £6 7s 6d, and October at £6 5s to £6 3s 9d, at which latter it offers to-day. Nov-Jan changed hands at £6 to £5 18s 9d, buyers now only bidding £5 17s 6d. Oils.—Export for the week ending 27th July, 1900.—Linseed oil : 1 Denmark, 32 France, 5 Germany, 5 Holland, 17 Norway ; total, 60 tons. Cotton oil : 3 Belgium, 5 Denmark, 11 France, 23 Germany, 28 Holland, 18 Sweden ; total, 88 tons. The market is steady. Linseed oil : 33s 6d spot, 28s 7½d Sep-Dec, 26s 1½d Jan-April. Cotton oil : 23s 3d spot, Nov-April, 18s 6d. Crude, 21s 9d spot, Nov-April, 17s 1½d. Rape oil : Black Sea naked, 25s 6d spot, first quality naked, 26s 6d spot. Oil seed cakes.—Linseed cakes are 2s 6d per ton dearer, with rather better demand. Cotton cakes are also 2s 6d per ton dearer, with a few more orders.—KEIGHLEY MAXSTED AND CO.

WATERLOO ROUND FEELING CAKES, £6 17s 6d PER TON ; WATERLOO ROUND 97 PER CENT. PURE LINSEED CAKES, £8 17s. 6d. PER TON ; WATERLOO ANGLO SHAPE 97 PER CENT. PURE LINSEED CAKES, £8 15s. 0d. PER TON ; WATERLOO 97 PER CENT. PURE EGYPTIAN COTTONSEED CAKES, £4 7s 6d PER TON. ALL F.O.R. HULL.

WOOL.

Bradford, Thursday.—Market quiet ; prices of Colonial wools are nominally steady, but actually in favour of the buyer. English wool is in very much the same condition, except for bright hoggs, which, being wanted, are firm. Mohair is very quiet. The yarn trade is depressed both for home and export, and there is a general want of confidence, and the piece trade cannot be said to be any better.

Liverpool, Wednesday.—A very fair attendance of buyers was attracted when combing wools were catalogued. Egyptians met with competition at last sales' rates, as far as yellows and whites were concerned, but colours were decidedly easier, particularly blacks, that must be called fully 1d per lb. lower. Oporto fleece sold without change, but inferiors were from par to ½d per lb. cheaper. Kassapbatchia skin was very little wanted, but what changed hands marked a slight decline. Some of the China and washed Syrian found buyers on easy terms, but very little was done with Thibet or sundries. There were not many buyers at the clothing sales, and competition ruled slow, so that compared with May auction prices, we quote washed Peruvians, which sold irregularly, par to ½d per lb. cheaper. Unwashed Lima went off without change, but greasy Chili was very little wanted even at ½d. per lb decline. A moderate turnover took place in River Plate Skin, but Morocco, Spanish, and Sundries were more neglected than usual. The transactions reported by private treaty during the past couple of months include a fair amount of washed Peruvian at steady figures for firsts, seconds, and greys, but to effect sales of merinoes less money had to be accepted ; some greasy River Plate and Chili were also disposed of on easy terms. In combing kinds the business has been restricted to moderate quantities of Egyptian, Kassapbatchia Skin, Oporto Fleece, Thibet, &c., with some East Indias as usual from importers' old stock.—RONALD AND RODGER.

Weyhill Sheep Fair.

On account of great pressure on our space we were unable to print the whole of our report of this fair, and particulars of three important consignments had to be held over until this week. Lord Carnarvon sent a good selection from his flock, but a clearance was not effected. Seven lambs let at an average of £30 9s., Mr. G. Judd hiring No. 80 at 62gs., Mr. J. B. Stevens No. 81 at 56gs., Mr. C. Bugg No. 82 at 26gs., and No. 83 at 25gs., Mr. Wells No. 86 at 14gs., Mr. W. C. Young No. 84 at 10gs., and Mr. Hanbury No. 85 at 10gs. The sale lambs made from 9gs. to 5gs., the average of those let and sold being £11 4s.

The first draft from Mr. H. C. Stephens' flock was offered by Messrs. Waters and Rawlence. Again sufficient buyers were not forthcoming to clear ; two lambs were let at 15gs. and 13gs. to Mr. C. Coles and Mr. Hall (for Lord Carnarvon) respectively. The selling lambs made 20gs. (Mr. Butler), 11gs. (Mr. Hanbury), 9gs., etc., the average of those let and sold being £7 3s.

The annual letting and sale of ram lambs from Mr. T. Palmer's Berry Court flock was conducted by Messrs. Waters and Rawlence. Six lambs were let at an average of £17 10s., Lord Rothschild hiring No. 1 at 50gs., others letting from 13gs., 12gs., etc. The selling lambs made from 21gs. to 5gs., Mr. Richards buying at the top figure, and 14gs., Mr. Hanbury at 15gs., Mr. Falconer at 14gs., Mr. Rigden (for Sir E. Antrobus) at 17gs., Mr. Cox (for Captain Dalgety) at 10gs. ; an entire clearance, however, could not be made, the average of those let and sold being £9 15s.

Smithfield Club.

A meeting of the Council was held at the Royal Agricultural Hall on Wednesday, the 1st inst., Earl Winterton (Vice-President) in the chair.

Earl Winterton said, before commencing the business of the meeting, he was sure they would all wish to express their deep sense of the loss Her Majesty the Queen and the Royal Family had sustained by the lamented death of H.R.H. the Duke of Saxe-Coburg and Gotha. They greatly appreciated the interest which Her Majesty and the members of the Royal Family took in the Smithfield Club. His Royal Highness the Duke of Saxe-Coburg and Gotha had not only been an exhibitor at the Club's shows, but had since the year 1882 been a Vice-President of the Club, and filled the position of President in 1884. The members of that Council and of the Club would, he was sure, deeply regret the sad blow which had befallen Her Majesty the Queen and the Royal Family, and he begged to move that

The Council of the Smithfield Club humbly desire to approach Her Most Gracious Majesty the Queen with the expression of their constant loyalty and affection for her throne and person.

The Council have learned with feelings of profound regret of the death of His Royal Highness the Duke of Saxe-Coburg and Gotha, and desire respectfully to convey to Her Majesty and the members of the Royal Family the assurance of their deepest sympathy in the irreparable loss which they have sustained, and the expression of their earnest hope that the Royal Family may receive consolation and strength to support them under the heavy blow which has befallen them.

Mr. James Hornsby seconded the motion, and it was unanimously adopted.

The minutes of the previous meeting were approved and signed.

A communication was received from the Duke of Richmond and Gordon, K.G., acknowledging his election as President-Elect.

Letters were read from Mr. J. Harold Howard and Mr. A. P. Turner acknowledging their election as Stewards.

The Secretary was authorised to communicate with the London County Council as the local authority, and to take any steps that may be necessary for holding the forthcoming show in accordance with the orders of the Board of Agriculture.

Mr. Clare Sewell Read, as chairman, submitted the report of the Finance Committee, recommending the payment of various accounts, and the provision of an official seal for the Club, which was seconded by Mr. Edney Hayter, and adopted.

Earl Winterton, as chairman of the Stock Prize Committee, reported the selection of judges for the forthcoming show, with reserve judges in case any of the gentlemen selected were unable to act, such list to be published when all the judges had signified their acceptance ; also the approval by the Committee of the letter of invitation, which they directed should be sent to the judges.

Mr. Alfred Crosskill reported that the Implement Committee had considered and approved of the regulations and form of application for space at the ensuing show. The Committee had also considered the requirement by the London County Council of certain passageways leading to the emergency exits, and had instructed the Secretary thereon.

The report was approved and adopted.

Mr. William Coggan, as chairman, moved the adoption of the report of the Carriage Committee, recommending that tenders be invited for carrying out certain work in connection with the Carriage Competition at the ensuing show, which was seconded by Mr. F. Redman, and adopted.

The Council then adjourned until Wednesday, November 7th.

Shorthorn Society.

Meetings of the Committees and Council were held at the Society's rooms, 12, Hanover Square, W., on Tuesday, Mr. Herbert Leney, Vice-President, in the chair.

Editing Committee.

Lord Brougham and Vaux reported that the Committee recommended that for the ensuing year the Committee consist of :—

Lord Moreton (Chairman)	Mr. C. M. Doune
Viscount Baring	Mr. A. M. Gordon.
Lord Brougham and Vaux	Col. Sir Nigel Kingscote
Mr. A. E. W. Darby.	Lord Rathdonnell (K.C.B.)

The Committee had examined and passed the list of pedigree exportation certificates issued by the Secretary since the last meeting of the Committee, viz., for Canada 192, South Africa 1, South America 119, United States of America 30, Germany 1, New Zealand 2, Tasmania 1 ; total 346.

Several new pedigrees were examined by the Committee with the certificates and other evidence in support of their correctness, and had been accepted for entry in the Herd Book.

Various inquiries as to exportation certificates were also considered by the Committee, and the Secretary instructed thereon.

The report was adopted.

General Purposes Committee.

Sir Nigel Kingscote reported that the Committee recommended that for the ensuing year the Committee consist of :—

Col. Sir Nigel Kingscote, K.C.B. (Chairman).	Lord Middleton.
Lord Brougham and Vaux.	Lord Moreton.
Mr. A. E. W. Darby.	Mr. E. W. Stanyforth.
	Sir Jacob Wilson.

That the accounts for the months of June and July had been examined by Messrs. Welton, Jones and Co., and the Committee, and were found to be correct ; that the receipts for the same period had been £128 6s. 6d., the balance of the Society's current account at the banker's being £442 5s. 8d., and the Committee recommended that cheques be drawn for various accounts, champion and district prizes, rent and salaries due at Michaelmas, amounting to £678 5s. 2d.

This report was adopted.

In compliance with the terms of the Articles of Association, Mr. Herbert Leney was, on the motion of Sir Nigel Kingscote, seconded by Mr. Richard Stratton, elected President of the Society for the ensuing year, and on the motion of Sir Jacob Wilson, seconded by Lord Brougham and Vaux, Colonel Hutton, C.B., was elected Vice-President of the Society for the same period.

The Council then adjourned over the autumn recess until Tuesday, November 6th, at 3.30 p.m.

The latest annotated time tables issued by the Great Eastern Railway Company deal with Hunstanton and Aldeburgh. In each of these pamphlets there is given an interesting account (with illustrations) of all the chief places of interest passed by the traveller to either of the towns mentioned. The possessor of a copy of these annotated time tables will have something to interest him the whole of his journey.

Doncaster August Fair.—This fair, at which horses, cattle, and sheep are disposed of, took place on Thursday, and was well attended by farmers and dealers. There was nothing new in the cattle and sheep market, trade being quiet and prices unchanged. Bullocks made from £10 to £16, and young stock from £4 to £8 each. Sheep, 35s. to 44s. ; and lambs, 24s. to 30s. each. Horses varied very much, according to quality. Good horses were easy to sell, and the best [illegible] horses made from £40 to £60, and in a few cases from £70 to £80 each. Harness horses, £35 to £45 ; nags, £25 to £40 ; and others from £20 to £30 each. Pones made from £10 to £20 each.

Chard August Fair.—At this important fair on Thursday there was a very large supply of fat and store sheep and beasts, and, owing to the copious showers of rain which fell in the early morning, trade was on all hands brisk. Prices were fully 3s. a head on sheep in advance of recent markets and fairs. Prizes were offered by the Chard Market Committee and Auctioneers, viz., for best pen of eighty draft ewes, £3 3s. ; fifty draft ewes, £2 2s. ; fifty wether lambs, £1 10s. ; and were secured by the following respectively : Mr. Vickery, Elmore, first ; and third, Mr. R. Wyatt, Foale's Court. Prices ranged from about 38s. to 45s. for ewes, lambs from 24s. to 30s., cows and calves from £12 to £16 ; heifers and calves from £8 to £13.

LIVE STOCK.

OUR ILLUSTRATIONS.

The pen of Hampshire Down ewes is the property of Mr. James Flower, Chilmark, Salisbury, who was also the breeder. At the Royal Show at York this year this pen won first prize, Mr. Flower also took several other prizes at this show with other animals from his famous flock, which, since 1894, has had a wonderful career in the showyard, having won prizes amounting in value to over £1,000.

The Clydesdale mare Queen of Gretna 12895, and her foal, which is by Scottish Crown 9851, belong to Mr. John T. Peacock, Low Newport Farm, Sunderland. Queen of Gretna is a brown, foaled in 1892, and was bred by Mr. John Ellwood, Stonehouse, Gretna, her sire being Belted Prince 8459, and her dam Lofty of Stonehouse 12458, by Nelson 1493. At the Royal Show at York she won the first prize in the class for Clydesdale mares of any age, with a foal at foot.

STOCK AND SHOW NOTES

By Herdsman.

On August 13th, the selection of the ram lambs from Mr. James Flower's noted flock of Hampshire Downs will be offered at Britford Fair by Messrs. Waters and Rawlence. The success in the largest showyards of England, and in the strongest competition, since 1894, is a wonderful one—15 champions, 68 firsts, 47 seconds, 13 thirds having been won, of the value of £1,100. Previous to 1894 very little exhibiting was done, though the flock has been in the possession of the present owner's family for nearly seventy years. The great family likeness and the true breeding in the whole flock testify to the great care and judgment which has been bestowed in bringing it up to its high state of perfection. The ram lambs this year are, it is considered, one of the best lots Mr. Flower ever brought out, possessing that wealth of flesh, the best of coats, with beauty of feature and form, for which the Chilmark flock is noted. The 100 draft ewes are a very smart lot, and should command the attention of flockmasters.

What will be looked back upon as a great event in the history of Shorthorn cattle in Ireland will take place on the 23rd inst. at Ardfert Abbey, Ardfert, co. Kerry, when Messrs. J. Thornton and Co. will dispose of the remainder of the herd bred by the late Mr. W. T. Talbot-Crosbie. It will be remembered that the young bulls, together with a few females, were sold in the spring, and the present catalogue contains, with the exception of four aged cows, which will end their days in the park, the whole of the remaining animals. As is well known, the Ardfert Abbey herd has been bred from celebrated tribes, tracing back to the earliest days of Shorthorn history, and it is not necessary for me to enter into details of the animals used, for the particulars are common property amongst breeders. I may, however, mention that last year Stephen Fitz Lavender 73732, a grandson of the famous prize bull Count Lavender, was purchased from Mr. J. Deane Willis, of Bapton, Wilts, and Beacon Light 74041, a son of the Royal prize bull Alto, from Mr. R. Stratton. These two fine bulls are now in service and for sale; they have brought into the herd fresh prize blood blended with that already bred at Ardfert; for Timbrel, Alto's great-granddam, was bred on the estate. The animals will be shown in the park in their natural condition, their calves running with them, so that those who attend the sale will have the opportunity of seeing, as well as of obtaining, the lifework of one of the greatest breeders of Shorthorns of the present time.

A stud of Shire horses having been recently established at Cirencester Park, the Earl of Bathurst has resolved to relinquish ram breeding and exhibiting, and to sell all the shearling and young ewes, rams, and most of the ram lambs, from his celebrated flock of Southdowns, the old ewes and ewe lambs being retained as a mutton flock. The sale, which will take place on Tuesday, the 14th inst., will comprise about 400 beautiful young ewes, and about 30 rams and ram lambs. The high quality of the flock, which has been bred from first-class animals only, is evidenced by the success it has met with in the showyards during the past few years. The farm is on the Cotswolds, 500 feet above the sea, and on the limestone; the flock is consequently naturally hardy, of good constitution, and very true to type. The sheep being bred on a different soil to the chalk downs of the East and South of England, are well adapted either for the purpose of introducing fresh blood or for the formation of new flocks. Messrs. J. Thornton and Co. will be the auctioneers, and the sale will commence immediately after a half-past twelve o'clock luncheon. Cirencester Park is about half a mile from the Great Western, and a mile from the Midland and South-Western Junction Stations at Cirencester.

The annual exhibition of the Worsley and District Agricultural and Horticultural Society will take place on Saturday, the 25th inst., in the Earl of Ellesmere's Park at Worsley, which is situated within six miles of Manchester, and provides one of the prettiest show grounds in England. This exhibition has been in existence a little over ten years, and from a small beginning it has grown into an important fixture, very popular with exhibitors in the North. The prizes offered are good ones, and I may add that they are invariably handed over to the winners within fourteen days after the show. The society is fortunate enough to possess a balance in the bank sufficient to more than cover its liabilities, and providing the clerk of the weather favours the show on the 25th inst., the society will in all probability be able to add something to that balance. The entries close on the 15th inst., with the hon. secretary, Mr. W. [illegible]ohn, Worsley, Manchester.

At a meeting of the members of the Cheshire Agricultural Society, held at Congleton Town Hall on Monday, a letter was read from Mr. Samuel Smith, Town Clerk of Chester, stating that at a meeting of the Chester Town Council a resolution was unanimously adopted inviting the Cheshire Society to hold their 1901 show at Chester, and that the use of the Roodee would be granted for that purpose free of charge. The letter also intimated that the Mayor intended to call a town's meeting of the citizens to arrange for the raising of a guarantee fund, and to give the society a cordial reception on their visit to the city. A resolution was unanimously adopted accepting the invitation, and thanking the Mayor and Corporation of the city.

The annual sale of Shropshire sheep, the property of Mr. W. F. Inge, will be conducted at Thorpe Hall, near Tamworth, on Wednesday next, August 8th, by Messrs. Lythall and Walters, of Birmingham. The catalogue includes thirty-one grand shearling rams and fifty beautiful shearling ewes by most impressive and fashionable sires, including Ensdon Chief 8503, purchased from Mr. Bowen Jones, at 55gs.; Harbinger 9,938, Mr. Harding's winner of fourth in pen of five, S. and W.M., and reserve number R.A.S.E., Birmingham; Noble Chieftain 10029, the winner of first B. and W. of E.; and Thorpe Enterprise 10159, the reserve number ram at the R.A.S.E., Maidstone. The rams possess true type and character, with immense scale, close, heavy fleeces, well-covered heads, and clear cherry skins, and include the third prize pen of five at the R.A.S.E. at York, the second prize pen of five at the S. and W.M., and the third prize pen of five at the Leicestershire Show, as well as other winners at the Staffordshire, Royal Counties, Nottingham, and Peterborough Shows, and all are for unreserved sale. The ewes have perfect style and symmetry, and special attention is drawn to the fact that they are sisters to the ewes which have won this season first prizes at the Royal, S. and W.M., Nottinghamshire, Leicestershire, and Peterborough Shows, and have since been sold for exportation to America.

The entire flock of pure-bred Southdown sheep, bred by Mr. John A. Hempson, Erwarton Hall, Ipswich, is to be dispersed by auction on Thursday in this week, at Erwarton Hall. This flock was founded by the present owner in 1844, by the purchase of 300 ewe lambs from the Marquis of Bristol, Ickworth Park, and Mr. Smith, of Barton, Bury St. Edmunds. Rams were hired from Mr. Jonas Webb, of Babraham, as far back as 1847, and were obtained afterwards from him for several years, until the dispersion of his flock in 1862. Rams were also used from Mr. John Ellman, of Glynde, Sussex, during that period, and later from Mr. W. Rigden, of Hove, whose sheep were remarkably successful. This blood was again strongly infused into the flock by the use of rams by Mr. Rigden's sheep, purchased from Lord Walsingham and Sir Thomas B. Lennard, Bart., from whom a sheep by Mr. Rigden's gold medal Battersea ram was obtained. Other rams followed from Mr. Hugh Gorringe, Mr. Heasman, and Mr. Hugh Penfold; also from the famous old Goodwood flock, and later from Mr. Henry Webb, at whose sale in 1890 Mr. Hempson purchased, among others, a ram by the 210-guinea ram Cambridgeshire, which was bought by the Duke of Richmond for Goodwood the previous season. In 1898 the famous sheep Persimmon was hired from Mr. Henry Webb, Streetly Hall, and good rams were used from Mr. Adeane's celebrated prize flock, which has been bred from the old Goodwood and Webb blood. Mr. Hempson has not exhibited, but he has exported both rams and ewes to France, Germany, Sweden, and Canada. The sale will commence after a twelve o'clock luncheon, and will be conducted by Messrs. John Thornton and Co., from whom catalogues, etc., can be obtained.

On Wednesday next, August 8th, Messrs. John Thornton and Co. will dispose of the entire flock of pure-bred Southdown sheep, excepting the lambs, and thirty-one Jersey heifers, the property of Sir James Blyth, Bart., at Blythwood, Bishops Stortford. The Blythwood flock of Southdowns was established at considerable cost in 1889, and is now a very celebrated one, having been most successfully exhibited at the principal shows throughout the kingdom. At the dispersion of Mr. Henry Webb's flock at Streetly Hall in 1889 and 1890, three good rams and some of the best ewes were purchased at the first sale, and in 1890 the highest-priced ram, Streetly Hall Favourite, as well as a number of good ewes were obtained, so that much of the best blood of this old flock was secured for Blythwood. Streetly Hall Favourite was a son of the celebrated sheep Cambridgeshire, bought by the Duke of Richmond for Goodwood at 210 guineas at the 1889 sale. At Sandringham the same year, twenty choice ewes were purchased, and the blood of the old-established flocks of Sir N. W. G. Throckmorton, Bart., the late Mr. J. J. Colman, and Mr. Hugh Penfold, has also been successfully introduced. The Jersey heifers to be offered, which comprise the whole of the female produce from the herd for the years 1898 and 1899, are by that well-known bull, Crown Prince 6182, the winner of the first prize at the Royal Agricultural Society of England Show, at Maidstone; others are by Actor 5776, champion bull over the island of Jersey in 1895, whose dam, owing to her large yield and rich quality of milk, was sold for a very great sum to America; Oompah 6004, first at several shows in 1896 and 1897, and Hillside Baron 6594, a son of Hillside Lad, a noted winner in the island and in this country, have also been used; in fact, for some years the Blythwood herd has consisted exclusively of the most notable prize-winners or their off-spring.

Mr. Alfred Mansell (of the firm of Alfred Mansell and Co., Shrewsbury) has just returned from Germany, where he has been attending the annual auction sales of Rambouillet Merinos on behalf of Messrs. G. Harding and Son, of Waukesha. He reports that he was fortunately able to secure some exceptionally fine specimens from some of the leading breeders who have paid special attention to wool. This will make the third shipment of Merinos by the Shrewsbury firm this season.

Messrs. Alfred Mansell and Co., of Shrewsbury, despatched from Hull on July 28th, per the s.s. "Thomas Wilson" two exceptionally well-grown, robust Shorthorn bulls, specially selected for crossing purposes, on behalf of Prince Scherbatoff.

Referring to the extensive shipment of 223 pedigree sheep on behalf of Mr. H. Miller, it comprised some of the choicest specimens of all the breeds enumerated, including Mr. Inge's 1st prize Royal shearling Shropshire ewes, Mr. Foster Harter's 1st prize Shropshire ewe lambs at the S. and W. M. Show, Mr. J. S. Harding's prize rams and ram and ewe lambs at the S. and W. M. Show, Mr. Eady's 1st prize Royal Oxford ewes, Mr. Treweeke's Royal winning Oxford ewe

lambs, Mr. Reading's 1st prize Royal Oxford ram lamb, Mr. Treadwell's 2nd prize Royal two-sheer Oxford ram, Mr. Flower's 1st prize Royal Hampshire ewes, Mr. Cary Cole's 1st prize Royal two-shear Hampshire ram, Mr. Houlton's Royal winning Cotswold ewes and rams, Mr. Swanwick's winning Cotswold ram lamb, a choice selection ofLincoln sheep from Mr. Deane, and splendid selection of high-class rams and ewes from Mr. J. T. Hobbs, Mr. J. Harding, Mr. A. E. Mansell, Mr. H. C. Stephens, M.P., Mr T. Gillett, Mr. C. Barton, and others. A choice selection of Dorset Horn ewes, including the 2nd prize pen at York Royal, from Mr. W. R. Flower, were unfortunately burnt to death in the transit to Shrewsbury where all the sheep were collected prior to shipment. It will be remembered that Messrs. Alfred Mansell and Co., of Shrewsbury, made all the arrangements for this extensive shipment.

Mr. E. Goodwin Preece, of Shrewsbury, advises of the following important shipments which he has recently made, the animals having been in each case selected and purchased by him :—From the Earl of Coventry, the Hereford bull, Grimm, to M. Cottard, France; from Messrs. Brand and Cobbald, Suffolk, several black Suffolk pigs to M. Jaroszynski, Russia; from Mr. Whitlock, Essex, Southdown rams, to the Countess Oavanoff, Russia; also a couple of finely-bred dairy Shorthorn bulls to Sweden. The animals shipped were in each case first-class specimens of their respective breeds, which may be relied upon to give satisfaction in their new homes.

Mr. T. S. Minton's twentieth annual sale of pure-bred Shropshire rams will take place on Thursday next, the 9th inst., at Montford, the auctioneers being Messrs. Alfred Mansell and Co. Mr. Minton's flock of Shropshires is one of the oldest extant, and traces back to the then famous stock of the late Mr. H. Matthews, at whose dispersion sale Mr. T. S. Minton became the largest purchaser of ewes, which averaged about £8 each. The continued success of the Montford Shropshires at all the principal breeding and fat stock shows illustrates the fact that valuable sires may be secured at Mr. Minton's annual sales. Among the rams to be offered this week are several of the highest breeding, calculated to suit the requirements of the most fastidious ram breeders or tenant farmers, Montford is four miles from Shrewsbury Station, and on the day of the sale conveyances will meet all the morning trains. There will be a luncheon at one o'clock, and the sale will commence at two o'clock.

Volume 11 of the Wensleydale Flock Book has just made its appearance. It contains particulars sixty-two flocks, a list of rams entered in Volumes 1 to 10, and a register of rams—Nos. 714 to 753—used in 1899. The Flock Book is published by the Wensleydale Long Wool Sheep Breeders Association and Flock Book Society, the hon. secretary of which is Mr. J. F. King, Edgley, Leyburn, R.S.O.

CATTLE.

Sale of Mr. Ecroyd's Shorthorns.

On Wednesday Messrs. J. Thornton and Co. disposed of about fifty head of pedigree shorthorns from the well-known herd of Mr. E. Ecroyd, at Low House, Armathwaite, who for the past thirty years has been a fancier of the breed. There was a fairly good attendance of buyers and a satisfactory sale resulted, the fifty head sold realising £1,439 11s. Thirty-nine cows averaged £32 8s. 4d. each, and seven bulls, chiefly yearlings and two-year-olds, averaged £24 18s. each. Two of the best bulls were reserved at high prices. Below we give particulars of the principal lots sold.

Sale of Mr. Skinner's North Devon Cattle and Exmoor Sheep.

One of the most important sales of pedigree stock that has taken place in North Devon recently was held on Thursday at Wrafton, near Barnstaple, when the herd of North Devon cattle and flock of Exmoor horn sheep belonging to Mr. C. N. Skinner, of Wrafton Farm, were dispersed by Messrs. Hawkes, Risdons, and Andrew, in conjunction with Messrs. Sanders and Son, auctioneers, of Barnstaple. The sale was necessitated on account of Mr. Skinner leaving the neighbourhood. He has been a most successful breeder for some years past, and has won upwards of 300 prizes. There was a good attendance of buyers, and a satisfactory sale resulted.

A start was made with the flock of sheep which since 1897 have been very successful at the Bath and West, Somerset County, and other South of England shows. There was a keen demand throughout, the bidding at times being very brisk. Six-tooth and full-mouth Exmoor horn ewes made 34s. to 38s.; four-tooth ditto, 41s. to 46s.; two-tooth, 38s. to 65s.; ewe lambs, 28s. to 31s.; two-tooth wethers, 37s. to 47s.; wether lambs, 21s. to 25s. 6d. Many of Mr. Skinner's best lambs had previously been disposed of. Fat Nott ewes realised from 31s. 6d. to 40s.; fat wethers (blackface), 36s. 6d. to 50s., fat wethers. 32s. to 50s.; fat lambs, 28s. to 32s. Two two-shear rams, winners of numerous prizes, made £7 5s. and £5 10s. respectively, and a winning ram lamb fetched £4 5s., while a yearling ram was knocked down at £4. Two others realised £2 each. The principal sheep buyers included Messrs. Skinner (Ilfracombe), F. Elliott (Barnstaple), May (Bridgwater), C. Dennis (Barnstaple), J. Isaac (Braunton), T. Thorne (Barnstaple), J. Huxtable (Challacombe), J. Greenslade (Barnstaple), W. Day (Ilfracombe), F. Chanter (Barnstaple), W. Yeo (Newton Tracey), T. Isaac (Combmartin), J. Reed (Braunton), Southcombe (Berrynarbor), Wallington (Basingstoke), Lethbridge, Bate (Barnstaple), Alford (Ashford), T. D. Ridd (Bratton), F. Veysey (Southmolton), Clarke (Taunton), and G. Mogridge (Ilfracombe).

The fat and grazing stock, which included twenty-two fat heifers, twelve maiden heifers, about twenty steers, ten steer yearlings, and several yearling heifers realised very satisfactory prices, the heifers making from £12 to £22 10s.

The majority of the cattle possessed the blood of the well-known bulls Rent Day 3799 and Hard Times 3281, bred by Sir W. R. Williams and sired by the celebrated prize-winning bull Pretty Middling. As in the case of the sheep, the demand was good, as the animals sold readily at fairly good prices, as will be seen from the following list of the lots sold:—

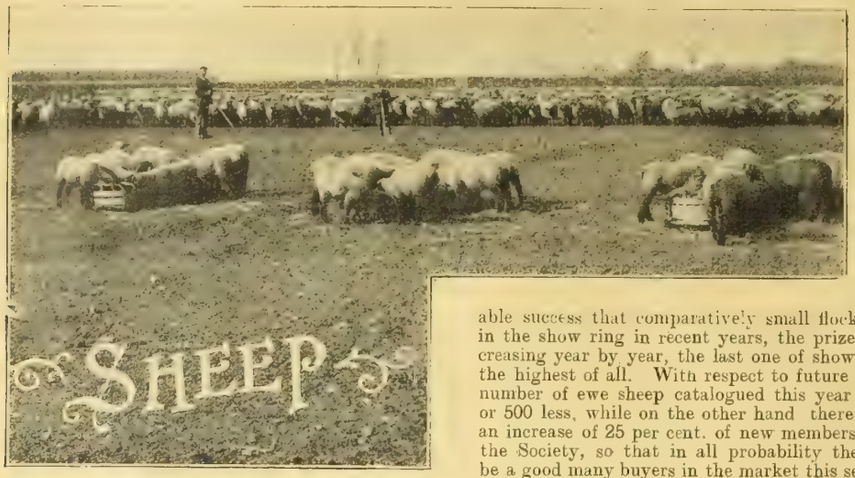
Transactions in Store Stock.

[*From the Irish Department of Agriculture and Technical Instruction.*]

Great Munster, Limerick, held on 27th July. Fair smaller than usual; good demand, and a fair clearance effected. Calves, first class, £5 5s. Yearlings, first class, £8 10s. to £10; second class, £6 10s. to £8; third class, £3 10s. to £5 10s. Two-year-olds, first class, £11 10s. to £13 5s.; second class, £9 15s. to £10 15s.; third class, £6 15s. to £8. Three-year-olds, first class, £14 10s. to £15 4s. 7d.; second class, £11 7s. 6d. to £13 2s. 6d.; third class. £10 10s. Springers, first class, £15 to £19 5s; second class, £12 10s. to £14 10s.; third class, £7 to £10. Small supply of sheep; moderate demand and a good many left unsold. Lambs, first class, £1 6s. to £1 8s.; second class, £1 1s. to £1 5s. Hoggetts, second class, £1 13s. Young pigs eight to ten weeks old sold at from 20s. to 25s. each.

There was only a small supply of stock, cattle of a rather poor class, at Clonmel Fair on Wednesday, and the demand only moderate, except for springers, which sold well. Prices: Yearlings, first class, £8 to £9; second class, £6 1s. 8d. to £7 10s; third class, £4 7s. 6d. to £5 5s. Two-year-olds, first class, £11 10s. to £13 10s.; second class, £8 10s. to £10 7s. 6d.; third class, £7 to £7 10s. Three-year-olds, first class, £15 to £15 15s. Springers, first class, £15 to £17 10s.; second class, £11 to £14. Lambs, first class, £1 6s. to £1 8s.; second class, £1 to £1 4s.; third class, 13s. to 16s. Hoggets, third class, 18s. to £1. Young pigs, eight to ten weeks old sold at from 18s. to 22s. each.

Moving Pigs from an Infected Area.—At Wolverhampton Police Court, on Thursday, Joseph Davies, a pig dealer of Flintshire, appeared to answer three charges of moving pigs contrary to the conditions of his licences from an infected area in Cheshire. The Chief Constable stated that the pigs had been moved by false pretences. Defendant used the name of Mr. A. Hollingsworth, of Wolverhampton, and had stated that the pigs were going to be taken to his premises. As a matter of fact Mr. Hollingsworth knew nothing about the bringing of the removal of the pigs. It was a great piece of superintendence on the Chief Constable's part to bring the matter before the Board of Agriculture. The defendant had rendered himself liable to heavy penalties to £100. The defendant pleaded guilty as to two charges, and it was stated that he had only recently entered on the pig-dealing trade and had acted in ignorance. He apologised for using Mr. Hollingsworth's name. The defendant was ordered to pay £20 and the costs



Duke of Northumberland's Southdowns.

A draft of 410 pedigree Southdown sheep from the Duke of Northumberland's well-known Albury Park flock was disposed of by auction at Chilworth, Surrey, on Tuesday, by Messrs. Hewett and Lee, of Guildford. There was a fairly good attendance of buyers, and satisfactory prices were realised. Shearling and six-tooth ewes made from 44s. to 55s.; full mouth ewes, 38s. to 51s.; ewe and wether lambs, 30s. to 36s.; rams from 5gs. to 10gs., and ram lambs from 2½gs. to 5gs. The purchasers included Lord Northbourne, Lord Winterton, J. Barnard Hankey, Esq. (Fetcham Park), W. Cunliffe, Esq. (Headley Court), the Exors. late Admiral Maxse (Effingham), Mr. Bishop (representing A. F. Walter, Esq., Wolsingham), E. L. Rowcliffe, Esq. (Holl Place, Cranleigh), J. R. Kelley, Esq. (Oaklands, Worplesdon), Mr. Woodcock (steward to J. P. Hodgson, Esq.), J. Ritchie, Esq. (Long Ditton), Messrs. Chitty (Leckner), Phillips (Worplesdon), G. Ellis (Dorking), Atkinson (Dorking).

Show and Sale of Shropshires at Birmingham.

The breeders' 68th show and sale of Shropshire rams and ewes was held at Bingley Hall, Birmingham, on the 26th ult., and was conducted by Messrs. Lythall and Walters. Mr. Charles Coxon, of Elford Park, Tamworth, judged, and his awards were as follows. Class 1.—For single shearling ram: 1st, Mr. M. Williams, Whiston Hall, Albrighton; 2nd, Mr. Denston Gibson, Hanbury, Leamington; 3rd, Mr. E. Nock, Sutton Maddock, Shifnal; reserve, Mr. R. P. Cooper, Shenstone Court, Lichfield; highly commended, Mr. H. Williams, Newton-on-the-Hill, Shrewsbury. Class 2.—For pens of five shearling rams: 1st, Mr. R. P. Cooper; 2nd, Mr. M. Williams; 3rd, Mr. A. Bradburne, Moat Bank, Lichfield; 4th, Mr. G. L. Foster-Harter, Puckrup Hall, Tewkesbury; 5th, Mr. Denston Gibson; reserve, Mr. E. Nock; highly commended, Mr. C. H. Jolliffe, Goldicote, Stratford-on-Avon. Class 3.—For pens of thirty shearling ewes: 1st, Mr. M. Williams; 2nd, Mr. A. Bradburne; 3rd, Mr. A. S. Berry; 4th, Mr. E. Nock; 5th, Mr. H. C. G. Parker; reserve, Mr. D. Gibson.

Mr. A. Bradburne's rams made up to 12gs., Mr. E. Nock's, up to 12gs.; Mr. M Williams', up to 33gs.; Mr. H. Williams', up to 10gs.; Mr. R. P. Cooper's 18gs., 11gs., 10gs. Mr. Denston Gibson's ewes made up to 56s.; Mr. Arthur Bradburne's, up to 55s.; the Earl of Dartmouth's, 53s., 51s., etc.; Mr. A. S. Berry's, 55s., 55s., 54s., 54s., 53s., 50s.; Mr. M. Williams', 63s., 62s., 60s.; Mr. E. Nock's, up to 50s.; and Mr. H. C. G. Parker's, up to 50s.

Several rams were purchased for exportation to Buenos Ayres and Patagonia, and three gentlemen residing in Norfolk, Dorset, and Buckinghamshire each purchased 50 ewes to found a flock.

Sale of the Ampton Flock of Suffolks.

The entire flock of 450 highly-bred Suffolk sheep, the property of Mr. G. Arthur Paley, Ampton Hall, were submitted to public competition at the Home Farm, Ampton, on Monday, the auctioneers being Messrs. Lacy Scott and Son, in conjunction with Mr. Ernest Prentice, the secretary of the Suffolk Sheep Society. Special interest attached to the occasion, on account of its being the first sale of pedigree Suffolk sheep this season. It was a very successful sale, as will be seen by the subjoined prices. The large company present first partook of a capital luncheon, presided over by the Marquis of Bristol. Mr. Ernest Prentice, in opening the sale, expressed the pleasure which Mr. Lacy Scott and himself had in offering such a large number of choice sheep on that occasion. The animals did not, perhaps, appear in the ring quite to the best advantage, owing to the season and the large number of lambs penned, but he need hardly say that they possessed the best of quality. Mr. Prentice referred to the remarkable success that comparatively small flock had had in the show ring in recent years, the prizes won increasing year by year, the last one of showing being the highest of all. With respect to future sales, the number of ewe sheep catalogued this year were 400 or 500 less, while on the other hand there had been an increase of 25 per cent. of new members added to the Society, so that in all probability there would be a good many buyers in the market this season.

Mr. Lacy Scott, jun., then took up the hammer, and the sale was proceeded with. Six shearling ewes by Newmarket were purchased by Mr. J. N. Champion at £6 5s., three other lots making £6 10s., £5 10s., and £2 15s. to Mr. Poslingford, Mr. Champion, and Mr. J. White (for Mr. E. J. Johnstone, Rougham Hall). The two-year-old ewes were next offered. Mr. S. Traylen bought a grand pen of ten at £8 15s. each; another pen of ten went to the Marquess of Bristol at £4, while Mr. John White gave £3 10s. for twenty, and Mr. Pritchett £3 2s. for another score. There were two pens of ten three-year-old ewes, one going to Mr. Stockburn at £6 each, and the other to Mr. H. Smith at £3 7s. Two lots of full-mouthed ewes went to Major Baird (Exning) and Lord Bristol at £5 5s. and £2 18s. respectively. Mr. Walter Whitlock purchased twenty aged ewes at 37s. for Mr. George Courtauld, Cut Hedge, Halstead, amongst them being the dam of First Century, winner of first prizes at Suffolk and Essex in 1898, and sold to Sir E. Laurie, Bart., at 100gs. Five lots of twenty ewe lambs sold at 43s., 37s., 30s., and 28s. to Mr. R. Burrell, Captain Wentworth Reeve, and Mr. Bridges. The rams were next offered. Baron Chief 2nd, lambed 1898, sire Baron Chief, winner of the first prize and challenge cup, Stowmarket, went to Mr. Champion at 13gs. Ampton Khama, lambed 1899, bred by Mr. Thomas Keeble, Bentley Hall, sire Khama 2nd, went to the bid of Mr. J. Fyson at 6gs. Newmarket 2nd, sire Newmarket, was bought by Mr. A. G. Scorer (Attleborough) at 8gs. One ram lamb made £3, others 4½gs. each, and two 3½gs., the buyers of rams including Mr. Ernest Prentice, Mr. John Slater, Mr. Harry Smith (Euston), and Mr. Cordy S. Wolton. The shearling ewes averaged £4 13s. 4d. per head; two-shear, £4 6s. 6d.; three-shear, £4 13s. 6d.; and full-mouthed, £3 3s. 6d.

Ipswich Lamb Sale.

The annual two-day lamb sale carried out at Gippeswyk Park, Ipswich, by Messrs. Robert Bond and Sons, in conjunction with Mr. Ernest Prentice (secretary of the Suffolk Sheep Society), occupies a foremost position in the lamb sales of the district, and the occasion last week, though lacking that briskness in trade which has in former years been its chief characteristic, suffered by no means in respect to the number and quality of lambs consigned. Shearling ewes were not quite so numerous as usual, but any deficiency in this respect was atoned for by the increased consignments of ewe lambs. The attendance of buyers was very large, and a sign of the increasing importance of the sale was the presence of several visitors from the Midlands. The ewes and ewe lambs were disposed of on Wednesday, and the rams and ram lambs on Thursday. Speaking generally, the bidding on Wednesday was to a large extent languid, though for the best lots there was considerable improvement. Prices, however, ruled much lower than those prevailing last year, though at the same time the figures reached compared extremely favourably with those obtained at recent sales in the district, a fact which was only to be expected, judging by the relative importance of the dispersals. The catalogue comprised some 2,650 Suffolk ewes, 1,400 Suffolk ewe lambs, and 470 Suffolk rams from registered flocks (including the entire flocks belonging to Mr. F. J. Coleridge-Boles, Stratford-on-Avon; Mr. C. H. Cordy, Walton; Mr. E. Packard, and Mr. Horace W. Packard). Amongst the ewes a conspicuous pen was that consigned by Mr. Walter Noble, Creeting St. Peter, whose 160 shearlings fetched particularly good prices; the best ten went to Mr. J. W. Eagle at 125s., and the next at 100s. to Mr. C. F. Marriner. Mr. A. Heywood purchased eighty at prices ranging from 70s. to 75s., while of the remainder twenty made 87s. 6d., thirty 82s. 6d., and ten 77s. 6d. A small but sucessful pen was that sent by Mr. Harry Long, Ringshall Hall; ten fetched 155s., twenty 115s., and another score 80s., the purchasers respectively being Mr. T. Keeble, Mr. W. N. Champion, and Mr. D. M. Gurteen. Mr. Coleridge Boles' flock sold as follows:—Eleven shearling ewes, 63s.; thirty-two three-shear ewes, 44s. to 41s. Mr. Cordey's ewes realised:—Twenty-four shearlings, 60s. and 55s.; twenty-five two-shears, 65s. and 58s.; thirty three-shears, 68s. and 55s.; thirty-four full-mouth, 66s. to 40s.; sixty-five ewe lambs, 51s. to 35s. 6d. Mr. Edward Packard got 65s. for his shearling ewes, 61s. for twenty two-shear ewes, and 60s. for three-shear ewes; whilst Mr. Horace Packard obtained the following prices:—Fifty shearling ewes, 80s. and 70s.; eighty-three two-shear ewes, 100s. to 60s.; sixty-three three-shear ewes, 60s. to 50s.; thirty-two full-mouthed ewes, 60s. and 45s.

On Thursday 470 rams were penned, and they were from the most noted flocks in the district. The attendance was very large, and the sale was on the whole a satisfactory one, but, as usual, several young and undersized lambs were passed over. There were some spirited buyers. Mr. Thos. Goodchild, of Great Yeldham Hall, made the top price of the day, 55gs., which was given by Mr. J. W. Eagle, a gentleman who himself in previous years has led the van in the matter of the price of his consignments. The first collection offered were shearling rams, belonging to Mr. Alfred J. Smith. The consignment was very much in the nature of an experiment; it having been found in past years that not a few lambs did not quite realise what was anticipated of them, Mr. Smith determined to give sheep breeders the opportunity of acquiring shearlings. There were twenty-six of them One moiety was offered at the opening of the sale, and the other later in the day. Amongst the first was one purchased by Mr. John Collins at 12gs., while Mr. A. Boa gave 11gs. for another, the average of the first thirteen being £7 7s. 9d. One animal in the second lot was bought by Mr. Herbert Smith at 39gs., one by Mr. Horace Dawson at 20gs., one by Mr. Leonard Smith at 12gs., and another by Mr. G. P. Watkins at 15gs., the average of the thirteen being £12 17s. 8d., or taking the entire collection, of something like 10gs. Mr. W. H. Borrett, Leiston, sent nine ram lambs, which made an average of £9 2s., the top price being 14gs. and 11gs., given by Mr. Percy Eagle and Mr. John White, for Mr. E. J. Johnstone, Rougham Hall. Mr. J. W. Eagle had twenty ram lambs, which averaged £14 18s. 2d., the best ones being purchased by Mr. S. Scott, Felsham, at 34gs.; Mr. T. J. Stockburn, Clare, 30gs.; Mr. E. Giles, 21gs. Five belonging to Mr. Henry Lingwood averaged £6 8s. 1d. Mr. S. R. Sherwood consigned twelve, which made an average of £18 15s., the highest prices being 26gs. to Mr. A. Boa; 22gs. to Mr. C. A. Creasey; and 21gs. to Mr. W. Nichol, Hengrave. Four from Mr. C. H. Cordy's flock averaged 6gs., and a shearling made £21. This shearling was passed through the ring at last year's sale at the upset price of 5gs. Eleven ram lambs, sent by Mr. D. Abbott Green, made the good average of 12gs., the buyers including Mr. David Gurteen, 18gs.; Mr. A. B. Long, 17gs.; and the Marquis of Bristol, 16gs. Four belonging to Mr. M. G. Hale averaged £10 12s. 7d., Mr. Barrow giving 21gs. for a lamb by Gunner of Stretchworth. Mr. Thomas Keeble sent thirteen nice lambs, which averaged £15 8s. 6d., Mr. Blyth giving 23gs. for one and Mr. John Collins a like amount for another. Fourteen from Mr. Thomas Goodchild's Great Yeldham flock averaged £19 13s. 9d., amongst the lambs being one which made 55gs., the highest price of the day, to Mr. J. W. Eagle. This was by a sheep bred by Mr. S. R. Sherwood, of Playford, for which Mr. Goodchild gave 100gs. at last year's sale. The other prices included 20gs. to Mr. King and 22gs. to Mr. Cullingham. A pair of twin lambs made 47gs., a figure not often reached for twins. Four sent by Mr. Clement C. Smith averaged 11gs., Mr. S. Traylen taking one at 16gs. Nine belonging to Mr. Herbert C. Smith averaged £20 10s. 8d., Major Baird, Exning, securing one at 40gs. and Mr. R. Holmes White another at 30gs., and Mr. Clement Smith a third at 31gs., a shearling making 19gs. Mr. Horace Packard had five, which made an average of 11gs., Mr. J. K. Brooke taking one at 18gs. Mr. S. R. Sherwood's dozen averaged £9 14s. 3d., and a second lot of twelve of Mr. Thomas Keeble's £9 3s. 9d. Mr. Eagle and other principal consignors also had other animals at the latter part of the sale, the prices realised being about the same.

The Harrington Hall Shropshires.

On Tuesday, Messrs. Alfred Mansell & Co., Shrewsbury, conducted Mr. A. E. Mansell's annual sale of Shropshires from his Harrington Hall flock. A large and numerous company assembled, including all the leading breeders and the representatives of numerous foreign buyers, the Australian Colonies being specially well represented. Mr. Alfred Mansell, who occupied the rostrum, alluded in his opening remarks to the long list of honours obtained at the Royal and other important shows during the last twelve years, the remarkable success of Mansell blood in other flocks, and the extraordinary success of Harrington sheep when exhibited in the United States and Australia. He also called special attention to the activity of the foreign demand, his firm alone having exported nearly 600 Shropshire sheep during the present season, embracing a very wide area, and including the United States, Canada, South America, Australia, Germany, Russia, and France. In Australasia Shropshire rams were very popular, it being found by experience that for breeding lambs to sell as frozen lamb the Shropshire ram had no rival. The

sale then commenced, the highest price being 240gs., and the general average £36 15s. 6d.

The following are the principal prices :—

	Gs.
Royal Blood, winner 1st R.A.S.E., etc., etc. Mr. Smith (Australia)	240
Rose of York, winner 2nd R.A.S.E., etc., etc. Mr. D. Buttar (Scotland)	150
Lot 4.—Shearling, by Dream Star Mr. A. J. Simpson (South Australia)	90
Lot 14.—Shearling, by Ulster Rose Mr. Lewis (Tasmania)	51
Lot 20.—Shearling, by Fortification Mr. Gardiner (New Zealand)	80
Lot 22.—Shearling, by Fortification Messrs. P. A. and G. T. Evans	85
Lot 23.—Shearling, by Fortification Messrs. J. Harding and Son	100

Other prices realised were: 30gs. (Lady Rothschild); 28gs. (Mr. Morris); 34gs. (Mr. Coxon); 20gs. (Mr. Eldon Bankes); 25gs. (Mr. P. L. Mills); 26gs. (Mr. Russell, Scotland); 20gs. (Duke of Westminster); 22gs (let) Messrs Evans; 20gs (Mr J. Harding); 18gs. (Mr. C. Bebb); 22gs. (Captain Bellais); 15gs. (Mr. Pritchard).

Blandford August Sheep Fair.

The great August sheep fair at Blandford, Dorset, took place on Thursday, and there was a large supply of sheep, close on 7,000 being penned at sales held by Mr. Ensor (Dorchester) and Messrs. Senior and Godwin (Sturminster Newton). An improved tone pervaded the business as a result of the late much-needed rains, which has also greatly improved the root crop prospects. This gave a hardening tendency to values as compared with recent fairs, and prices may be quoted as a trifle better than at Weyhill and other recent fairs. Good class ewes (the

Pen of Hampshire Down Ewe Lambs First at the Royal Show, York, 1900.
(The property of Mr. James Flower, Chilmark, Salisbury.)

supply consisting entirely of Down sheep) were in demand at varying prices ranging from about 40s. up to 47s. for useful pens, others selling from 33s. to 38s. 6d. Wether sheep, 38s. to 46s. as a general range, and lambs made from 22s. to 33s. as a general run. A large number of well-bred Down sires were also disposed of, and on the whole made satisfactory prices, the best selections especially so.

HORSES.

Mr. Walter Lloyd's Hackneys.

Mr. Walter Lloyd, of Heaselands, near Haywards Heath, held his first sale of pedigree Hackneys and harness horses on Wednesday, but unfortunately for the success of the undertaking the weather was very wet, and, although Mr. Lloyd had made every provision so that visitors could not suffer in any way from the elements while at Heaselands, the rain kept away many intending visitors, and the sale suffered in consequence. The catalogue embraced some forty-six horses, all but three or four being the property of Mr. W. Lloyd. The description of the horses showed that no expense had been spared in the selection of sires, those represented being Goldfinder 6th, Polonius, Agility, Conquest 2nd, Dr. Syntax, Champion Ganymede, Royal Dane, and Lord Hamlet. The Heaselands stud horse is Danegelt's Pride 5,955. The horses showed well in the ring, bad as the day was, though neither horses nor men were given a fair chance of showing to the best advantage. A large covered stand was erected for the comfort and convenience of the company at the ring, and in a spacious marquee Mr. and Mrs. Walter Lloyd entertained a large company to a well-served luncheon, at the conclusion of which an adjournment was made to the stand and sale ring, where Mr. Grimwade, of Messrs. Sexton, Grimwade, and Beck, conducted the business. The sale realised just about £1,709, which was considered far below the value of the animals offered. The highest price obtained was 165gs. for the chestnut mare Actress, a prize winner in 1896, 1897, and in 1899 in the Sussex and Worthing shows. Heath Polonius, a chestnut colt winning second prize in the Sussex show this year, sold at 26gs., and Heath Lily, a bay filly winning second prize at Brighton last week, sold for 37gs. The following is a list of the animals sold, their purchasers, etc. :—

Heath Polonius, chestnut foal, f 1900, s Gay Polonius 6748 ..... Mr. Allison	26
Heath Norseman, chestnut colt, f 1900, s Young Dorrington 2325 ..... Mr. Gibson	11½
Terrapin, chestnut, f 1893, s Norfolk Swell .. Mr. Marker	21
Chestnut colt foal, f 1900, s Succeed 6206 .... Mr. Hook	12
Lady Marioni 1081 (H.I.S.B.), bay, f 1893, s Marioni Mr. Cory	15½
TWO-YEAR-OLD FILLIES	
Heath Vivid bay, f 1898, s Lightning II. 4849 Mr Evans	36
YEARLING FILLIES.	
Heath Lily, bay, f 1899, s Conquest II. 5560 Mr. Hanson	37
Heath Lavender, bay, f 1899, s Danegelt's Pride 5955 Mr. T Bannister	17½
YEARLING COLTS.	
Heath Splendour, black, f 1899, s Royal Dane 5782 Mr. Alwen	21
Heath Gaiety, bay, f 1899, s Gay Danegelt 6022 Mr. Page	13
Heath Harmony, chestnut, f 1899, s Danegelt's Pride 5955 ..... Mr. Shorter	21
STALLIONS.	
Succeed 6206, chestnut, f 1895, s Success III. 4536 Mr. Balls	69
Free Kick 5211, black, f 1891, s Confidence 158 Mr. Howard	26
HARNESS HORSES.	
Lady Lofty II., chestnut mare, 15.1½ hands, f 1896 s Links Boy 3082 ..... Mr Howard	110
Actress 10637, chestnut mare, 15.1½ hands, f 1896, s Agility 2799 ..... Mr. W. Durbin	165
Lord Pixton, bay gelding, 16.1 hands, f 1895, s Shamrock II. T.B. ..... Mr Evans	158
Lord Hartfield, bay gelding, 16.1 hands, f 1896, s Shamrock II. T.B.	
Bagthorpe Verbena 9715, bay mare, 16 hands, f 1895, s Leam Royal 5260 ..... Mr. Hanson	90
Miss Spark 10338, black mare, 14.3 hands, f 1895, s Winnal Fireaway 4082 ..... Mr. Kleinwort	83
Dorothy Dene 9899, black mare, 14.3 hands, f 1895, s Winnal Fireaway 4082 ..... Mr. Kleinwort	76
Nora, 9376, bay mare, f 1894, 15.1 hands, s Chocolate Junior 4185 ..... Mr. Megaw	66
Pom-Pom, grey gelding, 14 hands, f 1894, s Stepper 5716 Mr Kleinwort	30
Flashlight, black gelding, 15.1½ hands, f 1869, s Winnal Fireaway 4082 ..... Mr. Floyd	31
Athlete, bay gelding, 16 hands, f 1897, s [illegible] Major-General Sir Henry Eyre	75
Klondyke, dark chestnut gelding, f 1898, s Goldfinder VI. 1791 Mr Hanson	30
Royal Duke, chestnut gelding, f 1897, s Royal Dane 5782 Mr. H. [illegible]	25
Fascination, bay gelding, 15.3 hands, f 1899, s Danegelt's Pride T.B. Mr. [illegible]	6
Lightheart, chestnut gelding, 14.1 hands, f 1897, s Cheator T.B. Mr. [illegible]	12
Badminton, chestnut filly, f 1898, s Berrister 4625 Mr. H. [illegible]	27

The Hinxton Shires and Hackneys.

The sale of Shire and Hackney horses bred by Mr. C. Ed. E. Cooke, which took place at Hinxton Grange, Cambridgeshire, on Thursday, attracted a very large number of prominent breeders from all parts of the country, and the event proved most successful. Three-figure prices were obtained five times, four for Shires and one for Hackneys. The latter made the top price of the sale, Sir Walter Gilbey paying 260gs. for the brood mare Hinxton Lady Denmark, a chestnut, foaled in 1896, by Dagenham 4214—Violet. The top figure for Shires was 180gs., which was paid by Mr. Collyer, Boston, for the brood mare Duchess of Worsley 7th, by Lancashire Lad 2nd—Vestal of Worsley 15th. The Prince of Wales had to go to 170gs. before obtaining the Shire mare Clodia, a bay, foaled in 1893, by Julian—Hitchin Cloddy 2nd, whilst for Hinxton Cloddy, a brown, by Saxon Boy—Hitchin Cloddy, Mr. King, of Chesterford, paid 115gs. Sir Walter Gilbey presided at the luncheon, and, in replying to the toast of his health, defended the action of the Royal Agricultural Society in deciding to find a permanent home near London. He said that, owing to the losses sustained at some of their shows, no other course was possible, and this remark seemed to meet with general approval.

The following is a list of the principal prices realised :—

	Gs.
BROOD MARES AND FOALS.	
Clodia 23826, b, f 1893, s Julian .. H.R.H. Prince of Wales	170
Bay colt foal, f 1900, s Waresley Triumph 16453 Mr. Conchar	35
Di Vernon 21650, br, f 1894, s British Flag III. 12841 Mr. A. Clarke	60
Horbling Welcome 20114, b, f 1894, s Horbling Commodore 14100 ..... Mr. Bagenal	80
Bay colt foal, f 1900, s Blythwood Conqueror 14997 Mr. Brook	22
Hinxton Charm 20094, b, f 1894, s Norman Conqueror 7940 ..... Mr. Rodwell	50
Bay colt foal, f 1900, s Mormaer of Bateford 15242 Mr. Conchar	45
Hinxton Bay Leaf 28902, b, f 1895, s Burgundy 12862 Messrs. Thompson	90
Bay colt foal, f 1900, s Hinxton Albert 17395 Mr. Joseph Morton	28
Hinxton Cloddy 26154, br, f 1895, s Saxon Boy 14852 Mr. H. King	115
Bay filly foal, f 1900, s Blythwood Conqueror 14997 Mr. King	61
BROOD MARE AND FOAL.	
Thetis 24962, g, f 1896, s Nailstone Ironclad 7873 Mr. Carter	60
Grey filly foal, f 1900, s Blythwood Conqueror 14997 Mr. J. Morton	31
Duchess of Worsley VII. 19854, bl, f 1894, s Lancashire Lad II. 6031 ..... Mr. Collyer	180
THREE-YEAR-OLD MARES AND FOALS.	
Hinxton Duchess 28905, b, f 1897, s Peleus 15771 Mr. Bagenal	58
Poplars Lily 26659, b, f 1897, s Duke of Worsley 13002 Captain Duncombe	82
Bay colt foal, f 1900, s Hinxton Albert 17395 .... Mr. King	16
Hinxton Coll 26155, br, f 1897, s Glyn Warrior 15122 Mr. Keevil	52
Bay filly foal, f 1900, s Hinxton Albert 17395 .. Mr. Keevil	27
THREE-YEAR-OLD FILLIES.	
La Belle 26282, b, f 1897, s Crown of Royalty 14581 Lord Bolton	70
THREE-YEAR-OLD FILLY.	
Hinxton Tidy 26161, bay, f 1897, s Kennett, 13206 Mr. Alfred Clarke	75
TWO-YEAR-OLD FILLIES.	
Blackthorn Breeze 27586, br, f 1898, s Old Warden Royal Harold 16300 ..... Mr. J. Cooke	81
Hinxton Pride 28906, b, f 1898, s Salisbury 5324 Captain Heaton	100
Hinxton Queen 28907, b, f 1898, s Cheadle Jumbo 3024 Captain Duncombe	72
YEARLING FILLIES.	
Juliette of Waresley, b, f 1899, s Duke of Worsley 13002 Captain Heaton	100
YEARLING COLTS.	
Brown Colt, f 1899, s Blythwood Conqueror 14997 Mr. Scootton	74
BROOD MARES AND FOALS.	
Lady Truelove 10202, ch, f 1894, sire Danegelt Star 4215 Mr. Walter Lovat	60
Chestnut Filly Foal, f 1900, s His Majesty 2513 Mr. Conchar	53
Cayenne 7699, ch, 15.2 hands, f 1893, s Cadet 1251 Earl Egerton of Tatton	85
Chesnut filly foal, f 1900, s Sir Augustus 6562 Sir Walter Gilbey	60
Chesnut filly foal, f 1900, s Langton 6078 ..... Mr. Ley	50½
Miss Rufus 9337, b, 15.1 hands, f 1894, s Rufus of Rushless 3926 ..... Mr. F. Frohock	53
Hinxton Lady Denmark, ch, 15.3 hands, f 1896, s Dagenham 4214 ..... Sir Walter Gilbey	260
THREE-YEAR-OLD FILLIES.	
Dashaway 11745, ch, f 1897, s His Majesty 2513 Mr. Shorten	50
Buttercup 11676, ch, f 1897, s Garton Duke of Connaught 3009 ..... Mr. H. Livesey	48
TWO-YEAR-OLD FILLY.	
Hinxton Capsicum 12713, ch, f 1898, s Bonfire 2881 Mr. Amey	42

The Executive Committee of the Durham County Council decided on Thursday that all grazing sheep entering the county must be dipped within three months, and swarm sheep [illegible] that no sheep exists in the locality from which they have been drawn. No restriction is to be placed on the movement of fat sheep if slaughtered within fourteen days.

SHOWS.

Cambridgeshire.

The Cambridgeshire and Isle of Ely Agricultural Society's Show at Ely on Tuesday was in every respect the most successful held since its reorganisation in 1896, when it was converted into a one-day event. The society was favoured in having bright summer-like weather and a very large attendance. Five years have elapsed since the show took place in the cathedral city, which in honour of the day was profusely beflagged. On this occasion the venue of the show was at New Barns, where Mr. H. Coy kindly placed at the disposal of the executive his spacious paddock. For the last three years the show has been held at Cambridge, the total entries respectively being 227 in 1897, 239 in 1898, and 345 in 1899. This year, however, showed an increase over the latter figures of forty-five, the totals in the various classes being: Shire horses, 155; Hackneys and hunters (exclusive of jumping and turnouts), 165; cattle, 21; sheep, 35; cream cheese, butter, and eggs, 14. The three latter sections showed a falling off, but the increase in the horse classes was so good that the total entry was 390 as against 345.

The Shires occupied the first place in the catalogue, and the judges had their work cut out, in the various classes being some of the massive animals with the abundance of "feather" so characteristic of the Fen horses. The Waresley Park Stud was well represented, Captain Duncombe winning premier honours in the second class for an 1897 entire horse, with Waresley Patriot and the blue badge in class one, where he was beaten by Mr. Rowell's Bury Blood Royal. For a Shire entire colt, Director IV., bred in 1898 by Mr. H. West, of Upwell, and now owned by Mr. W. Richardson, of Doddington, defeated Bury Harold, a son of Mr. Rowell's famous sire. Captain Duncombe was first again for a last year's Shire entire colt, Mr. Rowell being second. For the Shire mare with foal at foot honours fell to Mr. S. Poles, of Thorney Fen, with his New Cut Wonder, foaled in 1881, and sired by Thumper, her dam being Wryde Beauty. Mr. H. Towgood's Shelford Bar None William was second. New Cut Wonder also won in the tenant farmers' class, where he defeated Mr. C. Ambrose's Stuntney Angelica, and also in Class 9, making in all three firsts. In the section for Shire mares, open to all England, the first and second awards went to Mr. F. Crisp, of the Girton Stud Farm, for two admirable mares. The red rosette was handed to Aurea, a splendid bay foaled in 1891, and a daughter of Thornton Premier and Ivy. It was the first occasion on which this animal had been shown this year, but in the competition of '99 she won a fourth at the London Show and champion there three years ago. The second prizewinner, was Queen of the Shires, a daughter of Harold and Bonny Lady. These two entries were respectively first and reserved for the Shire Horse Society's Medal. Third honours in the same class went to Mr. J. Topham, of Thorney, for Thorney Floss, by the celebrated Menestrel, and Thorney Flower Girl, winner at Peterborough of the champion thirty guinea cup and Sir Blundell Maple's cup. In this class she had to compete with mares of any age, and was consequently beaten, although in the class for Shire mares, foaled in '97, she carried everything before her. In the section in which the prizes were given by the President of the Society (Colonel H. McCalmont, M.P.), honours went to Mr. J. Rowell, Bury, Hunts., for Bury Specie, a smart bay by Yorkshire Ben. Mr. Crisp's Girton Sunlight was second. Mr. J. Rowell was again successful with the same horse in the tenant farmers' class, Mr. Richardson (Doddington) being second with Bramhope Johanna, Mr. J. E. Morton (Thorney) reserved with Gores Blaze, and Mr. Topham highly commended with Thorney Bloom. Mr. S. Poles again carried off the palm with his bay Shire filly by Southgate Harold, beating Mr. Rowell's Bury Mayflower. In succeeding classes Messrs. J. Frohock (Lolworth), Crisp, Wayman (Haddenham), and C. Rose (Rampton) were prominent amongst the prize winners. The latter gentleman had the honour of securing the cup given by Mr. Crisp with a smart filly by Somersham Hatherton, whilst the 20-guinea cup given by the treasurer (Mr. H. C. Foster) was won by Captain Duncombe for an entire, Waresley Patriot, first in class two.

The muster of Hackneys was highly creditable to the district, some really fine animals coming into the ring. In the first class Mr. Heaton's well-known entire Huggate Fashion was beaten by Mr. J. Morton's Denzil, a beautiful chestnut sired by Danegelt, which also won. Denzil won Sir Walter Gilbey's Cup, Huggate Fashion being reserved. The last-named horse, however, took one of the Hackney Horse Society's Medals, Mr Morton was reserved, whilst the second medal for a mare, filly, or foal went to Mr. Benton, of Earith, Mr. Flanders being reserved. The mare, Bury Belle, owned by Mr. Rowell, and a prominent winner at the Hunt's show, at March was beaten by Atalanta, a very smart chestnut roan shown by Mr. W. Flanders, of Witchford, and bred by Reality. Four prizes were given for hackneys 15 hands and over shown in saddle, and a similar class under that height. In the best instance, Mr. H. Benton, of Earith, with a smart bay brown was first and Mr. W. Flanders second, the latter being first in the next class for under 15 h.h. with Folly by Reality and Mr. F. Beldam's Pride of York, a nice chestnut, second. In the open class for Hackneys, Mr. G. F. Johnson, of Woodbridge, had entered his well-known Silver King, which took the premier place in the class for action at the Brighton Show, and his now famous Brilliance, but because they were not on the ground until half-past ten o'clock instead of ten they were excluded. The stewards held a hastily summoned meeting, and decided that they must abide by the rule. This was surely putting too rigid an interpretation upon the rule, especially as the animals had been entered in due time, and came direct from the station to the ground on the arrival of the train.

The cattle, which were below the average, were chiefly of the Channel Islands breed. However, Captain Duncombe had a fine Shorthorn roan bull forward in Storm Signal, which was first. Lord Braybrook, of Audley End, took premier honours in Class 2 with a Jersey bull, while Mr. C. F. Young, of Melbourn, was first for a cow of the same breed. Lord Braybrook was again successful with a dairy cow, and Mr. J. Russell won the "firsts" for a fat steer and a heifer. With respect to the sheep, the President, Colonel H. L. B. McCalmont, M.P., and the Earl of Ellesmere were the principal exhibitors of Southdown rams, the Stetchworth entry being the winner. Colonel Harry McCalmont took both prizes with some choice ram lambs, but in ewes and ewe lambs, Lord Ellesmere was the victor. His Lordship was the only exhibitor of Suffolk rams, and carried off both honours, but in the competition for Suffolk ram lambs, Col. Harry McCalmont was the winner with a particularly nice pen. In the class for Suffolk ewe lambs, the honour was reserved, Earl Ellesmere being first.

Cumberland.

The Cumberland Agricultural Society, like many another society, has had its ups and downs during its seventy years of useful existence, but, thanks to the leading agriculturists of the county, it has always survived them, and the success of this year's show, which took place on the Football Ground at Carlisle on the 21st ult., will no doubt give it a new lease of life. This year the Council of the society tried an experiment. In years past the show day has been Thursday—the day upon which Carlisle takes a half-holiday. But, although the conjunction of these two events made for success, that most potent factor of all, the weather, did not invariably smile upon the enterprise. Consequently the Council decided this year to hold the show on a Saturday. It was a wise decision, for it had the effect of drawing to the show not only all those who regularly come to the weekly market, but many others from distant parts of those north-western counties where opportunities for seeing friends are still so limited. It was to be regretted that, notwithstanding a prize list of over £400, there was a falling off in all the sections except those for sheep and light horses, sheep numbering seven more and light horses seventy-four more. This large increase of light horses is to be accounted for by the fact that Mr. F. W. Chance, of Morton, gave a series of special prizes for mares three years old and upwards, best adapted for breeding horses suitable for mounted infantry. In this particular class there were no fewer than seventy-five animals entered. The heavy horses shown were about as numerous as last year, and the diminished entry of cattle was attributed to certain changes in the prize list and to the fact that the Calthwaite Hall herd of Shorthorns and the Whitehall Galloways were not represented. The feature of the show was undoubtedly the class for mares suitable for breeding horses capable of carrying mounted infantry. On the outbreak of the South African war Mr. J. J. Bell, veterinary surgeon, Carlisle, was authorised by the Government to purchase horses for the use of our troops, and has since then bought and despatched no fewer than 1,150 from Cumberland, Westmoreland, and the Border counties. The benefit accruing to the tenant farmers in these districts who had reared this type of horse may be imagined when it is stated that many of the animals cost no less than £40 each. Realising what an important part mounted infantry will be called upon to play in Britain's future wars, Mr. F. W. Chance decided to give seven prizes with the object of encouraging the breed of horses for military purposes the class to be open to the society's district and the county of Westmorland, and to consist of mares 14.2 to 15.1 hands, three-years-old and upwards. It is intended to cross some of the best mares with a pure Arab pony, or some other horse of that breed, for the purpose of getting a combination of substance and speed. The quality of mare shown was excellent, and was exceptionally well adapted for the purpose. They were mostly animals with a fair share of blood and quick in their movements. Many of them had beautiful shoulders; some, indeed, were miniature hunters. In such circumstances the judges had a difficult task, and the weeding-out process occupied a considerable time; but finally their choice rested with Mr. J. Davison's bay mare Countess, sired by Lord Derby II., second honours going to Messrs. S. and W. R. Hinde's Lady Lorton, which carried off first prize in the Hackney section for brood mares.

Agricultural horses made a good show. The winning mare in the brood class was Messrs. T. and J. Wood's bay Jess, which also took the Blamire memorial prize, open to the county of Cumberland. It was sired by Kerr's well-known Royal Champion, and has taken prizes at several local shows. Its foal also took leading honours in its class. Mr. Joseph Hayton also carried off two or three prizes.

The Hackney classes were well filled, and so were those set apart for horses in harness. Mr. Jos. Workman, of Petteril Green, not only won first prize with his one-year-old gelding, but secured the challenge bowl, value £10 10s., given by Messrs. Thompson, of Kirkhouse, for the best gelding or filly exhibited, from one to three years old inclusive.

The hunters were somewhat uneven. Amongst them were some exceptionally good ones, and others which had such obvious defects that, in the words of one of the judges, they "might well have been left at home." All the classes, however, filled well. Mr. J. S. Rigg's Ting-a-Ling was a very easy first in her class (brood mares). Her competitors were useful mares, but did not approach her in quality. Mrs. Twentyman's Princess won in the class for three-year-old fillies. She is full of quality, and certainly had the most "class" about her, but is just a little wanting in size. The best colt in the young classes was Mr. J. T. Rook's Thistle, chestnut, sired by Menelaus. It was an easy first in its class. Mr. H. Dugdale's gelding, which also won, is of exceptionally good quality, but rather backward in condition. For geldings or mares of any age up to and over 14st. (open), Mr. C. H. Wilson was first with Bounce, which both judges declared was the best young horse they had seen this season. It was the first time the animal had been shown.

The show of Shorthorns suffered somewhat by comparison with former years, but was never the less a good one. A new exhibitor at Carlisle in the person of Mr. Wm. Henderson, of Haydon Bridge, carried off some of the principal prizes, including two firsts and three seconds. His young bull, which took first prize in its class, was fifth at the Royal Show at York, and also carried off honours at the Northumberland Show at Alnwick. Mr. E. Ecroyd's herd was also very prominent among the prize-winners. There was an excellent turn-out of Galloways, for which the district is noted. Mr. R. Jefferson took most of the leading prizes. His Lady Nancy 4th, which was at the head of the cow class, is probably one of the best specimens of the breed extant. She was only placed third at the Highland Show at Stirling, but in the opinion of many she was entitled to second. Many of the other winners had also been shown with success at Stirling. Among the sheep, Mr. W. Bell, of Brampton, won not only first prize with his Border Leicester ram, but secured the champion silver cup given by Mr. W. Parkin Moore for the best sheep in the Border Leicester classes.

Exeter Horse Show.

As receipts for the past nine exhibitions have not always counterbalanced the expenditure, it was decided this year to hold only one day's show instead of two. It is to be regretted that the financial condition of the Society is nothing like so sound as could have been wished, and it was hoped that the weather for Wednesday's exhibition would have been most favourable so as to attract such a gate as to put the exchequer in a flourishing condition. But the morning broke with heavy rain, and although it brightened up considerably prior to the opening of the show, the rains had a somewhat adverse effect on the attendance. The entries this year numbered about 250, while 191 animals entered the rings, which was most satisfactory. All the principal classes produced a good entry, this being especially the case in the open hunter classes, in which very keen competition was seen. The entries in the jumping and driving classes came up well, and in regard to the jumping many of the most prominent jumpers in Devon made their appearance in the ring. The judges were:—Hunters, hacks, and harness: The Right Hon. Lord Poltimore; Mr. Digby Collins, Newton Ferrers; Mr. H. Boden, Derby; and Mr. J. Hill, Church Stretton. Agricultural horses: Mr. G. T. Hayman, Taunton.

The first class was a local one for brood mares, calculated to produce hunters, with foal at foot by a thoroughbred horse or registered hunter sire, and here the Hunters' Improvement Society offered a gold medal. The judges awarded premier honours to Mr. Charles Wakeley's Shamrock, which was a fine-looking animal, but on examination by a veterinary surgeon it was found that the mare was unsound, and consequently the second prize winner, which from outward appearances was not nearly so compact as the one disqualified, stepped up. The other entrants were only of a moderate character. The next class was also a local one, and was for colt brood mares not exceeding 16 h.h., calculated to produce weight-carrying colts, with foal at foot. There were only four entries, and the judges did not experience much difficulty in awarding the premier honours. Mr. Pope's animal, a fine-looking one, was placed first. The next class was for mares calculated to get hunters (local), the premier position being given to a serviceable chestnut, Dandy, owned by Mr. G. Peppin,

of Ottery St. Mary, but the opinion was freely expressed that The Parson, owned by Mr. G. P. Finch, of Exeter, should have taken first prize. There was, however, very little to choose between the two. A splendid entry was secured in the class for mares or geldings exceeding 14 h.h., but not exceeding 15 h.h., and the competition was exceedingly keen for a local class. The Quaker, owned by Mr. W. F. Wyndham, of Hockworthy, undoubtedly won, but Mr. Nelder's First Love was close up. One of the prettiest classes in the exhibition was the one for hacks or geldings exceeding 13 h.h., but not exceeding 14 h.h. The judges had not to look far for the winner, Mr. G. H. G. Arden's Magic winning what was described as a hollow victory. Later in the afternoon Magic again won the blue in the driving class, her action, which is almost perfection, being loudly applauded. The second prize went to Mr. G. P. Finch and the third to Mr. J. Pethick, of Plymouth. Considerable interest was evinced in the child's pony class, which produced sixteen entries. The winner was found in a sweet little bay gelding Shamrock, belonging to Master Arthur Pearce, of Southmolton, which got over the ground very finely. The hunters in the whole of the classes were a most serviceable lot, and the competition keen. In the open class for mares or geldings, calculated to carry 14st. and upwards, Mr. R. W. Arthur's brown gelding Rockville was, however, not an altogether popular win, many being of opinion that Pirate, a beautiful gelding, owned by Messrs. John and Nixon, of Chaldlen's Stud Farm, Cardiff, should have taken premier honours. For the third place Mr. Moyle's horse stood out well after the first and second. In Class 6 (open), for mares and geldings calculated to carry 12st. 7lb. and under 14st., Shamrock, owned by Messrs. John and Nixon, easily won, Mr. Arthur's The Sportsman having to be content with second position. Rockville secured another first in Class 9, after a keen fight with Master Ned, owned by Messrs. Moyle and Son.

The class for mares or geldings calculated to carry 12st. and under 14st. (local) produced a capital entry of twenty-two, and the judges had no little difficulty in awarding premier honours. The first place was given to Mr. Arthur's The Sportsman, which is all over a hunter, and an animal which finely gets over the ground without any fuss whatever. Mr. Jackson's Shamrock, another capital animal, was second, and Mr. Fox's Day Star third. An easy winner was Mr. S. Mathews' chestnut Harkaway in the class for mares or geldings, four years old (local), Mr. Gulley's Moor Hen having to be content with second position, being run very close by Mr. W. Cook's The Sportsman. The first position for mares or geldings, three years old (local), went to Cornwall, Mr. H. M. Rogers's Ringleader taking premier position, this being unquestionably the finest animal in the class, Mr. O. N. Holt Needham's Killarney being easily second. The last-named owner, however, obtained first place in Class 13 with Dancing Girl, a typical hunter and grand mover; Mr. J. L. Andrew, of Umberleigh, being second, and Mr. R. W. Morris, Ivybridge, third. In yearling hunters the winner was found in a serviceable animal Ruby, owned by Mr. C. Wakely, but Mr. O. N. Holt Needham's Topaz ran extremely close, the judges having no little difficulty in deciding between them. Mr. J. B. Gulley's Moor Hen was a popular win in the local class for horses that have been regularly hunted during the past season with any recognised pack of hounds in Devonshire, to be ridden by the owner, or his son, or a bonâ-fide subscriber to such pack. Mr. G. Loram's The Scout was second. The driving classes caused considerable interest, especially the one for tandems (open), in which Mr. E. S. Godsell's splendid team Duke of York and Lord Bath, who are no strangers to Exeter, won easily. In the local tandems Mr. Pethick's Lord Bang and Lord Bang II. took first position, the second team being owned by Mr. Mortimore, of Exeter, Miss Cadet and Gay Horace.

Penrith.

The Penrith Agricultural Society had obtained nearly a record number of entries for their show at Penrith on Thursday, and they naturally looked forward to an excellent, if not record, attendance of visitors, but unfortunately the weather proved most unfavourable, and kept a good many intending visitors away, so that the number of persons paying for admission to the showyard fell short of the average. The show itself was an excellent one, and may be classed as one of the finest collections of stock ever seen in the town. The total entries reached 472, nearly 100 in excess of 1899, and within about a dozen of the record of 486 set up in 1897. The main increase was in the sheep, which produced fifty-four more than last year. The reason is probably not far to seek. Hitherto it has been the custom locally to make the sheep classes a sweepstake, in which limited competition meant a much diminished prize money, and the system had become unpopular, if it ever was anything else. This year the idea was abandoned, and as a reward there was the large increase in the entries before noticed. The horses were more numerous by forty-four, the increase being about evenly distributed between the heavy and light classes. Cattle were represented by an increased entry of fourteen.

The most notable section of the show was, perhaps, the Shorthorns, the animals that went into the ring being on the whole worthy representatives of their breed. In the open class for bulls Mr. Edmund Potter, of Kirkby Lonsdale, won with the home-bred Sir Arthur Sullivan, a well-known showyard champion. Sir R. G. Musgrave took second with Sir Robert, a nice young roan bull, who failed to get a ticket here last year as a yearling. Mr. John W. Barnes, of Aikbank, Wigton, showed a grand specimen of a Shorthorn bull in the yearling class named Cumberland Star. He was easily first in his class, and had the distinction of also winning the Shorthorn Society's prize. Empress 12th, who won in the cow class for Mr. J. Harris, won several times as a two-year-old and caught the eye of the judges at the Royal. Another nice heifer was the two-year-old Pansy 2nd, shown by Mr. Harris, who is following up her yearling successes by winning everywhere in the North. The tenant farmers' classes, a comparatively recent innovation at Penrith, filled extremely well, for farmers who would have no chance against exhibitors like Mr. Harris or Lord Brougham are encouraged to bring their stock into the ring. The young bull that won could, however, be shown in almost any company. He was Ingram's Perfection, a roan who has in him the Golden Duchess strain. He was shown by Messrs. John Lancaster and Sons, of Dolphenby, but was raised by Mr. Anthony Dobson, of Williamsgill. In the open class he was placed third to Cumberland Star and Wild Cumbrian.

The agricultural horses were a nice lot, but offered no special features. The special for the best horse or mare went to Mr. William Griffiths, of Plumpton, who is himself a tenant farmer, and who won twice also in the restricted classes. He also was successful in the open gelding class. Messrs. T. and J. Wood won in the class for mares with Lady Jess, who was placed second to Mr. Griffiths's representative in the championship class. There was capital quality represented in the light horse classes, and particularly the harness classes. In the latter the competition was extremely keen, and in at least one instance the judges called in a third person to separate the first and second.

There was a remarkably fine show of sheep, both the white-faced and Downs from the "Inlands," and the Herdwicks and Mountains from the Fells, being well represented. The President's (the Right Hon. J. W. Lowther, M.P.) special prize was won by Mr. J. C. Toppin, of Musgrave Hall, Skelton, who in the classes in which he entered scored heavily. His winners in this class were a couple of beautiful Oxford Down shearling gimmers and a shearling ram of the same breed. Among the Down classes Mr. Toppin had matters very much his own way, the three that won the President's special winning in their respective classes, while in the lamb classes he won with a pair of gimmers, and took second with the tup. Among the Wensleydales Lord Henry Bentinck won all along the line, taking three firsts and three seconds out of five classes.

The following gentlemen acted as judges:—

CATTLE.—Mr. J. Patten, Alnwick, and Mr. George Ashburner, Low Hall, Kirkby-in-Furness.

HORSES.—Agricultural: Mr. R. Brydon, The Dene, Seaham Harbour, and Mr. W. R. Trotter South Acomb. Harness: Mr. Henry Moore, Cranswick, Hull, and Mr. T. Mitchell, Ecclashill, Bradford. Hunters: Mr. William Heslop, Stainthrop.

SHEEP.—Border Leicesters: Messrs. J. Patten and G. Ashburner. Black-faced Mountains: Mr. Edward Irving, Shap Abbey. Herdwicke: Mr. William Cockbaine, Threlkeld.

PIGS.—Messrs. Patten and Ashburner.

Prize List.

CATTLE.

Shorthorn Bull, two years old and above, being an approved stock-getter: 1, Mr. E. Potter, Lowfields, Kirkby Lonsdale; 2, Sir R. G. Musgrave, Bart., Edenhall.

Shorthorn Bull, above one and under two years old: 1, Mr. J. W. Barnes, Aikbank; 2, Messrs. T. and J. Wood, Blencogo; 3, Messrs. J. Lancaster and Sons, Dolphenby.

Shorthorn Cow or Heifer, to have had a calf eight months previous to, or to produce one within eight months after the show: 1, Mr. J. Harris, Calthwaite Hall; 2, Messrs. T. and J. Wood, Blencogo, Wigton; 3, Lady Henry Bentinck, Underly, Kirkby Lonsdale.

Shorthorn Heifer, in calf or milk: 1, Mr. J. Harris, Caithwaite Hall; 2, Mr. J. Hodgson, Flusco Lodge, Newbiggin; 3, Lady Henry Bentinck.

One-year-old Shorthorn Heifer; 1, Mr. J. Milner, Croft House, Stanton; 2, Lady Henry Bentinck; 3, Mr. J. Barnes, Aikbank.

Bull Calf, under twelve months old: 1, Mr. W. Richardson, Laverock Bridge, Kendal; 2, Mr. J. Jefferson, Rigg Dyke, Skelton.

Heifer calf, under twelve months old: 1, Mr. R. Heywood-Thompson, Nunwick Hall; 2 and 3, J. Harris, Calthwaite Hall.

Dairy cow, in calf or milk (any breed), in the hands of a tenant farmer: 1, Messrs. J. and T. Wood; 2, Mrs. Bellas, Penrith.

Bull carved in 1899 (prizes given by the Shorthorn Society of Great Britain and Ireland): J. Barnes, Aikbank.

Collection of five Shorthorn cattle, the property of a bonâ-fide tenant farmer residing within the society's radius: 1, Messrs. T. and J. Wood, Blencogo, Wigton; 2, J. Barnes, Aikbank.

Shorthorn bull, under two years old; 1, Messrs. J. Lancaster and Sons, Dolphenby; 2, Mr. J. Blake, Lamonby Hall, Skelton; 3, Mr. J. Metcalfe, The Home Farm, Edenhall.

Shorthorn cow or heifer, to have had a calf eight months previous to, or to produce one within eight months after the show: 1, 2, and 3, Mrs. Bellas, Bellmont, Penrith.

Shorthorn heifer, in calf or milk: 1, Mr. J. Hodgson, Flusco Lodge, Newbiggin; 2, Mrs. Bellas, Bellmont, Penrith; 3, Mr. J. Butterworth, Scotland Road.

One-year-old Shorthorn heifer: Mr. J. Milner, Croft House, Stainton.

HORSES.

AGRICULTURAL.

Brood mare in foal, or with foal at foot: 1, Messrs. T. and J. Wood, Blencogo, Wigton; 2, Mr. J. Kerr, Red Hall, Wigton; 3, Mr. J. Lawrence, Ravenswood, Renwick.

Brood mare in foal, or with foal at foot not exceeding 15 hands 2 inches: 1, Mr. A. Mansell, Crossrigg; 2, Mr. G. Lowis, Ash Hill, Temple Sowerby.

Three, four, or five-year-old gelding, age to be considered: 1 Mr. W. Griffiths, Castlesteads, Plumpton; 2 and 3, Mr. A. Mansell, Crossrigg.

Three-year-old filly: 1, Mr. J. Hayton, Beck Farm, Wigton; 2, Mr. Lancaster, Sun House, Alston.

Two-year-old gelding: 1, Mr. Lancaster, Alston; 2, Mrs. Heskett, Low House, Plumpton.

Two-year-old filly: 1, Mr. J. Hayton, Beckfarm, Wigton; 2 Mr. W. Jackson, Temple Sowerby.

One-year-old colt or gelding: 1, Messrs. Hodgson Brothers; 2, Mr. W. Carr, Gateside, Burnsile, Kendal.

One-year-old filly: 1, Mr. J. Woof, Great Strickland Mill; 2, Mr. J. Lawrence, Renwick.

Colt or filly foal: 1, Mr. G. Lowis, Ash Hill, Temple Sowerby 2, Mr. J. Kerr, Red Hall, Wigton; 3, Mr. J. Woof, Great Strickland.

Messrs. Pattinson and Winter, Penrith, offer premiums for pair of agricultural horses (mares or geldings), three years old and upwards, the property of a tenant farmer, to be shown in plough harness: 1, Mr. W. Griffiths, Plumpton; 2, Mr. J. Thompson, Plumpton Head.

Messrs. James and John Graham (Limited), Penrith, offer premiums for mare or gelding five years old or upwards, to be confined to exhibitors farming within a radius of ten miles of Penrith: 1, Mr. W. Griffiths, Plumpton; 2, Mr. A. Mansell, Crossrigg.

The Right Hon. Jas. W. Lowther, M.P. (President), offers prize for agricultural horse or mare, any age: 1, Mr. W. Griffiths, Plumpton; reserve, Messrs. T. and J. Wood, Blencogo.

HARNESS HORSES.

Brood mare in foal, or with foal at foot: 1, Mr. W. W. Hodgson, Thursby, Carlisle; 2, Mr. R. A. Sowerby.

Three-year-old Gelding: 1, Mr. J. C. Toppin, Musgrave Hall, Skelton; 2, Mr. J. Kidd, Haverflatts, Milnthorpe.

Three-year-old filly: 1, Mr. W. Taylor, Penrith.

Two-year-old gelding: 1, Mr. T. G. Benn, Newton Reigny; 2, Mr. F. M. Dent, Stainton.

Two-year-old filly: 1, Mr. E. Dill, Naughton, St. Anthony's, Milnthorpe; 2, Mr. F. Armstrong, George Hotel, Penrith.

Special prizes given by the society for the best brood mare suitable for breeding hackney s, either in foal or with foal at foot; height from 14.2 to 15.2 h.h.: 1, Mr. J. Davidson, Shepherd's Hill; 2, Messrs. S. and W. R. Hinde, Tangier Street, Whitehaven.

Hackney, not under 14.2 nor over 15.2 h.h., to be brought into the ring mounted: 1, Mr. T. G. Benn; ; Dr. Dalston Ewbanke, Borrenthwaite.

Cob, not under 13.2 h.h., and under 14.3 h.h., to be brought into the ring mounted: 1, Mr. T. G. Benn; 2, Mr. J. Siddle, Penrith.

Pony, under 13.2 h.h. and not less than three years old, to be brought into the ring mounted: 1, Mr. F. Armstrong; 2, Mr. W. Blackburn, Brunswick-square, Penrith.

Premium offered by Mr. Hamlet Riley, of Ennim, for cobs and ponies (mares or geldings) not exceeding 15 hands, to be driven on the ground in suitable conveyance; open to all comers; driving whip to the best driver in the class: 1, Dr. G. W. Dalston; 2 and whip, Mr. T. G. Benn; 3, Mr. W. E. Siddle, Crown Hotel, Penrith.

Horse or mare above 15 hands, to be driven on the show ground in a suitable conveyance; driving whip for the best driver in the class: 1 Mr. T. G. Benn; 2 and whip, Mr. W. Dawson.

HUNTING HORSES.

Brood mare, in foal or with foal at foot: 1, Mr. F. Armstrong; 2, Mr. J. S. Rigg, Elm Bank, Appleby.

Two-year-old gelding: 1, Mr. J. H. Siddle; 2, Mr. J. Kidd, Haverflatts, Milnthorpe; 3, Mr. J. Wilson, Helsington Laithes, Kendal.

Two-year-old filly: 1, Messrs. T. and G. Little, Nichol House, Lazonby; 2, Mr. J. C. Toppin, Musgrave Hall, Skelton.

HARNESS OR HUNTING HORSES.

Three year-old colt or gelding: 1, Messrs. Workman, Petteril Green, Calthwaite; 2, J. Kidd, Haverflatts, Milnthorpe.

One-year-old filly: 1, Capt. F. Markham, Morland; 2, J. Blackburn, Hasty Bank, Catterlen.

Colt or filly foal: 1, J. Sewell Rigg, Elm Bank, Appleby; 2, Messrs. Workman, Petteril Green, Calthwaite.

Harness and hunting horses shown for the society's premiums: 1, F. Armstrong, George Hotel, Penrith; 2, J. Siddle, Penrith.

Three-year-old gelding or filly, by a thoroughbred horse: 1, F. Armstrong, George Hotel, Penrith; 2, J. Hudson Barco, Penrith; 3, J. Kidd, Haverflatts.

Four-year-old hunter, mare or gelding: 1 and 2, J. Wilson Helsington Laithes, Kendal; 3, T. and G. Little, Nicol House, Lazonby.

Hunter, to be brought into the ring mounted: 1, C. H. Wilson, Oxenholme, Kendal; 2, J. Wilson, Helsington Laithes, Kendal; 2, J. Sewell Rigg, Elm Bank, Appleby.

SHEEP.

BORDER LEICESTERS.

Tup, being an approved stockgetter, and more than one shear, engaged to be kept during the succeeding season within the limits of this society: 1, Mr. W. Bell, St. Martin's-terrace, Brampton; 2, Mr. J. Thompson, Demense, Kirkoswald.

One Shear Tup—1, Mr. A. Watson, Springfield, Kirkoswald; 2, Mr. J. Thompson, Demense, Kirkoswald.

Pair of Gimmer Shearlings; 1 and 2, Mr. J. and T. Wood, Blencogo, Wigton.

Border Leicester Tup Lamb: 1, T. and J. Wood, Blencogo, Wigton; 2, Mr. A. Watson, Springfield, Kirkoswald.

Pair of Border Leicester Gimmer Lambs: 1 and 2, T. and J. Wood, Blencogo, Wigton.

WENSLEYDALE OR BLUE-FACED SHEEP.

Tup of any age, being of an approved stock-getter, and more than one shear, to be kept as in Premium 39: 1, Lord Henry Bentinck, Underley, Kirkby Lonsdale; 2, J. Gibson and Son, Natland Hall, Kendal.

One-shear Tup: 1, J. Gibson and Son; 2, Lord Henry Bentinck.

Pair Gimmer Shearlings: 1 and 2, Lord Henry Bentinck.

Tup lamb: 1, J. Gibson and Son; 2, Lord Henry Bentinck.

Pair of Gimmer Lambs: 1, Lord Henry Bentinck; 2, J. Gibson and Son.

DOWNS.

Tup, being an approved stockgetter, and more than one-shear, to be kept as in Premium 39: 1, J. Gibson and Son; 2, Mr. J. C. Toppin, Musgrave Hall, Skelton.

One-shear Tup: 1, Mr. J. C. Toppin; 2, Mr. R. J. Huddleston, Natland Park, Kendal.

Pair of Gimmer Shearlings: 1, Mr. J. C. Toppin; 2, Mr. R. J. Huddleston.

Tup Lamb: 1, Mr. J. C. Toppin; 2, J. Gibson and Son.

Pair of Gimmer Lambs: 1, Mr. J. C. Toppin; 2, J. Gibson and Son.

BLACK-FACED MOUNTAIN SHEEP.

Tup, being an approved stock-getter, and more than one shear, to be kept as in Premium 39: 1, Mr. T. Rawlinson, Park House, Kirkby Lonsdale; 2, Mr. J. Dargue, Burneside Hall, Kendal.

One-shear tup: 1, Mr. T. Rawlinson; 2, Executors Mr. C. Fell, Allen Bank, Windermere.

Pair of gimmer shearlings: 1, Mr. J. Dargue; 2, Mr. T. Rawlinson.

Tup lamb: 1, Mr. J. Dargue; 2, Mr. T. Rawlinson.

Pair of gimmer lambs: 1, Mr. J. Dargue; 2, Mr. T. Rawlinson.

PENRITH.

Tup, being an approved stock-getter, and more than one

shear: 1, Mr. T. Gasgarth, Wescoe, Threlfield; 2, Mr. J. Rothery, Palace Howe, Cockermouth.
One-shear tup: 1 and 2, Mr. W. Mackereth, Ambleside.
Pair of gimmer shearlings: 1 and 2, Mr. W. Mackereth.
Tup lamb: 1, Mr. J. Rothery; 2, Mr. W. Abbott, Hartsop Hall.
Pair of gimmer lambs: 1, Mr. W. Mackereth; 2, Mr. H. C. Howard, Greystoke Castle, Penrith.
Ram and two female sheep of any breed: 1, Mr. J. C. Toppin, Musgrave Hall, Skelton.

PIGS.

Boar, being an approved stock-getter, engaged to be kep the succeeding six months within the limits of the society for the use of the same, at 5s. each sow, and 5s. per week for keep: 1, Mr. W. Wilburn, Fishergill, Wigton; 2, Mr. J. Borrowdale, Foster-street, Penrith.
Breeding sow, to have produce within three months of the show: 1 and 2, Mr. G. Graham.
Fat pig, under 18 months old, being the bona-fide property of an agricultural labourer or cottager working for wages: 1 G. Emmerson, 1, James-street, Castletown; 2 and 3, D. Chester, Mill-street.

Wadebridge.

The third annual amalgamated exhibition of the Wadebridge and District Agricultural and Cottage Garden Association took place at Wadebridge on Wednesday, and proved very successful. The showyard was on a portion of the Treyanion estate, overlooking the Camel, and embracing some charming views. A heavy downpour of rain in the morning threatened to mar the show, but happily the weather cleared, and, with the exception of a smart shower at noon, the day was fine, a strong breeze tempering the hot rays of the sun. The attendance of visitors was a record one. So far as the cattle, horse, sheep, and pig sections were concerned, the entries were about the same numerically as last year, when they were higher than ever before, and competition in all was keen. The agricultural horses were of considerable merit; indeed, it was a difficult matter to find a poor animal in the five classes. Brood mares in foal, or with foal at foot, made the strongest show, with ten entries. Mr. Wesley Stephens, of St. Mabyn, secured the greater portion of the honours for this class of animal, winning four firsts and a second, besides being awarded the president's silver cup for the best exhibit among the agricultural horses. The winner, a grand three-year-old filly, was, however, run very close by a capital brood mare shown by Messrs. H. G. and E. P. Peter-Hoblyn, of Washaway. The young horses in the hunter and hack classes were only moderate. There were, however, some useful animals in the open classes, but the ponies were disappointing. The jumping, which was moderately good, was watched with interest by a large crowd, and in the grand stand, as was a parade of the prize winners late in the afternoon. Among the cattle Devons were capitally represented. The bull classes, especially that for the old beasts, were very strong. Cows were also numerous and of good quality. In the classes not restricted to Devons the Herefords were a long way ahead of other breeds, and with typical specimens Messrs. Olver and Grose shared the honours. The sheep section included a very creditable lot of South Devons and Devon longwools, Messrs. Hawkey and Son, of St. Issey, securing the president's cup with a very fine hogg of the first-named breed. This year, for the first time, Leicesters were not represented. This was due to the fact that they have gone out of favour with the butchers of the district. The judges were unable to recall an exhibition at which they had seen such a wonderfully fine collection of pigs—all long blacks. So pleased were they with the section that they commended the whole of the exhibits.

Prize List.

HORSES.

DISTRICT CLASSES.

Special prize, silver cup, for the best agricultural horse: Mr. W. Stephens, St. Mabyn.
Brood mare for agricultural purposes: 1, Messrs. H. G. and E. P. Peter-Hoblyn, Colquite, Washaway; 2, Mr. W. Phillips, Wadebridge; 3, Mr. W. Hicks, Luxulyan; hc, Mr R. S. Olver, Trescowe.
Gelding or filly calculated for agricultural purposes, foaled in 1897: 1 and 2, Mr. W. Stephens, St. Mabyn; 3, Mr. R. S. Olver; c, Mr. F. Teagle, St. Columb.
Gelding or filly calculated for agricultural purposes, foaled in 1898: 1, Mr. W. Stephens; 2, Mr. R. S. Olver; 3, Mr. W. R. Grose; hc, Mr. C. Menhenick, St. Kew.
Colt, gelding, or filly calculated for agricultural purposes, foaled in 1899: 1, Messrs. H. G. and E. P. Peter-Hoblyn; 2, Mr. W. Stephens; 3, Mr. R. S. Olver; r, Mr. C. Menhenick.
Pair of agricultural horses, not exceeding three years old, the property of a tenant farmer: 1, Mr. Wesley Stephens; 2, Messrs. H. G. and E. P. Peter-Hoblyn; 3, Mr. R. S. Olver; r, Mr. F. W. Pollard, St. Kew.
Brood mare, fit for hack, hunter, or carriage horse: 1, Messrs. H. G. and E. P. Peter-Hoblyn; 2, Mr. C. Menhenick; 3, Mr. A. E. Wickett, Camelford; r, Mr. Digory Baker, Camelford.
Gelding or filly calculated for a hunter, foaled in 1897: 1, Mr. T. Littleton, Bodmin; 2, Mr. Andrew Tremain, St. Merryn; 3, Mr. Hart Biddick, Sladesbridge; r, Mr. C. Menhinick.
Gelding or filly calculated for a hack, foaled in 1897; 1, Mr. C. Menhinick.
Gelding or filly calculated for a hack, hunter, or carriage horse, foaled in 1898: 1, Mr. C. Menhinick; 2, Mr. M. P. Menhinick, Egloshayle; 3, Mr. Percy Stephens, Camelford; r, Mr. Thomas Rundle, St. Eval.
Colt, gelding, or filly calculated for hack, hunter, or carriage horse, foaled in 1899: 1, Mr. C. Menhenick; 2, Messrs. G. and O. Nickell, Helland; 3, Mr. Wesley Stephens.

OPEN CLASSES.

Cob not exceeding 14·3 h.h., and not more than 5 years old: 1, Mr. J. Mead, Falmouth; 2, Mr. J. Cardell, Newquay; 3, Mr. W. J. Lovering, St. Austell; r, Mr. H. F. Nicholls, St. Columb Minor.
Hunters, mare or gelding, over three years, and not exceeding 5 years; 1, Messrs. Yeo Bros., Bodmin; 2, Mr. A. H. Retallick, Bodmin; 3, W. T. Lovering; r, Mr. Charles Ham, Bodmin.
Hack, mare or gelding, over 3 years, and not exceeding 5 years: 1, Mr. John Cardell, St. Columb Minor; 2, Mr. M. P. Menhinick, Egloshayle; 3, Mr. J. Cardell, Newquay; r, Mr. C. M. Harris, Camelford.
Harness horses: 1, Mr. J. S. Hellyar, St. Columb; 2, Mr. J. Mead; 3, Messrs. H. G. and E. P. Peter-Hoblyn.
Mare or gelding under 15 hands high, and not exceeding 6 years old: 1, Mr. J. Cardell, St. Columb Minor; 2, Mr. G. Brendon, Bude; 3, Mr. W. J. Lovering; r, Mr. H. F. Nicholls, St. Columb Minor.
Pony not exceeding 13 hands high, and not more than 8 years old: 1, Mr. J. Mead; 2, Mr. G. Jenkin, Davidstowe; 3, Mr. T. P. Clemence, Withiel.
Jumping: Mare or gelding not less than 14.3 hands high: 1, G. Brendon, Bude; 2 Mr. J. E. Hill, Liskeard; 3, Mr. E. Snell, Scorrier.
Mare or gelding under 14.3 hands high: 1, Mr. J. G. James, Grampound Road; 2, Mr. A. J. Best, St. Dennis; 3, Mr. S. Hancock, Roche.

CATTLE.

DISTRICT CLASSES.

Devon bull, calved previous to January 1st, 1899: 1, Mr. B. Hawken, De Lank; 2, Messrs. Williams and Martyn, Padstow; 3, Mr. J. Button, Michaelstow; r, Mr. P. Biddick, St. Brecck; c, Mr. J. Hill, St. Kew; Mr. J. G. Hawkey, St. Minver.
Devon bull, calved in 1899: 1 and hc, Mr. W. E. Menhinnick, St. Kew; 2 and 3, Mr. J. Button; r, Mr. J. A. Tremain, St. Ervan.
Devon cow, in calf or in milk, three years old or above: 1, Mr. R. M. Martyn, Padstow; 2, Mr. T. H. Dyer, Endellion; 3, Mr. J. G. Hawkey; r, Mr. W. E. Menhinnick; hc, Mr. J. G. Clemoes, Bodmin.
Devon heifer, calved in 1898: 1, Mr. T. H. Dyer; 2, Mr. W. E. Menhinnick; 3, Mr. C. Menhinnick, St. Kew.
Devon heifer, calved in 1899: 1, Mr. W. E. Menhennick; 2, Mr. R. M. Martyn; 3, Mr. J. Button; r, Mr. J. Button.
Bull, any other breed, calved previous to 1899: 1, Mr. R. S. Olver, Trescowe; 2, Mr. W. J. Tucker, Trevisquite; 3, Mr. R. Roseveare, St. Breock.
Bull, any other breed, calved in 1898: 1, Mr. R. S. Olver; 2, Mr. W. R. Grose, Penpont.
Cow, any other breed, in calf: 1, Mr. W. R. Grose, St. Kew; 2, Mr. R. S. Olver; 3, Mr. F. Teague, St. Columb; r, Mr. W. Phillips, Wadebridge.
Heifer, any other breed, calved in 1898: 1, Mr. R. S. Olver; 2, Mr. W. R. Grose; 3, Mr W. Phillips.
Heifer, any other breed, calved in 1898: 1, Mr. R. S. Olver.
Dairy cow or heifer, any breed, in milk: 1, Mr. R. Roseveare, St. Breock; 2, Mr. W. Phillips, Wadebridge; 3, Mr. R. G. Pollard, Wadebridge.

SHEEP.

DISTRICT, ANY BREED.

Silver Cup offered by President, for best exhibits in Sheep Classes: Messrs. T. E. Hawkey and Son.
Ram, any age: 1, Messrs. T. E. Hawkey and Son, St. Issey; 3, Messrs. Axford and Sons, St. Tudy; 3, Mr. W. Lanxon, Lanlivery.
Yearling ram; 1, special, and 2, Messrs. T. E. Hawkey and Son, St. Issey; 3, Mr. W. Lanxon, Lanlivery. Ewes: 1, Mr. J. A. Tremain, St. Ervan; 2, Mr. W. Lanxon, Lanlivery; 3, Mr. J. Button, Michaelstow.

PIGS.

DISTRICT.

Boar: 1, Mr. R. S. Olver; 2, Messrs. Bastard and Sons, St. Tudy.
Breeding sow, over twelve months old, in farrow, or that has farrowed within six months: 1, Messrs. Bastard and Sons; 2, Mr. J. Webber, St. Columb.
Pair of sows, under twelve months: 1, Mr. R. S. Olver; 2, Messrs. Bastard and Sons

Thirsk.

The fourteenth annual exhibition of the Thirsk Agricultural and Horticultural Society was held on Wednesday, in Mr. R. Bell's charming grounds known as The Park. In the sunshine that prevailed the site was particularly acceptable, as the shade of its trees afforded welcome shelter to both visitors and exhibits. The prize money amounted to £220, for which there were about 260 entries—a slight decrease on last year. The falling-off in exhibits was chiefly in the horse classes, and is accounted for by the fact that during the war in South Africa many of the best animals in the district have been purchased by the Government. However, though the entries were fewer, the quality was all right. Encouragement of agriculture in its own immediate district being the motto of the society, the exhibits in nearly all the sections were practically restricted to a radius of fifteen miles. Taking this check into consideration, the eight classes of hunters with upwards of fifty entries contained some first-class animals. Roadsters, divided into eight classes, were not strong, the only classes that were well filled being that for brood mares, which was headed by a six-year-old chestnut by Garton Duke of Connaught, and the class for colt foals, in which the white rosette was handed to Mr. Matteson's Land Agent, by Diavolo. Cleveland or coaching horses numbered 13, which, for the district, was not unsatisfactory. In the section for agricultural horses, of which there were 45, the special prize—a cup value £20—given by Mr. J. Farrar Blenkhorn, of Hawick, for the best pair of agricultural horses, three years old or upwards, the property of a tenant farmer, and regularly worked by the exhibitor at least six months prior to the show, was won by Mr. G. Kendrew. As this is the third time that Mr. Kendrew has won the cup, it now becomes his property. It was satisfactory to note that the trophy elicited keener competition than was the case a year ago. The sheep classes were well filled, and the dog trials formed a pleasing feature of the meeting. The "gate" was the biggest in the history of the show.

Prize List.

HORSES

HUNTERS.

Brood Mare for breeding Hunters, to be shown with her foal: 1, H. Brown, Sutton-on-Forest (Constance); 2, T. Snowden, Busby Stoop (Medical Queen); 3, J. Ingledew.
Three-year-old Gelding or Filly: 1, G. Kendrew, Elm House, Northallerton (Shamrock); 2, W. Jordison, Carlton House.
Two-year-old Gelding or Filly: 1, E. T. C. Antrobus, Marton-le-Moor, Ripon (Nutwith); 2, J. Benson and Son Huby
Yearling Gelding or Filly: 1, G. Jackson (Dishforth); 2, W. Jordison.
Colt foal: 1, G. Kirk, Kilburn (Surprise); 2, J. Ingledew.
Filly foal: 1, H. Brown; 2, J. Rawlins (Jessie). Special prizes given by F. A. E. Samuelson, Esq.
Three-year-old gelding or filly, likely to make a hunter or charger, must be shown undocked: 1, J. Fletcher; 2, W. Jordison. Special prizes given by Mr. W. Jordison.
Foals, colts, or fillies, by his horse (Seaport): 1, G. Appleton; 2, E. Bartram.

ROADSTERS

Brood mare for breeding roadsters, to be shown with her foal: 1, H. Brown; 2, J. Burton and Sons, Copt Hewick (Miss Derwent); 3, F. R. Hansell, Brook House, Sutton (Constance). Special prizes given by Messrs. J. Burton and Son.
Foals, colts, or fillies, by their horse (Garton Performer): 1, A. C. Bamlett.
Three-year-old gelding or filly: 1, J. Cattle, Moxby, Stillington (Moxby Swell); 2, J. Palliser, Low Woods, Hemsley (Hemsley).
Two-year-old gelding or filly: 1, J. Burton and Sons (Derwent Lily); 2, J. Cattle; 3, S. Cliff, Crayke (Crayke Abbott).
Yearling gelding or filly: 1, F. R. Hansell (Francesca); 2, G. Rutherford.
Colt foal: 1, F. Mattison (Land Agent); 2, A. C. Bamlett.
Filly foal: 1, W. Atkinson (Sessay); 2, H. Brown.

RIDING

Hunter gelding or mare, not exceeding 5 years old, to be ridden in the ring: 1, W. Jordison (Mowbray Huntsman); 2 E. T. C. Antrobus (Mafeking); 3, E. Harrison (St. Pat).
Gentleman's hackney, geilding or mare (not to exceed 15 hands 3 inches high), any age, to be ridden in the ring: 1, J. Cattle (Moxby Swell); 2, Mrs. Jordison, Carlton House (Lady Grace); 3, J. Palliser.
Gelding or mare, any age (not to exceed 14 hands high), to be ridden in the ring: 1, W. A. Johnson (Thirsk); 2, E. T. C. Antrobus (Prinnie).

DRIVING

Special prizes given by F. E. Walker, Esq., Ravensthorpe Manor (Open to all England. Dealers excluded). Horse, any height, to be driven in harness, the general turn-out to be taken into consideration: 1, J. Cattle (Moxby Swell); 2, J. T. Hansell.
Horse, 14 hands high and upwards, which must have been the bona-fide property of the exhibitor at least three months prior to the show, to be driven in harness: 1, Mrs. Jordison; 2, R. Hebblethwaite (Highthorn).
Horse, under 14 hands high (conditions same as preceding class): 1, W. Jordison (Lady Carlton).
Turnout belonging to a shopkeeper in Thirsk or Sowerby (conditions same as preceding class): 1, W. A. Johnson; 2, J. Smiths (Limited)

LEAPING

(Open).—Leaper, any age or sex: 1, T. E. Lavin (Ripon); 2, J. C. Bannister (Fodder Finder); 3, J. Waddington (Easingwold).
Leaper, any age or sex, that has not won a prize of £5 at any time prior to the date of entry (limited to 15 miles radius): 1, Robinson, Leckby, Asenby, Thirsk (Good Bye); 2, G. W. Gibson, Thimbleby Grange, Northallerton (Warrior); 3, J. C. Bannister (Mac).

CLEVELAND OR COACHING

Brood mare, to be shown with her foal: 1, F. J. Pettinger (Vanity); 2, K. Rickatson, Tronholme Bar.
Colt or filly foal: 1, F. J. Penninger; 2, J. Rooke (Ladysmith).
Two-year-old gelding or filly: 1, W. Wood, Bilsdale West, Helmsley (Queen's Rocket); 2, J. Rooke (Lord Grey).
Yearling colt, gelding, or filly: 1, J. Rooke (Klondyke); 2, J. H. Boyes, Boltby (Lady Good Friday).

AGRICULTURAL

Brood mare for breeding agricultural horses, to be shown with her foal: 1, R. and J. Davison, Lund Court, Helmsley (Hempfield Silver); 2, W. F. Pinkney, Stubb House, Northallerton; 3, W. D. Wedgewood, Highfield, Sessay (Jewel).
Three-year-old gelding or filly: 1, G. Kendrew (Captain); 2, E. Clarke (Gristhwaite).
Two-year-old gelding or filly: 1, R. and J. Davison (Silver Queen); 2, T. O. I. Pick.
Yearling, gelding, or filly: 1, G. Chapman, Reins Farm, Helmsley (Silver Queen); 2, R. Stubbs.
Colt foal: 1, W. T. Robinson; 2, S. Kitching, Newsham (Mafeking).
Filly foal: 1, W. D. Wedgewood; 2, A. Bovill.
Mare or gelding for agricultural purposes, any age: 1, R. and J. Davison (Hempfield Silver); 2, G. Kendrew.
Special prize given by J. Farrar Blenkhorn, Esq., Sterches, Hawick (exhibitors to reside within a radius of 8 miles). Pair of agricultural horses, three years old or upwards, to be shown without harness, and must have been the bona fide property of a tenant farmer and regularly worked by the exhibitor, at least six months prior to the show; the cup to be won three times by the same owner before becoming his property; silver cup, commercial value £20—G. Kendrew, Ben and Duke.

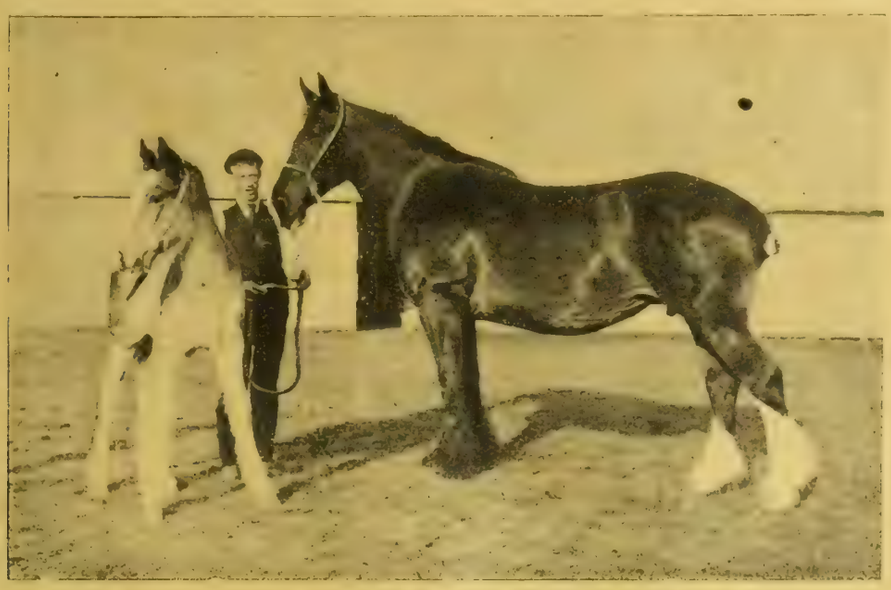
SHEEP.

Leicester, Lincoln, or Wensleydale.—Shearling ram: 1, J. M. Strickland, Pasture House, Bransby (Easingwold); 2, W. Cleasby.
Aged ram: 1, W. Cleasby; 2, J. M. Strickland.
Three shearling gimmers: 1, W. Cleasby; 2, Colonel I'Anson.
Three ewes: 1, Colonel I'Anson; 2, W. Cleasby.
Three lambs: 1, W. Cleasby; 2, R. P. Wood, Low Ellington, Masham.
Any other variety—pure or cross-bred—three shearling gimmers: 1 and 2, R. Stubbs.
Three ewes: 1 and 2, R. Stubbs.
Three lambs: 1, T. J. Bell; 2, T. J. Bell, Sessay Parks.
Sheep dog trial (open): 1, W. I'Anson, Breckenbrough (Spot); 2, B. Harris, Leeming Lane, Sinderby, Thirsk (Roy); 3, Miss Chapman, Nether Silton, Northallerton

South Durham.

The South Durham and North Yorkshire Horse and Dog Show at Darlington took place on the 27th ult., and was in every respect a most successful one. There were fewer horses than has been the case for five years back, but there was a record show of dogs, and thus the total number of entries was brought to a higher figure than any since 1894. In that year horses were exceptionally numerous, and the total number of entries was 1,495. This year they reached 1,591, or fifty-two more than last year and something like twenty more than the previous year, and there was no falling away in quality. Hunters made by far the best show. There was not a class which had not some merit in it, and in some instances animals were brought before the judges which stood head and shoulders above the average. The brood mares, for instance, were a grand lot. Eleven in number, they were headed by Mr. F. B. Wilkinson's Lady Grosvenor, a bay mare which has gained a large number of honours. A dark grey mare owned by Mr. E. E. Lloyd Pease, got second, the reserve card going to Lady Grey, a beautiful mare from Yarm that obtained Royal honours at

York. The class for colt foals was well filled, the winner being found in the Bedale-bred blood foal Rainbow, a very promising animal. He was closely run by Mr. Snowdon's (Thirsk) Baldersby, a strong muscular foal that came in for very favourable criticism. Of the yearlings the geldings were the stronger in quality, although the fillies excelled in regard to number. In the very front rank of excellence came the three-year-old geldings. There was a very close competition between the black owned by Messrs. T. and H. Ward, of Pinchingthorpe, and Mr. J. S. Darrell's chestnut from West Ayton. Both horses are full of quality, and after a referee had been called in to aid the judges, Messrs. Ward's exhibit was given the premier card. Mr. Darrell scored another success in the class for three-year-old fillies, with Golden Ruby, who has the blood of the well-known sire, Knight of Ruby, in her. There were some admirable animals, too, among the thoroughbred geldings and fillies, the property of bonâ-fide farmers, and hunted with hounds in the district. Mr. Thomas Brown's (Darlington) Catterick Black, who took the first prize, is short in the limbs, and a true mover. The second card went to a chestnut gelding owned by Mr. F. W. Smith, which got a first in another class. There was little doubt as to which was the best of the four-year-old geldings or mares owned by tenant farmers, Messrs. T. and H. Ward's bay gelding, Lord Clare, which is essentially a heavy-weight carrier, soon demonstrating his superiority. The open class for hunters that had not hitherto taken a first prize, attracted no fewer than twenty-three entries, a brown gelding belonging to Mr. F. B. Wilkinson taking the first card. The roadsters did not create very keen competition. In number they were about a dozen fewer than last year, and they made a comparatively poor show. The best class was the three-year-olds, not-



Mr. J. Peacock's Clydesdale Mare, "Queen of Gretna," and Foal.

withstanding that there were only three animals in it. Mr. William Lakin's (Pickering) exhibit was a chestnut gelding by Rosencrantz, and there was no doubt this horse was the best the judges had before them during the day. The Howdenshire gelding, shown by Messrs. Dodds (Darlington) was a good second. Agricultural horses did not attract a lot of attention, although they included some very useful animals. Some surprise was caused by the disqualifying by the veterinary surgeon of Mr. T. Nesbitt's bay mare, which, after winning a number of prizes elsewhere, was now given the second card by the judges in the class for brood mares. She failed to pass the inspection, and Mr. J. T. Peacock's Queen of Gretna was accordingly placed. The foals were both numerous and good; and one of the most notable horses in the section proved to be a two-year-old brown filly owned by Mr. T. Nesbitt, of Witton-le-Wear. Nearly all the classes in the tenant farmers' section were well filled.

Bradford.

The Bradford Agricultural Society decided to make their show extend over two days this year, but they were unfortunate in their choice of date—July 27th and 28th—for they clashed with no fewer than four other exhibitions. The consequence was that the attendance of visitors was not at all satisfactory, and in all probability it will be found when the accounts are made up that loss has been sustained. The clashing also militated against the entries, which in the more important classes fell short of last year's number, though the minor sections brought up the total to about that of 1899. The show was held, as usual, in Messrs. Mitchell Brothers' Park, at West Bowling. The principal interest naturally centred in the horses. The championship for the best gelding, mare, filly, or yearling colt was won by Mrs. Fred Holmes's Love Letter, which, owing to late entry or some singular piece of laxity, was not mentioned in the catalogue. Mr. J. Robinson's (Hull) Mornington Cannon was placed on the reserve for the championship. Mr. D. Hopkinson's Executors' Lady Bradford took the silver cup and Hackney Society's medal. She is a well-known winner, and has only been beaten by her dam, Golden Belle, here placed second. Mr. S. R. Tennant's Revival took the challenge cup for stallions, Mr. J. Scott's Copleymede being close up. For the rest the Hackney and saddle horses were not of particularly good class, Mr. A. Grandage's Bramhope Arch Deacon was a wonderfully good specimen —"a good one," as a good judge put it, "in good company." The cup was ultimately awarded to Bramhope Arch Deacon. The two-year-old prize was taken by an average mare. In the old age class the winner was a very useful type of brood mare. A very weighty gelding was placed second, the third being useful. The winner of the entries was Mr. Forshaw's Bungeon, which has taken first three years in succession in the Yorkshire Show. Mr. Lindley's Southgate Hero, which was placed second, is a useful, weighty horse. In the classes for cattle the entries were only very moderate in number. The gold medal in the local classes was taken by a good bull of Mrs. E. Gill, Silsden. The challenge cup was taken for the second time by, and thus became the property of, Mr. John Handley, with his bull which was placed second at the Royal Show and third at the Highland Show. This makes the third cup the animal has taken this year. The wool classes were a failure, only one firm, Messrs. Stansfield and Co., of Halifax, entering for Classes 28, 29, 30, and 31, whilst Classes 32, 33, 34, and 35 did not attract any entries.

CATTLE.

Bull calf, under one year old (open): J. Handley, Mirfield. p.
Heifer calf, under one year old: Mrs. E. Gill, Silsden.
Bull, one year and under two years old: 1, J. Handley; 2, Mrs. E. Gill.
Bull, two years old and upwards: J. Handley.
Heifer, over one year old and not exceeding two years old: 1, T. Atkinson; 2, W. Walsh, Bingley.
Cow, above two years old: 1, W. Walsh; 2, T. Atkinson, Bury.

FARMERS' CATTLE

(Open to tenant farmers within a radius of ten miles from the Town Hall.)

Bull, any age or breed: 1 and gold medal, Mrs. E. Gill.
Cow or heifer, any age or breed: 1 and 2, W. Walsh.
Cow for dairy purposes, Alderney, Guernsey, or any other small breed or cross-breed, under 10cwt.: 1, W. Walsh; 2, J. Blackburn, Clayton Heights.
Cow for dairy purposes, not previously classified: W. Walsh.

HORSES.

DRAUGHT AND AGRICULTURAL (OPEN)

Agricultural colt, gelding, or filly, foaled in 1899: 1 and silver cup, A. Grandage, Bramhope; 2, J. E. Shaw, Halifax; 3, H. Yates, Cleckheaton.
Agricultural gelding or filly, foaled in 1898: 1, H. Yates.
Agricultural gelding or mare, any age: 1, A. Grandage; 2, T. Edwards, Liverpool; 3, Prince, Smith, and Son.
Draught or agricultural stallion, any age: 1, J. Forshaw, Newark; 2, A. Lindley, Wakefield; 3, G. Tyson, Halifax.

HACKNEYS (OPEN)

Hackney entire colt, foaled in 1899: 1, W. Hurst, Sandal; 2, R. Berry, Hipperholme; 3, J. Carr, Hull.
Hackney, gelding or filly, foaled in 1899: 1, D. Hopkinson, Exors, Bradford; 2, F. Hind, Bradford.
Hackney gelding or filly, foaled in 1898: 1, J. Wrighton, Market Weighton; 2, G. H. Waterhouse, Dudley Hill.
Hackney mare and foal: 1, cup, and medal, D. Hopkinson's Exors.; 2, D. Hopkinson's Exors.; 3, G. Root, Menston.
Hackney stallion, any age: 1 and cup, S. R. Tennant, Driffield; 2 and 3, J. Scott, East Bierley.

SADDLE CLASSES

Gelding or mare, not exceeding 14 hands: 1, G. C. Ward, Baildon; 2, A. P. Robinson, Wakefield; 3, H. Blackburn, Cleckheaton.
Gelding or mare, exceeding 14 hands and not exceeding 15 hands, in saddle: 1 champ. and cup, Miss F. Holmes, Bingley; 2, T. L. Bradley, Nottingham; 3, E. H. Brayshaw, Bradford.
Gelding or mare, exceeding 15 hands, in saddle: 1 and reserve for champ., J. Robinson, Hull; 2, Mrs. F. Holmes; 3, Miss England, Manningham.
Lady's hack mare or gelding: 1, Miss England, Manningham; 2, Miss H. England, Manningham; 3, T. L. Bradley.

HARNESS (OPEN)

Gelding or mare, exceeding 15 hands, and not exceeding 15½ hands, in harness: 1, A. P. Robinson; 2, G. C. Ward, Baildon; 3, H. Blackburn, Cleckheaton.
Gelding or mare, exceeding 15 hands and not exceeding 15½ hands, in harness: 1, Mrs. F. Holmes; 2, E. H. Brayshaw, Bradford.
Gelding or mare, exceeding 15 hands, in harness: 1, Mrs. F. Holmes; 2, Miss England.
Gelding or mare, used for agricultural purposes, the property of bonâ-fide tenant farmers, and hunted regularly with hounds in the district during the season ending January 1st, 1900: 1, Wharton and Messrs. Bradford; 2, Fry Mason Combing Co., Bradford; 3, G. Armitage (Ltd.).
Trade or business turn-out, with two wheeled vehicle: 1, D. Wetherspoon, Bradford; 2, E. H. Brayshaw, Bradford; 3, S. C. Atkinson, Leeds.
Trade or business turn-out, with two wheeled vehicle: 1, Wharton and Messrs. Bradford; 2, Fry Mason Combing Co., Bradford; 3, G. Armitage (Ltd.).
Gelding or mare, in saddle or harness, exceeding 15 hands: 1, G. Tyson, Halifax; 2, G. Root, Menston.
Gelding or mare, in saddle or harness, not exceeding 15 hands: 1, A. P. Robinson, Wakefield; 2, H. Blackburn, Cleckheaton; 3, Mr. Mosman, Acton Bierley, Bradford.
Gelding or mare, in saddle, exceeding 14 hands: 1 and cup, J. Robinson, Hull; 2, G. Tyson, Halifax; 3, F. H. Ainley, Shipley.
Gelding or mare, in harness, not exceeding 15 hands: 1, A. Dobson, Leeds; 2, E. Jowett, Leeds; 3, G. Root.
Gelding or mare, in harness, 13 hands, but not exceeding 14 hands: 1, A. P. Robinson; 2, G. Hanson, Wilsden; 3, H. Blackburn.
Gelding or mare, in harness, exceeding 14 hands: 1, G. Tyson; 2, J. Tankard, Baildon.

HUNTERS

Trotter, any age or height, to be ridden by a lady, and shown in harness; speed to be considered: 1, J. Mosman, Bradford; 2, Mr. Molineaux, Bradford; 3, E. Hall, Huddersfield.
Steeplechase (about two miles). Horse or mare, any age or height: 1, R. Marston, Knaresborough; 2, G. England, Bradford.

LEAPERS

Leapers, any age or height: 1, C. Tomlinson, Selby; 2, W. Holmes, Selby.

Burton Shire Horse Show.

The fourth annual show in connection with the Burton-on-Trent and District Shire Horse Society was held in Peel Croft, Burton-on-Trent, on Wednesday, and proved a great success. The entries all round, and particularly in the open classes, were more numerous than on any previous occasion. Mr. James Eadie, of Barrow Hall, was by far the largest prize winner in both the local and open classes. Mr. P. A. Muntz, M.P., and Mr. J. Parnell, of Rugby, were also prominent prize winners. Mr. F. D. Winterton, of Walton Warren, again proved a very able and efficient secretary, and the success of the show is in a great measure due to his indefatigable zeal and energy. With the exception of a slight shower, the weather was all that could be desired.

The prize winners in the classes open to all England were as follows:—

Colt foal: 1, Mr. P. Albert Muntz, M.P., Dunsmore, Rugby; 2, Sir Oswald Mosley, Rolleston Hall, Tutbury; Johnson Gaunt, 3, Mr. D. Orme, Etwall; 4, Mr. John Hodson, Mickleover.

Filly foal: 1 and 2, Mr. Jas. Eadie, Barrow Hall; 3, Mr. P. A. Muntz, M.P.; 4, Mr. Thos. Appleby.

Yearling filly: 1, Mr. Jas. Eadie, Barrow Princess; 2, Mr. J. Parnell, Rugby, Rokeby Ladylove; 3, Mr. J. H. Appleby, Alberta.

Two year old filly: 1, Mr. W. Jackson, Knottingley, Holker R.I.; 2, Mr. J. Parnell, Rokeby Venus; 3, Mr. Jas. Eadie, Lockinge Mistletoe.

Three year old filly: 1, Mr. J. Parnell, Rokeby Judith; 2, Mr. Jas. Eadie, Tatton Maggie; 3, Mr. Rob Ratcliffe, Newton Park Blossom.

Gelding, four year old or upwards: 1, Mr. Jas. Eadie, Bardon Extraordinary; 2, Mr. Jas. Brooks, Wellington, Draymen; 3, Mr. Timothy Lowe, Walton, Captain.

Mare, four year old or upwards.—1, Mr. F. W. Lowndes, Rolleston Fuchsia; 2, Mr. Jas. Eadie, Hendre Fairy; 3, Mr. A. P. Muntz, Dunsmore Golden; 4, Sir Oswald Mosley, Hendre Twilight.

The President's Cup, value 20 guineas, for the best foal, colt, or filly entered in the local classes.—1, Mr. Thos. Appleby; 2, Mr. H. J. Marbrow.

Colt or filly foal sired by any horse at the Barrow Stud.—1, Mr. J. F. Hollingworth, Weston-on-Trent; 2, Mr. Frank Wilkinson, Beeston; 3, Mr. F. W. Lowndes; 4, Mr. H. Warrington, Cotton House.

North Somerset.

On Wednesday Yatton was the scene of the 58th annual exhibition of the North Somerset Agricultural Society, and although the weather was none too favourable, the attendance of visitors was a very large one, and the Society's return to Yatton after a lapse of close on fifteen years is likely to turn out a most successful event financially. It was also successful in other directions, for the number of entries received was a good one, and the quality of the exhibits was quite up to the average. In the farmers' classes there was a capital representation of stock creditable to the exhibitors, and in nearly all cases making competition sustained to a degree. In some classes there were very good strings, but this was due in every instance to accountable causes. The weather was bad in the early morning, which made a long road journey for cattle undesirable, and the show being three weeks earlier than usual, it naturally clashed with the Exeter Show, which accounted for the absence of some entries in the horse classes. With these adverse influences the exhibition was nevertheless an excellent one. The judges were Hunters, hacks, jumping, etc., Messrs. A. F. Hardwick, Wade, and R. Sawell (Danswell, Sussex); Agricultural horses and colts, Messrs. T. Chapman (Orchard Portman), and Sidney Harvey (Gore-court); Cattle and sheep: Messrs. John Gage (Clevedon) and Robert Lever (Bridgwater); Jersey cattle, Mr. C. C. Tudway, Wells.

The agricultural horses made up a display which

would have done credit to a larger society with a wider area. The tenant farmers especially deserve commendation for the excellence of their entries. The principal winners included Mr. Arthur E. Alvis, of East End Farm, Nailsea; Mrs. E. Butler, Charlton Farm, Portbury; Mr. George Davis, Shipway Farm, Portbury; Mr. H. Macky, Congresbury; and Mr. Jeffery Burnett, Clapton. In the brood mare class suitable for hunters or roadsters, Mr. Brightric-Gee took first with Kitty, a grand-looking bay, Dr. Fuller, of Long Ashton, being second with Bonnie Belle, a brown. In the two-year-olds Mr. Gee was first, and Mr. Frank Watts a creditable second with a bay gelding now named Sensation. The first of the open classes for driving was for entries not exceeding 13 hands. The winner of the 13 hands was Mr. Tompkins, of Cribb's Causeway. There was a pretty class, indeed, for the exceeding 13 hands and not exceeding 15 hands. It was a close run for the first honours between Dr. Fuller's Lady Louise and Mr. F. Ball's dark bay mare Gwen, both of whom went exceedingly well, and although first prize went to Lady Louise, Mr. Ball's second was a distinctly good one. In the class exceeding 15 hands Mr. Frank Leigh was well to the front with his black mare, and he took like honours with his brown gelding in the class for saddle horses between 14 and 15.2 hands. The same exhibitor also secured second honours for saddle cobs not exceeding 14½ hands. Miss May Butcher won the ladies' driving prize, and also first prize in the jumping classes for horses which have hunted with the local packs. The open jumping brought out a good field of fine performers. Ultimately the first prize, value £10 10s., went to Newcastle, ridden by Mr. T. Blinman, and the second prize to Miss May, ridden by Miss Butcher.

The show of cattle was on the whole a satisfactory one. Mr. Thomas Dyke's prize of £3 for the best non-pedigree bull above two years fell to Mr. J. Burdge, of Claverham, and for yearlings the first prize was awarded to Mr. John Watts, of Gatcombe Farm, Flax Bourton. There was quite a large competition in the Shorthorn bulls, Sir William H. Wills, Bart., M.P., Mr. Sidney Hill, Mr. G. F. King, and Mr. John Little being represented. The Chewton Keynsham breeder was placed head of the class with Chewton Oxford Cornelius, Langford Lavender, owned by Mr. Hill being second. There were several good heifer calves in the class for pairs, and the same applies to the dairy cows (pairs). A small but typical lot were shown in the in milk Jerseys, the prize going to Mr. Antony Gibbs. Fat cattle were fairly represented. The half-dozen sheep classes filled up exceedingly well, but the pig prizes, in consequence of the order of the Board of Agriculture, were withheld.

Prize List.

CATTLE.

Bull above two years: 1, Mr. John Burdge, Claverham Court.

Yearling bull: 1, Mr. J. Watts, Gatcombe Farm (Flax Bourton).

Shorthorn bull above 12 months old: 1, Mr. G. F. King, Chewton Keynsham (Chewton Oxford Cornelius); 2, Mr. Sidney Hill (Langford Lavender); hc, Mr. John Little, Paxcroft Farm, Trowbridge (Vain Lord); c, Sir William Henry Wills, Bart., M.P. (Blagdon Medallion).

Bull calf: 2, Mrs. J. D. Wallis, Kingston, Seymour (Sir Redvers Buller).

Pair of heifer calves: 1, Mr. Henry Crossman, Yatton; 2, Mrs. A. Hardwick, Clapton Farm, Portishead; hc, Mr. James Parsons, Portishead; c, Mr. C. F. Weeks, Tickenham.

Pair of dairy cows, to be shown in milk: 1, Mr. John Little, Paxcroft Farm, Trowbridge; 2, Mr. Stephen Harding, Bower Ashton.

Pair of dairy cows, bred by exhibitor, to be shown in milk: 1, Mr. James Parsons (Beauty and Hereford); 2, Mr. William Burdge, jun., Kingston Seymour; r, Mr. James Parsons, Greenfield, Portishead (Floss and Cherry).

Pair of three-year-old heifers, bred by exhibitor, to be shown in milk: 1, Mr. Benjamin Crossman, Claverham; 2, Mrs. A. Hardwick, Clapton; r, Mr. William Burdge, Kingston Seymour (Lofty and Strawberry).

Pair of two-year-old heifers, bred by exhibitor, in milk or in calf: 1, Mr. W. G. Williams, Midgell Farm, Chelvey; 2, Mr. W. G. Williams; r, Mr. James Parsons.

Jersey or Guernsey cow, to be shown in milk: 1, Mr. Antony Gibbs (Buttercup III.); 2, Mr. Antony Gibbs (Lass of Jersey II.); r, Sir J. H. Greville Smyth, Bart. (Lady Smyth); c, Sir J. H. Greville Smyth, Bart. (Daisy Ashton II.)

Two-year-old Jersey or Guernsey heifer: 1, Mr. James Mountstevens, Yatton (Agnes 3rd); 2, Mr. James Mountstevens (Yatton Beauty); r, Mr. W. A. Morgan, Nailsea (Dashing Yalland); hc Captain C. F. O. Davies, Cleve; c, Mr. A. E. Masters, Yatton (Beauty II).

Pair of yearling heifers, bred by exhibitor: 1, Mr. John Burdge; 2, Mr. W. G. Stevens; hc, Mrs. A. Hardwick.

Pair of two-year-old steers, bred by exhibitor: 1, Mr. Arthur Hardwick, Easton-in-Gordano; 2, Mr. Arthur Hardwick; r, Mr. W. G. Williams.

Pair of yearling steers, bred by exhibitor: 1, Mr. W. G. Williams; 2, Mr. Amos Williams, Yatton.

FAT CATTLE.

Pair of fat steers, not exceeding four years old: 1, Mr. George Davis, Portbury; 2, Mr. Arthur Hardwick.

Fat heifer: 1, Messrs. Williams Bros.; 2, Mr. George Hardwick; c, Messrs. Williams Bros.; c, Mr. George Hardwick.

Fat cow: 1, Mr. George Hardwick; 2, Messrs. Williams Bros.; r, Mr. George Hardwick.

SHEEP.

Ram: 1, Mrs. H. White, Flax Bourton; 2, Mr. W. M. Court, Parsonage Farm, Long Ashton; r, Mr. W. R. Withers, Backwell.

Ram lamb: 1, Mr. E. J. Edwards, Yatton; 2, Mr. John Cottle, Chelvey Court; r, Mr. J. Ha Cottle.

Pen of five stock ewes: 1, Mr. John Cottle; 2, Messrs. Williams Bros.; r, Mr. John Alvis, Brockley.

Pen of five 2-tooth stock ewes: 1, Mr. John Cottle; 2, Mr. Arthur Hardwick; r, Messrs. James Webber and Son, Puxton, Hewish.

Pen of five chilver stock lambs: 1, Mr. W. H. Churches, Hewish; 2, Mr. John Alvis; r, Mr. W. H. Churches.

Pen of five fat sheep: 1, Mr. Samuel Dyer, Kenn; 2, Messrs. James Webber and Son; r, Mr. Samuel Dyer.

HORSES.

Pair of cart horses (mares or geldings), the property of a tenant farmer: 1, Mr. A. E. Alvis, Nailsea (Smart and Jolly); 2, Mrs. E. Butler, Portbury; r, Mr. William Stallard, Wraxall (Darling and Diamond).

Cart horse (mare or gelding), the property of a tenant farmer: 1, Mr. George Davis (Darby); 2, Mrs. A. Hardwick; r, Mr. Samuel Dyer, Kenn Court (Captain).

Cart mare and foal: 1, Mr. Henry Macey (Blackbird); 2, Mr. Henry Macey, Brimsea, Congresbury (Jolly); r, Mr. Jeffery Burnett, Portishead (Pleasant).

Mare and foal for breeding hunters or roadsters: 1, Mr. Brightrie Gee, Bedminster (Kitty); 2, Dr. Fuller, Long Ashton (Bonnie Belle); r, Mr. E. J. Edwards.

Two-year-old gelding or filly for saddle or harness purposes: 1, Mr. Brightrie Gee (Topmast); 2, Mr. Frank Watts, Bower Ashton.

Two-year-old cart gelding or filly: 1, Mr. James Webber (Miss Xerxes); 2, Mr. James Webber (Captain); r, Mr. Henry Macey; hc, Mr. E. Frost, Honey Hall, Congresbury; c, Mrs. A. Davies.

Yearling cart colt or filly: 1, Mr. Henry Macey; 2, Mr. W. H. Dyer, The Batch, Tickenham; r, Mrs. A. Hardwick; c, Mr. Amos Williams, Barberry Farm, Yatton (Lord Hitchin).

Harness horse, above 14 hands, suitable to drive and to assist in general farm work: 1, Mr. Charles Binning, Cleeve (Polly); 2, Mrs. E. Butler, Portbury (Prince); r, Mr. Amos Williams (Beauty Bright).

SHOEING CLASS.

Shoeing smith working within the limits of the society: 1, Mr. C. Kirby, Tyntesfield, Flax Bourton; 2, Mr. E. J. Sampson, Claverham, Yatton; 3, Mr. H. P. Harris, Long Ashton; hc, Mr. George Radford, West Town.

OPEN CLASSES.

Pony (mare or gelding) not exceeding 13 hands; 1, Mr. S. W. Tompkins, Cribbs Causeway (Greatheart); 2, Captain A. H. Pethick (Shepherdess); r, Mr. H. V. James, The Grange, Backwell (Ragged Robin).

Cob, exceeding 13 and not exceeding 15 hands: 1, Dr. Fuller (Lady Louise); 2, Mr. H. F. Ball, Moorside, Backwell (Gwen); r, Mr. R. I. Weight, St. George, Bristol (Lord Kitchener); hc, Captain A. H. Pethick (Peter).

Roadster, exceeding 15 hands: 1, Mr. Frank Leigh, Westbury-on-Trym; 2, Dr. H. W. Aubrey, Bristol (Diana); r, Mr. G. Firbank, Aldwick Court (Fitzroy).

Riding horse (mare or gelding), from 14 hands to 15.2 inclusive: 1, Mr. Frank Leigh; 2, Mr. G. F. Tilley, Huntspill (Elegance); 3, The Keynsham Stud Co., Keynsham (Game Chicken); hc, Mr. Frank Watkins, St. George (Lady Bute).

Mare or geiding for hunting purposes: 1, Messrs. Flower and Mattick, Ston Easton; 2, Mr. G. F. Tilley (Elegance); r, Mr. Brightrie Gee, Locks Mills House (Dauntless).

Cob in saddle not exceeding 14½ hands: 1, Dr. Fuller, Long Ashton (Lady Louise); 2, Mr. Frank Leigh; r, Captain A. H. Pethick (Peter); hc, Captain C. F. O. Davis, Yatton (Maggie).

Lady, who drives in the best manner a horse or pony: 1, Mr. Alfred Butcher, Bristol; 2, Mr. P. O. Gill, Wrington; c, Mrs. A. Pillinger, Abbott's Leigh.

Jumper which has been hunted with Weston-super-Mare, Wells Subscription, or Stanton Drew Harriers: 1, Mr. Alfred Butcher (Miss May); 2, M. and G. E. Ponting, Hewish (No-No).

Jumper, open to all comers: 1, Mr. C. A. Daniell (Newcastle); 2, Mr. Alfred Butcher (Miss May).

Banffshire.

The United Banffshire Agricultural Society's Show, which is chiefly confined to cattle, took place on the 28th ult., the showyard being, as usual, within the policies of Duff House, while the visitors in the afternoon included the Duke of Fife, who is at present in residence there. The entries numbered 571, as compared with 491 last year, and 468 two years ago, while so far as regards quality the show was one of the best in the recent annals of the Society.

Shorthorns were very creditably represented. In a strong class of old bulls Mr. Longmore, Baldavie, won with his second prize Aberdeen bull Christmas Cup, a bull of great substance. Mr. Longmore, Rettie, followed closely with Star of Destiny, which has been second here three years in succession. Mr. Morison, of Tipperty, was third with Keystone, bred by the late Mr. Bruce, of Inverquhomery. In a nice class of two-year-olds the premier place was given to Mr. Horn's, of Brangan, Ideal Stamp, a compact, well-topped bull, bred by Mr. Bruce, Heatherwick, and by Beau Ideal. The second prize winner from the Old Manse of Boyndie, Cornelius, bred by Mr. Napier, Dallachy, had the same place last year. In a wealthy class of yearlings, Mr. Longmore, Rettie, led the way with a handsome young bull, Massingbred, bred by Mr. Innes, Cushnie, but he had a close follow-on in a yearling from Black Culphin—Beauty's Pride, bred at Stoneytown. The third prize winner was Orton, from Fauchfaulds, and the commended bull came from Pitgair. The male championship was won by the first prize old bull from Baldavie, which later won also the championship of all the cattle classes. In an excellent class of cows, in which were some animals of nice merit, Mr. Graham, Colleonard, had a good win with the four-year-old Amy. Mr. Murray's second prize winner, Heads of Yards, although out for the first time, reflected credit on this promising herd. The third and fourth prize winners came from Rettie. In a small class of two-year-olds Mr. Graham won with a daughter of his first prize cow, Mr. Stevenson, Blairshinnoch, being second with a pretty daughter of Watchman. The Rettie herd had an easy win in the one-year-old class with Merry Maid, which was awarded the Duke of Fife's special prize for the best female of the breed. In the heifer class Mr. Horn, Brangan, won with a daughter of Sir Fragrant and Pride of Boyne 10th. The best group of the breed was shown from Rettie.

The twenty-eight entries of Aberdeen-Angus animals did not form an average for this show, although compensation was found for the deficiency in numbers in the fine quality of the stock. In the class of aged bulls the premier place was given Mr. Stevenson's Fitzsimmon, a massive, short-legged bull of nice character. Mr. Simpson's second prize bull was third here last year. He is Coynachie Paymaster 4th, by the Portlethen bull Werburgh, and out of one of the old Drumfergue Prides. In the two-year-old classes two old competitors again met, and the judgment resulted in a decision similar to that at Aberdeen, Mr. Bruce, Tochineal, being first with Egmont of Pitpointie, which was first here last year and was fourth at Aberdeen; while Mr. Wilson, of Coynachie and Upper Dallachie, followed with his highly commended Aberdeen bull Alexis of Pitpointie. The class of yearling bulls gave the judges no little trouble, but they awarded the first prize ticket to Mr. Duff, of Hatton, for his very pretty Expert of Advie. Mr. Wilson's entry, which followed Mr. Duff's bull at Aberdeen, was fourth at the Stirling Highland, this being the thick, well-fleshed bull Statesman of Coynachie. The leading two-year-old from Tochineal won the male championship of the breed. In rather a weak class of cows Mr. Wilson won with Patient Queen Mother 4th, Mr. Rae, Wanford, following with Dagmar of Baldavie. The Tochineal cow Lambkin 2nd was third. Mr. Bruce had a creditable win in the two-year-old class with Blossom of Tochineal, an evenly-fleshed, sweet heifer descended from Braco stock. The second prize winner came from Upper Dallachie, Queen Mother 6th. Mr. Bruce was again first in the yearling class, leading here with Beauty of Polowick, an Erica from Upper Dallachie being second. The third prize winner from Hatton was a very sweet heifer. To the Hatton herd went the chief honours in the heifer calf class. The first prize cow from Upper Dallachie won the special prize for the best female, while the best group of the breed was shown from Tochineal. There was a good show of cross cattle. Fat were also well represented, the Aberdeen-Angus heifer from Rettie, which was champion of the fat section at Aberdeen two days previously, taking the same honour here. There was an admirable display of Clydesdales and also sheep, the champion of the latter section being a Leicester tup belonging to Mr. Fordyce, Silverford.

Kings Lynn Foal Show.

The annual foal show of the King's Lynn Horse and Foal Show Society took place on Wednesday afternoon in Hillington Park, about nine miles from Lynn, and adjoining Hillington Railway Station, by permission of this year's President, Sir W. H. B. Ffolkes, Bart. Up to the opening of the show rain fell ceaselessly, and, though the afternoon was bright and fine, this doubtless affected the attendance considerably. The catalogue was a diminished one compared with last year, several harness and jumping classes, which it was found did not meet with sufficient support, being omitted. This left nine classes, which were equally divided between Shire, hackney, and hunter animals. The entries numbered 46, as compared with about 60 in the same classes last year. So far as quality was concerned, the show was quite up to the level of the previous one, the foals being a capital lot. The hackney section was of fairly good merit. Among the colt foals, a nice, long-limbed bay, the property of Mr. A. Collen, of Saffron Walden, which carried off the championship, was an extraordinarily good animal. The hackney mares were a capital lot. The Shire section was declared by the judge, Mr. W. Richardson, of Doddington, Cambridgeshire, to be the best lot he had ever seen in Norfolk. Colt foals were a very good class. As a whole, hunters formed a very useful section.

Royal Agricultural College, Cirencester.—The summer term of this college closed on Wednesday, when the Principal, the Rev. J. B. McClellan, M.A., conferred the diplomas, medals, scholarships, and other awards on the successful students. At the outset he expressed the respectful sympathy of the College with their patron, H.R.H. the Prince of Wales, on the sudden death of H.R.H. the Duke of Saxe-Coburg. Turning to the work of the term, he said the diploma class had been one of unusual excellence, three out of the five candidates having gained qualifying marks for the gold medal—a circumstance of which he had no previous recollection. He was glad to be able, by the generous benefaction of a former Russian student, Mr. Goldstand, to confer silver medals on two of the gentlemen. It will be noted that the diploma list contains the name of a gentleman from Egypt, a near relative of the late Nubar Pasha, and the scholarship list the name of an Indian student. The external examiners for the diploma, in addition to the College staff, were, in practical agriculture, Mr. G. D. Davies, Middlewich, Cheshire; in agricultural chemistry, Dr. J. A. Voelcker, M.A., London; in veterinary science and practice, Sir G. T. Brown, C.B., Harrow; and in practical engineering, Professor H. Robinson, M.Inst.C.E., London. The chief awards follow:—

Honour Diploma of Membership (Maximum marks, 2,100; qualifying marks, 1,400): John Clark Bell, Auchtertyre, Cupar Angus, N.B., 1,912; Maurice Glanville Godlonton, 14, Trinity Road, Tulse Hill, London, 1,881; Arakel Nubar, Cairo, Egypt, 1,776; Charles James Tunstall, 6, Prospect Place, Harrogate, Yorkshire, 1,698; George Gunter Gunter, The Grange, Wetherby, Yorkshire, 1,543. Gold Medal (Maximum marks, 2,100; qualifying marks, 1,750): John Clark Bell. Goldstand Silver Medals (Qualifying marks, 1,750): M. G. Godlonton; Arakel Nubar. Scholarships (Open to the whole College). Maximum marks, 3,000; qualifying marks, 2,500): First Scholarship, £25: Second and Third Scholarships, £10 each: James Forster Bell, Grantham, Tittenson, Stoke-on-Trent, 2,754; Herbert Bowman Beddall, Marston Park, Ampthill, Beds, 2,838; Sheikh Makbul Husain, B.A., Oudh, India, 2,831, æq Honourable Mention for Scholarships: Landsell, 2,709; Powys-Lybbe, 2,489.

SOCIETIES.

The Royal.

Site for the Permanent Showyard London Selected.

The last monthly meeting of the Council of this Society before the autumn recess was held on Tuesday, at 13, Hanover Square, London, W., Earl Cawdor (President) in the chair.

At the opening of the proceedings, the Secretary read a letter which had been addressed to him by H.R.H. the Prince of Wales, and the text of which had already been published in the newspapers, conveying His Royal Highness's high sense of the valuable assistance and support given to him throughout his year of office as President, by the Council and officers of the Society, and his sincere thanks to them and to the general body of members for the cordial goodwill and loyal attachment shown to His Royal Highness by all connected with the Society during his long association with it.

The President, in moving that His Royal Highness's gracious letter be entered on the minutes, said that the Society's very grateful thanks were due to the Prince of Wales for accepting the duties of their President, and for the continued interest which His Royal Highness manifested in the work of the Society. Since the receipt of the letter a very heavy bereavement had fallen upon the Royal Family in the death of H.R.H. the Duke of Saxe-Coburg-Gotha, K.G. (Duke of Edinburgh), who had been a governor of the Society since 1884. He thought they would be wanting in their duty if they did not express their respectful sympathy with Her Majesty the Queen and the other members of the Royal Family upon this very sad occasion, and he desired therefore to move from the chair that a humble message of condolence be addressed to Her Majesty the Queen, assuring her of the earnest and respectful sympathy of the Society with Her Majesty in her affliction.

Cardiff Meeting.

The President's motion was seconded by the Earl of Coventry, and carried unanimously.

The Mayor and Town Clerk of Cardiff attended at Hanover Square for the first time in connection with the Society's country meeting of 1901, to be held in that town, and at a meeting of the General Cardiff Committee the following gentlemen nominated by the Mayor were duly elected to serve upon the Committee:—The Mayor of Cardiff (Councillor S. A. Brain), Messrs. Robert Forrest, James Howell, Edward Knox, George C. Williams, D. T. Alexander, Henry Lewis, E. W. M. Corbett, and Mr. J. L. Wheatley (Town Clerk).

Sir Walter Gilbey presented a recommendation from the General Cardiff Committee that the Cardiff meeting should open on Wednesday, June 26th, 1901, and close on the following Monday evening, and that the customary practice of opening the implement yard only on the day previous to the opening of the whole showyard should on this occasion not be followed.

Permanent Showyard to be in the Metropolis.

The following report of the Special Show Committee appointed to consider the question of a permanent location for the Society's shows after the present rotation was completed was read by the Hon. Cecil Parker, Chairman of the Committee, on whose motion the Council resolved itself into a committee of the whole Council to consider and decide upon the questions raised in the report:—

"1. The committee held a further meeting on Monday, July 30, in order to consider the various proposals and suggestions which have been received by the Society from different sources as to the locality for the proposed permanent showyard for the Society.

"2. Schemes in various stages of development are reported to be under consideration in several places, but most of them appear to be to a certain extent dependent upon the Society first deciding for itself whether it will go to the particular place, in which case local efforts may be expected towards the acquisition of the site suggested.

"3. Under these circumstances it appears to the Committee that before going further it is necessary to ask the Council to decide whether in their judgment the site of the Society's permanent showyard should be in the metropolis or in the provinces.

"4. After careful consideration of the whole matter the Committee have decided by a majority that in their opinion it is desirable to obtain a site in the neighbourhood of London for the purposes of the Society's permanent showyard."

The Hon. Cecil Parker, in moving the adoption of the report, said that out of a great many sites which had been suggested for their consideration the committee had selected several of the most likely in the provinces, and had obtained information as to the advantages and disadvantages of each neighbourhood and ground for the purposes of the Society's show. After weighing the pros. and cons., he with the majority of the members of the committee had come to the conclusion contained in paragraph 4 of the report. Two sites had already been offered in the neighbourhood of London, and when the time came, after the Council had come to a decision on the main point, the committee would, of course, go thoroughly into the question of accommodation and expense.

Mr. Percy Crutchley, in seconding the resolution, said he thought the time had come when it was necessary for them to narrow the issue down to the question as between London and the provinces. It was now six months since the report of the special committee had been made public, and they had had the advantage of important criticism, both public and private. He did not think that during those six months it was at all likely that any sites had been overlooked which were likely to be suitable for the Society's requirements, and if the Council spent too much time in deliberating the matter it was more than probable that several of the sites which they might now obtain would be built over. He thought it only fair, seeing that several towns in the provinces were preparing or contemplating schemes for the development of sites, that the Council should make up their minds on this point before proceeding further, so as to save the towns needless trouble and expense.

The Earl of Coventry said the question now to be decided marked a very important period in the history of the Society. Many of them regretted very much the necessity for abandoning the system of migratory shows which had done so much good work during the past sixty years. They had, however, to consider the future of the Society, and he had come to the conclusion that it was quite impossible for them to continue the present system. The best thing undoubtedly to do was to have a permanent and fixed showyard in which to hold their annual shows, and he (Lord Coventry) certainly thought that the neighbourhood of London was the best for the purpose. London was a great and populous centre to which people from all parts of the country would flock.

Mr. G. H. Sanday, as one of the minority opposed to the establishment of the Society's permanent showyard in the neighbourhood of London, said that in his opinion the information which the Special Committee had been able to give to the Council was not such as to enable them to come to a final decision on the subject that day. He had himself, at considerable trouble, visited sites at Birmingham, Leicester and Nottingham, and had seen three others near London. He thought the time was premature for the Council to decide so momentous a point as had been brought before them that day, and he would urge upon the Council not to settle the matter hurriedly.

Mr. P. Albert Muntz., M.P., said that so many important points were involved that unless members had detailed information as to the various sites suggested in different parts of the country, they could not come to a right decision as to the merits and demerits, the suitability or unsuitability of any particular place. He suggested that an expert should be employed to inspect and report upon the different sites which had been offered. The site chosen should not be on one line of railway, but should be so situated that various lines converging toward a centre should provide the necessary conveniences of transport from all parts of the Kingdom. The town of Derby, to his mind, best fulfilled these requirements, though Leicester and Nottingham were both good. Upon the proper consideration of this question depended the future prosperity or failure of the Society.

The Marquis of Granby thought they should have had more information laid before them as to the various sites, and thus be able to judge for themselves as to land, soil, position, etc., as between the country and London. He should like to have the fullest information, both as to the sites which had been mentioned and those which had not been referred to.

The Hon. Cecil Parker, interposing, said that it was impossible to give such detailed information as had been asked for, because the corporations and other bodies with whom they had been in communication could not be expected to go to the expense and trouble of elaborating a scheme until they knew whether the Society would go to their neighbourhood or not.

Sir Jacob Wilson explained that his reasons for not being able to vote with the Chairman of the Special Show Committee were that in the absence of certain information which he required he did not think it desirable for this Society to come into the neighbourhood of London. It was, he thought, due to those districts in the country who had furnished information as to sites for a permanent showyard that if the Council were invited to come to a decision on the point they should only do so after the fullest consideration of all the details which it was possible to collect. This had up to the present not been done, and he confessed that on looking back over the statistics of shows held in the neighbourhood of London he did not find the prospect very encouraging. It had been said that a great number of people visited the Kilburn Show, but then that show was open three days longer than the customary period. There was more than one site available in London, one which he believed to be admirable and in every way advantageous to the Society. But he would remind them that they were about to come to a very important and momentous decision. When they had decided where to go there could be no turning back again, and if they went to a London district, and it should turn out a failure—and he knew several enterprises in London which had turned out failures—the Society would be in a worse position than at the present time. Taking a broader view of the question they must remember that the original intention of the Royal Agricultural Society was to benefit the agriculture of the country, and if they selected a site in the country he thought the Society would lose its "Royal" character in the eyes of a great many people, though it might maintain its agricultural side. But if they came to London he feared that they would lose both, and that the Society would be no longer either royal or agricultural, but would develop into a huge implement and horse show. Horse shows he knew attracted as exhibitors wealthy breeders of horses, but he thought the Society would lose its hold upon the cattle and sheep breeding districts. It had been said that the Royal Society should come to their rescue, but he was not altogether sure of that. There were breed societies and breed societies. It was possible that some of the wealthy societies might place at their disposal a certain amount of money to swell the prize sheet, but in return they would expect to have a voice in the distribution of the prizes.

Mr. Sanday moved the following amendment (which was seconded by Mr. Muntz) to the motion for the adoption of the report:—"That in the absence of full information with reference to all the sites offered, the time for the final decision of place or district has not arrived, and that the question should be referred back to the Special Committee for further consideration and report."

A long debate ensued, Mr. Marshall, Sir Nigel Kingscote, Sir Walter Gilbey, Sir Massey Lopes, the Earl of Feversham, Mr. Ransome, Mr. Stratton, and Mr. Terry speaking in favour of the selection of a site near London, whilst Mr. Sutton, Mr. Pell, Mr. Martin, and Viscount Baring commented adversely on various aspects of the proposals of the Special Committee.

In summing up the discussion, the president said that what the Council were asked to do by the amendment of Mr. Sanday was to postpone any decision so that they might go fully into details as to sites. But six months hence they would be in no better position to arrive at a conclusion than they were that day. Corporations and other bodies interested in sites would not take the trouble to go into details until they had some assurance that the Society intended to come into their neighbourhood. What the Special Committee asked for was an expression of opinion by the Council as to whether on general grounds the site of the Society's future permanent showyard should be in the neighbourhood of London or in a provincial town, and on this he would now ask them to vote.

A division being asked for, there appeared thirty-four votes for the Special Committee's recommendation and twelve against it, two members not voting. The Council then resumed, when on the motion of the Hon. Cecil Parker, seconded by Mr. Crutchley, it was resolved by the Council *nem. dis.*, "That it is desirable to obtain a site in the neighbourhood of London for the purposes of the Society's permanent showyard."

The reports of the various Standing Committees were presented and adopted, and the Council then adjourned over the autumn recess.

Bath and West and Southern Counties Society.

At a Council meeting of the above-named Society, held in London, on Tuesday, in the absence of the President (H.R.H. the Duke of York, K.G.), the Marquis of Bath was voted to the chair.

In opening the proceedings, the Chairman alluded to the extremely sad news which had just been received of the death of the Duke of Saxe-Coburg and Gotha. His lordship said that he was quite sure that the Council would wish to give effect to the feeling which, in common with the rest of the nation, possessed them, and he therefore begged to move: "That this Council desires to express its deep sorrow at the death of H.R.H. the Duke of Saxe-Coburg and Gotha, and respectfully begs leave to offer to Her Most Gracious Majesty, to the Patron of the Society (H.R.H. the Prince of Wales, K.G.), the President (H.R.H. the Duke of York, K.G.) and the other members of the Royal Family its sincere sympathy with them in their bereavement."

Finance.

Mr. C. R. Collins, as Chairman of Finance, brought up the quarterly statement of accounts, and reported that cheques for the prizes awarded at the Bath meeting had been sent to all prize-winners with the exception of those with respect to whose animals some further qualification was necessary. On the motion of Mr. Collins, seconded by Col. Chester-Master, the report was adopted.

Show Dates.

Capt. Best, as Chairman of the Show Dates Committee, reported that, after [illegible] all the circumstances, [illegible] the Committee recommended that the 1901 exhibition at Croydon be opened on Wednesday, May 22nd, and which arrangement the Society will [illegible] on May 27th (Whit Monday), and that [illegible] arrived at this conclusion [illegible] representatives of Croydon [illegible] be the most suitable for the locality. The adoption

of the report was moved by Capt. Best, seconded by Mr. C. R. Collins, and agreed to.

Agricultural Education.

Sir R. H. Paget, as Chairman of the Agricultural Education Committee, reported that in accordance with an arrangement with the Somerset County Council a cheese school was opened at Vale Farm, Batcombe, on April 1st last. The school, which had been working satisfactorily, had been attended up to the present time by twenty-four students, and others were about to attend. The April make of cheese was sold at the uniform price of 63s. per cwt. of 112lbs., which was a very satisfactory price for early cheese.

The farriery school carried on by the Society for the Somerset County Council had continued its travels during the current year. Since January 1st last, and up to June 30th, classes had been held at Wells, Glastonbury, Evercreech, Bruton, Castle Cary, Wincanton, Milborne Port, Upper Weston, and Bath, and these had been well attended by pupils.

In addition to this, the farriery van and instructor attended the Bath and West Show at Bath, and there was a competition of pupils there, when the judge stated that the work of the local class was exceedingly good. He commended the whole of the competitors.

Sir R. H. Paget stated that since the report had been drawn up a communication had been received from the Board of Agriculture which he hoped would result in a resumption of the research work in dairying, which had been of late in abeyance. A conference had taken place between representatives of the Society and the Board, and this had resulted in some suggestions being made which the committee would shortly take into consideration with a view to reporting upon to the Council.

The adoption of the report was moved by Sir R. H. Paget, seconded by Mr. Strachey, M.P., and agreed to.

Council Vacancy.

An extraordinary vacancy in the North-Western Division of the Council, caused by the death of Mr. A. Mason, was filled up by the election of Mr. Herbert Lloyd, of Plas Cilybebyll, Swansea.

Croydon Exhibition.

Grants amounting to upwards of £3,000 were made for prizes to be offered at the Croydon Exhibition next year. These prizes are in addition to those that will be offered by or through the local committee, by the Stud, Herd, and Flock Book Societies, and by individual contributors. The importance of the Croydon meeting was recognised by the large amounts voted in the various departments.

Cider-making.

In the absence of Mr. R. Neville-Grenville; Mr. F. G. Farwell moved:—"That a grant of £100 be made in aid of further research in cider-making during the coming season," and pointed out the practical utility of the Society's researches in this direction during the past year as detailed in the Society's Journal. The motion was seconded by the Rev. A. T. Boscawen, and agreed to.

Education.

Sir R. H. Paget moved:—"That the Society do subscribe the sum of two guineas to the Agricultural Education Committee formed in London for (a) the promotion, in rural districts, of systematic and efficient instruction, at elementary and other schools, in subjects bearing directly upon rural life; (b) the diffusion among the agricultural classes, by means of suitable publications, of a knowledge of the advantages of agricultural instruction."

Sir R. H. Paget alluded to the good work which the committee in question had already done, and stated that there was still abundant need of its activity. Several members of the Society's Council were on the committee, of which Sir W. Hart-Dyke, M.P., was the chairman, and Mr. H. Hobhouse, M.P., the hon. secretary, and the Council was officially represented on the executive by the Society's secretary.

The motion was seconded by the Rev. F. F. Buckingham, and agreed to.

Cider.

A communication was received from the Organising Committee of the International Congress "pour l'étude des fruits de pressoir et de l'industrie du cidre," inviting the Society to appoint delegates to attend such Congress to be held at Paris on October 11th, 12th, and 13th next. On the motion of Sir C. T. D. Acland, seconded by Mr. M. J. Sutton, Mr. F. G. Farwell, Mr. R. Neville-Grenville, Mr. F. J. Lloyd, and the Secretary were appointed to represent the Society at the Congress.

Somerset Agricultural Association.

A communication from the Somerset County Agricultural Association was read, enclosing a copy of the following resolution:—"That the best thanks of this Association be given to the Council of the Bath and West and Southern Counties Society for the general courtesy extended to this Association during its Bath meeting; also for the use of that Society's Council room for Council and general meetings; also for the use of its pavilion for accommodation of members, and for the use of an office for official business."

It was resolved to convey to the Association the thanks of the Council for the resolution and its satisfaction that the arrangements in question had met the wishes of the Association.

Special Prize.

A communication was read from Professor Carroll, of Glasnevin, Dublin, asking to be allowed to offer a silver cup in the dairy department of the Society's Croydon exhibition. The offer was accepted with thanks, the settlement of the conditions being referred to the Dairy Committee.

Army Remounts.

A suggestion of Professor Carroll that the Society should offer prizes for army remounts was referred to the Stock Prize Sheet Committee.

Communications.

Letters were read from the Mayor of Bath and the G.W.R. and L. and S.W.R. Companies thanking the Society for complimentary resolutions passed at the last annual general meeting of members, and from Mr. F. F. Mason and Mr. Egbert Lewis thanking the Council for its expressions of sympathy and condolence in relation respectively to the deaths of Mr. Albert Mason, late a member of the Council and an assistant steward, and of Mr. William Lewis, who was for twenty-five years the publisher of the Society's catalogue, and who was also hon. secretary to the Local Committee for the Society's recent exhibition at Bath.

Royal Cornwall.

A Council meeting of the Royal Cornwall Agricultural Association was held at St. Austell on the 27th ult., Col. Tremayne presiding.

Invitations for next year's show had been received from Bodmin and St. Austell, and deputations attended to urge the claims of those towns. Mr. H. D. Foster, Col. St. Aubyn, Messrs. R. P. Edyvean, and J. Lewarne represented Bodmin, the Mayor being away at camp on Volunteer duty; while Messrs. J. T. Hawke (chairman of the Urban Council), J. W. Higman (chairman of the Rural Council), H. Hodge, and R. Parson appeared for St. Austell. It is sixteen years since the show was held at Bodmin, and fourteen years since St. Austell was visited.

Mr. W. T. Lovering proposed that the show be at St. Austell, and Mr. R. Clark (St. Ewe) seconded.

Mr. Bastard (St. Tudy) moved the selection of Bodmin. Mr. J. C. Williams, in seconding, thought the aim should be to get the shows as far apart as might be. (Hear, hear.) They were a county society, and unless they kept their eye on the considerable distances which separated the population, they would gradually and inevitably drift into the position of a local society. They should not hold the show too often near the centre of the county. (Hear, hear.)

Twenty-nine voted for Bodmin and only five for St. Austell.

Mr. H. Thomas said they would like to have more subscribers from Bodmin union, which did not compare well in this matter with St. Austell union.

Messrs. J. S. Tucker (Menheniot), Biddick (St. Winn), and Hendy (Truthan) were appointed to inspect sites for the next exhibition.

A good deal of time was taken up with the consideration of a protest entered by Messrs. J. Mead and P. Hoblyn at the recent show at Truro against Tit Bit, a grey mare, exhibited by Mr. J. Ford, Bedford Street, Plymouth. The protest was based on the assertion that the animal was entered as a six-year-old, but was really seven. The opinions of veterinary surgeons and various documentary and verbal evidence having been received, it was decided, without dissent, on the proposition of Mr. W. Lovering, seconded by Mr. Drew, to uphold the protest.

Suffolk Fat Cattle

A general meeting of the Suffolk Fat Cattle Club took place at the office of the secretary (Mr. Robert Bond), Butter Market, Ipswich, on Tuesday, Mr. E. Snell presiding.

The report of the Committee expressed pleasure that, under the presidency of the Right Hon. the Earl of Stradbroke, the Christmas Show of 1899 was a decided success, both as to the superior quality and number of its fat stock and other exhibits. The block test for the first time was introduced, and proved interesting and instructive. The attendance of the public from the country was restricted by a snowstorm, but upwards of 7,000 ticket holders and visitors were present. The amount distributed in prizes was £389 18s., and the thanks of the members generally were due to the many noblemen and gentlemen who contributed to the prize fund. Under the arrangement with the Secretary, there was a small sum to the Club's credit upon the year's transactions, but they regret to learn that Mr. Bond had lost the small gain of last year, and a few pounds besides. Relative to the future, the Committee were of opinion that the block test should be extended to sheep. Many donors having again promised their contributions to the prize fund, the amount to be offered in prizes for cattle, sheep, and swine might be about the same, but to increase the agricultural importance of the Club, and its attractiveness to stock exhibitors, they recommended the institution of challenge cups, as at other clubs, to be won thrice before becoming the property of the exhibitor; and that the Secretary be instructed to receive subscriptions for the same. Barley being a very important crop in East Anglia, they recommended that special and substantial prizes be secured and offered, and that those firms who give prizes for barley be invited to exhibit their respective competitions at the Christmas Show as stand-holders.

The balance-sheet showed that recipts including a balance in hand of 4s. 4d. from the previous year, amounted to £497 13s. 4d., and after meeting expenditure, there was a small balance on the right side of 4s. 7d.

The Chairman, in moving the adoption of the balance-sheet and report, observed that last year's show was not quite a financial success, owing to the bad weather, which had a very deterrent effect on the attendance. No fears need be entertained, however, in regard to this matter, as the show, in respect to quality, was quite on a level with its predecessors.

Mr. Corder seconded the motion, which was carried unanimously.

The Chairman moved the election of Mr. Jas. E. Ransome as president, recalling the fact that the Club had its birth in Mr. Ransome's drawing-room. Mr. Rudland seconded, and the proposition was carried. The vice-presidents, treasurer, and auditors were re-elected *en bloc*, while six vacancies on the Committee were filled. Mr. Robert Bond was reappointed secretary. Considerable discussion ensued as to the prize list for the 1900 show. A motion by Mr. Sherwood, that four prizes of £7, £4, £3, and £2, be offered in connection with Class 12, for three Suffolk lambs, lambed in the current year, was negatived in favour of an amendment by Mr. E. W. Snell that the prizes should consist of £5, £4, £3, and £2. Other alterations were also agreed to.

"Mark Lane Express" Diary.

August.

AGRICULTURAL EDUCATION.

COUNTY COUNCIL OF KENT — COUNTY COUNCIL OF SURREY.—South-Eastern Agricultural College, Wye, near Ashford, Kent. — This Residential College gives a complete Scientific and Practical Training to future Farmers, Land Agents, etc. Preparation for the Examinations for the National Diploma in Agriculture and the Surveyors' Institution. Resident Staff of seven Professors and Lecturers. Farm of 260 acres. Next Term begins October 1st. For Prospectus and all particulars apply to the Principal, A. D. HALL, M.A., late Scholar of Balliol College, Oxford.

AGRICULTURAL EDUCATION

UNIVERSITY COLLEGE OF NORTH WALES, BANGOR.

A constituent College of the University of Wales.
AGRICULTURAL DEPARTMENT. IN-COLLEGE COURSES. 1. A complete course in theoretical and practical Agriculture extending over two years, and suitable for farmers and land agents. 2. Advanced course for a third year in Agricultural Chemistry. 3. Short course of eleven weeks, commencing in October and consisting of Agriculture, Chemistry, Book-keeping, and Land Surveying. The degree of B.Sc. in Agriculture of the University of Wales may be taken by students who pursue a three years' post matriculation course of study at the College. LLEDWIGAN FARM (360 acres) has been taken by the College for teaching and experimental purposes. Diploma (two years) and Degree (three years) students will in future follow courses for at least one year at the farm under the supervision of the Professor of Agriculture. Special arrangements will be made to take farm pupils for practical instruction only. The College is recognised by the Surveyors' Institution as a place of approved professional instruction for land agents. The cost of board and lodging, with tuition fees, varies from £30 to £40 for the College year. The Scholarship examination will commence on September 18.

Prospectus, with full particulars as to Scholarships and Diplomas, may be obtained from

JOHN EDWARD LLOYD, M.A.,
Secretary and Registrar.

July 17th, 1900.

SHEEP.

LINCOLN LONGWOOL.

DUDDING, HENRY, Riby Grove, Gt. Grimsby, Lincolnshire, has always for inspection and sale a large flock of pure LINCOLN LONGWOOL SHEEP, including many prize-winners, having taken the leading prizes for many years at the Royal and other shows for both rams and ewes, including champion medals at both the Paris Exhibitions, Vienna, Amsterdam, Canada, Australia, New Zealand, and all the leading prizes at Chicago; also the first for the best collection of Lincoln fleeces of wool at the Royal Windsor Show, which proves the character of this flock, which is most famous for their great size and 125 years' good breeding. Rams from this flock made the highest average on record last year. Riby Grove is seven miles from Great Grimsby, and three from Stallingboro' Station. Telegrams, "Dudding, Keelby."

FIELDSEND, C. S., Belmont, S. Willingham, Lincoln. Flock No. 59. Pedigree RAMS and EWES for SALE.

LINCOLN LONGWOOL.

ANDERSON, JOHN, Chapel Farm, Barton-on-Humber, Lincolnshire Breeder of pure-bred LINCOLN LONGWOOL SHEEP. Flock Book 106. These sheep are noted for having hardy constitutions, true character, and long, lustrous wool.—Telegrams: "John Anderson, Barton-on-Humber."

HOYLES, GEORGE, Manor House, Skidby, near Hull.—Pure LINCOLN LONGWOOL SHEEP. Registered Flock 136. Sires used: Skidby Constitution 3069, sire Skidby Conservative 1346, g. sire Old Constitution 308; Skidby Tory 1583, sire Riby A 358; Leconfield Pride, sire Casswell (16) 1753; Skidby Friar, sire Abbot 1—from the celebrated flocks of Messrs. Henry Dudding, J. Casswell, Hy. Smith, jun., etc. Heavy-wool Sheep for export. Also prize and prize-bred Polled Angus, Shire Horses, and English Ponies for inspection and sale.

T. C. DIXON, Brandesburton, Hull.—Pure LINCOLN LONGWOOL SHEEP, of best blood. Wool a speciality, with quality and size combined. F.B. 69. Rams, Ewes, and Lambs for Sale. Inspection invited. Telegrams as above.

HAMPSHIRE DOWN.

FLOWER, JAMES, Chilmark, Salisbury. Undoubtedly the leading flock of the day; in show yard records at all the largest shows, including the Challenge Cup at the Salisbury Great Prize Sheep Fair six years in succession; also highest average for same period for 100 ram lambs at annual sale, at Britford Fair, August 12.

The Flock is one of the oldest existing combining fine quality, strength, constitution, and true character.

"Fossil," sire of the highest-priced Hampshire Down Ram ever sold, was bred at Chilmark, and in service there last two seasons.

COLES, CARY, late C. and T., Manor House, Winterbourne Stoke, Salisbury.— Registered HAMPSHIRE DOWNS, prizewinners at the Royal, Bath and West, Royal Counties, and other shows. July 16th, at the Salisbury Great Prize Sheep Fair, this Flock won the challenge cup for pens of ram lambs, beating the Royal, Bath and West, and Royal Counties' prize winners of this year.

Annual Ram Sale on the premises, Friday August 3rd.

SHROPSHIRE.

COOPER, WILLIAM, AND NEPHEWS, "Cooper's Dip" Works, Berkhamsted, England. Breeders and Exporters of pure Shropshire Sheep. First and Third Prize for Ewes, Royal Show, 1898. Five hundred breeding Ewes. The largest export flock of Shropshires in England. The sires used present season include 310 Guinea Champion "Royal Record," Two First, One Second, and One Third Royal Show Prize winners.

LIVE STOCK AGENTS.

INVERNESS, WEST HIGHLANDS.—JAMES ARNOTT, Scotch Live Stock Agent, Ellandonan, Inverness, established 1870, selects and supplies on commission all classes of SCOTCH STOCK. He attends all the leading markets to purchase Stock at lowest rates. References can be given if desired to customers who have been annually supplied. All orders are personally attended to. List of classes and approximate prices sent on application. Reference required; terms cash. Telegrams: "Arnott, Inverness." J. A. is now booking orders. N.B.—Polled Angus or West Highland Heifers for crossing or feeding, in truck loads, at moderate prices. Fat Stock of all classes also purchased.

LARGEST Live Stock Agency.—Practical farmers in 57 counties (whose testimonials will be sent on application) testify their complete satisfaction with the live stock with which they have been supplied by E. GOODWIN PREECE, who attends leading fairs and sales to buy on commission CATTLE and SHEEP, for feeding, dairy, or wintering. Personal buying.—Address, Portland House, Shrewsbury.

London office: 69, King William Street, E.C.
Country offices: Bromley, Kent; and at Beckenham.

A VERY SOUND BUSINESS for DISPOSAL in consequence of the sudden death of the owner, situated under twenty miles from London. Old-established and yielding a net profit of about £1,200 per annum; carried on by the late owner for twelve years, until his death a few weeks ago.

Principals or their solicitors are requested to apply for particulars to Messrs. DAVID BURNETT and CO., 15, Nicholas Lane, London, E.C.

TO ESTATE AGENTS.—FOR SALE, two choice 50-acre Sussex Freehold Dairy, Poultry, and Fruit Farms; owner retiring; plans, etc.—OWNER, Whydown Farm, Bexhill-on-Sea, Sussex.

FARMS, ESTATES, MILLS, BUSINESSES, ETC.

MESSRS. CRONK'S LIST of FARMS, containing particulars of numerous Farms in Kent, Surrey, Sussex, and elsewhere, to be obtained gratis at their offices, or will be sent by post on receipt of a stamp. Properties inserted free.—12, Pall Mall, London, S.W., & Sevenoaks, Kent.

SUSSEX.
STOPHAM, near PULBOROUGH.

TO LET from Michaelmas, 1900, the MANOR FARM, with fine old-fashioned Farmhouse, substantial and well-arranged Farm Buildings, and about 163 acres Arable and 153 acres Meadow and Brookland. Rent £300.—Apply, W. B. HOY, Stopham Estate Office, Pulborough.

SUSSEX.—TO BE LET at Michaelmas next as a going concern, a Dairy Farm of about 400 acres, 250 of which are in grass and the remainder arable, close to a fashionable watering town. Present milk contracts up to about 120 gallons (imperial) per day, at 10d. per gallon. The farm is in a high state of cultivation and well adapted for both dairy and fattening purposes, the brookland of 110 acres being of special value for either system, and is well watered. The farmhouse is substantial and the buildings ample. There is also good cottage accommodation.

The farm valuation to be taken over according to the custom of the county, and all live and dead stock could be, if required, taken at valuation. The above is a very desirable undertaking for anyone who is seeking an old-established business.

Write to "FARM," Box 3, c/o Willing's, 162, Piccadilly, London, W.

MANCHESTER.—TO BE LET, FIVE-FLOOR WAREHOUSE, with good loading and electric light, suitable for provision trade; also two cool cellars, suitable for cheese, eggs, or butter. The whole of these premises are centrally situated in Hanging Ditch, with valuable frontage opposite Corn and Produce Exchange.—Apply, ISAAC NEILD and SON, 19, Chapel Walks.

CAPITAL DAIRY FARM, with good house, cottages, and farm buildings.

TO BE LET immediately BROOMLANDS FARM, in the Parishes of Titsey and Limpsfield, Surrey. Two miles from Oxted and Westerham Stations and about 20 miles from London. Acreage about 245, of which about 76 are light arable and hop land, the remainder meadow, with good water supply. Rent £200 per annum.

For further particulars, apply to Messrs. MORRISONS AND NIGHTINGALE, Solicitors, Reigate, Surrey.

FARMS, ESTATES, MILLS, BUSINESSES, ETC. *(continued).*

MILL (modern Roller Water), on the river Thames TO BE LET immediately, through the decease of the owner, in a weekly country town (market). Capital wheat-growing district, and doing a large and fast increasing trade. Plant and stock at valuation. Lease on premises. Splendid mill buildings, dwelling house, orchard, paddock, and grounds. Steam power attached. A few miles from large population. Capital centre, surrounded by market towns and large villages.—Full particulars of HARRIS & JACKSON, Estate Agents and Valuers, Abingdon, Berks, and 18, George Street, Oxford.

SMALL FARM WANTED to rent or purchase, principally for grazing purposes, about 40 to 50 acres, within 10 to 15 miles of London, North preferred; must have a cottage or small house.—Full particulars to SCOBELL and LAKE, 25, Bucklersbury, London.

SITUATIONS AGENCIES.

WANTED, AGENTS for the SALE of ICHABOE GUANO, the highest Ammoniacal Guano, also for high-class Chemical Manures. All analyses and dry condition guaranteed.—Apply to DANIEL DE PASS and CO., 1, Fenchurch Buildings, Fenchurch Street, London, E.C.

FERTILISING AGENTS.—An agricultural landowner in Lombardy (Melegnano, Italy) desires an agency for nitrates, superphosphates, and all kinds of raw material for chemical industries. Apply to GIBELLI, care of Agenzia Mercolli, 38, Piazza, Milan. References: The Consular Chamber of Agriculture of Milan and Bell and Edwards Agricultural Machines, Milan.

WANTED, SITUATION as Help or Firm Bailiff to a [illegible] large Farmer, well up in [illegible] references given.—Address, C. G. MUNDEY, Silver Street, Ilminster, Somerset.

CORN TRADE. Wanted, SITUATION as IMPROVER in [illegible] markets and assist in [illegible] a-half years' articles just expired.—Address, X. L., Office of this paper.

WANTED, a BAILIFF, to manage four Farms [illegible] Estate.—Apply to Hon. W. F. J. DUNDAS, Estate Office, [illegible]

READERS of ADVERTISEMENTS in these pages will assist us by mentioning "MARK LANE EXPRESS" when writing to our Advertisers

HAVE YOU TRIED THE "VESTA" Milk Meal FOR CALVES?

Read what others say:

Mr. GEORGE BROWN, of Eastham, Cheshire, a noted Feeder and Rearer of Calves, says:—"Your Calf Meal is undoubtedly the best I have ever used. Having reared some hundreds I think I can speak with some authority."

Mr. THOS. LEDSON, of Bromboro', writes:—"Your Calf Meal is excellent. My Calves have always done well on it."

BIBBY'S

"CREAM EQUIVALENT"

for CALVES.

An Ounce of Fact is worth a Ton of Theory.

A STRIKING FACT.

In our Spring number of "Bibby's Quarterly" we reproduced the photographs of two groups of Calves which are now being reared at the Horuby House Farm, Bedale, Yorks, by his Grace the Duke of Leeds.

One of the groups is being fed on New Milk and the other on Separated Milk and "Cream Equivalent."

We asked our readers to tell us which of these groups were fed on New Milk, and 707 Farmers, Farmers' wives, their sons and daughters competed for a small prize which we offered to those who guessed correctly.

445 selected the wrong, and 262 the right group.

We think the above striking FACT speaks volumes for "Cream Equivalent."

The "Cream Equivalent" can be had at 15s. per cwt., carriage paid to nearest station.

Mark Lane Express Agricultural Journal.

The Only English Journal devoted exclusively to Agriculture.

MONDAY, AUGUST 13, 1900.

Correspondents are requested to address all communications for the Editorial Department to THE EDITOR, "Mark Lane Express," 1, Essex Street, Strand, London, W.C.

Advertisements, Subscriptions, and business communications should be addressed to THE PUBLISHER, "MARK LANE EXPRESS," 1, Essex Street, Strand, London, W.C.

THE INCREASE OF RATES.

Somewhere between six and seven years ago we referred to the tendency of rates in rural districts to continually and steadily increase in amount. At that time more than one correspondent wrote to explain that we were quite wrong in the view which we had adopted, and that as a matter of fact rates were actually decreasing. About two years ago we returned to the same subject, and again we were informed that we were wrong. In spite of our past experience we once more mention the matter, and, although we fully expect to be contradicted, as we have been before, all the same we are prepared to stand to our guns, and to assert that the rates upon agricultural land are decidedly increasing. Those of our correspondents who have taken objection seem to have overlooked two very important points. The first is that it does not follow that because rates have decreased in certain parishes there has been a general reduction; and, secondly, there arises a question of proportion which can be settled, fortunately, with mathematical accuracy. As to the first point, we have recently made inquiries from correspondents whose reliability must be beyond question. We have selected the unlucky number of thirteen parishes, spread as far apart as possible, and without any previous knowledge of them. In fact, the choice has been quite haphazard. The result has been somewhat startling. The lucky number seven represents those correspondents who tell us that there has been no appreciable increase in their rates—although we still venture to think that this is more apparent than real—and the remaining six show a decided tendency to increase, varying from 4 to 15 per cent.—amounts which become somewhat material upon a large farm and probably equally so upon smaller holdings.

Next as to the question of proportion, to which we have referred. More than once Parliament has decided that agricultural land ought to be rated upon an easier basis than household property. As the matter is only one of principle, we need not dwell upon the details of the various measures to which we are referring. It will be sufficient to use the Agricultural Rates Act of 1896 as an illustration of what we mean. That measure provides that for a period of five years, from the end of March, 1897, the occupier of agricultural land in this kingdom will only be liable to pay one-half of the rates in the pound payable in respect of buildings and other hereditaments, with certain exceptions as to where there have already been reductions amounting to the same thing, or in certain special circumstances. The point to which we wish to give prominence is that, although this Act purports to reduce the farmer's rates by one-half, it does not, and cannot possibly do so. It only requires figures to prove this. Assume that a parish requires a thousand pounds a year in rates; further, take it that four hundred pounds is to be raised from dwelling-houses, etc., and six hundred from property which comes under the Statute with which we are dealing. That would mean a loss of three hundred pounds if the Act were to be literally interpreted. The various spending authorities of the parish could not possibly get on without this money, and therefore the nominal amount of the rate must be increased proportionately. A very short calculation with a pencil will show that the reduction is far nearer to 25 than to 50 per cent. It is quite true that the houses would have to bear a larger share than the farmer, but it is equally true that the relief given by this Act is not nearly so great as would appear from a casual and careless reading of the clause. This is another case where the farmer gets credit for relief to a greater extent than ever he really receives. Further, it must be borne in mind that the Act is only temporary, and expires, unless renewed, at the end of the five years.

SAMPLES.

By a Man of Mark Lane.

Lord Curzon, telegraphing to the Secretary of State for India on Tuesday, says that a very decided improvement in the condition of the country has taken place during the last ten days through the sudden and opportune renewed advance of the monsoon. The rain which has fallen is ample for present agricultural requirements in Gujarat, also in the greater part of Rajputana and Central India. If the present favourable conditions continue, he adds, considerable autumn crops will be secured, and the tension will relax.

A scare has occurred among the Irish harvestmen in the Fylde district of Lancashire, in consequence of rumours among the peasantry on the seaboard of Ireland that the French were about to land troops in Erin. The appearance of the British warships off the coast during the manœuvres was accepted as proof of the truth of the rumours, and letters were received by several of the Irish harvesters in the Fylde, advising them to return. These were passed from hand to hand, and a state of panic arose. During the course of a single night over 200 Irishmen left one district alone, and it has been ascertained that the majority of them booked for Dublin. It is estimated that considerably over 1,000 labourers have disappeared without giving their employers warning. As may be imagined, this exodus has been productive of considerable inconvenience and loss in the districts affected.

The receipts on account of revenue from April 1st, 1900, when there was a balance of £3,517,047, to August 4th, 1900, were £34,764,249, against £35,611,344 in the corresponding period of the preceding financial year, which began with a balance of £8,919,173. The net expenditure was £57,698,653, against £39,526,371 to the same date in the previous year. The Treasury balances on August 4th, 1900, amounted to £5,524,442, and at the same date in 1899 to £2,854,866.

Messrs. W. L. Browne and Co., Castle Mills, Shrewsbury, have sent a few ears of barley taken out of a field near Shrewsbury on Saturday, which they say fairly represent the whole of what they saw. The corns in some of the heads of this barley, which has been cut and stacked up about seven days, are very badly grown. This Messrs. Browne fear will be the case with all grain that has been cut and sheafed by self-binders and exposed to the recent rains. It is hoped that that which remains standing will yet escape the great injury sustained by lots similar to those inspected. Fortunately, in this district quite two-thirds of the grain remains still uncut.

AGRICULTURAL POLITICS.

By a Lobbyist.

If we have had an agricultural session at all during this Parliament it is the session which has just closed. Neither of the two Bills which have just been passed—the Bill extending the character of the Agricultural Holdings Act and the Bill including the rural workers within the operation of the Workmen's Compensation Act—has provoked one tithe of the tumult, turmoil, misrepresentation, and criticism which attended the Rating Act. The second Bill may not, of course, prove of equal importance—for my part, indeed, I disbelieve that it will impose any large tax upon the rural interest. The first is, however, like the Rating Act, a portent. While the Rating Act may be described as an indication of solicitude for the landlord, the Extended Holdings Act may be regarded as an indication of rather hesitating solicitude in the interest of the tenant farmers.

There is something malevolently mean in the story of the genesis of the latter Bill which finds favour with a certain type of Radical. Take even the comparatively moderate *Daily News*. "The Agricultural Rating Act has," says the *News*, "lost its power to please the rent paying class, and the Government of dukes have been forced to look out for something else. They hit upon security of tenure." I look upon the Rating Act as the outcome of an unintended emotional sympathy with the victims of the incidence of rural taxation. The Extended Holdings Act was, however, promised definitely and clearly at the last General Election. It was, indeed, the chief theme of Mr. Chamberlain's famous Rugby speech, in which he made a distinct bid for the support of the rural interest, and the promise therein contained was given an authoritative seal by Lord Salisbury. The failure to introduce it during the lifetime of this Parliament would have been an act of unpardonable and unredeemable treachery. The Bill was, I repeat, a long-meditated and clearly-specified intention. Why should political chagrin persist in regarding it as a mere political dodge inspired by the fear of the General Election?

Of course, there are some people who can find fault with the warmth of the sun, and the Radicals are, I find, still professing the utmost disappointment with both measures. "Pshaw!" exclaimed a critic of the Government to me in the expiring hours of the session, "your lauding of the new Holdings Act is enough to make the early historic advocates of the principle of the three F's turn in their graves. What does the Bill do? Well, I am bound to confess that it in a measure protects the outgoing tenant, but does it sufficiently protect the sitting tenant? Does it benefit the man who has to stay on the land, and does it provide a sufficient compensation to him for developing the inherent capacity of the soil? The Bill was bad enough before it went to the Lords, but now it is worse than innocuous—it is almost a crime, because it will prevent real effective legislation being attempted for some years to come. Could even a Radical Parliament, supposing the Radicals come into power as a result of the General Election, essay a further amendment of an Act which has only just emerged from the amending crucible? Why, even your outgoing tenant is in the later periods of his tenancy compelled to be the victim of the caprice of the landlords!" Of course this is a distortion rather than a representation. At all events, it reflects the Radical feeling—the feeling of the Channingites, the men, for instance, who believe that this Bill has over it the fatal trail of indecision, and who will travesty and deride it because of that suspicion.

A bribe—a palpable bribe! This is the verdict applied by the same politicians to the new Workmen's Act, a fact, of course, of which all my readers are aware. "Whom will it benefit?" quothed the Radical critics in reviewing the work of the session. "Well, primarily the lawyers." "It will," said one, a little picturesquely, and rejoicing the while in his own cleverness, "multiply fourfold the rich crop of litigation so generously sown in the interest of the lawyers by the authors of the parent Act." "How easy," said another, "will it be for employers of labour to argue that the victim of the accident was a casual labourer." Of course, if he does that successfully, he will escape the payment of compensation. "How easy," added a third, "will it be to fashion expensive legal pitfalls and difficulties over the question as to whether grazing and dairy-keeping are agriculture." "And think of the vista this opens out," proceeded a fourth, "of endless disagreements among the judges and of expensive appeals!" "Why," pursued he, "the Act is worth little more than a snap of the fingers, and is only one of the Chamberlain-Morrison pills for the cure of an electoral difficulty." Of course, I do not at all agree with this view, but I know that it is meant to be urged with turgid persistence upon the rural electors. Will the bribe thus be as valuable as some of its supporters have too optimistically allowed themselves to imagine? Knowing the acute nature of the Radical organiser, I am compelled to think it will not be.

So much for the rural measures, and what of the rural men? Is there any politician among the rural members who has ever been possessed of the eloquence of Lowndes possessed of resource, initiative, and fertility of debate. I am bound to confess that the rural M.P.'s are

now, as they have been, an eminently responsible and dignified body of gentlemen, but unassertive, and, on the whole, too ready to accept the conventional and the absolutely proper in Parliamentary life. True, Mr. Goulding has done well in carrying his Bill. By the way, it is interesting to reflect that he is, as Mr. Long was, the representative of the Devizes division. Cast, however, your eye down the whole list, and ask which man has intruded himself on the public and Parliamentary imagination by his personality. Mr. Channing has been, after his latter-day manner, much in evidence and undeniably thorough. Mr. Jeffreys has been, it has seemed to me, rather suspicious of his own considerable Parliamentary gifts. Mr. Lambert has, in the intervals of militia enthusiasm, been practical and earnest, but never dominating. Mr. Fletcher Moulton has failed to realise the expectations we had formed of the man who has been associated so sympathetically with the famous Collington platform. Young men like Mr. E. Strachey and Mr. Ailwyn Fellowes have receded rather than advanced. Where is the future leader among these politicians? I cannot detect him. Where is the leader, I mean, who will attract a following and breed an enthusiasm desirable for the new election, for which we have been bidden equip ourselves. This last session has been destitute of new reputations.

Did you note Sir Michael Hicks-Beach's strong declaration in reference to the general election? The matter has not, he averred, even been tentatively considered by the Cabinet, and no decision whatever has been arrived at in reference to it. This is the best answer to the men who are sounding the tocsin of war, and who would exhaust our strength long before even the approach of conflict by the mere weight of our long-borne armour.

So the Government has at last had a foretaste from Ulster of the bitter feeling which has been aroused by the appointment of Mr. T. P. Gill to the position of Secretary of the Irish Board of Agriculture. Protest was inevitable. The placing of the chief position in this new department in the hands of one of the authors of the Plan of Campaign, and one of the apologists, if not one of the authors, of the No-Rent Manifesto, is so whimsically absurd as to suggest a picture from Alice in Wonderland. To say, as Mr. Plunkett does, that Mr. Gill is clever is beside the mark. Are not Mr. O'Brien, Mr. Davitt, Mr. Dillon, and that *enfant terrible*, Mr. Swift McNeill, clever too? Why not, then, make them all administrators? The chief permanent administrator of a great industry like Irish agriculture need not have been of necessity a reformed Irish agitator.

PRACTICE WITH SCIENCE.

British Wheats.

When to Cut.—Selecting Seeds.—Improvement of the Grain.

Harvest operations are now general in the South of England, and in the course of a few days farmers all over the country will be busy cutting wheat. At this important epoch, the writer wonders, how many farmers have gone through their wheat fields and selected a good-looking plot for the seed patch, from which should have been removed by this time all undesirable plants, especially those having short and poor ears. Every farmer must admit, even if he is not aware that there is nothing that he can expend his mental energies more profitably upon than in studying the laws of reproduction, that the importance of good seed for any crop cannot be overes imated; for well-selected seed means good quality, and a fair quantity without diseased progeny. If good economic results are to be obtained in industries like agriculture, horticulture, or stock-breeding, the selection of particular animals or variety of plants is by no means to be lightly considered, for the essential end is the reproduction of life, and that of high standard. The cultivation of land is the original occupation of primitive man, and with the advance of intelligence there was naturally a corresponding desire by the cultivator to raise the quality both in respect to type and class of agricultural products, whether of the vegetable or animal kind. Outside farming circles many people thing in a contemptuous manner that there is not much knowledge required to be a farmer, imagining that all that is necessary to produce a cereal crop is to scatter manure on the fields, plough it in, and then all that is left to be done is to sow the seed, and wait until it is ready to cut, whereas, if they would only give a thought to the possibilities of agriculture their ideas would be turned into wonder. In fact, in no industry in England is there the same scope for the utilisation of scientific knowledge, and opportunities to use means and methods to obtain a profit which will not be forthcoming without some necessary training and research. One of the most unfortunate things at the present time in English agriculture is the rapid decline in the production of the principal cereal—wheat—in the United Kingdom, due in a great measure to severe foreign competition, but considerably augmented by the ignorance amongst farmers of the present market requirements. In this connection it must be borne in mind that the English wheat grower is correlative to the British flour miller, that whatever materially affects the status of the former cannot fail to be of importance to the latter. The present harvest will not yield more than 8,000,000qrs. of wheat, so that to feed the population of the United kingdom during the coming cereal year close upon 23,000,000qrs. of breadstuffs will have to be imported from abroad. In order to obtain a given standard of flour, the millers have to employ an art peculiar to this country, namely, to select from the different foreign wheats a certain proportion, and then mix and blend them together at their mills prior to grinding them into flour. It is here that the judicious buying, handling, and manipulating the wheats of the whole world which are offered at various prices on our markets come in. For it is a very easy matter for a miller to make good flour by using the choicest wheats in the world, but it is not an easy matter to make it and a profit at the same time. Complaints from many millers have been received that English farmers do not produce such good wheat as formerly, and the deterioration is attributed to the practice common with many seed merchants of supplying farmers with seed wheats of fine appearance, but of indifferent quality—a wheat that contains more starch but less gluten, and is thereby of distinctly less nutritive value. Such wheats must of necessity bring a poor price, as they require the millers to purchase and blend with them a large admixture of strong foreign wheat in order to make a flour that will produce a good loaf of bread. If the English farmers would only grow "stronger" wheat, that is, containing gluten of a better quality for bread-making purposes, the English millers would be able to give a better price for the same, as they could then use a greater quantity of the cheaper foreign wheat to make up their mixtures without there being any likelihood of lowering the quality of their flour. There is always a large amount of inferior foreign wheats in the English markets, so that the British farmers would greatly benefit by raising the quality of their wheat above its present level.

In order to show what can be done by an annual careful selection of seed wheat, besides producing a better quality grain, we may mention that Major Hallett succeeded in four years in increasing the size of the ear of wheat in the following ratio:—

	Length in inches.	Containing grams.	No. of ears on finest stool.
1857 .. Original ear	4⅜	47	—
1858 .. Finest ear	6¼	79	10
1859 .. Finest ear	7¾	91	22
1860 .. Ears imperfect from wet season	—	—	39
1861 .. Finest ear	8½	123	52

Thus the length of the wheat ear was nearly doubled, their contents almost trebled, and the tillering power of the seed increased fourfold.

To choose your grain as you would your stock is the true test of the farmer, and the selection of a seed patch in the best wheat field, which has to be specially treated and kept separate when stacked, so that it can be threshed by itself when wanted, as well as dressed with extra care, to obtain the heaviest kernels, shows great wisdom on the part of the wheat-grower, for this annual selection in the seed will at once show a great improvement in the forthcoming crop, and in a few years establish a valuable strain of wheat. Many of our readers may consider it unnecessary to keep the seed patch selected separate from the other operations in the field, but it must be borne in mind that wheat, for the purpose of being manufactured into flour, should be cut before it is ripe, while seed wheat requires to be fully ripe. As will be seen from the following table, which shows the difference found by Professor Johnston in three equal plots taken from the same field of wheat upon thin limestone soil at North Deighton, in Yorkshire, cut respectively twenty days before the crop was ripe, fully ten days before ripeness, and when fully ripe:—

When Cut.	In the Flour. Moisture.	Gluten.
20 days before it was ripe....	15·7	9·3
10 days before it was ripe....	15·5	9·9
Fully ripe	15·9	9·6

Our farmers must always bear in mind that the wheat that produces a flour that has in it such quality and quantity of gluten that it yields when made into bread the largest quantity, is the most valuable to the miller, and consequently realises the most money when sold on the market. Seed wheat must be fully ripe, as it then contains the proper proportion of chemical products necessary to produce plant life and the required nourishment to sustain the young plant. By carefully selecting the heavier kernels when the seed wheat is threshed and dressed, the farmer has a seed not only fully developed, but the rootlets are able to extract from the soil a larger quantity of silica, which is required to strengthen the straw, so as the plant can resist all weathers by reason of the increased quantity of germ oil in the grain.

R. W. D.

LETTERS TO THE EDITOR.

Great Losses by Flour Importations.

Sir,—In July, 1895, I wrote to the President of the Board of Agriculture, pointing out that the nation lost a large sum by importing flour instead of the equivalent in wheat.

Mr. Long himself replied that the facts to which I referred were unquestionably of serious moment, and would engage his serious attention.

Another member of the present Government replied that he had always imagined that why we imported flour instead of the equivalent in wheat was because the operation was cheaper, and that if this were so there must be a flaw in my calculations.

This caused me to instruct a chartered accountant to go through my calculations for the ten years 1885-94, proving loss of £18,000,000 by this country, owing to the importation of flour instead of the equivalent in wheat.

These calculations appeared in various papers, and their accuracy still remains unchallenged, because it is a fact we are losing a large sum annually by the importation of flour instead of the equivalent in wheat.

On November 22nd, 1895, I wrote to the Marquis of Salisbury, and pointed out that during the ten years 1885-94 the country has spent £320,000,000 on imported wheat and flour, and that the importation of flour instead of the equivalent in wheat had resulted in a loss to the country of £18,000,000. His Lordship's secretary replied that the matter would receive consideration.

It appears the matter has received but little consideration, because since the present Government has been in office we have lost over £7,000,000 by importing flour instead of the equivalent in wheat.

Were the importation of flour prohibited we should obtain much employment for our workers, better bread without any increase in the price, as our flour would be more freshly ground, the possibilities of adulteration would be reduced, we should receive millions of hundredweights of wheat-offals we now leave abroad, should raise meat at a cheaper rate, more stock would be kept, and there would be an increase in our home-made manure, which would cause a considerable increase in the crops of the farm.

If we had imported instead of any flour the equivalent in wheat, we should have saved over £25,000,000 during the past fifteen years, as follows:—

Year.	Difference between cost of Flour and equivalent in Wheat.	At 4 per cwt. Value of Wheat-offals left abroad.	Total Loss on Year by Importing Flour.
	£	£	£
1885	972,136	1,187,463	2,159,599
1886	462,721	1,101,717	1,564,436
1887	353,233	1,354,742	1,706,975
1888	437,981	1,268,283	1,706,264
1889	648,506	1,100,406	1,748,912
1890	465,313	1,183,000	1,648,313
1891	210,710	1,254,225	1,043,515
1892	415,594	1,657,950	2,073,544
1893	565,306	1,530,612	2,095,918
1894	822,762	1,435,050	2,257,812
1895	607,176	1,377,630	1,984,806
1896	6,438	1,599,015	1,592,577
1897	146,800	1,401 050	1,254,250
1898	224,237	1,576,283	1,352,046
1899	7,004	1,720,928	1,713,924

Total loss during the past fifteen years by importing flour instead of the equivalent in wheat, £25,902,891.

On September 10th, 1895, the *Morning Post* published a letter of mine in which appeared the following:—

"Our millers are pleased to grind wheat for the offals instead of a money payment, as the value of the offals comes to more than the cost of grinding, but the flour exporters are not contented with the offals alone, as in nine out of the last ten years they have charged us more for the flour than the cost of the wheat, although they have had all the offals to repay them the expenses of the grinding. The year in which they charged us less for the flour than the cost of the wheat was 1891, during which year we imported 16,723,003 cwt. of flour at an average price of 12.18 shillings per cwt., which amounted to £10,184,308, and as according to millers about five-sevenths may be considered a fair average of the amount of flour contained in a given bulk of wheat, the quantity used to obtain the flour was 23,412,204 cwt., which at 8.88 shillings, the average price of wheat for that year, would have cost £10,395.018; therefore the flour cost £210.710 less than what the wheat would have come to."

From a commercial point of view, since the exporters sold us flour one year for less than the cost of the wheat, it may be safely said that any charge above the cost of the wheat is decidedly a gross overcharge, and it is a fact that such irregular dealing actually took place the other nine years, the overcharges varying in quite an erratic manner."

That my statements were true has been proved in a most extraordinary manner, as since 1895 we have been paying less for our imported flour than the cost of the equivalent in wheat.

Thus it appears that my having drawn public attention to the matter has caused the nation to save about £500,000 per annum since 1895.

But we are still losing about £1,500,000 each year by importing flour instead of the equivalent in wheat,

as we leave the wheat-offals abroad and have to buy substitutes for feeding our stock.

Thus we suffer a double loss; we leave abroad something we require, and buy something else to take its place.

Although our present Government has been in office five years and should have known the facts, they have done nothing to stop our annually losing an enormous sum of money, when the nation would gain so many indirect advantages were the importation of flour prohibited.—Faithfully yours,

THOMAS G. READ.

31, Cavendish Square, London, W.
August 8th, 1900.

Phosphate of Alumina.

Sir,—I respond willingly to your request that I should state the results of the experiments made by this association on phosphate of alumina.

Some experiments on single turnip plants, grown, not in soil, but in pure quartz, showed that this phosphate had some influence on plants, but the results were not such as to give any reliable indications as to weight.

A series of eighty experiments was made in five different soils; in this trial, each of the various kinds of phosphate of lime—soluble or unsoluble—gave an increase over the un-manured plot of over 50 per cent., while the increase by phosphate of alumina was, on the average, only 11 per cent.

The same number of experiments was made on the following year on oats, with the result that phosphate of alumina gave an increase over no manure of only 10 per cent. straw and 5 per cent. grain, while the average of the other phosphates gave an increase of about 30 per cent. straw and 21 per cent. grain. From these experiments the association came to the conclusion that phosphate of alumina exerts little influence on crops.

THOS. JAMIESON.

10, Belmont Street, Aberdeen, August 9th, 1900.

Pigs at the Lancashire Show.

Sir,—I am much disappointed with the reports that appear from time to time in yours and other leading agricultural papers of the shows of pigs. In your last week's issue you give half a column to a report of the Stafford Show, which was no show at all in the pig section, and about one quarter of the space to the Royal Lancashire Show, which was without doubt the premier pig show of the season.

Now, what is the reason of the paucity of these reports? I had nearly said misleading reports, and I think it is the best word; yet you say the prizes were divided between Sir Gilbert Greenall and Mr. Spencer. Now, what is the actual result?

Sir Gilbert Greenall has twenty-one entries, with which he gets the following prizes:—Cup for best sow, four firsts, four thirds. Mr. Sanders Spencer, with twelve entries, gets two firsts, three seconds, and has good luck to get them. Mr. F. Almand has eight entries, and gets three seconds, one third; Mr. Twentyman has six entries, and gets one third; Mr. Dewhirst has eight entries, and gets two firsts, two seconds, two thirds, one reserve, one h.c.; Mr. J. Barron has two entries, and gets one first and champion cup for best boar.

Now and then you give pig breeders not only the poorest of show reports, but make no notes for the guidance of readers who are not present, as you do in other sections of your journal.

Is it because you leave the reporting of poor piggie to any one, or is it that none can be got to give a few minutes to his cause? I think there are pig men who could and would give you better reports if you asked them. Trusting you will put the corrections and remarks in your next issue. ANON.

[*** Our correspondent is curiously misinformed as to our pig reports. "Pig men" have been invited many times to send reports about their herds, and to write reports of shows, but with rare exceptions have either declined or taken no notice of the communications. "Anon" is one of them, but he seems to have forgotten the circumstance, or he would not have penned the last paragraph of his letter. Breeders have thus shown themselves unquestionably inconsistent, as they will neither write reports on a matter they ought to understand, nor abstain from complaining of those written by others not within a charmed circle. We have repeatedly tried to please the "pig men," but have never succeeded. Their jealousy of each other—more pronounced than amongst breeders of any other kind of farm stock—has always been the origin of unreasoning and unreasonable grumbling, and we find it impossible to entertain even a hope to satisfy a body of men who by their actions show that they hate a breeder more than they love a pig. We have no doubt that other agricultural papers have experienced the same difficulty. We wish we could see our way to oblige our correspondent and other breeders by making different arrangements, but to attempt to do so is to try to accomplish the impossible. We gladly print our correspondent's abstract of the awards at the Royal Lancashire Show.—ED. M. L. E.]

Owing to the large number of shows which have taken place during the past week, we are compelled to hold over some reports, and they will appear in our next issue.

BARLEY AND MALT.

By Hordeum.

Foreign Barley.

With the spell of bad weather threatening our crops, added to the scarcity of labour in many districts, all those interested in barley look with more than usual interest to the reports coming to hand of the prospects abroad.

One of the first things that painfully strike an observer is the utter inadequacy of the information which ought to be available, but which is not. The Agricultural Returns do not furnish any details whatever of a number of important barley-producing countries, and although we have a fuller list of countries returned which export barley to us, the latest available date is 1898. Of the quantities scheduled no one knows what proportion is suitable for malt making, and very few can even vaguely guess what it may be.

Of late years the improvements in cleaning and grading machinery have been such that very many cargoes of barley which formerly would have been deemed totally unfit for maltsters' use, now yield large proportions of good, useful grain.

Entry of Malt by Weight

now causes immense quantities of thin light foreign grain to be made into malt, which would have been impossible if duty were still charged upon Imperial measure. It must also be remembered, too, that a lot of barley reaches us in a very clean and perfect state, for some exporters have fitted up elaborate machinery, which is equal, if not superior, to anything of the kind in common use with us.

But taking the gross weight of barley of all kinds, all put together—Russia, Roumania, and Turkey are thus far the only countries which have as yet sent us over a million quarters in any single year. The amount sent from all these countries fluctuates very widely, and it would be most interesting, if we could but get the information, to know the relative amounts of malting and feeding kinds separately.

Take Russia as an illustration. In 1894 we received from that country over 19,400,000 cwts., and in 1897 only 7,500,000 cwts. From Roumania, on the other hand, the quantity grew from 3,000,000 cwt. in 1894 to 4,700,000 in 1898. Turkey also showed a corresponding advance in the same period.

A Trade Report

issued by Messrs. R. Liebmann and Co. states that the quantity produced this year in Smyrna and some other good districts exceeds any previous record, and also, not only is the quantity large, but the quality is better than has been secured since 1895. The same may be said also of the quality of the crops secured in Bohemia, Hungary, and Moravia, although the quantity produced falls below an average, owing to defective seed time and a bad spring.

It is added that prices are not yet fixed, although they open reasonably with a firm tendency for high qualities. For the best grades consumers are ready buyers. Medium varieties are still depending upon the condition of our own crop, and this is as yet trembling in the balance. If present promises are fulfilled we shall see prices recede considerably.

This report refers to the contradictory reports sent to us from California, owing to many holders of old stocks wanting to realise.

How Prices will Rule

in our own markets it is still premature to hazard an opinion. In the markets for many commodities the price is said to be ruled by the laws of supply and demand. It is always difficult to see how this works out, but in the barley trade the stronger factor is in reality, What will maltsters or brewers give?

The relation of the quantity of suitable barley available is subordinated to the supply and prices of sugar, rice, and maize. The good old days when the supply of barley alone regulated the price of malt have gone, probably never to return. In their place we have in our midst a compact body of men who resolve not to go beyond a certain price, and with the leverage they possess, especially as there is no combination whatever amongst barley growers or dealers, they can virtually do as they like.

Why such important interests

Remain without Combination

is one of those puzzling things that cannot be understood. Maltsters as a class think they may have reason for holding aloof from any organisation, but in reality they are sadly mistaken. Barley merchants also may have still better reasons for refraining from banding together in self-defence or mutual protection.

But with growers there is absolutely no reason why they should not take the necessary steps to at least come to some common understanding. Year by year their power to do good for each other and themselves is growing weaker, whilst malt users are rapidly consolidating and gaining power. We shall soon see the same tactics adopted in dealings for malt as already prevail for hops, with the unhappy difference that while substitutes for hops are only sparingly employed, substitutes that displace malt for nearly all purposes and not for beer only are continually and rapidly growing in number and in the amount used.

That the competition of foreign barley has less effect than sugar, maize, and rice, as shown by the high price obtained for the choicest kind. It is now of an uncommon occurrence for such prices to run well over 40s. per quarter.

FRANK RICHARDSON AND CO., growers of Selected Foreign Malting Barleys, 6, Duke Street, Southwark, London, S.E. Telegrams, "Exsurgens, London" Telephone, 787, Hop, London; and at Liverpool and Burton-on-Trent.—[ADVT.]

MILLING.

The Treatment of Break Stock Previous to Purification.—III.

The recent severe storms of wind and rain have done a great deal of damage to the wheat crop, which in many parts is so laid as to make cutting by hand labour necessary. Had the fine weather of a fortnight ago continued, we should have had samples of new wheat at the mills in the south by this time; now, even should a renewal of the hot weather continue, the grinding of home-grown grists will be much delayed. But while the recent bad weather in this country has had the effect of raising the prices of both wheat and flour (the latter having, in some parts, gone up as much as one shilling per sack of 280 lbs.), yet a feeling and tendency on some of the chief European markets can be observed.

It is quite possible that a good deal of this year's crop will come to the mills in anything but good grinding condition, a state of things which is to be regretted after the last two harvests, which put the country miller more upon an equal footing with the port miller, and gave him the long-asked for encouragement. A very fair quantity of wheat is already in shocks, and if the wet continues this will soon start growing, and grown wheat is one of the sorts that the miller does *not* want. It is worse than ill-conditioned, soft, and damp samples, as much as when the berry begins to grow no matter how little.

Its Chemical Constitution has Commenced to Change,

and millers would do well to let such wheat severely alone. Should any of this year's crop come to the mills in immature condition it will be necessary to dry it before grinding, by which process the gluten produces can be raised and the wheat actually ripened. By treating these wheats in the driers to heat alone, the operation, if skilfully performed, will do, to a very great extent, what the sun and other climatic conditions have failed to perform. To try to mill immature, damp wheat is a fruitful source of trouble and worry. It is difficult to adjust the break rolls for such a purpose; the middlings will be of bad shape and condition for purifiers, and silks will, to a great extent, refuse to dress. But a great deal of these troubles can be prevented by passing the wheat through good driers, of which there are several very efficient ones upon the market, at very reasonable prices.

Offals are still in good demand at very firm prices, and in some parts they are somewhat dearer. Perhaps there is the most run on bran and sharps; some millers cannot make enough of the former to satisfy their customers. As has more than once been urged, the offal trade is often far more paying than the manufacture of flour, and it is a matter for wonder that country millers do not to a large extent remodel their plants and pay more attention to this branch of the trade. Small wheat, for instance, could often be made to pay better in the form of offals, properly apportioned, than selling it—or trying to sell it—in the shape of flour, and those members of the trade who have felt the competition of the large millers would do well to consider the whole question of the manufacture of feeding stuffs of all kinds.

The Condition of Stock for Purifiers.

My last two articles have completed what I wish to say on the treatment of break stock with a view to putting it in suitable condition to purify. The arguments which may be adduced for and against the different kinds of machines which are used as scalpers have been considered, and an example of a [illegible] sieves, with their coverings, has been given. The bulk of the stock from these machines, especially if well graded, is in proper condition to go to purifiers, but there is a certain loss of the coarse which must receive the assistance of the [illegible] or other machine for purposes of finishing previous to purification. As to grading itself, no particular rule can be laid down, as the machines which are used for the treatment of the break stock vary so much. Some are combined, and will do all the work which is necessary before the stock reaches the purifiers; others, like the [illegible] sieve, will only do part of the work and require the assistance of other machines. But all the work be done at once—that is to say, on one machine or [illegible] to be separated [illegible] the same time, but [illegible] grading being right, it is absolutely necessary that the coarse should be properly ground and the [illegible] possible, or else a [illegible] and [illegible] lost upon it. Millers speak of a "[illegible]

but no purifier in the world is dustless unless the stock be sent practically dustless to it.

Pneumatic Sorting.

With regard to the gravity purifier, which may suitably treat the coarser break products, the case is somewhat different, and this leads me to notice a process which is correct in theory, even if in practice it is sometimes found to be too expensive. There is a system (and it may be said systems) which has been in use in this country and in America, in which the overtail as it leaves one scalper goes through a course of aspiration, by which the different products are sorted, according to their specific gravity, before going to the next break. Some years ago in the States these aspirators were constructed upon the same lines as the aspirating middlings purifier, though they were not arranged with so fine an adjustment. They worked well, however, and were improved upon in this country and on the Continent by a more direct pneumatic sorting process, in which the scalper overtails were separated into different sizes and distributed to the following break rolls acording to their size. There was a great deal to say for the system, as each separate piece of broken wheat with the bran attached went direct to the pair of rolls best suited to deal with it, while the finished bran went direct to offals without unnecessary rolling.

It may be that it is a question of cost, but the advantage of not passing the bran through more pairs of rolls than is absolutely necessary must be apparent. And by this method not only is there less small bran, but there is also less break flour.

The Careful Grading and Sorting of Break Stock.

Two different arrangements have been applied. In the first a tail-sheet is put upon each scalper, thus grading the stock to succeeding breaks into two sizes, each of which is separately subjected to the sorters for separation. The second arrangement is more suitable for small mills, as the whole of the overtails pass through the sorters without being divided. On the face of it, the method of pneumatic sorting of break products seems intelligent, always bearing in mind the fact that the best milling is that in which the separations are best made, while the subjecting of break stock—heavy particles of endosperm, with bran attached, large pieces of bran, with little flour attached, and practically cleaned bran to unnecessary repetition of rolling, spouting, and elevating, is certainly to be depreciated. Still, systems of aspiration on break stock are not so much in vogue as they were, owing to the more perfect forms of scalpers manufactured; but one would not be surprised to see such products treated more to aspiration in the future than they are. No trade has undergone, and is undergoing, such changes as flour-milling, and when one hears of centrifugals for scalping, and the re-introduction of porcelain rolls for the reduction of middlings, one is apt to be surprised at nothing.

It should be remembered, too, that the more carefully the grading of break stock is effected the more easy will the purification be and the better will be the resultant flour from the middlings. How far the grading should go it is not for the writer to say. The size of the plant will principally fix the limit, but, whatever that limit may be, the miller may feel assured that the nearer in size he can send his break products to different purifiers the more successful will his operations be. Start from the first break and draw the line as perfectly as possible between the pure and the impure, between different sizes of middlings, and between middlings and flour; in other words, group the stock well at the head of the mill and the finish will be more satisfactory as well as more speedy.

MILLER-FARMER

HOPS.

By Lupulin.

Home Notes.

The Borough.

Traders have not yet been aroused to very definite action by the unfavourable reports which continue to arrive from the plantations. They seem to argue that because the cry of "wolf" is generally heard at about this time of year, there is still safety in uncertainty, and that the danger of scarcity may yet be avoided. Therefore, they are sitting on the fence, and waiting further developments. But, despite their outwardly assumed indifference, there is an under current of questioning concern flowing through their minds, and the recent gales have produced some effect, in causing buyers to be a little more responsive to the higher prices that are now being demanded. Entirely justified by enlarged and enlarging knowledge of the actual state of affairs in the gardens, holders are getting bolder, and it needs to say that all hops are now worth at least 5s. per cwt. more than they were a fortnight ago. Some reports speak of 10s. advance, but I hardly think this has yet been attained, although it is not impossible that by the end of next week it will have been reached and, perhaps, surpassed. In the meantime the tone of the market is firm, and I hear that several holders are assisting it by withdrawing their hops from offer.

The Condition of the Plantations

is fairly indicated by the selected reports that may be seen hereafter. We have now arrived at a point which enables us to forecast the prospects of the crop almost exactly. We see to-day all that the bine can do. Further growth is practically impossible, and there only remains the development and maturity of such hops as the plant has already produced. To what extent they will be fully developed and what proportion will be matured must be decided by the climatic influence of the next few weeks. But whatever optimistic views may have been previously held concerning the yield must now be considerably modified, for with the boisterous and almost autumnal weather through which we have just passed, it is impossible for the crop to be more than moderate, whatever improvement may be in store for us during this month. Recent visits paid to the plantations by enquiring factors have resulted in a material reduction of previous estimates, and the highest figure named this week is £150,000 to £160,000 old duty, representing an average of only 6cwts. per acre or thereabouts. My private information inclines me to accept 6cwts. as the highest possible, and when I take into account the very poor reports received from the Midland districts, I am rather disposed to entertain the probability of a lower average than the figure named, and shall not be surprised if the official figure for 1890, viz., 5·26, is nearer to the mark.

A contemporary's report of the average condition of the crop on July 1st states that it was then represented by the figures 71, which is rather under three-fourths of what may be accepted as satisfactory. The position has only advanced one point up to August 1st, it then standing at 72. This is lower than any year since 1896 at the same date, when it was 70·3, and is nearly 7 points below the average of the last five years, which is abnormally raised by the big figures of 96·7 that resulted on August 1st last year.

The Imports and Exports

of hops made up to July 31st last from September 1st of last year show the following, which are compared with the corresponding period of the previous season:—

Imports from—	1899-1900. Cwts.		1898-1899. Cwts.
U. States America	90,930	.....	184,111
Other countries	53,394	.....	38,873
Total	144,324	.....	222,984

leaving a deficiency of imports during the eleven months of this season of 78,660cwts.

Exports of—	1899-1900. Cwts.		1898-1899. Cwts.
English hops.....	14,622	.....	11,685
Foreign hops	3,424	.....	8,248
Total	18,046	.....	19,933

Imports During July

last amounted to 5,724cwts., being 3,324cwts. less than in July of 1899. Of the quantity received last month the U.S.A. sent us 4,990cwts., and from other countries we only received 734cwts.

It is somewhat interesting to trace the origin of the whole of our imports, and I have gathered them as under from the

Annual Board of Trade Report

of British Commerce in 1899.

Imports from—	1899. Cwts.		1898 Cwts.
Russia	354	.....	3,059
Germany	11,722	.....	8,280
Holland	13,809	.....	9,169
Belgium	24,423	.....	30,151
France	3,549	.....	1,644
U.S.A. Atlantic Ship.	123,250	.....	190,843
" Pacific "	2,215	.....	692
Other countries.....	—	.....	28
Australasia	689	.....	21
Canada	222	.....	249

Our chief customers for exported hops are the colonies of Victoria, New South Wales, Canada, and the Cape of Good Hope. India takes a fair quantity, and Belgium and Sweden also buy from us to some extent.

I much regret to hear of the death of one of our principal hop growers in East Kent.

Mr George W. Finn.

late of Westwood Court, Faversham, succumbed a few days ago to a long illness, following upon an attack of typhoid fever. Mr. Finn was a typical Englishman, both physically and mentally. Of most energetic character, he conducted a large business as an auctioneer and valuer, in which capacity he had been well respected for many years in the markets of Kent and Sussex. His extensive hop plantations at Preston bore witness to his enlightened skill in this section of agriculture, and his genial presence and hearty manners will be sorely missed by the crowd of friends whose high regard he had gained in the course of his upright business life.

Plantation Reports.

[SPECIAL TO THE SECRETARY N.A.E.H.G.]

MAIDSTONE.—Our experience of the past few days has demonstrated the truth of the saying "there is nothing so certain as the unexpected," which has come upon us this season in the gales that have been so disastrous to many gardens in this vicinity. Strings have been blown down, and the top branches of the bine that is standing have been badly damaged by the extreme force of the wind. Mould is also running fast. It is difficult to make any reliable forecast as to the final results, but I am of opinion that our prospects are not now nearly so good as they were a fortnight ago.

BIDDENDEN.—The chances of the hop crop have been seriously discounted during the past week by the heavy winds and the rapid increase of mould. I have never seen so much damage done in the gardens in so short a time. We are bound to reduce our estimates by at least 2cwt. per acre, and unless we get better weather they will be still further reduced before picking.

EWHURST.—Our gardens have been very badly injured by the recent gales, which exceeded in force any that I can remember, bruising the bine and the burr, and reducing the probable crop to a considerable extent.

BETHERSDEN.—All the parishes round us, as well as our own, have suffered more or less from the effects of the boisterous winds of last week. The damage done cannot be made up for under the best possible circumstances of weather, and as the unsettled weather still continues there seems to be no chance left for even a reasonable crop. Poles, strings, bine, and burr have been blown down in every direction, and any burr or hops remaining on the plants have suffered from the heavy whipping they have had. We are certainly booked for a very poor yield.

WADHURST.—The climate is giving the hops very little opportunity to grow out or to come to perfection. I do not remember any season in which we have had so much to contend with. When the hot weather arrived, it seemed as if we might be able to make up for lost time, but since the heat has ceased we have had cold nights, with too much wet, and our troubles culminated in the frightful gales which swept over the gardens a few days ago, threatening total destruction, and doing damage from which it is impossible to recover. The wind has, I believe, reduced the crop by at least one third, and the look out is now very poor.

THE FAIRLEIGHS AND DISTRICT, AUGUST 11TH.—The late gales have lessened the crop by at least a quarter, in some grounds by more, where fully exposed. It is sad to see the way they are knocked about, and in some places it will take all the men on a farm to put the poles and strings right. Mould is ruining, too, very much in some grounds, and especially in grounds subject to it, and if the late cold nights continue it must increase. The bramblings hang in burr very much, and where the burr has been battered, it is thought they will never come to hops. Altogether the outlook is bad. Still, a fortnight's hot weather may do good, but it cannot replace the broken tips of the branches. Picking must be unusually late.

KINGS PYON (HEREFORD).—The hops in this district are doing very badly. We have had bad weather for them, too much cold, also blight, and a severe gale, and shall require more sunshine to average 3 cwt. per acre.

HEREFORD.—The hops in this county are looking wretchedly bad, and are getting worse every week. I really do not think we can grow more than a quarter of last year's crop. The wind has played sad havoc with the yards where the bine was fairly heavy, and has broken down the string work in all directions. The weather continues cold and wet, and picking must be very late.

LEDBURY.—The storm on Friday week seriously damaged the hop yards, and more trouble ensued from the gale on Monday. Our crop prospects are now much reduced, and at present it is impossible to estimate what we shall grow, beyond that it is certain our yield will be very small.

FLADBURY (WORCESTER).—The effects of the gales on Friday and Monday are painfully evident. Fruit trees are broken down, and the hop yards were pulled about to such an extent that it is now impossible to reckon on anything like an average crop, indeed we shall have to be content with very small results.

MADRESFIELD.—The hop yards in this district, which have been so carefully cultivated and persistently washed, in the hope of producing a decent crop, have been very seriously interfered with by the recent heavy gales. The yield cannot be otherwise than very meagre, and unless we can secure high prices our hop growing this year will land us with heavy losses.

Hop Reports.

Sir,—The outlook at the time of writing is gloomy in the extreme. Gale has succeeded gale. A phenomenally low temperature for the time of year, and rain falling practically every day, must tend to reduce the crop to a very appreciable extent—quite twenty per cent. less than the estimated growth of, say a fortnight ago. Where washing was resorted to early and persistently kept up there is a fair amount of bine, but in many places very "blind." On the other hand, the neglected gardens have altogether gone to the "wall." There never was a greater disparity between the well-washed hops and those that have had to take their chance. Picking must, under the circumstances, be late, and many gardens in this district will never have a bin put in them. All have been bruised and knocked about to that extent that it is impossible to assess the damage wrought.

MAN OF KENT

(*For Hop Market Reports, see pages* 209, 211.)

SHOWS.

West Gloucestershire Farmers' Club.

The West Gloucestershire Farmer's Club's thirty-ninth annual show took place on Monday in the beautiful grounds of Blaise Castle, Henbury. For several years past the *locale* has been at Fishponds, and with the large population of Bristol to draw upon the gate has reached some seven or eight thousand. It was considered, however, that the migratory custom which characterised the club in its earlier days should again be followed, and staunch supporters in the neighbourhood of Henbury put in a strong claim, seeing that the president for the year is Mr. John C. Harford, who although he lives for the greater part of his time in Cardiganshire, has close family ties with the district. Mrs. Harford, the president's mother, very kindly placed the Blaise Castle estate at the club's disposal, and an ideal show ground it made. It was within easy distance of Bristol, and had the weather been favourable the attendance of visitors would probably have been as good as last and previous years. Rain, however, fell in torrents in the morning, and at intervals in the afternoon, so that a big attendance was not to be expected, but the assembly was a good one, all being considered.

There was little difference in the number of entries on the purely agricultural side, but in the department for horses for riding, driving, and jumping the competitors were very largely in excess of previous years. On the score of balance the president (Mr. John C. Harford) and other experienced agriculturists had something to say. They are of opinion that, although the riding, driving, and jumping competitions were the popular attraction, and drew the largest number of visitors, the encouragement of stock breeding was the main object of the club. The cattle were in the main excellent in regard to quality, if, in some classes, the entries were small. Shorthorns were not numerous. There were some instances of keen competition, especially in dairy cows and heifers. Some very useful pairs were among them. In very few shows could better animals be found than in Classes 32 and 33, in which the champion and the reserved animals were. The competition was not very good in the fat cattle classes. In Class 27 the entries—two in number—were disappointing, seeing the value of the prizes offered. The old bulls, though small in number, were a very useful class. So highly meritorious were the dairy cows and heifers that they constituted quite a feature of the show. The champion prize was keenly competed for. For a local show the Jerseys were exceptionally good; if there were a few instances in which the level was not maintained, this applied particularly to the yearlings, which need a little more study in feeding that their milking qualities may be improved rather than their fleshy proportions. The sheep were an average lot in numbers and quality. Swine fever restrictions prevented any pigs being sent. Cheese and butter were small in entries, and the quality of the former was scarcely up to the mark. The cart horses were exceedingly good, especially the three-year-olds. Regarding the horses for riding, driving, and jumping purposes, they were far more numerous than hitherto, and included many well-known animals. The contests were, many of them, keenly contested. Unfortunately, heavy storms interfered occasionally with the enjoyment of the spectators.

The judges were:—Hunters, hacks, harness horses, and jumping: Mr. T. B. Miller, M.F.H., Cricklade; Mr. Algernon Elwes, Cirencester; and Mr. John Fowler, Norton Marleward. Hunter mares and foals and young stock: Colonel Henry, Tetbury; Mr. J. C. Harford, Falcondale, Lampeter; and Mr. E. A. Hardwick, Worle. Cart horses: Mr. Merson Court, Long Ashton; and Mr. C. J. Hibbard, Standon Manor. Shorthorn cattle: Mr. S. Hardwick, Portishead; and Mr. B. Read, Quedgeley. Channel Islands cattle: Mr. R. Wheadon, Ilminster; and Mr. A. Worman, Wells. Sheep: Mr. C. Cornock, Millsley; and Mr. Frank Robinson, Didmarton.

Prize List.

HORSES.

Mare or gelding above five years old, equal to 12 stone, and not more than 13 stone, for hunting purposes: 1, Mr. A. M. Fry, Clifton (Sunbeam); 2, Mr. James Verner, Bristol (Yeoman); 3, Mr. B. G. H. Gee, Bristol (Zealot); r, Mr. W. J. Cridge, Clifton (Jerry).

Mare or gelding above five years old, and equal to 13 stone and under 15 stone with hounds: 1, Mr. J. Verner (Pioneer); 2, Mr. B. G. H. Gee (Dauntless); 3, Mr. T. T. Lindrea, Westbury-on-Trym (Tormentil).

Mare or gelding above five years old, and equal to over 15 stone with hounds: 1, Mr. J. B. Till, Hambrook; 2, Mr. W. Pride Jones, Downend (Big Ben); r, Mr. G. Chambers, Bristol.

Mare or gelding above four years old, suitable for hunting purposes, the property of a tenant farmer whose principal occupation is farming, and resides upon his holding of not less than 100 acres of land within the district of the club: 1, Mr. J. B. Till; 2, Mr. J. Alway, Hinton (Shamrock); 3, Mr. F. W. Pearce, Kingweston; r, Mr. G. H. Jones, Little Badminton (Shamrock).

Hack, mare or gelding, not less than 14 hands 2ins., or exceeding 15 hands 2ins. high: 1, Mr. F. Leigh, Westbury-on-Trym (Banjo); 2 and 3, Mr. A. M. Fry (Lady and Caleb); r, Mr. J. Baldwin, Bath (Nancy).

Cob, mare or gelding, above 13 hands, and not exceeding 14 hands 2ins. high: 1, Mrs. M. A. Butler, Henbury; 2, Dr. Fuller, Long Ashton; 3, Mr. G. W. Stonelake, Redland (Dinah).

Three-year-old gelding or filly for hunting purposes: 1, Mr. J. J. Smith, Mays Hill (Diamond Jubilee); 2, Mrs. C. D. Parsons, Wapley (Robin); r, Mr. W. Warren, Bristol.

Two-year-old colt, gelding or filly, for hunting or carriage purposes: 1, Mr. T. Bennewith, Shipping Sodbury; 2, Mr. J. Leach, Horfield (Sam); r, Mrs. C. D. Parsons (Patience)

Yearling colt, gelding or filly, suited for hunting or carriage purposes: 1, Mr. B. G. H. Gee (Fanny Fern 2nd); 2, Mr. A. M. Fry; r, Mr. W. Pride Jones (April Fool); hc, Mr. M. B. Stabbins, Coalpit Heath.

Mare and her foal of the present year, for hunting or carriage purposes: 1 and 2, Mr. B. G. H. Gee, Kitty and Zoe); 3, Mr. J. N. A. Hobbs, Chipping Sodbury (Lady May); r, Mr. G. S. Lysaght, Clifton (Henrietta).

Cart mare and her foal of the present year: 1, Mr. M. B. Stabbins (Jolly); 2, Colonel T. W. Chester Master, Knole Park (Donnington Daisey); 3, Mr. G. Capes, Winterbourne; r, Mr. M. B. Stabbins (Violet 2nd).

Yearling cart colt, gelding or filly: 1, Mr. M. B. Stabbins.

Two-year-old cart colt, gelding or filly: 1, Mr. M. B. Stabbins; 2, Mr. J. H. Pullen, Horton; r, Mr. J. Rogers, Old Sodbury.

Three-year-old cart gelding or filly: 1, Mr. G. H. Jones (England's Victor); 2, Mr. H. Bridgman, Downend; r, Mr. W. McEwen Smith (Jolly).

Pair of cart horses, mares or geldings, the property of a tenant farmer whose principal occupation is farming, and resides upon his holding of not less than 100 acres of land, within the district of the club: 1, Mr. H. Bridgman; 2, Mr. G. H. Jones; 3, Mr. G. Haskins (Smart); r, Mr. H. Matthews (Noble).

Roadster, mare or gelding, in harness, exceeding 15 hands high: 1, Mr. E. S. Godsell, Stroud (Lord Bath); 2, Mr. G. S. Lysaght (Lady Brompton); r, Mr. T. T. Lindrea (Brown Bess).

Mare or gelding, in harness, not exceeding 15 hands high: 1, Mr. G. S. Lysaght (Squire of Dames); 2, Mr. H. F. Ball, Bristol (Gwen); r, Mr. R. L. Weight, St. George (Kitchener).

Mare or gelding, in harness, not less than 14 hands, the property of a tenant farmer, whose principal occupation is farming, and residing upon his holding of not less than 100 acres of land, within the district of the club: 1, Mr. J. J. Smith (Sir Robert); 2, Mr. J. A. Hopkins (Donovan); r, Mr. H. Matthews (Owen).

Cob or pony, mare or gelding, in harness, not exceeding 14 hands 2ins. high: 1, Mr. R. I. Weight (Lord Bang); 2, Mr. G. S. Lysaght (St. Blaise); 3, Mr. E. S. Godsell (Jersey Lily).

Pony, mare or gelding, in harness, not exceeding 13 hands high: 1, Mr. S. Wait Tomkins (Greathcart); 2, Mr. E. B. James (Bobby); 3, Mr. A. E. Gould (Little Wonder).

Horse, cob, or pony, with appropriate vehicle and harness, the bona-fide property of a tradesman within the district of the club: 1, Mr. W. J. P. Lansdown; 2, Mr. E. Young (Kitty); 3, Mr. C. Howell (Countess).

JUMPING PRIZES.

Jumper exhibited at the show in any of the foregoing classes: 1, Mr. J. Baldwin (Old Cat); 2, Mr. T. Benewith, Chipping Sodbury (Hasty Girl); 3, Mr. A. J. Butcher, Bristol (Miss May).

Jumper, the property of a tenant farmer, whose principal occupation is farming, and resides upon his holding of not less than 100 acres of land, within the district of the club: 1, Mrs. Westmore, Henbury (Pound-a-Leg); 2, Mr. W. McEwen Smith, Henbury.

Jumper, the property of an exhibitor: 1, Mr. J. Baldwin (Old Cat); 2, Mr. A. J. Butcher (Miss May); 3, Mr. J. Baldwin (Diana); r, Mr. W. A. Dixon (Amy 2nd).

CATTLE.

Fat ox or steer: 1 and r, Mr. G. Garrett, East Compton; 2, Mr. W. Hopkins, Elberton; c, Mr. W. J. Griffiths, Henbury.

Fat cow or heifer: 1 and 2, Mr. A. J. Weaver, Henbury.

Bull, cow, and their offspring, the property of a tenant farmer whose principal occupation is farming, and resides upon his holding of not less than 100 acres of land, within the district of the club: 1, Mr. J. A. Hopkins (Prolific, Countess, and Countess 4th); 2, Mr. W. McEwan Smith (Recruiter)

Bull, above two years: 1, Mr. J. E. King (Prince Alpine); 2, Mr. J. Lear, Doynton (Vain Sultan); r, Mr. J. A. Hopkins (Prolific); c, Mr. E. Hancock (King King); c, Mr. W. McEwen Smith (Recruiter).

Bull, above one and under two years old: 1, Mr. G. Haskins (Priam); 2, Col. T. W. Chester-Master (Warrior); r, Mr. F. W. Pearce; hc, Mr. W. McEwen Smith (Count Windsor 3rd).

Bull calf, above six and under twelve months old: 1, Mr. W. McEwen Smith; 2, Mr. J. E. King.

Bull calf, under six months old: 1, Mr. W. McEwen Smith; 2, Mr. W. Hopkins; hc, Mr. T. Cooper.

Pair of dairy cows, specially calculated for dairy purposes, in milk or calf, above four years old: 1 and champion, Mr. W. McEwen Smith; 2, Mr. C. E. Pearce, Sea Mills; 3, Mr A. J. Weaver; r, Mr. F. H. Wedmore; hc, Mr. W. J. Griffiths; c, Mr. E. Hancock (Diadem and Flora Queen)

Pair of dairy cows in milk or calf, and specially calculated for dairy purposes, the property of a tenant farmer whose principal occupation is farming, and resides upon his holding of not less than 100 acres of land, within the district of the club: 1 and champion, Mr. W. McEwen Smith; 2, Mr. A. J. Weaver; 3, Mr. C. E. Pearce; r, Mrs. Wetmore; hc, Mr. F. W. Pearce.

Heifers specially calculated for dairy purposes, above three and under four years old, in milk or calf: 1 and 2, Mr. McEwen Smith; 3, Mr. H. Matthews; c, Mr. A. J. Weaver.

Heifers above two and under three years old, in milk or calf: 1, Mr. H. Matthews; 2, Mr. A. J. Weaver; r, Mr. W McEwen Smith; hc, Mr. H. Matthews; c, Mr. W. J. Griffiths; Mr. F. W. Pearce.

Pair of heifers, above one and under two years old: 1, Mr. A. J. Weaver; 2, Mr. F. W. Pearce; r, Mr. J. A. Hopkins; hc, Mr. W. McEwen Smith.

Pair of steers, above one and under two years old: 1, Mr. W. J. Griffiths.

Pair of heifer calves, under 12 months old: 1, Mr. C. E. Pearce; 2, Mr. W. McEwen Smith; r, Mr. G. Haskins; hc, Mr. A. J. Weaver

Pair of steer calves, under twelve months old: 1, Mr. W. F. Lear; 2, Mr. C. E. Pearce.

Channel Island cow or heifer, in milk or in calf: 1, Mrs. M. Anderson Butler, Henbury (Gloaming 5th); 2, Mrs. Harford, Blaise Castle; 3, Sir J. H. Greville Smyth, Bart., Ashton Court (Lady Smyth); r, Major-Gen. N. F. Sampson Way, Henbury (Judy 4th); vhc, Mr. H. Russell Thomas, Stoke Bishop; hc, Sir J. H. Greville Smyth, Bart. (Daisy Ashton 2nd); hc, Mr. A. Baker, Henbury (Spot); Mr. C. Thomas, Stoke Bishop (Lady Roberts); Mrs. Harford; Mr. T. J. J. Harris, Downend (Mary); c, Mrs. M. Anderson Butler (Mary); Mr. J. Kennedy (Miss Marius).

Jersey heifer, under two years old, eligible for entry in the English Jersey Herd-book: 1, Mrs. Harford, 2, Mr T. J. J. Harris (Elsie); r, Mr. W. E. Budgett, Henbury (Henbury Frisk 3rd); hc Mr. W. J. Kennedy (Miss Rosy); Mrs. Harford

Jersey heifer, under one year old: 1, Mr. J. Kennedy (Miss Daisy); 2, Miss A. Butler (Black Bess 8th); r, Mr. J. Kennedy (Miss Pansy); hc, Mr. E. Hancock (Greta).

Jersey bull, under four years old, eligible for entry in the English Jersey Herd-book: 1, Mr. J. Kennedy (Monte 2nd); 2, Mr. H. A. Hood Daniel, Henbury (Monaco); r, Mr. W. E Budgett, Henbury (Henbury Knight); hc, Mr. T. J. J. Harris (Legacy's Last); Mr. W. E. Budgett (Boyles Glory).

SHEEP.

Ram of any breed: 1, Mr. Jeffery Matthews, Winterbourne Two-tooth, ram of any breed: 1, Mr Henry Bridgman, Downend; 2, Mr. Jeffery Matthews

Five fat wethers: 2, Mr. A. J. Weaver, Henbury

Five six-tooth ewes, having bred and reared a lamb or the present year: 1, Mr. H. Bridgman, Downend; 2, Mr. H. Matthews

Five two-tooth ewes, having bred and reared a lamb the present year: 1, Mr Jeffery Matthews; 2, Mr H. Bridgman.

Five breeding two-tooth ewes: 1 and champion, Mr Jeffery Matthews; 2, Mr. H. Bridgman

Pair of ram lambs of any breed: 1, 2, and 3, Mr Jeffery Matthews; r and c, Mr H Bridgman

Pair of Hampshire Down ram lambs: 1 and 2, Mr Jeffery Matthews; r, Mr H Bridgman

Five Chilver lambs: 1 and 3, Mr. Jeffery Matthews; 2, Mr H Bridgman

Five wether lambs: 1, Mr. Jeffery Matthews; 2, Mr. Henry Bridgman

Bridlington.

The Bridlington Agricultural Society's sixty-fifth show, which took place on the 1st inst., was favoured by fine weather, and proved one of the most successful the society has ever held. The total number of entries was 1,109, which has only been exceeded on one occasion, when there were thirty-two entries of wool—a class which has for some time been omitted from the schedule; whilst the attendance of visitors was a record one. The quality of the animals forward was quite up to the average—a very good one—seen at Bridlington, and the society are to be congratulated on their success. As one speaker remarked at the luncheon, the success was the more conspicuous following as it did on the disappointment and loss sustained by other shows including the Royal and the Yorkshire shows. It had been said that the loss on the two shows had been the gain of both being held in the same county. Mr. T. Wrigham-Boynton, J.P., who presided, in the course of a short speech said there was one phase of agriculture which at present troubled all those engaged in it, and especially on the large farms in the East Riding—the question of labour. The one who found a remedy for this would be a clever man. They were always told that things would right themselves. No doubt this would, but at present it was a huge handicap on the farmer. He thought that the move made by some societies in the direction of prizes for men who had been longest in service and so on, was a good one. He felt also that ploughing matches and hedge cutting competitions should be encouraged, and that people living in the country should do what they could to persuade the young men to stay in the villages instead of rushing into the big towns.

Prize List.

HORSES

HUNTERS.

Mare and foal: 1, Messrs. F. J. and H. Grainger, Burton Agnes; 2, Mr. J. S. Darrell, West Ayton; 3, Mr W. Wilkinson.

Foal by thorough-bred horse: 1, Mr. F. J. and H. Grainger; 2, Mr. J. S. Darrell.

One-year-old colt, gelding, or filly: 1, Mr. J. S. Darrell; 2, Mr R. Hornsey, Bishop Burton.

Two-year-old gelding or filly: 1 and medal Mr. Dixon Skirlaugh; 2, Mr. E. Hodgson, Bridlington; 3, Mr. J. A. Brown, Middleton-on-Wolds.

Three-year-old gelding or filly: 1, Mr. J. S. Darrell; 2 and 3, Mr. E. Hodgson.

HACKNEYS.

Mare and foal: 1 and medal, Mr. J. D. Robinson, Sledmere.

Foal by a pedigree Hackney: 1, Mr. W. Richardson, High Bonwick; 2, Mr. J. D. Robinson; 3, Mr. F. Dee, Driffield.

One-year-old colt, gelding, or filly: 1, Mr. D. Nicholson, Watton; 2, Mr. H. M. Welborn, Muston; 3, Mr. G. A. Brown

Two-year-old gelding or filly: Mr. H. Moore, Burn Bates, Hull.

Three-year-old gelding or filly: 1, Mr. H. Moore, Hull; 2 Mr. W. P. Kirby, Watton.

RIDING HORSES.

Hunting mare or gelding, four years old: 1, Messrs. F. J. and H. Grainger; 2, Mr. E. Hodgson; 3, Mr. J. S. Darrell.

Hunting mare or gelding, four years old and upwards: 1 Messrs. T. and H. Ward, Pinchinthorpe; 2, Mr. W. H. Cranswick; 3, Messrs. F. J. and H. Grainger.

Hackney gelding or mare, four years old and upwards: 1, Mr A. Fewson, Hedon; 2, Mr. F. Holmes, Shipley; 3, Mr. E. Edwards, Ganton.

Hackney gelding or mare, not exceeding 14 hands 2 inches: 1, Mrs. F. Holmes; 2, Mr. T. T. Champion, East Heslerton; 3, Mr. W. Wilson, Speeton.

Gentleman's hack, gelding, or mare, any age, not under 15 hands: 1, Mr. J. Rafton, Beeford; 2, Mr. E. Edwards; 3, Mr. H. Watson, Filey.

Lady's hack, gelding, or mare, any age: 1 and 2, Messrs. F. J. and H. Grainger; 3, Mr. W. H. Wellburn, Helperthorpe.

HARNESS HORSES.

Mare or gelding, not under 14.2 h.h.—1, Mrs. F. Holmes; 2, Mr. T. Reed; 3, Mr. S. Longbottom, Nafferton.

Horse and trap: 1, Messrs. Barron and Vickers, Bridlington; 2 and 3, Mr. J. Burrell.

Tradesmen's turnout: 1, Mr. H. Woodcock; 2, Mr. S Anfield; 3, Mr. E. Taylor.

SHIRE OR AGRICULTURAL.

Mare or foal for agricultural purposes: 1, Mr. C. Jackson, Cayton; 2, Mr. T. F. Foster, Sewerby.

Foal: 1, Mr. J. T. Wright, Great Hatfield; 2, Mr. C. Jackson, Cayton; 3, Mr. T. F. Foster.

One-year-old colt, gelding, or filly: 1, Mr. T. Cranswick, Hunmanby; 2, Mr. J. Cranswick, Rudstone; 3, Mr. D. T. Stubbings, Boynton.

Two-year-old gelding or filly: 1, Mr. J. D. Robinson; 2, Mr T. F. Foster; 3, Mr. C. Jackson.

Three-year-old gelding or filly: 1, Mr. W. Robinson; 2, Mr. T. F. Foster; 3, Mr. D. F. Stubbings.

Gelding or mare, any age: 1, Messrs. R. and J. Davidson, Welham; 2, Mr. T. A. Jackson; 3, Mr. W. Woodcock, Sewerby Cottage.

Pair of horses, the property of a tenant farmer, the horses to have been regularly worked on the exhibitor's farm for three months prior to the show: 1, Mr. T. F. Foster; 2, Mr. C. Jackson.

LEADING HORSE.

1, Messrs. T. and H. Ward, Pinchinthorpe; 2, Mr. F. W. Watkinson, Weaverthorpe; 3, Mr. D. Sowerby, Wilsby; r, Mr. R. Tomlinson, Cliffe, Selby.

SHEEP.

Long wool shearling ram, [illegible] for the district: 1, Mr. T. A. Jackson, Bridlington; 2, Mr. J. J. Simpson, Hunmanby; 3, Mr. T. Spink, Hunmanby.

Down ram, any age: 1 and 2, Messrs. J. and C. Crowe, Huntow

Three long-wool tup rams: 1, Mr. T. Nightingale, Huntow; 2, Mr. J. J. Simpson.

Pen of five long-wool breeding ewes that have suckled lambs

to 2nd July, 1900: 1, Mr. T. Nightingale; 2, Mr. T. A. Jackson.

Seven long-wool gimmer shearlings, strictly intended for breeding purposes, and adapted for the neighbourhood: 1, Mr. J. J. Simpson; 2, Mr. T. A. Jackson.

Five long-wool gimmer lambs: 1, Mr. T. A. Jackson; 2 and 3, Mr. T. Nightingale.

Pen of five wether or gimmer cross-bred lambs: 1, Mr. W. Wilson, Speeton; 2, Mr. D. R. Jackson, Carnaby; 3, Mr. W. Whiting, Hull.

Special prize for five lambs fed on Bibby's Food, supplied by Mr. P. Bantoft, 61, High Street, Hull: 1, Mr. T. A. Jackson; 2, Mr. T. Nightingale.

Special prize for five lambs fed on Round Locust and Oil Cakes, supplied by Mr. John Grindell, 1, High Street, Hull: T Mudd, Hunmanby.

CATTLE.

SHORT-HORNED CATTLE.

Bull, not exceeding two years old: 1, Mr. T. D. Robinson, Lowthorpe; 2, Mr. W. H. Hutchinson, Beverley.

Bull, not exceeding twelve months old; 1, Mr. E. H. Hebden, York; 2, Mr. T. D. Robinson.

Cow, in milk or calf: 1, Mr. T. D. Robinson: 2, Mr. T. Nightingale; 3, Mr. E. H. Hebden.

Heifer, not exceeding two years old: 1, Mr. T. D. Robinson; 2, Mr. W. H. Hutchinson.

Heifer, not exceeding twelve months old: 1, Mr. E. H. Hebden; 2, Mr. T. D. Robinson.

DAIRY CATTLE.

Cow, any breed, for dairy purposes: 1, Mr. T. Nightingale; 2, Mr. T. A. Jackson.

New Agricultural Patents.

Specially compiled for the MARK LANE EXPRESS by Mr. G. D. Howard (Hughes, Son, and Co.), Patent Agent, 38, Chancery Lane, London, W.C., of whom all information relating to Patents, Designs, and Trade Marks may be obtained free of charge.

13273.—T. L. F. Stack, of Lord Street, Liverpool, for an invention for "Improvement in treating milk at dairies and in apparatus therefor."

13438.—W. E. Phillips, of Water Street, Liverpool, for an invention for "Improvements in digging tools."

13524.—M. Few and Z. Read, of Chancery Lane, London, for an invention for "An improved device for use in binding asparagus into bundles."

13565.—N. J. Lawson, of Hatton Garden, London, for an invention for "Improvements in or relating to motor road vehicles adapted for the transport of market produce and the like."

Patents Sealed.

7499.—W. N. Sleep, R. H. Sleep, of Plymouth, Devon, and W. Parkin, of Sheffield, Yorkshire, for an invention for "Improvements relating to agricultural implements."

7681. W. Gibson, of Collingham, near Leeds, for an invention for "Improvements relating to chaff treating."

"Mark Lane Express" Diary.

August.

14. Beamish, Pontop and Consett Agricultural Society's Show.
14. Central Banffshire Farmers' Club's Show, at Keith.
14. Sale of Southdown Sheep, the property of the Right Hon. Earl Bathurst, at Cirencester Park, Gloucestershire
14. Sale of Hampshire Down Ram Lambs and Rams, the property of Mr. H. C. Stephens, M.P., at Market House, Salisbury.
14. Sale of Shropshire Sheep, belonging to Mrs. Barrs, Odstone Hall, Atherstone.
14. Blackpool and District Agricultural Society's Show, at Blackpool.
15. Bakewell Farmers' Club's Show, at Rutland Grounds, Bakewell.
15. Mr. C. Coxon's Annual Sale of Shropshire Sheep, at Elford Park, Tamworth.
15. Sale of Mr. R. W. Lynne's Hampshire Down Flock, at Marlborough, Wilts.
16. Penistone Agricultural Society's Show, at Penistone
16. Denbighshire and Flintshire Agricultural Society's Show, at Denbigh.

23. Penrith Agricultural Society's Show.
23. East Berks Horse Show, at Maidenhead
23. Sale of the late Mr. W. T. Talbot Crosbie's herd of Shorthorns, at Ardfert Abbey, Ardfert, Ireland.
23. Sale of Shropshire Sheep, the property of Mr. T. Fenn, Stonebrook House, Ludlow.
23. Sale of pedigree Hackneys and Harness Horses, at York Repository.
23. Sale of Mr. Thomas Kirk's stud of Hackneys, at Hedon, near Hull.
23 and 24. Royal Jersey Agricultural Society's Show, at St. Helier's.
24. Sale of Shropshire Sheep, the property of Messrs. P. A. and G. T. Evans, at Sherlowe, Wellington, Salop.
25. Worsley Agricultural Society's Show.
25. Weardale Agricultural Society's Show, at St. John's Chapel

The heavy rains and high winds experienced in North Wales during the past week have done great damage to property and to crops. The mountain streams have been in flood, and many acres of hay and corn are submerged.

IN PARLIAMENT.

House of Commons.

Agricultural Holdings Bill.

The Lords' amendments to this Bill were considered on Monday.

On the motion to agree with the Lords in an amendment reintroducing words to provide that the arbitrator, in adjudging his award, should take into consideration the inherent capabilities of the soil,

Mr. Haldane complained that the Government had not stuck to their guns in this matter, and hoped the House would resist the Lords' amendment.

The Attorney-General declared that the Commons had considered that the proviso would give rise to a good deal of misconception, and the Lords had held that the law had been altered. He doubted whether it would be wise to adhere to the Commons' view and risk the loss of the Bill.

Mr. Channing said the presence of the proviso in the Bill gave an opportunity for injustice.

Mr. Ellis Griffith complained that the amendments had been withheld from discussion for so long.

The Lords' amendment was agreed to by 94 to 54.

Mr. Channing moved to reject the Lords' amendment which struck out the provision in the Bill enabling tenants to make osier beds on their holdings without the consent of the landlord.

The Attorney-General said he was informed by those competent to express an opinion that, as regards osier beds, the matter was not one of great importance, and the question was whether for a comparatively small percentage of cases they were to imperil the Bill.

On the House dividing 96 voted for the Lords' amendment and 56 against; majority for, 40.

On the Lords' amendment striking out the provision in the Bill enabling tenants to lay down a garden in their holdings not exceeding one acre in extent without the consent of the landlord,

Mr. B. Jones hoped the Government would not yield to the Lords in this case, as the matter was one of great importance to the occupiers of small holdings in Wales.

The Attorney-General said there was no ground for supposing that in the case of small holdings the landlord would impose any unreasonable conditions.

Captain Sinclair held there was no justification for what he considered would be a disgraceful surrender if made by that House.

Colonel Lockwood dissented from the Lords' amendment in this case, but he did not wish to imperil the Bill.

Mr. Channing protested against the Lords' amendment.

The division resulted as follows:—For the Lords' amendment, 95; against, 57.

The amendment by which the Lords struck out the proviso enabling a tenant to plant one acre of his holding with fruit trees and claim compensation on leaving was next divided upon. The action of the Lords was ratified by 99 votes to 58.

The remaining amendments were then agreed to.

THE WEATHER.

FRIDAY (August 3rd).—Very disturbed weather was experienced over our islands, and gales or strong, boisterous winds occurred generally on our coasts. Very heavy rain had fallen in Ireland, and the amounts were also large at places in the West of England. Showers occurred at times in London, and the wind was strong and squally. The highest temperature in London was sixty-eight degrees, and in the early evening the thermometer had fallen below sixty degrees.

SATURDAY AND SUNDAY (August 4th and 5th).—The weather was fair in places on Saturday, although rain was measured on Sunday morning, as the result of the fall in the preceding twenty-four hours, over the whole of our islands, except at a few places in the east of England. A considerable fall of temperature was general, and the weather was cold for the time of year. Saturday was fine in London, and the air was cool, the thermometer not rising above sixty-five degrees. On Sunday the weather was very showery, and the highest temperature in the Metropolis was sixty-one degrees, which is thirteen degrees below the average.

MONDAY (August 6th).—Rainy and unsettled weather was experienced in all parts of the British Islands, and a gale occurred in places on our coasts. A fresh disturbance had arrived over the south of Ireland during Sunday night, and the barometer had fallen again everywhere. The weather was cold for the time of year over the whole country, the highest temperatures being below 60deg. in many places, and nowhere much in excess of that low summer reading. In London the day was very wet and gloomy, and the highest temperature was 61deg.

TUESDAY (August 7th).—During Monday night the storm system regained much of its former speed, and the reports received by the Meteorological Office in the morning showed that the core, or heart, of the disturbance had completely traversed England, being situated over the North Sea at eight o'clock. As the storm passed over the central parts of England the wind blew with considerable violence from the westward at all places which were to the south of the storm path. In Scotland and over the northern portion of England strong winds and gales were experienced from the north or north-east, the centre of the storm passing to the southward of this part of our islands. Thunderstorms had occurred in places, especially over the central parts of England, and the rainfall was exceptionally heavy in districts situated near the path of the storm. The amounts were generally large from all parts of England and Ireland. The reports received late in the day showed that the storm area still continued to travel away to the eastward, and there was a further improvement in the weather over our islands. The winds were gradually falling lighter, and the air was becoming dryer, with a slight increase of temperature.

WEDNESDAY (August 8th).—The weather was generally fine over the British Islands, but there was still a good deal of cloud in parts of the country. Rain was measured in the morning nearly everywhere, as the result of the fall in the previous twenty-four hours, but the amounts were small except at a few places in the west of England. The barometer had risen briskly in the rear of the disturbance which traversed England on Monday, and the wind was northerly and mostly light. Temperatures were still low for the time of year, the mid-day readings ranging between sixty and sixty-five degrees in the south of England, while the thermometer was below sixty degrees throughout the day in Scotland and in the north of England. The weather in London was finer than of late, although the highest temperature was only sixty-four degrees.

THURSDAY (August 9th).—The weather was again rainy and unsettled in most parts of the British Islands, and a moist southerly current of air had spread over the whole country. Very heavy rain had occurred again at several places in the west, and rain was general during the day in the south of England. The temperature continued very low for the season, the midday readings being generally between 55deg. and 62deg. The day was dull and very wet in London, and the wind was increasing from the south in the afternoon. The highest temperature in the metropolis was 61deg.

FRIDAY (August 10th).—The weather was dull and wet over a large portion of England during the greater part of the day, but there was some improvement in many places in the afternoon. Rain was measured in the morning over the whole of England and Ireland, and at some of the western stations the amounts were again large. Temperature was still very low for the season, the highest readings over a large part of the country not exceeding 60deg. Rain fell in London throughout the morning, and the weather was gloomy, but it cleared in the afternoon, although sharp showers continued at intervals. The highest temperature in the metropolis was 62deg.

SATURDAY AND SUNDAY (August 11th and 12th).—Very fine weather prevailed over England during the two days, but in Scotland and Ireland the conditions were less settled. Only at the northern and north-western stations did rain fall, and at places in those districts the fall was heavy. The temperature generally increased, the thermometer on Saturday exceeding seventy degrees in parts of England, and on Sunday the weather was generally much warmer. The weather was very fine in London, the shade temperature on Saturday registering seventy-two degrees, while in the southern suburbs the thermometer on Sunday afternoon stood at eighty degrees.

Farmers and Beer.

On Friday the Buckinghamshire County Council—Lord Cottesloe presiding—had under discussion the subject of "Farmers and Beer." It was raised on a motion by Mr. Councillor Batchelar, who proposed "That in the opinion of this Council the illegal sale of beer, as ordinarily practised by farmers in this county, having a debasing influence upon the purchasers, and particularly upon children, should be suppressed by the police." He said that the employer of labour who distributed from five to twenty barrels of beer, or more, among the people who worked for him was no more generous than the licensed tradesman who sold a similar quantity over his bar, for while one sold for cash, the other sold for service rendered. Why, he asked, should the licensed seller, who paid a very much higher price for his beer, also for a costly licence, be subjected to the strictest police supervision, also to adulteration, from all of which conditions the unlicensed seller was entirely exempt? Mr. Councillor Dodwell contended that the system of giving beer was decreasing year by year, while Mr. Councillor Thomas said it was a foolish thing for farmers to encourage men in their employ to take beer. Mr. Alderman Treadwell—a large employer of labour—said he could not see how the practice of giving beer could be done away with. Some of his men had to walk miles to their work, and he believed beer, in a moderate way, did them good. (Hear, hear). Mr. Councillor Twinch said he had tried both systems; he did not give beer himself, but that fact did not stop drinking. Mr. Alderman Gurney said the working man was to-day the master of the whole situation, while the Earl of Buckinghamshire said he did not believe the curtailing of beer would stop drunkenness at once, but it would eventually. Ultimately, on the suggestion of the chairman, supported by the Earl of Buckinghamshire, the motion was withdrawn.

FARM PROSPECTS.

Berkshire and Oxfordshire.

A remarkable and sudden change in the weather took place last week, from almost tropical heat to autumnal chilliness; and the boisterous gales and storms of rain which prevailed on Friday and Monday, and again on Thursday last, have interrupted harvest operations and rather seriously affected the harvest prospects from the farmers' point of view, as the frequent rains have soaked the shocks of corn, and the winds have laid many pieces of standing corn, prolonging the work of harvesting and increasing the cost of getting in the crops. As yet the rains have not done much actual damage to the crops themselves; indeed, the moisture has tended to swell the corn and prevent the ears from shedding, but if this wet weather should continue the consequences would, of course, be serious to the farmers, who are now anxious to push forward with harvest work. As yet but little satisfactory progress has been made this week, and much will depend upon the weather of the next few weeks.—*Reading Mercury.*

Cumberland.

My report last week was barely posted before the pour began. The torrent, with wind attending, flattened fields of the best corn, and the crows, in flocks, following, are completing the mischief. Bank Holiday was a rain record. At Keswick the Convention was followed by the deluge. Excursion trains poured in, and the rain poured down, and hundreds remained all day at the station in the railway carriages. They had just one bar within cover, and at it there was some more "pouring" all that long day. It reminded some of the cattle trucks in South Africa, where the sick, the wounded, and the dying spent recently longer time at railway siding, with no refreshment whatever. As I write, there is thunder above me, and hay and corn calling for attention. Query: Is it wise, with July-August experience, to over "manage" land for corn? A splendid show, but if rain comes, then flat falls the fruit of the field. —H. M. K. (August 10th).

Devonshire.

The agricultural barometer, like the weather, is unsettled and unsteady. The hay harvest has been excellent as to quality and cost of harvesting, but the crop will not be over average in consequence of failures in some districts, more especially the southern portion of the county, in the permanent pastures and meadows. The mangold and fruit crops are the crops of the year. Corn harvest had commenced, and would have been general had not the sudden change of weather interfered and caused not only delay, but considerable damage to the standing crops. Oats were commenced cutting about the 20th of July, and barley and wheat cutting last week. Now the late harvest will be more costly, the crops being in many cases flat on the ground, and machines will have a good trial under difficulties; and the storms have caused a heavy loss through the extensive shedding of the grain.

The Gales

have also damaged the apple crop, but as it was so heavy the loss will not be felt; a large number of trees have suffered seriously through losing their branches, but the crop will still be a good one. If the rain and storm has done damage, it is somewhat compensated for by the good it has done to the roots and pastures. The swede crop, which at one time seemed likely to be a total failure owing to the fly, and in many cases had been sown twice, is now secure, and common turnips and cabbages are growing rapidly, and mangolds will be almost record crops as a rule. Anxiety is now felt about the weather by

Barley Growers,

for the value of this crop depends on the sample; if good malting, remunerative prices are obtained, but if damaged and only fit for feeding the crop will not pay for growing; and the Devonshire system of growing clover seeds with this crop is not conducive to good samples, yet leases still insist on this system. This is the time for local agricultural shows, and the recent show of the Tiverton district eclipsed in the number of its exhibits and the quality of horses and poultry the Devon County Show, and is more popular. The Exeter Horse Show you alluded to last week, and it is to be regretted this was not a greater financial success, but the war and recent bereavement of our beloved Royal Family are against holidays, except for health. The Royal Agricultural Society is, of course, above criticism, but many agriculturists consider London not the best place for a permanent site. Shows in large cities have not always been successful, and horse shows pure and simple seem more popular to citizens than cattle shows.

The Permanent Pastures

are now looking well and will be sufficient, but second crops of clover will be very light. Of course, the improvement in keep prospects has given an impetus to the markets, and store cattle and sheep have improved in price, and fat cattle and small sheep are selling well. The rain has done immense good to the garden crops, and vegetables of all kinds and fruit are plentiful and cheap. The labour question is still a difficulty, and crops of roots have not been in many cases properly hoed; but it is not so bad as anticipated, as the hay harvest was conducted in splendid weather, and the latest harvest machinery more extensively used. Yet it is lamentable to drive through some agricultural parishes and see so many pretty rustic cottages unoccupied and going to decay, the only appearance of anything being the honeysuckle, jasmine, and roses, and in some cases splendid scarlet geraniums in full bloom creeping to their roots a mass of flowers. The South Hams portion of the county seems to suffer most. I am glad to report that the demand for the South Devon breed of cattle for South Africa, which was stopped by the war, has now sprung up again, and several bulls, cows, and heifers are now being exported to the colony, where they have obtained great popularity in consequence of their excellent dairy qualities as well as grazing and freedom from the local disease of rinderpest. The outlook at present is certainly not gloomy, but prospects cannot be described as more than fair and about average.—E. H. (August 8th).

Hunts (South).

For ten days rain, cold, and strong winds, almost amounting at times to a gale, have been the farmer's portion. Little harvest work has been done, whilst the growing crops have been beaten down and twisted to a very considerable extent. The loss in ears blown off, kernels blown out, and ears which must be cut off and lost by the reaper, will be far greater than at one time seemed possible, as the crops were nearly all erect. Against this loss we must set the increased size of each kernel and the great benefit to roots and grass, so that, if we now have fine weather, the balance will be about equal.—S. S. (August 11th).

Salop.

After two days' heavy, soaking rain, all the cut corn sprouting and spoiling. This morning the weather took up beautifully fine, the sun shining and drying winds blowing through the sheaves.—J. G.

Somerset.

Contrary to July, which was dry and hot, the weather this month so far has been boisterous, with heavy rain at intervals, causing considerable damage in laying the corn in many instances, to harvest which a deal more expense will be necessary, which farmers can ill afford, the low price of agricultural produce being too low to show a margin of profit in many instances. Hay was generally a good crop, and generally stacked in good condition, and the crops of corn are generally good. The cutting of wheat, which is generally rather short in straw and ear, commenced the early part of last week. Beans and potatoes are good crops. Apples and pears are not abundant. Plums and bush fruits are good crops. Cattle and sheep are generally healthy and doing fairly well, and grass is not lacking as regards quantity. Yet cattle are not coming to the shambles in such good condition as usual.—A. L. (Cheddar, August 10th).

Worcester (South).

The hot weather we had during July broke up with severe thunderstorms, and we have now had a fortnight of very unsettled weather, with at times very high winds and heavy rain, doing great damage to fruit plantations, and laying the corn crops, so that harvesting will be more difficult than it would otherwise have been. Nearly all the corn wants cutting, and will be much damaged if the weather does not shortly improve. Wheat-cutting was begun about the 1st of the month. It cuts up a light crop, but on good wheat land the ears are well developed. There is not much barley cut, but it is a light crop, as also are oats.

Winter Beans

cut up fairly well, and springs look promising. The rain has improved the roots, mangolds generally look well, but few swedes are left, the fly having made nearly a clean sweep of them, and common turnips should now grow into a crop, so that the prospect of sheep-keep is much better than it was a fortnight ago. Pastures were very bare and burnt up, but are now improving.

Trade for both fat and store stock is slow, with drooping prices, with the exception of freshly-calved cows, for which the demand is good.—(August 10th).

Wilts, Hants, and Dorset.

We have had to chronicle very wet and also very dry seasons, but never before have we recorded such a startling contrast as that between the greater part of last month and the weather we are now experiencing—between a July of tropical heat and blazing sunshine, and this gloomy and stormy August, with its heavy gales and drenching rains. Though a few of the seventy-one reports we publish to-day were sent in by the end of last week, the majority belong to the week now closing, and therefore convey more accurately the writers' opinions of harvest prospects than would have been possible even a few days earlier. In view of the persistence of wind and wet to an extent quite exceptional in the early part of August, it is to be feared that the harvest may be more troublesome and disappointing than the general tenour of the reports we publish to-day would indicate. The continuance of such weather as has been experienced during the past week is doubly disastrous to the farmer, for it increases the difficulty and expense of getting in the corn crops, while rendering them less worth harvesting. Even if genial August weather had been experienced—if there had been no gales to beat down and beat out the corn, and no deluges of rain—the harvest would not have been a particularly good one. Barley is the only cereal of which the majority of our correspondents report favourably. Wheat seems to compare even less satisfactorily than might have been anticipated with the crop of 1899, and oats are again disappointing.

Last year the hay crop, though well made, was a light one. This year the yield has been much heavier, and, though early cutting was damaged by the wet weather of June, much of the crop appears to have been secured in good condition.

Reports concerning roots vary a good deal. Early sowings of turnips were frequently taken by the fly, which has been very troublesome this year; and the extraordinary heat and drought of July had a very bad effect; but the rains have much improved matters, and the root crop is now far more promising than it was at this time in 1899. Several correspondents refer to the difficulty of getting roots hoed, in consequence of the scarcity of labour. For instance, one Wiltshire correspondent writes:—"Roots ought to be the best we have had for some years; but it is impossible to get hands to hoe them, and many pieces will be spoiled in consequence." And another correspondent in the same county remarks:—"Roots will now turn out a good crop, but many very foul for want of hoeing."

The reports concerning

Sheep and Cattle

are hardly so favourable as those of last year in the case of the former, though fully as satisfactory with regard to cattle. Both kinds of stock are described as healthy, but sheep have not done any too well, and the breed of lambs was a small one. Prices for sheep have fluctuated a good deal. There was a tendency to improvement in the early part of the season, but the great heat and drought of July and the unpromising outlook with regard to keep caused prices to fall again. Now that the rains have so much improved the prospects of the root crop, some recovery of prices may be looked for. Britford Fair, on Monday next, will be held under conditions that are certainly interesting and are likely to prove instructive. We again append to the reports from each county a table showing the estimates of the fluctuations in the prices of sheep which we have received from various correspondents. These are fewer than usual—a good many correspondents limiting themselves to the remark that prices are "disappointing" or "variable," or stating in some cases that they are about the same as those of last year.

With cereals generally under average, harvest conditions most unfavourable, prices for produce low, and labour scarce and dear, the agricultural outlook is by no means encouraging.—*Salisbury Journal.*

Foreign Prospects.

FRANCE.—The ingathering of the harvest has been delayed by broken weather, and farmers apparently are not inclined to thrash extensively at current rates as they hope for an advance.

BELGIUM.—It is feared that the unseasonable weather will prevent wheat being saved in prime condition.

HOLLAND.—Wet and boisterous weather is causing uneasiness about the outstanding crops. The cutting of wheat and oats is retarded.

GERMANY.—Storms and rain have retarded the development of the crops, but conditions for harvest are now more favourable, and the prospects of a large yield of wheat keeps country markets quiet. Some of the new samples are very fine, but a few show signs of rust. Results of rye thrashing appear to be disappointing, but any strength that this might impart to local markets is counteracted by liberal offers from Russia.

ROUMANIA.—The harvest season has been very favourable this year, as here and there it has only been interrupted by rain for two or three days, so that but very little damage has accrued to the crops, while to maize the rain has been beneficial. Wheat has given a splendid crop, but barley is reported a poor yield, while oats have suffered from drought.

HUNGARY.—Thrashing results [illegible] new wheat is less satisfactory in quality than was expected. Rye is more satisfactory in [illegible]. Barley is of very varied quality, but good medium sorts are to be found. In southern provinces more than half of the crop is a failure and quite unfit for malting purposes. Oats [illegible] in good condition, but elsewhere they leave a poor impression in most districts.

RUSSIA.—Crop information [illegible] a favourable character, but new grain comes slowly and interior markets continue dull.

UNITED STATES.—The Commercial Bulletin says there is no radical change in the crop situation. There is a large area of [illegible] portion, which, however, is [illegible] by prospective rains. Otherwise [illegible] favourable.—*Dornbusch.*

CORN MARKETS.

LONDON.

Mark Lane, Wednesday.—Old home grown wheat firmer and scarce. Fine white, 32s 6d; and good red, 31s 6d, 63lb delivered. Supplies of new are likely to be delayed for about a fortnight owing to the late heavy showers. American descriptions held for 6d advance, apart from accumulating stocks. Although the market for flour was again languishing, there were no signs of disconcern on the part of sellers, and quotations are generally 6d firmer since last Friday. The London Millers' Association made no alteration at this afternoon's meeting. Grinding barley rather better, with Persian still supplying requirements—17s 9d ex ship to come up, 18s ex quay. Black Sea remains unobtainable. American oats also steadier in tone. Flat maize advanced 3d. Mixed American held for 19s 3d to 19s 6d ex ship, 20s ex quay. Round corn maintained.

Mark Lane, Friday.—English wheat was advanced 1s., the supply of old being now very small, and prospects of new become even more discouraging. Samples in condition are now not expected to be shown under about a month. Of the former fine white is held for 33s 6d, and red of similar quality 32s 6d per qr delivered up. Following the lead of wheat, flour again responded, and a fair consumptive business is understood to have been carried on yesterday. Grinding barley, on continued scarcity, retains its firmness, and the supply of Black Sea remains exhausted. Persian, 17s 9d ex ship to come up, and 18s ex quay. American, 22s ex quay, and wanted. The market for both American and Russian oats exhibited a distinctly better tendency. Maize was again advanced 3d., being 6d dearer since last Wednesday.

COUNTRY.

Ashford, Tuesday.—Trade very quiet all round at recent rates. White wheat made 31s to 32s; red ditto, 29s to 31s; grinding barley, 20s to 22s; white oats, 19s to 22s; black oats, 16s to 20s; mazagan beans, 30s to 32s; ticks, 31s to 33s; round maize, 26s to 27s; flat ditto, 22s to 23s per quarter. No change in flour.

Aylesbury, Saturday.—With small quantity on offer wheat ruled firm. All other articles unchanged. Wheat, 29s to 31s per quarter.

Banbury, Thursday.—Wheat red, 30s to 32s per qr; beans, 32s to 34s per qr; oats, 23s to 26s per qr. Very small show of old wheat, which is held for 1s 6d advance.

Boston, Wednesday.—There was a fair attendance, but business was somewhat slow. There was an entire absence of grinding barley for the first time for many years. Wheat, 30s to 31s; oats, 23s to 24s; beans, 22s; maize, 21s 9d to 22s.

Bristol, Thursday.—There has been rather more trade since our last. As to-day's market, the attendance was very small. There was no English wheat offering. Foreign, 3d to 6d dearer. Maize 3d, and barley, 6d lower. Oats without change. Flour better inquiry and an advance is asked, but trade done is small.—GRACE BROTHERS.

Cambridge, Saturday.—During the week the wheat trade has been uneasy. Supplies of old are quite small, and no new crops come to market. Farmers are holding their samples above their value. At this market to-day prices, with fine weather, were 6d to 1s dearer. Old oats and beans were 6d dearer; no new offering. Wheat—Red, 30s to 32s; and white up to 32s per 504lb.

Canterbury, Saturday.—Trade steady. Small quantity of wheat offering, at slightly increased rates. Maize firmer. Closing quotations:—White wheat, 31s to 33s; red ditto, 30s to 32s; grinding barley, 20s to 24s; white oats, 19s to 21s; ditto, black 19s to 21s; peas, 30s to 31s; tick beans, 30s to 32s; mazagans, 28s to 29s; flat maize, 21s 6d to 22s; round ditto, 26s to 27s per quarter.

Carlisle, Saturday.—Very small supply of oats in our market to-day. Fair sale at unchanged prices, 22s to 23s 9d per 336lbs.—THOMAS ROBINSON.

Chester, Saturday.—There was a good attendance, with slow trade passing in English grain. Old English wheat was 1d dearer. Old oats in good demand at 1d per bushel advance. Beans and barley steady. Indian corn firm at late rates. Quotations:—White wheat, 4s 5d to 4s 6d per 75lb; grinding barley, 3s to 3s 6d per 64lb; old beans, 5s 5d to 5s 6d per 80lb; old oats, 2s 9d to 3s per 46lb. Indian corn, new, 11s to 11s 6d per 240lb.

Colchester, Saturday.—There was scarcely enough wheat at market to test prices, but the little offering sold at fully 6d to 1s per qr advance. A chance sample of new oats showing. Quality inferior to last year.—FRANCIS AND CO.

Dorchester, Saturday.—With a moderately good offer of grain a much firmer tone pervaded the market. Business, however, was limited. English wheat very firm at last week's full prices. Foreign quiet, with an upward tendency. Grinding barley dull. Maize held for more money. Other feeding stuffs dull.

Glasgow, Wednesday.—There was a small attendance at our Corn Exchange to-day. Wheat and flour firmer in tone, owing to higher cables from America. Indian corn dull, at a decline of about 3d per boll on the week. Barley and home oats firm. Oatmeal quiet, at an advance of 6d per sack. Bran and thirds firm, but unchanged. Other articles steady, and nominally unaltered.—GIBSON AND CLARK.

Guildford, Saturday.—No new grain of any kind on the market, some few samples of old wheat selling from 30s to 32s 6d per qr.—LEGGATT, BLAKE, AND TYE.

Hereford, Wednesday.—Quiet market; no quotable change in English wheats; nothing done in barleys; oats firm, with a better tendency; maize 3d per quarter dearer on the week. Quotations: Wheat—white (per 62lb.), 3s 6d to 3s 10d; red, 3s 6d to 3s 8d; barley (per 56lb), 3s to 3s 9d; oats, (per 40lb), 2s 3d to 3s; beans (per 65½lb), 3s 10d to 4s; maize (per 60lb), 2s 8d to 3s 2d; vetches—winter, 4s to 6s; and spring 3s 6d to 5s.

Ipswich, Tuesday.—Small supply of wheat. Trade firm, at fully last week's rates. Reds, 28s to 29s 6d; white, 31s per qr. Grinding barley steady. Oats unaltered. Maize quiet. Peas and beans slow.

Leeds, Tuesday.—We have had exceedingly heavy rains since Friday, and the damage to the crops can be better imagined than described. Market very firm, but not by any means active, buyers having to pay 3d advance on all qualities. Maize and oats unchanged. Beans 3d dearer.—DUNNS AND CO.

Leeds, Friday.—There is a more active demand for all descriptions of wheat, and both English and foreign are the turn dearer than Tuesday's advanced prices. Beans and oats favour sellers to the extent of about 3d. Flour firmly held, with a rising tendency. No change in peas, barley, or maize.

Leicester, Saturday.—Fair attendance of buyers and dealers, with small supplies of wheat, which sold more freely at 31s to 33s 6d per 36 stones. Fine oats in good demand.

Lincoln, Friday.—Very few English wheats on offer; trade slow at an advance of 6d on the week. Reds, 29s to 30s; whites, 30s to 31s. Foreign wheats very firm. Oats made full money. Maize a trifle higher; beans and peas firm.

Liverpool, Friday.—Wheat steady, with a moderate trade at ½d per cental advance. Flour a quiet trade at Tuesday's prices. Maize has had a good demand at a full ½d advance over last market day. European firm, and ½d to 1d per cental higher, with a fair trade passing. River Plate exhausted. Barley meets with a better inquiry for malting at last market day's prices, whilst feeding passes steadily into consumption at ½d per cental improvement. Beans are firm and 9d higher owing to scarcity and a good demand. Peas are firm and held for 1d advance, but little doing. Oats have a good inquiry for English, and are very firmly held, and harder to buy at last market day's quotations. Oatmeal steady, but quiet. Oilcake firm, with a fair business doing.—SEGAR AND TUNNICLIFFE.

Maidstone, Thursday.—Rather a small show of wheat to-day at the market; the trade is firm at fully last week's rates and an occasional 6d per qr advance realised. Barley is in fair demand, the cost for which is fully that of recent quotations. Oats are disposable at rather more money for English descriptions; common foreign tend to slightly lower prices than of late. No alteration in beans and peas. Maize sells freely well at about the figure of last week. We do not note change in value of tares, rye, hemp, brank, sergo or millet.

Manchester, Thursday.—English wheat has been stiffer on account of the bad weather to some extent, and prices this morning show a rise on the week of about 6d per quarter; whilst foreign descriptions are 1d to 1½d per cental higher. Flour is dearer by 6d per sack. English oats are 1d per bushel higher; whilst beans are 6d per qr more money. Indian corn, owing to scarcity, has gained ½d per cental.

Newark, Wednesday.—Only a very small show of wheat, which made 6d a quarter more money. Beans were slightly dearer, and oats were sold at recent rates.

Newcastle-on-Tyne, Saturday.—There was only a moderate attendance at market to-day, but we must confess that in the business which transpired factors had the advantage. Wheat and flour closed firm all round. Barley, beans and peas 6d per quarter dearer. Maize not being plentiful held its own. Scotch oats point upward, and this alone strengthens the position of foreign lots in stock.

Newcastle-on-Tyne, Saturday.—Wheat at our market to-day ruled firm, and advanced 6d per 504lbs over last Saturday's prices, maize favouring sellers. Beans and peas firm, and slightly dearer. Barley steady at late rates. Scotch oats advanced another 6d per 336lbs. Foreign steady. Flour 1s per sack dearer since last Saturday.—JOSEPH POLLARD AND CO.

Northampton, Saturday.—Very small market; short supply of wheat. Demand not brisk, nevertheless it was 1s to 2s dearer on the week. Nothing else offering. White and red wheat, 30s to 33s.

Norwich, Saturday.—There was a smaller supply of wheat on offer to-day at a shilling per qr advance on the week. The weather of the past week has been extremely wet for the time of year, and bright sunshine is now of the greatest importance, as harvest has already commenced. Wheat, red, 30s to 31s per qr, weight 63lbs per bushel imperial. Corn inspector's return for the week ending August 6, 1900:—Wheat, 3,726.3, 28s 8d.—J. ARTHUR MILLS.

Nottingham, Saturday.—Wheat small supply, and made 6d to 1s advance. Grinding barley, steady trade at full rates. Oats and beans poor show, and each 6d higher.—ROBERT HUBBLE.

Oxford, Saturday.—Quiet market. Little wheat offering, making about 6d more money on the week. White, 31s to 32s; red, 30s.

Peterborough, Saturday.—Harvest work has been practically suspended during the week by wet weather, for we have had no new corn showing to-day. For the few samples of old wheat on offer rather more money was paid, and spring corn made full prices.—THOMAS HILL AND SON.

Plymouth, Thursday.—There was a small attendance at our Corn Exchange to-day. Wheat is somewhat firmer, while barley, maize, and oats remain unchanged. The weather is still unsettled, and a little fine weather would be greatly appreciated by the farmers.—ORLANDO DAVIS AND CO.

Reading, Saturday.—Wheat came to hand in very small quantity to-day, as wet weather has prevented the preparation of new grain, and old stocks are running short; business showed a slight advance, and the quotations must be recorded as 1s per qr ahead of those of last market. Wheat made 30s to 34s per qr. Other corn sold slowly.

Ripon, Thursday.—Slight demand for English wheat, otherwise no material alteration. Moderate attendance. Wheat, English, 29s to 30s; ditto, foreign, 31s to 35s; barley, grinding, 24s to 25s; oats, 22s to 25s; round maize, 25s to 27s; flat maize, 23s per qr; beans, 11½d per stone; bran, £4 10s to £5 per ton.

Romford, Wednesday.—Owing to the continued wet weather the wheat trade showed an advance of 6d per qr. There was a very small supply. Red wheat made 31s to 32s, and white wheat 31s to 33s per qr.

Salisbury, Tuesday.—There was a short supply of all grain at to-day's market, and wheat advanced 1s to 1s 6d per qr. Oats and beans were firm, at last week's prices. The quotations were:—Wheat, 30s to 33s per qr; oats, 18s to 24s; beans, 32s to 38s; and rye, 28s to 30s.

Scarborough, Thursday.—Small attendance, and business very slack. Wheat, 30s; black oats, 20s to 21s 6d; white oats, 22s to 23s 6d.

Sheffield, Tuesday.—There was only a small attendance, owing to the holidays. Trade was not very brisk in English wheat, while foreign wheat was firm at full prices. Oats and beans 3d per qr. dearer. Quotations:—Wheat, white, 33s to 33s 6d; ditto red, 32s to 33s per 504lb; oats, old white, 24s; ditto old black, 22s per 335lb; peas, grinding, 28s to 29s; ditto blue, 53s to 70s per 504lb; beans, Egyptian, 33s; ditto, English (new), 31s 6d to 32s per 532lb; barley, grinding, 23s to 24s 6d; ditto malting, 27s to 35s per 448lb; Indian corn, small, 27s to 30s; ditto American mixed, 22s 6d to 23s per 480lb.

Shrewsbury, Saturday.—The rain which fell from the 5th to the 10th instant inflicted much injury upon the grain crops—especially to oats and barley—for a large percentage of the corn cut and bound up by self-binding machines has become grown and matted together, and will be fit only for pig feed. It is saddening to walk through heavy crops and to find them in this state. Fortunately not more than a sixth part of the grain in this district has yet been cut, so it is hoped that the remaining and larger portion may escape the more serious injury. Wheat as a rule stands well, and but little of it has yet been reaped. Root crops and pastures have derived much good from the wet weather. The supply of grain on the local markets has been small and trade has continued to be slow at unchanged prices. Flour has been steady. Millers' offals have moved freely at former quotations.—W. L. BROWNE AND CO.

Spalding, Tuesday. — A small market, owing to Bank Holiday. Slow trade for wheat, which sold at 29s to 29s 6d per qr. Oats were very firm, at 21s to 21s 6d. Good beans firm at 32s 6d to 33s. Not much doing in peas. Other articles unchanged in value.

Stockton, Wednesday.—Few samples of English wheat showing, which made 30s per qr. The trade in foreign wheat was stronger, owing to the possible effect of the bad weather upon the crops, and holders, in view of the fact that millers were buying more freely, were asking 6d to 9d per qr more money. Oats and maize unaltered in price.

Sunderland, Saturday.—Wheat, 6d to 1s per qr dearer. Oats in sellers' favour. Barley unchanged. Arrivals coastwise: nil; foreign nil.—E. AND F. RICHARDSON.

Taunton, Saturday.—The market was quite of a holiday character, the farmers taking advantage of the fine weather to stay at home harvesting.

Wakefield, Friday.—Since our last report, we have had a week of continuous rain, and crops will doubtless be much damaged. To-day at our market, we quote foreign wheat fully 6d per qr dearer on the week. Supplies of English wheat being small the prices asked prevent business. Feeding stuffs 3d per qr dearer all round.—MICHAEL SANDERSON AND SON, LIMITED.

Wakefield, Friday.—The weather continues wet and unsettled, placing the English crops in serious jeopardy. Foreign limits for wheat have been raised materially since a week ago. Holders on this side naturally raising their pretensions, and though millers are slow to respond, an advance of 6d to 9d per qr is generally conceded. Maize, beans, and oats 3d dearer.—DUNNS AND CO.

Wisbech, Saturday.—Small attendance at market. Wheat very scarce, and 1s dearer. Red, 31s; white, 32s. Other articles unchanged.—JAMES FLETCHER.

Wolverhampton, Wednesday.—A small attendance, and little business transacted. English wheat, 13s per 216lb, springs 6s 4d, and Duluths 6s 6d to 6s 7d per cental; oats, 13s 6d to 14s 6d; beans (new), 13s to 14s; ditto (old), 15s 6d to 16s per 196lb; flat maize, 21s 6d to 22s 3d per 480lb.

Worksop, Wednesday.—Very small attendance, and not much doing. White wheat, 29s to 31s; red wheat, 28s to 29s; grinding barey, 26s to 28s; white oats, 21s to 23s; black oats, 20s to 22s; flat maize, 24s to 26s; round maize, 26s to 27s 6d per qr.

York, Saturday.—Farmers offer very few samples of wheat, and prices remain unchanged. The following are the quotations: Fine white, 30s to 31s.; red and mixed 29s 30s 6d per qr of 36 stones. Feeding barley, 24s to 28s per qr of 32 stones. Oats firm; white Tartary, 19s to 20s; black 20s to 22s; short oats, 21s to 23s per qr of 24 stones. Rye 8d to 8½d per lb; beans 10½d to 11d per lb.

FOREIGN.

The Antwerp wheat market has been quiet, but prices have been well maintained. The harvest has now reached an advanced stage in the west and east of France; the grain is good, and the ears are well filled. Rather more activity has been observed upon the wheat markets of the Lyons district and the southern departments; threshing operations are now well advanced in many districts, and samples of new wheat are beginning to make their appearance somewhat freely. The samples offered have been generally of good quality, but farmers have not been able to overcome the dull tone which has prevailed. An advance of 2½d per quintal has been noted for the best descriptions of wheat at Paris, but business has remained generally inactive. Flour for consumption has shown little change in the French capital. Disposable wheat has remained without variation at Dantzic. The Konigsberg wheat market has been quiet. Wheat has shown considerable dulness at Odessa in sympathy with the weak advices received from the United States. The quantity of wheat now *en route* for Europe is 1,315,000 qr, as compared with 1,415,000 qr at the corresponding date of 1899. The total of 1,315,000 qr, representing the quantity of wheat now *en route* for the Continent, is made up as follows:—France, 85,000 qr; Belgium, 430,000 qr; Holland, 395,000 qr; Germany and the North, 255,300 qr; and Italy, Spain, etc., 150,000 qr.

Hamburg, Saturday.—Barley report: The weather has been more settled at the beginning of the week, but since a great deal of rain has fallen, greatly interfering with harvest work. Cutting is quite general now in our principal barley-growing districts, and with fine weather harvest will be finished in about a fortnight. The samples shown so far of new Saale and Bohemian were generally of fine quality, plump in corn and of a tender lemon colour. Offers have hardly appeared, but for choice lots holders point to high prices.—FRANCIS M. TH. DUHNE.

Hamburg, Saturday.—We have rainy weather interfering with harvest work and impairing the quality of the unsecured crops. The imports during the week amounted to 3,957 tons wheat, 1,624 tons rye, 1,309 tons barley, 8,782 tons maize. Red Holstein, Saal, and Mecklenburg wheats meet a slow sale at 28s 6d to 30s per 504lb f.o.b. Fine River Plate is held at 26s 9d to 28s 9d; Hard Winter, No. 2, new crop, August, at 28s per 480lb c.i.f., Hamburg. Rye in better demand and dearer; 9 10-15 South Russian August-September is selling at 22s 3d per 480lb c.i.f., Hamburg. Offers of new barley are scarce as yet, and high prices asked. Fine Moravian Slovakian is held at 36s to 40s; fine Saale has been sold at 40s to 41s per 448lb f.o.b. For a lot of fine Bohemian 37s 6d was bid, 39s 6d wanted. Choice lots not yet offering. The yield in Hungary and in some parts of Austria is estimated 20 to 30 per cent. below last year's growth, while in Germany a good average is expected. Quality still depends upon the weather, considerable quantities being still in the fields. Feeding barley in better demand; 60-61 Ko. South Russian, August shipment, is selling at 17s 3d per 400lb c.i.f. Hamburg. Mixed maize prompt in fair demand, and selling at 19s 9d; while October-December is offering at 18s 6d to 18s 9d per 480lb c.i.f. Hamburg.—JOHN TATLOCK.

POULTRY AND PROVISIONS.

Smithfield, Saturday.—Only moderate supplies were offered and met a general improvement in trade. Quotations :—Fowls : Yorkshire, 2s 6d to 3s ; Essex, 2s 3d to 2s 9d ; Sussex, 2s 6d to 3s ; Surrey, 2s 9d to 3s 6d ; Boston, 3s 3d to 2s 6d ; Welsh, 1s 9d to 2s 3d ; Irish, 1s 6d to 2s ; goslings, 4s 6d to 5s 6d ; quail, 1s to 1s 4d ; Bordeaux pigeons, 10d to 1s ; feathered, 9d to 1s 1d ; wild rabbits, 5d to 6d each ; Australian, 8s 6d to 10s per dozen ; venison haunches, 18s to 22s each ; ditto forequarters, 4d per lb.

Liverpool, Saturday.—Bacon : There has been an improvement in the consumptive demand and trade is more buoying, especially for Irish cuts, there is more confidence generally, with a better tendency. We quote Canadian Cumberland cut, 26s to 27s ; lin to 14s ; 32lb to 34lb Ards to 14s ; long middles, 24lb to 28lb, 14s to 14s 6d ; short middles, 14lb to 16lb, 13s 6d to 14s ; 20lb to 24lb, 13s to 13s 6d ; clear bellies, 14lb to 16lb, 13s 6d to 14s ; 20lb to 20lb, 40s to 45s ; Staffordshire cut (lean on), 35lb to 40lb, and Birmingham cuts, 30s to 35s ; 40s to 45s ; cured shoulders (lean off), 24lb to 40lb, and Yorkshires, 30s to 32s ; 40s to 44s ; singed Wiltshire Cheshire cuts

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

Unsettled weather has prevailed since August came in, and but little progress has been made with harvest work. The grain was not ripe enough for the wind to cause much loss, but there has been a large increase in the area of lodged and twisted corn, with the result that more hand and less machine labour will be required. The wheat crop continues to be placed by trustworthy judges at 29 bushels; the statement of a well-known daily that the magnificent July only improved it by 1·3 per cent. is against all evidence of sight and experience. That the crop is 9·2 per cent. under an average is also regarded at Mark Lane as pessimism, for taking 30 bushels as an average, 9 per cent. of a crop would be 27·24 bushels to the acre. The barley has, like the wheat, been a good deal knocked about since August came in, but we fancy oats have gained more from the frequent showers than they lost by the passing gales. We do not think that potatoes in Great Britain have suffered injury from such fall of rain as there has been, but in Ireland the rains have been of a flooding description, and serious results are certain over vast areas of low-lying land. There is plenty of labour in Ireland, but there seems much difficulty in getting it across the Channel this season. The Government in harvest time might profitably assist the rural classes of both islands by a cheap, if not gratuitous, "ferry," for it is a dead loss to the whole nation when crops go off for want of timely harvesting.

The markets since the 7th have been firmer—in fact, trade resumed in earnest about the 8th, with more buying at Mark Lane in the south and Glasgow in the north, while on Thursday Bristol was active in the west, and on Friday Liverpool was strong for maize as well as for wheat. The country markets on Saturday showed that old wheat and oats were held for 6d. to 1s. more money.

The imports of the week have been as follows:—

Wheat, 282,000 qrs.; a good supply.
Flour, 191,000 sks.; a large supply.
Maize, 338,250 qrs.; a colossal supply.
Barley, 8,450 qrs.; a very small supply.
Oats, 187,000 qrs.; a liberal supply.

The stocks of foreign week in our granaries on August 11 were estimated at 2,390,000 qrs.

The quantity of wheat at present on passage comprises the following items:—

	Qrs.
Russian	110,000
Californian	905,000
American	195,000
Argentine	460,000
Australasian	205,000
All other countries	9,000
Total	1,884,000
A year ago	2,270,000
Two years since	1,610,000

The quantity of flour on passage thus compares with the two preceding years:—

	Sacks.
1900	360,000
1899	395,000
1898	280,000

The quantities of spring corn on passage thus compare with the two previous seasons:—

	Maize. Qrs.	Barley. Qrs.	Beans. Qrs.
1900	810,000	170,000	9,000
1899	820,000	195,000	13,000
1898	695,000	125,000	8,150

No totals of oats on passage are published, but the quantity is believed to be much above the average. There are 12,000 qrs. of peas on passage from Canada.

The following revised return of July exports of grain from the chief shipping countries shows how large a part Argentina is still playing:—

July Shipments.	America.	Russia.	Argentina.
Wheat, qrs.	679,000	774,000	889,000
Flour, sacks	641,000	10,000	24,000
Maize, qrs.	1,348,000	66,000	399,000
Barley „	109,000	146,000	—
Oats „	376,000	865,000	—
Linseed „	—	35,000	26,000

America is the chief shipper of maize and Russia of oats, but in the barley trade there is a fairly equal competition between America and Russia, and in linseed there is a tolerably close rivalry between Russia and Argentina.

The large imports of maize from 1st to 11th August and the heavy shipments from America during July have not made that staple by any means a drug in the market, and the buoyancy of business extends to maize meal and maize germ meal. The latter disguises itself under the names of hominy and hominy feed, sometimes as Indian corn feed, or simply corn feed. By all these means it infringes equally on the trade in meal made from English cereals. The Argentine maize crop does not come forward very briskly; it is said that the U.S.A. maize undersells Argentine value for value, and certainly we should find it difficult to tell a buyer why he should pay 22s. for Argentine when he can get American for a sovereign per qr. The small round corn is "another story"; this is vendable for many feeding purposes where the flat corn is not used. There is, however, a small pearly type of maize grown in Canada which should meet many purposes of the round corn from Russia.

London flour prices range from 30s. per top price to 22s. for the second grade of household flour. The greatest bulk of business done is in a mixture of one-third town whites at 27s. and two-thirds Town Households at 24s. per sack. The loaf made from this flour costs the baker 25s. per sack, as, the quartern loaf being at 5d., he can afford to supply and deliver the bread. The price does not allow much margin for credit, but three months is the ordinary limit anywhere in the West End to private customers. The long credit prices of the London Flour Millers' Association represent terms to restaurants and hotels of the first class, and to the largest consumers generally. Hungarian flour holds its own in London, and 30s. is paid for "marks" not quite the very best. The flour is very fine colour, flavour, and quality, but its use for the soldiers in South Africa (the Government have recently been buying largely for that purpose) is to be deprecated, as it is less nutritious than the ordinary London loaf.

Yorkshire prices for flour go by four steps of a florin each from 24s. to 18s. per sack. This is not a law of the Medes and Persians, but it stands for a working basis generally recognised. For 24s. the best flour can be bought so far as purely bread-making purposes are concerned. The finest pastry flour would be 8s. higher, but the profits on fancy pastry are so high that the wisest confectioner is he who gives the highest quality. The ordinary good household bread of Yorkshire is made from flour at about 22s. per sack. The better class customers get a loaf half of 24s. and half of 22s. flour, which costs the baker 23s. per sack, and at 5d. per quartern loaf, pays a fairly good profit even when delivery and credit are borne in mind. Bakers' best flour at 20s. is perfectly wholesome and nutritious. The "saving" is in colour and mixture of a certain small quantity of bran, but if the doctor is consulted he will probably say that this is, from a hygienic standpoint, the best flour of all. The lowest grade, at 18s. per sack, is not what bakers willingly supply as bread, but there are always buyers who must have credit and cheapness combined. Even these do not get unwholesome bread at present prices.

THE BALTIC.

The cargo trade in wheat has gained in strength from the interruption to harvest work in Great Britain, France, and Germany. From America, however, hot and fine weather is reported, and the spring wheat is being reaped under favourable conditions. Prices made for wheat cargoes since Wednesday have included 31s. 6d. for Californian, 29s. 3d. for Walla Walla, 30s. 3d. for Blue Stem, 31s 6d. for fine Australian, 30s. for New Zealand, 29s. for La Plata, 30s. for fine new Roumanian, 30s. for North Russian, and 31s. 3d. for No. 1 Northern Spring American. The new old winter wheat, American crop of 1900, is offered at 30s., with buyers at 29s. 3d. At present trade is inert, but the next week's weather will probably decide which of the two parties is to give way.

Maize is 3d. per qr. dearer on the ten days for all cargoes, but flat and round sorts sell better at the rise than do Argentine cargoes. American have made 18s. 9d., and 19s. is now asked. Odessa have made 23s. 9d. per qr. Barley cargoes are firm for futures. There is scarcely anything obtainable for delivery in August. For October shipment from the Sea of Azoff 18s. 3d. is paid, and Persia offers September shipments at 17s. per qr. Oats are firmly held, but there are so many cargoes on passage that many buyers are preferring to wait. Since Wednesday, however, 15s. 6d. has been paid for Canadians, 18s. 3d. for Petersburg, and 13s. for Archangel. Other sales include Smyrna beans at 28s. 6d., Calcutta linseed at 51s., and Roumanian rapeseed at 41s. 3d. per qr.

Arrivals of grain and seed laden vessels at ports of call from August 2 to 11 were 1 wheat (Rosario).

The sailings of grain and seed laden vessels from ports of call for the week were 13 wheat (3 Bristol, 1 Fleetwood, 1 Gloucester, 2 Hull, 2 London, 1 Liverpool, 1 Manchester, 1 Newcastle, 1 Waterford); 1 barley (Ipswich); total 14.

Since January 1, 1900, the total arrivals have been 224 wheat, 13 wheat and barley, 6 flour, 7 locust beans, 1 linseed, 2 canary-seed, 5 valonea; 10 maize, 1 maize and oats, 23 barley, 14 beans, total, 306.

Last year during the same time the arrivals were 195 wheat, 9 flour, 3 maize, 6 barley, 1 barley and beans, 1 rye, barley, and oats, 6 beans, 1 locust beans, 5 linseed, 4 canary-seed, and 7 valonea: total, 238.

THIS DAY'S MARKETS.

MARK LANE, MONDAY.

[First Report.]

No new English wheat, barley, or oats are on offer, but new rye is in evidence; 28s. is made. New winter tares are quoted 52s. per quarter. new trilium is at 31s. per cwt. These are the only, or at least, the chief, offerings of new crops grown in this country and shown at Mark Lane to-day. There are some samples of new Dutch linseed at 63s. per quarter, of new French trifolium at 30s. per cwt., but no new wheat, barley, or oats are to hand from France or Central Europe. The hot weather made trade slow at Mark Lane for stocks, and this told against foreign wheat with especial force; none the less, value is 6d. better on the fortnight to sell, and 1s. rise is often asked. The maize market is 6d. to 9d. up on the fortnight. Barley is neglected, oats are slow at currencies. Some Smyrna millet made 38s., some Saffi canaryseed made 33s. 6d., and some La Plata Sorghum 23s. 6d. per quarter.

(*For Close of Market see foot of Column.*)

CLOSE OF THE MARKET.

By Telephone, 2 p.m.

The market closed weak wherever it was necessary to clear grain, but the American Bureau Report strengthened the resolution of the numerous wealthy importers, who are holding with confidence for a Sep. rise in the leading sorts of wheat.

THE FLOUR TRADE.

MARK LANE, Aug. 13.

The top price remains at 30s. per sack, but Town Households can be bought for 24s., and good country flour is obtainable at 22s. per sack. The sale of Town Whites is small, but 26s. is paid, and sometimes 27s. where some credit is expected. Foreign flour is kept a quiet trade by large offers. Pillsburg and finest spring wheat flour was held for 26s.; "Gold Medal," Morrison's, and Washburn's for the same. Briggs's patent Chicago flour at 24s. had buyers, while the Milwaukee brand named after Lord Rosebery was in request at 24s. 6d. Kansas flour made 24s. per "dazzle." French flour was firm at currencies. Some Australian fetched 22s. 6d. per sack. Hungarian flour realised 30s. for "Five Arrows," 31s. for "Victoria Empress." Fine flour made in England by Hungarian process was quite 28s. per sack.

LONDON TERM MARKET.

This market is held twice a day at South Sea House, and is open to elected members only. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 centals.

The name of the month stands for guaranteed delivery (if required) on or before the last day of that month, and the following have been the prices per cental recently made :—

Wheat.—		Aug.	Oct.	Dec.
		s. d.	s d.	s. d.
Aug. 7	noon	.. 6 7	.. 6 8	.. 6 9
	4 p.m.	.. 6 7	.. 6 8	.. 6 9
Aug. 8	noon	.. 6 7	.. 6 8	.. 6 9
	4 p.m.	.. 6 7	.. 6 8	.. 6 9
Aug. 9	noon	.. 6 7	.. 6 8	.. 6 9
	4 p.m.	.. 6 7	.. 6 8	.. 6 9
Aug. 10	noon	.. 6 7	.. 6 9	.. 6 10
	4 p.m.	.. 6 7	.. 6 9	.. 6 9
Aug. 11	noon	.. 6 7	.. 6 8	.. 6 9
To-day	noon	.. 6 6	.. 6 7	.. 6 8

Maize futures have made 4s. per cental for Sept. and Oct. delivery. For Aug. delivery 4s. 1d. has to be paid.

The Term Market standard wheat is No. 1 Northern Spring American sold on the Duluth certificate. Other sorts of wheat can be bought at the above prices plus or minus agreed difference between the other sort and the standard quality. Quotations are by the "true hundredweight" or cental of 100lb. We do not give fractions of a penny per cental. Delivery is understood as being guaranteed on or before the last day of the month named in the quotation. The maize quoted on the Term market is flat grain from the United States.

PROVISIONS.

London, Monday.—The arrivals from Ireland the last two weeks were 5,468 bales bacon, and from foreign ports 19,899 bales bacon. There was a marked improvement in the demand for bacon, and this, coupled with a slight diminution in supply, caused a very strong market, and prices generally were quoted 4s dearer for Irish and Continental. Canadian also found a better sale, and was quoted some 2s dearer. Irish, 60s, 68s, to 72s; Continental, 54s, 64s, up to 72s; Canadian, 50s to 56s up to 60s. The butter market was firm, with an upward tendency and a good demand. Danish, 116s. 118s, occasionally 120s; Irish, 98s to 110s; Canadian, 102s to 106s; French, 94s to 114s. Lard a quiet market, with no change in prices.

HOPS.

London (Borough), Monday.—Messrs. W. H. and H. Le May, hop factors, 67, Borough High-street, London, S.E., report: The damage done by the wet and cold weather shows up more now that we have some sunshine and the bruised burr is drying up and dropping off, and the prospect to-day is certainly for rather less than half of last year.

GRAIN AND FLOUR FACTORS' REPORTS.

Flour: With a return of fine weather, trade has ruled slow to-day at last Wednesday's prices, the intermediate advance having been lost.—T. S. Medill, Mark Lane.

All milling offals are scarce, and this applies to town-made middlings especially, being sold for the next fourteen days delivery, and prices are high. Bran is in small demand, but price is maintained, quantities offering being limited. Rangoon rice meal is a good substitute at reasonable figures.—Richard Doggett, Mark Lane.

The storms of last week and the publication of the American Bureau report, which might have been expected to strengthen the market, have had scarcely any influence on prices, which remain practically unaltered. Maize 1½d. down on the week. Barley unchanged. Oats unaltered. Flour quiet and without change.—W. P. Wood and Co, Mark Lane.

Offals: The demand continues to improve, especially for the better classes of bran. Rainfall abnormal. Over five inches have fallen in the North of Ireland during nine days. Potatoes, oats, and hay are seriously damaged in some districts, stimulating somewhat the demand for feeding stuffs. Prices firmer. Stocks a little under the average.—Greenhill Brothers, Belfast, August 11.

Flour—Our market is steady, with, if anything, more inquiry. Grain—There is an excellent demand for Indian corn, at 11s. 4½d. to 11s. 6d. per 280lbs. on spot, and 11s. 3d. to 11s. 4½d. per 280lb. on passage. Pease, dull. Beans, 3d. dearer. Foreign oats rather less depressed, with, if anything a better inquiry. Scotch are higher. Oatmeal a slow sale. Millstuffs—Bran, with a better demand, is 2s. 6d. per ton dearer on the week. Thirds are also in sellers' favour.—McKinnon and McDonald, Glasgow, August 11.

Wheat steady with a moderate trade at ½d. per cental advance. Flour a quiet trade at Tuesday's prices. Maize has had a good demand at a full ½d. per cental advance over last market day. European firm, and ½d. to 1d. per cental higher, with a fair trade passing, River Plate exhausted. Barley meets with a better inquiry for malting at last market day's prices; whilst feeding passes steadily into consumption at ½d. per cental improvement. Beans are firm, and 9d. per qr. higher, owing to scarcity and a good demand. Peas are firm, and held for 1d. per cental advance, but little doing. Oats have a good inquiry for English, and are very firmly held, and harder to buy at last market day's quotations. Oatmeal steady, but quiet. Oilcake firm with a fair business doing.—Ross T. Smyth, Liverpool, August 11.

THE BALTIC, Monday, 1 p.m.

State of Trade.

Wheat cargoes are 3d up from the close of last week. All sorts of maize are held for 3d. advance, but only on flat corn is it paid. American oats are 3d. dearer, but Russian cargoes are rather pressed on sale. Barley for October shipment is firm, but for earlier dates nothing is doing. Oilseeds are a firm trade.

Business Done.

Wheat.—Californian, 30s 6d, on passage; Walla Walla, 29s 6d, on passage; Argentine, 29s., on passage; Manitoba, 32s 6d, September shipment; Duluth, 32s 9d, September shipment; No. 2 Red Winter, 30s., September shipment; Hard Winter, 29s 6d, September shipment; Soft Red Winter, 28s 6d, September shipment; Roumanian, 29s 6d, September shipment; Azima, Odessa, 30s., September shipment.

Maize.—American, 18s 9d, arrived; American, 19s, on passage; Odessa, 23s 9d, on passage; Argentine, 21s, on passage.

Rye.—Azoff, 23s 9d, September shipment.

Barley.—Azoff, 17s 9d., October shipment; Odessa, 18s, October shipment.

Oats.—Vologda, 14s., prompt shipment; Canadian, 15s. 6d., on passage.

Beans.—Saida, 29s 6d, August shipment; Smyrna, 27s 6d, August shipment.

Linseed.—Calcutta, 51s. 3d., on passage.

Rapeseed.—Roumanian, 40s 9d, September shipment.

Cottonseed.—Egyptian, £6 8s 9d, prompt shipment, old crop; ditto, £5 18s 9d, November shipment, new crop.

SEEDS.

London, Monday.—Messrs. John Shaw and Sons, seed merchants, of Great Maze Pond, Borough, London, S.E., write that the chief interest in the trade is just now centered in the offerings of seeds of this year's growth. New trefoil is held for extreme prices, meantime all kinds of cloverseeds are slowly hardening in value, whilst Italian ryegrass shows a considerable advance. There is to-day no quotable change in trifolium, supply and demand being alike moderate. New seed rye and winter tares are inquired for. The bad weather in Holland has made all Dutch produce dearer; this applies particularly to mustard, rape, carraway seeds, peas, haricots, etc. White mustard is in improved sowing request. For hempseed 1s per qr more money is asked. Canaryseed, meantime, although quiet, is exceedingly firm. The Board of Trade Returns give the imports into the United Kingdom of clover and grass seeds for the month of July this year as cwts. 4,5[illegible], value £7,763, as against cwts. 6,607, value £13,5[illegible], for July, 1899.

CATTLE.

Metropolitan Market, Islington

Monday, August 13th, 1900.

	British.	Total, August 14th, 1899
Beasts	1,470	[illegible]
Sheep and lambs	7,260	[illegible]
Calves	5	—
Milch cows	50	70

Quotations per 8lbs (sinking the offal).

ENGLISH.	Inferior.	Second.	First.
	s. d.	s. d.	s. d.
Beasts	3 2 —	4 2 —	4 [illegible]
Sheep	3 4 —	5 4 —	6 [illegible]
Lambs	5 6 ..	5 10 ..	6 4

Milch cows, per head, £[illegible] to £[illegible].

British arrivals include as follows:—Scotland, —; Eastern Counties, 42; Midland, Home and Western Counties, 1,303; Devon, 40; Ireland, 85.

The supply in the beast market to-day showed an increase of 160 head compared with Monday last, owing to larger arrivals from the Midland Counties chiefly Herefords and Runts. Trade was of a slow nature, even at a decline of 2d per stone a clearance could not be made. Fat cows and bulls, being in shorter supply, were steady in value.

The following are top quotations per 8lb. (sinking the offal):—

	To-day.	Aug. 14th, 1899.
Herefords	4s 8d to 4s 10d ..	4s 4d to 4s 6d
Norfolks	4s 6d to 4s 8d ..	4s 2d to 4s 4d
Runts	4s 9d to 4s 10d ..	4s 2d to 4s 4d
Lincolns	4s 2d to 4s 6d —	3s 10d to 4s 2d
Irish	4s 4d to 4s 6d ..	4s 2d to 4s 4d
Fat cows	3s 8d to 3s 10d ..	3s 8d to 3s 10d

In the number penned in the sheep market there was an increase of 1,670 head, due to larger arrivals from Ireland and Norfolk; trade for both wethers and ewes was steady in value, a clearance of the former being made; for best quality lambs there was a good demand; other grades were more difficult to vend at a decline of 2d per 8lbs.

Undermentioned quotations are at per 8lbs. (sinking the offal), and are for the best of each class penned:—

	To-day.	Aug. 14th, 1899.
7½ to 8-stone Downs	6s 0d to — ..	5s 4d to 5s 6d
9-stone ditto	5s 10d to — ..	5s 2d to 5s 4d
10-stone half-breds	5s 6d to — ..	5s 0d to 5s 10d
11-stone Lincoln	5s 2d to — ..	4s 8d to 4s 10d
10-stone Irish	5s 2d to 5s 4d ..	4s 6d to 4s 8d
10-stone Down ewes	4s 4d to — ..	3s 8d to 3s 10d
11-stone half-bred ditto	3s 10d to 4s 0d ..	3s 2d to 3s 4d
5-stone Down lambs	6s 4d to — ..	5s 10d to 6s 0d
6-stone half-bred ditto	5s 8d to 5s 10d ..	5s 4d to 5s 6d

London Central, Monday. — Good supplies; trade bad: Beef (carcases), 3s 10d to 4s; hindquarters, 4s 6d to 4s 10d; roastings, 4s 8d to 5s. Sheep: Ewe, 3s 4d to 3s 8d; wether, 4s 8d to 5s; hindquarters, ewe, 4s 6d to 4s 10d; wether, 5s 8d to 6s. Pigs: Large, 3s to 3s 4d; small, 3s 6d to 4s.

Liverpool, Monday.—Demand good for all classes of cattle, prime quality in particular making higher rates. Excepting for a few prime sheep and lambs, prices considerably lower all round. Beef, 7d to 5d per lb; mutton, 8d to 5d per lb; lambs, 8½d to 7d per lb. At market: 956 cattle and 12,217 sheep.

FEEDING STUFFS.

London, Monday.—Linseed Cake: Market firm, Western rather higher, other sorts unchanged. Decorticated cotton cake.—Best brands, 2s 6d. dearer, ordinary unchanged. Desiccated grains are 5s. dearer. Linseed strong and advancing, 2s dearer since Thursday last.

English linseed cake	£7	17	6	to	8 0 0	ex mill
American Calcutta linseed cake	7	15	0	to	—	ex quay
American Western linseed cake	7	10	0	to	7 12 6	ex quay

LIVE STOCK AND MEAT TRADE REVIEW.

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

Trade in London.

The chief market day of the week at Islington falling on a Bank Holiday naturally caused a smaller attendance of buyers, and as the supply showed but little variation, trade in consequence was of a decidedly slower nature with a downward tendency in value, though a not very pronounced one; with difficulty a clearance was effected. Fat butchering cows, for the above stated reason, were also short in number, as also were fat bulls, both of which sold to rather better advantage. At the foreign cattle market, Deptford, the number of beasts on offer, compared with last week, showed an increase of no less than 2,322, the majority of which were shipped from America, that country and Canada being now our only sources of supply. The usual three markets were held on Monday, Wednesday, and Saturday. Trade on the first day was firm and steady, but on the other days was rather slower at a slight decline in value. The total number of beasts offered for sale on both markets was 6,340—previous week, 4,068—consisting of 1,120 British and 3,983 foreign, these latter comprising 3,983 from the United States, and 1,237 from Canada. The following were the top rates paid per 8lbs., (sinking the offal):—90-stone Herefords, 4s. 10d. to 5s.; 95-stone runts, 4s. 10d. to 4s. 11d.; 90-stone Irish, 4s. 8d.; 100-stone Lincolns, 4s. 6d.; 110-stone ditto, 4s. 4d.; 90-stone States, 4s. 4d. to 4s. 5d.; 110-stone ditto, 3s. 11d. to 4s.; 90-stone Canadian, 4s. to 4s. 1d.; ditto ranchers, 3s. 8d. to 3s. 10d.; 95-stone fat cows, 4s.; 100-stone fat bulls, 3s. 4d. to 3s. 6d. The sheep trade, which was chiefly confined to the Islington market, was of a firm and steady nature on both market days, so far as wethers were concerned, whilst ewes met a slower sale at fully 2d. per 8lbs. less money, at which reduction sales were forced. Lambs were in fair average supply, but meeting with a slacker demand were from 2d. to 4d. per 8lbs. lower on Monday, but somewhat firmer and steadier on Thursday. The total number of sheep and lambs penned was 10,035 (decrease 2,855), consisting of 9,240 British and 795 Canadian. Best pens made per 8lbs. as follows (sinking the offal):—7½ to 8-stone Downs, 6s.; 8-stone Scotch, 6s.; 9-stone Downs, 5s. 10d. to 6s.; 10-stone ditto, 5s. 8d.; 10-stone halfbreds, 5s. 6d. to 5s. 8d.; 10-stone Irish, 5s. 4d.; 11-stone Lincolns, 5s. 2d.; 10-stone Down ewes, 4s. 4d.; 11-stone halfbred ditto, 4s.; 5-stone fat Down lambs, 6s. 6d.; 6-stone halfbred ditto, 5s. 10d.; 8½ to 9-stone Canadian sheep, 4s. Calves were short in number—55, as against 120 during the previous week; rates consequently were firmer and trade brisker. The best on offer made fully 5s. 8d. per 8lbs.

Trade in the West.

The holidays, coupled with the excessive rains which accompanied them throughout most districts in England, have occasioned considerable interruption to business, from which, so far, there has been only a partial recovery. Prices, however, have undergone but very little change. What alteration there has been, sellers have reaped the greatest benefit from. The bulk of the stock has come to hand in very good condition, especially bullocks, whilst a good deal of the mutton, especially that of the wether class, has been very well finished. This will account for the slightly hardening tendency in values, some of the best bullocks having commanded a very ready sale at the chief district markets at from 11s. 6d. to 12s. for good class steers and heifers, and the more ordinary runs of fat bullocks have found an equally ready sale at from 6d. to 1s. under these rates. But whatever has been brought out has found a ready sale at the prices quoted. Equal firmness has characterised the mutton trade. Ripe wethers of medium weights are making up to 8½d. per lb., and ewes 7½d. to in some cases 8d. A good inquiry has prevailed for lamb, which, like mutton, is the turn against buyers; 10d. to 11d. is the run for best qualities, and 9d. to 9½d. for seconds. The veal trade has assumed a firmer tone, and the same may be said of pigs, cooler weather being no doubt an important factor in bringing about this result. Good veal is making 8d. per lb., and the best quality porkers 9s. 6d. to 10s. per score. Store things are also proving more remunerative to sellers, the improved keep prospects having given a greatly improved tone to the trade in milch beasts and more especially barreners, whilst there is every prospect of considerable rise in the value of store sheep, the uncertainty respecting keep prospects in the future having operated materially against sales.

Trade in Ireland.

With a decrease in the attendance of cross-Channel buyers, and an increase of over 500 cattle on last Thursday's Dublin Market, the trade for beef was [illegible] except for the best bullock and heifers, which [illegible] own well. For the ordinary run of beasts prices receded from 10s. to 15s. on late values, and [illegible] clearance could not be effected. Second-[illegible] beef had a very dragging sale. Best ox and heifer beef made from 57s. 6d. to 60s. and in a few cases 61s. per cwt. was touched, good second class from 52s. to 56s. per cwt.; other descriptions 46s. to 50s. per cwt. In the mutton department there was a falling off in supplies of close on 14,000 sheep and lambs, which had the effect of hardening prices, especially as the demand for good mutton for the cross-Channel trade was active. Sales were much easier effected, and values tended in favour of sellers for anything good, but rough, thin sheep were neglected. Best wether mutton 6½d. to 7d.; ewe, 4¾d. to 6d. per lb. Good lambs were worth from 6½d. to 7½d. per lb., but inferior were taken at very irregular figures. Dairy cattle are selling well, best springers making from £18 to £20. Store stock are also selling well, as there is such an abundance of grass. In the pig market on Thursday trade was sluggish, though both shippers and home buyers were in good attendance. Late rates were a shade weaker, but best bacon pigs were worth from 43s. to 45s. per cwt.

Trade in Scotland.

John Swan and Sons, Limited, give the following as their report on above for the current week:—The number of fat cattle on offer have been small, rather less than last week. The quality has generally been better, however. There has been a very good demand and an easy clearance, prices throughout being considerably higher, especially for the best class of bullocks. Fat cows have also met a better trade. Good supplies of fat sheep and lambs, with a lot of buyers from town and country. These also have met a sharp trade at a rise in price from the previous week. Fat calves a larger and good show; they have sold very well, and pigs have quite maintained last week's high rates. In the store market there has been a fair supply of sheep offered, but the quality has not been the best; a good demand has been experienced at fully late prices. Lambs are being shown in considerably better condition than at the corresponding sales of last year, and with plenty of customers trade is good, at a substantial increase in price from those sales. Store cattle have been a fair show, but in point of quality not equal to last week. Prices the other end are still very high, and unless for cattle with condition and of a good class this has somewhat checked sales. Milch cows not nearly so good a show as last week; the best class have met a good trade, others cheaper. Quotations:—Best beef, from 8s. 9d. to 9s.; current, from 8s. to 8s. 6d. per stone; mutton, from 8d. to 9d. per lb.

LONDON.

London Central, Wednesday.—Only small supplies offered, but trade remains slow, with the exception of beef, which ruled firm. Arrivals of beef included 780 Liverpool sides, 1,300 hindquarters, and 400 forequarters American refrigerated. Beef: English, 4s 2d to 4s 4d; American Deptford-killed, 4s; Liverpool, 4s; American refrigerated hindquarters, 4s 6d; forequarters, 3s to 3s 2d. Mutton: Scotch, 5s; English wethers, 4s 8d to 5s; ewes, 3s 6d to 3s 8d. English lamb, 5s 4d to 5s 8d. Veal: English and Dutch, 3s 8d to 4s 4d per 8lb.

London Central, Friday.—Supplies were fairly good, and trade ruled generally steady. Arrivals of beef included 50 tons Scotch, 900 Liverpool sides, 2,600 hindquarters, and 1,500 forequarters American refrigerated. Quotations—Beef: Scotch, short sides, 4s 8d to 5s; long, 4s 2d to 4s 6d; English, 4s 2d to 4s 4d; American, Deptford killed, 4s; Liverpool, 3s 10d to 4s; American, refrigerated hindquarters, 4s 8d; forequarters, 3s 2d; Argentine, hindquarters, 3s 10d; forquarters, 2s 8d to 2s 10d; New Zealand, hindquarters, 3s 3d to 3s 4d; forequarters, 2s 4d to 2s 5d. Mutton: Scotch, 5s to 5s 4d; English wethers, 4s 8d to 5s; ewes, 3s 6d to 3s 8d; Dutch wethers, 3s 10d to 4s 2d; Canadian ewes, 3s 6d; Canterbury, 2s 4d to 2s 7d; Wellington, 2s 2d to 2s 4d; Sydney and River Plate, 2s to 2s 2d; English lamb, 5s 4d to 5s 8d. Veal: English and Dutch, 3s 8d to 4s 4d. Pork: English, 4s to 4s 4d; and Dutch, 3s 6d to 3s 8d per 8lb.

Islington, Thursday.—Beast arrivals were on a larger scale than for some time past, and with a generally fair demand a steady trade was effected. Sheep supplies were of smaller extent, being 2,480 less than on Thursday, and while wethers moved off slowly at late rates, ewes were steady and in fair request. 7½ to 8-stone Down wethers quoted 5s 10d to 6s; 9-stone, 5s 10d; 10-stone half-bred, 5s 6d to 5s 8d; 10-stone Down ewes, 4s 4d; 11-stone half-breds, 4s. Lamb trade slow. 5-stone fat Downs, 6s 2d to 6s 4d per 8lb to sink the offal. Calves met with fair support. Total supplies:—110 beasts, 3,650 sheep and lambs, 50 calves, 50 pigs, and 5 milch cows.

COUNTRY.

Ashford, Tuesday.—Business was very irregular, and prices varied considerably. Best beef made from 11s to 12s per score, and secondary animals 10s to 11s. Mutton was in rather better demand than last week, half-bred wether fetching 5s to 5s 6d, and small Kents 5s to 5s 4d per 8lb. Barren sheep, 3s 8d to 4s. Lambs were cheap, scarcely anything making more than 6s per stone. Veal, 5s; and pork sold fairly well at 9s to 9s 6d per score, though store pigs were 1s a head lower on the week. Trade for store lambs and sheep continues very dull indeed.

Basingstoke, Wednesday.—At Raynbird and Sons' sale-yard there was a large attendance of buyers to meet a supply of 43 fat beasts, 61 calves, 630 fat sheep and lambs, 185 pigs, and 107 head of dairy and store cattle, for which the following prices were realised:—Fat beasts, £14 to £21 10s; fat calves, 60s to £6 10s; small, 20s to 50s; fat wethers, 37s to 57s 6d; fat ewes, 28s to 39s; fat lambs, 33s 6d to 54s 6d; fat porkers, 4s to 5s; small, 22s to 36s; store pigs, 14s to 17s 6d; dairy cows, £11 to £18 5s. A strong reaction to-day after the holidays and late excessive heat, all descriptions of fat stock meeting a brisk trade. For fat beasts there was a good inquiry and last week's prices maintained best Devon steers making up to £21 10s, and heifers, £18; Shorthorn cows reached £14 15s; heifers, £15 10s; Jersey cows up to £16 5s; heifers, £15. A clearance made of the supply of fat sheep and lambs, with a brisk trade. The best lots of fat sheep and lambs made an advance on late rates. A good number of the choice fat lambs and small sheep were taken to the seaside holiday resorts on the South and East Coast at prices considerably beyond the prices obtainable at the recent fairs. The consignment of sixty superior Hants Down seven-months old show lambs from Mr W. Allen reached 54s 6d, the top price of the season. Fat ewes were all sold, but at indifferent prices compared with prime quality at both sheep and lambs. Hants Down wethers and ewes made 48s, 44s 6d, 43s 52s, 57s 6d, 47s 6d, 56s 6d, 43s 6d; 9-months old ditto, 52s, 54s, 48s, 42s, 52s; ditto black face wethers, 42s, 31s, 27s 6d, 39s; 7-months old fat lambs, 42s, 45s 6d, 52s, 45s, 44s 6d, 39s, 43s, 41s 6d, 38s 6d, 40s; Southdown ditto, 33s 6d; cross-bred ditto, 33s 6d; old ewes, 39s. 38s, 27s, 28s, 35s 6d; 3-months old sucking lambs, 36s 6d, 41s 6d, 35s; Scotch ditto, 17s; rams, 49s 6d, 35s, 48s, 46s. The trade of last week was not maintained for milch cows; a considerable reduction in price had to be taken to effect sales. Store cattle met with little inquiry. Fat calves, with a short supply, met a brisk trade at an advance on last week's quotations. Fat porkers were cleared at prices in favour of the vendor, trade ruling firm throughout for the small number on offer. Store pigs also found a ready sale. Ruling values:—Prime quality Devon beasts, 7d to 7½d; ditto Shorthorns, 6¼d to 6¾d; bulls, cows, and inferior ditto, 5½d to 6d. Best quality sheep, 9d to 9¼d; second ditto, 8d to 8½d; old ewes, rams, and inferior, 6d to 7d; choice fat sucking lambs, 9¼d to 10d per lb. Fat calves, 7d to 9d per lb. Porkers, up to 10s 6d per score.

Boston, Wednesday.—The market was remarkably quiet. There was a fair inquiry for in-calvers, but little or nothing doing in store beasts. Best bullock beef, 7s 6d to 7s 9d: cow beef, 6s 9d to 7s per stone; in-calvers, £18 to £22; heifers, £15 to £17 10s; calves, 55s to 60s; wether mutton, 8d; ewe mutton, 5d to 6½d per lb; store lambs, 20s to 24s.

Brigg, Thursday.—The show of horned stock was not extensive, and comparatively few lots changed hands. Milch beasts and in-calvers, £12 to £18; drapes, £3 to £11; steers and heifers, two years old and upwards, £9 to £12 per head.

Calne.—Present prices for prime pigs, in lots of not less than 10, on rail within 100 miles of Calne:—

Prime stores.	Thickness of fat in any part of the back.	Price per sc.
6 sc 10 lbs to 9 sc 10 lbs	2½ in. and under	9s 9d
Under 10 sc 10 lbs	Not exceeding 2½ in.	9s 3d
Under 11 sc 10 lbs	Not exceeding 2¾ in.	8s 6d
Under 12 sc	Not exceeding 3 in.	—

Any pigs outside these limits at their value. Half truck, 12 pigs. Whole truck, 25.—CHARLES AND THOMAS HARRIS AND CO., Limited, Calne, Wilts.

Cambridge, Monday.—The stock exhibited for sale at this market and the prices obtained were as follows:—Beasts, 238; sheep, 910; pigs, 249; horses, 13. Beef, 7s to 8s per stone; mutton, 4s 4d to 5s 4d; pork, 5s to 6s 3d. A holiday market and very few store beasts to hand. Fat beasts a fair show and trade better. Fat sheep, short supply and prices better. Stores a good show, some very good stock ewes, but trade slow. Fat pigs a better trade. Stores not up to last week.

Canterbury, Saturday.—Trade was quiet, the supply of sheep not being quite so heavy as last week. There were a number of lambs on offer, however, and these ranged up to 23s 6d per head. One pen went at the absurd average of 1s 6d per head. Horned stock was in poor demand, and only bad prices were realised.

Carlisle, Saturday.—Large supply of Irish store cattle, including 400 to 500 head of heifers, mostly of useful quality. Fair attendance and good inquiry, with trade a little more active, at prices unchanged, which were quoted at £5 5s to £8 10s for small heifers, and £10 10s to £16 10s for the most useful sorts. Small show of pigs, and slow sale at prices up to 25s.

Chester, Thursday.—There was smaller show store stock, but fuller supply of dairy cattle. For the latter there was an improved demand here, beasts finding purchasers at high prices. Feeding stock met slow sale at declining values. A rather better inquiry for sheep. Quotations:—Milch cows, £14 to £21; calvers, £13 to £18; barren, £10 to £12; heifers, £8 to £14; stirks, £5 to £8; and sheep, blackfaced, 22s to 25s.

Dorchester, Saturday.—Stock of all kinds, both fat and store, came to hand with greatly improved weather in good supply, and with plenty of buyers, brisk business resulted. Milch beasts met a good inquiry at prices ranging from £16 to £19 10s; barreners more saleable at £20 to £27 per pair; good bullocks and steers, 11s to 11s 6d per score; cows, 10s to 10s 6d. Mutton firm at 8d to 8½d for wethers, 7d to 7¾d for ewes.

Dublin, Thursday.—Numbers in market: Beasts, 2,938 (increase 502); sheep, 9,313 (decrease 1,381); calves, 60 (increase 15). Slow dragging trade for all classes of cattle, except choice large heifers, and prices more in favour of buyers. Half meated and inferior sorts difficult to clear. No material alteration in price of sheep and lambs, and a fair clearance effected. Cattle (best), 32s to 35s per cwt; other sorts, 27s to 31s per cwt. Mutton, 5¾d to 7¼d per lb. Lambs, 15s to 32s each.—GANLY, SONS, AND CO.

Dumfries, Wednesday.—Beef in good demand, making 38s per live cwt; Ayrshire cows, to £15; cross bullocks, to £19; Ayrshire heifers, to £16; horned bullocks, to £19; polled ditto, to £17; Ayrshire bullocks, to £17; Galloway heifers, to £15; Highland bullocks, to £14.

Edinburgh, Wednesday.—Trade for store sheep was fair, without quotable change in price, Cheviots making to 36s; grey-faced, to 34s; half-breds, to 38s. Store cattle a slow trade; horned bullocks, to £15; polled, to £14 10s; stirks, to £8 10s; Shorthorns, to £24; Irish, to £23; crosses, to £22 10s; Ayrshires, to £22.

Glasgow, Wednesday.—Moderate show of sheep and cattle, but full rates barely maintained owing to stormy weather. Sheep and lambs were offered in poor condition. Top Scotch cattle, 66s to 68s; secondary, 62s to 64s; Irish, 62s to 64s; States, 58s to 62s per cwt. Calves up to £5 15s. Best sheep, 8¼d to 8¾d; secondary, 8d; lambs, 8d to 8¾d per lb.

Hereford, Wednesday.—Return of stock brought to the cattle market this day:—Bullocks and cows 419, calves 117, sheep 1,400, lambs 1,160, pigs (fat and sows) 1, sucking pigs 9, pigs (stores, not more than ten) 178, pigs (stores, more than ten) 54. Prices of stock: Best beef, 6½ to 7d per lb; wether sheep, 6½ to 8d per lb; ewes, 5½d to 6d per lb; veal, 9d per lb; lamb, 9½d per lb; pork, 4½d to 5d per lb; bacon, 4d to 5d per lb.

Ipswich, Tuesday.—Messrs. Robt. Bond and Sons report a shorter supply of fat cattle. All the best qualities were in strong demand at higher prices. Most of the animals were of medium weights. Well-finished animals made up to £22. Fat lambs were in request, some making up to 65s. Fat shearlings made up to 65s. In the store sheep pens there were several lots of ewes and lambs. Buyers were more numerous, and a decided improvement in demand may be reported. An average number of calves were penned. Those for weaning sold well, but fat calves were slow. A good entry of swine, for which trade was much the same. Thirty-seven cows and heifers were offered, including an entry of Jersey cattle direct from the importer ranging from 19 guineas to 12 guineas; others changed hands freely at satisfactory prices up to £19 15s. Numbers at sales and market:—Beasts, 307; sheep, 2,749; calves, 48; swine, 1,189; horses, 37.

Leicester, Saturday.—Fair average supplies of home-bred stock in good condition. Small attendance, and trade quiet. Milch cows in better demand, at £15 to £22 per head. Bullocks, £9 to £13 each. Young stock and calves slow trade.

Lincoln, Friday.—There was an average supply and a slightly better trade, no doubt owing to the rains having greatly improved the herbage. The figure for milch cows ranged between £12 and £21; two-year-old bullocks made £10 to £14, and yearlings £5 to £8. In the sheep department drape ewes fetched 20s to 30s each, and lambs 15s to 27s. A large number of store pigs was penned, but not many suckers, and for both kinds there was only a little demand. Stores realised from 25s to 45s, and suckers 12s to 18s.

Norwich, Saturday.—The supply of store beasts here to-day was moderate; the demand was, however, inactive, and a complete clearance was not made. Prices experienced little change. Fat beasts firm at 7s 6d to 7s 8d and 8s per 14lb. Store sheep and lambs were in moderate supply, but trade showed no improvement; lambs were quoted at 18s to 34s; and

keeping shearlings at 38s to 45s per head. Fat sheep made 8s 6d to 9s and 9s 6d per 14lb. Keep prospects are pretty good in Norfolk.

Newcastle, Tuesday.—Good average supplies, and prices well maintained, with ready sale. Numbers:—Cattle, 1,764; sheep and lambs, 7,240; calves, 102; pigs, 561. Prices (sinking the offal):—Beef, 5s 6d to 5s 9d; pork, 5s to 7s 9d per stone; mutton, 6½d to 8½d; lamb, 8½d to 9d; veal, 5d to 8d per lb.

Sheffield, Tuesday.—A small supply of milch beasts on offer, and only a small amount of business was done at about late prices. Best qualities making £17 to £22; secondary qualities, £12 to £15.

Shrewsbury, Tuesday.—Brisk demand for pigs and cows with calves. Store cattle brisk. Better trade all round. Beef and mutton higher in price. Quotations—Lamb, 7½d to 9d. Beef, 6d to 7¼d; mutton, 6½d to 9d; and veal, 6d to 8d per lb. Porket pigs, 9s to 10s; and bacons, 8s to 9s per score. Cows, with calves, up to £22 10s. Numbers offered 403 cattle, 55 cows, with calves, 1,847 sheep and lambs, 106 calves, 21 fat, 101 porket, and 250 store pigs.

Spalding, Tuesday.—A small show of both beasts and sheep. Best beef, 7s 6d per stone; cow beef, about 7s. A small lot of stores on offer, and trade slow. Mutton maintained its price, the best quality fetching fully 8d per lb; ewe mutton, 7d.

Taunton, Saturday.—Moderate supply, small attendance, and rather dull trade.

Thame, Tuesday.—There was a larger attendance of buyers at Thame market on Tuesday last than has been present this year, and the supply of stock was not equal to the demand. A fast trade ruled throughout for all classes of stock, and a clearance was effected at greatly improved prices. Mr. Bond's sale comprised 72 fat beasts, 257 fat sheep and lambs, 62 fat and weaning calves, and 98 fat and store pigs. Fat bullocks made £16 to £18 10s; fat heifers, £14 to £20 12s 6d; fat wether sheep, 45s to 50s 6d; fat ewes, 37s to 54s; fat lambs, 30s to 41s 6d; store lambs, 19s; fat calves, £4 to £4 13s; cow calves, 22s to 77s; bull calves, 15s to 40s; fat pigs, 10s per score. Stores dearer.

Wakefield, Wednesday.—There was an increase in the numbers of buyers, whilst the animals offered for sale were much less than last week, the result being that sales were soon effected at prices exceeding those at the last market. 1,350 beasts were offered, against 1,394 last week. Choice beef met with a ready sale at 6¾d to 7d per lb, and in some cases 7¼d was realised, whilst inferior sorts made 5¾d to 6¾d. The supply of sheep was particularly small, only 3,754 being on sale, against 4,564. Lambs and small and young sheep, 8¾d to 9d per lb; strong sheep, 7¾d to 8d; and heavy and fat sheep, 6d to 7d. The calves were soon disposed of at 5¼d to 7½d per lb, and breeding calves changed hands at 15s to £1 each. In the department for milch cows there was a somewhat slow trade, and sales were effected at £17 to £20 each, inferior making £12 to £16. The pig market is still closed.

Wakefield, Wednesday.—Smaller supplies of stock, which enabled dealers to secure a slight advance on late rates. Best beef made 7¼d per lb; secondary qualities, 5¾d to 6¾d. Brisk trade in sheep, and good clearance effected. Lambs, 9d per lb; best sheep, 8½d to 9d; other sorts, 6d to 8d. Numbers penned:—Beasts, 1,350; sheep, 3,754.

Wolverhampton, Wednesday.—Good supply of beasts; trade slow. Sheep and lambs a fair supply; moderate trade. Calves a moderate supply; slow demand. Milch cows a small supply; brisk trade. Beef, 5½d to 7d per lb; mutton, 6d to 8¼d per lb; lamb, 8d to 8¾d per lb; veal, 6d to 7½d per lb; bacon pigs, 9s to 9s 3d per score; porkets, 9s 3d to 9s 6d per score; sows, 6s 6d per score.

Worksop, Wednesday.—There was an exceptionally good market, a large number of excellent beasts being penned. There was a great improvement in the price for mutton. Fair show of lambs. Best beef, 7s 3d to 8s per stone; best shearling mutton, 7½d to 8½d per lb; inferior, 5d to 6d.

York, Thursday.—A small show of both Irish and English store cattle were on offer, but the supply was quite equal to the demand, buyers being scarce and trade dull. Three-year-olds bullocks, to £15; two-year-olds, £9 to £11; stirks, £5 to £8. Fair show of calving and milch cows, which made up to £23 for best; inferior, £15 to £19. Sheep were scarce; North country shearlings, 38s to 42s; Mashams, 36s to 40s; twice crossed, 40s to 46s; North country lambs, 26s; South country lambs, 24s to 30s each.

York, Friday.—Calves, 7½d to 8d per lb; small sheep, 9d per lb; large sheep, 8d per lb; ewes, 7d per lb; lamb, 9d to 10d per lb; small pork pigs, 6s 3d per stone; large pork pigs, 5s 6d to 6s per stone.

FOREIGN.

Deptford, Wednesday.—Beast supplies totalled 2,498, this being 1,737 more than shown on Wednesday last, and consisted of 1,591 United States and 907 Canadian. Trade was slow at 3s 11d to 4s 3d for the former, and 4s to 4s 1d the latter for best, and ranch at 3s 8d to 3s 10d. 795 Canadian sheep met with fair support at 3s 10d to 4s per 81b, to sink the offal.

FEEDING STUFFS.

London, Thursday.—Linseed.—The market has declined still further on account of sellers becoming more anxious to realise and demand falling off; there is, however, rather more inquiry at the close at the lower limits. Calcutta, spot, London, is quoted 51s 6d; passage, 51s 3d to 51s; July-August, 50s 3d; August-September, 50s 3d; September-October, 50s. Hull very quiet, spot and passage, Calcutta, 54s 9d sellers. Duluth, October-November, 48s. Azov, Black Sea, September-October 49s 6d. La Plata, December-January, 46s 6d. To the Continent, Bombay is quoted July-August, 57s 6d; February-March, 48s 3d; March-May 47s. Calcutta to Hamburg, July-August, 52s 3d; August-September, 52s 3d; April-June, new crop, 45s 3d. La Plata 500 January-February, sold at 45s 6d. Linseed oil has declined in value, and business has been done in all positions at lower rates. We quote spot, pipes, £33 2s 6d to £33 5s; barrels, £33 7s 6d; August, £33. September-December, £29 10s; January-April, £26 10s to £26 15s. Hull spot naked, £32 10s; August, £31 15s; September-December, £28 5s; January-April, £25 5s. Linseed cakes quiet, unchanged. London made £7 17s 6d to £8 2s 6d. Russian, £7 7s 6d to £7 12s 6d ex dock. American Westerns at £7 5s to £7 12s 6d. Cotton cakes quiet. London made £4 5s to £4 7s 6d. Rapeseed quiet, prices easier. To the Continent brown Calcutta afloat to Hamburg 39s 6d, and to London 38s 6d. Yellow Cawnpore, August-September is held for 44s. Brown Cawnpore, 41s. 6d. Danubian Navette, August-September, 40s. Ravison to Hull, September-October, 29s. The imports into London for the week have been 1,449 and since 1st January 33,714 qrs, against 35,244 qrs corresponding time last year. Cottonseed is steady, but inactive, spot and afloat, London, £6 3s 9d; July, £6 5s; August, £6 6s 3d; September, £6 8s 9d; October, £6 6s 3d; November-January, £6 asked, but buyers are holding back. Hull firm, Spot, we quote £6 5s; August, £6 5s; September, £6 8s 9d; October £6 3s 9d; November-January, £5 17s 6d buyers. Cargoes, October, £6 3s 9d; November, £6 7s 6d. The import into London for the week has been 1,856, and since 1st January 30,749 tons, against 19,905 tons corresponding time last year. Rape oil continues inactive, quotations unchanged. We quote brown oil spot in barrels £28 10s; September-December, £27 10s. Refined spot, £29 15s. Ravison oil naked spot, £26; September-December, £24 10s; November-April, £24. Cotton oil continues steady at the prices quoted last week. Crude spot, £22 5s; August, £22 5s; November-April. £18 10s. Refined spot, £24 10s to £25 according to make and package. Hull weak. Refined spot, £22 12s 6d. August £22 5s; November-April, £18 5s. THE PRODUCE BROKERS COMPANY, LIMITED.

Mark Lane, Monday.—Linseed Cakes.—The trade continues extremely dull and inactive, but with dearer freights and the prospect of very limited supplies for some time to come the market remains firm. Russian are unchanged. Americans are scarce and firmly held at the turn dearer. English are only in small production and quotations unaltered. Cotton cakes.—The present low price, more especially of foreign, is attracting buyers, and there is more disposition to operate for both spot and forward positions. Egyptian and English sell freely at last week's prices. Decorticated find a slow sale and are unchanged. Rape cakes.—Nothing offering. Maize germ meal.—Arrived parcels of American find buyers at a slight advance, but rather less money would be accepted for later delivery. English is in good request at last week's prices. Rice meal.—There is no change to note for landed or to arrive parcels.

—PINNOCK BROS., Mark Lane.

Hull, Tuesday.—Linseed.—The arrivals are 25,895 qrs from Calcutta, 6,149 qrs Petersburg; total, 32,044 qrs. Our market has been of a holiday character the last few days, with a slight tendency to ease. Calcutta, arrived, offers at 54s 9d. Black Sea, Aug.-Sep., 50s 6d asked; Sep.-Oct., 49s 3d; Oct.-Nov., 49s. Petersburg, July-Aug. has been sold back to shippers, at 52s 3d; Sep.-Oct., 51s to 51s 3d the value. Riga and Libau, 47s 9d to 48s. American Duluth, 48s nearest. River Plate, nothing at the moment offering. Cottonseed.—The market declined a little during the week, spot, passage and August selling at £6 3s 9d, which is to-day's value in the nearer positions, but £6 5s wanted shipment this month. September, Fayoumi sold at £6 7s 6d to £6 6s 3d, with still buyers at latter. October done at £6 2s 6d to £6 1s 3d and a few hundred tons monthly Nov.-Jan. found buyers at £5 17s 6d to £5 16s 3d, sellers not offering under former figure to-day. Oils.—Export for the week ending 31 July, 1900. Linseed oil—1 Germany, 23 Norway, total 24 tons. Cotton oil—10 Belgium, 14 Denmark, 6 France, 46 Germany, 58 Holland, 14 Sweden, total 148 tons. The market is of a holiday nature. Linseed oil—33s spot, 28s 6d Sept.-Dec., 26s Jan.-April. Cotton oil—22s 4½d spot, 18s 1½d Nov.-April. Crude, 20s 9d spot, 16s 10½d Nov.-April. Rape oil—Black Sea naked, 25s 3d spot, 1st quality naked, 26s 3d spot. Oil seed cakes.—A steady market at previous rates.—KEIGHLEY MAXSTED AND CO.

WATERLOO ROUND FEEDING CAKES, £6 15s 0d PER TON; WATERLOO ROUND- 97 PER CENT. PURE LINSEED CAKES, £8 17s. 6d. PER TON; WATERLOO ANGLO SHAPE 97 PER CENT. PURE LINSEED CAKES, £8 15s. 0d. PER TON; WATERLOO 97 PER CENT. PURE EGYPTIAN COTTONSEED CAKES, £4 10s 0d PER TON. ALL F.O.R. HULL.

WOOL.

Bradford, Thursday.—The market shows little change. Business is exceedingly inactive, and the only sign of improvement is in strong crossbreds, which are more asked for. Mohair is very quiet, and values rather weak. The export yarn trade is again very flat, and the home trade is little better. Everything points to restricted consumption. Mohairs and alpacas are quiet. The piece trade is dull, manufacturers wanting orders badly.

Canterbury, Saturday.—A fair amount of trade continues to be done at recent rates. Kent fleeces, 6d; lamb wool, 4d to 5d per lb.

Leicester, Saturday.—Owing to the holidays the sales in the local wool market have been very small, and the choicest qualities of both home and colonial remain firm. There is an improved feeling in choice, long, bright hog wools, but quotations are low. In yarns a healthy trade is being done at firm quotations.

POTATOES.

Borough and Spitalfields, Saturday.—The arrivals from all parts this morning were moderate, for which the demand has been brisk, with prices for all samples improved. English, Beauty of Hebrons, 4s 6d to 5s 6d; ditto, early Puritans, 4s 6d to 6s; Snowdrops, 4s 6d to 6s; early Regents, 4s 6d to 5s 6d; French rounds, 2s 6d to 4s 0d per cwt.

HAY AND STRAW.

Whitechapel, Saturday.—The supplies this morning were on a small scale, and met a fair demand, at steady prices. Best clover, 85s to 100s; inferior ditto, 65s to 80s, specially picked hay, 82s 6d; good ditto, 75s to 80s; inferior ditto, 50s to 60s; mixture and sainfoin, 75s to 90s; straw, 25s to 36s per load.

Bristol, Tuesday.—The prices quoted on Friday's market were: Old clover hay, 75s to 85s per ton; best new ditto, 65s to 70s; and straw, 45s to 50s.

Leeds, Tuesday.—The demand in the wholesale market for hay and straw keeps steady, with quotations firm at last week's rates. Meadow hay, 6½d; clover hay, 7d to 7½d; wheat straw, 5½d; oat straw, 5d; rye straw (cut), 7d per stone. Loose hay, 3d to 3½d per bundle.

FOREIGN HAY AND STRAW.

London, Saturday.—The holidays this week have interfered with business, but the demand generally has improved, and any parcels of superior meet an active sale, with buyers at increased prices. So far the supplies of new hay have consisted mainly of inferior to good. Straw has been in active, and at prices. We quote Canadian timothy hay, 70s; Dutch clover, 70s; Canadian timothy hay, 67s 6d; common Dutch, 60s; large bale wheat straw, 48s; small ditto, 44s 6d; small bale oat, 43s. All these prices are per ton, delivered by barge alongside Hungerford Bridge, 9 and 10, Great Tower Street, E.C.

LIVE STOCK.

OUR ILLUSTRATIONS.

The Guernsey heifer, Clatford Gentle, is the property of Mr. J. C. Forster, Clatford Mills, Andover, Hampshire, her breeder being Mr. T. Le Page, Beaulieu, St. Andrew's, Guernsey. She is a fawn-and-white, and was born in January, 1898, her sire being Loyal of the Hunguets, and her dam Lady West. Clatford Gentle has been most successful in the showyards this year, having won first prize at the Royal, Bath and West, and Royal Counties Show. At the last-mentioned she was reserve for the female championship of the breed.

Mr. Leonard Cole Attrill, of Bowcombe Manor, Carisbrooke, Isle of Wight, was the breeder of the three Dorset Horn shearling ewes, and he exhibited them at the recent Bath and West and Royal Shows, where they gained a first prize. They have now been sold to Mr. Gillway, of Ontario, for shipment to Canada, and we may mention that Mr. Attrill has also sold another three head to Messrs. Mansell and Co., for exportation to Canada. With animals from the same flock Mr. Attrill won the special prize for the best ram lamb at the Royal Isle of Wight Agricultural Society's Show last month, where he has taken the champion cup twice in succession. Photos by the Art Photo Co., Newport, I.W.

STOCK AND SHOW NOTES

By Herdsman.

The secretary of the United Counties Agricultural Society has informed me that Her Majesty the Queen has consented to honour the Society's show by sending the well-known champion Shorthorn bull Royal Duke, but he will not be entered for competition. The show is to be held at Carmarthen on the 30th of this month, and the exhibition of Royal Duke, together with the other attractions already provided, should ensure the Society a big financial success.

So far as the wholesale meat markets in London are concerned, each succeeding year shows a huge increase in the quantity imported from America and the colonies and a gradual diminution in the bonâ-fide English supply. Every annual report repeats the same story, and proves that dealers are relying more and more on breeders abroad. Of the meat sold last year at Smithfield only 27.3 per cent. was country-killed, the percentage in 1898 being 27.8; and 15.5 per cent., as against 19.7 per cent, town-killed. Thus but 42 per cent. of the entire consumption was forthcoming from the provinces. Foreign countries supplied 14.2 per cent., America 23 per cent., and Australia and New Zealand 20 per cent.

Mr. Charles Coxon's annual sale of Shropshire sheep will be held at Elford Park, near Tamworth, on Wednesday next, August 15th, Messrs. Lythall and Walters, of Birmingham, being the auctioneers. The catalogue includes thirty-five rams and seventy-five shearling ewes, all of first-class breeding, and combining that size, strength of bone, and quality of flesh for which the flock has been renowned for so many years. They are chiefly by the following noted winners: Charmleader (8933), purchased at 90gs.; Downton Prince (9456), highly commended at the Bath and West of England Show, and highly commended in pen of five at the R.A.S.E. and Shropshire and West Midland Shows in 1897; Dublin Champion 2nd (8979), who secured the first prize and gold medal for best Shropshire ram of any age at the Dublin Show in 1896, and was highly commended at the R.A.S.E., Leicester, in the same year; Ensdon Four B's (9005), winner first R.A.S.E. Manchester, Shrewsbury, and Leicestershire Shows in pen of five, and highly commended B. and W. of E., Southampton, 1897, purchased at 185gs.; Lord Khartoum (9990), third prize ram in pen of five R.A.S.E., Birmingham, and S. and W.M., 1898; and Norton Statesman (9147), winner third in pen of five S. and W.M., 1895, and reserve number B. and W. of E., second Herefordshire, second in pen of five R.A.S.E., Leicester, and first in pen of five S. and W.M. in 1896. All the sheep have been daily ranging in the pastures, and, not having been fed up or prepared for sale, are therefore in an excellent natural state. There will be included also in the sale four young Shorthorn dairy bulls reared from first-class milking cows.

The annual exhibition of the Gransden and District Agricultural Society will take place at Great Gransden on Tuesday, September 25th. The secretary is Mr. R. J. Kisby, Great Gransden, Sandy, Beds.

Messrs. Macdonald, Fraser, and Co., Ltd., of Perth, have issued a preliminary catalogue of a joint sale of pure-bred Aberdeen-Angus cattle, which they will conduct at Craibstone Mains, Bucksburn, Aberdeenshire, on Tuesday, September 18th. The animals, which number over seventy, are the property of Mr. A. C. Pirie, of Dunecht, and Mr. G. J. Walker, Portlethen. The sale of the former gentleman's herd is rendered necessary owing to the lease of the farm having expired, and the whole of the animals will be sold without reserve. The herd was founded in 1890 by the purchase of the cow Pride 2nd of Denmark, from the old Morlich family of Nancys. This cow has been an excellent and regular breeder, and eleven of her descendants are included in the catalogue. Another valuable addition made to the herd was Pride of Powrie 4th (19818), first prize three-year-old cow at the Highland Society's Show in 1894, and winner of the Chalmer's prize at the Royal Northern Agricultural Society's Show in 1897. Representatives of the following well-known families are also included in the sale:—Prides of Aberdeen, Witch of Endor Tribe, Aldbar Annuitys, Stumpies, Jemimas of Morlich, and Nugget of Morlich. The sires used have been taken from Wellhouse (Mr. Wm. Anderson), Auchorachan, Powrie, Naughton, and Pitpointie, from the last named being purchased the present stock bull Rosencranz (16002), a son of the Highland Society champion cow Blooming Rose. This bull was largely used last year in the herd, and the whole of the cows are this year in calf to him. The cattle have never been fed for the showyard, and will be offered in a natural healthy condition.

Polled cattle have been bred at Portlethen since the last century. The oldest animal whose date of birth is recorded in the Herd Book is the bull Colonel (145), calved in 1818, whose sire was a bull bred at Portlethen. Not only have polled cattle been so long bred on the farm, but there has never been any other known breed on the farm. The last draft sale was held in July, 1894, and the present lot are offered for sale in consequence of the stock having outgrown the accommodation. The animals are all in a healthy condition, and will be offered for sale just off the grass.

The annual sale of rams and ewes, the property of Mr. W. F. Inge, was held on Wednesday, August 8th, at Thorpe Hall, Tamworth, Messrs. Lythall and Walters being the auctioneers. Most of the leading breeders, in addition to a number of local farmers, attended, and the result was very satisfactory. The highest price was 100gs., given jointly by Dr. Wall and Mr. A. Tanner, for a ram that was exhibited in the third prize pen at York. Other prices were: 25gs. Duke of Sutherland, 21gs. Lady de Rothschild, 21gs. E. L. Driver, 18gs. R. Bach, 14gs. Howard P. Ryland, 13gs. S. F. M. Nevett, 11gs. T. Stelfox, 10gs.. Lord Moreton, 10gs. H. Hellaby. Ewes made 62s. 6d., 60s., 60s., 60s., etc.

The Council of the Peterborough Agricultural Society have fixed Tuesday, Wednesday, and Thursday, July 9th, 10th, and 11th, as the date of next year's show.

This year's show of the Airedale Agricultural Society takes place at Bingley on Wednesday fortnight, August 29th. From the prize schedule which has just come to hand I see that the fine sum of £600 is offered for competition in classes for horses, cattle, sheep, pigs, poultry, farm produce, etc. The entries close on the 25th inst. with the secretary, Mr. Charles Mason, Park Road, Bingley.

At Tralee, co. Kerry, on August 6th, there was a small fair, demand dull, and a good many cattle remained unsold. Calves, second class, £3 5s. to £4; third class, £2 10s. to £3; yearlings, second class, £5 15s. to £7 2s. 6d.; third class, £4 5s. to £5 2s. 6d.; two-year-olds, second class, £7 5s. 2d to £9; third class, £5 to £6 12s. 6d.; three-year-olds, third class, £6 to £7 10s.; springers, second class, £11 to £13; third class, £9 to £10.

CATTLE.

Foot and Mouth Disease.

Outbreak in Yorkshire.

The outbreak of foot-and-mouth disease in the East Riding of Yorkshire at Marfleet has led to a number of markets being closed by the Board of Agriculture, and Hull cattle market has been closed for the sale of sheep and cattle.

The situation is extremely serious both for farmers and butchers, and on this account a meeting of the Holderness Farmers' Club was held on Tuesday afternoon, with Mr. Gale, of Atwick, the president, in the chair. After some discussion in private a resolution was passed pointing out that the new Order of the Board of Agriculture causes serious inconvenience by reason of the restrictions on the removal of cattle, and requesting the Board to modify them so as to allow the removal by licence of animals for immediate slaughter, and requesting some modification of the existing restrictions in the interest of agriculturists to facilitate the removal of stock from one farm to another. It was also urged that the area of prohibition is larger than necessary.

A further Order of the Board of Agriculture declares the parish of Marfleet, Kingston-upon-Hull, to be an area infected with foot-and-mouth disease, and prohibiting any person to enter any field or shed where cattle, sheep, or swine are, except so far as may be necessary for the feeding or tending of the animals. The Order further declares that no dog shall be allowed to be at large within the infected area. Any contravention of the Order will be deemed to be an offence against the Diseases of Animals Act, 1894.

Yorkshire Farmers and the Outbreak.

At a meeting of the Yorkshire Union of Agricultural Clubs at York on Thursday, Mr. W. Hutchinson (Gunby) drew attention to the outbreak of foot-and-mouth disease at Marfleet, between Hull and Hedon, and referred to the action of the Holderness Club in petitioning the Board of Agriculture for relaxations of their special regulations. He said he had very little information as to the extent of the outbreak, or the supposed way by which the cattle had been contaminated, but it seemed of so grave a nature that it was desirable the matter should be considered at that meeting. They had not perhaps sufficient information to justify them taking any action, and he could not but regret that the Holderness Club had not communicated their action, or asked for the support of the Associated Clubs, or that someone from the club was not present. He did not think they could go further than just enter on the minutes their regret that the outbreak had occurred.

The Chairman agreed with Mr. Hutchinson, and regretted that someone was not present from the Holderness Club, so that they might have given information with regard to the outbreak, and stated the objections that they had with regard to the course taken by the Board of Agriculture. He sympathised very much with the farmers of the district, who had to put up with the restrictions, but at the same time they knew what a dreadful thing it would be if foot-and-mouth disease really got a good hold of the North and East Ridings. That would be far worse than any temporary inconvenience the farmers of that district might have to put with, on account of the restrictions enforced.

The matter then dropped.

The Permanent Royal Showyard.

Owing to the early date we had to go to press last week (in consequence of the Bank Holiday) we were able to print in our last issue only a condensed report of the monthly council meeting of the Royal Agricultural Society held on the 1st inst. As was stated a week ago, it was decided by 34 to 12 to establish a permanent showyard in London. The division list will be of interest.

AYES (34).

Mr. J.H. Arkwright.	Mr. H. D. Marshall.
Mr. R. C. Assheton.	Mr. Joseph Martin.
Mr. George Blake.	Lord Middleton.

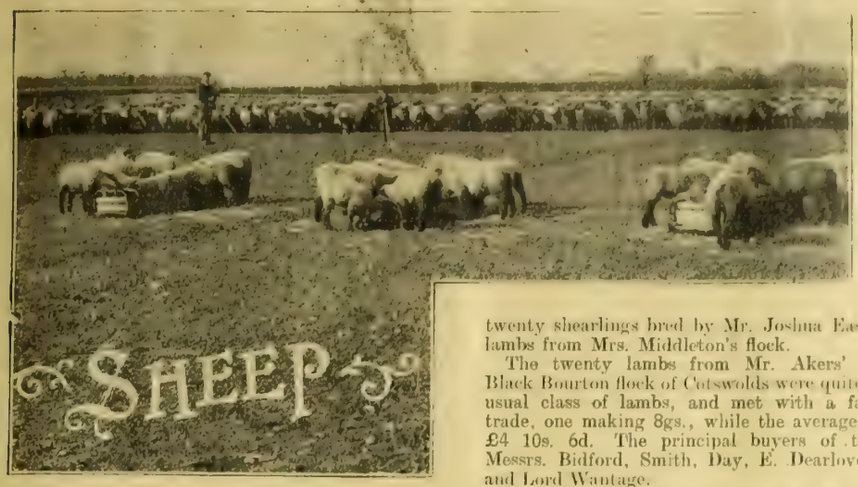
Mr. Hugh Gorringe.	Mr. G. H. Sanday.
Marquis of Granby.	Sir Jacob Wilson.

(Mr. Martin Sutton and Mr. Garrett Taylor did not vote.)

The August beast fair was held at Boston on Monday, and, considering it was Bank Holiday, there was a fairly large attendance. There was a very good show of cattle. Best bullock beef made 7s. 9d. and 8s. per stone, and cow beef 6s. 6d. to 7s. 3d. Cows from £18 to £22 and heifers £15 to £18.



Oxford Great Ram Fair.

This important fixture for the disposal of sires of the Oxford and Hampshire Down and Cotswold breeds of sheep was held on Wednesday in the extensive meadow at the back of St. Thomas's, the use of which was kindly granted by the new owners, Morrell's Trustees, for the purpose. In addition to the rams, somewhere about three thousand stock ewes were penned, and for these there was a good demand, with a consequent great improvement in trade upon that experienced of late at the various fairs and markets, and although the entry was considerably larger than that of last year, hardly any lots remained unsold. The number of rams consigned to the various auctioneers was about an average, and for these also there was a decidedly improved trade, the rise in prices being noticeable all round as compared with recent rates elsewhere. Below we give full details of the various sales:—

Messrs. Franklin, Gale, and Newton.

Messrs. Franklin, Gale, and Newton, auctioneers, of Wallingford, Reading, and Oxford, held their usual annual sale of Hampshire Down and Cotswold rams and ram lambs and stock ewes and store lambs at the above fair on Wednesday last, when the entries included about 211 Hampshire Down rams and ram lambs from the flocks of Mr. Basil Hanbury, Kineton; Mr. John Thomson, Woodperry, Oxford; Mr. Alexander Henderson, M.P., Buscot Park, Faringdon; Mr. C. A. Scott Murray, Hambleden; Mr. W. T. Twidell, May's Farm, Crowmarsh, and others. Also twenty Cotswold ram lambs from the flock of Mr. Henry Akers, Black Bourton, and 1,246 stock ewes, theaves, and store lambs from well-known flocks in the district.

Trade, generally speaking, showed a decided improvement, a rise being noticeable all round on previous market prices, no doubt influenced somewhat by the recent rains. The stock ewes showed the greatest advance in price, and although the entry was larger than usual, a clearance was practically effected. The prices for full-mouth Hampshire Downs ranged from 22s. 6d. to 55s. Details of the various sales of ram lambs are appended.

The first lot offered was twenty Hampshire Down lambs from the flock of Mr. Basil Hanbury, Kineton. This is the first time lambs from this flock have been offered at Oxford fair, but the successes of the flock in the showyard fully recommend it to flockmasters, to say nothing of the excellent strains of blood introduced in the building up of this flock. The majority of the lambs found purchasers at prices ranging up to 6½gs., with an average price of £4 5s.

Forty-nine very choice lambs from the registered flock of Mr. J. Thomson, Woodperry, Oxford, were next offered. These lambs, as in previous years, were very much admired, and a keen competition ensued for nearly every lot, not a single lamb failing to change hands, and Mr. Thomson has also the honour of having top price, and average for the day, 14½gs. being made by one grand lamb, and seven others made over 10gs., the average price being 7gs.

The selection from the Buscot Park Flock, the property of Mr. Alexander Henderson, M.P., were next brought to the hammer, and consisted of fifty very nice lambs, the first five lambs being offered for letting up to October 1st, one of which made as much as 20gs., while the average was £5 19s.

Twenty-five lambs from the Hambledon flock, the property of Mr. C. A. Scott-Murray, met with a very good trade, nearly every lot being disposed of. Lambs from this flock have not been offered at Oxford Ram Fair before, but here again we have a showyard record to recommend them. The average price made was £4 14s. 6d.

A selection of forty lambs from Mr. Twidell's, May's Farm, flock next came to the hammer, and we must say they would have done credit to the old May's Farm Flock, and Mr. Twidell must have spared no pains in re-establishing his flock to obtain such a satisfactory average, £5 18s.

The other Hampshire Down rams offered were twenty shearlings bred by Mr. Joshua East, and six lambs from Mrs. Middleton's flock.

The twenty lambs from Mr. Akers' celebrated Black Bourton flock of Cotswolds were quite up to the usual class of lambs, and met with a fairly brisk trade, one making 8gs., while the average price was £4 10s. 6d. The principal buyers of these were Messrs. Bidford, Smith, Day, E. Dearlove, Hunter, and Lord Wantage.

Among the principal purchasers of Hampshire Downs we noticed the names of Messrs. W. Wiggins, J. P. Franklin, John Brown, Wykeham Musgrave, Joseph Gale, J. Reynolds, Herbert Parsons, E. J. Morse, Edward Stevens, Pettifer, Gask, Case, Lord Wantage, Whitbread, Pether, H.W. Orpwood, Oxford Corporation, Harry Gale, Yearp, William Greening, Sutton, John Gale, A. Henderson, Giles, E. Rowles, H. F. Smith, J. Latham, E. May, H. Izodd, William Frogley, John Thomson, J. Betts, W. Dore Brett, Walter Maidment, Wilkins and Son, H. J. Taylor, H. J. Holtom, E. White, Holt, Barton, Eggleton, Timbs, Lovesay, C. T. Hoare, J. B. Lucas, Colonel Miller, and a great many others.

Messrs. Paxton and Holiday

This firm had, as usual, a large number of consignments from registered Oxford Down flocks, including twenty shearling rams, bred by and the property of the Earl of Camperdown, Weston Park, Shipston-on-Stour. The highest price was 8gs., given by Mr. Rowe, Windrush, Burford, and Mr. Jones, Craven Arms, Salop, and the average was £6 4s. 6d. 23gs. was the top price of the splendid lot of sixty-four Oxford Down ram lambs, bred by and the property of Mr. George Adams, Royal Prize Farm, Wadley, Faringdon. The purchaser was Mr. Whitbread, South Hill, Biggleswade. The average for the sixty-four was £8 13s. 6d. There were forward twenty-eight Oxford Down shearling rams and six Oxford Down ram lambs from the old-established flock of Mr. Edward Gillett, Cote House, Bampton. The highest price of the shearlings was 19½gs., and the average was £8 1s. 9d. Fifty Oxford Down shearling rams, the property of Mr. John Worley, Brize Norton, Faringdon, made an average of £10 7s. 9d. The highest price was 40gs., the purchaser being Mr. Overman, Kipton House, Weasenham, Norfolk. Six Oxford Down shearling rams and twelve ram lambs, bred by and the property of the Hon. R. Hardinge, South Lawn House, Burford, realised an average of 4gs. There were twenty Oxford Down ram lambs and thirty Oxford Down shearling rams from the Heythrop flock of Mr. Albert Brassey, M.P. The ram lambs made an average of £3 19s., and the shearlings £7 2s.; Mr. Large, of Crudwell, Malmesbury, was the purchaser of the highest at 12gs. The top price of the thirty Oxford Down shearling rams, bred by and the property of Mr. Hugh W. Stilgoe, Adderbury Grounds, Banbury, was 42gs., which was obtained for an animal which took a second at the Royal Show, the purchaser being Mr. J. P. Case, Binham Abbey, Wighton, Norfolk; the average was £8 9s. 6d. Messrs. John Bryan and Son, Southleigh, Witney, sent thirty-five Oxford Down shearling rams of their own breeding. The highest price, 28gs., was given by Messrs. T. W. Jefferies and Son, Black Bourton; Sir Michael Hicks Beach, Bart., M.P., was the purchaser of others at 23gs. and 22gs.; and Mr. Houghton, of Ashford-by-Melton, at 18gs.; and the average was £11 1s. Forty Oxford Down ram lambs were forward from the flock of Messrs. T. W. Jefferies and Son, Black Bourton, Faringdon. 25gs., given by Mr. A. Lane, Alcester, Worcestershire, was the top figure, and 17gs. was given by Mr. T. Fane for Captain Gaskell, Kiddington Hall, and 16gs. by Mr. Driver for Mr. W. S. Lardner, of Little Compton; the average was £7 16s. Fourteen Oxford Down shearling rams, bred by and the property of Mr. F. I. Wilsdon, Wotten, Woodstock, made an average of £6 4s. Fifteen Oxford Down ewes and yearling ewes, the property of Mr. Albert Brassey, M.P., Heythrop Park, Chipping Norton, realised an average of 74s. 8d.; and seventy belonging to Messrs. J. Bryan and Son, Southleigh, Witney, made 46s. 8d. per head. Thirty-five Oxford Down ewes, belonging to Her Majesty's Commissioners of Woods and Forests, Potter's Hill Farm, Witney, averaged 44s. 4d.

Mr. A. F. Hobbs.

Mr. Hobbs had a good lot of animals for sale, among which were twenty Oxford Down ram lambs, bred by and the property of Mr. W. J. P. Reading, Langford, Lechlade. The average price was £7 18s. 9d., and the highest 21gs., was given by Mr. Barton, of Norfolk; another made 10½gs., and was purchased by Mr. Alfred Mace, Kelmscot. Twenty Oxford Down ram lambs from Mr. John Wise, Ham Court Farm, Bampton, sold at an average of £6 7s., the top figure being 8gs., given by Mr. J. P. Case, of Bingham, Norfolk. The fifty Oxford Down ram lambs from the flock of Mr. Robert W. Hobbs, Kelmscot, Lechlade, whose sheep have been very successful in the showyard this year, are much sought after. 15½gs., which was given by Mr. Alexander Iles, of Fairford, was the highest; another made 12gs., and was purchased by Mr. Case, and a third was bought by Mr. St. Aubyns, Cornwall, at the same price; the average was £7 2s. 3d. for forty pure-bred Hampshire Down ram lambs. Mr. W. F. Hobbs, Langford, Lechlade, obtained an average of £6 11s. The highest price was 9½gs., and was gien by Mr. Hawkins; nine guineas was the figure at which another was bought by Mr. John Frampton, of Langford Downs.

Messrs. Franklin and Jones.

The consignments of Messrs. Franklin and Jones were rather heavy and comprised—30 Oxfordshire Down ram lambs from the prize flock of Mr. A. H. Wilsdon, Domford Park Farm, Woodstock, highest price, 6½gs.; average, 5gs. Forty ditto from the well-known flock of Mr. W. Arkell, Kempsford, Fairford, highest price, 9gs.; average, 5½gs. Twenty-eight ditto from the old-established flock of the Rev. C. R. Powys, Rofford, highest price, 4gs. Twenty-five pure-bred Hampshire Down ram lambs bred by Mr. J. W. Giles, Gaunt House, Standlake, highest price, 9gs.; average, 5½gs. 1,500 stock ewes, theaves, and store lambs, comprising drafts from a number of well-known flocks. This was the largest draft in the fair, and the prices realised were for Mr. H. Parsons' 60 theaves, 39s. to 42s., 100 ewes, 30s. to 33s. 6d.; Mr. Cook, Beckley, 15 ewes, 35s. 6d.; Mr. H. Kerwood, Woodstock, 27 ewes, 32s. to 32s. 6d.; Mr. G. Hill, Waterperry, 50 ewes, 33s. to 34s., 50 lambs, 29s. to 29s. 6d.; Mr. G. Herbert Morrell, M.P., Streatley, 70 ewes, 30s. to 31s. 6d.; Mr. W. W. B. Sutton, Wilcote, 45 ewes, 40s. 6d. to 42s.; Mr. H. Bartlett, Bletchington, 40 theaves, 41s. 6d. to 45s.; Mr. J. Midwinter, Marcham, 60 ewes, 40s. 6d. to 44s.; Mr. George Fuller, Worminghall, 70 ewes, 36s. to 45s.; Mr. P. Pinnock, Holton, 32 theaves, 46s.; Mr. W. Fuller, Haseley, 80 theaves, 42s. to 44s. 6d.; Mr. E. K. Lenthall, 60 ewes, 38s. to 41s.; Mr. Charles Taylor, Ascott, 50 ewes, 36s. 6d. to 41s.; Mr. B. H. Morland, Sheepstead, 80 ewes, 40s. 6d. to 45s. 6d.; Sir J. Willoughby, Bart., Dorchester, 90 ewes, 28s. to 33s.; Merton College, Radstone Farm, Northants, 40 lambs, 26s.; Messrs. Jessop, Thomley, 20 ewe lambs, 36s. 6d.; Mr. Shrimpton, Baldon, 40 lambs, 26s. 6d. to 29s.; Mr. T. Brown, Wood Eaton, 20 lambs, 29s.; Mr. J. W. Turner, Chiselhampton, 80 lambs, 29s. to 38s.; and others.

Messrs. Acock and Tayler.

Messrs. Acock and Tayler had a good lot of animals for disposal, among which were 20 Oxford Down shearling rams and 20 Oxford Down ram lambs, from the noted prize-winning flock of Mr. W. A. Treweeke, Ryne Hill Farm, Chipping Norton. During this year, at four shows, six first, four second, two third, and one champion prizes have been won, including one first each at the Royal Agricultural Society of England and Bath and West of England Shows. The prices realised for the Oxford Downs were 5½gs. to 10gs., the latter figure being paid by Mr. John Large (Crudwell). Also 10 Oxford Down ram lambs, bred by and the property of Mr. J. H. Large, Crudwell, Malmesbury, and seven Cotswold, Malmesbury, and seven Cotswold Shearling rams, bred by and the property of Mr. J. J. Godwin, Troy, Banbury. The average price for the former was 4½gs., and for the latter 5½gs. The lambs were a fine lot, but few changed hands at from 4½gs. to 6½gs.

Messrs. King and Adkin.

600 stock and draft ewes, theaves, and lambs were consigned to Messrs. King and Adkin, and considerable interest was manifested around the pens during the disposal of the animals. For several of the lots there was a brisk competition, and the whole changed hands at highly satisfactory prices. Theaves realised from 33s. to 39s. 6d.; full-mouthed ewes, 33s. to 38s. 6d.; and draft ewes from 24s. to 30s. Lambs made as high as 33s. 6d., small ones realising 22s. to 25s.

Earl of Ellesmere's Suffolks.

On Thursday, at the Hall Farm, Stetchworth, Mr. George Blencowe, with whom was associated Mr. Ernest Prentice, secretary of the Suffolk Sheep Society, conducted the seventh annual sale of pedigree Suffolk sheep, the property of the Earl of Ellesmere. The phenomenal success attended by exhibits from the Stetchworth flock has been more than maintained during the past season, and gained amongst other honours the Prince of Wales' Challenge Cup (championship of all breeds) at the Southfield Show, after having been "reserved" for the same trophy in 1898, all possible medals and numerous first prizes at the Royal and other leading shows. Every gold medal offered for Suffolk sheep in 1899 has, with one exception, been won by exhibits from this flock, and the other was taken by a ram bought at the

annual sale at Stetchworth in 1894. There was a large company at an excellent luncheon. The only toast was that of "The Queen," very loyally honoured. An adjournment was then made to the sale-ring, where, during a downpour of rain, Mr. Blencowe wielded the hammer. The assembly was, however, protected from the inclement weather, canvas having been erected.

There were catalogued about sixty-six grand shearling and ram lambs, 179 shearling ewes, sixty-six flock ewes, and four Southdown rams. Amongst the shearling ewes sold in lots of five, the top realised was £5 10s. per head for those purchased by Mr. Conrade Webb, of Shudy Camps. He also bought another five at 93s. per head. Mr. C. F. Marriner, of Thorpe Hall, Hasketon, purchased the first five sold, which ranged next highest in price, making 83s. per head. Mr. Marriner gave 81s. per head for another five. Mr. Barnett secured five others at 78s. per head. Mr. Marriner was declared the buyer of five more at 74s. per head, and five others at 72s. per head. Mr. Turner, of Dunmow, gave 71s. per head for five. Two other fives made 71s. per head, Mr. Marriner being the buyer in one case and Mr. Lomas, agent for the executors of the late Mr. H. E. M. Davies, Heringswell Hall estate, in the other. Amongst many other lots prices ranged from 69s., 67s., 66s., 65s., and down to 64s. per head, the buyers including Messrs. Gent (Ditton Lodge), E. T. Marriot (for the Jockey Club), D. K. Long (Great Bradley), E. Deeks and E. Moore, J. Musk (Newmarket), W. Harper (Bury St. Edmunds), J. Gardner (Woodditton), and Towler. Four and five-tooth ewes made 54s. per head, six-tooth ewes 70s. per head, and full-mouthed ewes from 58s. to 57s., and from 56s. to 55s. downwards. The buyers included Mr. Harris Smith (Coggeshall), Mr. Rawlinson, and many others.

The ram lambs formed an important feature of the sale. The top price realised was 40gs., given by Mr. F. C. Paine (on behalf of Mr. H. McCalmont, M.P.), for Bismarck of Stetchworth. Mr. H. Mason, of Necton Hall, Swaffham, was the buyer of another fine ram lamb of the same name at 20gs. Mr. Harris Smith (Coggeshall) gave 18gs. for Stetchworth Chieftain. Mr. G. F. Dawes (Bury St. Edmunds) gave 17gs. for Gunner of Stetchworth. Another ram lamb of the same name fetched 15½gs., Mr. C. Webb (Shudy Camps) being the buyer. Mr. E. Pritchett (Hardwick) gave 15gs. for a similar ram lamb; Mr. Cobb (Saxon Street), 13½gs., which price was also given by Mr. E. M. Fyson, of Higham, for another fine ram lamb. Mr. Gurteen (Haverhill) purchased another at 14gs., and also one at 12gs. Dr. Gibbs, of Scotland, secured one at 14½gs., Mr. Marriner gave 12gs. for another, at which price Mr. H. Gardner was the buyer of one. Mr. J. Burrell (Littlebury) purchased one at 15½gs., Mr. Newman (for Lord North, Kirtling Tower) bought another at 13½gs., and one at 12½gs. Mr. Gent gave 12gs. for one and 11gs. for another. Mr. H. Ling (Braintree) gave 12gs. for one. Others fetched from 10½gs. downwards. A two-shear ram made 7gs., Mr. J. Burrell, of Littlebury, being the buyer. Of three lots of Southdown shearling rams, two fetched 6gs. per head.

First Prize Dorset Horn Ewe, Bred by Mr. E. C. Attrill.

Mr. W. C. Toop's Southdowns.

On Tuesday at Westergate, near Barnham, one of the most celebrated Southdown flocks extant, registered and individually numbered (No. 9 in the Flock Book) was brought under the hammer in the presence of an unusually large and representative gathering of agriculturists. The flock was the property of Mr. W. Toop, the well-known Southdown breeder, whose name has appeared with astonishing regularity in the list of prize-winners at the leading shows for the past sixteen years. Mr. Toop is now relinquishing sheep-breeding, and the dispersal of his flock, numbering 370 ewes and 70 rams and ram lambs, was entrusted to Mr. C. Stride, of the Chichester Auction Company. Some remarks on the flock have already appeared in our columns, so that it is unnecessary to enter into a description of it here. Mr. Toop included every sheep he owned in the catalogue, and every lot was sold without reserve. Prior to the commencement of the business of the day there was a luncheon, over which Mr. Newton Clayton (Pagham Harbour Company) presided. At the conclusion the toast of "The Queen" was loyally honoured, and the chairman subsequently proposed "The health of Mr. William Toop," wishing him long life and happiness, and expressing a hope that he would have a successful sale. He [illegible] evidences of early morning. They had always a wealth of mutton, and they knew how successful Mr. Toop had been as a prize-taker. They could remember, too, that the heaviest pen of lambs [illegible] to Smithfield, weighing 5cwt., were bred by Mr. Toop. As an exhibitor they all liked him, and he (the chairman) had had reason to fear his [illegible] The toast was drunk with hearty cheers for Mr. and Mrs. Toop and family. Mr. Toop afterwards made an appropriate response, and mentioned that the ewes had seen no artificial food since April.

Before commencing the sale the auctioneer made a short speech, during which he mentioned that the prizes won by Mr. Toop's flock had never been surpassed for number or importance in the history of the Southdown breed. He hoped the buyers that day would give such prices as would be some recompense for Mr. Toop's enterprise and years of toil, and would at the same time afford encouragement to other breeders. The sale was then proceeded with, and a record of the prices, with the names of purchasers, will be found below. The highest price paid for rams, it will be noticed, was 41gs. (twice). The sale realised altogether a total of over £1,650, and the average prices for the sheep worked out as under:—Yearling ewes, £3 10s. 10d.; four tooths, £3 5s. 5d.: six tooths, £3 0s. 6d.; full mouth and over-aged ewes, £2 15s. 5d.; ewe lambs, just under £2; yearling rams, £13 19s. 5d.; stud rams, £14 7s.; and ram lambs, £4 13s. 3d. The following is a list of the prices realised, purchasers, etc.:—

Yearling Ewes.—Mr. Newton Clayton (Pagham Harbour Company) purchased the first pen of four yearling ewes at £5 5s. each; also two pens of five at £3 10s. apiece; Mr. Bethell (for Mr. Cosmo Bonsor, M.P.), three at £4 10s. each; the Duke of Richmond and Gordon, five at £4 each; M. Petit (France), five at £3 15s. apiece and ten at £3 10s. apiece; Mr. F. H. Baxendale ten at £3 10s. each, and ten at £5 5s.; Mr. P. Saillard five at £3 5s.; and Count Alexander Munster, Uckfield, seven at £2 17s. 6d. each.

Four-tooth-Ewes.—Mr. Newton Clayton bought five at £5 5s. each; Mrs. Stephenson Clarke, Brook House, Haywards Heath, five at £3 10s. each, and ten at £3 5s.; Sir Joshua Rowley five at £3 5s., five at £3 3s., fifteen at £3, and six at £2 15s. each; M. Petit five at £3 5s.; and Mr. Robison ten at £3 each.

Six-tooth-Ewes.—Mr. Newton Clayton purchased five at £4 each; Mr. Lamb five at £3 5s., and five at £3 each; Mr. Saillard five at £3 5s., and five at £3 each; Mr. Bethell five at £3 5s.; Mr. C. F. Field, Felpham, five at £3; Mr. Robison five at £3; Lord Leconfield, Petworth Park (represented by Mr. Edgar) five at £3; Mr. W. Spiers, Earnley, ten at 55s., and nine at 50s. each.

Full-mouth Ewes.—Mrs. Stephenson Clarke bought five at £3 10s., five at £2 17s. 6d., and five at £2 12s. 6d.; Mr. Bethell five at £2 15s.; Mr. Lamb five at £2 12s. 6d.; Mr. C. F. Field five at £2 12s. 6d.; Mr. Beeching five at £2 10s.; and Mr. H. M. Simmons (Eastbourne) seven at £2 7s. 6d. each.

Ewe Lambs.—Mr. Newton Clayton purchased three at £4 7s. 6d. each, five at £2 10s., five at £2 8s., and five at £2 2s.; Mr. Bethell, five at £2 2s. 6d., and five at £2; Sir Henry Fletcher, Bart., M.P., five at £2 2s.; Mr. Warren, East Preston, ten at £2; Mr. Robison, five at £1 18s., fifteen at £1 17s., and five at £1 11s. each; Mr. H. M. Simmons fourteen at £1 15s., five at £1 13s., five at £1 12s., and five at £1 10s.; and Mr. Beeching, five at £1 13s. each.

Yearling Rams.—Mr. Bethell (on behalf of Mr. Cosmo Bonsor, M.P.) purchased Woodcote 11th, at 41gs.; Mr. Gould (for New Zealand) bought Woodcote 14th at 20gs.; Mr. C. R. Scrase-Dickins, J.P., Horsham, Woodcote 12th, at 19gs.; Mr. Warren, East Preston, Woodcote 15th, at 16gs., Woodcote 17th, at 14gs., and Woodcote 13th at 13gs.; Count Munster, Woodcote 8th, at 15gs.; Mr. J. A. Miller, Michel Grove, Brighton 20th, at 14gs., Brighton 26th, at 12gs., Toop's Cambridge 56th, at 10gs., and Woodcote 9th at 8½gs.; Sir J. P. Milbanke, Bart., V.C., Eartham House (represented by Mr. Smart), bought Toop's Cambridge 52nd, at 13gs.; the Hon. W. F. D. Smith, Woodcote 16th, at 15gs.; Lord Iveagh secured Brighton 24th, at 13gs., Brighton 19th at 10½gs., and Toop's Cambridge 53rd, at 10gs.; Mr. John Langmead bought Toop's Cambridge 55th at 13gs.; the Hon. H. Cubitt, M.P., Birtley, Guildford (represented by Mr. Messenger) purchased Toop's Cambridge 58th at 12gs., Woodcote 10th at 11gs., Brighton 22nd at 10½gs., and Toop's Cambridge 57th at 9gs.; Lord Wolverton bought Brighton 21st at 10gs., and Woodcote 18th at 10gs.; Mr. Robison bought Brighton 25th at 10gs.; M. Petit Brighton 23rd at 10gs., and Mr. R. Coote Toop's Cambridge 54th at 4½gs.

Stud Rams.—Mrs. Stephenson Clarke bought Westerton 5th at 41gs.; Mr. H. M. Simmons Toop's Cambridge 49th at 26gs.; Mr. Edward Carter, Isle of Wight, Brighton 16th at 20gs.; M. Petit Brighton 12th at 10½gs.; Mr. Robison, Westerton 4th at 7gs.; and another at 5gs.; Mr. R. Coote Brighton 13th at 5½gs.; Mr. Walker Toop's Cambridge 45th at 4gs., and Mr. John Langmead Brighton 18th at 3½gs.

Ram Lambs.—The Duke of Northumberland purchased one at 11gs.; Colonel Hall and one at 7gs.; Mr. J. Tompkins one at 10gs., and one at 6gs.; the Hon. H. Cubitt, M.P., one at 8½gs., two at 5½gs., and one at 4½gs.; Messrs. Woodman Bros., Sompting, one at 7gs. and one at 5½gs.; Sir J. P. Milbanke, one at 5½gs.; Mr. Pyle one at 4½gs., one at 4gs., and one at 2½gs.; Mr. Robison one at 4½gs., one at 4gs., and one at 3gs.; Mr. Woodcock, Haslemere, one at 4½gs., and one at 3½gs.; Mr. John Langmead, one at 4½gs.; Sir Henry Fletcher, Bart., M.P., one at 4½gs.; Mr. Warren, East Preston, one at 4gs., Mr. Hugh Penfold, Selsey, one at 3½gs., one at 3gs., and one at 2½gs.; Colonel Featherstonhaugh, three at 3gs. each; Mr. Bethell one at 3½gs.; Mr. Beeching one at 2½gs.; and Mr. W. Spiers one at 2½gs., and four at 2gs. each.

Mr. P. L. Mills's Shropshires.

The annual sale of Shropshire sheep belonging to Mr. Philo L. Mills, J.P., of Ruddington Hall, took place at the Elms Farm, Ruddington, on Tuesday. It can scarcely be said that the attendance was as large as is usually the case, probably the most potent factor in this result being the exceedingly unfavourable state of the weather. Considering the excellent quality of the sheep and the amounts given for them in former years, the prices must be regarded as low, few prominent sheep-breeders being present. The catalogue comprised thirty-four Shropshire rams and eighty shearling ewes, the prices for rams averaging £9 10s. and for ewes £2 19s. 6d. The ewes sold more uniformly, but the prices for the rams, in view of the amount spent on the sires, was, as has been already said, scarcely so high as might have been anticipated. A shearling ram bought by Mr. Mitchell for shipment to Australia realised the highest sum of 30gs., this being for the well-known sire Odstone Peacemaker, belonging to Mrs. M. Barrs. The next highest price for a ram was 13gs., given by Mr. Humphreys on behalf of Mrs. Perry Herrick, of Beaumanor, Woodhouse Eves, this being from the sire Joe Chamberlain. Eleven and a-half guineas were paid by Mr. Abel, of Desford, for a shearling ram, 8½gs. by Mr. J. J. Rooke, of Weldon, and an equal amount by Mr. Guest, of Norwood Farm, Mansfield. The remainder realised from 6gs. to 9gs. Of the ewes Mr. P. A. Muntz, M.P., bought a pen at £4 12s. 6d. per animal. Mr. Tom Potter, of Daybrook, secured five lots, comprising twenty-five ewes, at amounts ranging from £2 17s. 6d. to £3 each; and Mr. Humphreys, on behalf of Mrs. Perry Herrick, purchased thirty ewes at practically the same prices; Mr. W. H. Bradwell two lots at £2 15s. and £2 17s. 6d. respectively, and Mr. Guest one pen at £3 per animal.

Mr. Henry Lambert's Hampshire Downs.

The fifteenth annual sale and letting of pure-bred Hampshire Downs, bred by Mr. Henry Lambert, from his old-established flock at Babraham, was conducted by Messrs. Chalk on Friday last, at Cambridge. The catalogue comprised seventy-eight ram and ram lambs of excellent quality. There was a fair number of buyers present, and the prices were satisfactory, £579 being realised by the sale. The sixty-two lambs were offered first, and sold at prices ranging from 5gs. to 14gs. Only three failed to find a buyer. Lambs were secured by Messrs. Seabrook (Berden), W. C. Emson, R. J. Clayden, Nockolds (Saffron Walden), C. Beadle (Arkesden), G. H. Francis (Longstanton), Howard (Matching), R. Brown (Hundon), Symonds, Achurch (St. Neots), Cullen, Sewell, A. Gee (Shudy Camps), Laidlaw (Duxford), Turpin (Sudbury), Thomas, E. T. Chalk, Warren (Finchingfield), Middlehurst (Great Chesterford), Hughes (Hinxton), F. Dawson (Bourn), Purkis, Sheldrick, C. E. E. Cooke, Graham, and Christmas. The shearling rams made from 5gs. to 8gs. each, the purchasers being Messrs. G. H. Smith, Dawson, E. Pigg, A. Gee, Graham, Fulcher, Purkis, and Christmas.

The Sutton Hall Suffolks.

The late Mr. William Waller's flock of pure-bred Suffolk sheep, which is one of the oldest flocks of the breed in the country, came under the hammer at Sutton Hall on Wednesday, the auctioneers being Messrs. Garrod, Turner, and Son, Ipswich, in connection with Mr. Ernest Prentice, secretary of the Suffolk Sheep Society. Over 1,500 choice animals came into the ring. The flock had been in existence since 1790. It was established by Mr. William Waller, who purchased the Sutton Hall estate in 1788, and was subsequently carried on by his son, and then by his grandson, the late Mr. Thomas Waller, for forty-four years. Sutton Hall came into the possession of the late Mr. W. N. Waller in 1890, and this gentleman did very much to improve the flock. The dispersal of such a high-class flock naturally attracted a good deal of interest on the part of the owners of Suffolk sheep and agriculturists generally. Mr. Hugh Turner, in opening the sale, remarked that the entire flock was to come into the ring that afternoon. Three weeks ago it had not been decided whether the flock should be dispersed or not, so that the animals which had to be offered would come into the ring without any previous making up. This fact might tell against the prices somewhat, but each lot would be offered without the slightest reserve. The history of the flock had been prepared by his friend, Mr. Ernest Prentice, and would be found in the catalogue, and what was stated there might be relied upon as being absolutely correct.

The sale was then proceeded with, and, as will be seen, the prices were on the whole satisfactory. 100 shearling ewes averaged 64s. 5d., Mr. Walter Mickes paying the top price of 76s. for the first pen, and Mr. George Woodward taking the second at 72s. 6d. Ninety two-shear ewes averaged 69s. 2d., Mr. Alfred

Smith securing the first pen at 80s. apiece, Mr. John Collins (for Lord Rendlesham) taking two scores at 74s. and 71s. Ninety-three three-shear ewes averaged 74s. 9d., the first lot of ten, decidedly the pick of the basket, being purchased by Mr. W. J. Asplen (Foxton Hall) at 97s. 6d. The two following lots went to Mr. S. W. Slater at 82s. 6d. apiece; 140 four-year-old ewes averaged 55s., Mr. C. T. A. Robertson buying the first pen at 70s., Mr. Ward (for Mr. E. Brooke, Ufford) taking one pen at 66s., and Mr. Asplen and Major Cobbold the succeeding pens at 63s. Ninety five-year-old ewes averaged

First Prize Dorset Horn Ewe, Bred by Mr. C. Attrill.

42s. 4d. The ewe lambs were next offered, the first pen of very choice quality, and wonderfully well grown for March lambs, realised 57s. to Mr. Martin Slater, Weston Colville, the two following pens going to Mr. Augustus Harvey at 51s. to 40s. As to the wether lambs, Mr. Martin Slater took the best pen at 37s., and Mr. Walter Makens and Mr. E. J. Cheney each purchased five lots, the average for 400 being 28s. 6d. With respect to the rams, five shearlings made an average of £5 17s. 6d., Mr. S. R. Sherwood taking the best at 13gs. Two-shear and three-shear rams made up to 6½gs.

Sale of Sir James Blyth's Southdowns and Jerseys.

Two of Sir James Blyth's sons, and also his principal agent, having gone to the war in South Africa, Sir James decided to relieve himself of some of the responsibilities which had fallen on him by disposing of the whole of his Southdown sheep (excepting the lambs) and about thirty Jersey heifers, the produce of the years 1898 and 1899. The sale took place at Blythwood Farm, Essex, on Wednesday, and was attended by a large and distinguished company. Among others present with Sir James Blyth and members of his family, were the Gaekwar of Baroda, Lord Rookwood, Lord Northbourne, Mr. Tresham Gilbey, Colonel Walters, and Colonel M'Calmont; while amongst other purchasers represented were the Duke of Marlborough, Lord Calthorpe, and the Bishop of Ipswich. A short description of Sir James Blyth's famous Southdowns and Jerseys appeared in a recent issue under "Stock and Show Notes," so that we need not go into details concerning it here.

A large company assembled at luncheon before the sale, when Sir James Blyth gave the toast of "The Queen," which was enthusiastically honoured.

The Gaekwar of Baroda, in replying to the toast of his health, proposed by Lord Rookwood, said he would not make a political speech, but would only say that their hearts and feelings in India were always loyal to England and to her service, and that their service on every occasion would be at Her Majesty's command. (Cheers.) With regard to agriculture, he said that if we were to examine the prevailing practice in India, or scan the treatises written by Hindus on the subject, we should find that the establishment of a Royal household in that country was not considerd complete unless a sufficient number of cattle were attached to it. We should hardly find a native State which did not maintain more or less cattle. They maintained a certain number in Baroda. The objects of this custom were manifold, the chief of them being to supply the Palace with pure and fresh milk, and to have ready at hand well-bred animals for military purposes. The Goojerat, Malura, and Mysore cattle were the best in India, and he suggested to Sir James Blyth whether it would not be worth his while to import some Gir cows from that country. It was a great agricultural country, and took a great interest in everything that concerned agricultural animals. He himself encouraged model farms and cattle shows, and had given facilities for the better breeding of stock. (Cheers.)

Lord Northbourne, in proposing the health of the Chairman, thanked Sir James for the interest he had taken for many years in agriculture, the greatest, best, and noblest of English industries. Sir James might have succeeded, or he might have failed, in the part he had undertaken for agriculture, but he was one of those who, if the worst came to the worst, would "die biting." (Laughter and applause.) He would like to make reference to another matter connected with Sir James Blyth. When General Baden-Powell, the hero of Mafeking, went out to South Africa, he was asked what sort of a place he would like, and replied that he should prefer a "tight corner." They all knew that two of Sir James's sons, when in tight corners, did their best according to their ability, and it was no fault of theirs that they happened at the present time to be the guests of ex-President Kruger. Everyone hoped that they would return to the old country in the best of health. He asked the company to drink the health of Sir James Blyth, and also his sons, who were noble prisoners of war. The toast was drunk with hearty cheers, a special one being added for "the boys."

Sir James Blyth, in acknowledging the honour paid him, said that certainly if the sympathy of friends in England would bring his boys home they would be quick'y here. He was really thankful for that sympathy. Although his boys were only troopers, upon the news of their capture being brought to the knowledge of the Queen Her Majesty wrote, through Sir Fleetwood Edwards, hoping that he would get his sons safely home again. (Applause.) Sir James also stated that while the Southdown sheep were to be sold with the Jersey cattle, the lambs were to be kept in order that when his sons returned the breeding of the stock might still be carried on.

The company then adjourned to the sale yard, where Mr. Thornton, of Prince's Street, Hanover Square, wielded the hammer. The sheep were put up in pens of five, and good prices were realised. A pen of five splendid yearling ewes, marked out for their excellent condition, were sold after a keen competition to the Prince of Wales at 220s. each; Mr. Whittaker Wright bought another pen at 95s. each; Lord Northbourne secured a pen at 82s. each; Colonel Walters gave 85s. and Sir Savile Crossley 81s. each for pens. The top figure obtained for two-year-olds was 230s., and this was paid by Mr. Jeremiah Coleman for a pen which had taken firsts in 1899 at the Oxfordshire, Essex, Tunbridge Wells, and Tring Shows. Mr. Whittaker Wright gave 160s. each for another pen which took third prize at the Bath Show. Dr. Herbert Watney, of Pangbourne, made a record for the sale in giving 320s. each for a pen of five beautiful three-year-old ewes, all by Sir James Blyth's ram. These animals in 1898 took firsts at Oxfordshire, Royal and Tunbridge Shows. The auctioneer mentioned that this was the highest price obtained for some time. The Hon. L. Johnson gave 81s. for two pens of five each. The best pen of four-year-olds was secured by Colonel McCalmont at 210s. each; Mr. Whittaker Wright obtained the next best pen at 95s. each. Pens of aged ewes were bought by Mr. Reginald Halsey at 68s., Mr. Johnson at 66s., Colonel McCalmont 66s., Dr. Watney 65s. each. Mr. Thomas Bradridge, of Great Barfield, secured the pick of the rams, a yearling, by Royal Leicester, for the splendid price of 23gs. Sir Francis Montefiore gave 20gs. for a two-year-old by the same sire, and Mr. Halsey gave 20gs. for a yearling by Blyth's, and Lord Colthorpe gave 19gs. for a yearling by Count, and Mr. Johnson gave 16gs. for a ram by the same sire.

First Prize Dorset Horn Ewe, Bred by Mr. L. C. Attrill.

The following is a list of the prices realised and particulars of the Jersey cattle:—

Mr. J. A. Fielden's Suffolks.

The entire flock of pure bred Suffolk sheep, the property of Mr. J. A. Fielden, Upper Hare Park, was offered for sale by auction on the 3rd inst. by Mr. George Blencowe, of Bury St. Edmunds. Mr. Fielden's name has not been brought very prominently before the public in connection with the choice Suffolk sheep which have been reared with much care and judgment on his Suffolk estate, for the reason that this gentleman has not entered the competitive arena, but at the last inspection, 1898, the flock was placed, in Class 1, "very good." The importance of the sale attracted a considerable number of residents from a wide district, but many gentlemen were doubtless prevented from attending in consequence of the stormy character of the weather. About 800 head were offered, including 40 rams, 170 shearling ewes, 360 flock ewes, and 130 ewe lambs. Mr. Geo. Blencowe, in a few introductory observations, expressed the satisfaction he experienced in having such a remarkably fine collection of Suffolk sheep to offer on that occasion. The entire flock was brought into the market without the slightest reserve, in consequence of the estate having been disposed of. He had heard from experienced gentlemen, who had inspected the animals in the pens that day, expressions of approval of the high quality of the sheep. The flock was founded quite regardless of expense, the best rams that could be found having been purchased from time to time as additions to the flock, and he must say that the flock did his friend Mr. John Looker the highest credit.

The shearling ewes were first offered, the first lot of ten being secured by the Marquis of [illegible] at £4 7s. 6d. each. Mr. Tallent, West Acre, bought another pen at £4. Mr. John White (for Mr. E. J. Johnstone, Rougham Hall) two at £3 17s. 6d. and £3 12s. 6d. respectively, Mr. S. W. Slater, Dottered Hall, Balsham, [illegible] another pen at the latter figure. 170 shearling ewes made the satisfactory average of 70s. The two-shear ewes also sold well. Mr. Herbert Garrad, Chevecley, bought one pen at £5, and Mr. Tallent one at £4. 80 offered averaged £3 12s. 6d. [illegible] ewes averaged 74s., Mr. G. F. Townsend giving £7 each for one pen of ten, for Major E. W. Baird, Exning, and £4 for another. The full-mouthed ewes numbered 180. Mr John Barnett, Rougham, taking one pen at £4. Mr. [illegible] another at £4 7s. 6d. [illegible] 59s. 6d. There were 130 ewe lambs, Major Baird purchasing a pen at 55s., Mr. Cranfield another at [illegible]s., Mr. J. Webb, [illegible], at 45s., the average of the lot being 42s. 2d. A [illegible] ram was bought by Mr. G. Dacks, [illegible]; Mr. Tallent a shearling ram at 13½gs., and Mr. Rayment,

Old Sampford, another at 9gs., the shearlings averaging £10 6s. 6d. Mr. Rayment gave 11½gs., for a ram lamb, Mr. W. Looker, Clenchwarton, securing another at 12gs., Major Baird one at 13½gs., Mr. Cranfield one at 10gs., Mr. Rayment one at 14 gs., and Mr. R. Barclay, Higham, one at 10gs., the 35 offered averaging £8 15s. 9d.

Mr. T. S. Minton's Shropshires.

Notwithstanding the fact that the weather was as wretched as it is possible to imagine, rain falling steadily without intermission through out the day, a large and representative company assembled at Montford on Thursday, on the occasion of Mr. T. S. Minton's twentieth annual sale of Shropshire rams, conducted by Messrs. A. Mansell and Co., of Shrewsbury, and some capital prices were obtained. Prior to the sale Mr. and Mrs. Minton entertained the visitors to a capital luncheon. The following were the prices realised:—Two-shear ram: Montford Judge, 150gs., Mr. Milton. Shearling Rams, 27gs, Mr. Boxendale; 37gs., Mr. Balentine; 40gs., Mr. Denstone Gibston; 20gs., Mr. Farr; 13gs., Mr. Ward; 11gs., Mr. J. T. Nickels; 19gs., Mr. E. Nock; 19gs., Mr. Cartwright; 9gs., Mr. A. S. Berry; 8gs., Mr. Bowen; 28gs., Mr. T. H. Moore; 20gs., Mr. J. J. Bibby; 14gs., Mr. Brocklehurst (Kempstone); 10gs., Mr. Groom; 8gs., Mr. Davies; 10gs., Mr. Smith; 15gs., Mr. Jenks; 20gs., Mr. Juckes; 9gs., Mr. Ratcliffe; 8gs., Mr. A. E. Mansell; 8gs., Mr. Morgan; 10gs., Major Heber-Percy; 7½gs., Mr. Balentine; 8½gs., Mr. R. Brown; 9gs., Mr. Ward; 6½gs., Mr. Fletcher; 6½gs., Mr. Ratcliffe; 8gs., Mr. W. W. Timmis; 9gs., Mr. Miller; 7½gs., Mr. Ratcliffe. Stock rams: 11gs., Mr. Richards; 9gs., Mr. W. W. Timmis.

The Norton House Shropshires.

A fact which is acknowledged by breeders of Shropshire sheep is that the breed partly owes its pre-eminence to the skill, the industry, and the high aims of Mr. John Harding, of Norton House, near Shifnal. It is some years since Mr. Harding commenced to lay a foundation for the flock he now possesses, and which stands in the very front rank of famous Shropshires, and the names of the best sources are mentioned in its recorded history as those from which Mr. Harding secured its first representatives. The annual sale of Shropshire rams took place at Norton House on Friday, when twenty-five rams were disposed of. All the ewes had previously been sold for exportation to America, and so none were now offered. Before the sale, a luncheon was partaken of by a large company, presided over by Mr. W. H. Foster of Apley. Mr. Mansell made some introductory remarks at the ring, after which the sale was proceeded with. The following were the prices realised, purchasers, etc.:—Shearling rams; Mr. T. Fenn, 35gs.; Mr. J. Grant, 18gs.; Mr. Rooney, 29gs.; Mr. T. Fenn, 20gs.; Mr. Allen, 16gs.; Mr. Rooney, 13gs.; Mr. Morgan, 8gs.; Mr. Bell, 7gs. and 7gs.; Mr. T. Cooper, 7gs.; Mr. Jones (to let), 8gs.; Mr. Morris, 8gs.; Mr. Reynolds, 6gs.; Mr. T. Davies, 14gs.; Mr. R. H. Gwynne, 26gs. Pasture rangers—Shearling rams: Mr. Fykyn, 8gs.; Mr. W. H. Foster, 13gs.; Mr. Goodall, 6gs.; Mr. Bowen, 9gs.; Mr. Roach, 8gs Eight yearling Hereford steers, bred close to Leominster, realised £11 15s. each, and another eight bred in Herefordshire £10 15s. each.

The Thorpe Hall Shropshires.

The annual sale of rams and ewes, the property of Mr. W. F. Inge, was held on Tuesday, at Thorpe Hall, Tamworth, Messrs. Lythall and Walters being the auctioneers. Most of the leading breeders, in addition to a large number of local farmers, attended, and the result was very satisfactory. The highest price was 100gs., given jointly by Dr. Wall and Mr. A. Tanner for a ram that was exhibited in the third prize pen at York. Other prizes were: 25gs. (Duke of Sutherland), 21gs. (Lady de Rothschild), 21gs. (E. L. Driver), 18gs. (R. Bach), 14gs. (Howard P. Ryland), 13gs. (S. F. M. Nevett), 11gs. (T. Stelfox), 10gs. (Lord Moreton), 10gs. (H. Hellaby). Ewes made 52s. 6d., 60s., 60s., 60s., etc.

Mr. J. A. Hempson's Southdowns.

The well-known flock of pure-bred Southdowns, the property of Mr. J. A. Hempson, was sold by auction on Thursday last by Messrs. John Thornton and Co., at Erwarton Hall, Ipswich. The weather was very inclement, rain falling heavily while the sale lasted, and the attendance was smaller than was expected. The sheep were a grand lot, and there was a fair demand throughout. The yearling ewes made £3 7s. 6d. each, the principal buyers being Lord Braybrooke, the Hon. L. Johnstone, and Sir Joshua Rowley. The two and three-shear rams made nearly £3 5s. each, Col. McCalmont and Mr. Miller Hallett being the largest purchasers. For the full-mouthed ewes Mr. W. H. Richardson and Mr. Garrett Taylor were the chief bidders, and they made from 48s. to 71s. The ewe lambs were a nice lot, and realised £1 16s. each for nearly 160 head, Mr. C. W. Adeane and the Hon. L. Johnstone taking some of the best lots. The rams sold fairly well, the highest price being 20gs. for lot 11 (Hon. L. Johnstone), and the same price for lot 13 (F. H. Jennings). The twenty rams averaged £11 16s. 9d., and the twenty-six ram lambs £3 11s. 8d. The total of the sale was £1,977 6s. 6d.

Mr. C. Coles's Hampshire Downs.

The annual letting and sale of Hampshire Downs belonging to Mr. Cary Coles took place on the premises at Manor Farm, Winterbourne Stoke, on the 3rd inst., a good business company being present, who partook of a capital luncheon, at which Mr. H. Andrews presided. Messrs. Waters and Rawlence were the auctioneers. Business commenced with the letting of eight ram lambs at an average of £26 10s., the chief prices being No. 6, hired by Mr. Drake at 70gs.; No. 1, by Mr. R. Coles, at 48gs.; others by Messrs. J. Kirby, Castleman, and Bugg, at 17gs. The selling lambs were disposed of very evenly, the result being eighty-three lambs let and sold at an average of £11 3s., very many of the lots ranging from 19gs. to 10gs., at which figures the principal buyers were Messrs. R. Coles, H. Andrews, Compton (for Sir E. Antrobus), Chalker, J. Dean, Harford, J. Hooper, W. Green, Gunning, Keene, Lodder, C. Notley, Rycroft, M. Wallis, H. Waters (for Lord Lawrence), Willis, Wake, W. C. Young, etc.

Mr. W. C. Young's Hampshires.

On Monday Messrs. Waters and Rawlence conducted the annual letting and sale of Mr. W. C. Young's Hampshire Downs at Stratford-sub-Castle. The small but very business-like company who defied the extremely wet day were rewarded by having placed before them one of the grandest lots of ram lambs which Mr. Young has ever brought out, and such as no amount of wet could injure in appearnce. A capital plain luncheon was first enjoyed, at which Mr. J. Carpenter presided, and on repairing to the sale ring, the company found that a welcome (if rough-and-ready) shelter from the driving rain and wind had been erected. Six lambs were let, as follows:—No 1 to Mr. Hurford (for Mr. T. F. Buxton) at 74gs., No. 2, Mr. C. Coles, at 32gs.; No. 3, Mr. A. F. T. Drake, at 22gs.; No. 4, Mr. Mitchell (for Mr. J. Bonham-Carter), at 20gs.; No. 5, Mr. Dibben, at 16gs.; and No. 6, Mr. S. H. Allen, at 24gs.; average, £33. Seventy-four lambs for sale followed, all of which were sold (except three) at from 20gs. to 5gs., Mr. W. M. Harris buying at 20gs., Mr. H. Lambert at 15gs., Mr. Castleman at 14gs., Mr. J. Flower at 12½gs., Mr. F. Gay at 11½gs. and 11gs., Mr. Hall, for Lord Carnarvon) at 11gs., Mr. Goldsmith at 10gs., Mr. Carpenter at 10gs., Mr. Mitchell at 10½gs., the other principal buyers being Messrs. G. Blake, J. Gay, Williamson, Jno. Waters, Mackrell, Wyatt, Besent, J. Futcher, J. Dean, C. Gay, P. King, and F. Mills, the average of seventy-seven lambs let and sold being £10 5s.

Bicester Summer Fair.

The annual summer fair at Bicester took place on the 4th inst., and although the stormy weather of the previous evening promised unfavourably for the event, the atmospheric conditions were fine. The sheep pens, as usual, were situate in King's End, and the attendance of purchasers was good, though not equal to that of last year. The falling off may be accounted for by the fact that several other important fairs were held on the same day. Satisfactory prices were realised. Messrs. Paxton and Holiday, auctioneers, Bicester, offered for sale about 3,368 sheep and lambs, which is slightly under last year's numbers, seven rams and ram lambs, and fourteen horses. The highest average price was made by the ewes and lambs consigned by Mr. T. Cole, Hopcraft's Holt, viz., 51s., whilst the highest price given for one animal was paid by Mr. French, Islip, who purchased one of Mr. C. T. Hoare's theaves for 53s.

The Bishopstone Flock.

The annual letting and sale of ram lambs and rams from Mr. J. H. Dibben's well-known Bishopstone Flock took place at the Market House Yard, Salisbury, on Tuesday, a large company being present. The lambs were one of the best lots Mr. Dibben has brought out for several years, and as the result shows were much appreciated, for though no high prices were made there was a capital selling trade throughout, every lot being disposed of. Eight lambs were first let at from 9gs. to 25gs., average 14gs., the hirers being Messrs. A. Edwards at 25gs., Mr. Palmer at 17gs., Mr. W. J. K. Waters at 16gs. and 11gs., Mr. S. Ruddle at 12gs. and 10gs., Mr. Judd at 11gs., and Mr. G. C. Waters at 9gs. The ninety-two sale lambs made from 25gs. to 5gs. (the lower figure being realised in three instances only), and three shearlings and one two-shear rams, 9gs. to 12gs., the average of the whole 104 animals being the satisfactory one of 10gs. The principal buyers were Mr. W. Allen at 21gs., 15½gs., and 14gs., Mr. Corner at 19gs. and 11½gs., Mr. J. Brown at 12½gs., Mr. Dale at 17gs. and 9gs., Mr. Judd at 13gs., Mr. J. A. Harding at 10½gs. and 9½gs., Mr. Miles (for the Hon. Percy Wyndham) at 12½gs., 11gs., 10½gs., 9gs., etc., Mr. C. Notley at 10gs., Mr. Maslin (for Sir R. N. Rycroft) at 11gs., 9gs., etc., Mr. Roper (for Lord Pembroke) at 16gs., 13gs., 11gs., and 9gs., Mr. Rigden (for Sir E. Antrobus and Mr. Matcham) at 13gs., etc., Mr. G. C. Waters at 12½gs. and 9½gs., Mr. Way at 14gs. and 11½gs., Mr. J. K. Waters at 19gs. and 17gs., the lower priced lambs being secured by Messrs. Arnold, Cross, W. H. Brown, Furness, A. T. Gay, Main, W. J. Keevil, Matthews, Mitchell, W. A. Notley, J. Pile, Neal, Sutton, Sidford, Stidson, H. Waters, C. J. Waters, etc. Of the rams Mr. H. P. Taunton purchased a shearling at 12gs., Mr. H. Waters at 10½gs., and Mr. G. C. Waters at 9½gs., Mr. Brieant taking the two-shear at 9gs.

Lincoln Longwool Sheep-Breeders' Sale.

The tenth ram sale of the Lincoln Longwool Sheep-Breeders' Association was held at Lincoln on the 3rd inst. in a field near the racecourse. As last year, the breeders are having two sales, and that of Friday was the first this season. There were 207 rams entered, representing seventeen flocks, as compared with 374 from thirty-four flocks at the corresponding sale last year. With this reduced entry it was decided that all the rams should pass through one ring instead of having sales at two rings simultaneously; and as it turned out, it was fortunate that the attention of buyers had not to be divided, for they were none too numerous. There were several foreign purchasers present, and the exportation demands undoubtedly had a marked effect upon the prices. The best figure of the day was realised by Mr. H. Dudding, viz., 150gs., given by a South American buyer. Another dealer from South America gave 130gs. for one of Messrs. S. E. Dean and Sons' rams. Mr. H. Dudding, of Riby Grove, purchased one of the rams of Mr. H. Smith, jun., of Cropwell Butler, for 110gs., and Mr. J. E. Caswell, of Loughton, gave 105gs. for one of Mr. Tom Caswell's Pointon rams; so it will be seen that breeders were themselves on the lookout for exceptionally useful sheep. As the sale proceeded it was found that the demand was of a limited character, and towards the close many rams were passed at the reserve price of 7gs. The sales were conducted under the regulations of the Association, and Messrs. R. C. Bemrose, R. Fisher, and J. R. Kirkham acted as stewards, while Mr. S. Upton, the secretary, was also in attendance. The following were the principal sales effected:—

Mr. Henry Dudding's, Riby Grove (auctioneers, Messrs. Calthrop and Briggs).—Mr. Taylor, Lord Provost of Dundee, 60gs.; Mr. Church, Buenos Ayres, 50gs., 150gs., and 30gs.; Mr. George Marris, Kirmington, 50gs. The five offered made in the aggregate £357, or an average of £71 8s. each.

Mr. E. J. Howard's, Nocton Rise (auctioneer, Mr. W. A. Richardson).—Mr. Hughes, Liverpool, 10gs.; Messrs. Askren Bros., Frome, 8gs.; Mr. Marriott, jun., Cropwell Butler, 16gs.; Mr. Chatterton, Stenigot, 7½gs. and 14gs.; Mr. R. Wright, Nocton, 7½gs. Others were passed. The six sold made £66 3s., an average of £11 0s. 6d. each.

Messrs. S. E. Dean and Sons', Dowsby Hall (auctioneers, Messrs. Saul).—Mr. Candy, South America, 130gs., 23gs., 36gs., 2 at 20gs. each, 21gs., two at 19gs. each, and 17gs.; Mr. R. Chatterton, Stenigot, 24gs.; Mr. Brownless, South America, four at 20gs. each and one for 18gs.; Mr. H. Dudding, Riby, 77gs.; Mr. Hughes, Liverpool, 21gs.; Mr. Marriott, Cropwell Buler, 20gs.; Mr. J. E. Caswell, Laughton, 52gs. The 19 offered realised in the aggregate £626 17s., an average of £32 19s. 10d. each.

Messrs. R. and W. Wright's, Nocton Heath and Scamblesby House (auctioneers, Messrs T. B. Richardson and Son).—Messrs. Quibell, Newark, 18gs.; Mr. J. E. Caswell, Laughton, 45gs.; Mr. Kennedy, South America, 62gs.; Mr. E. J. Howard, Nocton Rise, 21gs.; Mr. Swallow, Horkstow, 14gs.; Mr. Langdall, 17gs.; Mr. Dows, Carlton, 20gs.; Mr. T. Caswell, Pointon, 90gs.; Mr. James Cartwright, Dunston, 14gs.; Mr. Jones, Dundee, 27gs. and 24gs.; Mr. F. Scorer, 32gs.; Mr. F. Ward, Quarrington, 40gs.; Mr. Langham, 17gs.; Mr. Headland, Potterhanworth, 16gs.; Mr. Fisher, Leconfield, 14gs.; Mr. Nelson, 30gs.; Mr. Groom, 16gs.; Mr. Campion, 15gs.; Messrs. R. and R. Chatterton, 14gs. Twenty were offered, and the lot sold for £568 1s., an average of £28 8s. per head.

Mr. John Pears', Mere (auctioneer, Mr. W. A. Richardson). Mr. Swallow, Horkstow, 85gs.; Mr. Platts, Marr, Doncaster, 14gs.; Messrs. Tomlinson and Hayward, Lincoln, 17gs.; Mr. Atkinson, North Kelsey, 17gs.; Mr. Kennedy, South America, 16gs. and 8gs.; Mr. W. Caswell, North Ormsby, 10gs.; Mr. R. H. Eyre, 9gs.; Mr. Wildsmith, Harmston, 15gs.; Mr. C. Howard, Nocton, 9gs.; Mr. Jackson, Yorks, 21gs.; Mr. Overton, Blankney, 9gs; Sir J. Thorold, Bart., 18gs. The thirteen sold made £265 8s., an average of £20 0s. 7d. each.

Mr. Tom Caswell's, Pointon (auctioneers, Messrs. Saul).—Mr. Jones, Dundee, 48gs. and 34gs.; Mr. Strickland, 20gs. and 18gs.; Mr. J. E. Caswell, Laughton, 105gs.; Mr. Spink, Yorks, 15gs.; Mr. H. Dudding, Riby, 86gs.; Mr. Langham, 17gs.; Mr. Waterhouse, Nottingham, 22gs.; Mr. Benson, 13gs.; Messrs. Chatterton, 15gs.; Mr. Pearson Gregory, Harlaxton, 15gs.; Mr. D. Machin, Worksop, 14gs.; Mr. Church, Buenos Ayres, 38gs. and 16gs.; Mr. Fisher, Leconfield, 50gs.; Mr. H. Machin, 17gs.; Mr. Brocklebank, Carlton-le-Moorland, 15gs.; Mr. Parker, Ingleby, 14gs.; Messrs. Tomlinson and Hay-

ward, 16gs. Twenty were offered, and sold for £617 18s., an average of £30 17s. 4d. each.

Mr. J. E. Caswell's, Laughton, Falkingham (auctioneers, Messrs. Saul).—Mr. C. Clarke, Scopwick, 34gs.; Mr. Chatterton, 26gs. and 11gs.; Mr. H. Caswell, Quadring, 22gs.; Messrs. Tomlinson and Hayward, Lincoln, 14gs.; Mr. H. Clarke, Byard's Leap, 17gs.; Mr. T. Caswell, Pointon, 24gs.; Messrs. Dean and Sons, Dowsby, 25gs.; Mr. H. Goodyear, Bourne, 20gs.; Mr. L. Stephenson, Alford, 17gs. and 10gs.; Mr. Marshall, 13gs.; Mr. Godson, 11gs.; Mr. William Caswell, North Ormsby, 8gs.; Colonel Preston, 9gs.; Mr. W. J. Brookes, Broughton Grange, 12gs.; Mr. H. Smith, jun., Cropwell Butler, 10gs.; Mr. Hincks, 15gs.; Mr. Machin, 9gs.; Mr. Pearson Gregory, 11gs.; Mr. Hughes, 15½gs., 10gs., and two at 9gs. each; Mr. Spilman, 15gs. Twenty-five were submitted, and sold for £395 6s. 6d., an average of £15 16s. 3d.

Mr. Henry Smith, jun.'s, Cropwell Butler, Nottingham (auctioneers, Messrs. T. B. Richardson and Son).—Mr. Joseph Brocklebank, 18gs.; Mr. L. Stephenson, Alford, 8½gs.; Mr. W. Taylor Sharpe, Baumber, 45gs.; Mr. H. Dudding, Riby, 110gs. and 32gs. The five rams sold made in the aggregate £213 10s. 6d., an average of £42 14s. 1d.

Messrs. C. Clarke and Son's, Byard's Leap, Sleaford (auctioneers, Messrs. Hincks and Turner).—Mr. Todd, Kirkby Green, 10gs.; Colonel Preston and Mr. Maltby, one each at 8gs.; and Mr. Spilman, Mr. H. Jackson, Mr. Benson, and Mr. E. J. Howard, each one at 7gs.

Mr. Charles Clarke's, Brookside, Scopwick (auctioneers, Messrs. Hincks and Turner).—Mr. J. Pears, Mere, 10gs.; Mr. L. Stephenson, Alford, 16gs. and 8gs.; Mr. Maltby, 7½gs.

Lindfield Fair.

Fortunately for those whose business led them to Lindfield Sheep Fair on Tuesday, the elements were much more propitious than on the previous day, but whether affected by Bank Holiday or not, the attendance of buyers was smaller than usual. This had the effect of rendering trade somewhat dull, although one or two of the better lots early changed hands at remunerative prices. The number of lambs penned was 9,207, and ewes and tegs augmented that number by 3,365, while there was the usual supply of horses and cattle, in which a fair trade appeared to be doing. While there appeared to be no very great demand, a large proportion of the lambs penned were sold, comparatively few being taken home again. Mr. W. T. Wallis, who is generally amongst the top prices, carried off the "blue riband" of the fair, obtaining 34s. per head for a beautiful pen of 100 lambs. This is a shilling better than the price obtained last year, when both Mr. Wallis and Mr. G. H. Strivens, of Shoreham, secured 33s. a head. Mr. Richard Brown, of Landport, secured 32s. 6d. a head for a very fine pen, while Mr. Harry Willett topped 30s., a price obtained by Mr. Mark Sandford on behalf of Count Munster, of Maresfield Park. Mr. R. Bannister, of Stoneham, just managed to exceed 30s. per head, as did both Mr. James Stacey and Mr. Harry Stacey; while Mr. Holman, of Clayton Court, who obtained 33s., ran Mr. Wallis very close. The average price obtained appeared to be about 27s. Tegs sold fairly well, Mr. J. Burder Powell, of Manfield, again heading the list with 50s. per head, the next best price being Mr. J. Brand, Hooe, an dMr. Simeon Wickens, Danehill, 45s. each. The highest quotation we heard of for ewes was 34s. 6d. per head, a price obtained by Mr. F. Strivens, of Fulking.

Shrewsbury Sheep Show and Sale.

Messrs. Alfred Mansell and Co. held the Shropshire breeders annual show and sale in the Smithfield, Shrewsbury, on the 2nd inst., when about 1,000 pure-bred rams and ewes drawn from the flocks of well-known breeders were penned. The judging was entrusted to Messrs. P. A. Evans and A. Tanner, whose awards were as follows:—Shearling rams (open): 1, Mr. S. F. M. Nevett; 2, Mr. H. Williams; r., Mr. E. Nock; hc., Mr. H. C. G. Parker. Six shearling rams (open): 1, Mr. M. Williams; 2, Mr. S. F. M. Nevett; r., Mr. H. C. G. Parker; hc., Mr. R. R. Raywood. Aged rams (open): 1, Mr. R. Raywood; r., Mr. W. Dickin; hc., Mr. P. Everall. Shearling rams (open to tenant farmers who have not won a prize at the Royal or Bath and West of England Shows): 1, Mr. H. Williams; 2, Mr. S. F. M. Nevett; r., Mr. T. Jones; hc., Mr. R. C. Pryce. Three shearling rams (open to tenant farmers who have not won a prize at the Royal or Bath and West Shows): 1, Mr. S. F. M. Nevett; 2, Mr. T. Jones; r., Mr. H. Williams; h.c., Mr. J. Corden, Mr. T. G. Juckes, and Mr. W. Vaughan; c., Mr. R. C. Pryce. Twenty shearling ewes (open): 1, Mr. R. Thomas; 2, Mr. P. Everall; r., Mr. S. F. M. Nevett; hc., Mr. W. Nunnerley and Mr. R. C. Pryce.

There was a very good attendance of buyers, but harvest operations prevented the gathering from being quite as large as it otherwise would have been. For the best quality of sheep trade was fairly good, but for farmers' sheep it was not so brisk, the sale being held rather early in the season. Rams sold as follows:—Sent by Mr. R. Raywood, Harley, Much Wenlock, 6½gs. to 13gs.; the Duke of Sutherland, Lilleshall, 5gs. to 5½gs.; Mr. S. F. M. Nevett, Yorton, 8gs. to 20gs.; Mr. H. Williams, Newton-on-the-Hill, 8gs. to 25gs.; Mr. H. C. G. Parker, Brockton Grange, 5gs. to 14gs.; Mr. P. Everall, Uckington, 5½gs. to 15gs.; Mr. R. C. Pryce, Broughton, 5gs. to 6½gs.; Mr. T. Jones, Cotwall, 10gs. to 15gs.; Mr. Matthew Williams, Whiston Hall, Albrighton, 9gs. to 21gs.; Mr. E. Nock, Sutton Maddock, 5gs. to 14gs. Ewes: Mr. J. S. Harding, Catstree Farm, Bridgnorth, 45s. to 50s.; Mr. P. Everall, 50s. to 70s.; Mr. S. F. M. Nevett, 55s. to 68s.; Mr. H. Williams, 55s. to 63s.; Mr. T. Davies, Little Ness, 47s. 6d. to 55s.; Mr. R. Thomas, The Buildings, Baschurch, 55s. to 65s.; Mr. W. Nunnerley, Kenwick, Ellesmere, 55s. to 57s. 6d.; Mr. R. C. Pryce, 48s. to 50s. A large number of Shropshire and Clun ewes and wethers changed hands at from 38s. to 45s.

Cirencester Ram Fair.

This fair was held on Tuesday and was well attended, though the supply of mutton and stock sheep was not quite so full as usual. Mutton sold well, best qualities making up to 8d. and 8½d. per lb. Stock ewes, which were not quite up to the customary standard for this fair, made from 34s. to 40s. a head. The bids for rams and ram lambs were fairly good, Cotswolds being in better demand than for the last few years, the top price for this breed being 15gs., the average being from five to eight guineas, with a fairly quick sale. Both Mr. F. Craddock, Eastington, and Mr. W. Houlton, Broadfield, realised 15 guineas. Oxford Downs were in large supply, and sold well. The premier consignment of this breed was fifty splendid shearlings from Mr. James Hobbs's Maiseyhampton flock, which realised an average of £13 6s., the highest price being 50 guineas. Oxford Down ram lambs averaged from five to six guineas, and Hampshire Down ram lambs met a satisfactory sale, one lot, sent by Mr. J. B. Stevens, of Ogborne Street, reaching an average of close on £7.

Tan Hill Fair.

This fair was held on Monday in very wet weather. With the improved prospects of keep, there was a good demand for both ewes and lambs. Prices recovered the drop at Weyhill, and may be quoted about the same as at Salisbury. The number of sheep penned for Mr. T. Lavington's sale totalled about 4,000, a few in excess of last year. The best price for ewes was 48s., and for lambs 31s. 6d. The advance on recent fairs was in some cases about 4s. per head. Two-teeth and four-teeth ewes made from 48s. to 43s., full-mouth ewes 36s. 6d. to 30s., overyeared ewes from 37s. downwards, wether lambs 31s. 6d. to 24s., and chilver lambs 29s. 6d. to 25s. Mr. George T. Smith held his usual sale by auction in the fair, his entry comprising about 1300 ewes and lambs. There was a fair trade, and nearly the whole were sold.

Messrs. Treadwell's Oxford Downs.

A large and distinguished company of farmers and stock breeders assembled at Upper Winchendon on the 1st inst., on the occasion of Messrs. J. and S. Treadwell's annual sale of Oxfordshire Down shearling rams. Although the sale did not realise so much as previous years, the quality of the sheep was quite up to the usual standard of excellence, and purchasers were present from nearly all parts of the country. Mr. Edward Bond, of Thame, was the auctioneer. The leading prices were:—Mr. Sims, for Miss Alice de Rothschild, 57gs.; Mr. Case, Norfolk, 56gs.; Mr. A. J. Balfour, M.P., 32gs.; Mr. J. T. Hobbs, Maiseyhampton, 40gs.; Mr. Roberts, Weedon, 32gs.; Mr. Hubbard, for Mr. Alfred Rothschild, 21gs.; Mr. Edward Sturgeon, Grays, Essex, 20gs.; Mr. J. G. Williams, Penley, 20gs.; Lord Camperdown, 17gs.; Mr. Lyall, 17gs.; Mr. A. Willsden, Dornford Park, 15gs. The whole realised £769 2s. 6d., making an average of £13 9s. 9d., which was slightly below that of last year.

Crieff Wool Fair.

This annual fair took place on Tuesday, but it being the annual show of the Strathearn Agricultural Society, the business this year was principally conducted in the showyard, when it was difficult to obtain the prices going. There was, however, a large number of farmers and wool growers from the Grampian and Ochil ranges, as well as representatives from wool brokers from the principal centres. Business was stiff, and farmers were quite unwilling to sell at the prices offered, but a number of clips changed hands at much the same as last year's rates—blackfaced bringing from 4d., 4¼d., and some cases 4¾d. per lb., while cross clips were selling at from 9s. to 9s. 2d. per stone of 22lb. A large number of the farmers in the district have already consigned their clips to the Edinburgh, Leith, Glasgow, and Perth sales.

The annual general meeting of the Perthshire Central Association for the Prevention of Sheep Stealing was held in Crieff on Tuesday. There was a fair attendance of farmers from the different districts embraced by the Association. The treasurer submitted the annual statement, which showed the finances of the Association to be in a flourishing condition. No recent case of sheep stealing was reported to the meeting.

SHOWS.

Tring.

Since the adoption, eleven years ago, of a "forward" policy, and an enlarged and in all respects up-to-date programme, coincidently with the acceptance by Lord Rothschild of the presidency, and the removal of the show to the beautiful park, the Tring Agricultural Society has enjoyed an unbroken run of success, culminating last year in a record attendance of about 12,000 persons. This year, while all the old favourite features were retained, some especially attractive novelties were introduced, and the sanguine hopes cherished of a larger attendance and a more pronounced success than ever were certainly not unwarranted. Unhappily, the "Clerk of the Weather" interposed his veto. Overnight the elemental indications seemed fairly hopeful. But Thursday morning broke grey and humid, and the appearance of the sky was such an exact counterpart of Bank Holiday morning that experienced showgoers prepared for the worst. Their pessimistic anticipations were, unfortunately, too soon verified. Shortly after ten o'clock occasional spots of rain began to fall, and by eleven a steady rain had set in, and continued without intermission throughout the day, varied only by occasional showers of tropical severity. Even at the critical period of the morning, when the majority of intending visitors would be making arrangements to start for the show, was, of course, fatal to a big "gate." It speaks volumes for the popularity and attractiveness of the gathering that, in spite of the wretchedness which necessarily prevailed everywhere, nearly six thousand visitors passed the turnstiles, to say nothing of those who entered in carriages, and the army of members, officials, and attendants who were admitted by complimentary tickets. The show of stock was considerably above the average in extent and excellence. The six dozen milking cows which had been located in convenient sheds in the Park since Tuesday in connection with the far-famed milk and butter tests, constituted one of the most important features of the show. Their number showed a decrease of nine from the previous year, and of four from 1898. In almost every other department there was a gratifying increase, as will be gleaned from the following statisticts:—Cart horses: 1898, 160; 1899, 135; 1900. 177. Nags: 1898, 65; 1899, 157; 1900, 192. Shorthorn cattle: 1898, 53; 1899, 64; 1900, 91. Jerseys: 1898, 92; 1899, 98; 1900, 115. Sheep: 1898, 55; 1899, 54; 1900, 56. Pigs: 1898, 31; 1899, 26; 1900, 42.

The milk and butter tests, as usual, attracted some of the most valuable and productive dairy cows in England, the contests at Tring, with those at the Bath and West of England Show in May and the London Dairy Show in October, being recognised as the most important in the kingdom. A special prize of £30 is offered for the cow of any age or breed that yields the greatest weight of butter at any two of these shows. This cannot, of course, be awarded until after the next Dairy Show on October 9th. The butter made from the produce of each cow, with all necessary particulars was displayed early in the afternoon on a counter in front of the tent set apart for the contests, and if it did not receive quite so much attention as on other occasions, it was only because the heavy rain and the consequent dripping from the tent quite forbade a lengthened inspection. The full particulars will be published in the customary tabu'ar form shortly, so that it is needless to give more than the list of awards, which appears in its proper place further on. Some new names appear in the list this year, and Lord Braybrooke was not quite so successful as in some previous years. It is gratifying to see tenant farmers figuring prominently in the prize list in the heavy class, Mr. E. Dawe, of Wendover, carrying off both milk and butter prizes, with Mr. A. Bonest second in the former.

The Jerseys are always in strong force at Tring, alike in the tests and in the general classes, and there has probably never been a finer or more meritorious representation of this valuable breed than on Thursday, many of the most famous herds in England being represented. The judges had no complete their onerous labours in these classes until quite late in the afternoon. There were a few local exhibitors, but they do not figure highly in the prize list. Lady de Rothschild received several honourable mentions, but did not win anything more substantial. Among the principal prize-takers were Mr. C. W. Armitage, of Potter's Bar, whose beautiful little fawn, Mulvina III., was placed champion of the show as well as first in her class; Mr. McIntosh, of Haverig Park, Rothbury; Mrs. S. Greenall, of Walton Hall, Warrington; Mrs. A. F. Perkins, of Holmwood; and Colonel McCalmont, of Ross, Herefordshire.

The Shorthorn and other cattle both in the open and local classes, made a [illegible] show, and in build some very useful animals. There was a capital class of Sussex cows, [illegible] Mr. J. E. Spencer, of Hitchin, the second has had very [illegible] success with Magnolia Maid [illegible]. The local class of cows was a large one, but scarcely equal in quality to the open. Mr. de Rothschild was first with a nice red. The heifer classes were not so well filled. There were amongst them, however, some promising youngsters, notably Mr. F. Bal-

ford's white Graceful (three years), and his roan, Winsome (one year), first in their respective classes; Mr. J. H. R. Horwood's White Beauty, first in two-year-old class, and Drayton Beauty (red) second in the 1897 class. Mr. H. Landon did not do so well in these classes as usual, but in the open class for bulls he won first honours with Terrick Lad VIII., which looks like furnishing well. Mr. Bedford's second prize bull, Pilton, was also bred by Mr. Landon. The open class of heifers, Red Polled or Aberdeen-Angus, was a very good lot indeed, the pick being a particularly nice heifer shown by Mr. R. P. Cooper, bred by the late Mr. J. J. Colman, which won first prize. The whole of the six Channel Islands cows and heifers were noticed by the judges, the first prize going to a pretty fawn Jersey of Mr. M. Pratt's. In the remaining heifer class Mr. H. Fincher's Dutch Magpie —name and colour agreeing—was preferred to Mr. J. G. Williams' trio of Lincoln Reds.

The cart horses occupied a prominent position, and made a splendid show. In the seven open classes the animals exhibited consisted almost wholly of Shires, and these included representatives of some of the best studs in the kingdom. Sir J. B. Maple sent a fine selection, and, as last year, won some notable successes. A grand three-year-old grey mare, Grand Duchess, was not only first in her class, but was also selected to receive Mr. Gilbey's champion cup. Sir James was also first for filly of 1899 with Kathleen, a handsome chestnut; and for mare and foal with Stanney Commotion, a good bay mare and foal of similar colour. Mr. John Parnell, of Rugby, sent some of his famous Rokebys, winning first prize with a chestnut filly and a brown colt, the latter being, however, a Lockinge, bred by Lord Wantage. The Prince of Wales, who generally sends a Shire or two to this show, was second to Mr. Parnell with a well-bred bay colt. Sir Walter Gilbey was also represented, being placed second for filly of 1898 and mare and foal, and third for filly foal. Mr. Stewart Freeman's bay colt, Southernwood Black Prince, beat some well-bred youngsters in the foal class, as also did Mr. Hamer Towgood's brown filly in hers. The local classes were very well filled. Mr. T. Kingham's nice bay gelding, Prince, was successful in a good class of mares or geldings foaled previous to 1897, as also was his Drayman in an equally excellent class of four-year-olds. Mr. Flowers' executors were first with their mare, Sea Poppy, and filly, Beachendon Darling, in good company. These two, with Flower, a bay, also won for them the valuable prize for three working horses, while Sea Poppy won the further distinction of the Shire Horse Society's silver medal. Mr. E. L. Wooster was first for three-year-old geldings with a grey by Carbonite, and for a pair of working horses with two showy chestnuts.

Amongst the hunters and nags were some capital mounts and promising youngsters. They were, however, so much scattered through seeking shelter under the trees that a careful inspection of them was quite out of the question. Mr. J. W. King, of Whitesfields, sent a strong draft from his valuable stud, winning firsts for two-year-olds (Sweetheart), four-year-olds (Lack Nothing), Hunter, by Southcourt Stud Horse (ditto), and the Hunters' Improvement Society's silver medal (with Sweetheart). Mr. W. Manning supplied the winning yearling, with Mr. King second and third; also the best three and five-year-olds and general purposes nag. Mr. J. H. Stokes was first for hunter up to 14 stone and over, and Messrs. E. and A. Baxter for ditto not exceeding 14 stone; also for the best Hackney. The Keynsham Stud Company supplied the best hack. There was a very interesting class for ponies, ridden by relatives of the owners, not exceeding sixteen years old, the first prize being won by the Rev. D. B. Montefiore's polo pony Zither, with Mr. Johnstone Harris's Pearl second.

Despite the torrents which poured pitilessly upon the ring and grand stand, a large crowd assembled to witness the jumping competitions. The entries for both the jumping and driving events were this year better than ever, and in the former class of entry was decidedly above the average.

Mr. L. C. Leadbetter's Fairy Tale was the first to face the audience in the competition for the best performance over hurdles, double gate, and fenced water. The animal took all the obstacles with the exception of the high jump. Although Mr. B. Robins' Sterling at first refused the gate, it cleared the other jumps in grand style, and well deserved the premier honours ultimately awarded to it. Mr. A. N. Smith's Little Lady experienced no difficulty in clearing all the obstacles, although not so gracefully as Sterling. Mr. A. N. Smith's Grasshopper vaulted over everything but the high jump, which it just touched. Mr. J. E. Kimber's Twinkling Star showed good form. In the next class (34) for the best performance over the fences, Mr. B. Robins' Lady's Maid was the first to go round, and just managed to clear everything. Grasshopper entered into the spirit of the contest with better grace than on its first appearance, and leapt over all obstacles in grand fashion, well deserving the first prize. The jumping was immediately followed by the driving competitions, in which some very fine animals and pretty turnouts competed. Messrs. Baxter were successful in two classes, with Mr. S. Brunton second, and the last-named gentleman was first in two others, also receiving the Hackney Horse Society's silver medal for the best Hackney, with Snowstorm. The Bending Competition for polo ponies proved most exciting, and was greatly enjoyed by the spectators. There was keen competition in nearly all the sheep classes, and a very large proportion of the entries received notices from the judges. Mr. W. B. Greenfield's rather highly-coloured Hampshires were very much in evidence, winning first for ewes, ewe lambs, and rams. Mr. R. P. Cooper showed some nice Shropshires (uncoloured) winning first for ram or ram lamb. Mr. E. L. Wooster was very successful, winning firsts for five Hampshire lambs, five lambs of other breeds, and for twenty lambs.

The pigs were also an excellent show, although rather few in numbers. Messrs. R. E. and J. H. R. Horwood were, as usual, to the fore here with their Berkshires. Sir H. de Trafford beat them both, however, with a fine Berkshire boar, Mr. W. Johnson was successful with cross-breds, and Mr. F. Bedford with Yorkshires.

Prize List.

HORSES.

CART HORSES (OPEN CLASSES).

Mare, foaled in 1897: 1, Sir J. B. Maple, Bart., Childwickbury; 2, Mr. J. Parnell, Rugby; 3, Exors. of Mr. W. Flowers, Beachendon; r, Mr. R Rowland, Creslow.

Filly, foaled in 1898: 1, Mr. J. Parnell; 2, Sir W. Gilbey, Bart., Elsenham Hall; 3, Sir J. B. Maple, Bart.; r, Mr. E. Pegg, Chipping, Buntingford; c, Exors. of Mr. W. Flowers and Mr. P. A. Muntz, M.P., Dunsmore, Rugby.

Filly, foaled in 1899: 1, Sir J. B. Maple, Bart.; 2, Mr. J. Parnell; 3, Mr. R. Rowland; r, Mr. R. W. Hudson, Marlow.

Colt, foaled in 1899: 1, Mr. J. Parnell; 2, H.R.H. the Prince of Wales, Sandringham; 3, Mr. P. A. Muntz, M.P.

Mare and foal (bred in 1900): 1, Sir J. B. Maple, Bart.; 2, Sir W. Gilbey, Bart.; 3, Mr. P. A. Muntz, M.P.; r, Mr. H. H. Smith, Carrington, Melton Mowbray.

Cart foal: 1, Mr. S. Freeman; 2, Mr. A. P. McMullen; 3 and r, Mr. G. H. Harris.

Filly foal: 1, Mr. H. Towgood, Little Shelford; 2, Mr. P. A. Muntz, M.P.; 3, Sir W. Gilbey, Bart.; r, Sir J. B. Maple, Bart.; hc, Mr. R Rowland.

LOCAL CLASSES.

Mare or gelding, foaled previous to 1897: 1, Mr. T. Kingham, Dinton; 2 and hc, Mr. G. C. Terry, Putlowes; 3, Mr. J. P. Terry, Berryfield; r, Mr. R. Rowland.

Mare or gelding, foaled in 1896: 1, Mr. T. Kingham; 2, Mr. R. Rowland; 3, Mr. J. Roads, Norduck; r, Mr. J. R. Simons, Berryfield.

Mare, foaled in 1897: 1, Executors of Mr. W. Flowers; 2, Mr. R. Rowland; 3, Mr. J. B. Hedges, Boarscroft; r, Mr. J. Roads.

Gelding, foaled in 1897: 1, Mr. E. L. Wooster, Princes Risborough; 2, Mr. G. A. Elliott, Hulcot; 3, Mr. T. T. De Fraine, Charteridge.

Gelding, foaled in 1898: 1, Mr. G. A. Elliott; 2, Mrs. Pratt, Marsworth; 3, Mr. J. Roads; r, Mr. F. Bedford, Dudswell.

Filly, foaled in 1898: 1, Executors of Mr. W. Flowers; 2, Mr. R. Rowland; 3 and r, Mr. J. Stopps, Bledlow.

Mare and foal (foal to be dropped in 1900): 1, Mr. J. Brandon, Leighton Buzzard; 2, Mr. J. Stopps; 3, Mr. G. H. Harris, Aston Abbots; r, Mr. A. A. Buckmaster, Horton.

Yearling filly: 1, Mr. R. Rowland; 2, Exors. of Mr. W. Flowers; 3, Mr. C. Gray, Whitchurch.

Yearling colt: 1, Mr. E. Dawe; 2, Mr. C. Anstee, Soulbury; 3, Mr. T. T. De Fraine.

Colt foal: 1 and 2, Mr. G. H. Harris; 3, Mr. C. Gray; r, Mr. J. Stopps.

Filly foal: 1, Mr. J. Brandon; 2, Mr. J. B. Hedges: 3, Exors. of Mr. W. Flowers: r, Mr. R. Rowland.

Cart foal in the foregoing local classes, by one of the Tring Park Shire Horses: 1, Mr. A. A. Buckmaster; 2 and 3, Mr. T. T. De Fraine.

Filly foal in the foregoing local classes, by one of the Tring Park Shire Horses: 1 and 3, Mr. J. Gadsden, Weston Turville; 2, Mr. H. Woodman, Wilstone.

Pair of working horses, in constant work, the owner farming not less than two-thirds of arable land: 1, Mr. E. L. Wooster; 2, Mr. J. Clarke; 3, Mr. E. Dawe; r, Mr. R. E. Horwood, Drapton, Beauchamp.

Team of three working horses: 1, Executors of Mr. W. Flowers; 2, Mr. R. Rowland; 3, Mr. G. C. Terry.

A special prize of £3 for the best foal entered in the foregoing classes insured in the Association, was offered, but there was no competition.

A challenge cup, value £10, for the best shire mare or filly in the show, eligible for entry in the Shire Horse Stud Book, was awarded to Sir J. B. Maple, Bart.; r, Captain W. H. V. Duncombe, Sandy.

Shire Horse Society's silver medal for the best shire mare, filly, or filly foal, registered or eligible for registration in the Stud Book, entered in the local classes, was awarded to the Exors. of Mr. W. Flowers; r, Mr. J. Brandon.

HUNTERS (LOCAL).

Yearlings, suitable for making hunters: 1, Mr. W. Manning, Wing; 2 and 3, Mr. J. W. King, Whitesfields; r, Mr. C. Anstee.

Two-year-olds, suitable for making hunters: 1, Mr. J. W. King; 2 and r, Mr. G. A. Elliott; 3, Mr. J. Roads.

Three-year-olds, suitable for making hunters: 1, Mr. W. Manning; 2, Mr. R. Rawle, Berkhamsted; 3, Mr. J. Roads; r, Mr. J. W. King.

Four-year-olds, suitable for making hunters: 1, Mr. J. W. King; 2, Exors. of Mr. W. Flowers; 3 and r, Mr. C. Brooks, Mursley.

Five-year-olds, suitable for making hunters: 1, Mr. W. Manning; 2, Mr. B. F. J. Gates, Wing; 3, Mr. C Brooks; r, Exors. of Mr. W. Flowers.

OPEN.

Hunter, 14 stone and over: 1, Mr. J. H. Stokes; 2, Mr. J. Drage, Northampton; 3, Mr. A. Withers, 556, Oxford-street, London; r, Mr. W. Cuthbert, Warwick.

Hunter, not exceeding 14 stone: 1, Messrs. E. and A. Baxter, Brentwood; 2, Mr. A. H. Jackson, Harrow Weald; 3, Mr. J. W. King; r, Mr. J. Drage.

Hunter, not exceeding 7 years old, by any of the Southport stud horses: 1 and r, Mr. J. W. King; 2, Exors. of Mr. W. Flowers; 3, Mr. W. Cuthbert.

Hack, not exceeding 15.2: 1, the Keynsham Stud Company, Keynsham; 2, Mr. S. Freeman, Wingrave; 3, Mr. J. W. King; r Mr. G. A. Elliott.

Pony, not exceeding 13.2, to be ridden by boys or girls not exceeding 16 years old, being sons or nephews, daughters or nieces, of members to whom the pony belongs: 1, Rev. D. B. Montefiore, Mursley; 2, Mr. J. Harris, Linslade; 3, Mr. W. W. Waskin, Linslade; r, Mr. C. Anstee.

Hunters' Improvement Society's silver medal for the best hunter filly (by a thoroughbred horse or registered hunter sire), not exceeding three years old (foaled in 1897, 1898, or 1899), registered in the society's record of hunter mares and sires, was awarded to Mr. J. W. King.

JUMPING (OPEN).

Mare or gelding, for the best performer over the fences: 1, Mr. B. Robins, Rickmansworth; 2 and r, Mr. A. N. Smith; 3, Mr. J. E. Kimber, Abingdon. Mare or gelding, the best performer over the fences: 1, Mr. A. N. Smith; 2, Mr. J. Kimber; 3, Mr. W. Ward, Bury, Luton.

GENERAL PURPOSE.

Mare or gelding, not exceeding 16 hands, shown in harness, and suitable for riding (open to tenant farmers within the 15 mile radius): 1, Mr. W. Manning; 2, Mr. G. A. Elliott; 3, Mr. J. Roads; r, Mr. J. Clarke, Tring.

HACKNEY (OPEN).

Hackney, over 14.2 and under 15.2, to be shown in the saddle: 1, Messrs. E. and A. Baxter; 2, Mr. S. Brunton, St. Albans; 3, Mr. W. Smith, Aylesbury.

HACKNEY HORSE SOCIETY.

Silver medal for best hackney or pony mare, filly, or filly foal that is registered or eligible for registration in the Hackney Stud Book, was awarded to Mr. S. Brunton.

HARNESS (OPEN).

Mare or gelding, exceeding 14.3: 1, Messrs. E. and A. Baxter; 2, Mr. S. Brunton; 3, Messrs. Gardener Brothers, Chesham.

Mare or gelding, not exceeding 14.3 (open to members within the 15 mile radius): 1, Messrs. E. and A. Baxter; 2, Mr. S. Brunton; 3, Mr. W. Furze.

Mare or gelding, exceeding 14.3: 1, Mr. S. Brunton; 2, Mr. P. H. Buller, Leighton Buzzard; 3, Mr. T. Hull, High Wycombe; r, Mr. W. Mannning; hc, Mr. W. Smith.

Mare or gelding, not exceeding 14.3: 1, Mr. S. Brunton; 2, Mr. H. R. Craufurd, Aldbury; 3, Mr. B. Robins; r, Mr. B. J. Gates; hc, Mr. T. Chapman, Puttenham.

A challenge cup, value £10 10s., for the best harness mare or gelding in the foregoing classes was awarded to Messrs. E. and A. Baxter; r, Mr. S. Brunton.

A challenge cup, value 50 guineas, and a silver medal, to the winner of the most points in the classes for hunters, harness, and general purposes horses. Not yet awarded. A silver cup, value £10 10s. is also given, to be retained in the event of the challenge cup being won three times in succession, or four times in all.

DONKEYS.

Donkey, gelding or mare, to be shown in single harness: 1, Mr. C. Anstee; 2, Mrs. E. Waite; 3, Miss Carr.

POLO PONIES.

OPEN RIDING CLASSES.

Mares or geldings, four years old, for ponies suitable for making polo ponies, foaled in 1896: 1, Mr. J. B. Gates, Aston Abbots; 2, Hon. Mrs. C. Howard, Great Missenden; 3, Mr. A. H. Archer, Tring.

Mares or geldings, five years old and upwards, for polo ponies and for ponies suitable for making polo ponies, foaled previous to 1896: 1 and 3, Rev. D. B. Montefiore; 2, Mr. G. Pratt, Oving; r, Mr. T. R. Seaton, Aylesbury.

CATTLE.

OPEN.

Shorthorn cow, in milk or in calf, calved previous to 1897: 1 and hc (2), Mr. J. F. Spencer, Stanhope-road, Highgate, N.; 2, Mr. J. Evens, Burton; 3, hc, and c, Mr. H. Landon, Aylesbury; r, Mr. H. Fincher, Tring.

LOCAL.

Shorthorn cow, in calf or in milk, calved previous to 1897: 1, Mr. J. Roads; 2, Mr. H. Fincher; 3, Mr. C. Birdsey, Southcourt; r, Mr. E. Dawe, Wendover; c, Exors. of Mr. W. Flowers, and Mr. H. Landon.

Shorthorn heifer, in calf, calved in 1897: 1, Mr. F. Bedford; 2, Mr. J. H. R. Horwood, Drayton, Beauchamp; 3, Mr. E. L. Wooster; r, Mr. J. Roads.

Shorthorn heifer, calved in 1898: 1, Mr. J. H. R. Horwood; 2 and r, Mr. H. Landon; 3, Mr. P. Mead, Tring.

Shorthorn heifer, calved in 1899: 1, Mr. F. Bedford; 2, Mr. J. Burnham, Aston Clinton; 3, Mr. J. H. R. Horwood; r, Mr. H. Fincher.

Cow or heifer of a Channel Island breed, in milk or in calf, bred in England: 1, Mr. M. Pratt, Tring; 2, Mr. H. Fincher; 3, Mr. R. Fowler, Broughton; hc, Mr. F. Bedford; c, Mr. R. Fowler, Broughton, Mr. F. Bedford.

OPEN.

Heifer, red polled or Aberdeen Angus, in calf or in milk, not exceeding four years old: 1, Mr. R. P. Cooper, Berkhamsted; 2 and c, Messrs. H. and T. Taylor, Great Gaddesden; 3, Mr. F. Crisp, New Southgate, N.; r and hc, Lord Rothschild, Tring.

Heifer, in calf or in milk, not exceeding four years old, of any of the following breeds:—Kerry, Ayrshire, Welsh, or any other pure breed other than Jersey or Shorthorn: 1 Mr. H. Fincher; 2 and 3 Mr. J. G. Williams, Pendley, Tring.

Pure-bred Shorthorn bull, eligible for entry in the Herd Book (prize given by Mr. A. H. Longman): 1, Mr. H. Landon; 2, Mr. F. Bedford.

JERSEY CATTLE (OPEN).

Jersey cow, in calf or in milk, calved previously to 1897: 1, 3, and vhc, Mr. C. W. Armitage, Potter's Bar; 2, 4, and hc, Mrs. S. Greenall, Warrington; r and vhc, Mrs McIntosh, Romford; hc, Mr. J. Carson, Theydon Bois, and Col. H. McCalmont, Ross, Herefordshire; c, Lady de Rothschild, Aston Clinton; Mr. P. Phipps, Kettering; and Hon. Mrs. M. Smith, Market Harborough.

Jersey heifer, calved in 1897, in calf or in milk: 1, Mrs. S. Greenall; 2 and c, Duke of Marlborough, Woodstock; 3 and hc, Mrs McIntosh; 4, Col. H. McCalmont; r and hc, Mr. A. Miller-Hallett, Chelsfield; hc Lady de Rothschild; c, Mr. J. Carson and Mr. C. F. Young, Melbourne.

Jersey heifer, calved in 1898: 1 Mrs. McIntosh; 2, Mr. C. W. Armitage; 3, Col. H. McCalmont; 4, Earl Cadogan, Bury St. Edmunds; r, Mr. A. E. McMullen, Hertingfordbury; vhc, Lady de Rothschild; hc, Earl Cadogan, Mr. H. Barnet, Northchurch, Mrs. A. F. Perkins, Holmwood; c, Col. H. McCalmont, Capt. A. B. S. Fraser, Worthing.

Yearling Jersey heifer: 1 Mrs. A. F. Perkins; 2 and r, Mrs. McIntosh; 3, Mr. P. Phipps; 4, Earl Cadogan; vhc Mr. C. W. Armitage; hc, Mr. P. Phipps, Lady de Rothschild, Capt. A. B. Fraser, Mrs. S. Greenall; c, Lady de Rothschild, Mr. H. Barnett, Viscount Enfield, Barnet; Duke of Marlborough [2], Mr. J. W. Smith-Neill, Wendover [2].

Jersey bull, calved in 1899 or 1900: 1, Col. H. McCalmont; 2, Admiral Hon. T. S. Brand, Lewes; 3, Captain A. B. S. Fraser; 4, Viscount Enfield; r, Mrs. McIntosh; hc, Viscount Enfield, Duke of Marlborough.

A champion prize of £5 5s., for the best animal in Classes 54 to 58, was awarded to Mr. C. W. Armitage; r, Mrs. McIntosh.

MILK TESTS.

OPEN.

Cow of any breed or cross, not exceeding [illegible] lbs. live weight, giving the greatest quantity of milk, not less than 3 per cent. butter fat, or obtaining the largest number of points for yield of butter: 1, Mrs. McIntosh; 2, Duke of Marlborough; 3, Lord Braybrooke, Saffron Walden; 4, Hon. Mrs. Murray Smith.

Cow of any breed or cross, exceeding [illegible] lbs. live weight, giving the greatest quantity of milk, not less than 3 per cent. butter fat, or obtaining the largest number of points for yield of butter: 1, Mr. E. Dawe; 2, Mr. A. Bonest, Mentmore; 3, Mr. D. T. Ellingworth, Romford; 4, Mr. J. Evans.

BUTTER TESTS.

OPEN.

Cow of any breed or cross, not exceeding [illegible] lbs. live weight for yield of butter: 1, Colonel H. McCalmont; 2, Dr. H. Watney, Bangbourne; 3, Viscount Enfield; 4 Mrs. McIntosh. Certificates of merit were awarded to Captain Smith Neill (2) and £1 special butter prize), Mr. C. F. Young; Mr. E. M. Ind, Great Warley; Messrs. C. and M. Palmer, Manchester (4); Hon. Mrs. M. Smith, Lord Braybrooke (2), and Dr. H. Watney.

Cow of any breed or cross, exceeding [illegible] lbs. live weight for yield of butter: 1, Mr. E. Daw; 2, Dr. H. Watney; 3, Viscount

Enfield; 4, Mr. C. Birdsey. Three certificates of merit were awarded to Lord Braybrooke.

The English Jersey Cattle Society offered the following prizes for Jersey cows competing in the test: 1, gold medal, Colonel H. McCalmont; 2, silver medal and £5, Dr. H. Watney; 3, bronze medal and £3, Viscount Enfield.

Tenant farmers' prizes were awarded as follows: 1 and 2, in butter test, and 1 and 2 in milk test, Mr. A. Merry, Leighton Buzzard; 3, Mr. D. T. Ellingworth; r, Mr. F. Bedford.

SHEEP.

OPEN.

Pen of five short-woolled ewes (prizes given by Lord Rothschild): 1, Mr. W. B. Greenfield, Flamstedbury; 2, Mr. R. P. Cooper; 3, Mr. G. S. Fisher, Thrapstone; r, Mr. J. Clarke.

Pen of five short-woolled ewe lambs: 1 and c, Mr. W. B. Greenfield; 2 Lady de Rothschild; 3, Mr. J. G. Williams; r, Mr. G. S. Fisher; hc, Mr. J. Clarke; c, Mr. R. C. Cooper.

Pen of five ewe or wether lambs, bred by the exhibitor from a Tring Park Hampshire Down ram lamb (prizes offered by Lord Rothschild); No competition.

Ram or ram lamb of any breed: 1, Mr. R. P. Cooper; 2, Mr. G. S. Fisher; 3, Mr. W. B. Greenfield; r, Mr. J. Clarke.

LOCAL.

Pen of five Hampshire Down ewe or wether lambs (prizes given by Lord Rothschild): 1, Mr. E. L. Wooster; 2, Mr. J. Clarke; 3, Mr. P. Mead; r, Mr. H. R. Horwood.

Pen of five ewe or wether lambs of any breed or cross other than Hampshire Down: 1 and r, Mr. E. L. Wooster; 2 and 3, Mr. F. Bedford; r, Mr. J. Batchelor, Buckland.

Ram or ram lamb of any breed: 1 and 2, Mr. W. B. Greenfield; 3, Mr. J. Clarke; r Mr. F. Bedford.

Pen of fifteen ewes, open to tenant farmers only (prizes given by Captain Constable Curtis): 1, Mr. F. Bedford; 2, Mr. J. Clarke; 3, Mr. H. Grange, Tring; r, Mr. R. E. Horwood.

Pen of twenty lambs, open to tenant farmers only: 1, Mr. E. L. Wooster; 2, Mr. F. Bedford; 3, Mr. J. Clarke; r, Messrs. H. and T. Taylor; hc, Mr. P. Mead; c, Mr. H. Grange and Mr. J. H. R. Horwood (2).

PIGS.

LOCAL.

Breeding sow of a Berkshire breed, in pig or with litter of not less than six pigs: 1 and 3, Mr. R. E. Horwood; 2, Mr. R. Fowler; r, Mr. J. H. R. Horwood.

Sow of any other breed or cross, in pig or with litter of not less than six pigs; 1, Mr. J. H. R. Horwood; 2, Mr. F. Bedford.

Breeding sow, in pig or with litter of not less than six pigs (open to tradesmen and allotment holders within four miles of Tring Market House): 1, Mr. W. Johnson, Tring; 2, Mr. W. Smith; 3, Messrs. J. and A. Wright, Tring; r, Mr. W. N. Mead, Tring; hc, Mr. H. Fincher.

OPEN.

Boar of any distinct breed, not exceeding twelve months old: 1, Sir H. de Trafford, Market Harborough; 2, Mr. R. E. Horwood; 3, Mr. J. H. R. Horwood; r, Mr. F. Bedford; c, Mr. E. Carter, Bishopstone.

Breeding sow, in pig or with litter of not less than six pigs: 1, Mr. J. H. R. Horwood; 2, Sir H. de Trafford; 3, Mr. R. E. Horwood; r, Mr. W. Johnson.

Pair of yelts of any breed or cross born in 1900: 1 Mr. J. H. R. Horwood; 2, Mr. R. E. Horwood; 3, Mr. R. Fowler; r, Mr. J. G. Williams; hc, Mr. J. Batchelor; c, Mr. F. Bedford.

Wirral and Birkenhead.

The Wirral and Birkenhead Agricultural Society's Show is very seldom favoured by the weather, but probably on no occasion since the society was first formed—nearly sixty years ago—has such a period of bad weather been experienced as that which prevailed at Birkenhead on the 3rd, 4th, and 6th inst. On the first day heavy showers fell throughout the morning, and after lunch both rain and wind increased in force until at last a perfect hurricane raged over the showyard. The heavy rains of the night and early morning had had but little effect on the well-drained ground, but after lunch the whole place became studded with miniature lakes and ankle-deep morasses. This was not the worst of it, however, for the wind almost wrecked the show, practically every one of the canvas-covered sheds being unroofed. The horse tent was opened to the weather, and the flapping canvas, making reports loud as those of a rifle, caused a small stampede among the animals, which kicked and struggled in their fright. Fortunately no damage ensued to the limbs of visitors, but careful owners removed their stock at mid-afternoon, being fearful of the injury that might ensue to them through wet or fright. The dog tents and that for the display of horticulture were among the earliest to go, and great consternation was caused in the poultry sheds. Here the birds and pigeons were rescued from their weather beaten pens and put *en masse* into large baskets, mixed up in apparently inextricable confusion. A number of the pigeons escaped, and there were exciting chases after poultry and dogs. The cheese tent was also wrecked, and, taken altogether, the hurricane almost ruined the show. The leaping of hunters, in which much interest is always taken, was abandoned owing to the weather, great disappointment being felt at this disappearance in the popular exhibition. In fact, taken all in all, there never was such a scene at an agricultural show, and the utmost sympathy was expressed with the committee, to whom the storm means the loss of several hundreds of pounds. Notwithstanding this the committee decided to continue the show on the two other advertised days.

On the Saturday the weather was fairly favourable, but on Monday the weather was a mild repetition of that experienced on the Friday. The Society were rewarded for their enterprise in continuing the show on Monday, for, despite the wretched weather, the takings on that day were more than on the two previous days together. The total receipts were £500—of which about £250 was taken on Monday, £160 on Saturday, and about £85 the first day—against £1,150 for the two days of last year's show. The loss will undoubtedly be a heavy one, but owing to the generosity of the president, Mr. W. H. Lever, the committee will not be called upon to raise anything like the amount of the total deficit.

Mr. J. C. Forster's Guernsey Heifer, "Clatford Gentle."

The terrible state of the weather was the more to be regretted because the show all round was an unusually good one. It was sought to popularise the show this year by holding it on Friday and Saturday, and then carrying it over the Bank Holiday, thus giving holiday-makers an opportunity of spending a day at Bidston, and in order to make the show attractive special efforts were made to secure the exhibition of moving machinery, and the interesting odds and ends that are invariably shown on the stands. But all was of no avail. The entries in the various classes showed an enormous decrease in the total figures when compared with last year. On this occasion they numbered 3,384, against 6,160 twelve months ago. This big decrease was due to the absence of the pig classes, which had to be abandoned owing to the presence of swine fever in the county, whilst pigeons, poultry, and dogs showed a big falling off in numbers. Year by year the show is becoming a greater centre for purely agricultural live stock, sheep, for instance, being nearly doubled, and horses being greatly added to, whilst the display of implements is now a feature of the Wirral show. The prize money amounts to £2,800, besides which several of the county gentlemen presented valuable cups and other silver trophies for competition.

The show of cattle attracted much attention from breeders, all classes being well filled, and generally representative of the best strains of blood to be found in the country. In the class for aged Shorthorn bulls Carlisle Wellington, belonging to Mr. F. Miller, Clifton Road, Birkenhead, which won Lord Derby's prize at the Lancashire show at Rochdale, was placed first, while second honours were given to the same owner's Bashful Youth, a beautiful two-year-old roan, which he purchased recently at Baron Rothschild's sale for 110gs. These animals are intended for export to Argentina. The third prize bull was Mr. [illegible]'s Royal Seal, the property of Messrs. J. Bates and Sons, Muff, Newcastle, Staffordshire. This animal was placed first at the Stafford Show, and also won the championship prize at Leamington. The first prize for yearling bull was awarded to Mr. W. [illegible] Bell's (Alnwick) Baron Abbotsford, who was second at Rochdale and secured a highly commended card at the Royal Show. Mr. Miller's Lovat's Star, a splendid type of Shorthorn, was placed third in the open competition, but secured first prize in the local class. Shorthorn cows in milk were a select, although not a numerous class, and the first to Miss Rose, belonging to Mr. John Harrison, Hesketh Park, Preston, and Lady Clara 3rd, the property of Mr. [illegible], Alnwick, two of the champion cows in England. The special prize and the first ticket in the class for cows and cows were given to Miss Rose, which notwithstanding her seven years, has a bloom and quality which could not well be surpassed. In the class for heifers calved in 1898 Mr. George Harrison, Gainford, Darlington, received the first prize for Wellness, a splendid type of Shorthorn cow which has taken high honours in many showyards; while among the local competitors chief place was awarded to Mr. [illegible]'s Nonpareil 2nd, belonging to Mr. G. D. Lloyd, Burton Hall, Rossett. Yearling heifers were a remarkably excellent class, in which Mr. Harrison's Victor Queen was an easy first. The classes for dairy cows and Channel Island cattle were, as usual at this [illegible], thoroughly representative. Mrs. Cyril [illegible], Walton Hall, Warrington, being one of the principal exhibitors in the last-named section.

The horses were really a grand lot, the agricultural classes in particular being extremely good. In several of the classes the judges had to call in assistance before the premier honours could be awarded, and probably it would have been the same in many more classes, but soon after lunch the bellman was sent round to announce that no more classes would be judged on that day. At this time the judges had done hardly more than half their work, but under the conditions it was impossible to attempt a conscientious discharge of their duties and they decided to postpone the remainder of their work. In the agricultural classes the four-year-olds and upwards were a grand lot, the district classes being very strong. The cup offered by the president (Mr. W. H. Lever) for agricultural geldings, [illegible] to the society's district, was won by Messrs. Jackson Brothers' Hulton Laddie, a fine, big, upstanding horse, with rare feet and legs, good bone, and substance, and full of quality. The gelding was placed second in the open class out of very keen competition. Taking the heavy horses and Shires, the judges were agreed that a finer lot, or even as good, had never been shown at Birkenhead, and any horse that was placed in their awards must have been a good one. The hacks were equally good, and after their show in the saddle they took a lot of judging. In the class for under thirteen hands, Mr. Wand's famous Amendment, which last year was regarded as the finest pony in the country, had to take third place, Messrs. Baxter's Black and White, a lovely little piebald, being given the chief award. In the preceding class—between thirteen and fourteen hands—there was equally good quality, and in the open class, over fifteen hands, Mr. A. L. Goodson, of Knutsford, secured the first card with his Heathfield Conceit, a grand chestnut mare, of great quality. The hunters also showed strongly, being of good form all round. The judging was resumed on Saturday with the Shire stallions, and in this class Mr. J. W. Kenworthy's Monaco, a famous winner for years past, was placed first; the same owner's Khartoum II. was head of the two-year-old class, and a third of his horses took first in the yearlings. Monaco also secured the president's championship challenge [illegible]; Ercall Countess, another of Mr. Kenworthy's, secured the Shire Horse Society's special for the best mare, and in the district competitions the vice-president almost swept the board.

Mr. Thomas Davies, of Needwood, had a fine filly in the two-year-old class, [illegible] by Monaco—which scored in both open and district classes, and took the Royal Rock Beagle's special; while with Spital Countess, a lovely foal, he was first in the district, with special and third in the open class. In the Hackney stallions Mr. Austin C. Carr, of Broxton Lower Hall, was placed first with his grand chestnut Elevator, which [illegible] a busy season to the show. Mr. Cockayne Brothers' famous Paddock Polonius [illegible] prize, and the same horse's sire Brothers Pontius Rufus, being head of the two-year-olds. The G. W. Biegler Challenge Cup was awarded first to Polonius, but as Messrs. Cockayne are [illegible] Society, the adjudication was given to the [illegible] vator, Mr. Carr also securing first and third in the open foal class with [illegible] and first and second in the district section. There was great interest in the [illegible] and Messrs. Baxter's Lady Neil [illegible] hands harness class. The [illegible] was much the better of the two, and Mr. Goodson's beautiful chestnut had to take second place.

The leaping [illegible] The [illegible] is to have an open competition [illegible] and on the second [illegible] competition again. The [illegible] the first day £15 [illegible] an additional £20 [illegible]

brought in a lot of fine hunters, and competition was very keen. Mrs. Blockley secured the chief award on the first day's card, her chestnut gelding Alfred taking his leaps in clean style; but he was only a point or two ahead of a sturdy bay belonging to Mr. John Jones, of Wrexham, another horse of Mrs. Blockley's taking third. On the second card Mr. T. G. Foster's Paddy was first, after close competition with the Irish chestnut belonging to Mr. M'Carton, of County Down, and Mrs. Blockley again steered her horse Omega into third place. The display of tandems was excellent, Mr. G. C. Wand's splendidly matched mares taking first, with Messrs. Baxter's pair of bays a good second. On Monday Mrs. Blockley's Omega divided first and second prize with Diana, a stable companion, and afterwards won the grand championship prize of £20. It was a close thing between him and Diana, but the big brown horse did his last round without a fault, while the mare made several. Mrs. Blockley secured £75 in prizes for the leaping, making her total during the twelve months £1,800, and the lady has well earned the title of champion huntress of the British Isles. In the classes of local tradesmen's harness horses Mr. Herbert Williams, of Birkenhead, scored a triple win with a fine-actioned four-year-old brown-and-white gelding, Movement Whitesocks. The Macgregor Lord Memorial Challenge Bowl, value 100gs., for the best hunter brood mare, with foal at foot, confined to district competition amongst tenant farmers, went to Mr. W. Parker, of Great Stanney Hall, Sutton, whose Dorinda and colt foal by Radius were the best of a good lot.

The sheep classes filled fairly well, and the quality of the stock was good and quite equal to any former show of the Society, but exhibits from local farmers were, for some reason, almost conspicuous by their absence.

The following were the judges:—Sheep: Shropshire, Mr. C. Coxon (Tamworth); Leicester, Mr. T. H. Hutchinson (Catterick); Welsh, Mr. T. Roberts (Aber, N.W.). Cattle: Shorthorn and Dairy, Mr. C. W. Brierley (Brimfield, R.S.O.); Channel Islands, Mr. T. H. Sweetman (Atherstone). Horses: Shires, Mr. A. H. Clark (Spalding) and Mr. W. Richardson (Doddington); hunters, Mr. T. H. Hutchinson (Catterick); Hackneys and harness, Mr. A. E. Evans (Wrexham); leapers, Messrs. C. W. Brierley, A. E. Evans, F. Lloyd, and W. Conwy Bell.

Challenge Cups.

W. B. Burnham Challenge Bowl, for best Shorthorn cow or heifer (district competition): Mr. G. D. Lloyd, Burton Hall, Rossett (Ringdale Nonpareil II.).

W. H. Lever Challenge Bowl, for best Shire stallion (open competition): Mr. J. W. Kenworthy, Castlehill, Kelsall (by stallion Monaco).

J. W. Kenworthy Challenge Cup, for best Shire brood mare and foal (district competition): Mr. A. Macintyre, Lynn (bay mare Bounce).

W. H. Lever Challenge Bowl, for best agricultural gelding: Jackson Brothers, Edge Fold Farm, near Wigan (bay gelding, Hulton Laddie).

G. W. Ziegler Memorial Challenge Bowl, for best Hackney stallion (open to members of the society): Mr. A. C. Carr, Broxton Lower Hall, Chester (chestnut, Elevator).

Record Reign Challenge Vase, for the best Hackney brood mare with foal at foot (district competition): Mr. James Taylor, Talbot Hotel, Wrexham (bay, Coquette).

J. Hoult Challenge Bowl, for the best exhibit of long-keeping Cheshire cheese, over 50lb. weight (farmers only): Mr. Richard Dutton, Old Marston Hall, Ellesmere.

Subscribers' Bowl, for best long-keeping cheese, under 50lb. each (farmers only): Mr. E. Langley, Ridleybank, Tarporley.

W. H. Lever Challenge Bowl, for best exhibit of butter (farmers only): Mrs. E. France, Bunbary, Tarporley.

Prize List.

SHEEP.

SHROPSHIRES OR ANY OTHER DOWNS (OPEN).

Shearling ram: 1 and 2 Mr. A. Tanner; 3, Mr R. P. Cooper.

WELSH (OPEN).

Shearling ram: 1, Mr. W. C. Bell; 2, Mr. W. Leather; 3, Mr. T. Jones.

Ram lamb: 1, Mr. W. Leather; 2 and 3, Mr. T. Jones.

Ram lamb: 1, Mr. W. Leather; 2, Mr. W. E. Williams; 3, Mr. W. C. Bell.

Three shearling ewes; 1 and 3, Mr. W. C. Bell; 2, Mr. W. E. Williams

Three ewe lambs: 1, Mr. W. Leather; 2, Mr. W. C. Bell; 3, Mr. T. Jones.

CATTLE.

Three special prizes, value £5 5s.: Mr. G. Harrison, Mr. J. Harrison, Mr J. R. Turton.

SHORTHORNS (OPEN).

Bull, calved in or before 1898: 1, Mr. F. Miller; 2, Messrs. T. Rawes and Sons; 3, Mr. J. Handley.

Bull, calved in 1899: 1, Mr. W. Bell; 2, Mr. T. Atkinson; 3, Mr. F. Miller.

Cow, in milk, calved in or before 1897: 1, Mr. W. Bell; 2, Mr. G. Harrison; 3, Mr. J. Harrison.

Heifer, calved in 1898: 1, Mr. G. Harrison; 2, Mr. G. D. Lloyd; 3, Mr. F. Bibby.

Heifer, calved in 1899: 1, Mr. G. Harrison; 2, Mr. F. Bibby; 3, Mr. J. C. Read.

SHORTHORNS (DISTRICT).

Bull, calved in or before 1898: 1 and 2 Mr. F. Miller; 3, Mr. J. A. Brown.

Bull, calved in 1899: 1, Mr. F. Miller; 2, Mr. T. Adamson; 3, Mr. F. Bibby.

Cow, in milk, calved in or before 1897: 1, Mr. J. Harrison; 2, Mr. J. C. Read; 3, Mr. G. Cooke.

Heifer, calved in 1898: 1, Mr. G. D. Lloyd; 2, Mr. F. Bibby; 3, Mr. T. Adams.

Heifer, calved in 1899: 1, Mr. F. Bibby; 2, Mr. J. A. Brown; 3, Mr. J. C. Read.

DAIRY COWS (OPEN).

Cow, in milk, any age: 1, Mr. J. A. Brown; 2, Mr. J. R. Turton; 3, Mr. O. R. Ward; 4, Messrs. J. and R. Atkinson.

CHANNEL ISLANDS (OPEN).

Bull, any age: 1 and 3, Mrs. C. E. Greenall; 2, Mr. L. G. Gisborne.

Cow, in milk, calved in or before 1897: 1 and 2, Mrs. S. E. Greenall; 3, Mr. Ernest Anglesey.

Heifer, calved in 1898: 1, Mr. L. G. Gisborne; 2, Mr. W. G. M. Townley; 3, Mrs. C. E. Greenall.

Heifer, calved in 1899: 1, Mr. W. G. M. Townley; 2, Mr. E Smith; 3, Mrs. C. E. Greenall.

HORSES.

SHIRES (OPEN).

Stallions.—Foaled in or before 1897: 1, Mr. J. W. Kenworth, Castle Hill, Kelsall; 2, Earl Egerton of Tatton, Tatton Park; 3, Mr. G. H. Mullock, Poulton, Pulford, Wrexham.

Foaled in 1898: 1, Mr. J. W. Kenworthy, Castle Hill, Kelsall, near Chester; 2, Mr. J. Lewis, Trwstllewelyn, Garthwyl; 3, Earl Egerton of Tatton, Tatton Park.

Foaled in 1899: 1, Mr. J. W. Kenworthy, Castle Hill, Kelsall, Chester; 2, Mr. J. Lewis, Trwstllewelyn, Garthwyl; 3, Mr. J. K. Christopherson, Hooton.

Brood Mares, any age, with foal at foot: 1, Mr. A. M'Intyre, Lymm; 2, Mr. E. Green, The Moors, Welshpool; 3, Hon. V. C. W. Cavendish, M.P., Holker Hall, Cark in Cartmel.

Foal of above mares: 1, Hon. Victor C. W. Cavendish, M.P., Holker Hall, Cark-in-Cartmel; 2, Mr. E. Green, The Moors, Welshpool; 3, Mr. T. Davies, Needwood, Bebington.

Mare: 1 and special, Mr. J. W. Kenworthy, Castle Hill, Kelsall, Chester; 2, Mr. J. Lewis, Trwstllewelyn, Garthwyl; 3, Hon. Victor C. W. Cavendish, M.P., Cark-in-Cartmel.

FILLIES.

Foaled in 1897: 1, Mr. O. R. Ward, Noon Sun Farm, Great Warford, Mobberley; 2, Mr. S. S. Raingill, The Grange, Ringway, Altrincham; 3, Mr. G. H. Mullock, Poulton, Pulford, Wrexham.

Foaled in 1898: 1 and special, Mr. T. Davies, Needwood, Bebington; 2, Mr. R. Dodd, Eaton House, Tarporley; 3, Mr. L. Dodd, Bickerton, Malpas.

Foaled in 1899: 1, Earl Egerton of Tatton, Tatton Park; 2, Mr. J. W. Kenworthy, Castle Hill, Kelsall, Chester; 3, Hon. Victor C. W. Cavendish, M.P., Holker Hall, Cark-in-Cartmel.

GELDINGS.

Foaled in or before 1896: 1, Mr. A. M'Intyre, Lymm; 2, Messrs. Jackson Bros., Edge Fold Farm, Middle Hulton, Wigan; 3, Mr. P. Davies, Midlands Farm, Warburton, Cheshire.

STALLIONS.

Foaled in 1898: 1, Mr. J. W. Kenworthy, Castle Hill, Kelsall, Chester; 2, Mr. G. H. Mullock, Poulton, Pulford, Wrexham.

Foaled in 1899: 1, Mr. J. W. Kenworthy, Castle Hill, Kelsall, Chester; 2, Mr. J. K. Chistopherson, Hooton.

DRAUGHT AND AGRICULTURAL.

Brood mares, 16 hands and over, any age, with foal at foot: 1, Mr. P. Allen, Willaston Hall, Chester; 2, Mr. S. Jones, Poole Hall, Little Sutton; 3, Mr. T. J. Dutton, The Beeches, Saltney; 4, Mr. P. Allen.

Under 16 hands, any age, with foal at foot: 1, Mr. A. M'Intyre, Lymm; 2, Mr. Mr. E Gibbon, New Tree Farm, Lymm; 3, Mr. J. W. Kenworthy, Castle Hill, Kelsall, Chester; 4, Mr. P. Allen, Willaston Hall, Chester.

Foals, colt of above mares: 1, Mr. J. W. Kenworthy, Castle Hill, Kelsall; 2 and 4, Mr. P. Allen, Willaston Hall, Chester; 3, Mr. T. J. Dutton, The Beeches, Saltney.

Filly of above mares: 1 and special, Mr. T. Davies, Needwood, Bebington; 2, Mr. J. W. Kenworthy, Castle Hill, Kelsall, Chester; 3, Mr. S. Jones, Little Sutton; 4, Mr. A. M'Intyre, Lymm.

Mare, entered or eligible in the Stud Book, foaled in or before 1896: 1 and 2, Mr. J. W. Kenworthy, Castle Hill, Kelsall; 3, Mr. T. J. Dutton, The Beeches, Saltney.

Gelding, foaled in or before 1896: 1, Jackson Brothers, Edge Fold Farm, Lymm; 2 and 3, Mr. P. Davies, Midlands Farm, Warburton, Cheshire.

Filly, foaled in 1897: 1, Mr. G. H. Mullock, Poulton, Pulford, Wrexham; 2, Mr. T. J. Dutton, The Beeches, Saltney; 3, Mr. R. Jeffs, Hapsford, Helsby, Warrington.

Fillies or geldings.—Foaled in 1898: 1, Mr. T. Davies, Needwood, Bebington; 2, Mr. R. Dodd, Eaton House, near Tarporley; 3, Mr. L. Dodd, Bickerton, Malpas.

Foaled in 1899: 1, Mr. J. W. Kenworthy, Castle Hill, Kelsall, Chester; 2, Mr. G. H. Mullock, Poulton, Pulford, Wrexham; 3, Mrs. Gaskell, Prenton Hall Farm, Prenton.

Pair of mares or geldings: 1, Mr. J. W. Kenworthy, Castle Hill, Kelsall, Chester; 2, Mr. P. Davies, Midlands Farm, Warburton, Cheshire; 3, Mr. P. Allen, Willaston Hall, Chester.

HACKNEYS.

Stallions.—Foaled in or before 1896: 1, Mr. A. C. Carr, Broxton Lower Hall, Chester; 2, Mr. J. Yates, Bilton Hall, York; 3, Mr. W. H. Thompson, Chequer House, Upholland.

Foaled in 1897: 1, Messrs. Cockayne Brothers, Sheffield-lane Paddocks, Sheffield; 2, Mr. W. Sugden, Coalspring House, Cullingworth, Bradford; 3, Mr. J. Makeague, Golborne Park, Newton-le-Willows.

Foaled in 1898: 1, Messrs. Cockayne Brothers, Sheffield-lane Paddocks, Sheffield; 2, Mr. L. Knowles, M.P., Westwood, Pendlebury, near Manchester; 3, Mr. E. Holmes, Rimrose-road, Bootle.

Any age, not exceeding 14 hands: 1, Mr. W. Mitchell, High House, Brauneston, Oakham; 2, Messrs. E. and A. Baxter, Hutton Hackney Stud, Brentwood, Essex; 3, Mr. J. Makeague, Golborne Park, Newton-le-Willows.

Brood mare, any age, with foal at foot: 1, Mr. F. J. Batchelor; 2, Mr. T. B. Sykes; 3, Billington Bros.

Foal of above mare: 1 and 3, Mr. A. C. Carr; 2, Mr. F. J. Batchelor.

Mare, foaled in or before 1896: 1, Mr. A. L. Goodson; 2, Billington Bros.; 3, Mr. J. Makeague.

Filly, foaled in 1897: 1, Mr. W. Lawson; 2, Mr. E. Holmes.

Filly, foaled in 1898: 1, Mr. Lee Knowles; 2, Mr. W. Lawson.

DISTRICT COMPETITION.

Brood mare, any age, with foal at foot: 1, Mr. T. B. Sykes; 2, Mr. J. Storrar, jun.; 3, Mr. W. Parker.

Foal of above mare: 1 and 2, Mr. A. C. Carr; 3, Mr. T. B. Sykes.

HACKS OR RIDING HORSES.

Mares or geldings, 13 hands and under 14 hands: 1, Mr. R. Whitfield, 32, Hope-street, Liverpool; 2, Mr. W. J. Milton, Castle Hotel, Chester-street, Birkenhead; 3, Mr. W. Dean, 22, Upper Parliament-street, Liverpool.

Exceeding 15 hands: 1 and 2, Mr. W. Glynn, Brookhurst, Bromborough; 3, Mr. G. P. Davies, 15, Goree-piazzas, Liverpool.

14 hands and not exceeding 15 hands: 1, Mr. J. H. Jones, Knotty Ash, Liverpool; 2, Mr. W. Glynn, Brookhurst, Bromborough; 3, Mr. H. White, 404, Park-road, Liverpool.

13 hands and under 14 hands: 1, Mr. W. Milton, Castle Hotel, Chester-street, Birkenhead; 2, Mr. W. Glynn, Brookhurst, Bromborough; 3, Mr. W. Dean, 22, Upper Parliament-street, Liverpool.

Mare or gelding, exceeding 15 hands: 1, Mr. E. Holmes; 2, Mr. A. L. Goodson; 3, Mr. W. Glynn.

Mare or gelding, 14 hands and not exceeding 15 hands: 1, Mr. W. Lawson; 2, Mr. G. C. Wand; 3, Mr. J. H. Jones.

Mare or gelding, under 13 hands: 1, Messrs. E. and A. Baxter; 2, Mr. I. Garnett; 3, Mr. W. Foster.

HARNESS HORSES.

Tandem teams: 1, Mr. G. C. Wand, Ferniehurst, Baildon, Yorkshire; 2, Messrs. E. and A. Baxter, Hutton Hackney Stud, Brentwood, Essex; 3, Mr W. Glynn, Brookhurst, Bromborough.

Mares or geldings, exceeding 15 hands: 1, Messrs. E. and A. Baxter, Brentwood, Essex; 2, Mr. A. L. Goodman, Heathfield, Knutsford; 3, Mr. W. H. Thompson, Balmain Stud, Chequer House, Upholland.

14 hands and not exceeding 15 hands: 1, Mr. G. C. Wand, Ferniehurst, Baildon, Yorkshire; 2 and 3, Messrs. E. and A. Baxter, Brentwood.

13 hands and under 14 hands: 1, Mr W. Dean, 22, Upper Parliament Street, Liverpool; 2, Mrs. J. C. Glover, Warrenhurst, Blundellsands; 3, Mr. R. Whitfield, 32, Hope Street, Liverpool.

Under 13 hands: 1, Mr. G. C. Wand, Ferniehurst, Baildon, Yorkshire; 2, Mr. W. Foster, Mel-Valley, Moseley; 3, Mr. I. Garnett, 61, Aspen-grove, Liverpool.

Any height: 1, Mr. W. H. Thompson, Chequer House, Upholland; 2, Mr. G. Ledson, Bromborough; 3, Mr. W. Glynn, Bromborough.

HUNTERS.

Mares or geldings, to carry upwards of 14 stone: 1, J. H. Stokes, Great Bowden, Market Harborough; 2, E Hoyle, Moorlands, Bacup; 3, E. Brassey, Stamford Bridge, Chester.

To carry 12 stone and up to 14 stone: 1, Messrs. E. and A. Baxter, Hutton Hackney Stud, Brentwood, Essex; 2, E. Hoyle, Moorlands, Bacup; 3, R. M. Darlington, Haston, Hadnall.

Brood mare, with foal at foot: 1 and gold medal, W. Parker, Great Stanney Hall, Sutton, Chester; 2, the Trustees of George S. Brown, Bankfields Farm, Eastham; 3, H. Sutton, The Woodlands, Ledsham.

Foal of above mare: 1, H. Sutton, The Woodlands, Ledsham; 2, W. Parker, Great Stanney Hall, Sutton, Chester; 3, Trustees of George S. Brown, Bankfields Farm, Eastham.

Filly or gelding, foaled in 1898 or 1897: 1, E. Brassey, Stamford Bridge, Chester; 2, R. M. Darlington, Haston, Hadnall; 3, Malcolm Taylor, Barnston, Birkenhead.

LEAPERS.

Best jumper over hurdles, timber, stone wall, and water on the first day of the show: 1 and 3, Mrs. Blockley, Moor Hall, Madeley; 2, J. Jones, Whitegate Farm, Wrexham.

Best jumper over hurdles, timber, stone wall, and water: 1, T. G. Foster, Brailsford, Derby; 2, W. J. M. Cartan, M.R.C.V.S., Newtownwards, co. Down; 3, Mrs. Brockley, Moor Hall, Madeley; 4, J. T. Heap, Clarence Hotel, Ramsbottom.

Best jumper over hurdles, timber, stonewall and water: 1 and 2, Mrs. Blockley, Moor Hall, Madeley; 3, Mr. A. O. Davies, Panralit, Machynlleth, North Wales; 4, Mr. J. T. Heap, Clarence Hotel, Ramsbottom. Championship prize, Mrs. Blockley's Omega.

Tradesmen's and tenant farmers' classes.—Mare or gelding: 1, Mr. W. H. Thompson, Chequer House, Upholland; 2, Mr. J. H. Jones, Knotty Ash, Liverpool; 3, Mr. G. P. Davies, 15, Goree-piazzas, Liverpool; 4, Mr. O. Owens, 11, Admiral-street, Liverpool. Mare or gelding, under 14½ hands: 1, Mr. H. Williams, 66, Bentinck-street, Birkenhead; 2, Mr. J. H. Jones, Knotty Ash; 3, Mr. I. Garnett, 61, Aspen-grove, Liverpool; 4, Mr. W. J. Milton, Castle Hotel, Birkenhead.

Local tradesmen's classes.—Mare or gelding, 13½ hands and upwards, together with cart, van, or other two-wheeled vehicle: 1, Mr. H. Williams, Birkenhead; 2, Mr. W. Delamore, 393, New Chester-road, Rock Ferry; 3, Mr. R. Cundell, 435, New Chester-road, Rock Ferry; 4, Mr. W. G. Jeffs, 42, Bebbington-road, New Ferry. Mare or gelding, under 13½ hands, together with cart, van, or other two-wheeled vehicle: 1, Mr H. Foster, 126, Chester-street, Birkenhead; 2, Mr. W. Delamore, 393, New Chester-road, Rock Ferry; 3, Mr. W. Houghton, Home Farm, Oxton; 4, Mr. T. Hinton, The Marke, Birkenhead. Private turnout: 1, Mr. H. Williams, 66, Bentinck-street, Birkenhead; 2 and 3, Mr. W. J. Milton, Castle Hotel, Birkenhead; 4, Mr. R. Cundall, 435, New Chester-road, Rock Ferry.

Warrington.

The Warrington and District Agricultural Society's show was held on Thursday, and the show of horses was one of the best seen at any local exhibition this year. For this the Society is indebted to the president, Sir Gilbert Greenall, whose generosity and active personal interest make the show what it is. During the year Sir Gilbert has had made in Walton Park a show ring which, for all purposes of exhibition, is ideal. He has also made it possible to offer prize money three times the amount usually given, and to enlarge the scope of the show by adding open and other classes. Hitherto the show has been what its name implies, a district show. Its purpose has been to encourage breeding and to improve the stock on local farms. One needs only to look at the admirably arranged catalogue to note the extent to which this idea has been carried out. The insistence upon pedigree, particularly in the case of horses, distinguishes the show above most of the kind, and the success which has followed may be judged from the large number of entries. Unfortunately, the weather was very wet, and not all the kind provision that Sir Gilbert had made for the comfort of visitors could command the attendance deserved. Perhaps most interest centred around the hunters. Whisper Low, the winner in the brood mares, owned by Mr. C. Schwabe, of Altrincham, is a beautiful animal, full of quality, and with very good foal by Red Eagle. The foal was awarded first prize in its class. The second prize went to Mr. Charles Griffiths, of Northwich, for his powerful, short-legged mare, Lady Gamble, who had a great reputation as a hunter in her day. She had the misfortune to lose her foal. The second in the foals, owned by Mr. R. Prescott, of Northwich, is a good animal, whose dam is also a well-known hunter. A very nice filly, the property of Isaac Parish, of Northwich, took a first place, a neat roan gelding, Glengarry, owned by Mr. J. K. Priestnel, of Appleton, being placed second in the same class. The four-year-olds were a very good lot. The winner was Mr. J. H. Stokes's brown mare, Treasure, who was placed first in the Yorkshire Show. The second, a brown gelding belonging to Mr. Andrew J. Brown, of Doncaster, is a promising young horse, but was rather backward in condition. He was placed first in his class both at the Yorkshire and Lincolnshire Shows. The class for hunter mares or geldings to carry 13 to 14½ stone was unusually strong. Good Health, the winner, by Toastmaster, bred by the late Mr. Naylor, and now owned by Mr. Stokes, was first, the second being Sapho, owned by Mr. Arthur Brocklehurst, of Prestbury. The first place in the class for hunters or geldings to carry 14½ stone and upwards was given to a singularly handsome dark chestnut, King Bronze, owned by Mr Stokes. The second, Foxall, a bay gelding, the property of Mr. Andrew J. Brown, of Doncaster, has good prospects, but was not quite in condition. He was bred by Lord Rosebery at Epsom, and is by Foxall, his dam being by Controversy. The Rev. Cecil Legard, one of the judges, who rode Foxall round the ring, remarked that the horse was one of the finest gallopers he had ever been astride. Taken altogether, the hunter section was very good. Among the heavy

horses the brood mares of four years and upwards were a capital lot. The winner, Bounce, owned by Mr. A. McIntyre, of Lymm, has plenty of character. Mr. James Gould, of Lymm, took first place with a big, weighty foal, and a foal of beautiful quality belonging to Mr. William Blackburne, of Knutsford, was placed second. The winner in the filly foals, Oxford Fashion, was owned by Mr. R. Ireland Blackburne. The two-year-old fillies were exceptionally good. The winner was Lymm Lady, the property of Mr. James Gould, of Lymm, and she was also first in the open class. In the three-year-olds Bessie Collin, owned by Mr. James Billington, of Altrincham, was first. Bruce, a bay gelding, the property of Mr. Joseph Shakeshaft, of Lymm, was an easy winner in his class. In the open class for brood mares four years old and upwards Melody, owned by Mr. Victor Cavendish, M.P., was placed first. She carries her age well, and is of good type. Her foal, Holker Minerva, was placed first among the filly foals. The geldings were a big class and comprised several very valuable horses. Redlynch Duke, owned by Mr. A. M'Intyre, was the winner. He is a big horse with good joints, and is a capital mover. The second, Hulton Laddie, the property of Messrs. Jackson Bros, of Bolton, took the first prize at the London Shire Horse Show and was reserved for the cup. At present he is not showing to the best advantage. The cattle had neither the number nor the quality of the horses. There were, however, one or two good young bulls among them.

The judges for the various classes were:—Shires and draught geldings: Messrs. R. C. Cooper, Melton Mowbray; and Joseph Grimes, Chesterfield. Hunters: The Rev. Cecil Legard, Northampton, and Mr. C. M'Neill, Leicester. Hackneys and harness: Messrs. Eustace Smith, Newcastle-on-Tyne; and W. Bainbridge, Lancaster. Cattle: Messrs. William Roper, Carlisle; and Thomas Richardson, Cumberland.

Prize List.

HORSES.

SHIRES.

District Classes.—Brood mares, four years old and upwards, with foal at foot: 1, Mr. A. McIntyre, Lymm; 2, Mr. R. I. Blackburne, Liverpool; 3, Mr. W. Blackburne, Knutsford. Mares, four years old and upwards, without foals: 1, Mr. J. Gould, Lymm; 2, Mr. J. Shakeshaft, Lymm; 3, Mr. F. Worthington, Warrington. Colt foals: 1, Mr. J. Gould; 2, Mr. W. Blackburn; 3, Mr. T. Warburton, Warrington. Filly foals: 1, Mr. R. I. Blackburn; 2, Mr. A. McIntyre, Lymm; 3, Mr. R. I. Blackburne. Yearling colts or geldings: 1, Mr. T. Charnock, Hale; 2, Exors. of Mr. J. Weir, Warrington. Yearling fillies: 1, Mr. A. Broome, Preston Brook, Warrington; 2, Mr. T. Hardy, Knutsford; 3, Mr. R. Clarke, Warrington. Two-year-old fillies: 1, Mr. J. Gould; 2, Mr. J. Knowles, Altrincham; 3, Mr. T. Percival, Warrington. Three-year-old fillies: 1, Mr. J. Billington, Altrincham; 2 Mr. A. McIntyre; 3, Mr. T. Jeffs, Helsby. Geldings foaled in 1896, 1897, 1898: 1, Mr. J. Shakeshaft, Lymm; 2, Mr. J. Whitlow, Warrington; 3, Mr. R. Billington.

Open classes.—Brood mares, four years old and upwards, with foal at foot: 1, Mr. V. Cavendish, M.P., Carnforth; 2 Mr. A. McIntyre; 3, Mr. R. Ireland Blackburne. Colt foals: 1, Mr. J. Gould; 2, Mr. W. Blackburne; 3, Mr. T. Warburton. Filly foals: 1 Hon. V. C. W. Cavendish; 2, Mr. R. Ireland Blackburne; 3, Mr. L. Dodd, Malpas. Two-year-old fillies: 1, Mr. J. Gould; 2, Mr. J. Knowles, Altrincham; 3 Mr. R. Dodd, Tarporley. Geldings foaled in 1893, 1894, 1895, 1896: 1 Mr. A. McIntyre; 2, Jackson Bros., Bolton; 3, J. Shakeshaft, Lymm.

HUNTERS.

District classes.—Brood mare having produced a living foal by, or stinted to, a thoroughbred or registered hunter sire in 1900: 1, Mr. C. Schwabe, Altrincham; 2 and 3, Mr. C. Griffiths, Northwich. Foals by a thoroughbred or registered hunter sire: 1, Mr. C. Schwabe; 2, Mr. R. Prescott, Northwich; 3, Mr. W. Harrison, Warrington. Yearling colt, gelding, or filly by a thoroughbred or registered hunter sire: 1, Mr. R. Prescott; 2, Mr. C. Griffiths; 3, Mr. S. W. Gould, Lymm. Two or three-year-old gelding or filly by a thoroughbred or registered hunter sire: 1, Mr. I. Farish, Northwich; 2, Mr. J. K. Priestner, Warrington; 3, R. Billington, Stratton.

Open classes.—Hunter mare or gelding, foaled in 1896: 1, Mr. J. H. Stokes, Market Harboro'; 2, Mr. A. J. Brown, Doncaster. Hunter mare or gelding, foaled in 1893, 1894, 1895, or 1896: 1, Mr. J. H. Stokes; 2, Mr. A. Brocklehurst, Macclesfield; 3, Mr. J. H. Stokes. Hunter mare or gelding foaled in 1893, 1894, 1895, or 1896: 1, Mr. J. H. Stokes; 2, Mr. A. J. Brown, Doncaster; 3, Mr. J. Drage, Northampton.

HACKNEYS.

District classes.—Brood mare by registered hackney sire having produced a living foal by, or stinted to, a registered hackney sire in 1900: Mr. A. C. Sparkes, Altrincham; 2, Mr. J. W. Hewitt, Thelwall; 3, Mr. J. Makeague, Newton-le Willows. Foals by a registered hackney sire out of a mare by a registered hackney sire: 1, Mr. J. Makeague; 2, Mr. G Smith, Bold, near Widnes; 3, Mr. E. J. Sidebotham, Bowdon. Yearling colt, gelding, or filly by registered hackney sire out of a mare by a registered hackney sire: 1, Exors. of Mr. J. Blackshaw, Hatton; 2, Mr. F. G. Fairhurst, Witley; 3, Mr. A. C. Sparkes. Two or three year old gelding or filly by a registered hackney sire out of a mare by a registered hackney sire: 1 Mr. J. Makeague; 2, Mrs. M. Garnett, Prescot; 3, Mr. J. W. Hewitt, Thelwall. Pony brood mare not exceeding 14 hands, having produced a living foal by, or stinted to, a registered hackney sire in 1900: 1, Mr. R. I. Wynne-Jones, Hatton; 2, Mr. R. Tickle, Appleton; 3, Mrs. M. Garnett. Foals by a registered hackney sire: 1, Mr. J. Makeague; 2, Mr. R. I. Wynne-Jones; 3, Mr. H. T. Whitlow, Preston Brook.

HARNESS CLASSES.

Open.—Mare or gelding, 15 hands or over: 1, Mr. T. Mitchell, Bradford; 2, Mr. A. L. Goodson, Knutsford; 3, Mr. F. Baguley, Gloucestershire. Mare or gelding, under 15 hands and exceeding 14 hands: 1, Mr. G. C. Waud, Ferniehurst, Yorks; 2, Mrs. F. Holmes, Shipley; 3, Mr. J. Taylor, Wrexham. Mare or gelding, not exceeding 14 hands: 1, Mr. A. S. Day, Berkeley Stud, near Crewe; 2, Mr. G. E. Franklin, Derby; 3, Mr. N. Read, Pleasington.

CATTLE.

District classes.—Pair of dairy cows: 1, Mr. R. Clarke, Warburton Park, near Warrington; 2, Mrs. M. Garnett, Taebock, near Prescot. One dairy cow: 1, Mr. R. Clarke; 2, Mr. S. W. Gould, Lymm; 3, Mr. R. Clarke. Heifer, born in 1898 (for tenant farmers): 1 and 2, Mr. S. W. Gould, Lymm; 3, Mr. T. P. Taylor, Preston Brook. Heifer, born in 1899 (for tenant farmers): 1, Mr. S. W. Gould; 2, Mr. J. R. Newton, Warburton; 3, Mr. S. W. Gould. Bull, born in or before 1897: 1, Mr. J. Highfield, Northwich; 2, Mr. J. Mercer, Halebank, near Widnes; 3, Mr. J. Marsh, Warrington. Bull, born 1898: 1, Mr. J. Highfield; 2, Mr. C. Schwabe; 3, Mr. J. Marsh, Warrington. Bull, born 1899: 1, Mr. T. Adamson; 2, Mr. F. Worthington, Warrington; 3, Mr. S. W. Gould.

Ludlow

The annual show of the Ludlow Agricultural Society was held in Ludlow Park on Monday, and, weather apart, may be regarded as in every way fit to rank with some of the very best meetings promoted by the society since its inauguration fifty-one years ago. The prospects of a highly successful show never looked brighter, but the meteorological conditions which prevailed upset everybody's calculations. During the morning rain descended more or less without intermission, rendering the duties of the judges and others whose business kept them in the open extremely unpleasant, if not somewhat difficult of fulfilment; but in face of what was at times nothing short of a blinding storm, the work of the show yard was carried on with a determination deserving of all praise. The weather, of course, militated considerably against the attendance, for although it brightened up somewhat in the afternoon, enabling the programme of horse leaping, etc., to be carried out without much hindrance, the public did not turn up in such large numbers as in previous years, and it is to be feared that the society's funds will suffer thereby. The display of stock was on all hands admitted to be a remarkably good one. The cattle classes were well filled, among the animals shown being many that had been exhibited at the Royal; the horses, too, were a superior lot, especially the Hunters, than which a better lot has seldom been seen together in a showyard; while the sheep were a nice attractive collection, the competitors including a number of the best known breeders.

Prize List.

CATTLE.

A sweepstake of 1 sovereign each, with 5 sovs. added, for the best stock bull of any breed, open to all England: 1, Sir C. H. Rouse Boughton, Bart., Downtown Hall.

Bull calved on and after January 1, 1899, bred by and the property of the exhibitor: 1, Mr. J. Tudge, Duxmoor; 2, Mr. W. Tudge, Leinthall; 3 and r, Mr. T. Fenn, Stonebrook House; hc, Mr. L. Moore, Brampton Brian.

Four two-year-old steers, the property of tenant farmers: 1 Mr. T. J. Wolley, Clungerford; 2 and r, Mr. T. Mellings.

Four two-year-old heifers: 1, Mr. J. Tudge; 2, Sir C. H. Rouse Boughton, Bart.; r, Mr. T. Fenn, Stonebrook House.

Four yearling steers, the property of tenant farmers: 1 and 2, Mr. G. Griffiths, Orleton; r, Mr. J. Rawlings, Woofferton.

Four yearling heifers: 1, Mr. R. Green, The Whittern; 2, Mr. W. Tudge, Leinthall; r, Mr. L. Moore, Brampton Brian.

Four breeding cows or heifers with their calves, calved in 1900: 1, Mr. J. Rawlings, Woofferton; 2, Mr. W. Tudge, Leinthall; r, Sir C. H. Rouse Boughton, Bart., Downton Hall.

Four heifers calved in 1898, bred by and the property of tenant farmers who have not exhibited in the cattle classes at the Royal or Bath and West of England Shows for ten years previous: 1, Mr. R. J. Penhall, Weston, Pembridge; 2, Mr. J. Mellings, Lady Halton.

Best four heifers, calved in 1899, conditions same as in previous class: 1 and 2, Mr. Thomas Morris, Pembridge; r, Mr. J. R. Hill, Orleton.

Four breeding cows or heifers with their calves, calved in 1900, conditions same as in previous class: 1, Mr. J. Rawlings, Woofferton; 2, Mr. J. Mellings, Lady Alton; 3, Mr. J. W. Openshaw, Woofferton Court.

SHEEP.

SHROPSHIRE.

Best Yearling Ram (open to all England): 1 and 2, Mr. A. Tanner, Shrawardine; r, Mr. T. Fenn; hc, Mr. J. E. Farmer, Felton; c, Mr. T. Fenn.

Best Yearling Ram, bred by and the property of tenant farmers living within a radius of ten miles of Ludlow Cross, who have never exhibited at the Royal or Bath and West of England or any county show: 1 and r, Mr. J. Mellings, Lady Halton; 2, Mr. G. Howells, Leinthall; c, Edwards, Brothers, Stanton Lacy.

Best untrimmed Ram, more than two years old, bred by or that has been used for the previous year by a member of this society: 1, Mr. P. Everall, Ryton Grove; 2, Mr. T. Fenn Stonebrook House; r, Mr. A. Tanner, Shrawardine; c, Mr. A. Tanner.

Best pen of three ram lambs: 1 and 2, Mr. A. Tanner; r, Mr. B. Edwards, Aldon; c, Mr. T. Fenn.

Best pen of five yearling ewes: 1, Mr. T. Fenn, Stonebrook House; 2 and r, Sir C. H. Rouse Boughton, Bart.

Best pen of five wether lambs: 1 and 2, Mr. F. D. Bach, Onibury; r, J. Rawlings, Woofferton.

Best pen of five ewe lambs: 1, Mr. A. Tanner; 2, Mr. T. Fenn; r, Mr. B. Edwards; c, Mr. J. Rawlings.

Best pen of five yearling ewes, the property of tenant farmers who have not exhibited in the sheep classes at the Royal or Bath and West of England shows for ten years previous: 1, Edwards Brothers, Stanton Lacy; 2 and r, Mr. J. E. Farmer, Felton; c Edwards Brothers, Stanton Lacy.

HORSES.

Best mare most suitable for breeding hunters, with foal at foot, that has been the property and in the possession of bona fide tenant farmers at least six months: 1, Mr. P. Everall, Ryton Grove; 2, Mr. T. C. Downes, Richard's Castle; 3, Mr. C. C. Nott, Wigmore; r, Mr. H. G. Reynolds, Snitton.

Best three-year-old nag, gelding, or mare, that has been the property and in the possession of the exhibitor at least six months: 1, Mr. J. Ingram, Leominster; 2, Mr. G. H. Green, Wigmore; r, W. Blakeway, Wootton.

Best two-year-old nag, colt, gelding, or filly, by a thoroughbred horse or registered hunter sire: 1, Mr. C. B. Roberts, Burley; 2, Mr. G. H. Green, Wigmore Grange; 3, Mr. W. Blakeway, Wootton; r, Mr. E. H. Rickards, Ludlow.

Best yearling, by a thoroughbred horse or registered hunter sire, likely to make a hunter: 1 and 2, Mr. G. H. Green, Wigmore; 3, Mr. T. Sankey, Aston Hall; r, Mr. H. G. Reynolds, Snitton.

A special prize of a silver cup, value 3 guineas, for the best animal in classes 20, 21, and 22: 1, Mr. G. H. Green, Wigmore.

Best hunter, mare, or gelding, under five years, the bona fide property of and bred by tenant farmers residing within the limits of the Ludlow, Wheatland, and United Hunt: 1, 3, and r, Mr. G. H. Green, Wigmore; 2, Mr. C. B. Roberts, Burley.

Open class.—Best hunter gelding or mare [illegible] over, up to not less than 13 stone, the property of farmers residing within the radius of the Ludlow Hunt and [illegible] been in the possession of the exhibitor at least three months: 1 Mr. H. R. Evans, Kings Pyon; 2, Mr. C. B. Roberts; r, Mr. C. B. Roberts.

Best hunter four years old or upwards up to not less than 14 stone: 1 Mr. R. H. Evans; 2 and r, Mr. C. B. Roberts, Burley; hc, Sir W. M. Curtis, Bart.; Mr. T. H. Whiteman, Ashton Court.

Best hunter gelding or mare, foaled in 1896 [illegible]

[illegible] Agricultural Society [illegible] Mr. T. H. Whiteman; 2 Mr. C. B. Roberts: hc, Mr. F. C. Tomkins, [illegible]

[illegible] possession of the exhibitor at least six months; 1, Mr. M. Jones, Dolbury; [illegible] Mr. G. H. Green [illegible] Mr. J. Mansell; r, [illegible]

Best three-year-old cart gelding or filly, to be [illegible] purposes, to be bred by the exhibitor, and to have been in the possession of the exhibitor at least six months: 1, Mr. W. [illegible] 2, Mr. G. W. Marsh, Aston Munslow; r, J. Rawlings, Woofferton.

Two-year-old cart gelding or filly, for agricultural purposes, to be bred by [illegible] at least six months: 1, Mr. L. Moore, Brampton Brian; 2, Mr. J. E. Powell, Leominster; r, Mr. J. Lockhart, Norton; hc Mr. G. W. [illegible] Aston Munslow.

Best yearling cart colt, gelding, or filly: 1, Mr. M. Jones, Dolbury; [illegible] Mr. G. H. [illegible] hall; r, Mr. G. J. Gittins, Woofferton; c, Mr. W. Tanner, The Poston.

Best cart sucker: 1, Mr. M. Jones, Dolbury; 2, Mr. W. Edwards, [illegible] Mr. E. [illegible] c, Mr. W. T. Monnington, Walford; Mr. J. Jones, Norton.

The Shire H[illegible] [illegible] mare [illegible] or [illegible] in the Stud Book: 1, Mr. M. Jones; 2, Mr. L. Moore.

The Ludlow Town and Corporation prize: A [illegible] cup of the value of [illegible] and at [illegible] Mr. [illegible]

Mr. W. J. Bagnall's Shire stallion [illegible] served by any of his Shire stallions: 1 and 3, Mr. C. E. Edwards, [illegible] Mr. W. Crowther, Hay Wharf; r, Mr. H. Powell, Brimfield.

Best pony mare or gelding 14 hands, to be shown to saddle: 1, Mr. C. B. Roberts, Burley; 2 and 3, Mr. F. Ludlam, Ashford Hall; r, Pell and Rawlings, Dudley.

DRIVING AND JUMPING.

Turn-out.—The president's prize [illegible] turn-out, [illegible] within 12 miles of Ludlow, the [illegible] property of the exhibitor: 1, Mr. C. B. Roberts; 2, Miss Allcroft.

Best [illegible] never won a [illegible] property of the exhibitor, being within 12 miles of Ludlow: Mr. T. H. Whiteman; 2, Mr. R. H. Blakeway; 3, Mr. W. Tanner; r, Mr. G. F. S. Sanders.

Gainsborough.

From a financial point of view the Gainsborough Agricultural Society's Show at Gainsborough on Tuesday, was not a success, the very wet weather keeping numbers of attending visitors away. From an exhibitor's point of view, however, the show was never more successful. In the brood mare class of hunters, Mr. F. B. Wilkinson, of Cawood Lodge, Holmpierpont, secured both 1st and 2nd awards. The winner of the premier prize has won every time she has been exhibited this year, including successes at the Royal, Yorkshire, Newark, and Notts. All the classes were fairly well filled and the quality of the animals was very good. The luncheon took place as usual on the ground, but was not largely attended. The president, Mr. J. D. Sandars, J.P., presided, and was supported by Mr. Emerson Bainbridge, M.P., the officials, judges, and others. In proposing "Success to the Gainsborough Agricultural Show," Mr. Bainbridge advocated the sending of a representative of the society to inspect and report upon the exhibits of the agricultural section of the Paris Exhibition. He said that if that were done he should be pleased, if they would allow him, to defray the cost of printing and distributing that report throughout the division. (Applause.) And if a fund were raised to defray the expenses of a representative to the exhibition he would be pleased to subscribe £5 5s. There was so much to learn there, and he thought the society might send some of its best farmers.

Prize List.

HORSES.

[illegible] Shire [illegible] who [illegible]

1, J. Hanks, Walkeringham; 2, R. Brown, West Butterwick; 3, J. Dixon, Laughton; r, A. J. Swaby, Scunthorpe.

[illegible] G. White, East Markham; 2, F. W. Park, Retford; 3, R. Brown; r, Messrs. G. and H. Clixby, Northorpe.

[illegible] 1900: 1, J. Harrison, Everton; 2, J. Dixon; 3, F. W. Park; r, A. J. Swaby.

[illegible] Greathatch, Hatfield; r, A. H. Cocker, Marr.

[illegible] 1, F. B. Brook, Walkerith; 2, W. Yates, Gainsboro'; 3, J. [illegible]

D. Hopkinson; r, T. Lobley.

[illegible] ney sire: 1, R. Sandbeck; 2, T. Mason, Misterton; 3, A. H. [illegible]

son; 3, J. Smurthwaite, Retford; r, J. W. Drakes, Gringley-on-the-Hill.

Hunter foals: 1 and r, F. B. Wilkinson; 2, J. Smurthwaite; 3, F. E. Hagerup.

Special prize for the best foal insured in the General Insurance Company: 1, T. Lobley, Gainsboro'; 2, Wm. Smithson, Gainsboro'; 3, G. Antcliffe, Gringley-on-the-Hill; r, G. Pearson, Gringley-on-the-Hill.

Special prize for the best foal insured in the County Live Stock Association, York: A. J. Swaby; r, G. Willows, East Scrafwath.

Yearling hunter colts, geldings, or fillies, by a thoroughbred horse or registered hunter: 1, J. Smurthwaite, Retford; 2, A. H. Usher, Lincoln; 3, F. E. Hagerup, Wyndhurst.

Hunters, foaled in 1896, to be ridden: 1, J. H. Stokes, Great Bowden; 2, F. B. Wilkinson, Newark; 3, A. J. Brown, Andleby; hc, J. L. Bullivant, Torworth.

Hunters, five or six years old, to be ridden: 1, A. J. Brown; 2, J. H. Stokes; 3 (equal), F. B. Wilkinson and F. Clarke; 4, R. R. Chatterton, Stonegat.

Hackneys, to be ridden: 1, J. Robinson, Hull; 2, W. Wharton, Winterton; 3, H. Daniel, York; r, Chas. Scorer, Barnburgh.

Hackneys, over 14.2, shown in harness: 1, Charles Scorer; 2, J. Layne, Gainsborough; 3, R. Surfleet.

Hackneys, not exceeding 14.2, to be shown in harness: 1, C. Scorer; 2, Mrs. Robinson; 3, A. R. Humphrey, Morton.

Geldings or mares, any height, adjudged the cleverest jumpers: 1, W. Oldham, Gainsborough; 2, J. Todd, Southrey; 3, H. Grantham, North Thoresby.

Ponies, not exceeding 13 hands, to be ridden by boys under fourteen years: 1, H. Duckering, Northorpe; 2, G. Antcliffe, Gringley-on-the-Hill; 3, G. Winter, Corringham. Whip to the best rider: Master Swanston, Morton.

Tradesman's heavy turn-out for trade purposes in Gainsboro' or Morton: 1, Kelsey and Son, Gainsboro'; 2, W. Gleadell, Morton; 3, G. F. Cattle, Gainsboro'.

Tradesman's light turn-out (one horse), for trade purposes in Gainsboro' or Morton: 1, W. H. Rose, Gainsboro'; 2, Ben Wilmot, Gainsboro'; 3, A. R. Humphrey, Morton.

Geldings or mares for jumping: 1, J. Todd, Southery; 2, G. M. Cooper, Brocklesby; 3, H. Grantham, North Thoresby.

Huddersfield.

The newly-formed Huddersfield District Agricultural Society held its first show on the 4th inst., and the success that attended it shows that though the district of which Huddersfield is the centre is not now, strictly speaking, agricultural, the population still take a keen interest in the farm and its products. The site of the show was at Almondbury, on a pretty piece of ground overlooking the entrance to the Holme Valley. Fortunately fine weather prevailed and the attendance of visitors was most satisfactory.

For an initial effort the exhibition did credit to the district. No less than £300 was offered in prize money, and this had the effect of drawing together some capital stock. Horses were the chief feature. In this department there were 110 entries, representing some of the best known breeders in the North of England. All the classes were well filled, with the exception of that for agricultural stallions, any age, in which the first prize was taken by Mr. Arthur Lindley's Southgate Hero, which has recently been travelling the district. The class for agricultural mares or geldings of any age was a capital class, containing some most useful animals. There was keen competition for first place, which was ultimately awarded to Mr. J. W. Pollitt, of Ashton-under-Lyne. Of Hackneys and roadsters there was likewise an excellent show. In the class for Hackney stallions two of the best specimens of the breed in England met, viz., Mr. S. R. Tennant's Revival and Mr. T. Hall's Langton Masher. The merits of the pair were so level that the judges were a long time in giving their decision, placing them in the order just given. Mr. Ireland's Lady Connaught was a long way in front of her rivals in the brood mare class. The Hackney or roadster class was a good one for a country show, containing as it did Mr. Mitchell's Sam Weller, Mr. J. Robinson's Mornington Cannon, Mrs. Holmes's Pickwick, and Mr. Tyson's Sir George—all well-known prize-winners. Sam Weller, after a close fight, secured the verdict. Mrs. Holmes' Love Letter and Mr. Tyson's Lady Wiles were together in the next class, set apart for Hackneys or roadsters not exceeding 15 hands, and Love Letter carried the day, making a much better show than her rival. The two subsequently met in the class for cobs not exceeding 15 hands, with a similar result. Mr. Franklin's Lord Gobang won in both pony classes, Mr. Percy Robinson's Queenie being placed second in each case. In the hunter class for four-year-olds and upwards, the horses shown by Mr. A. J. Brown and Mr. T. Hall were of such equal merit, though differing entirely in character, that the judges wanted the owners to divide the first two prizes. This they declined to do, and a referee was called in, who declared Mr. Brown's to be the best. There was not a big display of cattle, but an interesting feature about it was the extent and quality of the dairy class, which had fifteen entries. Mr. S. W. Hackney was most successful, carrying off both first and second prizes. All the pig classes filled well, and there was keen competition in every one of them.

The following gentlemen acted as judges:—Horses—Messrs. R. Ford, Chevet Grange, near Wakefield; R. Whitworth, South Wood, Halifax; and J. Hanson, Longwood, Huddersfield. Cattle—Messrs. Wm. Hinchliffe, Adwick-le-Street; and John Hudson, Lepton. Pigs—Mr. Josh. Ashforth, The Rookery, Dronfield, Sheffield.

Prize List.

HORSES.

CART HORSES.

Agricultural stallion, any age: 1, A. Lindley, Pledwick Stud Farm, Sandal, Wakefield; 2, M. Mitchell, Beverley Road, Hull.

Agricultural mare, with foal at foot: 1, H. Brooke, Warren Field; 2, E. Hall, Fenny Bridge; 3, M. Shepherd, Almondbury.

Agricultural mare or gelding, any age: 1, J. W. Pollitt, Ashton-under-Lyne; 2, Aire and Calder Navigation Co., Huddersfield; 3, Bentley and Shaw, Limited, Lockwood.

Draught mare or gelding, with cleanest gears: 1, Aire and Calder Navigation Co.; 2, Jennens, Welch, and Co., Limited; 3, J. W. Pollitt.

HACKNEYS OR ROADSTERS

Hackney stallion, any age: 1, S. R. Tennant, Driffield; 2, T. Hall, East Farm, Langton, Malton; 3, L. Hinchliffe, Newmill.

Hackney mare with foal at foot: 1, J. T. Ireland, Malescroft Grange, Beverley; 2 and medal, W. E. Inman, Fenay Bridge; 3, D. Hopkinson's Exors., Bradford.

Hackney or roadster, exceeding 15 hands, to be shown in saddle: 1, T. Mitchell, Eccleshill; 2, J. Robinson, Hull; 3, G. Tyson, Mayfield Stud, Halifax.

Hackney or roadster, exceeding 14 hands, but not exceeding 15 hands, to be shown in saddle: 1, Mrs. F. Holmes, Shipley; 2, G. Tyson; 3, M. E. Shaw, Ashton-under-Lyne.

Pony, not exceeding 14 hands, to be shown in saddle: 1, G. E. Franklin, Derby; 2, T. P. Robinson, Wakefield; 3, C. O. Bastow, Howden.

Pony, not exceeding 14 hands, to be shown in harness: 1, G. E. Franklin; 2, T. P. Robinson; 3, C. O. Bastow.

Cob, exceeding 14 hands, but not exceeding 15 hands, to be shown in harness: 1, Mrs. F. Holmes; 2, G. Tyson; 3, M. E. Shaw.

Gelding or mare, exceeding 15 hands, to be shown in harness: 1, T. Mitchell; 2, G. Tyson; 3, Mrs. F. Holmes.

HUNTERS, ETC.

Hunter gelding or mare, four years old or upwards, to be shown in saddle: 1, A. J. Brown, Doncaster; 2, T. Hall; 3, E. Hoyle, Bacup.

Leaping Class: 1 and 2 (divided), C. Tomlinson, Selby, and T. E. Lavin, Ripon; 3, W. Favell, Sheffield.

Best-appointed tradesban's turn-out: 1, Wallaces, Limited, Huddersfield; 2, S. Lindley, Thongsbridge; 3, R. Barker, Birkby.

CATTLE.

Bull, any age: 1, J. Walshaw, Shelley; 2, E. Hall.

Milk cow: 1 and 2, S. W. Hackney; 3 and special, R. Barker, Birkby.

Heifers, not having more than two broad teeth: 1 and special, Mrs. E. Hall; 2, J. Roberts, Kirkburton; 3, J. and G. Brooke, Denby Dale.

PIGS.

Boar, any age: 1, A. Dewhirst, Bradford; 2, T. Veevers, Brierfield; 3, E. A. Wrigley, Almondbury.

Sow, in pig or milk: 1, E. A. Wrigley; 2 and 3, A. Dewhirst.

Store pig, not exceeding twelve months old: 1 and 3, A. Dewhirst; 2, T. Hollingworth, Meltham.

Two pork pigs, not exceeding twenty-four weeks old: 1, F. Riley, Turnbridge; 2, Wainwright Marsden, Almondbury; 3, A. Dewhirst.

Brigg Horse and Foal Show.

The nineteenth exhibition of the Brigg and District Foal Show Association was held on the 4th inst., in the Manor House field, Brigg. In the earlier part of the day the outlook was anything but promising; but rain, which had been falling for most of the night, ceased as the day wore on, and from noon the weather held fair. The violent storm in the night, however, had made sad havoc on the show ground. Not only had the roof of the grand stand been blown down, but several tents erected for refreshments and for exhibits of poultry, butter, etc., were laid to the ground. As the wind continued to blow with some force during the greater part of the morning, it was impossible to replace the covering over the grand stand. The tents, however, though considerably damaged, were put up again. The entries compared favourably with previous exhibitions, whilst the quality of the horses and foals was of a high standard. The Shires, taken as a whole, were a very fine collection, and elicited the admiration of the farmers, whilst among the visitors generally the riding, driving, and jumping competitions were features of special interest. There was a good attendance of visitors, including many of the leading agriculturists of the district. In addition to the show of horses, prizes were offered for dressed poultry, butter, eggs, honey, cream, cheese, and bread, and there were good displays of each.

Prize List.

Shire colt foals (local): 1, E. H. Cartwright, Keddingston Grange; 2, R. S. Hand, Croft; 3, W. B. Swallow, Horkstow; 4, H. Goodburne, Althorpe.

Shire filly foals (local): 1, T. B. Freshney, South Somercotes; 2, G. and H. Clixby, Northorpe; 3, R. Brown, West Butterwick; 4, W. B. Swallow.

Shire foals, foaled after May 1st (local): 1, H. Goodburn; 2, A. J. Swaby, Scunthorpe; 3, W. B. Swallow; 4, J. Dixon, Laughton.

Shire colt foals by Mr. Sutton-Nelthorpe's horses: 1, R. S. Hand; 2, W. B. Swallow; 3, A. J. Swaby; 4, Mrs. Taylor, Castlethorpe.

Shire filly foals, by ditto: 1, G. and H. Clixby; 2, W. B. Swallow; 3, J. Shucksmith, Worlaby.

Shire foals by Trent Conqueror or Patrician: 1, R. Brown; 2, B. Whiteley, Derrythorpe.

Shire foals (local): 1, H. Goodburn; 2, J. Shucksmith; 3, J. Dixon; 3, B. Whiteley.

Champion prize for the best Shire colt foal: E. H. Cartwright.

Champion cup for the best Shire filly foal: T. B. Freshney.

A silver teapot for the best shire foal, the property of any person residing in North Lindsey: W. B. Swallow.

Yearling Shire fillies (local): 1, T. Bond, Ludborough; 2, F. G. Taylor, Sturton.

Two-year-old shire fillies (local): 1, W. Rutter, Hogsthorpe; 2, T. Bond.

Shire mares shown with foals (local): 1, E. H. Cartwright; 2, A. Thompson; 3, T. B. Freshney.

The Shire Horse Society's silver medal for the best Shire mare filly or filly foal: W. Rutter.

Foals likely to make hunters: 1, H. Martin; 2 and 3, W. B. Swallow, Wootton; 4, W. Petchell, East Kirkby.

Yearling hunter colts or fillies: 1, A. H. Usher, Wickenby; 2, T. Sands, Grainsby.

Hunter mares with foals: 1, W. B. Swallow; 2, W. Petchell; H. Greatbatch, Hatfield; 3, T. Lobley, Gainsboro'; 4, A. H. 3, H. Martin.

Foals by Hackney stallions: 1, G. Clark, Doncaster; 2, A. Greatbatch.

Mares suitable for breeding Hackneys, with foals: 1, A. H. Greatbatch; 2, G. Clark.

Four or five-year-old hunter geldings or mares, ridden in the ring: 1 and 2, A. J. Brown; 3, A. Tomlinson.

Hackney geldings or mares, ridden in the ring, not exceeding 15.2: 1, J. Robinson, Hull; 2, R. Surfleet, Gainsboro'; 3, W. Wharton.

Geldings or mares, driven in harness: 1, C. Fowler; 2, G. Barron, Sheffield; 3, G. F. Cocking.

Ditto (local): 1, J. Scott, Moortown; 2, F. Hookham, Ulceby; 3, R. I. Swaby.

Ponies, under 14 hands, to be ridden by boy or girl under fifteen: 1, E. Ayre, Ulceby; 2, J. W. Cook, Kirton Lindsey; 3, W. Robinson.

Ponies, not exceeding 12 hands, to be ridden by boy or girl not exceeding twelve: 1, H. Duckering; 2, J. Skaith, Hibaldstow; 3, Master H. Hewitt, Brigg.

Donkeys, to be ridden or driven in the ring; no spurs: 1, G. Kitchen, Barnetby; 2, A. Fryer, Ulceby.

Geldings or mares, cleverest jumpers: 1, J. Todd, Southrey; 2, H. Grantham; 3, G. M. Sooper.

Whalley.

The Whalley Agricultural Society's Show took place at Whalley on Monday, and it suffered severely from the weather. Rain was heavy and almost incessant throughout the morning and afternoon, and the attendance consequently was of a meagre character. Fortunately the society's shows have been a series of successes for a number of years past, and, although the prize money given has always been sufficient to prevent any very large accumulation of funds, it is satisfactory to learn from the honorary secretary that the committee do not fear to meet the result of this temporary failure of receipts. About 678 entries were catalogued, a slight reduction as compared with last year, in numbers only, for the general quality of the exhibition was highly commendable. Light horses formed a good section. The Hackney Society's medal was awarded to Mr. Jas. Clarkson, of Farnworth, for his filly by Troubadour, shown in the class for three-year-olds for road or field. Mr. H. T. Parke, of Withnell, obtained the reserve number for this honour for a cob under 14 hands. Heavy horses were an even finer collection, and obtained much praise from the judges, who were especially pleased with the classes for brood mares and foals. The Shire Horse Society's silver medal for the best Shire mare, filly, or filly foal, was awarded to Mr. Jos. Smith, of Whittingham House, Preston, won by his one-year-old filly by Bury Victor Chief from a mare by Lancashire Lad II. The same society's silver medal for the best entire colt or colt foal went to the executors of the late John Mercer, of Preston, for a yearling colt bred by them. Mr. Yerburgh, M.P., the president of the society, was the winner in the class for bulls over one year old, with William the Conqueror, a Shorthorn which was second at the Royal Show at York and at the Dublin Show, and which recently took premier honours at Colne. The president also took two second prizes for cattle, in classes where Mr. W. Heaton, of Lostock Junction, was his more successful competitor, and Mrs. Campbell, of Gisburne, maintained her reputation as the possessor of good dairy cows. Sheep did not present an extraordinary display for a sheep-breeding district.

Prize List.

HORSES.

LIGHT.

Three years old, for road or field: 1, Mr. J. Clarkson, Carnforth; 2, Mr. R. Hothersall, Preston; 3, Mr. W. Winter, Accrington.

Two years old ditto: 1, Mr. R. Hartley, Balderstone; 2, Mrs. Hick, Mytton Hall; 3, Mr. J. Hargreaves, Wiswell.

One year old: 1, Mr. J. Melling, Garstang; 2, Mr. J. Ainsworth, Mellor; 3, Mr. C. V. Haworth, Poulton-le-Fylde.

Colt or filly foal: 1, Mr. E. Lawson, Accrington; 2, Mr. J. E. Riley, Accrington; 3, Mr. H. T. Park, Withnell Fold.

Hackney brood mare: 1, Mr. R. M. Birley, Hoghton Hall; 2, Mr. R. M. Birtley, Hoghton Hall; 2, Mr. R. Burrow, Kirkby Lonsdale.

Hackney colt or filly foal: 1, Mr. J. Melling, Garstang; 2, Mr. J. W. Liver, Garstang; 3, Mr. R. Burrow.

Brood mare, for road or field: 1, Mr. J. Melling; 2, Mr. H. T. Parke; 3, Mr. E. Cowell, Blackburn.

Mare or gelding, to be ridden: 1, Mr. J. L. Irving, Park Gate, Blackburn; 2, Mr. R. Hothersall, Preston; 3, Mr. J. W. Liver.

Cob, not exceeding 15 hands ditto: 1, Mr. H. T. Parke; 2 Mr. E. Howorth, Nelson; 3, Mr. J. W. Liver.

Ditto not exceeding 14 hands: 1, Mr. H. T. Parke; 2 Executors of Thomas Horsfall, Clitheroe; 3, Mr. R. Harrison, Chorley.

Pony, not exceeding 13 hands: 1, Mr. J. R. Culshaw, Blackburn; 2, Messrs. J. W. and E. Whittaker, Accrington; 3, Mr. J. Batty, Accrington.

HEAVY.

Mare or gelding, over 16 hands: 1, W. Blythe and Co., Church; 2, Mr. A. Bell, Fence, near Burnley.

Ditto, not exceeding 16 hands: 1, Mr. A. Bell; 2, Mr. J. Mawdsley, Rishton; 3, W. Blythe and Co.

Brood mare, over 16 hands: 1, Exors. of Mr. J. Mercer, Preston; 2, Mr. J. Crook, Hapton; 3, Mr. J. Smith, Darwen.

Brood mare, not exceeding 16 hands: 1, Mr. J. Billington, Balderstone; 2, Mr. H. W. Kearns, Accrington; 3, Mrs. Slinger, Whittingham.

Two years old gelding: 1, Mr. J. Moore, Simonstone; 2, Mr. L. Rawcliffe, Clayton-le-Moors; 3, Mr. H. W. Worsley-Taylor, Q.C., Whalley.

One-year-old colt or gelding: 1, Exors. of Mr. J. Mercer; 2, Mr. R. Blackburn, Whitestake; 3, Mr. J. C. Waddington, Burnley.

Colt foal: 1, Mr. J. Hodgson, Longridge; 2, Exors. of Mr. J. Mercer; 3, Mr. T. Haworth, Salesbury.

Two-year-old filly: 1, Exors. of Mr. J. Mercer; 2, Mr. E. Eastham, Whittingham; 3, Mr. H. W. Kearns.

One-year-old filly: 1, Mr. J. Smith, Preston; 2, Mr. R. Illingworth, Whittingham; 3, Mr. J. Crook.

Filly foal: 1, Mr. J. Crook; 2, Mr. J. Holden, Aighton; 3, Mr. J. Smith.

CHAMPION PRIZES.

Open to all England (animals eligible for the English Shire Horse Stud Book).

Shire brood mare: 1, Mr. J. Forshaw, Newark; 2, Exors. of Mr. J. Mercer; 3, Mr. J. Fox, Lancaster.

Three fat lambs: 1, Messrs. Pickup and Oddie; 2, Mr. J. H. olgate; 3, Mr. J. Wallbank, Hurst Green.
Scotch ewes: 1, Mr. J. Wallbank; 2 and 3, Mr. R. Tomlinson ead.

PIGS.

Boar, any breed; 1, Mr. T. Veevers, Brierfield; 2, Mr. G. W. an, Whalley.
Sow: 1 and 2, Mr. T. Veevers, Brierfield.
Sow, with litter: 1, Mr. W. Genner, Billington.
Cottager's store pig: 1, Mr. E. J. Heyworth, Bicup; 2, Mr. Hargreaves, Billington.
Store pig: 1 and 2, Mr. J. Eccles, Clitheroe.

Berkeley Hunt.

The annual exhibition of the Berkeley Hunt Agricultural Society was held, on Monday, in a field near erkeley Castle. The show, which had small beginnings, has now become recognised as among the rst in the county, and the liberal manner in which has been supported has enabled the committee to fer substantial prizes. This year the prize list mounted to £550, and as a result there was first-ass competition. Since its start the exhibition has ceived much practical sympathy from the Fitzardinge family, and the present owner of the Castle president, and was at the exhibition on Monday. he morning opened with a steady rainfall, which ntinued up to one o'clock, when there came a break the dull leaden clouds, and a few gleams of sunine heralded a change which was most welcome. he fine weather came too late to ensure so large an tendance as is usually met with at this popular ank Holiday fixture, but the gathering at the ringde and on the grand stand was exceedingly good, otwithstanding the adverse conditions. The total umber of entries received was not quite so large as st year, but this was accounted for chiefly by a lling off in the number of the horticultural exhibits, tributable for the most part to the dry season. So r as the quality of the stock is concerned, the show ay be pronounced one of the most successful in the istory of the Society. Several new classes were inoduced, with the idea of fostering interest in the ociety and carrying out its main object, which is he advancement of agriculture in the district. A rt mare and foal class, open to the county, found s place in the programme for the first time, and it an effort to get landlords in Gloucestershire to ow their animals, and thus spread the desire nong the farmers for a better class of animal. The ntries were fair for a start, but better things are oped for next year. No fewer than thirteen entries ere received for the cart mare and foal in the tenant rmers' class, thus showing healthy competition among the agriculturists, which should bear good fruit. The judges were struck with the soundness of the animals exhibited, and it speaks much to the credit of the Society that there is this desirable improvement. Mrs. Pick obtained the blue ribbon with Starlight, a useful black mare, and Mr. Griffiths was a good second with Smiler. The yearlings were not quite up to the standard the judges expected. In the hunting classes one of the most successful exhibitors was Mr. E. R. Apperly, who in the four-year-old class took first with Sporting Life, this being its maiden entry, while Catch Me obtained first place in the open event. In the hunting class, equal to twelve stone and upwards, Mr. J. W. Coren's Electricity beat Mr. Apperly's Sporting Luck, thus reversing the position of the horses at the Ledbury Show. In the pony class Mr. F. W. Butt, of Hartpury, repeated his success at Gloucester by taking the blue ribbon with Hartpury Model. Mr. E. S. Godsell, of Stroud, had first and second with the well-known Duke of York and Lady Lofty, and the pair took premier position in the pair class. Mr. T. Blinman, riding Mr. C. A. Daniel's Newcastle, added to his many jumping prizes in an entry of thirteen. The cattle were above the average, and a new class appeared for dairy cows in calf, Mr. T. Gazzard heading thirteen competitors with Damsel. Nearly all the animals met with the approbation of the judges. The distinction of winning the champion prize in the bull class fell to Mr. Ernest Hadley, of Coaley, who has a really fine animal in Ringdale Ralph, whose sire is Viator. The same animal secured the special prize of £5 offered by the local members of the Shorthorn Society. The Channel Island cattle were few in number, this breed not being very popular in the district. In a cheese neighbourhood like Berkeley it was not surprising to find good pitches on view. There was a higher standard than usual, both of the heavier and lighter makes, and in the open classes the competition was especially keen. Mr. G. F. Cullimore gained the champion prize for the best entry of cheese in the show. The Caerphilly and Wensleydale cheese were only fair, but the Stilton was of good make and quality. Butter and table poultry formed an important portion of the exhibition, and with a view of encouraging the keeping of fowls special prizes were offered for new-laid eggs.

Strathearn.

The annual show of horses, cattle, sheep, etc., in connection with the Strathearn Agricultural Society was held in the Market Park, Crieff, on Tuesday. The weather overnight was very wet, and during the forenoon it continued somewhat showery. Although the entries this year showed a slight decrease, the quality of the stock showed no deterioration from that of former years; in fact, in several respects was better, particularly in the horse section, which was reckoned the best exhibition of the kind in Perthshire. Shorthorns were an exceedingly strong section, and quite a number of the Highland Society winners were forward. This year substantial prizen, open to the counties of Perth, Argyll, Fife, Kinross, Stirling, Clackmannan, Linlithgow, Dumbarton, and Renfrew, were offered by the Shorthorn Society for yearling bulls and cows. The aged bull belonging to Capt. Graham Stirling, Strowan, was alone in his class, but he gained the championship and well deserved it. In a grand class of cows Captain Graham Stirling was first and third. The first prize cow is of the Sittyton type, and was got by Spring Robin. She had a very good bull calf at foot, which afterwards won first prize in his class. The second ticket went to Mr. Stewart, of Millhills, with Veronica 2nd, which was first at Perth. Mr. Graham Stirling was third with a big cow that was third at the Highland and second at Perth. There was not much between the first and second two-year-old heifers, both of which belonged to Mr. D. Stewart, of Millhills, and the judge had great difficulty in awarding the tickets. In yearling heifers a very good one belonging to Mr. Robertson, Ballechin, got by Mutineer and out of Tulip 4th, came to the front. She is altogether a characteristic heifer, and the female championship could not be denied to her. There were some promising bull calves, the prizes going to Strowan, Cultoquhey, and Crieffvechter respectively. Heifer calves were a very good class. Compared with last year, there was a slight falling off in the Aberdeen-Angus cattle catalogued. Mrs. Reid, of Auchterarder, had premier honours in aged bulls for Envoy of Beaton, a very sweet bull, which later in the day was awarded the male championship. Mr. W. S. Ferguson's Bowler was placed second. Mrs. Reid was the only exhibitor in the two-year-old class with Meridian of Glamis, a massive bull, which was purchased from Lord Strathmore at Perth as a yearling for 100gs. There was some good competition in the yearling class, and here Mr. Sharp, Bardrill, gained premier honour. There was a nice lot of bull calves.

Horses were a splendid feature of the exhibition. In Clydesdales there was a very good class of brood mares, where Mr. M'Nee, Colony, led with Poor Girl, a four-year-old by Montrave Mac. The yeld mares were a highly meritorious lot, and included two or three exceptionally good three-year-olds. Mr. Robert Paterson, Hill of Drip, near Stirling, was first with Lady Garnet, by Baron's Pride, a three-year-old that was first at Edinburgh Agricultural Show and fourth at the Highland Show. Mr M'Nee was first with a very nice foal out of his first prize brood mare. Mr M'Nee also gained premier place in a nice two-year-old class with a stylish filly by Baron's Pride. Messrs. Kerr, Lochlane, Hill of Drip, won Mr. Stewart's £10 10s cup with a three-year-old filly for best breeding animal in showyard.

Sheep were a grand show. In Leicesters competition was keen. For aged tups Mr. Pople, New Forest, won with the old sheep which was first last week at Perth and fourth at the Highland Show at Stirling. In tup lambs Messrs. Ferguson, Pictstonhill, and Thomson Gray, Innerpeffray, won all the prizes with sheep of good character. In gimmers Mr. Pople won first and second places with animals carrying fine coats. Shropshires were a small class. Blackfaced sheep formed one of the best exhibitions ever seen in Perthshire, particularly the males. In the aged class Lord Willoughby de Eresby, M.P., Glenartney, took first place with a home-bred three-shear, being a noted Loch Tayside breeder. Mr P Ewing, Ardconaig, who was placed second with a Glenbuck-bred £210 ram, which was third as a shearling at Edinburgh Highlands and first prize shearling and champion ram at Killin last year. There was a large class of shearlings, and here Mr P M'Lagan, Dunnablair, was first with a grand sheep sired by Young Sir Thomas, Lord Willoughby coming in second with a very gay animal and carrying a fashionable class of wool. Lord Willoughby also easily won in the two classes. Pigs were only a moderate lot.

Keele.

The forty-eighth annual exhibition of the Keele Agricultural and Horticultural Society was held in Keele Park on Thursday. The show is a comprehensive one, including poultry, pigeons, and dogs, whilst £100 was given in prizes for horse-leaping and turnouts. In the cattle classes there was not much competition, but the quality was very good. Mr Heath was first and second for bulls exceeding one year, also for yearling bulls. For bull calves Mr. Heath just defeated Mr. Bunch's exhibit, but the latter turned the tables in the class for Shorthorn dairy cows. In an open class for best cow in calf or milk Mr. Heath's Lady Kendall was second, gaining a special prize for the best cow exhibited by a tenant of Mr. Sneyd. In the cottagers' classes there were some small, but useful, cows, and Mr. T. C. Heath took most of the prizes for heifers. Horses were not quite as strong a section as usual, the open class for hunters particularly showing a falling off. Mr G. Holland, Keele, was first both for brood mare and foal and mare or gelding, for agricultural purposes. Mr. Holland was first for three-year-old gelding or filly. The most successful local exhibitors of hunters were Mr. S. Charlesworth (Newcastle), Mr. G. Holland, Mr. J. Young, Mr. S. T. Glover (Keele), and Mr. T. C. Heath. Mr. T. Appleby (Hixon) secured premier honours with Hixon Dora in the class for Shire mare with foal, Captain Haywood Lonsdale (Market Drayton) being narrowly beaten. Mr. Appleby's Shire foal was also placed first, with Mr. J. Colclough (Alsager) second. The class for hunter brood mares, with foal at foot or in foal, was a strong one. Two of the animals would have held their own in any company. These were Captain Haywood Lonsdale's Struan and a bay mare shown by Mr. F. B. Wilkinson (Edwinstowe, Newark). Mr. F. B. Wilkinson was unbeaten in the other classes in which he entered, viz., for hunter gelding or mare up to not less than 14st. and not less than 12st. respectively, Mr. W. F. Wilkinson (Madeley) and Mr. R. S. Wilkinson (Newcastle) being second in the two respective classes. Owing to the Board of Agriculture regulations, there were no exhibits of pigs, and sheep were not a particularly strong section. The ram lambs were a poor class, and the rest were of quite ordinary merit. Mr. A. E. Chadderton (Upper Heamies) was first and second for ram not under two years, first and second for shearling ram, first for pen of five ewes not under two years, and second for pen of five ewes, whilst Mr. G. Holland was first and second for ram lambs and first for pen of five ewes.

The Adulteration of Scotch Oatmeal.—The annual meeting of the National Association of Oatmeal Millers, Agents, and Dealers was held in the Religious Institution Rooms, Glasgow, on Monday, Mr. Charles L. Hunter, Edinburgh, presiding. There was a fair attendance of members. The annual report of the committee showed that during the year twelve new members had joined the Association. The committee have appointed Dr. Drinkwater, of Edinburgh, analyst to the Association, and he is at present engaged on an analysis of oatmeals, with the view of arriving at a means of detecting the admixture of foreign oatmeal with the home product. As soon as his investigations are complete the committee intend taking steps against those who are suspected of fraudulent practices. A circular is being issued to dealers drawing their attention to the Merchandise Marks Act, and urging them to get a guarantee from the miller or dealer from whom they buy. The finances of the Association were reported satisfactory, and the report of the committee was unanimously adopted. Office bearers were afterwards elected.

REGISTER OF BRITISH LIVE STOCK BREEDERS.

HORSES.

HACKNEYS.

MOORE, HENRY, Burn Butts, Cranswick, Hull. — Pedigree Stud of HACKNEYS, including many prize-winners; yearlings, two years, and others.—Can be seen on application to Henry Moore.

HACKNEYS. — JOHN N. ANTHONY, Sedgeford, near Lynn, Norfolk, breeder of Pedigree Hackneys. On hand, Colts and Fillies by most of the leading sires.

LLOYD, WALTER, Heaselands, Hayward's Heath, Sussex.—Small but select Stud of PEDIGREE HACKNEYS, Mares, Fillies, and Colts of best blood, including stock by Champion Ganymede, Agility, Winnal Fireaway, Model II., and other noted Stallions, at moderate prices. Appointments to view the stud (which is 1½ miles from Hayward's Heath Station, L.B. and S.C. Railway) on application to the owner, as above.

CLEVELANDS

HORSFALL, F. WILSON, Potto Grange, Northallerton.—Breeder of pure-bred CLEVELAND BAY and YORKSHIRE COACH HORSES. This stud has won far more prizes than any other again this year, and has won twice as many as any other during the last fifteen years with Clevelands. Many Royal and Great Yorkshire prize-winners for sale. One of the Stud Horses is Champion Broomgrove Pride 1249—first and champion R.A.S.E. Show, Maidstone, 1897; first R.A.S.E. Show, Birmingham, 1898; first and champion Great Yorkshire, Leeds, 1898; only times shown; fee £5 5s. Also breeder of pure-bred Shorthorns. Bulls and heifers for sale. Amongst others added to this herd in 1899 were Daisy Perfection, Richmond Daisy, and Highland Daisy, all bought at the Duke of Northumberland's Sale, at 210 guineas, 72 guineas, and 72 guineas respectively. Also breeder of Sussex black pigs, and several breeds of white poultry.

SHIRES.

MUNTZ, P. ALBERT, M.P., Dunsmore, Rugby—SHIRE-BRED STALLIONS, COLTS, MARES, and FILLIES. About a hundred of all ages. Prize-winners London and other leading shows. Also high-class Shropshire SHEEP, winners first prize at Royal Agricultural, 1886, second in 1887, and first in 1888.—Apply, THOMAS EWART, Dunsmore Farm, Rugby.

CONCHAR, JOHN, Wylde Green, Birmingham.—Breeder of SHIRES and HACKNEYS. Some good Colts and Fillies for Sale. Five minutes from Station.

TAUNTON, H. PERCY, Redlynch, near Salisbury, Wiltshire. Shire-bred STALLIONS MARES, FILLIES, and GELDINGS of the most fashionable breeding always for sale at moderate prices. The animals are kept entirely out of doors and in natural condition.

PONIES.

THE LARGEST STUD of SELECTED WELSH PONIES IN WALES.—Dinarth Hall Pony Stud Farm, Colwyn Bay, North Wales. Over 120 Ponies now on hand, including forty Brood Mares of the pure Welsh type, and several high-class Ponies, great goers, with style and action. 150 prizes won in 1898 and 1899. Ponies purchased from this Stud have won first prizes at Manchester, Birmingham, and Maidstone Royal Shows; also first and medal Crystal Palace, 1899. Sale in 1899 included two Entire Ponies purchased by the Government for Cyprus, several to America and France. Stud Horse JULIUS CÆSAR II. 5666, sire of first prize two-year-old pony filly, the first of his produce exhibited, London Hackney Show, 1900.

MILLER, W. S., Forest Lodge, Brecon, S. Wales, extensive Breeder and Exporter of the best class of WELSH MOUNTAIN PONIES and COBS. References and particulars on application.

MONTEFIORE, Rev. D. B., Mursley, Winslow, Bucks.—Prize PONIES always FOR SALE. Arab Polo Pony Stallion "Mootrub" (32), winner of a championship, silver medals, and many prizes. Particulars on application.

CATTLE.

SHEEP.

LINCOLN LONGWOOL.

DUDDING, HENRY, Riby Grove, Gt. Grimsby, Lincolnshire, has always for inspection and sale a large flock of pure LINCOLN LONGWOOL SHEEP, including many prize-winners, having taken the leading prizes for many years at the Royal and other shows for both rams and ewes, including champion medals at both the Paris Exhibitions, Vienna, Amsterdam, Canada, Australia, New Zealand, and all the leading prizes at Chicago; also the first for the best collection of Lincoln fleeces of wool at the Royal Windsor Show, which proves the character of this flock, which is most famous for their great size and 125 years' good breeding. Rams from this flock made the highest average on record last year. Riby Grove is seven miles from Great Grimsby, and three from Stallingboro' Station. Telegrams, "Dudding, Keelby."

FIELDSEND, C. S., Belmont, S. Willingham, Lincoln. Flock No. 59. Pedigree RAMS and EWES for SALE.

LINCOLN LONGWOOL.

ANDERSON, JOHN, Chapel Farm, Barton-on-Humber, Lincolnshire Breeder of pure-bred LINCOLN LONGWOOL SHEEP. Flock Book 106. These sheep are noted for having hardy constitutions, true character, and long, lustrous wool.—Telegrams: "John Anderson, Barton-on-Humber."

HOYLES, GEORGE, Manor House, Skidby, near Hull.—Pure LINCOLN LONGWOOL SHEEP. Registered Flock 136. Sires used: Skidby Constitution 3069, sire Skidby Conservative 1346, g. sire Old Constitution 308; Skidby Tory 1583, sire Riby A 358; Leconfield Pride, sire Casswell (16) 1753; Skidby Friar, sire Abbot 1—from the celebrated flocks of Messrs. Henry Dudding, J. Casswell, Hy. Smith, jun., etc. Heavy-wool Sheep for export. Also prize and prize-bred Polled Angus, Shire Horses, and English Ponies for inspection and sale.

T. C. DIXON, Brandesburton, Hull.—Pure LINCOLN LONGWOOL SHEEP, of best blood. Wool a speciality, with quality and size combined. F.B. 69. Rams, Ewes, and Lambs for Sale. Inspection invited. Telegrams as above.

HAMPSHIRE DOWN.

FLOWER, JAMES, Chilmark, Salisbury. Undoubtedly the leading flock of the day; in show yard records at all the largest shows, including the Challenge Cup at the Salisbury Great Prize Sheep Fair six years in succession; also highest average for same period for 100 ram lambs at annual sale, at Britford Fair, August 12.

The Flock is one of the oldest existing combining fine quality, strength, constitution, and true character.

"Fossil," sire of the highest-priced Hampshire Down Ram ever sold, was bred at Chilmark, and in service there last two seasons.

COLES, CARY, late C. and T., Manor House, Winterbourne Stoke, Salisbury.— Registered HAMPSHIRE DOWNS, prizewinners at the Royal, Bath and West, Royal Counties, and other shows. July 16th, at the Salisbury Great Prize Sheep Fair, this Flock won the challenge cup for pens of ram lambs, beating the Royal, Bath and West, and Royal Counties' prize winners of this year.

Annual Ram Sale on the premises, Friday August 3rd.

SHROPSHIRE.

COOPER, WILLIAM, AND NEPHEWS, "Cooper's Dip" Works, Berkhamsted, England. Breeders and Exporters of pure Shropshire Sheep. First and Third Prize for Ewes, Royal Show, 1898. Five hundred breeding Ewes. The largest export flock of Shropshires in England. The sires used present season include 310 Guinea Champion "Royal Record," Two First, One Second, and One Third Royal Show Prize winners.

LIVE STOCK AGENTS.

INVERNESS, WEST HIGHLANDS.—JAMES ARNOTT, Scotch Live Stock Agent, Ellandonan, Inverness, established 1870, selects and supplies on commission all classes of SCOTCH STOCK. He attends all the leading markets to purchase Stock at lowest rates. References can be given if desired to customers who have been annually supplied. All orders are personally attended to. List of classes and approximate prices sent on application. Reference required; terms cash. Telegrams: "Arnott, Inverness." J. A. is now booking orders. N.B.—Polled Angus or West Highland Heifers for crossing or feeding, in truck loads, at moderate prices. Fat Stock of all classes also purchased.

LARGEST Live Stock Agency.—Practical farmers in 57 counties (whose testimonials will be sent on application) testify their complete satisfaction with the live stock with which they have been supplied by E. GOODWIN PREECE, who attends leading fairs and sales to buy on commission CATTLE and SHEEP, for feeding, dairy, or wintering. Personal buying.—Address, Portland House, Shrewsbury.

FARM.—GRAIN, near Rochester, Kent; a short distance from Port Victoria, about two miles from Grain Siding and six from Sharnal Street Station on the Hundred of Hoo Branch of the South Eastern Railway. — To be LET at Michaelmas next, ROSE COURT FARM and MARSHES, the property of the Wardens and Commonalty of Rochester Bridge, at present in the occupation of the Representatives of the late Mr. J. R. Dickens, consisting of 644a. 3r. 26p., with two COTTAGES and HOMESTEAD of Agricultural Buildings, nearly 600 Acres of which are excellent GRAZING MARSHES lying compactly together, with Cattle Sheds, etc., the remainder being First-class ARABLE LAND suitable for the cultivation of early crops; also 27a. 2r. of MARSH LAND, in South Level, adjoining the Rochester Road.

For particulars apply to Messrs. COBB, Surveyors and Land Agents, 53, Lincoln's Inn Fields, London, W.C., and Higham, near Rochester

FARMS, ESTATES, MILLS, BUSINESSES, ETC.

MESSRS. CRONK'S LIST of FARMS, containing particulars of numerous Farms in Kent, Surrey, Sussex, and elsewhere, to be obtained gratis at their offices, or will be sent by post on receipt of a stamp. Properties inserted free.—12, Pall Mall, London, S.W., & Sevenoaks, Kent.

SUSSEX.
STOPHAM, near PULBOROUGH.

TO LET from Michaelmas, 1900, the MANOR FARM, with fine old-fashioned Farmhouse, substantial and well-arranged Farm Buildings, and about 163 acres Arable and 153 acres Meadow and Brookland. Rent £300.—Apply, W. B. HOY, Stopham Estate Office, Pulborough.

SUSSEX.—TO BE LET at Michaelmas next as a going concern, a Dairy Farm of about 160 acres, 250 of which are in grass and the remainder arable, close to a fashionable watering town. Present milk contracts up to about 120 gallons (imperial) per day, at 10d. per gallon. The farm is in a high state of cultivation and well adapted for both dairy and fattening purposes, the brookland of 110 acres being of special value for either system, and is well watered. The farmhouse is substantial and the buildings ample. There is also good cottage accommodation.

The farm valuation to be taken over according to the custom of the county, and all live and dead stock could be, if required, taken at valuation. The above is a very desirable undertaking for anyone who is seeking an old-established business.

Write to "FARM," Box 3, c/o Willing's, 162, Piccadilly, London, W.

MANCHESTER.—TO BE LET, FIVE-FLOOR WAREHOUSE, with good loading and electric light, suitable for provision trade; also two cool cellars, suitable for cheese, eggs, or butter. The whole of these premises are centrally situated in Hanging Ditch, with valuable frontage opposite Corn and Produce Exchange.—Apply, ISAAC NEILD and SON, 10, Chapel Walks.

CAPITAL DAIRY FARM, with good house, cottages, and farm buildings.

TO BE LET immediately BROOMLANDS FARM, in the Parishes of Titsey and Limpsfield, Surrey. Two miles from Oxted and Westerham Stations and about 20 miles from London. Area about 165 acres of which about 70 are light arable and keep land, the remainder meadow, with good water supply. Rent £200 per annum.

For further particulars apply to Messrs. MORRISONS AND NEALE, Solicitors, Reigate, Surrey.

FARMS, ESTATES, MILLS, BUSINESSES, ETC.

MILL (modern Roller Water), on the river Thames, TO BE LET immediately, through the decease of the owner, in a weekly country town (market). Capital wheat-growing district, and doing a large and fast increasing trade. Plant and stock at valuation. Lease on premises. Splendid mill buildings, dwelling house, orchard, paddock, and grounds. Steam power attached. A few miles from large population. Capital centre, surrounded by market towns and large villages.—Full particulars of HARRIS & JACKSON, Estate Agents and Valuers, Abingdon, Berks, and 18, George Street, Oxford.

TO MARKET GARDENERS and OTHERS.—CROYDON.—To be LET, SIX ACRES of well-mature Garden Ground, with Dwelling House, Stabling for three horses, and range of outhouses, close to railway station, and one hour of Covent Garden; rent £80.—Apply to Messrs. BOWDITCH and GRANT, Surveyors, 6, George street, Croydon. (8859.)

SITUATIONS AGENCIES.

WANTED, AGENTS for the SALE of ICHABOE GUANO, the highest Ammoniacal Guano, also for high-class Chemical Manures. All analyses and dry condition guaranteed.—Apply to DANIEL DE PASS and CO., 1, Fenchurch Buildings, Fenchurch Street, London, E.C.

FERTILISING AGENTS.—An agricultural landowner in Lombardy (Melegnano, Italy) desires an agency for nitrates, superphosphates, and all kinds of raw material for chemical manures. Apply to G. GIBELLI, care of Agenzia Manzoni, 15, Milan. References: The Committee of Agriculture of Milan and Bale, and Edwards Agricultural Machines, Milan.

CORN TRADE. Wanted, SITUATION as IMPROVER to attend markets and assist in office work. Three and a-half years' articles just expired.—Address, X. L., Office of this paper.

WANTED, PUPIL, for Barley Trade (resident), to attend markets weekly, Mark Lane twice and three country markets.—Apply, SPENCER RIX, Longwood, Norwich.

RATIONAL PIG KEEPING, to ensure Pigs [illegible] by W. T. MALLEN, Owner and Breeder of Prize Pigs, [illegible] Thousand Pounds [illegible] Farm, Lambourn, Berks. [illegible] Offices, 1, Essex Street, Strand, W.C.

THE QUARRINGTON RAMS.
(Flock Book No. 155).

Important SALE of Grand Lincoln Long-wool SHEARLING RAMS.

MESSRS. HINCKS & TURNER beg to announce their instructions from Mr. F. WARD, to SELL BY AUCTION, upon the premises, QUARRINGTON,

On TUESDAY, SEPTEMBER 4th, 1900,

80

of his Grand Lincoln Shearling

RAMS.

This Flock, established in 1841, has been enriched by purchases of Ewes from the Flocks of the late Mr. Hack, Silk Willoughby; Messrs. Clarke and Son, Ashby-de-la-Launde; late Mr. John Byron, Kirkby Green; Mr. Pinder, of Barrowby; Mr. E. H. Cartwright, Keddington; and Mr. H. Dudding, Riby; four of which were the 1st prize winners at the Louth Show. Notable Stud Rams, purchased at sums varying from 60 to 115 guineas, from amongst others: The Flocks of Mr. Dudding, Mr. J. E. Casswell, Messrs. Dean and Son, Mr. T. Casswell, Mr. Pears, Messrs. Clarke and Son, Mr. Wright, Mr. Goodyear, Mr Rudkin, Mr. Sharpe, and Mr. C. Clarke, have been used. The present collection show great size and capital constitution, with plenty of bone, combined with perfect fleeces, and can with confidence be thoroughly recommended. Specimens this year and the last two at the County Show, held at Spalding, Louth, and Lincoln (the only times exhibited), secured high honours.

The place of Sale is within One Mile of Sleaford Station on the Great Northern Railway, Grantham to Boston, and Great Northern and Great Eastern Joint Main Line, London to Doncaster, where Conveyances will meet intending buyers

Luncheon at 1 o'clock. Sale at 2.30.

Auctioneers' Offices—Sleaford and Leicester.

MARLBOROUGH FAIR.

WEDNESDAY, AUGUST 22ND, 1900.

MR. T. LAVINGTON will hold his usual SALE by AUCTION of Hampshire Down Ewes and Lambs in the above Fair, commencing 9 a.m.

Present entries comprise upwards of 10,000 Ewes and Lambs from well-known flocks and 250 grand Ram Lambs from high class registered flocks.

Further entries respectfully solicited.

Catalogues on application to the Auctioneer, Auction and Valuing Offices, Marlborough and Devizes.

THURSDAY, SEPTEMBER 13, next.
APPLESHAM FARM, SHOREHAM, SUSSEX.
About 2½ miles from Shoreham and Lancing Stations, L.B. & S.C.R.
Highly important SALE of SHEEP and DAIRY CATTLE.

MR. C. STRIDE has been favoured with instructions from Mr. WALTER WHITE (who is quitting and relinquishing farming) to SELL by AUCTION on the farm on the above date, the whole of his well known hill flock of DORSET DOWN SHEEP, consisting of about 1,500 EWES and LAMBS in ages as follows:—

219 two tooth ewes,
196 four tooth ewes,
179 six tooth ewes,
204 full mouthed ewes,
325 ewe lambs,
335 Wether lambs, rams, and ram lambs.

This flock has been in the White family for seventy years, and since being brought into Sussex from Dorsetshire by Mr. Walter White ten years ago, has been crossed with the Southdown.

The Ewes are very prolific and hardy of constitution, possessing the quality of the Southdown with greater size and scale. They will be sold in their natural condition, and work on the Downs for their living until day of sale.

Together with

48 GRAND HEAVY MILKING DAIRY COWS AND HEIFERS,

all with calves at foot or due to calve.

All the above cows and heifers are a Shorthorn and Hereford cross, were bred on the farm from cows specially selected for their milking qualities, and are well worth the attention of buyers.

The remainder of the Dairy Stock, with the Horses and tackle, will be sold on THURSDAY, SEPTEMBER 27 next.

Sale to commence at 1.45 with the Cows.

Luncheon obtainable on the premises.

Catalogues of the Auctioneer, Auction and Estate Agency Offices, 65, East-street, Chichester.

AUCTION SALES.

ON FRIDAY NEXT, AUGUST 24 (One o'clock)

REGISTERED SHROPSHIRE SHEEP.

MESSRS. EVANS' ANNUAL SALE at SHERLOWE, seven miles from Shrewsbury, four miles from Wellington, and two miles from Crudgington Stations, where conveyances will meet the morning trains.

ALFRED MANSELL AND CO. will SELL BY AUCTION, as above.

4 NOBLE SHEARLING RAMS.

(The first eight catalogued were Highly Commended at York, R.A.S.E.)

40 CHOICE SHEARLING EWES.

The Rams, about half of which are outlyers, will be found of "immense size" (and will bear the closest inspection), with lots of bone, and masculine type, yet true Shropshire character; and among them are several sires worthy of filling a leading place in the best flocks of the day.

The Sherlowe flock has always been renowned for the singular beauty and exquisite type of its females, and this year's selections are no exception to the general rule. Ewes selected from this flock have taken the highest position at several of the Australasian and other foreign shows, and have also proved very successful in breeding Prize-winning Sires.

Catalogues from ALFRED MANSELL and CO., Shrewsbury, who will execute Commissions.

ON THURSDAY NEXT, AUGUST 23RD (One o'clock).

MR. THOMAS FENN'S ANNUAL SALE OF PRIZE-WINNING SHROPSHIRE SHEEP.

ALFRED MANSELL AND CO. will SELL by AUCTION, at the BRAKES FARM, three miles from Bromfield and six miles each from Craven Arms and Ludlow Stations (Shrewsbury and Hereford line),

3 GRAND RAMS and

50 BEAUTIFUL SHEARLING EWES.

Never as a whole has this noted flock looked better than it does this season. The Rams will be found a truly grand lot of Sheep and the Ewes a smart, matchy lot.

Conveyances will meet all trains at Bromfield Station.

Catalogues from ALFRED MANSELL and CO., Shrewsbury, who will execute Commissions.

ON SATURDAY NEXT, AUGUST 25TH (Eleven o'clock) (not on August 18th, as previously announced).

REGISTERED SHROPSHIRE SHEEP.

BREEDERS' ANNUAL SALE.

ALFRED MANSELL AND CO. will SELL by AUCTION, in the SHREWSBURY SMITHFIELD,

100 grand SHROPSHIRE RAMS,

500 to 800 SHROPSHIRE EWES,

250 CLUN EWES and WETHERS,

being selections from the best flocks extant.

SPECIAL ENTRY.—70 good SHEARLING EWES from Mr. E. J. FRANK, Beslow.

Commissions faithfully executed.

Catalogues from ALFRED MANSELL and CO., Shrewsbury.

ON TUESDAY, AUGUST 28TH (One o'clock).
MR. WM. THOMAS'S ANNUAL SALE OF REGISTERED SHROPSHIRE SHEEP
AT
THE BEAM HOUSE, MONTFORD BRIDGE,
Six miles from Shrewsbury, on the Holyhead Road, and four miles from Baschurch Stations (where conveyances meet morning trains).

ALFRED MANSELL & CO. will SELL by AUCTION, as above,

40 GRAND RAMS,

80 CHOICE SHEARLING EWES.

The Sheep catalogued are good specimens of the rent paying Shropshire, with splendid wool and perfect skins. The Rams include several high-class sires and a lot of big, strong, outlying farmers' sheep in natural condition. The Ewes are a really choice lot, combining size with good form, true character, and rare quality.

Catalogues from ALFRED MANSELL and CO., Shrewsbury, who will execute Commissions.

OXFORD DOWNS, 1900.

SILCOCK'S CALF REARING.

CALF MEAL

To rear Calves economically and profitably use SILCOCK'S SOLUBLE CALF MEAL. Thousands of Calves are reared on it annually; it is a true milk substitute, is very easily digested, dissolves at once in water, gives least trouble in preparing, does not scour, is very economical in use, as one pint makes one gallon of thick gruel, and it fits early for cake feeding. It contains about 80 per cent. of soluble feeding digestible ingredients, while in milk, butter-milk, and whey the figures stand at 12½, 9, and 6 per cent. respectively. With the minimum of cost and trouble SILCOCK'S CALF MEAL gives the maximum results. Use SILCOCK'S SOLUBLE CALF MEAL, feed regularly, in right quantity and at correct temperature and you will have little trouble in rearing-paying calves.

Price, 12/6 per cwt., carriage paid. 5 cwt. lots, 12/-.

MACKINDER'S LAMB FOOD MILLS LINCOLN.

BIBBY'S "CREAM EQUIVALENT" for CALVES.

An Ounce of Fact is worth a Ton of Theory.

A STRIKING FACT.

In our Spring number of "Bibby's Quarterly" we reproduced the photographs of two groups of Calves which are now being reared at the Hornby House Farm, Bedale, Yorks, by his Grace the Duke of Leeds.

One of the groups is being fed on New Milk and the other on Separated Milk and "Cream Equivalent."

We asked our readers to tell us which of these groups were fed on New Milk, and 707 Farmers, Farmers' wives, their sons and daughters competed for a small prize which we offered to those who guessed correctly.

445 selected the wrong and 262 the right group.

We think the above striking FACT speaks volumes for "Cream Equivalent."

The "Cream Equivalent" can be had at 15s. per cwt., carriage paid to nearest station.

SOLE MANUFACTURERS:—

J. BIBBY & SONS,

GOVERNMENT METHODS OF DISEASE SUPPRESSION.

The opinions of no man carry greater weight in the great body of the English farming community than those of Mr. Clare Sewell Read. When he represented his native county in Parliament, he in very truth was the tenant-farmer Member for the entire kingdom, and his public utterances ever since have been regarded by statesmen and the general public as indicative of popular agricultural opinion, very widely prevailing at any rate, among occupiers of land and owners of farm animals.

Mr. Read has just launched out into strong invectives against the tedious, ineffectual measures taken by those in authority to stamp out swine fever. After reminding us that for fourteen years, after swine fever was scheduled as a contagious disease to be suppressed, the local authorities fought in vain against it, he puts the question, what has been the result of things since 1893, when the Veterinary Department of the Board of Agriculture took the administration in hand? Mr. Read culls from statistics the reply, and states it thus pithily:—"In the last year of the Local Authorities' reign the outbreaks numbered 2,748; in the six years the Board of Agriculture have managed swine fever over £800,000 has been spent, and more than 300,000 pigs have been slaughtered, with the result that in 1899 the outbreaks had been reduced to 2,182." He therefore deems the efforts made by the central authority, like those previously made by the local authorities, gigantic failures, quoting a statement recently made by Mr. Cope, the Board of Agriculture's chief veterinary inspector, that "the final extinction of the disease must be far from within reach." While another "great veterinary authority" thinks that it will never occur, as he told Mr. Read, that "the only way to get rid of swine fever is to kill every pig in the United Kingdom."

"But the worst of it is," says Mr. Read, "that this £800,000 has not been specially voted by Parliament, but has been abstracted from the Local Taxation Fund—a fund absolutely apportioned for the relief of rates." This is naturally considered altogether wrong, and the veteran advocate of tenant-farmers' rights is quite eloquent in his denunciation of the iniquity. He writes:—"The President of the Board of Agriculture is so popular in the House of Commons that he is congratulated on his success in grappling with swine fever. I call it a disastrous and costly failure, and taking the money from the Local Taxation Fund nothing short of political dishonesty."

Mr. Read is strongly of opinion that the extirpation of sheep scab might be accomplished just as easily as that of swine fever has been found to be difficult, if the officials of the Board of Agriculture would only devote themselves to that work. It could be done, he feels certain, in four or five years, at a tithe of the money now fruitlessly expended in efforts to rid the country of swine fever. Not only do we perfectly coincide in this opinion, but believe those who have had most experience in the matter would declare that compulsory dipping, if universally and effectually carried out, would be perfectly successful in stamping out sheep scab in a much shorter period than that stated. An appeal to the Board of Agriculture to direct its efforts to the extirpation of sheep-scab was, at its last meeting, made on the motion of Mr. Duckham, by the Herefordshire County Council, and we feel quite certain nothing would be more popular with the majority of English farmers than for the central authority to take administration into its own hands, with the view of enforcing universal compulsory dipping.

SAMPLES.

By a Man of Mark Lane.

I am informed that the post of manager of the Cambridge University Experimental Farm, Impington, Cambridge, has been filled up by the appointment of Mr. Henry Henshaw, Tythby Grange, Bingham, Notts. The farm is 140 acres in extent, and will be carried on almost entirely for experimental purposes.

The receipts on account of Revenue from April 1st, 1900, when there was a balance of £3,517,047, to August 11th, 1900, were £36,743,843 against £37,512,446 in the corresponding period of the preceding financial year, which began with a balance of £8,919,173. The net expenditure was £62,412,738, against £41,177,724 to the same date in the previous year. The Treasury balances on August 11th, 1900, amounted to £5,339,951, and at the same date in 1899 to £2,704,615.

In almost every branch of industry where labourers are required (says the *Globe*) the war tells its tale. The calling out of the Army Reserve and the embodiment of the Militia, together with the raising of the Royal Reserve battalions, have resulted in an unprecedented scarcity of labour. Farm hands in particular are at a discount, and harvesting operations have been dangerously impeded. As the result of an appeal to the War Office, an attempt is now being made to remedy this state of things, and a special furlough of one month is being granted to all Militiamen and Royal Reservists who desire to participate in the harvesting operations. The men will receive their ordinary regimental pay.

The Queen has granted to the Honourable Alexander Nelson Hood her Royal licence and authority to accept and wear the Insignia of Commander of the Royal Italian Order of the Crown of Italy, conferred upon him by his late Majesty King Humbert of Italy in recognition of his services in connection with agriculture in Sicily.

I have just heard that the premises of Everitts (Limited), corn and coke merchants, Oulton Broad, near Lowestoft, consisting of capacious granaries in which were stored quantities of corn, were destroyed on Sunday morning by fire. An elevator and engine-house were also burnt, the damage being estimated at over £7,000.

A case of interest to farmers and brewers was heard on Friday at Wareham County Court, Harry Budden, a farmer, suing Robert Cann, corn merchant, for £25 on a breach of warranty of seed barley. The plaintiff ordered a quantity of Hallett's pedigree barley. The yield turned out small, only 198 sacks being obtained from three acres, and when it was offered for sale to buyers for Burton breweries it was discovered to be a type of Goldthorpe barley, which expert evidence showed was 5s. different in value. The defence was that the seed when sold was believed to be Hallett's, having been obtained from a firm in Swethwick. It was not disputed that a mistake had been made. The Judge said the evidence showed that £75 had been lost, and the defendant as an honest man owned to the mistake. He gave judgment for the amount claimed, which he considered was a moderate one.

The Coach and Horses, an old wayside inn, facing the Chiswick Road, near Turnham Green, is, I notice, now being demolished, and with it and the laying out of the adjoining market gardens for building upon goes the last vestige of the rural road from London to Gunnersbury. Until quite recent years hedgerows and barns occupied the sites of the adjacent shops by the junction of the Goldhawk Road with the Chiswick Road at the spot called "Young's Corner"; but the district has now been altered so greatly that it is nothing more than an extension of London. Old times and new are in sharp contrast in the pulling down of the humble old roadside inn and the building of a palatial new one behind it, operations going on simultaneously. It was never a house famed in story or legend, but with the drivers of the market carts and the hay waggons pulling up at the roadside water-trough, beneath the swinging sign, to give their horses a drink, it greatly resembled one of Morland's characteristic old pictures of rural life.

AGRICULTURAL POLITICS.

By a Lobbyist.

Ere the House of Commons rose I had a long conversation with a distinguished politician and electioneerer as to the possibilities of the next election. He agreed with me that the Khaki fever has not had so contagious an influence on the villages as it has had in the towns; but he avers that its place has been taken by a more determined feeling. "Stop," has said the pro-Boer, "until the men come back maimed and wounded. You will find that every relation of that man will refuse to vote Tory." Well, in the opinion of this electioneerer, just the opposite will happen. Every wounded soldier who returns to his village home will be an object-lesson of Boer malice. He will be regarded as a definite invitation to retaliate upon the Boers in the tents of their English sympathiser. If the villager uses an adjective at all as he goes into the polling booth it will be rather an unsavoury one, and will precede the word "Boers." He will be induced because the fellow whom he has known since he was a lad has had a Mauser bullet through his leg to hate the Boers with a vehement hate. He will, in a word, regard the war as a personal quarrel.

This astute man had a precedent to quote in favour of his reasoning. This war, of course, has not aroused the intense feeling which was created by the Russian war, despite the fact that the issues involved are infinitely more ominous, and that the campaign itself is a bigger one. For years, however, after the Crimean fighting the name Russian was a term of reproach and opprobrium in the villages, and the Russian as an individual was regarded almost with loathing.

So it will be to-day. The man who will go into the country constituencies and champion

the Boer—particularly if he follow the Labouchérian and Wilfrid Lawson method, and represent him as a child of light to whom every Englishman ought to proffer his neck as a kind of foot-stool—will be regarded as a personal enemy. The bullet will be remembered; the white flag disgrace will be recalled; the language used by the pro-Boer advocates towards Englishmen will not be forgotten. The villager may not be, as a fact is not, a swashbuckling Alsatian; but he is an Englishman, and believes in his country, though his belief may be expressed in a somewhat incoherent fashion.

"What, then," I asked, "do you believe will be the result of the next election, so far as the county constituencies are concerned?" "There is," was the reply, "not a single county constituency now held by a Unionist which is in jeopardy. There are many held by Liberals which are certain to be lost. We sometimes forget that Sir Wilfrid Lawson is a county member. Well, his seat will inevitably revert to the Unionists. Another county Radical member whose seat will go is Mr. John Ellis. I have some reason for saying this."

"And what about Mr. Channing?" "Oh, yes, I know that Mr. Channing is scarcely less vehement than Sir Wilfrid Lawson himself in the intensity of his admiration for the Boers; and I am also aware of the fact that Captain Middleton, the Conservative chief organiser, means to concentrate a very stern attack upon his position. All the same, I think Mr. Channing will return to the House. Though to outside appearances a rural constituency, the Kettering division is moved by a variety of influences. For instance, co-operation is a great force there; and, of course, Mr. Channing has been one of the spokesmen for co-operation in Parliament. Then, too, Mr. Channing has managed to impress his personality upon the constituency, and thus has a considerable personal following. Yes, I think he will be returned, despite the fact that he has bidden the electors fall down and worship the delectable Mr. Kruger."

Speaking generally, this astute man believes that the result of the rural elections will be an addition of twenty votes to the Conservatives. Would it make any difference if the elections were postponed? He did not believe it would. The rural elector, is not, as is the town elector, a creature of passing emotions and evanescent sensibilities—he is not given to roaring himself hoarse and then forgetting why he roared. The Boer will, come the election in October or come it next April, be the enemy of his country—he will still be the rascal who has made many a village lad bite the dust. Besides, more of the wounded will then be on furlough; and every wounded man will be an argument in favour of the Unionist candidate.

"I know what I am saying," proceeded this electioneerer; "and I know, too, that I am repeating the views of Captain Middleton. The county constituencies are already, as a fact, captured for Unionism. Don't you see why it is that Mr. Herbert Gladstone is, wherever he can, drafting Imperial Liberals into the counties? What will kill the candidature of these men—I admit all unfairly—are the declarations of Mr. Labouchere, Sir Wilfrid Lawson, and the extreme anti-British papers. Yes, the county constituencies are already won to Unionism."

Now, I have looked down the list of new candidates who have been presented to the electors, and I am sorry to have to admit that I do not perceive one who is likely to make agriculture his first and chief concern. Certainly, however, Mr. Herbert Gladstone has been more astute in the selection of his later candidates than have been the Conservatives. For instance, his men seem to have intelligent views on the questions of tenure, rent, and compensation for unexhausted improvements. What is more, they seek opportunities to avow them. However, with all this I do not know one man who is likely to show in the House of Commons that the rural elector is as much deserving of attention as the loud shouting town elector.

Of course, I admit that Mr. Adeane, who is fighting South Hunts in the Liberal interest, has given a lifelong attention to agriculture and to the economics which control the interest; but I doubt that Mr. Adeane has sufficient self-assertion to induce him to impose himself on Parliament. I repeat, then, that on either side I do not know a man who is likely to be an influence in that political organisation of the agricultural forces which can alone make for reform. I hope my readers note this last phrase—"alone make for reform." We have had an Agricultural Holdings' Act Amendment Act in spite of agriculture. Mr. Walter Long was simply determined to redeem his plighted word.

What of the suggestion which emanated from the editor of the MARK LANE EXPRESS—the suggestion that an attempt should be made to present a definite rural programme to the electors? I sought anew to secure in the last days of the Session some further idea on this point as to the feeling of men who, if they have any direct interest at all, have that interest centred in agriculture. Nearly every agricultural M.P. is, I regret to say, more or less a Laodicean. He does not, in a word, care to take the trouble to make up his mind on things agricultural. The debates even on the Agricultural Holdings Bill were symposiums to be avoided.

This sentiment, or, rather, want of sentiment, was exhibited in the replies I received. "A very good idea," would be murmured, "a very good idea!" And then the author of the utterance would dismiss it, as though by his faint commendation he had washed his hands of it. You will, I am persuaded, Mr. Editor, get no help from the present M.P.'s in this business. Even some of the few Parliamentarians who do profess an interest in agriculture confess in an aside that they are possessed by ambitions of a more stimulating character.

The only agricultural programme that will be presented to the rural electors will be presented in the towns. Its one platform will be the housing of the rural poor. You will have the town orators picturing the labourers as housed in hovels fit but for swine. Charles Lamb will be quoted with unction:—

We quarrelled like brutes, and no wonder.
What self-respect could we keep,
Worse housed than your hacks and your pointers,
Worse fed than your hogs and your sheep?

This will be, I repeat, the only agricultural question presented to the electors. Of course, old age pensions is, as an electoral theme, derelict.

PRACTICE WITH SCIENCE.

The Dalmeny Experiments.

On Saturday the Kippen Farmers' Club, to the number of fifty, paid a visit of inspection to the home farms and experimental station of Lord Rosebery at Dalmeny Park. On arriving there the party were received by Mr. Drysdale (Lord Rosebery's factor) and Mr. John Hunter, F.I.C., F.C.S., who has charge of the scientific research work conducted at Dalmeny. The visitors were first shown over the farms, and were greatly impressed with the enormous crops which they saw growing there. They manifested a great eagerness to hear all about the system of cultivation which had resulted in the production of such wonderful crops. On arriving at the experimental station the plan of these extensive experiments was lucidly explained to them by Mr. Drysdale. A large proportion of this station is this year being devoted to testing the unexhausted values of the manures applied during the past four years. The different plots, after being dressed for the last four years with different manures or manurial mixtures, are now being cropped in the same rotation without any manures, and this course will be continued for the next three years, in order to thoroughly test the residual values of the manures applied in the previous four years. The results cannot, of course, be accurately stated till the crops are harvested, but, so far as appearances go at present, the crops are calculated to upset some common prevailing notions on the subject of residual values. One fundamental principle of the system of manuring which has been very successfully followed at Dalmeny is the annual application to every crop of 4 cwt. per acre of lime in the finely-ground state. In every case the plots which had received this small annual dressing of lime during the past four years, with or without nitrogen, phosphates, and potash, showed a much better crop than the corresponding crops which had received no lime during all that period. On the other hand, the plots which had received an annual dressing of 50 cwt. per acre of lime showed a poorer crop than those which had received the small dressing of 4 cwt. per acre. Year by year also it had been uniformly found that on those plots which had received the small annual dressing of 4 cwt. lime, the crops which had received their nitrogen in the form of sulphate of ammonia had yielded better crops, alike as to quantity and quality, than the corresponding plots which had got the nitrogen in the form of nitrate of soda, and this year, also, there was every appearance of the same results being obtained from the unexhausted residues of these manures. In every case, also, the plots from which potash had been withheld showed poorer crops than the corresponding plots to which potash had been applied. The visitors also noted with much interest that the crop grown without manure after clover was immensely superior to that grown after ryegrass without clover. Referring to the plots which had been under turnips for the last four years, Mr. Drysdale said that portion of the experimental station had been thrown out of its proper rotation through the crop of the first year being very badly infested with finger-and-toe, and they had then decided to devote it to a series of experiments for the purpose of discovering a cure for that disastrous pest. Mr. Hunter, arguing from the results of his previous researches, determined to apply a comparatively large dressing of caustic lime, as there was in this case a soil germ to be killed. He therefore applied a dressing of 1 ton per acre of ground lime in the autumn when the land was being ploughed, and another dressing of 1 ton per acre in the spring when the soil was being wrought, this treatment being followed up at seeding time with a dressing of 1 cwt. sulphate of ammonia, 3 cwt. ground undissolved phosphates, and 8 cwt. of kainit. The result was that on the soil so treated they grew for the next three years in succession a sound but comparatively small crop of roots, whereas on the adjoining plots, which had got an equal quantity of lime, but to which nitrate of soda or dissolved phosphates had been applied, or where the large dressing of kainit had been withheld, the crop was so rotten with the disease as to be scarcely worth lifting. Mr. Drysdale also directed attention to the results of another very original experiment. In their experiments of the last four years, they had invariably got better results from planting fairly full-sized potato seed uncut, as compared with planting cut seed or "seconds." This had led them to trying a somewhat similar experiment with turnip seed, and for that purpose he had ordered from a seed merchant a quantity of the best seed obtainable, irrespective of cost. When that seed was delivered he dressed it over again, and sowed the larger and heavier seeds on one plot, the smaller-sized and lighter seed being sown on the adjoining plot. The result, as was only to be expected, was that the larger and heavier seeds gave a crop of much stronger and more vigorous plants than was got from the smaller-sized and lighter seed. In this connection, Mr. Drysdale also mentioned that at the Dalmeny Home Farms the turnips were grown on drills which were only 24 inches wide, as it was invariably found that, when other things were equal, a much larger crop was got when grown on 24-inch drills than was got when the roots were grown on wider drills. This is a finding which has been frequently confirmed by the results of turnip-growing competitions throughout the country. As in former years, a portion of the experimental station is devoted to testing the relative cropping qualities of different varieties of wheat, oats, potatoes, etc. The varieties which have always given the best results at Dalmeny, and which in consequence are grown in preference to any others on Lord Rosebery's farms, are as follows:—Wheat, Webb's Red Standard; barley, Burton Malting; oats, Newmarket. The hay crop on the farms has this year yielded up to 3 tons 7 cwt. per acre for the first cutting, only one small patch of inferior soil having yielded less than 3 tons per acre.

Mr. Hunter afterwards addressed the company at some length on the biological principles on which the Dalmeny system of manuring was founded. An interesting discussion followed, and while there were differences of opinion as to the views which Mr. Hunter had expressed, there was but one opinion as to the results which had been produced by his system of manuring. The company were afterwards entertained to lunch, and a very pleasant afternoon was spent.

Scientific Inspection of Corn Trials.

Ever since the tumbling down of corn prices brought depression to British agriculture the necessity of growing the best of everything has been gradually asserting itself with increased potency every successive year, until it has become a matter of urgency. Farmers to get a living have not only to make the land yield to the very utmost of its capability, but have to stock their farms with the most valuable kinds of horses, cattle, and sheep; and not only so, but to raise from them the highest quality and most productive in everything they are accustomed to grow. To the same extent that this has brought pedigree live stock to the fore has it become all important to grow superior kinds of corn, roots, and green crops the achievements of the arts of cross-fertilisation and high selection; and those of our leading seedsmen who have applied themselves to the work of bringing these into existence for the use

of British farmers not only deserve the highest meed of praise, but the entire rural community stands indebted to them to an extent it is scarcely possible to over-estimate.

No seedsmen have devoted themselves more assiduously or successfully to this grand work than Messrs. Webb and Sons, of the Royal Establishment, Wordsley, Stourbridge. Long before depression came their spacious Kinver Farms were devoted to the improvement of the plants of the farm on a scale of magnitude which excited general wonder and admiration, and they have continued ever since to practise cross-fertilisation and high selection on such a truly grand scale that Webb's seeds have become quite a household phrase in every rural district. During the past year they have largely extended their corn trials by including as many of the old famous ordinary sorts as it was possible to procure, and adding thereto all the best reputed foreign varieties from every country noted for corn growth. These, together with their own highly perfected varieties, formed altogether a gigantic exhibition of corn plots, numbering 150—probably the largest of its kind ever brought into existence in this country. As several scientific men had expressed a desire to inspect these large corn trials, it was determined to have a field day—unfortunately fixed for the 9th inst., which turned out to be a regular soaker. This did not, however, prevent a considerable number from assembling, while so far from the continuous pouring rain interrupting proceedings, the ardour of the scientific men caused them to tarry for hours over the inspection of the corn plots. The party included Professor Blundell (Royal Agricultural College, Cirencester), Dr. Hunter (of the Highland Agricultural Society, Edinburgh), Professor Wallace (University of Glasgow), Professor Parry (North Wales University, Aberystwyth), Professor Middleton (Durham University, Newcastle-on-Tyne), Mr. Biffen (botanist, Cambridge University), Professor McAlpine (of the Highland Agricultural Society, Edinburgh), and others.

Messrs. Webb's own special varieties of wheat numbered nearly twenty distinct kinds, with the sterling merits of many of which the farming public are familiar, especially with Stand-up, Standard Red, White Queen, Hybrid King, Windsor Forest and Challenge White. There were several new, unnamed wheats not yet brought into commerce, one of which, a cross from Victoria and Chidham, excited great attention on account of its short, stiff straw, causing it to stand up well; the heads, too, were close-set with grain of apparently nice quality. This was deemed of high promise; and Mont Blanc, recently placed on the market, was well approved. The spelt wheats, fourteen in number, still green, formed a curious feature. They had been derived from North Africa, Spain, and the South of France, and will be utilised in originating fresh varieties.

The barleys formed a large and decidedly instructive series of forty-three plots, comprehending many of the best-approved Continental varieties and several English sorts advertised of high merit not originated here. These, for comparison, were growing side by side with several of Messrs. Webb's new varieties still subject to high selection, one of which seemed to possess so many features of real excellence that confident hopes are entertained that when brought out it will prove as popular as Kinver Chevalier and Burton Malting have become. The former, it will be remembered, won champion prize at the last Brewers' Exhibition for the seventh time. The latter has yielded in Scotland ten quarters of dressed corn to the acre, weighing 57lb. per bushel. Large fields of both kinds met the eyes of the inspecting party, having a truly magnificent appearance.

The plots of oats were seventy-five in number, and thus formed the largest cereal section. Among them were some which had been derived from all parts of the world, from countries as distant as Australia and China, the skinless variety of the Celestials being the greenest of the lot, while a black oat from France had ripened twenty days before any other. There were yellow and grey oats in the series, and the yellow ones seemed deserving, but there is a prejudice in this country against any not possessed of either a white or black skin. Most of the inspecting party were in perfect agreement that Webb's Bosworth, of all inspected, was likely to prove the heaviest grain-yielding variety of the entire lot. Dr. Hunter, however, gave the palm to Webb's Newmarket, as he said the high quality of the latter and its large proportion of meal to husk would pull down the scale if quantity of bushels did not. But allowing the Doctor to be right, the Bosworth can be grown on much poorer land than the Newmarket. A statement made by Dr. Hunter is, however, well worthy of attention: that in the Dalmeny experiments of Lord Rosebery this oat yielded two and a-half per cent. more meal than the Hamilton or any other oat grown in the Lothians tested.

The programme prepared for the occasion included several other interesting and instructive trials relating to scientific plant culture, but the corn plots were fraught with so many points of deep interest, and the savants lingered over their inspection so long that there was only time to give a cursory inspection to some really magnificent specimens of Messrs. Webb and Sons' own highly selected varieties of mangels, growing for stock seed in the same field as the corn, and to a large field of swedes in which there were no fewer than thirty-one different kinds growing side by side, all of which had been manured and treated precisely alike, and nine manurial trials in which Webb's Champion Imperial swede was employed.

Ever since Kinver trial grounds have been instituted has this custom been persistently pursued of procuring seed of all other kinds of swedes and mangels advertised as celebrities, that they may be tested alongside of the highly-perfected Kinver sorts. Only by taking this course can seedsmen entering for agriculturists understand their true position, or the extent any specially created or improved variety of theirs surpasses or falls short of others of its kind.

Precisely the same course is taken every year by placing all the most celebrated chemical manures manufactured in the kingdom in competition with the fertilisers of similar denominations and prices Messrs. Webb produce at their spacious Saltney Works in Cheshire. Great attention has been directed there for many years past to the art of manufacturing and blending manures so as to supply the farmer with the cheapest and best special mixtures for every crop he requires to grow. The large areas devoted to all kinds of agricultural products on the Kinver farms afford ample facilities for accurately ascertaining the plant food each crop likes best, and by skilful blending these manures are made strictly economical. These testings with other fertilisers are, after all, however, the most reliable experiments Messrs. Webb resort to in their aim to make their fertilisers surpass all others.

In the manure trials with Webb's Imperial swede, which according to report has yielded over 50 tons per acre, there were as many as nine different manurings, consisting of 6cwt. dissolved bones; 6cwt. superphosphate; 4cwt. super. and 2cwt. nitrate; 4cwt. superphosphate and 2cwt. ammonia sulphate; in two other plots 1cwt. of either nitrogenous manures in combination with the same quantities of superphosphate and kainit; then Webb's special turnip manure in two plots, one having 6cwt., the other 4cwt. and 2cwt. of kainit; the last plot being that of 6cwt. fish guano. This has been termed "The Giant Swede," and apparently it thoroughly deserves the appellation, especially when grown with the special manure. Mr. Hayton, of Wigton, grew as record crop of 56 tons 8cwt. per acre with this special manure.

An equally interesting item in the programme was that of two of Webb's newest varieties of mangel, the New Smithfield and the Lion Intermediate. There were magnificent specimens of both sorts growing for stock purposes, which attracted great attention from the inspecting party on their way to the corn fields. The New Smithfield seemed handsome, and more tapering and lengthy than most Globe varieties. It was awarded first prizes last year at Birmingham, Norwich, Leeds, and at several other big shows. According to Mr. Timmis, of Eccleshall, the Lion Intermediate produced for him, in 1898, eighty-six tons fourteen cwt. per acre.

In the near neighbourhood of the grain and root plots under inspection were also some splendid crops of thousand-headed kale, field cabbage, and kohl rabi. Messrs. Webb and Sons have always been "up-to-date" in perfecting high-class varieties of these pre-eminently serviceable plants to be utilised as supplementary crops to mangels, swedes, and turnips, on farms in general, and their Flockmaster and Drumhead cabbages have always been famed for immense, sound hearts of rare quality, with scarcely any waste in outside leaves. In their Farm Catalogue for 1900 will be found the following:—"The folly of putting all the eggs in one basket was painfully experienced by large numbers last year. There were important object-lessons for all, inasmuch as the cabbages, kale, and kohl rabi grew splendidly, even better than the mangels, so that those who had most of them were by far the best off in making provision for their stock. Consequently, while it must be acknowledged that nothing can take the place of swedes and turnips where they can be sucessfully grown, the information supplied in this catalogue will no doubt be of great service to those whose land is not perfectly suitable for those roots, or where in trying seasons their successful culture has been found difficult. There is abundant testimony that on such lands the supplementary crops above mentioned make good returns. There are fortunately fodder crops suited to all lands, and not only so, but by following the instructions contained in this catalogue, as to the best varieties and times of sowing, there is no reason why feeders of stock should not be provided with a green crop for consumption all the year round."

The catalogue then proceeds to point out how this desirable state of things may be secured. The kohl seed, either sown into nursery beds in March to raise plants for setting out in May, or drilled direct in March or April into the lands where the crop has to be grown, will yield bountifully for consumption from November until the following May. That Webb's Early Drumhead or Flockmaster cabbages, if drilled in April, or transplanted from nursery beds in May or June, yield immense returns of the most highly nutritious food from September to the end of the year. That Webb's Champion Drumhead raised in nursery beds for transplanting in summer is so hardy that the crops are available for consumption throughout January, and that if sown into nursery beds in August for November planting, the well known Flockmaster cabbages are raised which frequently yield from May until August. As to [illegible] which Messrs. Webb's [illegible] they [illegible] be abundantly proved "by sowing or transplanting at proper times it will be made to come in for consumption all the year round."

Both kale and kohl are no doubt crops which will be grown much more extensively in future to what they have been in the past, for they resist drought in summer and frost in winter better than any other green fodder crops British farmers can grow. The thriving and luxuriant appearance of a large field of Webb's Imperial Green kohl rabi attracted the attention of the inspecting party, and it was stated that it had not only taken three prizes at the London Dairy Show, but four prizes at the Bath and West Show on eighteen different occasions. Messrs. Webb, however, appear to give preference to their Excelsior Short-top, which is of remarkably quick growth and of choice quality.

There were twenty-six different varieties of potatoes in one of the trial fields, and a dual test was embodied in the display, for not only were their comparative merits placed under examination, but the worth and efficacy of Messrs. Webb's special potato manure was thoroughly demonstrated by one-half of them being dressed with it and the other moiety with kainit. Scarcely a year passes but Messrs. Webb succeed in bringing out some valuable new potato. Last year Motor received general approbation both on account of its fine, handsome shape and high quality of its tubers, and the year before in 1898 this potato was found to be one of the heaviest of croppers. Now we have another, in every respect well suited for a main crop on the farm, styled Commonwealth. It was awarded first prize at Birmingham Show last December as the best new variety.

Messrs. Webb's seed mixtures of grasses and clovers have always been highly popular among farmers, it being well known that their dressing machinery for cleaning them is very perfect, and also that great pains are taken to secure clovers from the best sources. There is nothing probably a farmer should be more scrupulously particular about than the character of his seed mixtures, and by dealing with the Royal Wordsley firm the surest means will be taken to have pure, good quality seed that will germinate. High selection has created two distinct varieties of cow grass at Kinver, both being of such apparent sterling worth that they have elicited high praise from botanists. Farmers have also found that Webb's Imperial Giant variety, under favourable circumstances, grows 5ft. high, and is capable of always producing two heavy crops, and sometimes, in well-manured, fertile soils, three in the year. The other Wordsley speciality is a late cow grass, valuable in drought seasons, when, owing to maturing a fortnight after other clovers, it often yields a heavy cutting when no other green thing offers itself for stock feeding. The lateness is solely in flowering. A heavy cut may be taken as soon as from other kinds.

So many farmers in present times grow green peas for marketing, and Messrs. Webb, having for a considerable number of years brought the arts of cross-fertilisation and high selection thoroughly into play most beneficially for the creation of new varieties, this review of the Kinver trials of 1900 would be incomplete devoid of allusion to the great reputation Webb's New Senator has been making this year. The pods come in pairs, and cover the vines so effectually that few leaves can be seen. For the farm and market garden alike this Kinver cross of Prince of Wales and Culverwell's Giant Marrow seems to defy competition on the score of productiveness. Other good sorts originated by Messrs. Webb, and very much adopted, are Perfection, Stourbridge Marrow, Wordsley Wonder, Kinver Gem, Chancellor, and Kinver Marrow.

There are at least a dozen rare varieties of carrots in the Kinver trial grounds which have been made suitable for field culture. As a heavy cropper Webb's Mammoth White can scarcely be surpassed. But those requiring to grow summer carrots for marketing will find that high selection at Kinver has created for them just what they require, the handsome-shaped Market Favourite, rich in colour, and of good quality. Intermediate and Altringham kinds have also been subjected to high selection, and bear the Kinver hall mark.

New Cure for Tuberculosis.

In the International Congress of Medicine, held recently at Paris, Dr. Labadi, delegate of the Medical Legal Society of New York; Dr. Bertheau, of Paris; and Dr. Ducamp, of Bordeaux, have reported on a new treatment of [illegible] by a Frenchman, Mons. [illegible]. This discovery consists in the direct [illegible] by means of static electricity. The most elaborate and circumstantial statistics of the three physicians, covering a period of two years, go to show that a high percentage of patients treated by this method have been [illegible]

LETTERS TO THE EDITOR.

Swine Fever: Why not Eradicate It?

Sir,—The President of the Board of Agriculture (Mr. Long) thinks swine fever can be as satisfactorily dealt with as other diseases have been, while Prof. Cope, Chief Veterinary Inspector to the Board of Agriculture, says: "The final extinction of the disease must be far from within reach," and my old esteemed friend, Clare Sewell Read, supports the view expressed by Mr. Cope, and even goes farther than that, and holds to the opinion that swine fever is an indigenous disease, giving as his reason that he can remember a precisely similar disorder sixty years ago.

Professor Simonds, writing on swine fever, than whom we have not a higher authority, says it cannot be positively determined whether it was imported from America or any European country; but that it was imported scarcely admits of doubt. He then added, "Such a disease once introduced and amongst such animals would at once find abundant means of continuance, and also of rapid extension, especially as for years no attempts were made to arrest its progress."

Mr. Read sarcastically remarks that "in the last year of the local authorities reign (in Norfolk) the outbreaks numbered 2,748—in the six years the Board of Agriculture have managed swine fever over £800,000 has been spent, and more than 300,000 pigs slaughtered, with the result that in 1899 the outbreaks had been reduced to 2,182. But the President of the Board of Agriculture is so popular in the House of Commons that he is congratulated on his success in grappling with swine fever," adding, "I call it a disastrous and costly failure, and taking the money from the Local Taxation Fund nothing short of political dishonesty." All this induces the inquiry—Is there not something radically wrong in the organisation of the Board; are they rightly constituted? Have they the right men in the right place? If not, then let us agitate until we get them so constituted. Past experience has shown the fallacy of our attempting to eradicate such diseases from the flocks and herds of Great Britain so long as they exist in Ireland, from whence we import an average of 600,000 pigs.

There is abundant proof that swine fever is not indigenous to the soil of the country, and therefore could be eradicated if the owners of pigs would act loyally, and would be honest to their country. The carefully prepared charts recently issued by the Board of Agriculture for 1895 and 1899 clearly illustrate that fact. Several years' experience in stamping out the disease in this county has proved it beyond the shadow of doubt, seeing that it rarely happens that we have an outbreak in the county, and when one occurs it is at once stamped out, and no further outbreaks occur until another case is brought into the county, while the adjoining county, Gloucester, is very rarely free from the disease.

It is the old cry, the disease is indigenous. That cry was very persistently raised by our opponents when we were endeavouring to eradicate foot-and-mouth disease from the herds and flocks of the country, and was believed in by a large number of farmers and others. But it has long since passed away, as manifested by the consternation displayed when the morning papers announce that an outbreak has occurred in York or some other distant place.

Holmer, Hereford, August 15th. T. DUCKHAM.

The Horse and the Empire.

Sir,—May I be allowed to make use of your columns in order to make an appeal to the public in reference to the above subject, and submit the following proposals for consideration?

1. That the policy of neglect is fatal to the interests of the Empire.

2. That it is clear that after all our experiences in the present war the Government means to do nothing with regard to this vital and important question.

3. That it is essential that these facts should be brought home to the people at large, and that the voting public should be asked to insist on the question being taken up at the coming election, and that the different political parties should be asked to state clearly what they mean to do and how they mean to do it.

I think that the above facts will speak for themselves better than any touching up that I can give them, and that it will be agreed by all those who have the welfare of heart that the time has come to act as well as talk. When I wrote my first letter to the Press last March I thought that the Executive would be only too ready to, at any rate, consider any proposal that was calculated to bring the great breeding experience which the Remount Department, and that there would have been only too thankful of the assistance of anyone who would help them to face this great problem. But it is not so, and it would be idle to say that any one of the political parties have taken the slightest trouble to set things right. Are the lessons of the war, then, already forgotten? Have we learnt nothing in Africa? And are those fearful and heavy losses that convulsed the whole country from end to end to be so lightly passed over and cast aside?

Is the war then to be whole waste turned on this one question to be thrown to the winds as if it was chaff? It is for this reason, then, that I make this appeal to the British public, an earnest and devoted appeal, and ask them to stand by me, and see if something cannot be done; and I would propose that a society should be formed called "The Horse and Empire Society," whose object should be to bring this question home to the people of England at the next election. As far as my humble services are concerned, I am willing to give them free and undertake the writing part if the out-of-pocket expenses are paid. I do not think they would necessarily be heavy. Printing and postage of course would have to come in, and the expenses of spreading pamphlets, etc., among the voting public to educate them on the subject in hand. A treasurer should be fixed on. I dare say one of the managers of the banks here would undertake it (there are some firms of good standing); or a meeting might be called in London; the sooner the better, I say.

As regards the objects of the society, I should like it to be a broad one. I know what I think myself, and that is a national stud, managed by the Hunters' Improvement Society and run by the Government, is the way to tackle it, but at the same time I should like the question to be fairly gone into from all sides, and the best result decided on. For the Hunters' Improvement Society I am not, as yet, instructed to speak, but I think I am safe in saying that they are good men and true, and if the Government really meant business they would do what they could to help it. Will those, therefore, who are inclined to help me kindly write to the address below? I will undertake their letters shall be attended to.—Yours, etc., W. PHILLPOTTS WILLIAMS.

Llangarran, Salisbury, August 14th.

Pigs at the Lancashire Show.

Sir,—Your correspondent "Anon" complains of your report of the pigs at the Rochdale Show for two, amongst other reasons, want of detail and in correctness. As to the first, a detailed list of the prize winners would have simply misled your readers as to the merits of the respective herds of pigs represented, since the placing of the prize cards appeared to partake very largely of a lottery. It would be much fairer to all exhibitors if the Council of the Royal Lancashire Society were to appoint as steward of the pigs someone who is not a dealer or breeder of pigs, someone whom the judge does not in almost every class consult as to the giving of the prizes ere he books his determinations, and someone to act as judge of pigs who is not a local man, and who is of a different class.

"Anon" complains of want of correctness, and writes that "the Lancashire Show was without doubt the premier pig show of the season." If all "Anon's" facts have an equal foundation I should think he would make a first-class reporter for some papers, since his deficiency of knowledge is only equalled by his assurance. In the report of the Bath Show of the Bath and West of England Society I find there are twenty classes for pigs, at the R.L.A.S. eleven classes. The entries of pigs at Bath numbered 133 against 90 at Rochdale, or nearly 50 per cent. more. Then as to the quality of the exhibits, the whole of the pigs at Bath were said to be infinitely superior to three-fourths of those at Rochdale. "Anon's" complaint of the reports on the pigs may have some foundation, but there are two far greater blots—the so-called judging of pigs at many of the shows and the attempts at fraud by certain of the pigmen. What would be thought in any other section of an animal being exhibited one week by one exhibitor, then sold by him to a second party, and shown the following week as bred by its then exhibitor—a third party? This gross fraud may have been seen recently.

NEMO.

Great Losses by Flour Importation.

Mr. Thomas G. Read's letter on the subject has been productive of much correspondence. A Plumstead gentleman, signing himself "Cobdenite," writes:—

"The calculations of Mr. T. G. Read seem very like an ingenious attempt (with the aid of a chartered accountant) to prove that two and two make five.

"Assuming that his figures and facts are correct, we are asked to believe that the importer of flour actually and systematically chooses to pay a higher price for his purchase than if he imported wheat and had it ground in this country. Obviously, the enormous loss of the country falls upon those foolish individuals who import flour when they might import wheat at so much greater advantage to themselves.

"I am not in the trade, and profess no technical knowledge of the subject; but I do believe in the principle, *commodum cujusecumque commodum respublicæ*; and, unless either Mr. Read or some importer of flour can explain the inscrutable motives which have led such men to throw away £25,702,891 gratuitously, I think I shall not be alone in doubting assertions which I cannot disprove.

"I am sorry to cast suspicions on figures vouched for by a chartered accountant, but the result of the calculation is so peculiar that I think some further explanation will be needed before calling for legislation to compel importers to study their own interests."

Mr. Read's reply was as follows: "I note that 'Cobdenite,' although endeavouring to discredit my calculations, carefully avoids directly challenging them. If he believes they are an attempt to prove that 'two and two make five,' he is entirely wrong, as I have purposely under-estimated our losses. Surely we pay more for the substitutes for wheat offals we import than we lose by leaving the wheat offals abroad.

"It is a mistake to imagine the loss falls upon those individuals who import flour. It falls on the whole nation. A four mill gives employment to so many trades indirectly, besides those actually working there, that so many of our mills having in recent years stopped working must have made a great difference to milling engineers, sack makers, cart builders, farriers, and others. The price of a ton of wheat offals is now often about the same as that of a ton of wheat. Formerly a bag of bran was about twice the present size, and the price very different. It must be borne in mind that the flour which comes into this country is often not ordered, but sent to sell much as one sends cattle to market.

"There is a good demand for wheat offals in the United States, the Milwaukee offals being largely used round Chicago for pig-feeding, and much of the pork produced is sent to us. Nothing gives better milking results than bran and oats for cows. In France the import duty on wheat is 12s. 3d. per quarter, but the port millers are allowed to import wheat duty free, on the understanding that the flour produced is exported to other countries, the French Government knowing that the more wheat offals there are in the country the greater the number of head of stock kept, which gives an increase in the home-made manure, and thus larger crops.

"Perhaps if our present Government had faced this question, we should not have just had to borrow from the United States for the War Loan, as much money the States now possess would have been held by us. The importation of flour is a much greater question than 'Cobdenite' appears to fancy."

Mr. F. T. Haggard, Tunbridge Wells, says that past and present figures illustrate the truth of Mr. Read's remarks. "We know," he says, "how it has affected our millers and their industry and the labour employed by them in it, also those who have to manufacture milling machinery. We have been justly styled 'a nation of shopkeepers,' but how does it come to pass that the interests of the manufacturers and producers are thus neglected in the United Kingdom while the interests of those wealth-creators in other countries is looked after? I expect the reason will be found in the fact that our Government fears to interfere in the matter. If I am correct in my surmise, the question arises, on what are their fears founded? Here again I think I can suggest the answer, which is that the notion of free trade has been nursed to such an exaggerated degree by those who have been responsible for the over worship thereof that the interests of manufacturers and producers have been sacrificed on the plea that the consumer is the idol to worship. We are all and must be consumers, but production is the basis of wealth, which has only to be sufficiently affected by that wealth coming from abroad instead of being created at home to by degrees interfere with our national success, by which all will suffer. Production must precede consumption, and with our enlarging population we want it to be an increasing quantity so as to meet our additional imports, and towards doing which we have been exporting our coal, thereby enabling the increase of imports to be met by the export of that invaluable commodity. The deeper we go to win it the more costly it will be, and the more we export the less we must possess for home purposes, and it follows as a matter of course that in the face of that export it will increase the difficulties that our manufacturers already experience in competing with the outer world. I fear we shall not find our present or any Government willing to act until the consumer has been sufficiently educated to see the error of his present policy (which is nothing less in the long run than 'penny wise and pound foolish'), and aid those in power to introduce remedies. I ought rather to say to force them to do so, for at present they have not the pluck, however desirable those remedies may be. The responsibility for introducing desirable measures therefore rests on the shoulders of those who possess votes in the United Kingdom."

Mr. S. H. Terry, Member Inst. Civil Engineers and Member of the Royal Agricultural Society, endorses the letter of Mr. T. G. Read. He says: "By paying full wheat price for a bag of flour, leaving in America, Hungary, or Russia the sharps, toppings, pollard, germ, and bran, our nation suffers, not specially the flour importer (he makes his profit on the flour as such). The price of the flour covers the cost of grinding and the profit on grinding, thus paying for the structure of the mills used in foreign countries for grinding our flour, paying also for the milling machinery, the steam power to drive it, the shafting, belting, etc., the wages of all the men employed in building the mill and making all the machinery, the wages of the millers, and the profits

on all these, the rates on all these buildings, and on the dwelling-houses of the men employed.

"With the so-called 'offal' (has not the term much to answer for in causing the apathy with which this great question is regarded?) left behind, our competitors grow pork, feed cattle, and sell us meat, butter, and cheese grown and produced from the nourishing materials which they have stripped from our flour. The Board of Agriculture and the Royal Agricultural Society of England will have to look into this question in the near future."

The Royal Agricultural Society.

The following letter appeared in the *Times* of the 10th inst.:—

Sir,—The financial position of the Royal Agricultural Society of England is such as to cause very serious concern to all its members. It has a gross income from all sources of from £25,000 to £30,000 per annum, and although the membership still remains at, or near, high-water mark, the funds are going down at an alarming rate.

At the end of 1886, when Mr. Jenkins, the late secretary, died, the reserve fund and capital stood at £31,955 in cash and Consols, in addition to furniture, books, pictures, and country meeting plant. To-day the liquid assets of the Society consist of £10,360 cash and Consols, in addition to £13,000 Harewood House debenture stock, and the furniture, books, pictures, country meeting plant, etc.

The actuarial liability of the Society to its life members is estimated at a present debit value of £18,043, although it is admitted in the special report of the auditors that the annual cost per member to the Society has exceeded the amount upon which this estimate is based. No account has been taken of the Society's liability to its life governors, for whom a *pro rata* provision of £2,100 should also have been made, thus making the total liability of the Society to its life governors and members £20,143, calculated on a basis which is admitted by the Society's auditors to be inadequate. When the total liabilities of the Society are faced, and assuming the Harewood House stock to be a realisable asset, the total capital of the Society is represented by the sum of £3,217, in addition to the furniture, books, pictures, country meeting plant, etc. This small sum will be entirely swallowed up by the loss on the York Show, so that the Society finds itself without any reserve fund, and no capital, except what is locked up in office furniture, books, pictures, country meeting plant, etc.

Having realised the fact that the funds of the Society are in a parlous condition, the Council, with an infatuation which is incomprehensible, and in spite of the advice of experienced showmen like Sir Jacob Wilson and Mr. Martin Sutton, have adopted a course which cannot fail to bring matters to a disastrous crisis.

In deciding upon a fixed position for their annual show they withdraw from their members living in distant parts of the country the only practical advantage of membership, and in fixing upon the neighbourhood of London as a site for the show they have committed a threefold error. In the first place, there is already one good annual show held in London—the Smithfield. In the second place, experience shows that Royal Shows in or near London always result in a loss; and, in the third place, the Council ignore object 9 of the Royal charter, which requires the holding of one meeting per year "in such other parts of England and Wales (apart from the metropolis) as may be most advantageous for the advancement of the objects of the Society." In view of the clear wording of the charter, it appears to me that the Council, in the action they propose, are exceeding their powers.

It is certain that if they persevere in their intention to hold the show in any fixed locality a very large proportion of the members will resign, having no inducement to continue to subscribe, beyond the supply of the Journal, which can be obtained by any person who chooses to pay 3s. 6d. per volume for it, but who certainly would not do so unless it contained some special article in which he was particularly interested. The other privileges of analysis, etc., are now provided by local agricultural societies, county councils, etc.

I have discussed this question with many members of the Society, and feel certain that the loss of subscriptions from distant members will amount to at least £1,500 per annum, while the liability to life members, who would not resign, will remain the same.

I have been a member of the Society for twenty-three years, but have altogether attended thirty-two Royal Shows, in twenty-nine of which I have exhibited machinery, so that I have had ample opportunity of acquiring a practical knowledge of the subject on which I now venture to address you, and I am satisfied that the reasons given by the Council for the proposed change are quite inadequate. The grounds, so far as I understand them, for their action, are (1) the unwieldy character of the show, and (2) the difficulty of finding large enough sites upon which to hold it. Both these factors are under the absolute control of the Society. If they would limit the space allotted to each exhibitor, and confine the entries to strictly agricultural articles, barring out such exhibits as billiard tables, bicycles, carriages, cooking stoves, mortar mills, pianos, *et hoc genus omne*, the miles of implement shedding would soon be reduced to reasonable dimensions. In the same way, space in the live stock department could be economised, and prize money and other expenses saved by restricting the number of classes. It appears absurd, for example, to offer prizes and go to the expense of judging black-faced mountain sheep at Maidstone, or Romney Marshes, Devons, and Herefords at Newcastle-on-Tyne, not to speak of zebra hybrids, as at York, which may be very interesting from a scientific point of view, but cannot possibly be described as strictly agricultural.

But the financial difficulties of the Society are not due to losses on shows, as I find that during the last thirty-six years—namely, from Newcastle in 1864 the shows have left a net profit of £1,618, after deducting all losses, and in spite of the colossal blunders of Kilburn, Windsor, Birmingham, and Maidstone, so that apart from the difficulties which I have already dealt with, and which I have shown can be ameliorated by the Council itself, there is no reason why the shows should not be continued in the old rotation, and be as hitherto a source of slight average profit.

No one who has carefully studied the revenue accounts and balance-sheets of the Society for the last fourteen years can fail to be struck with the immense increase in expenditure and cost of running the Society.

In 1886, the last year of Mr. Jenkins's régime, the Society occupied a house at a rent, including rates, taxes, repairs, and depreciation of furniture, of

Mr. J. B. Hellier.

£562. That these premises were adequate for the requirements of the Society is manifest from the fact that a considerable portion of the building was let off to other societies. Last year the expenditure on this account amounted to £2,022. In 1886 the expenses of management, viz., salaries, wages, scientific and chemical assistants, works superintendent, and Journal editorial, amounted to £3,510; in 1891 this had increased to £4,794; in 1895 it amounted to £5,650, while last year the total payments under this head amounted to £6,530, or nearly double what it was at the beginning of 1897, when the present secretary assumed office.

So far as an outsider can make out, there is no reason whatever for this enormous increase in expenditure, amounting to no less a sum than £5,000 per annum. The average number of implements entered for exhibition has not increased, and the increase in the number of stock entries is comparatively insignificant. It would therefore appear that the capital of the Society has been dissipated in heavy management expenses, and no one can assert that the work is better done now than it was previous to 1887.

I trust, therefore, that before the Council takes a step which its best friends feel satisfied is fraught with great danger to the very existence of the Society they will turn their attention to the enormous expense of administration, where there are ignorant leakages which might be stopped, the effect of which would be to place the Society once more on a sound financial basis. Yours truly,

JOHN McLAREN, M.Inst.C.E.

Midland Engine Works, Leeds, August 3rd.

A South African Agriculturist.

At a time when the question of South African possibilities as a field for the agriculturist is before the country, in connection with the proposal to grant facilities to settlers who may wish to go there, it is interesting to recall the many services rendered to the farming industry in South Africa by Mr. J. B. Hellier, the veteran editor of the official *Journal of Agriculture*, who is just retiring.

Mr. Hellier has spent forty-two years in the Cape, whither he went in the early sixties from the West of England. For a considerable time he was the officer whose duty it was to accompany on the early days of emigration and superintend the newcomers the valuable land of the Eastern Province. He was the editor and founder of the paper devoted to the farming interests, and was mainly instrumental in securing the introduction of lime and sulphur dip into the country, and he did much towards improving the legislation concerning the eradication of scab. Cattle men [illegible] for a good cause, Mr. Hellier did not escape persecution, and as far back as 1861, on behalf of the farmers of the Eastern Province, Sir Henry Barkly, the then Governor, presented him with a piece of plate and £300.

Mr. Hellier is eighty-one, is a brother of Benjamin Hellier, the Wesleyan teacher, and in spite of his years is still actively engaged on his journal. Probably no other man has done as much for South African agriculture as he. F. W.

AGRICULTURAL LAW.

Anthrax and the Compensation Act

At the Bradford County Court, on the 10th inst., Judge Bompas, Q.C., gave judgment in the case of Stott v. Campbell. This was an action brought by Lydia Stott, of Cotewall Road, Bradford, against Messrs. Campbell and Harrison, woolcombers, Bradford, to recover damages for the death of her husband, who had died from anthrax contracted, it was alleged, whilst following his employment at the respondent firm's works. The action was taken under the Workmen's Compensation Act, and the disputed point was whether the deceased man had died from "an accident" within the meaning of the Act.

His Honour, in delivering judgment, said he thought the Act intended to distinguish between disease and accident, and that infection from germs was not intended to be treated as equivalent to external injuries. Any other interpretation of the Act would, he thought, bring all diseases, such as scarlet fever, etc., contracted by workpeople during employment within the Statute. He was of the opinion that there was no personal injury within the meaning of the Act, and he therefore gave judgment for the firm.

On the application of Mr. J. J. Wright, who gave notice of appeal, stay of execution for three weeks was granted.

A Farmer's Borrowing Transactions.

Successful Plea of Extortion.

At the Birmingham Assizes, on Monday, Leopold Gordon, as administrator of the estate of his brother, the late Isaac Gordon, brought an action to recover two sums of £100 and £200 respectively, which he alleged to be due on two promissory notes given by a North Yorkshire farmer, Charles Fowler. The first bill was in the name of Gordon, though at the outset defendant was approached with an offer of accommodation in the name of Elliott, a gentleman of Manchester. The second note was made out in the name of Isaac Gordon, trading as Webster. In each case the identity was the same, though this was not known to defendant when he commenced negotiations. The first note was for £175, but defendant only received £125, the odd £50 being for interest. The repayment was to be by six monthly instalments of £15, and the balance, £85, at the end of seven months. Defendant protested that the interest was very high, and was told by Gordon that if he required renewal of the bill the terms would be easier. The monthly instalments were met, but when the seventh month arrived it was more than the borrower could do to find [illegible] bill was renewed with heavy interest. This process was repeated a good many times. Altogether defendant received £[illegible], repaid £[illegible], and [illegible] £300.

Mr. McCardie, for the defence, pleaded that Gordon had taken advantage of defendant's necessitous circumstances to exact exorbitant interest, and further, that Gordon was guilty of [illegible] and over-reaching conduct. He quoted a number of equity cases in support of this [illegible].

Mr. Justice Wills put it to the jury whether Gordon represented when the first bill was given that his intention was to renew [illegible] bill, and renewal took place, whether [illegible] and whether it had a material effect in bringing about the acceptance of the loan by defendant. Further, when the time for payment came, was defendant, from pecuniary pressure, practically [illegible]

had the high rate of interest any material effect in bringing this about, and did Gordon anticipate that contingency at the time he entered into the transaction? Finally, was the rate of interest extortionate?

The jury answered each of these questions in the affirmative. His lordship thereupon entered judgment for the defendant. It was understood that an appeal would be lodged.

Farmers and the Insurance of Stock.

A case of great interest to farmers and breeders was decided at the Lincoln County Court on Monday, before Judge Shortt. Mr. H. E. Vale, and eleven other gentlemen, underwriters at Lloyd's, London, sued Mr. Jno. Parkin, a farmer, of Scampton, near Lincoln, for £2 14s., the premium on the insurance of two mares for risks of foaling, and for a month afterwards. Mr. Porter Smith, a veterinary surgeon, of Lincoln, a sub-agent of the plaintiffs, said he went to see Mr. Parkin's mares, and, after he had examined them, the defendant filled up proposal forms. That was on the 2nd of March, and on returning to Lincoln he despatched the proposals to London, received the policies on the 4th, and paid the premium. He contended the defendant had authorised him so to do. On the 3rd of March the defendant left a message at his house that one of the mares had foaled, and when applied to for the premium he refused to pay, as he had not had the policy. It was agreed that he should fetch the policy from Mr. Smith. The latter statement the defendant denied, and he gave evidence to the effect that on the morning after Mr. Smith had examined the mares he called at his house and left word that as one of the mares had foaled safely he was not to proceed with the policies. He heard nothing more for three weeks, and both mares having then safely foaled, he never having seen nor heard of a policy being issued, he refused to pay. It was argued for the defence that the contract was not complete until the policy was delivered, and that no premium having been paid, a claim in case of the death of the mare would not have been recognised. His Honour said the proposal form constituted Porter Smith the agent of the defendant for insuring the horses, and he was justified in paying the premium. Porter Smith thus being the defendant's agent, it did not matter whether or not the latter saw the policies, which covered a month after foaling, and were dated two days after the proposal forms were signed. He gave judgment for the plaintiffs.

At the Driffield harvest hirings on Thursday there was a fairly large attendance of men in search of employment. Higher wages were asked, but the general run was £1 to £1 2s. per week.

Liabilities of Bee Keepers.—A case affecting the liability of bee keepers was dealt with at Basingstoke County Court on the 3rd inst. by Judge Gye. John Butter, a wood dealer, sued the village postmaster, Mr. Longley, for the recovery of part of the value of an old mare which defendant's bees stung to death; also 10s. on account of pain from bee stings suffered by plaintiff; 10s. for loss of use of part of a field adjoining the postmaster's garden, where the plaintiff's labourers could not work owing to the bees; and 20s. for extra labour through having to make a hayrick in another position. It was suggested on the defendant's behalf that some other person's bees were at fault, but the plaintiff and his witnesses established to his Honour's satisfaction the fact that the bees came from the defendant's hives. Judge Gye, in giving judgment for the amount claimed, said that a bee keeper kept bees at his own risk, and if they did damage he was liable.

College of Agriculture, Downton, Salisbury.—The summer session of this college ended on Friday, August 10th, when the following awards were made:—The diploma or certificate of membership of the college, after two years' residence and passing in all the subjects taught, to O. F. Cooke-Yarborough, Campsmount, Doncaster. Certificate of practical proficiency in agriculture, K. B. Foyster, All Saints' Rectory, Hastings. The college scholarship of £15 to O. F. Cooke-Yarborough. The Bless scholarship to A. R. Margesson, Finden Place, Worthing. Prizes were also given in the various subjects as follows:—K. B. Foyster, agriculture, chemistry, veterinary science, botany, knowledge of live stock; Harold F. Crick, Priest Gate, Peterborough, building construction; A. R. F. Margesson, agriculture, practical chemistry, surveying and levelling, building construction, botany, best collection of weeds; G. C. Way, Cranham Lodge, Upminster, Essex, agriculture, practical chemistry, botany, and milking; J. C. Thompson, Knighton House, Leicester, agriculture, veterinary science, chemistry; M. R. Heath, 29, Warrior Square, St. Leonards-on-Sea, chemistry and veterinary science; F. B. Toms, Crosswood House, Molesey, practical chemistry; O. F. Cooke-Yarborough, surveying and levelling; C. Robins, Garswood, Newton-le-Willows, surveying and levelling, building construction; A. Wrightson, College of Agriculture, Downton, waggon driving; J. E. Whitnall, The Grange, Wilmslow, Cheshire, best collection of grasses.

FARM PROSPECTS.

Berkshire.

Harvest operations began with the rye and winter oats about the middle of July, and some was got together before the rains set in, but the cutting of

Wheat

did not commence till the 27th, and very little was stocked before the 10th of August. It is short in the straw and very thin on the light land, but on the good soil in the vale of Berks it will yield well out of the straw; but altogether it does not appear likely to be an average crop.

Barley

is the best crop of the year, and will probably be above the average. Oats are very difficult and will not be an average. Beans and peas are podded well, and promise for a good crop. A great deal of sanfoin was saved for seed, and will yield fairly well, and trifolium is plentiful, but sells at a low price. Vetches are poor, and will turn out very badly per acre.

The Hay Crop

was considerably below the average, the early portion much damaged by the rains, but the later cuttings were got up well, without much expense. Mangolds are good, and the other roots are very much improved where they have been attended to, but many fields have been quite neglected through want of labour, but the prospect of winter keep is better than it has been for some years.

Sheep

are selling at fairly good prices, and yet there have been larger numbers at the fairs than for some years past. Labour is the difficulty at the present time, and land cannot be cultivated properly with the present short supply of hands; and yet you see Lambeth Union sending off to Canada sixty boys and girls at a time when there is plenty of employment at home and good places could be found for them.—J. L. (August 16th).

Bucks.

The storms have played such havoc with the crops that I scarcely know how to give a report upon them. The heaviest crops are so knocked down that they cannot be cut with the binder to give satisfaction, and those that stood up are literally thrashed out in places on these hills. Everything, besides spring beans, wants cutting at the same time, and the cutting was so hindered by the weather until last Saturday that not much could be done. Now it is so hot in the middle of the day that the wheat breaks off in tying. We are only just got into the barley, so that I cannot talk much about that, but I expect it will be discoloured. On the whole, I should put what appeared to be an average crop of everything from 15 to 20 per cent. below now. Roots and grass have much improved.—J. T. (Aug. 15th).

Glamorganshire.

The teeming holiday population of this county thought they were harder hit than the farmers at the unwelcome change in the weather at holiday time; it not only upset holiday arrangements, but it sadly put out of gear all harvest operations for about a week. Several fields of oats and barley were cut before the rain came, but not much wheat. The best of the crops that were left standing suffered the most by being twisted and laid by the storms of wind and rain, and a considerable quantity of grain was threshed out by the force of the wind. The cutting of wheat has been proceeding rapidly during this week of perfect harvest weather, also the carrying and stacking of oats and barley. It is feared that the malting qualities of the latter where exposed to the weather have been much detriorated. The pastures and aftermaths have been much improved by the rains. Mangolds and swedes promise to be generally a fair crop; the former are especially good in places, the hot weather of July inducing excellent growth of this heat-loving and useful bulb. The better prices beef has been making have been some consolation for the feeders, but when it is considered they will have to buy store cattle at high figures, the margin of profit will be very little.—C. J. S. (August 17th).

Mid-Sussex.

I think the wheat in this district may be considered an average crop. Oats, where well farmed, are a good crop, but very light under poor farming. Winter beans well podded, but short. Spring beans very much blighted; scarcely any barley grown in the district. There seems to be a very fair plant of young seeds. Mangels doing very well. Very few swedes grown. The hay crop is about a three-quarter one. After-grass very much choked by the hot weather, consequently feed is very short. Harvest generally is making rapid progress, and by the end of next week the principal part of it will be gathered. F. C. C. (August 17th).

Nottinghamshire.

A remarkable and beneficial change in the weather has taken place from autumn chilliness to well-nigh tropical heat. Harvest work is now in full swing hereabouts; in fact, a general commencement has set in. The corn in many instances is sadly laid, twisted, and knocked down by the storms, rendering "machining" somewhat difficult. The self-binder is very much used this season everywhere possible, for labourers are exceedingly scarce, asking exorbitant wages and short hours. However, considerable progress has been already made with

Harvest Work,

notwithstanding that more hands and less "machining" is required. Many crops "stood" up somewhat thin, and it will try the full capacities of most crops to come up to an average yield in this locality. Barley and oats, too, generally are a moderate crop, short and stunted in growth. The pastures have improved lately under the showery influences and higher temperature.

The Root Crops

have made rapid strides of late, and some nice pieces are promised by the outlook. Winter beans cut up fairly well, and spring variety look promising. A deal of damage was done to the fruit orchards; many apples and plums were blown off the trees. The hay harvest has been a good one as far as the securing and condition are concerned, but the "cuts" have been light generally. The outlook as a rule is of a gloomy character, and by no means encouraging.—AGRESTIC (August 16th).

Staffordshire.

The spell of splendid weather which set in on Saturday, the 10th inst., has greatly improved the agricultural situation. When at the beginning of the month the weather broke there was a considerable breadth of hay ungathered. Much of this has been badly spoiled, and there are still some remnants of the hay harvest to be cleared up. It seemed at one time likely that our best crops of corn would not only lose their bright colour, but also be considerably injured in their yield. Happily, bright sunshine has done much to promote

Healthy Ripening,

although the work of cutting has been made more tedious by the crops being laid and twisted. It is not expected that either wheat or oats will equal the crops of last year. Specially is a continuance of fine weather desirable because of the laid condition of many fields. Barley varies very much, some fields on their land having become prematurely ripe, whereas on deeper soils the crop is more satisfactory than it has been in several preceding years. Both grass and green crops have been much benefited by the rainfall and subsequent sunshine, and it is likely that the autumn will be favourable for live stock. We may fairly look forward to better stores of roots for winter use than we have had in any year of late. —T. C. S. (August 17th).

Suffolk (East).

We are having splendid harvest weather. On the stiff East Suffolk land but little has been done till this week, for the rains made the land very difficult for machines to travel on, and machines of various kinds are more common now, to save labour, than they have been. The self-binders are the favourite. The crop of wheat is spoken of doubtfully. Barley has yet to take the risk of weather, but fair quality and quantity are hoped for. Oats a fair crop, some of the new varieties very good. Beans and peas better than was feared at one time. Root crop good, especially mangold. Potatoes good. Fruit superabundant.—J. Y. (August 17th).

Westmoreland.

The first week of the last of our summer months (August) has furnished us with a striking proof of the extraordinarily capricious nature of our climate, upon which the welfare of British agriculture so largely depends, especially when we compare it with the two first summer months. A dripping June fulfilled the old adage to the letter by putting all things in tune, which a long winter and cold, late spring had left so far out of it; this was succeeded by a hot, forcing July, which has brought to early maturity most of the summer crops, and enabled a large quantity of a bulky crop of hay to be secured in prime condition; there is, however, still a considerable quantity (fully one-third) to secure, a large quantity of which was cut when the weather broke, and is consequently considerably damaged. The perfect hurricane of wind and rain which took place on the 3rd inst. has twisted and laid the harvest crops of corn in all directions, so much so that several fields when viewed from a distance have the appearance of being in stook. The extra cost and waste which will occur in reaping and securing will in many cases exceed the rental value of the land, as the extra labour required to harvest it reasonably well cannot be had at any price, and binders on many farms will be of little service. The copious rains we have had, on the other hand, have largely benefited the root crops of all kinds, pastures and aftermaths also. The turnip crop will ultimately prove a heavy one in spite of the deficiencies caused by finger-and-toe,

and the extensive ravages by rooks, which have become a serious matter to arable farmers, and call for some general action for the extermination of at least half their number.—T. B. (Aug. 14th).

West Cornwall.

After gales of wind and heavy rain we are now having ideal harvest weather -roasting hot. Most of the corn is now cut, and the thrashing machine is hard at work. Wheat is a light crop, below the average; price, 10s. 6d. for 184lb. Oats is not thrashing as good as it looked, and in lots of places where rust got hold of it it will be very light. Barley seems to be the best crop of the lot. If we get eight or ten days more of fine weather, harvest will be over. Beef is selling very well above 60s. cwt., store cattle are cheaper, cows and calves selling very well.

Mangolds are a good crop. Turnips where the fly has left them alone are good, but a lot has been carried away. Grass is scarce. Plenty of hay about, and plenty of straw, and farmers will have plenty of keep during the winter.

Apples, pears, and plums are a big crop, and very cheap, also beans and peas. Tomatoes are in good demand.—F. C. (August 16th).

Wilts (North)

Even the greatest pessimist among agriculturists, who, as a class, have always been generally considered inveterate grumblers, must admit that Providence has again blessed the country with another really grand season—at least, up to the present time. In this district a splendid crop of hay, or a large portion of it, has been harvested in the best possible manner, and the rains, which somewhat hindered at times, were of incalculable value for the root crops, etc., so that the forthcoming

Winter is Well Provided For.

Stock of all kinds have done well, and prices, on the whole, are not altogether unsatisfactory. Even fat pigs have now reached a somewhat high figure, as the choicest specimens now make at Calne the somewhat unusual price of 10s. 3d./per score, which must certainly give a margin of profit, when the current rate of feeding stuffs is considered. The

Principal Drawback.

this summer is the scarcity and high price of labour; but it seems likely that the same marvellous ingenuity which has caused such a revolution in the corn harvest field will now contrive, or has contrived, machines for the hayfield, which will render fewer hands necessary. The crops of corn in this district, although not equal to those of the two last years, are quite an average.—(August 16th.)

Foreign Prospects.

France.—The agricultural situation closely resembles that in the U.K. Farmers are busy securing crops of all descriptions, and the time has not arrived to formulate conclusions respecting the wheat yield. Paris market is weaker, and in the provinces there is not enough business passing to test value.

Holland and Belgium.—More settled weather permits farmers to carry the remainder of the harvest, and samples of new wheat are expected to be numerous next week. Business generally is quiet, and there is hardly any inquiry for c.i.f. grain.

Spain.—Postal advices speak of an exceptionally abundant crop of wheat in Las Riojas, and an average one in Navarra.

Germany.—The rye is mostly all carried, and is beyond the influence of unfavourable atmospheric conditions, but no so wheat, for only in some districts is that cereal now cut, and where exposed in the fields must have been affected by recent rain, while the uncut corn is said to have been "lodged" over wide areas. The condition of this year's crop will mainly depend upon the weather of the next few weeks. Less favourable reports have been received respecting the potatoes. The unsettled weather has not had a stimulating effect upon the market, for few complaints of damage are heard, and wheat prospects are regarded as favourable.

Hungary.—Wheat threshing has proceeded briskly, but reports of the yield are very divergent. The condition of maize in the principal producing districts is most satisfactory. On Budapest market large offers of both old and new wheat have had a depressing effect, but prices remain fairly steady, at a parity of 28s. 8d. per 480lb. for October delivery.

Norway.—The harvest this year has turned out the worst one since 1894. The threshing test has been applied to large plots of wheat, barley, and rye, and the yield is frightfully poor.

Roumania.—The market has been active, and considerable business passed particularly in wheat and rapeseed, at a material advance in prices. Large supplies of wheat have been daily arriving from the interior, and found immediate buyers. The rise in prices may not last long, as stocks are accumulating, and export trade is checked by high steamer freights.

Russia.—The harvest in south western governments has not turned out well, but as crop prospects there were not good, the shortage was a foregone conclusion. In central, southern, and south-eastern districts results are more satisfactory, and although wheat and rye show irregularity in quality, there will be plenty of grain available for export, should prices be attractive.

Algeria. So bountiful a harvest as this year's has not been seen for a long time there are some districts where the wheat crop is not yet carried.

United States. The *Cincinnati Price Current* says the maize crop has been relieved by rains, and now promises 2,102,000,000 bushels. Winter wheat is estimated to yield 340,000,000 bushels, and spring wheat 215,000,000 bushels.

India.—The Viceroy cabled on Tuesday:—"The favourable conditions reported last week continue, and rain is now falling generally throughout the country.

Argentina. Friday's cable advices from Buenos Ayres say that in the interior climatic conditions are improving.—*Dornbusch.*

Prospects in the West.

"We have had a surfeit of prospects," remarks a correspondent; "we are in urgent need of a sedative in the form of a moderate course of results." This, in brief, is the tone of many of the reports which, through the kindness of prominent agriculturists in the West of England, we are enabled to publish to-day. These reports, considering their source, should have a double value; they should prove helpful to individual farmers, who are enabled by their publication to take advantage of the collective opinions expressed in order to form a better judgment in regard to the agricultural outlook, and at the same time they give residents in town, who have an inherent interest in the produce of the farms, an idea of the difficulties which have invariably to be experienced by farmers. The condition of the crops, it will be seen, varies in different counties. They have been affected by the weather of the past few months—by the excessive heat and by the violent gale. Taken altogether, it may, perhaps, be assumed that the prospects are not so bad as in some previous seasons. There will probably be a fair crop of hay, and the cattle have come through moderately well, the only—or rather the primary—difficulty being in regard to prices, which are not regarded as favourable. While the gale has denuded some of the orchards, the heavy rains improved roots and pastures. The question of obtaining a sufficient supply of labourers during the season is one which still agitates farmers.—*Western Daily Press.*

New Agricultural Patents.

Specially compiled for the Mark Lane Express by Mr. G. D. Howard (Hughes, Son, and Co.), Patent Agent, 38, Chancery Lane, London, W.C., of whom all information relating to Patents, Designs, and Trade Marks may be obtained free of charge.

13,940. A. H. Vaury, of Queen Victoria Street, London, for an invention for "Improved cattle food."

14,006. W. H. Plant, of Wolverhampton, for an invention for "Improvements in power machines for clipping horses and other animals."

Patents Sealed.

7,811. G. Zahl, of Paulshof, near Alt-Landsberg, Brandenburgh, Prussia, for an invention for "Improvements relating to potato-planters."

7,880. W. Birtwisle, of Hartford, Cheshire, for an invention for "Improvements relating to reaping and mowing machines."

8,002. T. Courtman, of Hanslope, Stony Stratford, for an invention for "Hoes, horse or traction."

8183. O. Barbier, of Braux, Ardennes, France, for an invention for "Manures and fertilisers."

Messrs. Little and Ballantyne, of Carlisle, just issued their 1900 bulb catalogue. Like its predecessors it contains numerous illustrations, which give one an idea of the general excellence of this firm's productions.

Farmers and the Taxation of Cycles.—The Spalding Union Rural District Council, representing nine parishes in South Lincolnshire, have adopted a resolution in favour of the taxation of cycles. The Council is composed mainly of farmers, and the opponents of the resolution declared that the farmers, in carrying on this agitation against the cyclist, were only making a rod for their own backs, for if cycles were taxed it would lead to a tax on all the farmers' vehicles used on the road, the great majority of which were now exempt. It was stated that for every trap on which the farmer paid tax they put twelve vehicles on the road which were exempt, and that a great many farmers used two and three traps and only paid a tax on one.

The fair at Omagh, co. Tyrone, on Tuesday, was an average-sized one, composed chiefly of springers and yearlings, the latter selling better than in recent fairs. There was a large supply of lambs, and they met a ready sale. Prices: Calves, second class, £4 to £4 3s. 4d.; third class, £3 to £3 6s. 8d.; yearlings, first class, £7 10s. to £7 15s.; second class, £5 15s. to £7; third class, £5 2s. 6d. to £5 6s. 8d.; two-year-olds, first class, £11 to £11 5s.; second class, £7 15s. to £10 5s.; third class, £6 17s. 6d. to £7 3s. 4d.; springers, first class, £16 to £20; second class, £12 4s. to £14; third class, £7 15s. to £10 12s. 6d.; lambs, first class, £1 7s. 6d. to £1 12s. 6d.; second class, £1 1s 8d. to £1 8s. 7d.

THE WEATHER.

Monday (August 13th).—Very fine weather prevailed again over our islands, and high summer temperatures were generally experienced. Such any rain had fallen over Scotland and Ireland in any part of the kingdom but fog on the west coast was rather prevalent on our south west coasts. A light westerly wind was blowing over the northern portion of the kingdom, but the wind was gentle easterly in the south of England. There was a further rise of temperature over the country, and the thermometer in the shade exceeded 60 deg. over the inland parts of England. Magnificent weather was experienced again in London, and the thermometer in the shade registered 85 deg.

Tuesday (August 14th).—Magnificent weather prevailed in all parts of our islands, and there was a considerable increase of temperature in Ireland. The type of weather was distinctly anticyclonic, and the barometer readings high and uniform. There was a complete wind circulation round the region of highest barometer, the direction being generally southerly in the north and easterly in the south of Great Britain. The midday temperatures registered 80deg. over the central parts of England, but at several of the English stations the thermometer did not rise to so high a point as on Monday. In London the day was very fine and bright, and in the afternoon the thermometer in the shade registered 82 deg. No rain was measured in the morning for the preceding twenty-four hours at any station in the United Kingdom reporting to the Meteorological Office. This is the first time of such an occurrence this summer.

Wednesday (August 15th).—The weather continued very fine and settled over our islands, but there was a good deal of mist or fog at many places in our eastern districts. The temperature was lower than on the preceding days over England generally, but there was a marked difference between the eastern and western portions of the kingdom, the east coast of Scotland being from 15deg. to 20deg. cooler than Ireland, or even the west of Scotland. The easterly wind had freshened considerably in the south, and it was blowing rather strongly in the English Channel and on our south-west coasts. There was rather more cloud than of late in London during the morning, but the afternoon was very fine and bright, although the temperature did not exceed 71deg.

Thursday (August 16th).—Very fine weather prevailed again over the whole of our islands, and fairly high summer temperatures occurred in England. There was another day without rain in any part of the kingdom, this being the fourth in succession. The morning temperatures were very high in Ireland, but the day was much cooler there than on Wednesday. The highest temperatures occurred in the south of England, but the shade readings were generally below 80deg. Brilliant weather was experienced in London, and in the afternoon the temperature was 79 deg.

Friday (August 17th).—The weather was again very fine in most parts of England and Ireland, although the morning was more cloudy than of late, and there was a large amount of mist or fog at our coast stations. Small quantities of rain were measured at the Scotch stations, having fallen since Thursday morning, and slight rain fell again during the day in Scotland. Temperature was high throughout Thursday night, the lowest readings being 60deg. and above in the south of England. The greater part of the day was fine in London, and in the afternoon the thermometer in the shade rose to 82deg. There was a very heavy thunderstorm in the south of London between five and six o'clock in the evening, accompanied by exceptionally heavy hail and rain.

Saturday and Sunday (August 18th and 19th).—Fine weather prevailed in most parts of England during the two days, but the conditions gradually became less settled over the northern and western portions of the kingdom. The principal rain measured on Saturday morning for the preceding twenty-four hours was in the extreme north, but the measurements on Sunday morning were principally in the west. Thunder and lightning occurred in several places in the south and west. High summer temperatures occurred in parts of England on Saturday, and the weather on Sunday was again decidedly warm. In London the thermometer in the shade registered 84 deg. on Saturday, and there was a good deal of lightning in the evening. The highest temperature was 78deg., and the weather was still very fine.

Alfred Jones, a pleasure [illegible] was sued at Birmingham Assizes by Leopold Gordon, [illegible] Gordon's estate, for £1,000 [illegible] promissory notes. Defendant had been [illegible] books for eight years, the money [illegible] him on bills regularly renewed. Gordon's executors were defendant had been [illegible] names, but the judge thought [illegible] defendant was under [illegible] all the time was not supported by the correspondence. A settlement [illegible] plaintiff getting judgment for £550.

CORN MARKETS.

LONDON.

Mark Lane, Monday.—Malt, a moderate inquiry since our last. Barley, better demand for foreign malting qualities. Wheat, a slow trade at last week's prices. Oats, steady, but slow. Maize, rather in buyers' favour. Flour, unchanged.—NIXON, GOWER, AND CO.

Mark Lane, Wednesday.—The supply of old home grown wheat continues to become scantier, firm prices being asked and obtained on the completion of any small business. Fine white 33s 6d and red 32s 6d per qr delivered. A little new wheat has been already submitted at the country markets, but in bad condition, and proper samples are expected by the early part of next week. Foreign maintained, but when business was found practicable prices favoured buyers. Stocks of flour continue large, but the market showed no deviation to-day, despite a lack of consumptive demand. The London Millers' Association made no alteration at this afternoon's meeting. Among feeding stuffs, grinding barley is still upheld owing to scarcity. Persian, 17s 9d ex ship, 18s ex quay. Black Sea unobtainable. Bessarabian, 19s ex quay; and American, 22s. American oats have not depreciated since last Monday, but the tendency of prices was with difficulty supported as a rule. Mixed clipped, 14s ex ship, 14s 3d ex quay. White clipped in these positions, 15s 3d and 15s 6d. Beans and peas remain idle markets, but holders maintain reserve. Maize germ meal very firm and scarce. American just arrived by steamer sells at £5 2s 6d. English, £5 per ton ex wharf.

Mark Lane, Friday.—Scarcely any attention was paid to old home-grown wheat, and apart from the diminished supply which exists, the tendency was adverse to sellers, new now coming up, only naturally exerting its influence. Quotations were, however, not materially altered. Samples of the latter are expected in good condition by next week. What little offers is for the most part damp, and 32s was paid on the country markets where quality gave satisfaction. Of old, fine white, 33s 6d, and red 32s 6d per qr 63lb delivered. American descriptions distinctly easier, without meeting with response. The market for flour also tended 3d per sack lower, but the consumptive demand was again only of a retail order. The London Millers' Association made no alteration at this afternoon's meeting. Grinding barley firm, supply of Black Sea remaining exhausted. American oats showed no depreciation, but there was not sufficient stirring to test the market. Maize is fully 3d dearer for flat since last Monday, round corn being firm. Beans and peas unaltered, while remain in holders favour. Maize germ meal firm at fully the recent advance.

COUNTRY.

Ashford, Tuesday.—There were some samples of new wheat and oats on the market. The former were in poor condition and soft, but they were sold at 32s to 32s 6d per quarter. Black winter oats made 21s 6d. There were few, if any, sales of old wheat, and all other sorts of corn were unchanged except maize, which is quoted a little dear.

Aylesbury, Saturday.—With small quantity offering, the wheat trade was quiet, and the business transacted was at last Saturday's quotations. Barley, oats, and beans unaltered. Wheat, 29s to 31s.

Banbury, Thursday.—Wheat, white, 30s to 32s per qr; wheat, red, 30s to 31s per qr; beans, new, 32s to 34s per qr; oats, white, 23s to 28s per qr; oats black, 21s to 23s per qr. Old wheat in very small supply; no new on offer. Prices firm.

Barnsley, Wednesday.—Market quiet. Wheat realised up to 11s 9d per load; white oats, 22s to 24s; black oats, 20s to 22s; maize, round, up to 26s; and flat, 24s per qr in Barnsley.

Bedale, Tuesday.—Attendance thin, but a fair trade resulted, wheat making 29s and upwards per qr; barley (best samples), 27s to 29s; secondary samples, 25s to 26s; oats (short), 22s to 24s; oats (long), 19s to 21s per qr. Others samples of grain at late rates.

Braintree, Wednesday.—Small supply, which met a firm trade at last week's prices. Few samples of new wheat on offer, which made up to 30s per qr.

Bristol, Thursday.—The attendance at to-day's market as small. Wheat—English, none on offer. Foreign—Demand, wwing to improved weather is small; prices unaltered. Grinding barley—In better demand, prices 3d to 6d advance. Maize and oats unchanged. Flour—There was a better demand during the week, but the return of fine weather has again checked business.—GRACE BROTHERS.

Cambridge, Saturday.—The wheat trade during the week has been very quiet, the fine weather making buyers hesitate. A few samples of old crop make 30s., and some parcels of new wheat have sold at 28s and 29s. At this market to-day. there was a fair supply of new crop, which sold readily at 28s to 29s. A few samples of new oats and barley were on offer, the former making 18s to 20s per 24 stones; the latter was irregular in prices, and the quality is various.

Canterbury, Saturday.—Moderate supplies of new corn and a fair trade. White wheat, 31s to 33s; red ditto, 29s to 32s; barley (old), 20s to 24s; white oats, 18s to 21s; black ditto, 16s to 20s; grey peas, 29s to 31s per quarter; winter tares, 6s 6d to 7s per bushel.

Carlisle, Saturday.—Small supply of oats in our market to-day. Slow sale at full prices, 22s to 23s 6d per 336lbs. No new oats shown.—THOMAS ROBINSON.

Chester, Saturday.—There was a small attendance, owing to harvest operations. Old English wheat maintained recent advance. Oats in good demand, more money being asked. Beans and barley unchanged. Indian corn in good request at advancing rates. Quotations:—Old white and red wheat, 4s 1d to 4s 6d; new grinding barley, 3s to 3s 6d per 64lb; old beans, 5s 6d per 80lb; oats, 2s 9d to 3s per 46lb; old Indian corn, 11s to 11s 6d, and new 10s 6d to 10s 9d per 240lb.

Colchester, Saturday.—Several samples of new wheat offering, quality not so good as old, value about 2s per qr less than old. A few new oats offering at irregular prices.—FRANCIS AND CO.

Dorchester, Saturday.—Several samples of new wheat are offering, the quality of which varies a great deal. Prices ranged from 28s to 30s per quarter, with a slow trade. A few samples of new English oats also offering, selling from 17s to 20s per quarter. Foreign wheat dearer. Grinding barley and maize also dearer.

Gainsborough, Tuesday.—Very few farmers in the market, and but few samples changed hands at last week's prices. White wheat made 30s to 31s; red, 29s to 30s; white oats, 20s to 22s; black ditto, 18s to 20s; grinding barley, 23s; English beans, 32s; peas, 23s; small maize, 26s; flat ditto, 23s; sharps, £5 15s per ton; barley meal, £6 10s per ton.

Glasgow, Wednesday.—There was a small attendance at our Corn Exchange to-day. Wheat and flour dull, but quotably unaltered. Indian corn dull, at a decline of 3d per boll on the week. Grinding beans firm, at an advance of 3d per boll. Canadian peas slightly easier, owing to pressure to sell ex quay. Canadian and home oats firm and the turn dearer. Barley firm. Oatmeal quiet. Bran and thirds firm and the turn dearer.—GIBSON AND CLARK.

Glasgow, Wednesday.—The market is quiet all round. Maize closed 1d easier on the week at 11s 3d to 11s 4½d per 280lb. Oats and beans rather dearer, but other articles unchanged.

Goole, Wednesday.—Very small attendance. Little showing, and prices are a shade easier. Averages:—Wheat, 10s 9d to 11s 9d per load; oats, 18s 6d to 21s per qr. Beans unaltered, and no barley showing.

Guildford, Saturday.—Better supply of wheat with some new samples. Fine old wheat up to 33s per qr; new wheat 29s to 33s per qr; new barley, 32s 6d per qr; new rye, 27s to 29s per qr. Weather sultry, trade slow.—LEGGATT, BLAKE, AND TYE.

Helmsley, Friday. — Quiet market and little doing. Wheat, 29s to 30s; oats, ordinary, 21s to 23s; ditto short, 22s to 24s; barley, grinding, 23s to 24s per qr.

Ipswich, Tuesday.—Very small supply of wheat; trade firm at about last week's prices, top price being 30s per qr. A sample of new wheat out of condition changed hands at 30s. Nothing doing in barley. Oats firm; maize unaltered. Little doing in beans and peas. Attendance very thin, harvest being in full swing.

Kirbymoorside, Wednesday.—A good attendance, and business brisk. Wheat a little easier at 29s to 30s; grinding barley, 23s to 24s; long oats, 20s to 21s; short oats, 22s to 23s; peas, 27s to 28s; beans, 29s to 30s per qr.

Leeds, Tuesday.—The marked change in the weather, now highly favourable to harvest work, has naturally allayed crop fears, and caused trade to become dull again, but though the demand for wheat for consumption is limited, holders are by no means anxious sellers, and prices are nominally unchanged from this day week. Maize and beans 3d dearer. Oats steady.—DUNNS AND CO.

Leeds, Friday.—Owing to more favourable advices as to crop prospects in America and better weather at home, buyers confined their purchases to present wants and on the business over. Tuesday's prices for all kinds of wheat were scarcely maintained. Peas and beans the turn dearer. No change in flour, grinding barley, maize, or oats.

Leicester, Saturday.—Good average attendance, with small supplies of home-grown wheat. Trade slow, holders asking extreme rates. Wheats, 21s to 24s per 36 stones. Oats in good demand.

Levburn, Friday.—An average attendance, and trade fair, wheat making 29s to 30s and upwards; barley, 24s to 27s and upwards; oats (short), 22s to 23s; oats (long), 18s to 20s; and Indian corn, 23s and upwards per qr. Other samples at late rates.

Lincoln, Friday.—The attendance at the Corn Exchange was only moderate. A sample of new wheat from Billingborough Fen was not in very good condition, but 30s per quarter was asked for it. The samples of old wheat were not very numerous, and trade was done at 6d per qr lower. Oats, beans, and feeding stuffs were firm. A few samples of new oats, of moderate quality, made 17s 6d to 18s per qr.

Lincoln, Friday.—Small attendance and very little business doing, old wheats very scarce, with no change in prices; no new local wheats shown. Foreign wheats firm at late rates. Old oats commanded full money. Maize, peas, and beans firm.

Maidstone, Thursday.—The trade for wheat to-day was slack, and 6d per qr less than last week. The millers are waiting for the new crop, samples of which not displayed to-day, but some very fine new black oats, which realised over 20s per qr, also a few peas at about 29s per qr. but they did not go off freely at that figure. Rye, also of this year's growth, but owners of it put on a prohibitive price, which prevented business. Maize is 6d per qr down. Other articles no change.

Manchester, Thursday.—English wheat to-day brings about 6d per qr. below last week's rates The demand is of a quiet character. Foreign descriptions are about steady at last week's prices, but the tendency is against the buyer. Flour meets with a retail inquiry and demand at previous currencies. English oats firm and unchanged. Foreign oats very quiet. Beans are rather dearer, say by 6d per qr. Indian corn, 3d dearer.

Newark, Wednesday.—Wheat a nominal trade at rather easier prices than last week. Feeding corn repeated previous prices. Small market, farmers being busy harvesting. Weather brilliant.

Newcastle-on-Tyne, Saturday.—Wheat at our to-day's market ruled quiet, and in buyers' favour. American maize steady at last week's prices. Odessa maize 1s per 480lbs advance on the week. Beans firmer and dearer. Peas steady at late rates. Feeding barley advanced 6d per 448lb. Scotch oats 1s per 336lbs dearer. No change in foreign oats. Flour late rates.—JOSEPH POLLARD AND CO.

Newcastle-on-Tyne, Saturday.—The wheat trade has ruled steady, and buyers have had to pay 6d per quarter advance upon previous prices. Flour holds its own, and seems likely to harden in value. Feeding stuffs show no falling off, and for the time of year maintain their values wonderfully.

Northallerton, Wednesday.—A fairly good attendance. White wheat made up to 30s; red wheat, 28s to 30s; short oats, 21s to 25s; and long oats, 20s to 22s per qr.

Northampton, Saturday.—Very small market, scarcely any farmers being present. A few samples of new wheat were on offer, but buyers were scarce. Some new was sold from 28s to 29s. Old wheat was same as last week. Prices:—White wheat, 30s to 32s per qr; red, 28s to 30s; grinding barley, 22s to 24s; oats, 19s to 22s; old fine, 24s; beans, 28s to 32s; flour, 24s to 28s.

Norwich, Saturday.—Wheat is still in small supply at our market to-day at 1s per qr less money since last week. Since last Saturday the weather has quite changed again, bright sunshine having prevailed all the week, and harvest operations are now in full swing. Wheat, red, 29s to 30s per qr, weight 63lbs per bushel imperial. Corn inspector's return for the week ending August 13, 1900:—Wheat, 3,938.7, 28s 3½d.—J. ARTHUR MILLS.

Nottingham, Saturday.—Wheat in small supply, prices rather favouring buyers. Oats and beans a quiet trade at fully previous rates.—ROBT. HUBBLE.

Oxford, Saturday.—Very small market; a few samples of new corn showing; quality poor. Wheat a slow trade, at last week's prices. No business reported in barley.

Peterborough, Saturday.—The weather during the past week has been all that could be desired, and progress has been made with the harvest work. A few samples of new wheat and oats showing to-day, quality and prices various. Old corn unchanged.—THOMAS HILL AND SON.

Plymouth, Thursday.—There was a small attendance at our Corn Exchange to-day, our farmers being home busy with harvest. The market was slow and quiet. The prices for wheat and barley are 6d dearer than last Thursday. Indian corn has advanced 3d, while oats remain firm.—ORLANDO DAVIS AND CO.

Reading, Saturday.—At to-day's market old wheat sold freely at late rates, 32s to 34s per qr. New wheat realised 29s to 32s per qr. Barley is the best crop of the year in Berkshire, and nearly twenty samples of excellent quality were shown by Mr. Walter Parsons, of Reading, the largest barley buyer on the market. Oats yield badly, but beans are a good crop.

Ripon, Thursday.—The show of samples is light, and a poor trade being done at late prices. Wheat, English, 29s to 30s; foreign, 31s to 35s; barley, grinding, 24s to 25s; oats, 22s to 25s; round maize, 25s to 27s; flat maize, 23s per qr; beans, 11½d per stone; bran, £4 10s to £5 per ton.

Romford, Wednesday.—There was only a small supply of wheat of all kinds. New red wheat made 31s, and new white 33s per qr.

St. Neots, Thursday.—Very small market, and only a few samples of wheat offering, some of them being of the new crop. Prices were somewhat lower than those of last week, the average being about 30s per 504lbs. The quality of the new wheat that has already appeared is not equal to the old.—ELGOOD AND SON.

Scarborough, Thursday.—A few samples of wheat on offer at slightly reduced rates. Oats increasing in price on account of scarcity. No new barley to hand.

Sheffield, Tuesday.—A poor attendance and a slow trade. Last week's prices were asked for wheat, but buyers were unwilling to give the full prices. Oats and beans were 3d per quarter dearer. Quotations:—Wheat, white, 33s to 33s 6d; ditto red, 32s to 33s per 504lb; oats, old white, 24s; ditto old black, 22s per 335lb; peas, grinding, 28s to 29s; ditto blue, 53s to 70s per 504lb; beans, Egyptian, 33s; ditto, English (new), 31s 6d to 32s per 532lb; barley, grinding, 23s to 24s 6d; ditto malting, 27s to 35s per 448lb; Indian corn, small, 26s to 29s; ditto American mixed, 22s 6d to 23s per 480lb.

Shrewsbury, Saturday.—Trade has been quiet, and prices have undergone no change. Flour has met with a better demand at full prices. Milling offals have moved freely into consumption, and former quotations have been well maintained.—W. L. BROWNE AND CO.

Spalding, Tuesday.—Several samples of new wheat were on the market, and sold at 29s to 30s a quarter, the grain being in good condition. Old wheat sold at 29s 6d. New oats made 17s 3d to 19s 3d, and old oats up to 22s 6d. Beans were 6d dearer, selling at 33s and 34s per qr.

Stockton, Wednesday.—Very few samples of farmers' wheat showing. Last week's price of 30s per qr was made. Foreign wheat trade was quiet, and very little business was transacted at last week's quotation. Maize was unaltered in price, whilst oats were 1s per qr dearer.

Sunderland, Saturday.—Scarcely any business passing, wheat in buyers' favour. Oats and barley firm, and rather dearer. Arrivals coastwise: Oats, 290qrs; foreign nil.—E. AND F. RICHARDSON.

Taunton, Saturday.—Very little wheat offering. Old was rather easier than last week. A few samples of new were of fair quality and in good condition, selling at from 28s to 29s. All feeding stuffs very firm.

Wakefield, Friday.—As usual at this season of the year, the market is sparsely attended. The weather has during the last week been all that could be desired. To-day foreign wheat is 3d per qr lower, and English is also slightly lower on the week. Oats and maize are fully 1s dearer.—MICHAEL SANDERSON AND SON, LIMITED.

Wakefield, Friday.—The weather continues all that can be desired, but the trade, though very inanimate, is remarkably steady. New English wheat can scarcely be quoted yet. Old is sparingly offered and fully as dear. Foreign descriptions are 3d to 6d lower, owing to lack of demand, offers for shipment are scarce at unobtainable limits. Round maize, 1s, flat maize and oats, 3d dearer.—DUNNS AND CO.

Wakefield, Friday.—This was another holiday market. No English wheat on offer, and foreign wheats declined 3d to 6d per qr, owing to the prevalence of fine weather. All feeding stuffs advanced, viz., barley 1s, round maize 1s, oats and flat maize 3d per qr. dearer on the week.

Wetherby, Thursday.—Only a small attendance, and very little inquiry for wheat, which realised 29s to 30s 6d per qr; oats, 21s 6d to 23s 6d per qr; and barley firm.

Wisbech, Saturday.—After a week of exceptional harvest weather there are a few odd samples of new grain showing quality and condition good. New wheat, 29s to 30s; old up to 31s; new oats, 18s to 19s; old up to 22s. Harvest progressing favourably.—JAMES FLETCHER.

Wolverhampton, Wednesday.—Very little business passing owing to farmers being engaged with the harvest. English wheat, 13s per 216lb, springs 6s 4d, and Duluths 6s 6d to 6s 7d per cental; oats, 13s 6d to 14s 6d; beans (old), 13s 6d to 14s 6d per 193lb; flat maize, 21s 6d to 22s 3d per 480lb.

Worcester, Saturday.—Small attendance, farmers being still busy in the harvest field. Old wheats were scarce, and maintained last week's firmer rates. Foreign wheat rather lower. Small maize and grinding barley 3d dearer. Oats and beens steady.

Worksop, Wednesday.—Moderate attendance, but small show of grain. White wheat, 29s to 31s; red wheat, 28s to 29s; grinding barey, 26s to 28s; white oats, 21s to 23s; black oats, 20s to 22s; flat maize, 24s to 26s; round maize, 26s to 27s 6d per qr; fine sharps, £5 13s 4d to £6 5s per ton; barley meal, £6 13s 4d to £7 per ton; bran, £5 to £6 per ton.

York, Saturday.—A very few samples of wheat offered, which sold slowly at barely last week's prices. The official averages of last week have been:—Wheat, 28s, and oats 17s 2d per quarter.

FOREIGN.

The Antwerp wheat market has been pretty well maintained with a regular current of business. The harvest is approaching a close in the North of France. The weather might have been more favourable, but a few days' sun will make good any damages which may have been sustained. Threshing operations are now being proceeded with, and the return is reported to be about 20 per cent. below that of 1899. On this basis, the yield of wheat in France this year will come out at about 160,000,000 hectolitres; current consumption and seeding will absorb 120,000,000 hectolitres, leaving a deficit of 20,000,000 hectolitres, which, however, is expected to be fully made good by the stock of old wheat carried forward from 1899-1900. Should this prove to be the case, little or no wheat will accordingly have to be imported into France this year, although twelve months hence French granaries will be practically empty. Hard wheat has shown a quiet tone at Marseilles, but other descriptions have been pretty well maintained. Last week's sales of wheat at Marseilles amounted to 15,250 quintals. Flour for consumption has shown little change in the French capital. Wheat has been quiet at Konigsberg and Dantzic. Advices from Ibrail state that the wheat harvest has been fully completed in that quarter of Europe, and that threshing operations have made such progress that new wheat has been freely delivered at the forts on the Upper Danube. Ibrail advices further state that the local wheat markets have shown a fair amount of activity, the demand having acquired increased importance. The quantity of wheat now en route for Europe is returned at 1,240,000 qrs. as compared with 1,465,000 qrs at the corresponding date of 1899.

Hamburgh, Saturday.—Barley report: The weather has been very fine during the whole week, so that farmers have been eagerly busied to carry their corn, and if the present weather keeps on for another week all will be housed in splendid condition. Further samples which have appeared of new Chevalier, Saale, Bohemian, and Moravian barley make it pretty certain that the crop will be of fine quality; however, long prices are asked for such, and buyers therefore feel not tempted to operate.—FRANCIS M. TH. DUHNE.

Hamburg, Saturday.—With fine, sunny weather we had a quiet market, but prices were maintained. The imports during the week amounted to 761 tons wheat, 6,023 tons rye, 650 tons barley, 15,249 tons maize. Wheat little inquired after. Fine old Saale, Holstein, and Mecklenburg is held at 28s 6d to 30s per 504lb f.o.b. The new crop is not likely to turn out so good in quality and quantity as last year. Fine River Plate is offering at 27s 3d to 28s 3d. hard Winter is floating at 27s per 480lb c.i.f. Hamburg. Rye is offering less freely. The new crop in this vicinity differs considerably in quality. A portion appears to have been carried in damp condition. 9 10-15 South Russian August-September is offering at 22s 6d, 22s 9d September-October at 23s per 450lb c.i.f. Hamburg. The high prices asked for new malting barley impede the development of business; however, the result of this year's harvest appears to turn out less satisfactory than anticipated, and we are not likely to see moderate prices. The large quantities of fine barley which Denmark, Holstein, and Mecklenburg produced last season will have to be made up by supplies from other countries. Good Laak is held at

36s 6d to 38s, fine at 40s to 42s; Moravian and Bohemian at 37s to 40s per 448lbs f.o.b. Offers are scarce as yet. Feeding barley firm, 60s to 61s. South Russian flotting is selling at 18s 6d, September-October at 17s 3d per 400lbs c.i.f. Hamburg. There is but little actual demand for maize, but prices remain firm. Mixed prompt shipment 20s, January-March 18s 3d per 480lb c.i.f. Hamburg.—JOHN TATLOCK.

—CUTTS AND TAYLOR

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The quality of the few samples of new wheat shown at southern markets is not first rate, and the condition is somewhat damp. It must, however, be remembered that these samples represent grain got in between 1st and 8th August, a rainy period of under-average temperature, when harvest work should not have been proceeded with. There is every hope of an improvement before the end of the month, for since the 11th the weather has been all that farmers could desire; the best has been three degrees above an August average, which means a healthy continuance of ripening without anything like scorching heat. The barley has come on well and farmers' chief trouble is that it is often ripe with the wheat, so that more hands in the harvest field would be an advantage. Labour scarcity is nothing like what alarmists represented it would be, but it has to be stated that wages are averaging a florin a week higher than last year, and this will reduce farmers' profits out of those cereal crops which for many years past have only just paid their way. The tendency to lay down land for pasture will hardly be arrested by this year's harvest experiences. An excellent promise of oats in Scotland and Ireland is a bright feature of the season. With the present weather the promise should become an accomplished yield. Potatoes and roots are promising also, but little good can be said about the hops, the first pockets of which are now arriving at the chief centres of the trade.

The French wheat harvest is nearly over in the north, where since August 1st has proceeded with extreme haste. The threshings of the past week in the central and southern provinces have been disappointing, and the mean weight of the new samples seldom exceeds 60lb. per bushel.

The American Bureau Report of the 11th was cabled on the 13th in summary as "no change," and this is about what it amounts to when perused in detail. The failure of the American Government to adopt a specific standard of "average yield" makes these Bureau Reports a perplexity even to the American experts. It is also misleading to add together the percentage of the different States, for some States grow ten times as much wheat as others from which reports are also received. The winter wheat in America is put by good private judges at 13 to 14 bushels, and spring wheat at 9 to 10 bushels per acre, and the whole yield of both sorts may equal but should not exceed 63,000,000 qrs. This would leave about 21,000,000 qrs. available for exportation, against 20,749,000 qrs. shipped to Europe last year, and about 2,500,000 qrs. shipped to Asia, Africa, and South America. Thus our prospective supply of American wheat in the approaching cereal year should be reduced by two to three million qrs. The census in America shows a population of 74,500,000, but the increase in the negro portion is very large, and these citizens are fed on rice, maize, and vegetables rather than on wheat or flour.

Breadstuffs imports into the United Kingdom for eleven months of the cereal year are officially given as follows:—

	Qrs.
American	13,868,263
Argentine	3,800,945
Russian	430,733
Indian	358,264
European	632,026
Australasian	788,591
Other countries	349,286
Total	20,228,208

It will be seen that despite the famine India is an exporter of wheat to the extent of 358,264 qrs. The Kurrachee and Bombay firms pay little heed to the wants of the Madras and Bombay provinces, which have to buy dearly of both America and Australia. This is one of those things in which a despot does better than a free state, for the surplus of the Indian North-West would not under any autocracy be allowed to be sold out of the land when the South and East were starving.

The following interesting table is published by *Dornbusch's List*, and shows that the shipping trade was not so active during the past shipping year as during the two preceding seasons. We have already given approximate figures, which were sufficient for trade purposes, but the returns of our shipping contemporary possess the greater exactitude, as they are not issued until they have been verified in detail:—

WHEAT AND FLOUR EXPORTS TO EUROPE.

	Year ended July 31, 1898-99.	Year ended July 31, 1899-00.	Year ended July 31, 1897-98.
	Qrs.	Qrs.	Qrs.
U.S. and Canada	20,749,000	25,701,000	26,509,500
Russia	7,253,000	8,152,000	16,138,000
Danube	981,000	1,628,000	1,399,500
India	469,000	2,958,000	3,697,000
Argentine	10,291,000	5,231,000	2,876,000
Australasia	884,000	1,213,000	—
Other countries	1,908,900	2,694,000	2,296,000
Total	42,535,000	47,577,000	52,916,000

It will be noted that absolutely nothing was shipped by Australasia to Europe in 1897-8. The Cape took all that New Zealand had to spare, and Australia in that year was barely self-supporting.

The flour trade of London shows an increased predominance of American influences, and there is a wonderful development of the "patent" trade going on. The choice of American patent makes has increased in a few years from some ten to over fifty leading types, and it is a business in itself to know the "idiosyncrasies" of the chief American houses and their London agents.

LONDON FLOUR SUPPLY.

American	70 per cent.
English	20 ,, ,,
Hungarian	5 ,, ,,
French	3 ,, ,,
All other sources	2 ,, ,,
	100

The London, Liverpool, and Glasgow flour markets now depend to a remarkable degree on the cables from America, which advise at what prices future shipments of the different patents can be made. At the same time it is noteworthy that the speculation in futures which characterise the wheat and maize trade has not invaded flour. There is very little buying flour forward except to meet actual wants and to fulfil specific contracts.

The wheat markets are rather slow just now but few holders are willing to take less money for old English, for Russian, for Argentine, or for Canadian wheat. The sorts which are 6d. lower on the week are American white and red, together with the "yellow" types of Californian. The Australian wheat arrivals are small, but sales are not brisk, and New Zealand wheat is also rather neglected.

There are now on passage to the United Kingdom the following quantities of wheat:—

	Qrs.
American	345,000
Californian	930,000
Argentine	420,000
Russian	55,000
Australasian	190,000
Other countries	19,000
Total	1,959,000

The imports of the United Kingdom last week were as follows:—

Wheat, 382,000 qrs.; a very large supply.
Flour, 124,000 sks.; a moderate supply.
Maize, 224,000 qrs.; a liberal supply.
Barley, 43,000 qrs.; a very small supply.
Oats, 186,000 qrs.; a large supply.

The market for maize is steady, despite the large imports, but oats are weak for foreign kinds. Barley is so inert a trade just now that even the exceedingly small imports are apparently difficult to place. There are now 755,000 qrs. of maize and 130,000 qrs. of barley on passage.

Maize imports for the fifty weeks of the cereal year—Sept. 1 to Aug. 15—have been as follows:—

	Qrs.
1899-1900	12,869,000
1898-1899	12,821,000
1897-1898	12,316,000

The extent to which the trade has developed since 1896 is most remarkable, and receives less attention than it deserves.

The market for oilseeds shows firmness, and profits are good. The price of fine English linseed is 60s. 8d.; Calcutta, at 55s., must remunerate Indian growers very handsomely. For Indian rapeseed 44s. to 46s. may be said to be arranged. This also represents a substantial profit to the grower.

July averages in the oilseed trade are:—

	Per ton. £ s. d.
Linseed oil	34 7 9
,, cake	7 17 6
Rape oil	28 18 9
Cotton oil	22 12 3
,, seed	6 5 8
,, cake	4 7 8

Silver, which much affects this trade, is one per cent. cheaper than a year ago. Russian shipments for the first seven months of 1900 are officially reported at 336,000 qrs. of Linseed and 42,850 qrs. of rapeseed against 359,000 qrs. of linseed and 133,000 qrs. of rapeseed in the first seven months of 1899. There are now on passage 126,000 qrs. of linseed, 4,500 qrs. of rapeseed, and 40,000 qrs. of cottonseed.

FOREIGN CORN TRADE.

The shipments of grain from the chief exporting countries last week were as follows:—

	Wheat. Qrs.	Flour. Sks.	Maize. Qrs.	Barley. Qrs.	Oats. Qrs.
United States	281,000	90,000	287,000	15,000	74,000
Russia	127,000	—	3,000	11,000	169,000
France	—	5,000	—	2,000	—
Austria-Hungary	—	5,000	—	—	—
Roumania	24,000	—	31,000	2,000	3,000
Argentina	132,000	5,000	66,000	—	—
Chili	—	—	—	—	—
India	—	—	—	—	—
Australasia	—	5,000	—	—	5,000
Miscellaneous	20,000	5,000	20,000	20,000	10,000
Total	584,000	115,000	407,000	50,000	261,000

THIS DAY'S MARKETS.

MARK LANE, MONDAY.

[FIRST REPORT.]

New English wheat made its first appearance at Mark Lane to-day in other than the small sample rubbed out by hand. Two samples of new white, weighing 62½ and 63lb. respectively, were sold at 32s. and 32s. 6d. per qr., while four or five samples of new red were placed at 30s. and 31s. per qr. The weight of these samples was not very good, 61lb. and 62lb. to the bushel. New rye from East Kent made 28s., and from Essex 27s. 6d. per qr. The quality was good. Liverpool just now is doing a predominant business in the new American crop of winter wheat, which is offered at 6s. per cental. In London spring wheat is the chief item from America, and 6s. 5d. per cental, the price quoted, has its transactions. In London there is a small sale for Californian wheat to-day at barely previous prices. English wheat of the old crop is firm, nothing parted with under thirty shillings. The maize market was firmer from last week, there being an excellent sale for American at 20s. per qr. The barley trade is almost at a standstill, but a few samples of Persian found buyers at 18s. to 18s. 3d. per qr. Oats were irregular, old, heavy, and seasoned samples really saleable. Beans and peas were steady, but with not much demand. New English trifolium made 29s. per cwt.; new French 28s. Both sold well. New English tares were on small offer at 52s. to 56s. per qr. No new barley or oats were on offer.

(*For Close of Market see foot of Column.*)

CLOSE OF THE MARKET.

By Telephone, 2 p.m.

New white English touched 32s. 6d. per qr. for 62½lb. weight, and 33s. for a 63½lb. sample. The latter was rather cheap at the price, as heavy wheat will clearly be rare this season. The market for other articles closed dull and unchanged.

THE FLOUR TRADE.

MARK LANE, Aug. 20.

The close, hot weather makes the flour market very dull, but value is not, as a rule, altered for either country or London makes. The Town Household type, in which the chief business has been doing, is worth fully 24s. per sack. The country sorts, all English good roller-made, make about 22s.; mixtures vary a good deal. American brands are too numerous to detail, but it may be mentioned that Pillsbury best made 25s. 6d., Iron Duke, 20s. 6d., and Improved Nicollet 20s., among the Minneapolis types, while 24s. was paid for Dazzle and 23s. 9d. for Dalmeny, among the Kansas offerings. There was a fair sale of Hungarian at prices keeping pretty close to 30s. per sack. French flour made 21s. 6d. for Corbeils A.A. and 19s. for Renaux's C. grade. Best Midlothian oatmeal made £15 per ton, Canadian coming at £10 10s. for rolled and also for Maple Leaf. Maize germ meal at £5 2s. 6d. per ton was in fair request, and ground rice at 10s. per cwt. had its buyers.

LONDON TERM MARKET.

This market is held twice a day at South Sea House, and is open to elected members only. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 centals.

The name of the month stands for guaranteed delivery (if required) on or before the last day of that month, and the following have been the prices per cental recently made :—

WHEAT.—		Aug.		Oct.		Dec.	
		s.	d.	s	d.	s.	d.
Aug. 13	noon	6	6	6	7	6	8
	4 p.m.	6	6	6	7	6	8
Aug. 14	noon	6	6	6	7	6	9
	4 p.m.	6	6	6	7	6	8
Aug. 15	noon	6	6	6	7	6	8
	4 p.m.	6	6	6	7	6	9
Aug. 16	noon	6	6	6	7	6	8
	4 p.m.	6	6	6	7	6	8
Aug. 17	noon	6	6	6	7	6	8
	4 p.m.	6	6	6	7	6	8
Aug. 18	noon	6	5	6	7	6	8
To-day	noon	6	5	6	6	6	7

Maize futures have made 4s. per cental for Sept. and Oct. delivery. For Aug. delivery 4s. 1d. is paid.

The Term Market standard wheat is No. 1 Northern Spring American sold on the Duluth certificate. Other sorts of wheat can be bought at the above prices plus or minus agreed difference between the other sort and the standard quality. Quotations are by the "true hundredweight" or cental of 100lb. We do not give fractions of a penny per cental. Delivery is understood as being guaranteed on or before the last day of the month named in the quotation. The maize quoted on the Term market is flat grain from the United States.

SEEDS.

London, Monday.—Messrs. John Shaw and Sons, seed merchants, of Great Maze Pond, Borough, London, S.E., report some business passing in red cloverseed, at hardening rates. Trifolium shows no important movement either as regards value or demand. Meantime, the tendency for grasses continues upwards. Seed, rye, and winter tares are in good request. New thousand-headed kale is now selling, whilst mustard and rapeseed move off slowly on former terms. Turkish canaryseed is held for 1s per qr more money; whilst hempseed is somewhat dearer. Samples of new blue peas have begun to come to hand. Haricot beans being scarce, keep very firm.

HOPS.

London (Borough), Monday.—Messrs. W. H. and H. Le May, hop factors, 67, Borough High-street, London, S.E., report: As the crop advances to maturity it is more than evident that it will not reach half of last year. The market is firm, and holders more inclined to take their hops off the market.

GRAIN AND FLOUR FACTORS' REPORTS.

We have large supplies of foreign wheat, and prices are 6d. lower on the week. English is also 6d. down. Flour 6d. per sack lower. Oats, in spite of heavy arrivals, met a fair demand at 3d. advance. Maize 6d. dearer, and grinding barley 3d. to 6d. Malting barley unchanged.—COULTHEY, Mark Lane.

The arrivals of wheat and flour have been large, and with a limited demand prices have declined 6d. to 9d. on the week. Maize, 3d. to 6d. dearer. Oats, 3d. higher. Barley firm at last rates. Flour quiet, rather lower.—W. P. WOOD AND Co., Mark Lane.

The market for milling offals remains unchanged from Monday last.—RICHARD LOGGETT, Mark Lane.

Flour.—A quiet trade at about 3d. under last week's prices.—T. S. MEDILL, Mark Lane.

Offals—Demand for bran for immediate consumption continues dull. Rather more inquiry for extended deliveries. Prices firmer. Pollards unchanged.—GREENHILL BROTHERS, Belfast, August 18.

Wheat a moderate extent of business at ½d. per cental decline. Flour small trade at Tuesday's prices. The North-Western and Liverpool Millers' Associations make no change in the minimum price of Bakers' flour. Maize has experienced a fair demand, mixed American being firmly held at an advance of ½d. to 1d. per cental. European very firm, and scarce at an improvement of 1d. to 1½d. Yellow Plate extremely scarce and ½d. dearer. Barley—For malting very steady, and occasionally dearer for Californian. Feeding has a fair inquiry at unaltered values. Beans very firm, and 3d. to 6d. per qr. higher. Peas more active and full prices asked. Oats are firmly held for both English and foreign, but only a quiet trade is passing at unaltered prices. Oatmeal steady, quiet. Oilcake has a good demand, and steadily held at full prices. ROSS T. SMYTH, Liverpool, August 18.

THE BALTIC, MONDAY, 1 p.m.

STATE OF TRADE.

American wheat cargoes are rather pressed on sale at 3d. decline, but Argentine and Russian are firmly held. Russian barley for autumn shipment is 3d. dearer from Saturday. Oats are not lower from last week, though the perspective supply is large. Cargoes of oilseeds are also well maintained in value. Maize is well held for all kinds.

BUSINESS DONE.

WHEAT.—No. 2 Red Winter, 30s., prompt shipment; No. 1 Hard Duluth, 32s, prompt shipment; Hard Kansas, 30s, prompt shipment; Californian, 30s 9d, prompt shipment; Argentine, 29s 3d, prompt shipment; No. 1 Northern Spring, 29s 3d, prompt shipment; ditto, 30s, September shipment; Best Manitoba, 31s 3d, on passage.

MAIZE.—Galatz, 23s, prompt shipment; American, 19s, September shipment.

OATS.—Vologda, 13s 9d, prompt shipment; Canadian, 15s, prompt shipment.

BEANS.—Smyrna, 27s 3d, prompt shipment.

LINSEED.—Calcutta, 52s. 9d., September shipment.

COTTONSEED.—Egyptian, old crop, £6 13s 9d, September shipment; Egyptian, new crop, £5 18s 9d, December shipment.

PROVISIONS.

London, Monday.—The arrivals from Ireland last week were 2,789 bales bacon, and from foreign ports 9,944 bales bacon. The late advances in Danish bacon having somewhat checked the demand, prices were in many cases easier again last week, although Canadian, from its late low range, was selling better at more money. Irish ranged from 56s, 66s up to 72s, Danish from 50s, 68s up to 72s; and Canadian from 56s, 58s, to 64s. The butter market was quiet, but with the exception of French, which was quoted lower, prices were firm. Danish, 110s, 124s; French, 86s, 116s; Dutch, 110s, 112s; Irish, 98s, 112s; Canadian, 104s, 110s; American, 82s, 104s. Lard quiet. American 35s 6d, 37s 6d; Irish, 43s, 54s; Danish, 44s.

FEEDING STUFFS.

London, Monday. — Linseed Cake Market quiet; prices unchanged. Decorticated cotton cake firm and tending dearer, undecorticated slightly dearer. Rice meal, 5s dearer. Linseed strong, and 6d dearer on the week.

English linseed cake	£7	17	6 to	8 0 0	ex mill
American Calcutta linseed cake	7	15	0 to	—	ex quay

CATTLE.

Metropolitan Market, Islington.

Monday, August 13th, 1900.

	British.	Foreign.	Aug. 21st, 1899.
Beasts	1,190	1,145	1,[illegible]
Sheep and lambs	6,180	6,180	7,[illegible]
Calves	9	79	[illegible]
Milch cows	79	79	[illegible]

Quotations per 8lbs (sinking the offal).

	ENGLISH. Inferior.			Second.			First.	
	s.	d.		s.	d.		s.	d.
Beasts	3	0	—	4	2	—	4	10
Sheep	3	4	—	5	4	—	6	[illegible]
Lambs	5	6	..	5	10	..	6	2

Milch cows, per head £[illegible] to £[illegible]

British arrivals include as follows: Scotland, [illegible]; Eastern Counties, 40; Midland, Home and Western Counties [illegible]; Devon, 10; Ireland, 80.

There was in the beast market to-day a [illegible] supply, owing to the arrivals from Midland and [illegible] being [illegible] Herefords, reds and Lincolns late rates were maintained, though trade on the whole was dull and heavy, [illegible] grades were slow of sale, even at a reduction of 2d per 8lb. Little demand for fat cows, and prices [illegible] 2d per 8lb.

The following are top quotations per 8lb (sinking the offal):—

	Today			Aug. 21st, 1899.		
Devons	4s	8d to 4s	9d	4s	4d to 4s	6d
Herefords	4s	7d to 4s	9d	4s	4d to 4s	8d
Reds	4s	8d to 4s	9d	4s	4d to 4s	6d
Lincolns	4s	1d to 4s	3d	4s	0d to 4s	2d
Irish	4s	4d to 4s	6d	4s	2d to 4s	4d
Fat cows	3s	8d to 3s	10d	3s	4d to 3s	6d

In the sheep market there was a decrease compared with last Monday; the supply consisted of [illegible] from the Eastern Counties, 1,170 from Ireland and 240 Scotch. For sheep trade was firmer as regards wethers with an upward tendency in value; ewes were slow of sale at late rates; whilst lambs sold readily at an advance of 2d. per 8lb.

Undermentioned quotations are at per 8lbs. (sinking the offal), and are for the best of each class named

	To-day.			Aug. 21st, 1899.		
7½ to 8 stone Downs	5s	10d to 6s	0d	5s	4d to 5s	6d
9-stone ditto	5s	8d to 5s	10d	5s	2d to 5s	4d

11-stone Lincoln	5s	2d to 5s	4d	4s	8d to 4s	10d
10-stone Irish	5s	2d to 5s	4d	4s	10d to 5s	0d
10-stone Down ewes	4s	0d to 4s	5d	3s	8d to 3s	10d
11-stone half-bred ditto	3s	6d to 3s	8d	3s	4d to 3s	6d
5-stone Down lambs	6s	0d to 6s	2d	5s	10d to 6s	0d
6-stone half-bred ditto	5s	8d to 5s	10d	5s	4d to 5s	6d

London Central, Monday. — Good supplies; trade bad; Beef (carcasses), 3s 10d to 4s; hindquarters 4s 6d to 4s 10d; roastings, 4s. 8d to 5s 2d. Sheep: Ewe, 3s 2d to 3s 4d; wether, 4s 8d to 5s; hindquarters, ewe, 4s to 4s 4d; wether, 5s 4d to 5s 8d. Pigs: Large, 3s to 3s 4d; small, 3s 6d to 4s.

St. Ives (Hunts), Monday.—Beasts, 375; sheep and lambs, 2,022; pigs 3s. 6d; beef, 7s 3d to 8s 3d; mutton, 7s 7d to 9s 11d; lamb, 8s to 10s; pork, 6s to 7s. Fat beasts, sheep and pigs good demand; stores fair. Milch cows good trade for best prices £13 to £23.

FOREIGN CATTLE.

Deptford, Monday.—Beasts, 1,540. To-day's supply compared with Monday last showed an increase of 140, and consisted of 765 from the United States and 745 from Canada. The above does not include all arrivals, 1,192 more being held back for Wednesday. Trade, though of a slow nature, was firmer, at an advance of fully 1d per 8lb. The following were the quotations per 8lb (offal given in):—90-stone States, 4s 1d; 100-stone ditto, 3s 10d; 95-stone Canadians, 3s 11d; heavier ditto, 3s 8d; Ranchers, 3s 6d. Sheep, 487, consisting of Canadians, for which trade was firm, at from 4s to 4s 2d per 8lb, to dress from 68lb to 72lb. The following were the numbers on offer on the corresponding day last year, with the current top rates:—Beasts, 1,148; 4s 1d to 4s 4d per 8lb, to dress about 720lb. Sheep, 1,407; 3s 10d to 4s per 8lb, to dress about 68lb to 72lb.

Liverpool, Monday.—Best quality cattle in demand at late rates, middling and inferior kinds lower. Very slow trade for sheep and lambs, and everything much lower, excepting a few choice lots. Beef, 7d to 5d per lb; mutton, 7¾d to 5d per lb; lambs, 8d to 6¾d per lb. At market: 982 cattle and 12,386 sheep.

A Bullock goes Mad in the Street.—A bullock which was being driven from [illegible] through the streets of Birmingham yesterday [illegible] and charged at a number of people, a young man named Richard Bowsell being [illegible] into a garden, after attempting to rescue a child. The bullock lashed out several times [illegible] savagely at children, two of whom were so badly injured that hospital treatment was necessary. It took policemen and drovers two hours to secure the infuriated beast.

Harvesting by Moonlight.—[illegible] unusual sight of harvesting by moonlight was witnessed on every night during the past week [illegible] Labour is so scarce in [illegible] districts that the men cannot be spared to secure their own allotment crops, and some have consequently gathered them by the light of the moon. Many men have been seen working in the fields and [illegible] the same time, too, harvesting has been carried on at night; many of the crops are [illegible] and there is not such a liability of [illegible] gathered with a dew upon it.

LIVE STOCK AND MEAT TRADE REVIEW.

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

Trade in London.

At Islington on the chief market day of the week trade, notwithstanding the previous Monday was a Bank Holiday, was of a decidedly slower nature, sales having to be forced at lower rates by fully 2d. per 8lb. having to be accepted. Even at this reduction a clearance could not be made. The cause of this was undoubtedly the fact that the supply showed an increase of close on 500 head, the majority, as usual at this season of the year, arriving from the Midland counties, consisting of Herefords, Runts, and Lincoln Shorthorns. With regard to fat butchering cows, these being short in number, and meeting with more demand by country buyers, sold firmly at a slight advance in value, this remark also applying to fat bulls. Rough cattle were in light supply, and very difficult to vend. At the Foreign Cattle Market trade ruled much slower on all three market days, Monday's transactions being governed by a decline of 2d. per 8lb. on the previous week's rates, followed on Wednesday with another decline of 1d., and a similar amount on Saturday. It should be noted that all arrivals were not shown, 872 beasts on Saturday being held back. The total number offered for sale on both markets was 6,083 (decrease 257), consisting of 1,500 British (increase 380) and 4,583 foreign (decrease 637), these latter comprising 3,115 from the United States and 1,468 from Canada. The following were the top rates paid per 8lb. (sinking the offal) :—90-stone Herefords, 4s. 10d. ; 95-stone Runts, 4s. 9d. to 4s. 9d. ; 90-stone Norfolks, 4s. 8d. ; 100-stone Lincolns, 4s. 6d. ; 110-stone ditto, 4s. 2d. ; 90-stone Irish, 4s. 6d. ; 90-stone States, 4s. to 4s. 2d. ; 95-stone Canadians, 3s. 8d. to 3s. 10d. ; Ranches, 3s. 4d. to 3s. 6d. ; 100-stone fat cows, 3s. 10d. to 4s. The sheep trade was chiefly confined to Islington, where best-quality Downs and half-breds of neat weights maintained late rates and were steady of sale, other grades being rather lower in price, as also were ewes, this being due to the larger number shown. Lambs on Monday made 2d. per 8lb. less money, with a further fall of 2d. on Thursday, business on both days being dull and heavy. The total number penned at both markets was 12,113 (increase 2,078). The supply consisted of 11,250 British and 863 Canadians. Best pens made per 8lb. as follows :—7½ to 8-stone Downs, 6s. ; 8-stone Scotch, 5s. ; 9-stone Downs, 5s. 10d. ; 10-stone Irish, 5s. 4d. ; 10-stone Downs, 5s. 8d. ; 10-stone halfbreds, 5s. 6d. ; 10-stone ewes, 4s. 4d. ; 11-stone Lincolns, 5s. 2d. ; 5-stone fat Down lambs, 6s. 4d. ; 6-stone half-bred lambs, 5s. 8d. to 5s. 10d. ; 8½-stone Canadian sheep, 4s. Calves numbered seventy, being a slight increase on last week's numbers, and met with a dull trade at fully 4d. per 8lb. less money, the best making 5s. 2d. per 8lb. (sinking the offal).

Trade in the West.

The tone of the trade all through is now of a more hopeful character than it was before the advent of the rain, which has quite transformed the appearance of many of the districts, especially in the grass countries, which in many places are as green and verdant now as in the early days of spring. Store cattle are participating in the improved trade, more especially barreners, which are greatly in demand. Milch beasts are also a capital trade. Fat bullocks are dear again, making 11s. 6d. to 12s. 6d. per score for ripe heifers, cows selling freely at 11s. Mutton is also finding a good demand. Pigs show no tendency to lower rates.

Trade in Ireland.

In Dublin market on Thursday shippers were in small attendance, and local buying was slack, with the consequence that the all-round character of the market was dull and dragging. Though the inquiry for first-class beef was fair, a fall of from 10s. to 20s. per head must be noted on all descriptions of cattle, and a large number were left over unsold. Quotations were : Prime ox and heifer beef from 56s. to 60s. per cwt. ; second quality, 50s. to 56s. ; and inferior, 42s. 6d. to 47s. 6d. In sheep department trade was equally slow and depressed. Dairy cattle were very slow at about £1 a head down, and even with this reduction not half those in the market were sold. In sympathy with the other markets, pigs met with depressed sales at a fall in value of from 2s. to 3s. per cwt. on rates obtained last week. The top price for best hogs was 47s. 6d. per cwt.

Trade in Scotland.

John Swan and Sons, Limited, give the following as their report on above for the current week :—The numbers of fat cattle this week have been rather larger for the best class of conditioned bullocks. Trade has been good at nearly last week's prices, but others have been cheaper by about 10s. to 20s. a head. Fat cows a fair trade. Fat sheep and lambs have also been a considerably larger show. With the very hot weather buyers have been cautious, and except for the best shop sheep prices have been lower, both for sheep and lambs, to the extent of 1s. to 2s. a head. Ewes also cheaper. Fat calves a very small lot, and met a dear trade. Pigs, in average numbers, continue to sell well. In the store markets there have been very large supplies of sheep. The demand has not been quite so good, and trade has been at reduced prices. The best class of lambs, however, are selling well. Store cattle were a very good lot, and they met a fair demand. The very high prices asked somewhat check ready sales, but those with any condition are sold at good prices. Milch cows rather more numerous, and trade for the best descriptions has been better. Quotations :—Best beef, from 8s. 6d. to fully 8s. 9d. per stone ; secondary, 7s. 9d. to 8s. 3d. per stone. Mutton from 7½d. to 8½d. per lb.

LONDON.

London Central, Wednesday.— Small supplies ; trade slow. Arrivals of beef included 250 Liverpool sides, 1,250 hindquarters, and 550 forequarters American refrigerated. Beef : English, 3s 10d to 4s ; American Deptford-killed, 3s 8d to 3s 10d ; Liverpool, 3s 4d to 3s 8d ; American refrigerated hindquarters, 3s 6d ; forequarters, 2s 4d. Mutton : Scotch, 4s 8d to 5s ; English wethers, 4s 6d to 4s 8d ; ewes, 3s 4d to 3s 8d ; English lamb, 4s 8d to 5s. Veal : English and Dutch, 3s 8d to 4s 4d. Pork : English, 3s 4d to 3s 8d ; and Dutch, 3s to 3s 4d per 8lb.

London Central, Friday.—Supplies good, trade better. Arrivals of beef included 50 tons Scotch, 650 Liverpool sides, 3,400 hindquarters, and 2,400 forequarters American refrigerated. Beef : Scotch, short sides, 4s 4d to 4s 8d ; long, 4s 2d to 4s 4d ; English, 4s to 4s 2d ; American, Deptford killed, 3s 10d to 4s ; Liverpool, 3s 8d to 3s 10d ; American refrigerated hindquarters, 3s 4d to 3s 8d ; forequarters, 2s 4d to 2s 8d ; New Zealand hindquarters, 3s to 3s 2d ; forequarters, 2s 2d to 2s 3d. Muttton : Scotch, 5s to 5s 2d ; English wethers, 4s 8d ; ewes, 3s 4d to 3s 8d ; Canterbury, 2s 2d to 2s 6d ; Wellington, 2s 1d to 2s 4d ; Sydney and River Plate, 2s. Lamb : English, 5s to 5s 4d ; New Zealand, 2s 10d to 3s. Veal : English and Dutch, 3s 8d to 4s 4d. Pork : English, 3s 6d to 3s 10d ; and Dutch, 3s 2d to 3s 6d per 8lb.

Islington, Thursday.—Limited supply, principally fat bulls and rough selections ; trade quiet. Sheep arrivals moderate ; slow demand ; prices without appreciable change. 7½-stone to 8-stone Down wethers, 5s 10d to 6s ; 9-stone, 5s 8d to 5s 10d ; 10-stone half-bred, 5s 4d to 5s 6d ; 10-stone Down ewes, 4s 4d ; 11-stone half-breds, 3s 10d to 4s. Lambs met with quiet support. 5-stone fat Downs, 6s 2d to 6s 4d. Calf trade steady, the best on offer making 5s 6d to 5s 8d per 8lb, to sink the offal. Total supplies : 30 beasts, 3,990 sheep and lambs, 65 calves, 25 pigs, and 5 milch cows.

COUNTRY.

Ashford, Tuesday.—Good laverage Kent lambs fetched from 18s to 20s a head. The top price realised was 25s. In the fat stock department, best beef made 12s per score, but butchering cows were cheap. Mutton, veal, and lamb sold fairly well at last week's rates. Lamb does not now fetch more than small Down mutton. Pork was in some demand at 9s to 9s 6d per score for best animals ranging from 3 to 10 score.

Basingstoke, Wednesday.—At Raynbird and Sons' saleyard the attendance of buyers was fairly good to meet a supply of 33 fat beasts, 46 calves, 731 fat sheep and lambs, 97 pigs, and 53 head of dairy and store cattle, for which the following prices were realised :—Fat beasts, £13 to £21 15s ; fat calves, 70s to £5 15s ; small, 20s to 60s ; fat wethers, 38s to 60s ; fat ewes, 34s to 38s 6d ; lambs, 24s to 49s 6d ; fat porkers, 31s to 56s ; store pigs, up to 15s 6d ; dairy cows, £7 to £18 15s. A short supply of fat beasts were cleared without difficulty at late rates ; prime Devon steers making up to £21 15s ; heifers, £17 ; Shorthorn steers, £18 5s ; maiden heifers, £19 10s ; cows, £16 15s ; polls, £15 10s ; young polled steers, £17 10s, etc. A good supply of prime quality fat sheep and lambs attracted a very numerous attendance of buyers ; the biddings were spirited throughout with a good finish. Prime quality sheep and choice fat lambs nearly maintained last week's extra rates. Ewes made more money, with a better trade. Prime quality Hampshire Down wethers and young ewes made 49s, 52s, 47s 6d, 51s, 60s, 48s, 52s, 44s, 40s, 45s, 47s, 46s, 55s, 58s 6d, 45s 6d. Eight-months-old lambs, 37s 6d, 38s, 44s, 49s, 36s 6d, 49s 6d, 41s 6d, 42s, 38s 6d. Three-months-old sucking lambs 38s 6d, 24s. Southdown lambs, 33s 6d Old ewes, 34s, 38s, 35s, 38s 6d, 31s 6d. Rams, 42s 6d. Black-faced Scotch wethers, 39s, 32s, 29s, 27s. Owing to the harvest operations, there was only a short supply of dairy cows on offer ; for the best descriptions better prices were obtainable. Store cattle met a dull trade. Fat calves, with a ready sale, met a clearance. Fat porkers are in demand, realising satisfactory prices. Store pigs also met a fair inquiry. Ruling values :—Prime Devon beasts, 7d to 7½d ; ditto Shorthorns ditto, 6½d to 6¾d ; bulls, cows, and inferior, 5½d to 6d per lb. Best quality sheep, 8¾d to 9¼d ; second ditto, 8d to 8¾d ; old ewes, rams, and inferior sheep, 6½d to 7¼d ; choice fat sucking lambs, 9d to 10d per lb. Fat calves, 7d to 9d per lb. Porkers, un to 10s 6d per score.

Braintree, Wednesday.—There was a good trade at Messrs. Balls' auction mart. Prices : Beef, 4s 10d ; and mutton, 5s 2d per stone ; pork, 9s per score. Numbers penned : Beasts 32, fat sheep 217, hogs 70, store pigs 315, calves 12. Store sheep and cattle scarce.

Calne.—Present prices for prime pigs, in lots of not less than 10, on rail within 100 miles of Calne :—

Prime stores.	Thickness of fat in any part of the back.	Price per sc.
6 sc 10 lbs to 9 sc 10 lbs ..	2½ in. and under.. ..	10s 0d
Under 10 sc 10 lbs	Not exceeding 2½ in. ..	9s 6d
Under 11 sc 10 lbs	Not exceeding 2¾ in. ..	8s 9d
Under 12 sc	Not exceeding 3 in. ..	—

Any pigs outside these limits at their value. Half truck, 12 pigs. Whole truck, 25.—CHARLES AND THOMAS HARRIS AND CO., Limited, Calne, Wilts.

Cambridge, Monday.—The stock exhibited for sale at this market and the prices obtained were as follows :—Beasts, 90 ; sheep, 202 ; pigs, 283 ; horses, 13. Beef, 7s to 8s per stone ; mutton, 4s 4d to 6s ; pork, 5s to 6s 3d. Very few store beasts to hand. Fat beasts a fair show and trade better. Fat sheep, a good number to hand, trade brisk at a little more money. Stores only a few lots shown. Fat pigs, a few more to hand, and trade quite up to last week. Stores, a fair trade all round.

Canterbury, Saturday.—A fair supply of lambs, and an improved trade. One lot of 120 ranged from 11s 6d to 15s, and another from 13s to 20s. Two wethers ranged from 17s to 27s, and averaged 22s per head ; other poor class specimens only made 15s. Ewes, 17s to 26s ; cows and calves, £17 to £17 10s.

Carlisle, Saturday.—The show of Irish store cattle consisted of about 300 heifers, being rather above the average at this period. There was an absence of the smaller class of beasts, and the majority of the inhabitants were well-conditioned specimens. Fairly large attendance of buyers, and good sale at 8s 10s to £10 10s for medium sorts, and up to £16 10s for the best specimens. Young pigs were a small show, and met a slow sale at 21s to 28s each.

Chester, Thursday.—The supply both of store and dairy stock was far in excess of the demand, and prices were consequently very irregular, and in some instances considerably reduced to effect sales. A fair show of sheep ; trade quiet at last week's rates. Quotations :—Milch cows, £14 to £20 ; calvers, £13 to £18 ; barrens, £10 to £12 ; heifers, £8 to £12 ; stirks, £5 to £8 ; sheep, 22s to 32s.

Doncaster, Tuesday.—Good supplies of cattle and sheep but prices rather easier. Beef made 7s to 8s 4d per stone Hog sheep, 7d to 8d ; small cross-bred sheep, 8d to 8½d ; lambs 8½d to 9½d per lb ; and veal, 7d to 8½d per lb.

Dorchester, Saturday.—Heifers and calves and fat sheep sold well, the former making from £15 15s to £21 5s ; cows and calves made from £13 10s to £16 15s ; barreners, £18 to £23 10s pair ; and fat bulls, £15 10s to £20. Wethers, 43s to 48s 6d ; Down lambs, 37s 6d ; crossbreds, 34s 6d.

Dublin, Thursday.—A moderate inquiry for all classes of cattle, tending towards dulness for inferior meated descriptions, characterised to-day's proceedings in the beef department. Prices perhaps a shade lower all round, this tendency being more marked in the rougher sorts. The choicest qualities of mutton and lamb realising late rates with difficulty, all other sorts lower and difficult to dispose of. Cattle (best), 31s to 34s per cwt. Inferior descriptions back to 28s per cwt. Mutton, 5½d to 7¼d per lb. Lambs. 14s to 35s each.—GANLY, SONS, AND CO.

Glasgow, Wednesday.—Demand slow, owing to hot weather, with rough cattle difficult to cash due to stringent regulations as to slaughtering. Buyers received no compensation. Horn cattle steady ; top Scotch, 68s per cwt ; secondary Scotch and top Irish, 64s to 66s ; Canadians, 56s to 60s, Best sheep, 8½d to 8¾d ; lambs, 8d to 8½d. Dead meat quiet.

Hereford, Wednesday.—Return of stock brought to the cattle market this day :—Bullocks and cows 490, calves 100, sheep 1,101, lambs 1,179, pigs (fat and sows) 4, sucking pigs 6, pigs (stores, not more than ten) 78, pigs (stores, more than ten) 70, horses 53, colts 25. Prices of stock : Best beef, 6d to 7d per lb ; wether sheep 6½ to 8d per lb ; ewes, 5½d to 6d per lb ; veal, 9d per lb ; lamb 9½d per lb ; pork, 4½d to 5d per lb ; bacon, 4d to 5d per lb.

Ipswich, Tuesday.—Messrs. Rodt. Bond and Sons report a good average supply of fat cattle at their sale for the time of year, numbering upwards of 100, for which the trade was satisfactory ; many of them were small in size and nice in quality, making up to £22 10s. The supply of cows and calves was very short, and prices were much the same as last week A few lots of fat lambs were penned which sold well up to 46s. In the store sheep pens, ewes made 39s, and lambs 27s, and others at rather better prices. Fat sheep were well represented, for which the trade was good, up to 57s per head. The supply of swine was rather short, owing to harvest weather. There was a good trade for all qualities at a slight advance on late rates. Beasts, 340 ; calves, 23 ; sheep, 2,799 ; swine, 991 ; horses, 13.

Knaresborough, Wednesday.—A small show of grazing cattle and calving cows. Trade slow. Yearling bullocks and heifers, £6 10s to £8 ; two-year-old bullocks, £9 10s to £12 10s ; ditto heifers, £9 to £13 ; calving cows. £16 to £18 10s ; calving heifers, £13 to £15 ; and gelt cows, £9 to £10 10s each.

Leicester, Wednesday —Full deliveries of grass-fed bullocks came to hand in excellent condition, and trade was rather better. Choice bullocks made 6½d per lb : secondary qualities, 6d to 6¼d ; heifers, 6¼d ; cows, 5d to 5½d per lb Sheep were a large supply, and changed hands freely at 7¾d to 8¼d per lb for light weights ; large sheep, 7d to 7½d ; and lambs, 8½d per lb. Calves were a dull trade at 7d to 7½d per lb.

Leicester, Saturday.—Fair supplies of store stock, in very good condition. Trade sluggish for all except choice qualities. Milch cows in strong demand at £16 to £23 per head. Bullocks, £10 to £13. Young stock a slow trade.

Lyburn, Friday.—Calving cows and heifers were a fair show, and trade was moderate, calving cows making, for best classes, £18 to £20 ; others, £14 to £18 ; and calving heifers, £13 to £16 each.

Lincoln, Friday.—There was a very poor show of both milch beasts and store cattle, for which there was scarcely any demand, with no quotable change in value. Milch beasts rangrd from £12 to £20 : two-year-olds bullock, £10 to £14 ; and yearlings, £5 to £8 each. The pens were poorly supplied with sheep. Ewes made from 20s to 30s each, and lambs, 13s to 27s.

Lincoln, Friday.—The show of beasts was small, and trade slow. Yearlings made £5 to £8 ; two-year-olds, £8 to £12 ; bullocks, £12 to £16 ; and cows up to £21 per head. The supply of sheep was only moderate and trade was dull. Lambs made 13s to 27s ; and ewes, 20s to 30s each.

Louth, Friday.—A large attendance. There was an improvement in the beef trade on the week. The mutton trade remained about the same, though prices varied considerably. Wethers made up to 58s, and ewes up to 55s each.

Malton, Tuesday.—Average show of stock, and plenty of buyers, but the great heat slightly affects the tone for fat stock. Quotations about the same as last week. Veal calves and lambs are dear. Heavy ewes show most depression. Calves and pigs were few in number.

Newcastle, Tuesday. — Heavy trade throughout, and prices in favour of buyers. Numbers :—Cattle, 1,832 ; sheep and lambs, 9,273 ; pigs, 485 ; calves, 79. Prices (sinking the offal) :—Beef, 5s 6d to 8s 9d ; pork, 5s to 7s 9d per stone ; mutton, 6d to 8½d ; lamb, 8½d to 9d ; veal, 5d to 8d per lb.

Norwich, Saturday.—The supply of store beasts here today was small. Trade was quiet at late rates, but a complete clearance was not effected. Fat beasts which were in increased supply, made 7s 6d to 7s 9d and 8s per 14lb. Store sheep were not very freely offered ; previous rates were about maintained, lambs making 20s to 34s, and ewes, 35s to 55s per head. Fat sheep were quoted at 8s 6d to 9s and 9s 6d per 14lb. The weather has been very dry in Norfolk during the past week.

Nottingham, Wednesday.—Short supply of good beef, best making 7s 9d to 8s per stone, and moderate beef 7s to 7s 6d. Small weight sheep, 8¼d ; heavier weight sheep, 7¾d to 8d ; lambs, 8d to 8½d ; ewes, about 6d ; and calves, 7½d to 8d per lb.

Otley, Friday.—A heavy show of cattle, an increased attendance of buyers, trade being firmer for the best classes of cattle. Quotations :—Best milch beasts, from £18 to £20 10s ; inferior classes, from £12 10s to £14 10s.

Penistone, Thursday.—The cattle were scarcely an average show, and few changed hands, though there was a little more doing than last week, late rates being maintained. Three pens of lambs sold at 27s each.

Romford, Wednesday. — A large supply of fat beasts, principally of a middling description. Best animals made 4s 4d to 4s 6d, and middlings 4s to 4s 2d per stone. Calves in short supply, and trade about the same, at 4s 10d 5s per stone. Sheep in better supply, and trade about the same. Best sheep made 5s 6d to 5s 8d, and middlings 5s to 5s 2d per stone. Lambs in average supply, and trade about the same, at 6s to 6s 4d per stone. No store beasts on offer.

St. Ives, Monday.—The number of stock entered at this market was :—Beast, 275 ; sheep and lambs, 1,800 ; pigs, 176. Best 7s to 8s ; mutton 7s to 8s 1½d ; lamb, 9s to 10s ; pork, 6s 3d to 7s 3d ; sows, 5s to 5s 3d. Fat beasts, good demand ; stores fair. Fat and store sheep fair. Fat pigs, sharp trade ; stores better. Milch cows fair show and trade, prices £14 to £22.

Salford, Tuesday.—Sheep and lambs were in about the same numbers as last week. The demand for choice cattle was better, at prices in sellers' favour. Middling sorts sold more readily at late rates. Choice fat sheep and lambs were in better demand at late full prices. Middling sorts sold slowly at generally higher rates. There was rather a slow trade for calves and pigs. Quotations—Cattle, 5½d to 7¼d ; sheep, 6d to 8¼d ; lambs, 7d to 9d ; calves, 9d to 7d per lb ; pigs, 9s 6d to 10s per 20lb. At market—Cattle, 1,830 ; sheep and lambs, 15,088 ; calves, 124 ; pigs, 49.

Shrewsbury, Tuesday.—Good trade all round, with small supplies. Quotations—Lamb, 7d to 8½d. Beef, 6d to 7½d; mutton, 6d to 8d; and veal, 6½d to 8d per lb. Porket pigs, 9s to 10s; and bacons, 8s to 9s per score. Cows, with calves, up to £21. Hay, up to £4. Numbers offered—23 horses, 330 cattle, 28 cows with calves, 1,834 sheep and lambs, 66 calves, 7 fat, 80 porket and 185 store pigs.

Spalding, Tuesday.—A rather short supply in both the sheep and cattle markets. Beef was a little dearer, making 7s 6d to 7s 9d per stone for best sorts. There was a sharper trade for mutton, which made 8d a pound. Store lambs were a slow trade.

Stockport, Friday.—Business in the Castle Yard showed a slight advance on the preceding Friday. Stocks of milch cows limited; pigs for storage purposes ditto. Quotations for former £15 to £20 10s; for the latter 25s to 40s each.

Stockton, Wednesday.—There were on offer 212 cattle, 4 calves, 330 sheep, and 110 lambs. Only a very small show of best cattle, which made 8s and 8s 6d per stone; secondary sorts realising 7s and 7s 6d. Calves fetched 6d and 7d per lb; young sheep, 8½d; lambs, 8½d and 9d; ewes, 7d; and tups, 5d.

Taunton, Saturday.—Short supply, small attendance, and slow trade.

Thame, Tuesday.—This was the largest sale held this season, and with a very large attendance of buyers, including the Reading and Newbury customers, trade was fast throughout and nearly every head of stock changed hands. The quality of the stock was excellent. Choice beef made 5s, and wether mutton, 6s per stone. Mr. Bond had a capital entry, including the whole of the beasts in the market. His sale comprised 107 fat beasts, which all changed hands, with the exception of seven, there being no lack of biddings from start to finish; 20 heifers and calves, and young stock which sold readily; 407 fat sheep and lambs and stores, 63 fat and weaning calves, and 94 fat and store pigs, and 3 horses. Fat bullocks made £16 to £22 7s 6d; fat heifers, £14 to £23; yearling stirks, £5 12s 6d each; wether sheep, 47s to 60s 6d; fat ewes, 39s to 54s; fat lambs, 28sto 42s 6d; store lambs, 25s to 31s 6d; fat calves, £3 to £3 17s; cow calves, 22s to 55s; bull calves, 17s to 58s; fat pigs, 10s per score. Stores a better trade.

Wakefield, Wednesday.—The trade is changed since last week, every department being slower. Best beef makes 6d to 6½d, and in exceptional cases 6¾d. Choice little sheep with difficulty make 8½d per lb, good strong animals 7½d to 8d, and ewes 6d per lb. Beasts penned 1,384, sheep 4,065.

Wetherby, Thursday.—A fair show of calving cows, with a quieter trade, at less money. Several lots of Irish lean stock on offer, the very high prices asked hindering trade, and not many sold. Beef, 8s to 8s 3d per stone; sheep and lambs, 7d to 9½d per lb.

Wolverhampton, Wednesday.—Beasts a moderate supply; slow trade. Sheep and lambs fair show; trade slow. Calves small supply; slow trade. Milch cows a fair supply, prices in favour of buyers. Beef, 5½d to 7½d per lb; mutton, 6½d to 8½d per lb; lamb, 7¾d to 8¾d per lb; veal, 6d to 7½d per lb; bacon pigs, 9s 6d to 9s 9d per score; porkets, 9s 9d to 10s per score; sows, 7s per score.

Worcester, Saturday.—Good supply of cattle, which met a fair trade at late rates. Sheep moderate supply and slow trade. Fat calves were in request at previous prices, and there was rather more demand for pork pigs. Best beef, 7d to 8d; inferior, 5d to 6½d; wether mutton, 7d to 8d; ewes, 5d to 6d; and calves, 7d to 8d per lb.

Worksop, Wednesday.—A brisk trade, with slightly increased prices for beef. Sheep were a trifle lower. Best beef made 7s 8d to 8s 3d per stone; best shearling mutton, 7½d to 8¾d; and inferior qualities, 5d to 6½d per lb.

FOREIGN.

Deptford, Wednesday.—Entries 1,347, a decrease of 1,151, comprising 1,013 United States, 187 Canadian (best), and 147 Canadian (ranchers). Trade slow at 3s 9d to 4s, 3s 8d to 3s 10d, and 3s 4d to 3s 6d per 8lb, to sink the offal respectively. No sheep offered.

FEEDING STUFFS.

London, Thursday.—Linseed.—The improvement in the market noted at the close of last week has continued, and prices have advanced considerably, owing chiefly to the firmness of importers, by whom seed is now principally held nervous resellers having been eliminated. Linseed cakes continue steady. London made £7 17s 6d to £8 2s 6d. Russian, £7 10s to £7 15s ex dock. American Westerns at £7 10s to £7 15s. Cotton cakes are steadier. London made £4 5s to £4 7s 6d. Rapeseed is firmer, and prices have advanced. Cottonseed has improved considerably in value, owing to the continued firmness in Egypt.—THE PRODUCE BROKERS' COMPANY, LIMITED.

Mark Lane, Monday.—Linseed Cakes.—Imports of foreign are small and likely to continue so for some time as shippers still ask prohibitive prices. The quantity offering on this market is limited, but with only a quiet demand values remain steady. Russians sell slowly at last Monday's prices. Americans are the turn dearer. English are unchanged with a rather better inquiry. Cotton cakes.—There have been some large arrivals of Egyptian during the past week, which have found a ready sale at a slight advance. English are in better request and the turn dearer. Decorticated remain scarce and dear at an advance of 2s 6d per ton, while meal is unaltered. Rape seed.—Ravison £4 7s 6d, or nutted, bags included, £4 12s 6d, both on rail London. Maize germ meal.—Unchanged, with only a retail inquiry. Rice meal.—Spot Rangoon is firmly held at last week's price, while in forward positions 2s 6d per ton more money is asked.

—PINNOCK BROS., Mark Lane.

Hull, Tuesday.—To-day English wheat is selling at the same prices as last Tuesday, and foreign at about 3d per qr reduction on the week, the advance realised in the meantime being lost. Oats maintain full prices, with a fair demand. Beans also fully as dear. Flat maize, unaltered; Round Odessa, 3d to 6d per qr dearer than last Tuesday. Linseed is firmer, and a fair amount of business is being done at advancing prices. Cottonseed.—There has been more doing in this article during the past week, and prices improved in all positions. Hemp.—Firm, but little doing. Linseed cakes: Very firm. Cotton cakes: 2s 6d to 5s per ton dearer, with better demand. KILCHLEY MANSTED AND CO.

WATERLOO ROUND FEELING CAKES, £6 15s 0d PER TON. WATERLOO ROUND 97 PER CENT. PURE LINSEED CAKES, £8 17s 6d. PER TON; WATERLOO ANGLO SHALE 97 PER CENT PURE LINSEED CAKES, £8 15s. 0d. PER TON; WATERLOO 97 PER CENT. PURE EGYPTIAN COTTONSEED CAKES, £4 10s 0d PER TON. ALL F.O.R. HULL.

WOOL.

London, Friday.—Wool, English, per pack of 240 lb—Fleeces, Southdown hoggs, £8 to £11 10s; half-bred hoggs, £8 to £8 10s; ditto wethers, £6 10s to £8; Kent fleeces, £6 to £7; Southdown ewes and wethers, £8 to £11 10s; Leicester ditto, £6 to £7. Colonial, per lb: Victorian, fleece, superior, 1s 6d to 1s 7d; scoured good, 1s 7d to 1s 7½d; scoured average, 1s 5d to 1s 6d; greasy average to fair, 10½d to 11½d; New South Wales, scoured average, 1s 3d to 1s 4d; greasy average, 8½d to 9½d; South Australian, greasy average, 6d to 7d; New Zealand, scoured average, 1s 4½d to 1s 5½d; greasy average, 8½d to 9½d; Cape scoured superior, 1s 6d to 1s 8d; fleece average, 8d to 9d; greasy average, 6½d to 7d; Natal, scoured, 1s 2d to 1s 3d; greasy average, 7½d to 7¾d. Crossbreds, greasy, Victorian, good to superior, 10½ to 1s; New Zealand, fine, 9d to 10d; ditto medium, 7¾d to 8½d; ditto coarse, 6d to 7d.

Bradford, Thursday.—The local feasts stop a good deal of machinery, consequently business is slower than ever, to the prejudice of values in most cases. Merinos steady. Crossbreds only fairly so. English weak, and nothing doing. Mohair neglected. Yarn trade without improvement in any direction. In the piece trade more disposition to do business at low prices.

Canterbury, Saturday.—Trade is dull, as growers do not care to part with their wool at present low rates. Kent fleeces, 6d; lamb's wool, 4d to 5d, half-breds, 7d to 7½d; Downs, 8d to 10d; locks, 2d to 2½d per lb.

Leicester, Saturday.—There has been an increased turnover in wool, but business still remains quiet. In yarns workpeople are actively engaged in keeping up the deliveries under old contracts, but there is no influx of new orders. The inquiry for fancy knitting, lambs' wool, and natural cashmeres is good. Stocks are light, and quotations firm.

HAY AND STRAW.

Whitechapel, Saturday.—Small supplies, and a steady trade. Best clover, 85s to 100s; inferior ditto, 80s to 85s; specially picked hay, 92s 6d; good ditto, 80s to 87s 6d; interior ditto, 50s to 60s; mixture and sainfoin, 70s to 90s; straw, 25s to 36s per load.

Bristol, Friday.—Clover hay, 75s to 80s; meadow hay, 65s to 75s; straw, 45s to 50s.

FOREIGN HAY AND STRAW.

London, Saturday.—With supplies on a very small scale, and an improving demand, our market is much dearer for all qualities. A few offers of new Dutch clover and hay are to hand, and sellers of these parcels are asking exceedingly high figures. We quote: Canadian Timothy and clover mixture, 85s to 87s 6d; good Dutch hay, 67s 6d to 70s; common ditto, 62s 6d; Dutch, 1st cut clover (old or new), 87s 6d; large bale French wheat straw, 49s; small ditto, ditto, 45s; small bale French oat straw, 44s. All these prices are per ton, delivered by barge alongside.—FULLER AND PRENTIS, 9 and 10, Great Tower Street, E.C.

HOPS.

Canterbury, Saturday.—The hot sunshine has helped development from burr into hop, but until the last night or two the night temperature has been much too cold. The presence of mould has necessitated a great deal of sulphuring, but vermin has practically disappeared. Only about one-half the crop of last year is anticipated.

Worcester, Saturday.—Trade is of a very retail character, and no hops passed the scales this week, but a firmer tendency is apparent for all sound qualities. Although the gales did some damage to exposed plantations the succeeding rains and warmer weather have been beneficial to the growing plant, and even some grounds which threatened a total collapse now promise to grow a few hops.

Worcester, Saturday.—The hops in this district have made fair progress since last week, though the effect of the late rough winds is now more apparent, and the crop under any circumstances will be only a light one. The trade is quiet, but prices keep firm, as the present holders of hops will not accept bids, believing they will be worth more money when the new crop comes in.—PIERCY AND CO.

MANURES.

Liverpool, Friday.—Fertilisers are a dull trade all round. The demand for feeding stuffs is more active, and prices are well maintained. Linseed cakes are very firm, and the following are the current rates asked, and at which a small trade is passing: Nitrate of soda, best quality, i.e., guaranteed 96 per cent., pure, in bags, £8 5s to £8 7s 6d per ton; East India bone meal, in bags, £4 5s per ton; kainit, prime 23 per cent., in bags, £2 7s 6d to £2 10s per ton; linseed cake, American thin oblong, fair to prime, in bags, £7 12s 6d to £7 17s 6d per ton; ditto, English, prime, in bulk, £8 to £8 5s per ton; ditto, foreign round, prime, soft and oily, in bags, £8 to £8 2s 6d per ton; cottonseed cake, N.A., decorticated, prime, fairly soft, in bags, £6 12s 6d to £6 15s per ton; ditto, English ditto, prime, very soft, in bags, £6 17s 6d to £7 per ton; ditto, English, undecorticated, prime, in bulk, £4 5s per ton; cottonseed (crushed) 20 to 25 per cent. oil, prime, in bags, £6 15s per ton; maize germ meal, English, prime, in bags, £5 2s 6d to £5 5s per ton; rice meal, Rangoon, as imported, in bags, £4 5s to £4 7s 6d per ton; ditto, meal, coarse to fine grinding, prime, in bulk, 11s 3d to 12s 6d per 240lb; N.A. cloverseed, new red, fair to good, in bags, per cwt; D.N.S. brand superphosphate of lime, guaranteed, 25 to 27 sol., in bags, per ton; ditto, ditto, 30 to 31 sol., in bags; ditto, ditto, 35 to 36 sol., in bags; basic slag, prime quality, guaranteed, 30 to 35 per cent. phos., in bags, delivered; ditto, 35 to 40 phos.; ditto, finest quality, ditto, 38 to 45 phos., in bags, nominal.—H. JONES LANGAR AND CO.

Killarney Fair, held on Wednesday, was a large one, and a good demand prevailed for good Kerries, but black Kerries did not sell quite so well, and a good many animals failed to find purchasers. Prices: Calves, second class, £3 5s to £5 5s.; third class, £2 5s. to £3. Yearlings, second class, £5 15s. to £6 10s.; third class, £3 15s to £5. Two-year-olds, first class, £10 6s. 3d. to £11; second class, £7 to £9 17s. 6d.; third class, £4 5s. to £6 15s. Three-year-olds, third class, £5 to £6 5s. Springers, second class, £11 to £12; third class, £7 10s. to £9 10s.

THE BALTIC.

There has been no disposition among the holders of wheat cargoes to take less money, but there also hold part cargoes—in other words, the smaller operators seem to have lost courage and are willing to close with bona fide offers at 6d. or 1s. The sales of the week include hard Duluth at 31s. 9d., hard Manitoba at 32s., Californian at 31s., Walla Walla at 29s. 6d., South Australian at 31s., Argentine at 29s. 3d., Odessa Ghirka at 29s. 6d., fine Azima at 31s., Roumanian old crop at 30s., Bulgarian new crop at 29s., and Turkish new crop at 28s. per qr.

Maize cargoes are well held, and there are a good many buyers at full currencies. Sales include Argentine at 20s. 6d., American at 19s., and Odessa at 24s. 6d. per qr.

Barley cargoes are in slightly improved request for autumn shipment; 19s. is paid for Azoff. Oats are firmer for September shipment than for cargoes on passage. South Russian old crop is quoted 14s. 6d. for prompt shipment.

Other cargo sales embrace Saida beans at 30s., Canadian peas at 28s., Persian ditto at 22s. 6d., French buckwheat at 28s., and Hungarian haricot beans at 44s. per quarter.

Arrivals of grain and seed laden vessels at ports of call for the week were 1 wheat (San Francisco).

The sailings of grain and seed laden vessels from ports-of-call for the week were nil.

Since January 1, 1900, the total arrivals have been 225 wheat, 13 wheat and barley, 6 flour, 10 maize, 1 maize and oats, 23 barley, 14 beans, 7 locust beans, 1 linseed, 2 canary-seed, 5 valonea; total, 307.

Last year during the same time the arrivals were 203 wheat, 9 flour, 3 maize, 6 barley, 1 barley and beans, 1 rye, barley, and oats, 6 beans, 1 locust beans, 5 linseed, 4 canary-seed, and 7 valonea; total, 246.

Transactions in Store Stock.

[From the Irish Department of Agriculture and Technical Instruction.]

The prices realised at the small fair at Tulla, co. Clare, on Wednesday, were as follows:—Calves, first class, £4 15s. to £5 10s.; second class, £3 15s. to £4 10s. Yearlings, first class, £7 15s.; second class, £6 to £7 5s.; third class, £4 10s. to £5 1s. 6d. Two-year-olds, first class, £11 to £12; second class, £8 5s. to £10 10s.; third class, £7. Three-year-olds, first class, £14 15s.; second class, £11 to £12 10s. Springers, first class, £15 to £19; second class, £10 15s. to £14 10s. Lambs, first class, £1 5s. 6d. to £1 8s.; second class, £1 to £1 4s. Hoggets, first class, £1 18s. to £2 2s.; second class, £1 8s. to £1 17s. 6d. Young pigs, eight to ten weeks old, sold at from 16s. to 18s. each.

Dunlack Fair, held on Wednesday, was an average sized one. The demand for two-year-old heifers and springers was good, and lambs in good condition bought up readily, but others had to dispose of. Prices:—Yearlings, first class, £8 5s. to £8 6s. 8d.; second class, £6 10s. to £7 6s. 8d.; third class, £5 6s. 3d. to £5 10s. Two-year-olds, first class, £12 to £12 17s. 6d.; second class, £8 to £10 12s. Springers, first class, £16 to £19 10s.; second class, £11 10s. to £15 5s.; third class, £10. Lambs, first class, £1 12s. 6d. to £1 15s.; second class, £1 4s. to £1 8s. 6d.; Hoggets, second class, £1 8s. to £1 12s. Two-years-old and over, third class, 18s. 6d. to £1.

There was a large supply of stock at Stranorlar Fair (co. Donegal) on Monday, and a good demand prevailed for cattle in fair condition, but inferior animals were hard to sell. Lambs met a ready sale. Prices:—Calves, second class, £3 2s. 6d. to £4 5s.; third class, £2 1s. 3d. to £2 15s. Yearlings, second class, £5 15s. to £7 5s.; third class, £3 10s. to £5. Two-year-olds, first class, £11 to £12 5s.; second class, £7 7s. 6d. to £10 5s.; third class, £6 10s. to £7. Springers, first class, £16 10s. to £17 10s.; second class, £11 5s. to £15; third class, £7 17s. 6d. to £9 15s. Lambs, second class, £1 2s. 7d. to £1 7s. 6d.; third class, 8s. to 11s. Hoggets, second class, £1 10s. to £1 12s. 6d.; second class, 17s. Two-year-olds and over, third class, 16s. to £1 2s. 6d.

The fair held at Millstreet, co. Cork, on Monday was a small one, and trade was dull in the early morning, but a good deal [illegible]. Prices: Calves, first: [illegible] Yearlings, first class, £7 to £7 15s.; second class, £6 to £6 10s.; third class, £4 15s. to £5 10s. Two-year-olds, first class, £10 to £11; second class, £8 15s. to £9 10s.; third class, £7 8s. to £7 15s. Three-year-olds, first class [illegible] Springers, first class, £15 to £20; second class, £13 to £13 15s.; third class, £8 5s. to £10. Lambs, first class, £1 8s. to £1 15s.; second class, £1 4s. to £1 6s.; third class, 17s. 6d. to £1. Hoggets, first class, £2 1s. to £2 5s.; second class, £1 12s. to £1 17s.

Messrs. R. A. Lister and Co., Ltd., dairy engineers, Dursley, Gloucestershire, have received [illegible] and have awarded to them the [illegible] for their [illegible] at last year's exhibition held at St. Petersburg, Russia.

LIVE STOCK.

OUR ILLUSTRATIONS.

The Sussex heifer Peony is the property of, and was bred by, Mr. W. W. Hubble, The Elms, Hunton, near Maidstone. She was born on January 5th, 1899, her sire being Lieutenant 1362, and her dam Perrywinkle 7219, by Oxford Duke 1st 840. Peony has been pretty successful in the showyards this year, winning first and championship at the Tunbridge Wells Show, first at the Bath and West, and second at the Royal Counties and Sussex Shows. She was not exhibited at the Royal, York.

Mr. George Roberts, Stowe Manor House, near Weedon, is the owner of the Oxford Down shearling ram, which at the Oxford Show won first prize, and also took the Oxford Down Sheep-Breeders' Association's champion award for the best roan.

The Shire filly Victor's Queen 27158, the property of Sir J. Blundell Maple, Bart, M.P., Childwick, St. Albans, was bred by H.R.H. the Prince of Wales, K.G., Sandringham, her sire being Bury Victor Chief 11105, dam Solace 24787, by Lord Arthur 9334. At the Shire Horse Society's Show in the spring Victor's Queen was only placed fourth in her class, but at the Royal, York, she came out on top, and was also awarded the Shire Horse Society's champion gold medal for the best Shire mare or filly.

STOCK AND SHOW NOTES

By Herdsman.

The Council have fixed Wednesday and Thursday, July 3rd and 4th, 1901, as the date of the Leicestershire Agricultural Society's Exhibition for next year, to be held at Leicester. Secretaries are asked to note this.

Messrs. Alfred Mansell and Co., of Shrewsbury, shipped per the Elder, Dempster Line, from Avonmouth, on the 3rd inst., three beautiful Dorset ewes, selected from the flock of Mr. L. C. Attril, of the Isle of Wight, two of which were reserve No. (or 3rd place) at the Royal Show, and another somewhat smaller ewe, which Mr. Attril considered one of his best, but which had not previously been shown. These were shipped to the order of Mr. R. H. Harding, of Ontario.

Messrs. Alfred Mansell and Co., of Shrewsbury, despatched to the order of Mr. J. Graham, per the ss. Cevic, on the 10th August, a high-class Shropshire ram, specially selected to head his flock, from the prize winning flock of Mr. John Harding, sired by Perhaps 10076, bred by Mr. Farmer by Flag Signal 9024, dam by the renowned Parish Councillor 8170, and going back to the famous sheep Lord Oxon and Marquis of Bath. Accompanying this ram was a small selection of shearling ewes from the flock of Mr. Peter Everall. Messrs. Alfred Mansell and Co. have also despatched two exceptionally well-grown and good-looking Shropshire rams to head the pure bred flocks of Shropshire sheep, the property of Mr. Kruger and Mr. Rudmann, of Germany.

Messrs. Alfred Mansell and Co., of Shrewsbury, have just shipped per the ss. Memnon, on account of Mr. Geo. Allen, of Illinois, a choice selection of Southdown sheep, selected from the prize winning flock of the Pagham Harbour Company.

In addition to the splendid position taken by the Shrawardine flock at the Paris Exhibition, and the honours secured at the Royal, Bath and West of England, Herefordshire, and Shropshire and West Midland Shows, this flock has quite recently secured a grand array of prizes at the Royal Lancashire, Wirral and Birkenhead, and Ludlow Shows, including four firsts and reserve for Champion, six seconds, and three thirds, with yearling rams, aged rams, ram and ewe lambs, and yearling ewes. I would remind readers that the annual sale of rams and ewes from this flock takes place on Tuesday, at Shrawardine, six miles from Shrewsbury, Messrs. Alfred Mansell and Co. being the auctioneers.

The forty-eighth exhibition under the auspices of the Birmingham Agricultural Exhibition Society is to take place at Bingley Hall, on Thursday, September 20th. The schedule includes four classes for cows, heifers, and heifer calves, with prizes ranging from £10 to £3; a class for bulls exceeding twelve and not exceeding eighteen months old, with prizes of £15, £10, £7, £5, and £3, and an extra stock class for bulls of any age, for sale only. The entries close on Tuesday, August 28th, and intending exhibitors should apply at once for prize lists and entry forms to the secretary, W. H. Lythall, Bingley Hall, Birmingham.

The third annual sale of pure-bred Southdown sheep, bred by Mr. W. O. Hammond, St. Albans Court, Nonington, Kent, will take place on Wednesday next, the 22nd inst., at St. Albans Court, the auctioneers being Messrs. John Thornton and Co. The Southdown flock at St. Albans Court, on the high lying chalk hills between Canterbury and Dover, has been in existence since 1810; the present owner's grandfather, Sir Henry Oxenden, Bart., having owned a fine flock at Broome at the commencement of the present century. Sheep were originally obtained from the Goodwood, Buckland, and Merton flocks, as well as that of Mr. William Rigden. Ewes were twice purchased, viz.: twenty in 1864 at Lord Walsingham's sale at Merton, at a cost of £200, and fifteen in 1889 at Mr. Henry Webb's sale at Streetly Hall, from whom rams were obtained, as well as from Earl Cadogan, Sir James Blyth, Bart., Mr. Brassey, Mr. Hugh Gorringe, Mr. A. Heasman, Mr. Hugh Penfold, and the Pagham Harbour Company. To sustain the pure breeding and high character of the flock, neither trouble nor expense have been spared to secure the finest rams for breeding purposes.

The Old Court flock was founded more recently, ewes being purchased from the Duke of Richmond, and from Messrs. Emery. Rams were used from Mr. Stewart Hodgson, Mr. Toop, Mr. Ernest Matthews, and other eminent breeders. Both flocks have been carefully bred with the endeavour to maintain the true type of the breed. The rams will be found very uniform, with good wool. Exhibiting has not been practised; but the best evidence of the value of the sheep has been the great demand for the rams and ram lambs to go into the leading flocks. At the first sale in 1898, the first ram went to the old Buckland flock, and another to Lord Cadogan at 38 guineas, and ewes made up to 5 guineas each. Last season no less than 128 rams and ram lambs were sold for breeding purposes, chiefly to the hill breeders in Sussex. The catalogue for Wednesday's sale comprises about 300 ewes and 28 rams. The proceedings will commence with a luncheon at one o'clock.

On the last day of this month Messrs. Thornton and Co. will dispose of the flock of Southdown sheep, and some pure-bred Large White pigs, bred by Sir Thomas Barrett Lennard, Bart., at Woodingdean, Brighton. Sir Thomas Lennard may claim to be one of the oldest breeders of Southdown sheep in this country, as the flock was founded by his grandfather in 1857. So long ago as the year 1862, the present Baronet was the purchaser of some of the best of the ewes at the late Mr. Jonas Webb's sale at Babraham, giving 35 guineas each for a pen of ewes and 140 guineas for a ram. These were for the flock then kept at Belhus, Essex, where the great sales of the Belhus hunters were periodically held. The flock was very carefully bred there, and in 1865 the Gold Medal, presented by the late Emperor of the French at the Show at Poissy, in France, was won by sheep from Belhus, and prizes were often taken at the Essex and Suffolk County Shows. At a later period the flock was increased and kept at Woodingdean, where a suitable high-lying farm was taken on the East Sussex Downs, close to the sea coast near Rottingdean. The object has been to maintain there a flock which should combine purity of blood with the old type of the breed and the close dense fleeces of wool so necessary for sheep reared in a cold situation, and required to produce the high quality of mutton which is in demand in the Brighton district throughout the year.

The older ewes are principally by the Pagham Harbour Company's Windsor 3rd, Victor 16th and Cambridgeshire 4th, Mr. Henry Webb's Linton 162, a son of the 210 guineas ram, Cambridgeshire, and Bromley 165, bred at Woodingdean, from Mr. Edwin Ellis's sheep. The younger animals are by Messrs. Swoffer's ram Shortlegs 19th and others are by rams bred at Woodingdean from some of the best strains in the flock. The sheep are very carefully registered, the ewes as well as the rams being separately entered in the Flock Book of the Southdown Sheep Society. The Large White pigs are also carefully recorded, and they are a good lot of animals, running out regularly and in good healthy condition. They have been bred on the farm for several generations, and are descended from Mr. Sanders Spencer's and Mr. Frank Allmond's well-known stock. The sale commences after a half-past twelve luncheon.

Breeders of cart horses, whether Clydesdales or Shires, may be reminded that the time is fast approaching when the entries for the forthcoming volumes of the Stud Books will be closed, and that it is to their advantage to send their entries in as soon as possible. Not only does the regular entry of all stock ensure an accurate history of the breed, which in itself is a very important matter, but to a certain extent it increases the value of the animal entered. The foreign trade in horses of all kinds, and especially in heavy horses, has shown signs of improvement of late, and there are already indications that next season will be a brisk one. Under such circumstances it is advisable to register all the foals, for foreign buyers generally include a few yearlings when purchasing largely

The Board of Agriculture has revoked the order issued on May 14th this year, declaring the petty sessional division of Pool (Upper Division) and Caurse, and the borough of Welshpool, in the county of Montgomery, to be a swine-fever infected area. The revocation order was dated August 13th, and came into force on Thursday.

On Friday, September 7th, Messrs. John Thornton and Co. will sell by auction at Bellaport, Market Drayton, the pure-bred Shorthorn cattle belonging to Mr. H. Ker Colville, whose capital dairy herd has been made up with selections from well-known breeders in the counties of Cumberland and Gloucestershire, as well as in the neighbourhood and in the district around Kendal. Among the animals selected were several from Sir Wilfrid Lawson of Brayton, Mr. Graham of Edengrove, Mr. Dobson of Williamsgill, and Mr. Mason of Water Crook; there being some fine specimens of the old Benson, Laurustina and Gwynne tribes. The well-known dairy herds of Messrs. Hobbs of Maiseyhampton, Mr. Edmonds of Southrop, and the late Mr. Morris of Maisemore, are represented by fine specimens of the Dido, Fancy, Tulip, and Sonato families. The Darlingtons and Cold Creams have each good animals, and the Vanitys from Mr. Blackwell in Nottinghamshire have produced excellent stock, good alike for their milking, breeding and feeding properties. The herd was not exhibited till 1897; for three years the first prize for the best lot of bulls bred by an exhibitor has been won at the Crewe Show; many prizes have also been obtained in the female and dairy classes at the county and numerous shows held in the district. The animals have been naturally and hardily reared, on a cold high-lying farm, consequently they are likely to improve wherever they may go, and sustain the great reputation of the breed for the deep milking and quick feeding properties of the animals of which the herd is composed.

At the end of this week Messrs. Alfred Mansell and Co. will conduct two important sales of Shropshire sheep. On Thursday, at Downton, they will dispose of thirty rams and fifty shearling ewes, belonging to Mr. Thomas Fenn; and on Friday will bring under the hammer forty shearling rams and the same number of shearling ewes, belonging to Messrs. Evans, at Sherlowe. Both flocks have been very successful in the showyard, and as sales have been held annually for several years past, the high quality of the animals is well known all over the country. The sale at Downton will commence at two o'clock, and that of Sherlowe at one o'clock.

The entire herd of over a hundred pure-bred Shorthorn cattle belonging to Mr. James Watt, Knowefield, Carlisle, is to be dispersed on Wed-

nesday, September 5th, at Knowefield. This herd has been in existence upwards of fourteen years, and has been kept partly at Mr. Watt's farm in East Lothian, and partly at Blackford, his farm in Cumberland, the lease of which expiring at Candlemas necessitates the dispersal of the entire herd, which contains many animals of the finest strains of Bates and Booth blood. Purchases were made nearly ten years ago at Sandringham, and there are a number of fine animals descended from stock bred by H.R.H. the Prince of Wales; also Mr. John Wood's Prudence tribe, of which there are many representatives. Other well-known families are represented; in fact, the herd is full of some of the very best and most fashionable blood of the day, both through sires and dams. A few years ago the cow Lothian Brilliant was successfully exhibited, and a number of prizes were won in the Northern Counties. The animals have never been pampered nor forced for sale; they are in healthy natural condition, and are offered unreservedly. Messrs. J. Thornton and Co. are the auctioneers, and from them can be had catalogues, or any further particulars.

The rinderpest, in the district of Windhok, in German South-West Africa, is officially declared to be stamped out. The import of uninoculated cattle has been prohibited till further notice.

By permission of the Royal Dublin Society, the following general meetings will be held in the Committee Room in the new buildings at Ball's Bridge, on Thursday, August 30th, 1900: At 2 p.m., Hunters' Improvement Society, followed by Polo Pony Society, at about 2.30 p.m. It is hoped that members who are in Dublin will make a special point of attending these meetings, as they are valuable in enabling members of council to learn by personal interview the wishes of their Irish members. The Hunter meeting, held for the first time in Ireland in 1899, undoubtedly interested many Irish breeders of hunters, and secured their support as members.

All interested in the encouragement and breeding of good riding ponies should note that entries for Volume 6 of the Polo Pony Stud Book close on October 1st, 1900. Ponies are admitted into the polo section by inspection, prize qualification and pedigree. Mountain and Moorland ponies are admitted into their respective sections after inspection by the members of the local committee deputed to look after such native breed of ponies—Dartmoor, Exmoor, Fell, New Forest, Welsh (North and South), Highland and Connemara.

Tuesday, September 18th, is the date of this year's show and sale of the Hitchin Foal Show Society, and the schedule of prizes, rules and regulations, etc., have just been issued. There are classes for shire-bred foals, hunters, hackneys, etc., but the majority of them are confined to residents in the district. The Shire Horse Society offer two silver medals, one for the best entire yearling shire colt or colt foal, and the other for the best yearling filly or filly foal. Entries close on August 28th; late entries at double fees on August 30th. Mr. C. Crouch, Redgmont, Aspley Guise, Beds., is the secretary.

Sir G. Macpherson Grant has favoured me with a copy of his latest private catalogue of his Balbudalloch herd of Aberdeen Angus cattle. On July 1st there were eighty-seven cows and heifers and five bulls.

Messrs. Hincks and Turner, of Sleaford and Leicester, have received instructions from Mr. F. Ward to sell by auction on Tuesday, September 4th, eighty Lincoln longwool shearling rams, from his well-known Quarrington flock. The sale will commence at 2.30, and will take place at Quarrington, which is a mile from Sleaford.

Mr. Walter White, of Applesham Farm, Shoreham, Sussex, is relinquishing farming, and on September 18th Mr. C. Stride will dispose of the whole of his well-known hill flock of Dorset Down sheep, consisting of about 1,500 ewes and lambs of all ages. On the same day will be sold forty-eight heavy milking dairy cows and heifers, all with calves at foot or due to calve. The remainder of the dairy stock with the horses and tackle will be offered on September 27th.

Messrs. Jackson and McCartney's twenty-sixth annual sale of sheep at Craven Arms, Shropshire, takes place next week. On Thursday they will offer upwards of 12,500 stock ewes, viz., about 5,500 Shropshire Down and 7,000 Clun Forest, Radnor Forest, Kerry Hill, Longwynd, and Cross-bred, from the leading flocks in the district, and on Friday the catalogue will consist of about 200 Shropshire Down, Oxford Down, Kerry Hill, Longwynd, and Cross-bred rams, and 1,000 wethers and lambs. The sale will commence on the first day at 10.30, and on the second at one o'clock.

CATTLE.

Foot-and-Mouth Disease.

An Outbreak in Wales.

By order of the Board of Agriculture, eight animals were on Thursday slaughtered at Trellewellyn Farm, in the parish of Rhuddlan, North Wales, in consequence of an outbreak of foot-and-mouth disease. The police are guarding the farm, and the preventive measures adopted are very rigid, and several officials of the Board of Agriculture are investigating the cause of the outbreak.

Everyone leaving the farm has to put his boots in carbolic acid, and on Friday, after eight Chester butchers had been for some hours engaged in slaughtering the whole of the live stock on the farm, twenty-five head of cattle, twelve pigs, and sixty sheep, all their clothing was burned, and they were supplied with fresh suits. The slaughtered stock was buried in a trench seven feet deep. The origin of the outbreak is unknown. Three cows constituted all the new stock. Two were bought three weeks ago and one three months ago at local fairs.

Order by the Board of Agriculture.

Tuesday's *London Gazette* contains an Order of the Board of Agriculture, dated the 14th inst., prohibiting the movement of cattle, sheep, goats, and pigs into or out of the district comprising the petty sessional divisions of Colwyn Bay (including the detached portion of the county of Carnarvon), Isdulas, and Isaled, and the municipal borough of Denbigh, in the administrative county of Denbigh; and also comprising the petty sessional divisions of Rhuddlan, Prestatyn, Holywell, and Caerwys, in the administrative county of Flint.

The Case at Hull.

On the 10th inst. the Town Clerk of Hull sent a telegram to the Board of Agriculture asking them to permit animals to be moved by licence from one part of a farm to another, and also to allow them to be brought into the city for slaughter. He has received the following reply from Mr. P. Craigie, Assistant Secretary:—"I am directed by the Board of Agriculture to advert to your telegram of to-day, and, in reply, I am to say that the Board greatly regret the inconvenience caused to butchers and others by the Order referred to, prohibiting movement of animals, and that the matter is receiving their earnest and anxious consideration; but in view of the grave responsibility imposed on them of protecting the flocks and herds of Great Britain from the scourge of an epidemic of foot-and-mouth disease, they were compelled to impose the Order. I am to add that your Council may rely on the Board modifying the restrictions so soon as that can with safety be done."

On Monday, however, a new Order from the Board of Agriculture was received in Hull, authorising the removal of animals into that town or Beverley by licence for immediate slaughter. Thankful for small mercies, the local butchers feel that this concession will not only save them needless expense on account of cattle having had under the first Order to be slaughtered on farms, but that it will be a considerable saving to consumers, who will have to pay less for their food in consequence. The price of American meat has been increased by the stringency of the Board's order at Hull. The following is the text of the Order:—An animal may be moved into the city of Kingston-upon-Hull, or the borough of Beverley, from any place outside the district defined by the said Order, provided that the animal is so moved without being untrucked within the said district, and an animal so moved into the city or borough may be moved from the railway premises by nearest available route to a slaughter-house within the city or borough, and shall there be detained and slaughtered within four days from the date of its arrival in the city or borough. An animal may also be moved by the nearest available route along or across a highway or thoroughfare in the district defined by the said Order from one part of a farm to another part of the same farm being in same occupation, provided that the animal to be moved is not affected with foot-and-mouth disease, and that animal is not in a foot-and-mouth disease infected place or area, and that the movement of such animal is not prohibited by notice of an inspector of a local authority or of the Board of Agriculture.

Holderness Farmers and the Amended Order.

A meeting of Holderness farmers was held at the Hull, on Tuesday, under the presidency of Mr. G. M. Cole, of Atwick, to consider the modified Order of the Board of Agriculture with respect to the movement of cattle. There was a large attendance.

Mr. Robinson, solicitor to the Holderness Farmers' Club, stated that he and Mr. Ringrose had had an interview with Captain Chamberlain, one of the inspectors of the Board of Agriculture. In that interview it was stated that the outbreak at Mayfleet was an important case. All cattle landed in Hull were North American, and no case of disease had been imported from that country. On the other hand, in Holland, there were seventy-two cases. He thought some representation should be made with a view of stopping the importation of sheep's heads from Holland, a practice that was highly dangerous. (Hear, hear.)

The Chairman, reading the new order, said that what the Board of Agriculture gave with one hand they took away with the other. (Applause.)

It was pointed out by some of the gentlemen present that farmers outside the infected area could send stock to be slaughtered in Hull, while those in the area defined in the order could not send their stock. It was felt that the position of these farmers was worse than before.

Mr. Leonard (Holderness) said he thought they would be well advised if they called the attention of the Board of Agriculture to what they considered was the source of the outbreak, viz., the importation of sheep's heads from Holland.

Mr. H. S. Cautley, barrister, agreed that the position was in some respects rendered worse by the new order.

Mr. Robinson stated that at the interview he had with Mr. Chamberlain, that gentleman stated that the Order would last for twenty-eight days, and if there was no further outbreak the area would be reduced until it affected only Marfleet.

The Chairman moved the following resolution: "That it be left in the hands of Mr. Cautley, Mr Ringrose, and Mr. Robinson to draw up a resolution asking the Board of Agriculture to make more searching investigation into the cause of the outbreak, and urging that the importation of dead meat into Hull should be under strict inspection; also that the importation of heads and feet of cattle from foreign ports be imperatively prohibited; also that farmers outside the infected area and within the infected area should be allowed to move cattle from one farm to another, so long as the farms are adjoining." This was carried.

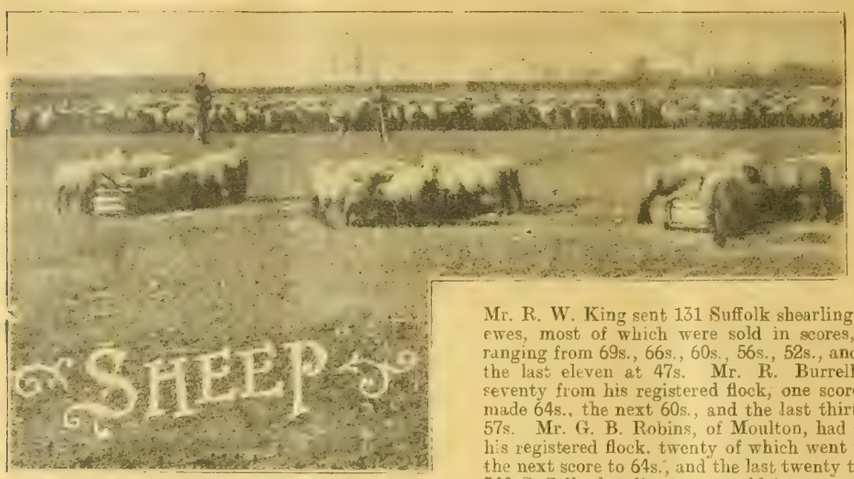
New Order by the Board of Agriculture.

Friday night's *London Gazette* contained an important new Order of the Board of Agriculture in connection with the outbreak of foot-and-mouth disease in the East Riding. The affected district comprises the petty sessional divisions of North Hunsley Beacon, South Hunsley Beacon, North Holderness, Middle Holderness, and South Holderness, and Hedon, Kingston-upon-Hull, and Beverley. The new Order directs that on and after the 20th inst., no cattle, sheep, goats, or swine shall be moved out of the scheduled district, and no animal of the kind named shall be moved into or within the district except as expressly authorised by the Order.

Outbreak of Anthrax in Worcestershire.

A short time ago an inquest was held upon a man named Thomas Tustin, who died under peculiar circumstances and in great agony at Cropthorne. From the evidence it appeared the deceased had partaken of a portion of the meat of a calf which had died on Mr. W. H. Cole's farm. In consequence of the revelations a portion of the carcase was sent to the county analyst, who has now certified that the calf was suffering badly from anthrax. Since then several other animals on Mr. Cole's farm have taken the disease and died. A cowman employed by Mr. Cole, named George Porter, was taken ill. It was believed he had become affected with anthrax, and he was at once sent to the Worcester Infirmary, where his condition was regarded as hopeless. The police, pending the orders of the Board of Agriculture, have taken all precautions, and the bodies of the animals have been buried in lime. The cause of the outbreak is not known, but it is stated that some years ago an outbreak occurred on the farm, and it is thought that some source of infection must have remained from that outbreak.

Newtownards Fair held on the 14th inst., was a very small one. Prices: Yearlings, best steers, £8 15s. to £9 2s. 6d.; second class, £5 10s. to £7 2s. 6d.; third class, £3 18s. 9d. to £4 5s. Two year-olds, first class, £11 5s. to £12 10s.; second class, £8 10s. to £9 10s.; third class, £6 17s. 6d. to £7 6s. 8d. Springers, first class, £17 15s.; second class, £12 2s. 6d. to £14. Young pigs, eight to ten weeks old, sold at from 18s. to 23s. each.



Earl of Bathurst's Southdowns.

The Earl of Bathurst's old-established flock of pure-bred Southdown sheep was disposed of by auction at Cirencester Park on Tuesday, the auctioneers being Messrs. John Thornton and Co. The flock, which has been in existence from the beginning of the present century, was founded by Henry, the third Earl, and has, therefore, been owned by five Lords Bathurst, and has been managed by three generations of agents (Mr. Robt. Anderson and his father and grandfather). A stud of Shire horses having been recently established, it was resolved to relinquish ram breeding and exhibiting, and to sell all the shearling and young ewes, rams, and most of the ram lambs on the home farm, the old ewes and ewe lambs being retained as a mutton flock. The sale comprised about 400 beautiful young ewes, and about 30 rams and ram lambs. They were remarkably even, very deep in carcase, on short legs, with close, thick fleeces, and good lean mutton, the rams being of great substance and masculine character. The dispersal naturally attracted a very large attendance, comprising most of the celebrated Southdown breeders in the kingdom. At the luncheon which preceded the sale, the health of the Earl and Countess Bathurst was heartily drunk, on the proposition of Mr. Garrett Taylor, and Mr. R. Anderson, in reply, expressed the hope that he should be able to send to his lordship at St. Helena, where he is serving with his regiment, a good report of the result of the sale. This hope was abundantly realised, for Mr. Thornton had the satisfaction of conducting one of the most successful sales of Southdowns that has fallen to his lot for some time. The ewes sold remarkably well, the whole of the 400 (old and young) making an average price of £4 0s. 6d. each, the principal purchasers being the Duke of Devonshire, Duchess of Newcastle, Earl of Ellesmere, Lord Manners, Lord Sherborne, Mr. J. Colman, Mr. J. Joicey, and Mr. Garrett Taylor. The highest price paid for the ewes was 200s. and 300s. each, by Mr. J. Colman, of Gatton Park, for pens of five yearling ewes. The rams also made good prices. Lord Sherborne gave 30gs. for a yearling ram, Mr. A. Vigers 28gs. for a five-year-old ram and 20gs. for a four-year-old. The rams made £15 10s. each, and the ram lambs £7 12s. each, the highest price for a lamb being 17gs., bought for the Duchess of Newcastle. The total amount realised was £2,001 14s. 6d.

Sale of Suffolks at Newmarket.

Mr. George Blencowe's twenty-fourth August sale of Suffolk sheep at Newmarket took place on the 10th inst. Notwithstanding the unfavourable weather during the morning, there was a large attendance of purchasers from all parts of the Eastern counties. The catalogue included about 5,000 head, chiefly from registered flocks, there being about 300 Suffolk rams, 3,200 Suffolk shearling ewes, 500 Suffolk flock ewes and crones, 50 first-cross two-shear ewes, and 1,000 Suffolk ewe and wether lambs and half-bred lambs. Luncheon was provided, but time did not permit of any speeches being made, and no toast was, therefore, introduced. Early in the afternoon the assembly adjourned to the Rutland Arms paddock, where there were two sale-rings, at one of which Mr. Ernest Prentice, secretary of the Suffolk Sheep Society, officiated as auctioneer in disposing of the Suffolk ram lambs.

The sale commenced during a downpour of rain, but later on fine weather favoured the auction. All the sheep, lambs, and rams were sold at per head. Amongst 100 Suffolk shearling registered ewes, sent by Mr. M. Slater, of Weston Colville, the first score made 72s., the next forty fetched 67s., another score realised 65s., and the last twenty sold at 60s. From the registered flock of Col. H. McCalmont, M.P., ninety-five shearling ewes had been consigned from his Cheveley farm. The first score made 70s., the next twenty fetched 68s., another score 66s., the next twenty realised 60s., and the last fifteen fetched 55s. Mr. R. W. King sent 131 Suffolk shearling registered ewes, most of which were sold in scores, at prices ranging from 69s., 66s., 60s., 56s., 52s., and 50s., and the last eleven at 47s. Mr. R. Burrell had sent seventy from his registered flock, one score of which made 64s., the next 60s., and the last thirty went at 57s. Mr. G. B. Robins, of Moulton, had sixty from his registered flock, twenty of which went up to 68s., the next score to 64s., and the last twenty to 60s. For 340 Suffolk shearling ewes, sold in scores, from Mr. S. Taylor's registered flock at Ashley, prices ranged at 57s., 55s., 56s., 55s., 53s., 52s., 50s., 49s., 46s., 47s., 45s., and 38s. There were other consignments of shearling ewes too numerous to mention here, but the figures given above are fairly representative of the general run of prices.

Amongst the Suffolk ewe and wether lambs, Mr. G. Robins's twenty Suffolk registered ewe lambs reached up to 53s. Mr. W. H. King (Denham) sent 100 Suffolk ewe lambs, thirty of which went at 31s. 6d., and others at 29s. 6d. to 26s. 6d. From the Great Thurlow farm of the Hon. W. F. D. Smith, M.P., fifty Suffolk ewe lambs from his registered flock sold at 32s 6d. to 28s.; thirty wether lambs at 26s. Mr. F. W. Cobb (Saxon Street) had consigned seventy lambs from his registered flock. His best twenty went up to 36s., and the others sold at 29s. to 24s. 6d. From Mr. C. Jillings's registered flock at Great Abington, forty-five ewe lambs sold at 33s. 6d. to 31s. 6d.; fifty wether lambs at from 35s. to 32s. Major Baird's twenty-three half-bred Suffolk and Southdown lambs made 30s.

Included in the ram lambs was a grand specimen, the property of Col. McCalmont, M.P., which made 20gs. Another, which had won first prize at Cambs and Ely, and third prize at Norfolk Show, made 24gs. Others belonging to Col. McCalmont included one which fetched 12gs., another 10½gs., and others from 10gs. downwards. Mr. Martin Slater's consignments included one which fetched 15gs., another at 14gs., three at 12½gs., one at 11gs., and others at 10gs. downwards. Mr. T. Goodchild (Great Yeldham) sent one which fetched 15½gs., two sold at 15gs. each, two others at 10½gs., and four others at 9½gs. each. Amongst the Marquis of Bristol's consignments was one which fetched 16gs., another 10½gs., others at from 8½gs. to 8gs. downwards. Major Baird's consignments included one which fetched 12gs., another 10½gs., three others 10gs. each, and the rest from 8½gs. downwards. There were many other consignors.

Sale of the Barton Flock.

On Wednesday, at Marlborough, one of the oldest-established flocks in this county, registered in Vol. I. of the Hampshire Down Flock Book, and known as the Barton Flock, came under the hammer for dispersal.

This well-known flock was the property of Mr. R. W. Lyne, who is relinquishing sheep breeding, and comprised a total of nearly 800 ewes and lambs made up of 180 two-teeths, 160 four-teeths, 160 six-teeths, thirty full mouthed, 200 ewe lambs, and seventy ram lambs.

A draft of ram lambs is being retained for sale at Marlborough Fair on the 22nd inst.

Mr. T. Lavington was the auctioneer, and the sale took place in his meadow, near the railway station at Marlborough. Before commencing business light refreshments were handed round to a not too numerous, but thoroughly representative company of flockmasters and agriculturists. A record of the prices and purchasers are given below. It will be noted the highest price for ewes was 90s., for ewe lambs 50s., and for ram lambs 8gs., and the averages are as follows:—Two-teeth ewes, 62s. 6d.; four-teeth ewes, 58s.; six-teeth ewes, 47s. 9d. Ewe lambs, 40s. 6d. Ram lambs (twenty-seven sold), £5, a result which was eminently satisfactory.

The following is a list of prices realised and purchasers:—Two-teeth ewes, Mr. J. Matthews, two pens, 68s. and 70s.; Mr. E. Lyne, two pens, 58s. and 80s.; Mr. A. C. Apperley (Stroud), four pens, 75s., 80s. (twice), and 90s.; Mr. Snow (for Mr. Tom Cannon, Stockbridge), three pens, 61s., 57s., and 56s.; Mr. H. Wilson, four pens, 54s. (thrice), and 50s. Four-teeth ewes, Mr. Matthews, two pens, 60s.; Mr. Tom Cannon, three pens, 60s. and 54s. Mr. Apperley, two pens, 80s. and 90s.; Mr. S. Crees, six pens, 53s., 54s., and 52s.; Mr. Carpenter (Wilton), one pen, 75s. Six-teeth ewes, Mr. Tom Cannon, two pens, 54s. and 53s.; Mr. H. Wilson, five pens, 50s., 49s., and 47s.; Sir Haro'd Wake (Northampton), one pen, 60s.; Mr. Apperley, three pens, 80s., 70s., and 65s. Full mouth ewes, Mr. H. Wilson, 44s. Chilver lambs, Mr. H. Wilson, five pens, 37s. to 34s.; Mr. E. Lyne, two pens, 46s. and 42s.; Mr. Apperley, two pens, 50s.; Mr. W. Rawlins, one pen, 45s. Ram lambs eight guineas to four guineas, amongst the buyers being Messrs. J. Roysson, H. Lyne, G. S. Arnold, F. J. Pickard, M. May, T. S. Lucas, E. Lyne, W. Whitfield, E. Coleman, J. Glass, H. Wilson, J. H Reynolds (exors. of) Sir Harold Wake and A. C. Apperley.

Mr. T. Lavington afterwards offered Mr. Wm. Chandler's 240 two-teeth and four-teeth ewes from his flock at Aldbourne, who is enclosing his land and giving up flock keeping. The average here was 43s. 6d., the ewes being in plain stock condition only, and the top price 46s.

Mr. C. Coxon's Shropshires.

The annual sale of Mr. Charles Coxon's Shropshire rams and ewes was conducted at Elford Park, near Tamworth, on Wednesday last, by Messrs. Lythall and Walters. The company was not quite so large as usual, owing to harvest operations, but a satisfactory sale resulted. The best prices for rams 35gs., given by Mr. W. F. Inge; 16gs., Mr. Griffiths; 16gs., Messrs. Morris and Shaw; 13gs., Mr. P. A. Muntz, M.P.; 12gs., Mr. Fielden; 12gs., Mr. Chichester; 11gs., General Dyott; 11gs., Mr. Lewis; 10½gs., Mr. R. G. Patterson; 10½gs., 10gs. and 10gs., Messrs. Averill Bros.; 10gs., Mr. F. Keeling; 10gs., Mr. M. Fardoe. The ewes were secured by Mr. W. F. Inge at 5gs. per head; Dr. Wall, 5gs and 65s.; Mr. G. Brown, 65s.; Messrs. Morris and Shaw, 65s., etc.

The Odstone Hall Shropshires.

Messrs. Winterton and Sons, of Lichfield, in conjunction with Messrs. German and German, of Ashby, conducted Mrs. Barr's annual sale of Shropshire sheep at Odstone Hall, near Atherstone, on Tuesday, when fifty-two shearling rams and eighty ewes were sold. The position held by this flock in the showyard attracted a large company of English, Scotch, and foreign buyers. Mr. A. Tanner gave 50gs. for a shearling by Ensdon four B's, Sir J. Pulley 26gs., 140gs. were paid on behalf of Sir G. Clifford (New Zealand) for a ram, second prize at the R.A.S.E., York; Lord Howe gave 30gs., Mr. R. P. Cooper 13gs., Messrs. Morris and Shaw 15gs., Mr. A. B. Foster 10gs. Other prices were from 8gs. to 12gs., the average being nearly £15 each. The eighty shearling ewes made up to 3gs. each, and averaged nearly £3 per head.

Mr. H. C. Stephens' Flock.

Messrs. Waters and Rawlence submitted to auction at their Market House Yard, Salisbury, on Tuesday, a second consignment of fifty ram lambs from the Cholderton flock of Mr. H. C. Stephens, M.P., which has been built up on some of the very best Hampshire Down blood procurable. The lambs showed plenty of good breeding and were well turned out of hand. Following so closely, however, on Britford Fair, sufficient buyers were not forthcoming to ensure an entire clearance. Two lambs were let to Mr. Judd at 20gs. and 9gs. respectively. The lambs sold made from 5gs. to 9½gs., the principal purchaser being Mr. Black (for the London and River Plate Bank, for exportation to Buenos Ayres), who secured a really good consignment at a moderate price considering the quality of the lambs—the average of those let and sold being £7 5s.

Britford Fair.

The annual sheep fair took place on Monday, when the supply was about the smallest on record, the result, no doubt, of the abundance of keep everywhere, and a brisk trade was experienced at decidedly better prices, ewes making 38s. to 46s. and lambs from 31s. to 39s.; wether lambs, 40s. to 37s. 6d.; mixed lambs, 29s. to 24s. 6d.; chilver lambs, 39s. to 35s. This showed a rise on ewes of 3s., and from 3s. to 4s. on lambs. The competition classes resulted as follows: Hampshire Down ram lamb, £3 3s., Mr. J. Flower. Pen of ram lambs, £5 5s., Mr. J. Flower. 100 wether lambs, £5 5s., Mr. J. J. C. Waters; second, £2 2s., Mr. G. C. Waters. 100 ewes, Mr. J. Dibben. 100 two-tooth ewes, Mr. J. Rawlins.

Messrs. Waters and Rawlence held their accustomed great sale of store sheep, the entries comprising about 10,000 head, but on account of the recent plentiful rain and consequent growth of keep, several hundreds were withdrawn at the last moment, the actual number sold being 9,462. Trade, as was expected, showed a very substantial rise on all previous fairs, ewes being from 1s. to 2s., and lambs 4s. to 5s. higher than Salisbury. Regular draft ewes made from 40s. 6d. to 55s.; over-yeared ewes, 28s. 6d. to 38s.; two-teeth ewes, 39s. to 52s.; mixed ewes, 38s. to 45s. 6d.; best wether lambs, 34s. 6d. to 46s.; working ditto, 27s. 6d. to 33s.; ewe lambs, 28s. 6d. to 39s. 6d.; mixed ditto, 27s. 6d. to 37s. 6d.; altogether a capital and quick clearance being effected.

The Chilmark Flock.

As usual, the annual letting and sale of ram lambs and rams from Mr. J. Flower's Chilmark flock—to which were added this year the 100 old going full-mouth ewes—took place; 101 ram lambs and two shearlings were submitted, and the whole were eagerly sought after, the general opinion of buyers

being that they were the best lot Mr. Flower has ever brought out. We may mention that this opinion was shared by Mr. Flower himself, and also the auctioneer (Mr. Rawlence), who, before commencing the sale, remarked that he had marked the lambs on Thursday, and he could only say its the best 100 lambs he ever marked in his life. It is not to be wondered at, then, that they were all caught up quickly. The 103 head realised the fine average of £15 11s 6d., this figure being far in advance of the average of anyone else, taking the number into consideration. As an instance of how even the lambs sold it may be mentioned that eighty-two out of the 100 made double figures. Nine lambs were first let as follows: No. 1, 115gs., Mr. Hall (for Lord Carnarvon); No. 2, 60gs., Mr. Dibben; No. 8*, 84gs., Mr. Drake; No. 8, 22gs., Mr. Greenfield; No. 3, 20gs., Mr. Carlisle; others letting at 11gs. to 14gs. to Messrs. Canning, Young, Asprey (for the Dowager Countess of Portsmouth), and Hurford (for Mr. T. F. Buxton), the average being £41 6s. Of the ninety-two sale lambs, Lord Rothschild bought at 28gs. and 14gs.; Mr. Bugg, 20gs. and 19gs.; Mr. Green, 20gs. and 16gs.; Mr. Castleman, 18gs.; Mr. E. J. Ashford, 16gs. and 10gs.; Mr. Canning, 15gs., 12gs., 11gs., and 10gs.; Mr. Carlisle, 15gs.; Mr. Crees, 15gs. and 14gs.; Mr. East, 15gs., 14gs., 13gs., and 12gs.; Mr. H. Ford, 20gs.; Mr. Frearson, 10gs.; Mr. Greenfield, 15gs.; Mr. Gale, 11gs., 10gs., etc.; Mr. Goldsmith, 16gs.; Mr. Lambert, 19gs.; Mr. Macan, 15gs.; Mr. Lavington, 16gs., 15gs., and 14gs.; Mr. Lodder, 13gs. and 12gs.; Mr. King, 11gs. and 10gs.; Mr. Morant, 14gs.; Mr. Mackrell, 16gs., 14gs., and 13gs.; Mr. Moss, 12gs.; Mr. C. Notley, 15gs. and 14gs.; Mr. T. Palmer, 23gs.; Mr. Pinegar, 10gs.; Mr. C. C. Standford (for Sir E. H. Hulse), 18gs., 16gs. and 10gs.; Mr. Snow (for Mr. Tom Cannon), 16gs.; Mr. Shaw-Stewart, 10gs.; Mr. S. Tanner (for Sir C. Shelley), 15gs., 11gs., etc.; Mr. H. W. Targett, 11gs. and 10gs.; Mr. Treble (for Mr. H. Le Roy Lewis), 15gs. and 10gs.; Mrs. White, 19gs.; Mr. Vernon (for Mr. C. A. Scott-Murray), 19gs.; Mr. Warner, 10gs.; and Mr. H. P. Taunton, 10gs. The two shearlings made 13gs. and 8gs. respectively. The 100 grand full-mouthed ewes met an unprecedented sale, Mr. Tanner, of Leicester buying the 100 for £60—5or an average of £5 12s. per head—prices ranging from 145s. to 90s.

Mr. Geo. Roberts's Champion Oxford Down Ram.

Mr. R. Coles' Middleton Flock.

At Mr. R. Coles' annual letting and sale of ram lambs from the old-established Middleton flock, seven ram lambs for letting made 100gs., Mr. Newton (for Sir J. Blundell Maple); others realising from 9gs. to 13gs.; average £25. Seventy-six sale lambs made from 5gs. to 17gs., some of the lambs being unsold. from 5gs. to 17gs., some of the lambs being unsold. Mr. Terrill (for Lord Ashburton), 11gs., 10gs., and 9½gs.; Mr. Hurford, 10gs.; Mrs. Nicholson, 11gs.; Mr. Rigden, 10gs. and 19gs.; the average of those let and sold being £9 6s.

Professor Wrightson's Consignment.

The annual letting and sale of ram lambs from the College of Agriculture flock took place, as heretofore, when eighty nice-quality lambs were offered, the whole of which, however, did not find purchasers. Six lambs were let at from 10gs. to 62gs. Mr. Newton (for Sir J. Blundell-Maple) hiring at the latter price, average £19 12s. The selling lambs made from 25gs. to 4½gs., Messrs. Good buying at the higher figure, the average of those let and sold being £8 2s.

Mr. Drake's Dogdean Flock.

Mr. A. F. T. Drake had forward seventy nice animals, and the whole met a ready demand, and prices such as the general excellence of the lambs richly deserved. Four lambs were first let as follows: No. 1, Mr. Flower, 60gs.; No. 2, Mr. Terril, 18gs.; No. 3, Mr. Edwards, 22gs.; and No. 4, Mr. Dibben, 16gs.; average, £30 9s The sixty-six selling lambs made from 3½gs. to 20gs., Mr. Bugg buying at 20gs., Mr. Brown, 11gs. and 10gs.; Mr. Brooks, 11gs., etc. Mr. Cozens (for Mr. H. J. Dutton), at 14gs., 13gs., and 12gs.; Mr. F. M. E. Jervoise, 13gs. and 12gs.; Mr. Nicholson, 16gs., 14gs., 12gs., 11½gs., 10½gs., etc.; Mr. Rigden, 16½gs., 11½gs., 10½gs., etc., Mr. Rand (for Lord Montagu), 10gs., etc.; Mr. Terrill (for Lord Ashburton), at 18gs., 17gs., and 11gs.; Mr. Tanner, 10gs.; Mr. Trowbridge, 10½gs.; Mr. Widdowson (for Lord Howe), 15½gs., 12½gs., and 12gs.; Mr. Waters, 13gs. and 10½gs.; Mr. M. Wallis, 10gs.; the average of the seventy head being the excellent one of £11 17s.

Sir E. H. Hulse's Flock.

Thirty ram lambs from the Breamore House Flock were submitted, but scarcely received the attention and competition they deserved. The whole were, however, disposed of at from 4gs. to 9gs., or an average of £6.

Hailsham Fair.

Hailsham Sheep Fair was held on Monday, when there was a large attendance, and the trade, particularly at the start, was decidedly brisk. There was a good demand for the best lambs, the average price being 27s. or 28s. per head. Tegs also sold well, the top price being obtained by Mr. H. Redford (Hellingly), who disposed of a splendid pen of over a hundred at 49s. per head. Mr. Burtenshaw sold a hundred tegs at 46s. to Mr. R. H. Sutton (Horeham Road), and realised 31s. for some wether lambs 29s. for a number of ewes, and 42s. for some other tegs. Mr. T. Brown found a buyer for lambs at 30s.; and the Earl of Ashburnham secured 36s. for ewes; while Mr. H. Willett went 3s. better. Mr. S. Boniface (Pevensey) sold ewe tegs at 15s., fifty lambs at 27s., and forty at 23s., and sixty culls at 20s.; while Mr. W. Elphick (Langney) disposed of thirty lambs at 27s. 6d.; fifty at 24s. 6d.; 100 at 24s.; fifty at 20s.; while Mr. W. Elphick (Langney) disposed of another nineteen at 44s. Ready sales were effected at these prices.

Lockerbie Lamb Sales.

The lamb sales at Lockerbie were brought to a conclusion on Monday in the presence of a large gathering of buyers. Cheviot wedder lambs met an animated demand, and showed a rise of quite 4s. on the year. Cross lambs also moved off freely at an advance on the year of 3s. For the few lots of Black-faced lambs on offer prices showed a rise of 2s. 6d. Best Cheviot wedder lambs brought 16s. to 20s., smaller 12s. 6d. to 15s., best classes cross-breds 18s. 9d. to 28s., smaller 15s to 17s., and Black-faced wedders 9s. 9d. to 15s. 6d.

Owing to the restrictions being placed on agriculturists in South Lincolnshire by the railway companies, the farmers in the Spalding, Holbeach, and Moulton districts are taking action with a view to chartering a steamer to run from Fosdyke, on the River Welland, to London, Grimsby, and Hull, and other ports, with cargoes of feeding stuffs and agricultural produce.

HORSES.

Horse Sale at York.

Messrs. Wilber and Sons held an important sale of hunters, carriage and harness horses, at their repository, York, on Thursday, when they offered about 100 animals. There was a very large attendance, and trade was exceedingly sharp. The chief feature of the sale was the disposal of the "Venture" coach horses, the property of Messrs. Liddell and Priestman, which ran regularly between Scarborough and Harrogate up to August 11th. This stud numbered forty one horses, and every one was sold, after keen competition, at prices averaging over £57 each. The highest price realised by the animals comprising this stud was 155gs., paid for Brighton, a five-year-old chestnut gelding, 16 h.h. Among the miscellaneous lots sold a pair of black cobs, about 14 h.h., the property of Mrs. Mordaunt Lawson, of Carlisle, realised 150gs. Other prices ranged from 60gs. downwards.

The Destructive Hailstorm in Bedfordshire. The Duke of Bedford, Lord Cowper, and other prominent landowners in South Bedfordshire, supported the Mayor of Luton at a meeting on Tuesday afternoon, for the purpose of raising a fund for the relief of the numerous sufferers from the terrible hailstorm which occurred on July 16th, when many thousands of pounds of damage was done to the corn crops in the various parts of the county. The subscription list already includes several handsome donations.

Cumberland farmer found Shot.— A farmer named John Dixon, aged thirty-five, of Netherend, near Whitehaven, was on Monday found shot dead in a lane near his house. It appears he went out soon after breakfast to shoot rabbits, and at ten o'clock he was seen enjoying the sport. About noon he was found dead, shot through the heart, with his gun lying beside him near a fence. He was in the habit of getting over the fence when returning home, and it is supposed that while he was getting over the fence on Monday the trigger of his gun was caught, and the weapon went off. At the inquest a verdict of "Accidental death" was returned.

There was a large supply of cattle at the fair at Balla, co. Mayo, on the 11th inst., but few buyers. Choice lots of cattle in forward condition sold well, but a large number of others remained unsold. The small supply of sheep met a good demand. Prices:—Calves, second class, £3 to £4; third class, £1 10s. to £2 10s. Yearlings, second class, £6 to £7; third class, £3 to £4 10s. Two-year-olds, second class, £8 5s. to £10; third class, £5 10s. to £7. Three-year-olds, first class, £14 to £15 15s.; second class, £11 10s. to £12 10s.; third class, £8 5s. to £9. Springers, second class, £13 10s. to £15; third class, £9 to £10 5s. Lambs, second class, £1 2s. to £1 3s.; third class, 16s. to £1. Two-year-olds and over, second class, £2 2s. to £2 8s.

Contagious Diseases of Animals.

Summary of Returns issued by the Board of Agriculture for the week ending August 11th, 1900:—

NOTE.—The figures for the current year are approximate only.

SHOWS.

Badminton Farmers' Club.

The Badminton Farmers' Club were a little more fortunate in regard to the weather than many other societies last week, for on the 9th inst. it was comparatively fine, though the wind was somewhat troublesome. As in former years, the show was held in that picturesque part of the park known as the Huntsman's Close, and by middle day there was the usual large assemblage at the ringside and in the grand stand. Last year, in consequence of the death of the late Duke of Beaufort, the show was not held, and its reappearance among the agricultural fixtures was very welcome. Mr. R. W. Lloyd, who for so many years discharged so satisfactorily the duties of secretary, has now resigned, and his successor, Mr. Ward Soames, and the committee of management have introduced a few alterations in the rules governing the exhibition.

Formerly, by a subscription to the club, a member might enter as many animals as he pleased, and sometimes they were not forthcoming at the last moment, and vacant stalls were rather too numerous. Now exhibitors are required to pay a small fee for every animal entered. The result was that on this, the first occasion the experiment has been made, the number of entries was somewhat less, but the quality was, on the whole, improved, and there were fewer vacant stalls. Swine fever restrictions kept pigs away.

For the first time in the history of the Society there were five open classes—for hunters, driving, and jumping—and the entries, on the whole, were very good, particularly so in regard to quality. The new departure has thus been justified, and probably as time goes on the entries in this department may become more numerous. There was an average number of cart horses, the entry including a sound, useful lot of animals. The class for cart mares or geldings over three and under seven was an exceedingly good one, and earned general commendation. A grand bay Shire gelding, Warrior, owned by Mr. Henry Mathews, Winterbourne, was first, and Mr. M. B. Stabbins, Coalpit Heath, was second with a chestnut Shire mare. In the hunters department the Hunters Improvement Society sent for the first time a silver medal for the best hunter filly not over three years old. The winner of this trophy was a promising three-year-old roan filly, Empress of India, the property of Mr. W. Francis, Corsham, which was also first in her class.

There was only a small entry in the restricted class for weight-carrying hunters, and the first prize was not awarded. Twelve-stone hunters made a better show, a free-going, well-made chestnut gelding, owned by Mr. L. H. Taylor, Chippenham, taking the first prize, and also winning the open 12-stone class. In the open weight-carrying class the first and second prizes were taken by his Grace the Duke of Beaufort with Hardy John and Feenagh. The open harness classes attracted a fair entry, but not a satisfactory one, remembering the value of the prizes offered. The class for mares or geldings not less than 15 hands was won by Mr. Godsell with Lord Bath, and the same exhibitor was second with Norbury Squire. The jumping classes were, as usual, an attractive feature.

The cattle as a whole were nicely brought out, and were generally characteristic of their particular breeds. They were uneven in regard to numbers, only a few entries being forthcoming in some classes, and in others they were numerous, and the family was rather mixed in respect to breed. The bulls over one and under two years showed a good deal of merit, and Priam, a roan Shorthorn, the property of Mr. George Haskins, Hanham Green, showed such quality as to win the champion reserve rosette. The champion prize went to Vain Lord, a grand-looking red Shorthorn, the property of Mr. J. Little, Trowbridge, which was, however, closely run by Mr. W. R. Peacey's Plaudit, a bull of very good quality. Mr. Peacey won the next class for bull calves easily with a nice roan. The steers over one year and under two were a weak lot numerically, the winner being a red and white Shorthorn owned by Mr. Little. A really excellent lot of dairy cows were stalled, and the class for cows over four years old gave the judges a lot of trouble to decide, and the quality throughout was so good that the judges recommended a third prize. The choice for chief honours ultimately fell upon a choice red Shorthorn, the property of Mr. Harry Butler, showing splendid dairy qualities. In the class for heifers of any breed a typical Shorthorn, owned by Mr. S. W. Brain, Sherston, was placed first. A black-polled pedigree Angus was a very close second, and the shape and quality displayed by both animals made it very difficult to select the winner. A special prize offered for the best animal in the yard was awarded to Mr. Butler's Badminton Daisy, the winner of the old cow class.

There is never a very large entry of sheep at this show, but as a whole the animals penned were good, the cross-bred ram lambs displaying excellent quality, and both prizes were awarded to Mr. Jeffery Mathews. The same exhibitor also took first prize in the next class for chilver wether lambs with a very nice lot. With the exception of the classes for Hampshire Down ram lambs and crossbred lambs, the entries were short. The chief prize winners, and, in fact, the only exhibitors, were Mr. Harry Butler, Mr. Jeffery Mathews, and Mr. Henry Bridgman.

The judges were:—Cart horses: Mr. Thomas Sisum, Marlborough. Hunters, hacks, harness horses, and jumping: Mr. W. Gordon, Canning; Captain D. L. Beatty, Rugby; and Mr. W. A. Harford, Oakham. Cattle: Mr. Arthur Hiscock, Shaftesbury. Sheep and pigs: Mr. W. R. Peacey, Malmesbury.

Harrogate Horse Show.

The Harrogate Horse and Horticultural Society had got together a capital number of entries for their show on Thursday, and it was most unfortunate that the weather should have been against the show, for it deserved a record attendance, and not the meagre number of visitors with which it was patronised. The Society expect to lose about £100 over the meeting, but, happily, they have a good fund at the bank. Of the sum of £250 given in prizes fully one-half was set apart for the winning horses. An entry of 107 in this department was very satisfactory. Moreover, the quality was excellent. Three or four of the dozen classes were of remarkably good character. The hunters, for instance, would have done credit to the Royal Show last June. Both judges and they were first-class experts—Mr. Henry Moore and Mr. T. Hutchinson—seemed well pleased. The prize of £10 given by the president (Mr. A. W. Fox) went to Messrs. F. J. and H. Grainger for their four-year-old bay gelding Nimrod, a fine galloping hunter, that also won in the any age class. Mr. W. Jordison's Mowbray Huntsman was the pick of the five-year-olds, and Mr. Wickham-Boynton's exhibit had second place in each of the last two mentioned classes. Prominent among the hacks was Mr. Eustace Smith's handsome mare Wild Lucy, a worthy daughter of Wildfire. She was invincible, both in saddle and harness. Mr. C. O. Bastow, too, was very successful with his pony Princess. In the driving class exceeding 14.2 hands Mr. J. Robinson's (Hull) Lord Lofty came to the front.

Waltham Cross Horse Show.

The Waltham Cross and Three Counties (Essex, Herts, and Middlesex) Horse and Foal Society's annual show was held on Thursday at Waltham Cross. The weather being all that could be desired, there was a large attendance of visitors. Close on £500 was offered in prizes, including the cups, but the number of entries was not quite so large as last year, but the quality was quite up to, if not above, the average. Shire horses and hunters were capital classes, but polo ponies were weakly represented. Considerable interest was taken in the appearance of the filly foals entered to compete for the Earl of Verulam's handsome challenge cup. There was a good turn out for the competition, but there was never any doubt as to the quality of Sir Walter Gilbey's unnamed bay foal by Blythwood Conqueror—Saxon Kitty. Although but ten weeks old, she is of considerable promise, possessing great substance, grand legs, and a short body. She scored a very popular victory from a well-turned filly by Bury Victor Chief, owned by Sir Blundell Maple. Lord Rothschild was also exceedingly well represented, Monitor, a two-year-old colt, and Hendre Sunlight, also from the Tring Park stud, winning the two silver medals offered by the Shire Horse Society, both being also in the money in their respective classes. Not many Shire colts were exhibited, but the best of them was Mr. Symondson's black foal, and in the corresponding open class Lord Rothschild was successful with a very fine roan, which afterwards won the special cup offered for the best Shire foal exhibited. Competition was very keen in the yearling classes, Sir James Blyth's Lockinge Favourite, a choice bay, being the best colt, whilst Sir Blundell Maple's Kathleen, one of Harold's stock, won corresponding honours in fillies, and also secured the sectional cup, Mr. E. J. Wythe's Copped Hall Devonia being reserve. The two-year-olds were quite as representative, Mr. F. Crisp's Girton Sunlight, a black filly of great substance, by Bury Victor, winning the cup offered for competition by Mr. E. J. Wythes. The Essex Hunt prizes were won by Mr. W. Bugg and Mr. John Holm; whilst the Middlesex Drag Hunt cup, for the best animal exhibited in the tenant farmers' classes, fell to Mr. E. Pigg's Chipping Princess, a three-year-old bay mare. The Hackney section was but of minor importance, although the entry was fairly numerous, Sir Walter Gilbey's Royal Duchess, shown with a charming foal at foot, winning the special cup.

The judges were as follows:—Shire bred and ordinary cart horses: Mr. Edward Green, Welshpool; Mr. Wm. Richardson, Doddington; Mr. F. W. Griffin, Peterborough; and Mr. W. Howkins, Woolscott, Rugby. Hunters and Hackneys (riding and driving), polo ponies, jumping, and trade turn-outs: Mr. A. Waterhouse, Edenbridge; Mr. Alfred Withers, Oxford Street; and Mr. J. W. Hickling, Adbolton, Nottingham.

Special Prizes.

Challenge cup, value 20 guineas, for Shire filly foal, eligible for entry in Shire Stud Book: Sir W. G. Pery.

Cup, value 5 guineas, for Shire foal: Lord Rothschild.

Cup, value 5 guineas, for Shire yearling: Sir J. B. Maple.

Cup, value 5 guineas, for Shire two-year-old: Mr. Fred. Crisp.

Middlesex Drag Hounds Hunt Club's cup, value 5 guineas, for best animal in tenant farmers' classes: Mr. E. Pigg.

Hackney Horse Society's medal for Hackney or pony mare, filly, or filly foal, registered in Hackney Stud Book, or entered for subsequent volume: Sir Walter Gilbey.

Silver cup, value 5 guineas, for Hackney mare: Sir Walter Gilbey.

Hunters' Improvement Society's silver medal, for Hunter of either sex and any age: W. J. Wright.

Class Prizes.

DRAUGHT HORSES.

Shire mare with foal at foot (tenant farmers): 1, J. Bell, Enfield; 2, G. Symondson, Waltham Abbey; 3, Ed. Pigg, Chipping.

Shire mares with foal at foot (open): 1, Sir J. B. Maple, Childwick; 2, Lord Rothschild, Tring Park; 3, Sir Walter Gilbey.

Shire colt foals, eligible for entry in the Shire Horse Stud Book (tenant farmers): 1, G. Symondson; 2, G. B. Medcalf.

Shire colt foals, eligible for entry in Shire Horse Stud Book (open): 1, Lord Rothschild; 2, A. P. McMullen; 3, G. Symondson.

Shire filly foals, eligible for Stud Book (tenant farmers): 1, John Bell; 2, E. Pigg; 3, A. Amey.

Shire filly foals, eligible for Stud Book (open): 1, Sir Walter Gilbey; 2, Sir J. B. Maple; 3, T. F. V. Buxton.

Cart colt or filly foals, eligible or ineligible for Stud Book, property of a tenant farmer in Epping Division: 1, J. Dewey; 2, A. Amey.

Cart mares, with foal at foot: 1, Alfred Amey; 2, A. Roddick.

Cart mares with foal at foot, not eligible for Shire Horse Stud Book, judged jointly (tenant farmers): 1, J. Holm; 2, and 3, J. Dewey.

Best colt or filly foal, sired by Mr. Geo. Symondson's horses: 1, Silver cup, Geo. Symondson; 2, John Dewey; 3, G. B. Medcalf; 4, J. H. Fielding.

Shire yearling colts, eligible for entry in Shire Horse Stud Book: 1, Sir J. Blyth; 2, E. J. Wythes; 3, Sir J. Blyth.

Shire yearling fillies, eligible for Shire Horse Stud Book (tenant farmers): 1, J. Holm; 2, J. H. Fielding; 3, G. B. Medcalf.

Shire yearling fillies, eligible for Shire Horse Stud Book: 1, Sir J. B. Maple; 2, E. J. Wythes; 3, F. Crisp.

Shire two-year-old colts, eligible for Shire Horse Stud Book: 1, Lord Rothschild.

Shire two-year-old fillies, eligible for Shire Horse Stud Book (tenant farmers): 1, E. Pigg; 2, J. Holm; 3, W. Graham.

Shire two-year-old fillies, eligible for Shire Horse Stud Book: 1, F. Crisp; 2, Sir Walter Gilbey; 3, Lord Rothschild.

Cart yearling fillies and yearling geldings, not eligible for Shire Horse Stud Book (tenant farmers): 1, A. Amey; 2, J. Wilson Dent; 3, J. Dewey.

Best pair of cart horses (tenant farmers): 1, E. Pigg; 2, D. Christy; 3, J. Holm.

Best cart mare or gelding, two years old and upwards (tenant farmers): 1, W. Bugg; 2, J. Taylor.

Best cart mare or gelding (tenant farmers): 1, J. Holm; 2, J. Holm.

Best cart horse (gelding), three years and under five years old: 1, J. Holm.

Cart horse (gelding), five years and upwards: 1, D. Christy.

Enfield Chase Staghounds' prize, for cart horse (mare or gelding), three years and upwards, open to bona-fide tenant farmers in the counties of Herts and Middlesex, farming not less than fifty acres: 1, E. Pigg; 2, C. B. Medcalf; 3, J. Ball.

HACKNEYS.

Hackney mare with foal at foot, entered or eligible for Hackney Horse Stud Book (open): 1, Sir Walter Gilbey; 2, R. T. Thornton; 3, T. Rumbal.

Mare for breeding harness horses, 15 hands 2ins and over, with foal at foot (open): 1, A. Collen; 2, R. T. Thornton.

For foal in classes 25 and 26: 1, A. Collen; 2, Sir Walter Gilbey; 3, R. T. Thornton.

Hackney colt or filly, one year old, by a registered Hackney sire: 1, A. Collen; 2, Wm. Galpin.

Hackney colt or filly, two years old, by registered Hackney sire: 1, Sir Walter Gilbey; 2, R. T. Thornton; 3, A. Collier.

HUNTERS.

Hunter mare with foal at foot, foal by thoroughbred sire: 1, W. J. Wright; 2, Sir Walter Gilbey; 3, Lieut.-Col. Colvin.

Best foal in Class 30: 1, Lieut.-Col. Colvin; 2, W. J. Wright.

Yearling colt or filly: 1, C. A. Longhurst.

Two-year-old colt or filly: 1, C. Kelway Bamber; 2, E. Ashby Haws.

Lightweight, to carry over 12st., not exceeding 14st.: 1, J. Hills, Hartridge, M.S.H.; 2, E. and A. Baxter; 3, A. Hardie Jackson.

Heavy weight, to carry over 14st.: 1 and 2, J. Hills Hartridge, M.S.H.; 3, A. Hardie Jackson.

RIDING AND DRIVING.

For Hack to carry a lady: 1, E. Martindale; 2, Mrs. Bennett; 3, T. Christy.

Hackney mare or gelding, over 15 hands, shown in saddle: 1, R. T. Thornton; 2, E. and A. Baxter; 3, T. Welch.

Hackney mare or gelding, not exceeding 15 hands high, shown in saddle: 1, E. and A. Baxter; 2, S. Brunton; 3, A. J. Hollington.

Hackney mare or gelding, over 15 hands, shown in harness: 1, E. and A. Baxter; 2, R. W. Jay; 3, Mrs. Hartley F. Batt.

Hackney mare or gelding, not exceeding 15 hands, shown in harness: 1, E. and A. Baxter; 2, S. Brunton; 3, R. T. Thornton.

Harness horse, mare or gelding, to be shown and driven in ring by ladies: 1, E. and A. Baxter; 2, Mrs. H. F. Batt; 3, R. T. Thornton.

Hackney mare or gelding, exceeding 13 hands, but not exceeding 14 hands 2in., shown in harness: 1, S. Brunton; 2, Mrs. O. Maund; 3, C. J. Young.

Pony, mare, or gelding, not exceeding 13 hands, shown in harness: 1, S. Brunton; 2, W. Legg; 3, C. A. Bass.

TRADESMEN'S "TURN-OUT."

One horse turn-out, not to exceed 14 hands, property of tradesmen, and used solely for trade: 1, C. J. Young; 2, T. Taylor; 3, J. Kirkby.

One horse turn-out, over 14 hands, property of a tradesman, and used solely for trade: 1, Fuller and Co.; 2 and 3, Chas. Clark.

Whitby Horse Show.

For a small show with a comparatively limited prize money, the Whitby Horse Show Society's Exhibition was a remarkably good one. The entries this year reached a record, and, favoured as the occasion was by perfect summer weather, there was a very large attendance, including, of course, a goodly sprinkling of those non-agricultural visitors who combine to make Whitby a very full holiday resort just at present. The classes were all small ones, and it is not necessary to enter into the individual merits of the prize winners. The entries of horses were slightly

below last year, being 218 against 245 in 1899. The total entries, however, including ferrets and so on, amounted to 280, against 269 last year, 252 in 1898, and 279 in 187. The quality represented was uniformly good, and especially in the Hackney and hunter sections was there an excellent show. The Hackney Society's silver medal went to the yearling filly class, the winner curiously enough being unplaced in her class. The hunters were an extremely good lot all round.

Prize L'st.

CLEVELAND BAYS.

Brood mare, not less than three years of age, with her foal or stinted: 1, J. Lett, York; 2, J. Hutton, Lythe; 3, G. Elders, jun., Whitby. Colt foal: 1, J. Robinson, Hull; 2, E. Grayston, Cloughton, R.S.O. Filly foal: 1, J. Lett, Guisborough; 2, C. Allison, Hawsker. Yearling colt, gelding or filly: 1, G. Allison; 2, A. G. Bulmer. Two-year-old filly: 1, W. Wood, Helmsley; 2, J. Welford, Loftus, R.S.O.

COACHING.

Brood mare: 1, J. White, Bolton Percy; 2, J. Thompson, Malton. Colt foal: 1, R. V. Robinson, Grosmont, R.S.O.; 2, G. Thompson. Filly foal: G. Elders. Yearling colt or gelding: 1, T. Knaggs, Marske; 2, J. McNeil, Grosmont. Yearling filly: 1, S. Bacon; 2, Capt. Dunnington-Jefferson, York. Two-year-old gelding or filly: 1, J. McNeil; 2, F. Wilson, Whitby. Three-year-old gelding or filly: 1, J. White; 2, J. Robinson.

AGRICULTURAL.

Brood mare, not less than three years of age, with her foal or stinted: 1, R. and J. Davison, Malton; 2, R. P. Petch, Skelton, R.S.O.; 3, A. Harrowing, Whitby. Colt foal: 1, R. P. Petch; 2, J. W. Newton, Whitby; 3, J. Kerr, Lythe. Filly foal: 1, J. Ingledew, Bedale; 2, Messrs. Franks, Whitby; 3, R. and J. Davison. Yearling colt, gelding or filly: 1, Capt. Dunnington-Jefferson; 2, B. King, York. Two-year-old gelding or filly: 1, C. Stubbs, Scarborough; 2, R. and J. Davison.

HUNTERS.

Brood mare, not less than three years of age, with her foal or stinted: 1, T. Swales, Yarm; 2, J. Ingledew. Colt foal: 1, R. W. Duell, Whitby; 2, J. Webster, Pickering. Filly foal: 1, T. Swales; 2, J. S. Darrell, York. Yearling colt or gelding: 1, J. S. Darrell; 2, J. McNeil. Yearling filly: 1, J. Pickard, York; 2, C. A. Harrison, Hull. Two-year-old gelding: 1, G. Mortimer, Grosmont; 2, W. Raw, Grosmont. Two-year-old filly: 1, T. Newton, Easington; 2, T. Creaser, Pickering. Three-year-old gelding: 1, J. S. Darrell; 2, E. Hoyle, Bacup. Three-year-old filly: 1, J. S. Darrell; 2, F. W. Horsfall, Northallerton.

HACKNEYS.

Hackney, or pony, mare, filly, or filly foal in Classes 27, 29, 31, and 32, registered in the Hackney Stud Book, or eligible for the subsequent volume.—Brood mare: 1, J. T. Ireland, Beverley; 2, J. F. Richardson, Malton; 3, E. Edwards, York. Colt foal: 1, J. H. and P. Webster, Brompton, R.S.O.; 2, Major Mitchelson, Pickering. Filly foal: 1, H. Creaser; 2, H. Brown. Yearling colt or gelding: 1, J. A. Shepherd, Pickering. Yearling filly: 1, H. Creaser; 2, B. Wilson, Whitby; Hackney Society's medal and special prize, J. H. and P. Webster. Two-year-old gelding or filly: 1, H. Creaser; 2, J. F. Richardson, Malton.

HUNTERS.

Hunting mare or gelding: 1, J. H. Stokes, Market Harborough; 2, T. and H. Ward, Great Ayton; 3, E. Hoyle. Mare or gelding, not less than four years of age: 1, D. Smallwood, Whitby; 2, Mrs. T. S. Petch, Northallerton; 3, W. Carr, Whitby.

LEAPING.

Horse or mare, of any breed, which leaps the artificial fences in the best hunting style: 1, T. E. Lavin, Ripon; 2 and 3, D. Smallwood. Horse or mare, of any breed, which leaps the artificial fences in the best hunting style, limited to animals that have up to the date of entry never won a leaping prize over £3 in value: 1, John McNeil, Robin Hood's Bay; 2, James McNeil.

HACKNEYS.

Gentleman's mare or gelding, over 14½ hands: 1, Mrs. F. Holmes, Shipley; 2, M. Pearson, Harogate. Lady's mare or gelding, over 14½ hands: 1, J. C. W. Dixon, Darlington; 2, Mrs. Smallwood, Whitby.

PONIES.

Mare or gelding, over 12½ hands, and not over 14½ hands: 1, Mrs F. Holmes; 2, T. T. Cannon, York. Mare or gelding, not to exceed 12½ hands: 1, M. Pearson; 2, J. Teasdale, Nawton, R.S.O.

HORSES IN HARNESS.

Horse or mare, over 14½ hands, to be shown and driven in harness: 1, Mrs. F. Holmes; 2, Sir George Elliot, Whitby; 3, J. W. Nicholson, Loftus. Horse or mare, not exceeding 14½ hands, to be shown and driven in harness: 1, Mrs F. Holmes; 2, W. Jordinson; 3, W. Lakin.

Blackpool.

Until this year the Blackpool Agricultural Society's operations were confined to the districts bounded by Garstang and Knott End railway on the north, by the Preston and Lancaster railway on the east, by the Ribble on the south, and by the sea on the west; but under a recently formulated scheme the Society's area has been made that of the Blackpool and Lancaster Parliamentary divisions. The radius, therefore, now includes the farms of numerous prominent North-country breeders, who were formerly debarred from competing. The exhibition on Tuesday was favoured with fine weather, and a very large crowd of spectators paid for admission. The show of live stock was one of the best ever held by the Society, one of the most gratifying features being the exhibition of young animals, the foals and yearlings especially providing an impressive sign that the Fylde is more than maintaining its best traditions as a horse-breeding centre. The total number of entries was 697, as compared with 657 last year, and the prize money amounted to nearly £600. The premiums were so substantial as to attract some of the best stock of the country, many of the classes being equal in point of number and quality to those in similar competitions at the Royal Lancashire Show at Rochdale. The Shires were after the old-fashioned Fylde stamp, standing on the best of legs and feet, with depth and character, and with the size necessary to meet industrial requirements. In the pairs, the executors of J. Mercer, Alston, won with the well-known bays by Scytax and Northern King, whose nearest competitors were Mr. T. Hull's pair by Mechanic and Morcar. The Scytax descendant won in the brood mares with Mr. Ed. Thompson's Gordon matron next, whilst in the smaller brood mares a bay by Cannock Hitchen won for Mr. T. M. Watson, Weeton, with Mr. Hull's Morcar mare next. Mr. J. Fox's Ellel headed the line in the four-year-olds with a powerful black daughter of Prince Harold, which, however, had not the quality of foundations possessed by Mr. Peter Blundell's bay by Royal William II., whilst in three-year-olds Mr. Watson won. A chestnut by Mahommed stood second for Messrs. Hull Bros., Preesall. One of the handsomest fillies on the ground was the two-year-old by Cograve Harold, from Alston Hall. Mr. Peter Blundell had no difficulty in winning with his yearling filly by Nailstone Royal Regent, which was placed in front of bays by Stroxton Tom and Thornton Tip-top, owned by Mr. T. Walsh. A strapping colt foal by Burgeon won for Mr. T. Hull, with a promising youngster second for Mr. Walsh, and in the filly foals Mr. Henry Lawson led with a youngster by the Duke of Worsley II.; whilst Mr. Edward Thompson followed with a pair of the Harold strain.

In the light horses section Mr. J. W. Liver was prominent among the exhibitors, his mare Mona, by Danegelt, coming in before Mr. Law Fish's Golden Girl and Mr. R. M. Birley's Lady Maud, whilst his four-year-old Lord Calder was in his best form, and romped round Mr. C. V. Haworth's chestnut by Danegelt and Mr. R. Hall's Lady Beatrice, by Garton Duke of Connaught. Mr. W. Lawson's handsome three-year-old Zaveda added another to the list of honours, beating a bay owned by Mr. R. Hothersall, Preston, and Mr. T. B. Sykes's Jessica, and in two-year-olds his Blackpool Countess supported the spectators by coming in at the top. Mr. Law Fish's [illegible] and Mr. T. B. Sykes's Fylde Ardenza were the other winners. In yearlings Mr. Birley headed the list with a chestnut by Sir Hugo III., which has usually had to be content with minor honours, but his sister Gentleman was second with a Royal Derby [illegible] which travelled freely. [illegible] made a fine [illegible] Mr. Law Fish won in the [illegible] Mr. Law's disciplined Garton Duke of Connaught [illegible] fully took a remarkable [illegible] youngsters by Dennis [illegible] owned by Mr. J. W. Liver, Calder Vale. Mr. Liver headed the list with a foal out of Mona, Mr. J. Hardman Singleton, and Mr. C. V. Haworth, Poulton, to [illegible] all being [illegible] Demas. Mr. W. Catterall, Poulton-le-Fylde, and Mr. R. Moore won Mr. Lawson's prizes, Mr. C. V. Haworth and Mr. W. Moore [illegible] carried off the premium offered by Mr. J. E. [illegible] There were only one [illegible] and Mr. J. J. L. Irving won with a well-known [illegible] numerous honours for Mr. Edward Hoyle, Bacup. Mr. S. Isherwood, Dunscar, near Bolton, was third. The saddle and harness [illegible] number of entries, and the exhibits [illegible] ment proved very interesting. Mr. Tom Mitchell's Sam Weller had to take second place to Mr. [illegible] ton Cannon, owned by Mr. J. Bee, [illegible] Hall, but beat Messrs. Baxter's well-known [illegible] Lady Nell; whilst in ponies Mr. G. E. Broughton's Bingo was in great form, and easily outdistanced Mr. H. T. Parke's Handy Jane, which [illegible] second. Sam Weller and Lady Nell [illegible] in the turnouts, Mr. Parker's Lord Lofty [illegible] his superior exhibition of [illegible] In pairs driven in harness Mr. Wm. [illegible] Equality and Favourites showed their mettle to [illegible] and beat Messrs. Baxter's Mark and Miss Howard, with Mr. Parke's Lady Love and Cassius bringing up the rear of the prize winners; but in the [illegible] were beaten by Heathfield Scythe and Norbury Squire, owned by Mr. E. S. Godsell, Stroud, although Norbury Squire's performance rather [illegible] the superb merit of his equine companion.

The cattle formed one of the most [illegible] collections of stock seen in the society's experience. In the older bulls, Mr. F. Miller, of Eccleston, won easily with his Rochdale winner, Cockle Wellington, which had much more [illegible] the young-ster exhibited by Mr. T. A. Crook, which turned the tables on his Lytham competitor, [illegible] Border Prince, owned by Mr. J. Lawson, Wesham. The yearling bulls were led by Mr. Miller's Shylock, which was first at Birmingham, and second at Rochdale, and which now [illegible] Colonel, the pure-bred sire, owned by Messrs. Harrison, Peel's Colonial, which suffered [illegible] the [illegible] was not so thickly fleshed nor so smoothly [illegible] but was deeper than the winner. Mr. Liver was third with Wesham Duke. In [illegible] Miss Margaret Blackburn, Out Rawcliffe, won with a roan by Donald, which beat Union Jack, owned by Mr. John Harrison, Much Hoole, there thus being a reversal of the Royal Lancashire decision. Mr. Peter Blundell was third. In the open class Carlisle Wellington again won, but had a [illegible] in Favourite of Sanquahar, owned by Mr. George Harrison, of Darlington, a bull which has won many important premiums. The dairy [illegible] a splendid collection, the winner, owned by Mr. R. Hall, Lancaster, being a particularly fine specimen of the pail-filler. Mr. Blundell was second in the dairy class, and in cows in calf or in milk. Mr. Hall's nearest competitor was Mr. J. Harrison. The judge quarrelled with the Rochdale decision in the yearling heifers, for he placed at the top the roan Sparklet, owned by Mr. T. R. Wilkins, Longton, whilst Mr. Wilkins' Belita III. had to be content with second place. In [illegible] Messrs. Harrison, Hoole, were to the front with a pretty modelled daughter of Bas Gem's, while in the champion class Mr. George Harrison, Darlington, won with the roan Waterloo, which [illegible] the highest honours at Rochdale.

The sheep [illegible] fairly good [illegible] the Westmorlandes being the choicest section. Messrs. Gibson and Sons, Netherhall Hall, [illegible] Kendal [illegible] cards in nearly all the long-woolled classes, and their classes' connections proved to be Mr. R. Sharp, Sowerby; Mr. W. Clegg, Goosnargh; and Mr. J. Wells, Eccleston; whilst [illegible] Mr. W. Bradshaw, Carleton; Mr. R. Winder, Pilling; and the Exors. of J. Banks, Cleveleys. Messrs. Gibson were also prominent in the [illegible] classes, in which the honours were [illegible] between Messrs. Buller Bros., Warbreck; D. Dewhurst, Poulton-le-Fylde; R. Baxter, Shard Bridge; R. Silcock and Sons, Poulton; T. Baxter, Plumpton; and W. Bradshaw, Carleton. Owing to swine fever restrictions [illegible]

MR. W. W. HUBBLE'S CHAMPION SUSSEX HEIFER, "PEONY."

Alford Horse and Foal Show

[illegible] The [illegible] annual exhibition of the Alford and District Horse and Foal Show Society took place on the Cottage Green, Alford, on Thursday last. The weather was far from favourable. A strong cold westerly wind was blowing across the ground, and beginning at 10 o'clock in the morning, there were [illegible] heavy showers of hail. [illegible] the heavy [illegible] the [illegible] were [illegible] [illegible] two-year-olds [illegible] [illegible] two-less than [illegible] [illegible] prizes [illegible] [illegible]

their catalogue, but this was the case at Alford on Thursday. The catalogue comprised twenty-two classes, and the prize money amounted to £144, in addition to which there were also offered for competition the Shire Horse Society's silver medal, the Hackney Horse Society's silver medal, and a twelve-guinea silver cup given by Mr. Walter Wingfield, of Driby, the chairman of the Society, for the best animal of the Hackney breed exhibited by owners residing or mainly farming in Lincs.

Judging commenced at nine o'clock, and in the first class for the best Shire or cart colt or filly foal (twelve miles radius) there were no fewer than fifteen entries, all of whom put in an appearance. Messrs. M. Wholey and Sons, of Gunby, were placed first with a useful bay colt by Buscot Bar None; and Mr. James Parrish, of Theddlethorpe, second with a brown filly by Bar Nought Tom; and a brown filly by Forest King, shown by Mr. G. Johnson, of Gunby, was third; and another of Bar Nought Tom's stock, a brown colt, belonging to Mr. E. Pridgeon, of Gayton-le-Marsh, was fourth. In the class for the best Shire or cart colt foal (eight miles radius) the entries numbered seventeen, and twelve were present. Mr. John Robinson, of Bilsby, was awarded first honours with a bay colt by Bar Nought Tom; Messrs. M. Wholey and Sons' winner in the first class was placed second; a bay colt by Burstone Pride, belonging to Messrs. A. E. and W. S. Freshney, of Grimoldby, was third; and Mr. Pridgeon's foal was again fourth. In the filly class there were thirteen entries, and all were present with one exception. Mr. S. Walker, of Theddlethorpe, was first with a useful-looking brown filly by Bar Nought Tom; Mr. Henry Daulton, of Bilsby, with a filly four and a-quarter months, by King of Trumps 2nd, was second; and Mr. James Parrish was third with the second prize winner in Class 1. Class 4, for the best Shire or cart colt foal, had an extended radius of fifteen miles, and attracted eleven good entries. A grand-looking foal by Waresley Albert out of Bonny Lass, belonging to E. H. Cartwright, of Keddington Grange, Louth, was an easy winner. He was first and champion at the show at Wainfleet last week, and won two firsts at the county show at Spalding, taking the lead in the county class, in which there were thirty-six entries, and beating all comers in the open class. Mr. John Robinson's bay by Bar Nought Tom, the winner in Class 2, was second; and a brown colt by Burstone Pride, belonging to Mr. T. H. Rainthorpe, of Legbourne, third. In the filly class Mr. S. Walker, of Theddlethorpe, carried off both first and second honours with two good foals by Bar Nought Tom and Golden King respectively. Mr. W. Ashton, of Tothill, was third with a black filly by Watnall Merry Lad; and Mr. H. Daulton's second prize winner in Class 3 was placed fourth. Class 6 was open to cart foals by either of Mr. W. H. Rawsley's horses, Golden King or Forest King, and of the eight exhibits seven were by the former. Mr. S. Walker's filly, second in the previous class, was the winner; Mr. G. Johnson's filly by Forest King, second; a black colt belonging to Mr. W. Rufus Mountain, of Bilsby Field, third; and a black colt shown by Mr. C. Brookes's executors, of Farlsthorpe, fourth.

The class for the best cart foal by Mr. A. Palethorpe's King of Trumps II. produced seven competitors, and the winners were Mr. H. Daulton, Mr. J. H. Smith (Firsby), Mr. H. Raithby (Mablethorpe), and Mr. E. Parsons (Beesby). In the open class, for the best cart foal in the show, Mr. E. H. Cartwright's winner in Class 4 was awarded the prize, Mr. S. Walker's winner in Class 5 being reserved.

In the class for the best hunter foal by a thoroughbred sire, Mr. Harold Martin, of Wainfleet, was first and second, with two foals by Upsilon. A bay colt, by Stonechack, shown by Mr. A. Short, of Aswardby, was third. There were ten Hackney foals by a registered Hackney sire. Of these eight were by Sir Augustus, and the excellence of the exhibits may be gauged by the fact that Norbury Motor, which was first at the county show, was reserved to the winners. A bay filly, belonging to Mr. G. J. Brown, of Tothby, was awarded first honours; Mr. Walter Wingfield, the popular chairman of the society, was placed second with his bay colt, Hero of Mafeking; and Mr. S. T. Bettinson, of Fleet, came third with a chestnut filly. All the prize-winners were by Sir Augustus. In the next class—for the best Hackney foal by Sir Augustus—there were thirteen entries, including seven shown in the previous class. Mr. S. B. Carnley, of the Norbury House Stud, Alford, showed his black colt Norbury Fashion, and it beat the winners in the previous class, Mr. Brown's bay filly being placed second, Mr. Wingfield's Hero of Mafeking third, and Mr. Bettinson's chestnut filly fourth. In the class for the best yearling Shire or cart filly (twelve miles radius), and Mr. Walter Townsend, of Louth, was placed first with his Society Belle, by Sherborne Harold, out of Brumby Fashion, which was highly commended at the county show. A bay filly by Albert Victor V., shown by Mr. B. G. Upton, of Raithby, was second, and a black filly by Auld Lang Syne, exhibited by Mr. G. W. Clarke, of Belchford, third. The best of the two year-old Shire fillies (eight miles radius) was Mr. W. Rutter's (Hogsthorpe), Hogsthorpe Violet, by East Anglian; Mr. J. W. Farrow's (Strubby) brown by Weighty Tom being second; and Mr. W. East's (Anderby) Anderby Bonny third. For the best Shire mare not under three years Mr. J. Mason, of Calceby, was first with Flower, by Golden King, aged four years, which was subsequently awarded the Shire Horse Society's medal. Mr. W. B. Eve, of Haugh, was second with a three-year-old bay mare by Shelford Beauty; and Mr. W. Rutter's Lincolnshire Lass, by Lincolnshire Boy (seven years), was third.

The Hackney mares for breeding purposes formed a good class, the entries numbering eleven. Mr. J. H. Dennis's Lady Cuteness, by Canny Man, was first, second going to Mr. T. Bettinson's Fleet Fireworks, by Bonfire, and third to Mr. G. W. Hoyles's Lady Westfield, by Norfolk Swell. The Hackney Horse Society's silver medal was awarded to Mr. S. B. Carnley's bay mare Vanity by Candidate, Mr. J. H. Dennis's Lady Cuteness being reserve. Vanity was first in the class for Hackney mares with foal at foot at the county show, and she won the championship of the London Hackney Society in 1892 and 1893. Mr. S. B. Carnley's bay colt, Norbury Lightning, by Polonius, was easily first in the class for the best yearling Hackney colt, gelding, or filly, open to the county. He won the first prize at the Royal Show for yearling Hackney stallions, and as a foal at the Lincolnshire Show at Louth last year he won first prize in the class open to England for the best Hackney foal. Mr. Carnley's chestnut filly, Norbury Pansy, by Clovelly, was second, and Mr. J. W. Farrow's (Strubby) chestnut gelding, by Lord Norbury, was third. In the class for the best Hackney gelding or mare shown in saddle, there were nine entries. Mr. J. Robinson's (Hull) Mornington Cannon, by Saxon, was first, Mr. Tom Mitchell's (Bradford) bay gelding, Sam Weller, by Ganymede, second; and Mr. W. Wharton's (Winterton) brown gelding Mystery, by Baccarat II., third. Mr. T. Bradley's (Uffington, Stamford) bay gelding Sequent, by Havoc, came out first in the county class for hunters tried over a single flight of hurdles; Mr. W. A. Ewbank (Marshchapel) came second with a bay gelding by Highflyer.

The open harness class was the best the Society has had during its nine years' existence, and included Mr. Tom Mitchell's celebrated Sam Weller, the winner at the Royal Show at York, and also a prize winner at the show at Maidstone. Mrs. Fred Holmes, of Staveley Grange, Yorks, had also entered her well-known bay mare Love Letter, by His Majesty, the winner of the second prize at the Royal Show, but she was not able to get through to Alford. The judges had no hesitation in placing Sam Weller first; Mr. C. Fowler's Lord Lincoln second, and Mr. J. H. Dennis's Lady Cuteness third. The president's cup was awarded to Mr. S. B. Carnley's Norbury Lightning, which beat Mr. Fowler's Lord Lincoln (reserved). The judges' decision was very popular, and was received with great applause. In the leaping classes the entries were disappointing, and only four horses turned out in one class and three in the other, Mr. H. Grantham's Lincolnshire Lad, Mr. F. Foster's Gipsy, and Mr. J. Todd's Hopover were the prize-winners in the first class; and Lincolnshire Lad, disqualified by his win, having dropped out, Hopover and Gipsy, with Mr. J. T. Marshall's Lincolnshire Lass, were the winners in the second.

Ayton.

The fear that the show of the Ayton Agricultural Society at Ayton, on the 1th inst., would suffer from bad weather was early dissolved, for the rain cleared and the sun shone out as soon as the judging began, and the event—the twenty-third of its kind—passed off in brilliant weather and with a most gratifying attendance. The display will bear comparison with those of previous years, and this is not surprising with a premium list amounting to over £300. The Hackney Society's medal was won by Mr. Nicholson's yearling filly, Watton Snowflake (sired by Watton Gentleman), which was first in a grand class, while Mr. Richardson's two-year-old mare, Marguerite Daisy, was selected as the reserve. The judges were: Hunters, Messrs. T. Wickham Boynton (Burton Agnes) and W. Scarth, jun. (Northallerton); Hackneys, Messrs. T. Black (Dumfries) and R. Whitworth (Halifax); coach and cart horses, Messrs. John Kirk (Knaresborough) and T. Petch (Skelton-in-Cleveland); cattle, sheep, and pigs, Messrs. S. Frank (Easingwold) and P. Dunn (Sigglesthorne).

The following were the principal awards:—

BROOD MARES AND FOALS

Hunting mare and foal: 1, J. Cooper, Killerby Hall; 2, J. S. Darrell, West Ayton. Roadster mare and foal: 1, R. Beswick, Langton; 2, H. Stephenson, Ebberston. Agricultural mare with foal at foot or stinted: 1, R and J. Davison, Welham; 2, C. Jackson, Cayton. Agricultural foal: 1, H. Wilson, Langton; 2, J. White, Thirlso, Hackness. Pony and foal, not exceeding 14½ hands: 1, T. Hall, Langton; 2, C. Jackson. Roadster foal: 1, J. M. Mitchelson, Pickering; 2, H Stephenson. Colt foal by any of Lord Middleton's Shire horses: H Wilson, Langton. Filly foal by any of Lord Middleton's Shire horses: C. Jackson.

HORSES

Agricultural yearling colt or filly: 1, J Cranswick, Hunmanby; 2, B. King, Bog Hall, Kirbymoorside. Two-year-old agricultural mare or gelding: 1, R. and J Davison, Welham; 2, A S. Benton, Cowlesge. Pair of agricultural horses, to be exhibited by tenant farmers only: 1, R and J Davison; 2, C Jackson. Horse or mare, for draw purposes: 1, C Jackson, Cayton; 2, R and J. Davison, Welham. Three-year old agricultural mare or gelding: 1, W Wardcock, Sawerby Cottage, Bridlington; 2, R and J Davison. Two or three-year-old coaching gelding or filly: 1 and 2, J. S. Darrell, West Ayton. Roadster yearling colt or filly: 1, D. Nicholson, Watton, Cranswick; 2, B Wilson, Kirby Misperton. Two-year-old roadster mare or gelding: 1, J F Richardson, Malton; 2, H Creasser, Pickering. Three-year-old roadster mare or gelding: 1, W Lakin, Pickering; 2, W P Kirby, Watton. Yearling hunting colt or filly: 1, J Cockerill, Burniston; 2, H. Hurd, Staintondale. Two-year-old hunting mare or gelding: 1, R Crosse, Reighton, Bempton; 2, O Vasey The Valley, Scarborough. Three-year-old hunting mare or gelding: 1, E. Hodgson, Bridlington; 2, J. S. Darrell, West Ayton. Hunting mare or gelding, five years old and upwards, open to all England: 1, T. and H. Ward, Pinchinthorpe; 2, W. B. Brown, Slingsby; 3, D. Smallwood, Whitby. Four-year-old hunting mare or gelding, to be ridden in the ring, open to all England: 1, F. J. and H. Grainger, Thornholme; 2, E Hodgson, Bridlington; 3, T. and H. Ward, Pinchinthorpe Hackney or roadster mare or gelding, not exceeding six years old, the property of a bona-fide tenant farmer: 1, E. Edwards, Ganton; 2, T. T. Campion, East Heslerton. Gentleman's hackney mare or gelding, any age, to be ridden in the ring: 1, J. Robinson, Hull; 2, R. Beswick, Langton. Ladies' hackney mare or gelding, any age, to be ridden in the ring: 1, F. J. and H. Grainger, Thornholme; 2, J. S. Darrell, West Ayton. Pony, mare or gelding, any age, to be ridden in the ring, not to exceed 14½ hands: 1, T. Hall, Langton; 2, J Holtby, Buck Hotel, Driffield. Pony, mare or gelding, not exceeding 13½ hands high, to be ridden in the ring: 1, H. M. Welburn, Muston; 2, F. Mainprize, Brompton. Mare or gelding, any age, not exceeding 14½ hands, to be driven in single harness: 1, R. Beswick, Langton; 2, W. Lakin, Pickering. Pony, any age, not exceeding 14½ hands, to be driven in single harness: 1, T. Hall, Langton; 2, L. Danby, Swan Hill. Pair of horses, to be driven tandem, open to all England: 1, W. Lakin; 2, O. Vasey, Scarborough.

CATTLE.

Shorthorn bull, exceeding two years: 1; I. Burdass, Lowthorpe, Driffield; , C. A. Hirst, Allerston Marishes, Pickering. Bull, under two years: 1, T. D. Robinson, Harpham, Lowthorpe Hall; 2, E. H. Hebden, Snainton. Bull or steer calf, under one year old: 1, E. H. Hebden; 2, T. D. Robinson, Harpham. Shorthorn cow: 1, C. A. Hirst; 2, J. A. Jackson, Low Deepdale. Cow for dairy purposes: 1, A Hirst, Killerby; 2, G. Jackson, Moor House. Cottagers' cow for dairy purposes, the cottager not to occupy more than seven acres of land, and not to keep more than two cows: 1, W. Hardy, East Ayton; 2, W. Newton, East Ayton; 3, F. Smith, Cayton. Heifer for breeding purposes, age to exceed two and not to exceed three years: 1, I. Burdass; 2, E. H. Hebden. Heifer for breeding purposes, age to exceed one and not to exceed two years: 1, T. D. Robinson, Harpham; 2, E. H. Hebden. Heifer, not to exceed one year: 1, E. H. Hebden; 2, T. D. Robinson, Harpham.

SHEEP.

Shearling ram, any breed: 1, T. A. Jackson, Bridlington; 2, J. J. Simpson, Hunmanby. Pen of five ewes, which have suckled their lambs up to the 13th July, 1900: 1, T. Nightingale, Bridlington; 2, T. A. Jackson, Bridlington. Pen of five shearling gimmers, bred by the exhibitor: J. J. Simpson, Hunmanby. Pen of five cross-bred lambs: 1, R. and J. Davison, Welham; 2, C. Jackson, Cayton. Pen of five gimmer lambs, bred by the exhibitor, any pure breed: 1, T. A. Jackson, The Grange, Bridlington; 2, T. Nightingale, Bridlington. Pen of five wether lambs, bred by the exhibitor: 1, W. Watson, Hutton Buscel; 2, T. Nightingale, Bridlington.

PIGS.

Boar, any breed: 1, E. H. Hebden, Snainton; 2, G. Jackson, Moor House. Litter of sucking pigs, to be shown with mother, not to exceed eight weeks old, bred by exhibitor: 1, R. Sheffield, Hutton Buscel; 2, G. Jackson, Moor House. Sow or gilt: 1, W. Wilkinson, East Ayton; 2, J. W. Kirby, Scamridge, Snainton. Cottager's pig, the cottager to reside within six miles of Ayton, and not to occupy more than seven acres of land: 1, W. Wilkinson, East Ayton; 2, W. Newton, East Ayton. General labourer's pig, the labourer to reside within a radius of six miles: 1, R. Sheffield; 2, W. Nellis, Hutton Buscel.

Oxted and Godstone.

The eleventh annual show of the Oxted and Godstone Agricultural Association was held on the Recreation Ground, Oxted, on the 6th inst. A capital list of entries, showing an increase of upwards of a hundred upon the number last year, was obtained, and the exhibition would undoubtedly have been a highly successful one in every respect but for the elements. Unfortunately these, in common with the weather experienced throughout the country generally, were all against outdoor events. The effect was, of course, to greatly diminish the attendance of the public at the show, and to shatter the hope entertained of realising a "three-figure gate." Notwithstanding the adverse conditions which prevailed, however, there was a much larger company present than could reasonably have been expected under the circumstances. Judging commenced at 10.30, and it was universally agreed that, as well as numerically, there was a marked improvement in the quality of the exhibits, especially in horses and horned stock. The silver medals of the Shire Horse Society, the Hunters' Improvement Society, and the Hackney Horse Society were won respectively by Mr. R. Barrow, Brockham, Betchworth; Mr. T. Church, Crawley Down; and Messrs. Boddy and Son, Edenbridge.

The judges were:—Shires and Agricultural Horses: Messrs. J. B. Stevens, The Manor, Ogbourne, Wilts, and Mr. W. Howkins, Manor Farm, Woolscott, Rugby. Hunters: Messrs. F. H. White, Forest Row, East Grinstead, and S. Young, Waterloo Street, Brighton. Hackneys, Hacks, and Harness: Messrs. E. Albury, Reading, and A. Wheatley, Reading. Jumping: Messrs. F. A. White, Forest Row, East Grinstead, and S. Young, Waterloo Street, Brighton. Jerseys and Guernseys: Messrs. F. A. Hordern, Buxted, and G. C. Knight, Rusper. Shorthorns: Messrs. C. Woolnough, Wakehurst, Ardingley, and T. Bannister, Haywards Heath. Sheep: Mr. J. Henton, White Hill Farm, Reigate.

Prize List.

SHIRE HORSES

Shire stallion, any age: 1, Mr. G. Osenton, Mariners, Westerham; 2, Mr. W. Greenwell, Marden Park, Woldingham; r, Mr. M. Michaelis, Tandridge Court, Tandridge. Shire foal: 1 and hc, Mr. G. Osenton; 2, Mr W. Greenwell; 3, Mr. M. Michaelis; r, Mr. H. F. Young, Perrysfield, Oxted. Shire mare with foal at foot, or that has produced a foal this season, or proved to be in foal at the present time: 1, Mr R Barrow, Elm Grove, Brockham; 2 and c, Mr. W Greenwell; r, Mr. Michaelis; hc, Mr T Jones, Quarry Farm, Godstone. Shire filly, foaled in 1899: 1 and 2, Mr. W. Greenwell; r, Mr. G. Osenton. Shire filly, foaled in 1898: 1, Mr M. Michaelis; 2, Mr G Osenton. The Shire Horse Society's silver medal for the best Shire mare, filly, or filly foal that is registered or eligible for registration in the Stud Book: Mr R Barrow. A silver cup, value five guineas (given by W Greenwell, Esq.), for the best Shire colt or filly foal by either of the Maiden horses: Mr Alex. Holm, Buckland, Betchworth; r, ditto.

AGRICULTURAL HORSES.

Brood cart mare, with foal at foot, or that has produced a foal this season, or proved to be in foal at the present time: 1, Mr. R. Barrow; 2, Mr. W. Greenwell; r, Mr. Alex. Holm. Cart mare or gelding, adapted to agricultural purposes: 1, Mr. R. Barrow; 2, Mr. Alex. Holm; r, Mr. G. Osenton; he, Mr. H. F. Young.

FOR TENANT FARMERS ONLY.

Brood cart mare that has produced a foal this season, or proved to be in foal at the present time: 1, Mr. T. Jones; 2, Mr. G. Osenton; 3, Mr. H. F. Young; r, Mr. Alex. Holm. Cart mare or gelding adapted for agricultural purposes: 1, Mr. Alex. Holm; 2 and r, Mr G. Osenton; he, Mr. H. F. Young. Cart filly or gelding, foaled in 1897, and bred by exhibitor: 1, Mr. H. F. Young; 2, Exors. of the late Edward Skinner, Godstone; r, Mr H. H. Young, Hall Farm, Oxted. Cart filly or gelding, foaled in 1898, and bred by exhibitor: 1, Mr G. Osenton; 2, Mr. Alex. Holm. Cart gelding or filly, foaled in 1899, and bred by exhibitor: 1 and 2, Mr. G. Osenton; r, Mr. H. F. Young; he, Mr. A. Holm. Cart foal bred by exhibitor: 1, Mr. G. Osenton; 2, Mr. H. F. Young; r, Mr. Alex. Holm.

HUNTERS.

Weight-carry hunter mare or gelding capable of carrying 14 stone and upwards: 1, Mr. T. Church, Haven Farm, Crawley Down; 2, Mr. T. Radmore, Cuddington Court, Cheam; r, Mr. P. W. Carr, Dennett Lodge, Crockham Hill. Light-weight carrying hunter mare or gelding, any age: 1 and 2, Mr. A. G. Ashby, The Manor House, Reigate; r, Mr. J. A. Tunmis, Stone Hall, Oxted. Mare or gelding foaled in 1897 or 1898: 1, Mr. C. Leveson Gower, Titsey Place, Limpsfield; 2, Mr. L. H. Burroughes, South Godstone. Brood mare suitable for breeding a hunter; the mare exhibited must have produced a foal this season, or proved to be in foal at the present time: 1, Mr. Wentworth Hope Johnstone, 36, Sloane Street, London; 2, Mr. T. E. Liddiard, Moorhouse, Westerham; r, Mr. G. Hamlin, Carswell Park, Lingfield. The Hunters' Improvement Society's silver medal for the best hunter of either sex and of any age: Mr. T. Church.

HACKNEYS.

Brood mare that has produced a foal this season, or proved to be in foal at the present time: 1, Mr. C. E. Brinckman, Fetcham Grove, Leatherhead; 2, Boddy and Son, Edenbridge; r, Mr. H. S. Smith, East Grinstead. Colt or filly foaled in 1900: 1, Mr. H. S. Martin; r, Mr. Gerald E. Hoare, Bletchingley. Filly foaled in 1899: 2, Mr. E. Alexander, Trevereux, Edenbridge. Filly foaled in 1898: 1, Mr. V. T. Taylor, Ashcroft, Dormans Land; r, Mr. E. Alexander. Filly foaled in 1897: 1 and r, Boddy and Son; 2, Mr. R. Skelton, Crockham Hill, Edenbridge. The Hackney Horse Society's silver medal for the best hackney or pony mare, filly or filly foal that is registered or eligible for registration in the Hackney Stud Book: Messrs. Boddy and Son. For the best mare or gelding, to be ridden: 1, Mr. A. N. Smith, Danehurst, Nutfield; 2, Mr. E. A. Goad, Mead House, Redhill.

HARNESS.

Mare or gelding, 15 hands and over: 1 and 2, Mr. V. Vervacke, 105, London Road, Croydon; 3, Mr. E. H. Goad, Mead House, Redhill; r, Mr. R. S. Lindley, Godstone Place. Mare or gelding, under 15 hands: 1, Mr. G. Hamlin; 2, Mr. W. S. Cunard, Bracknell, Berks; 3, Mr. E. H. Goad; r, Mr V. Vervacke. Pony, 14 hands and under: 1 and r, Mr. E. H. Goad; 2, Mr Huson Morris, The Nest, Hayes, Kent. Pony, not exceeding 12 hands 2ins: 1, The Ladies E. and D. Hope, Underriver, Sevenoaks; 2, Mr. Gerald E. Hoare; 3, Miss Boulter, Garstone Park, Godstone. For the best pair: 1, Mr. V. Vervacke; 2, Mr. E. H. Goad; 3, Mr. H. Barry, Home Place, Limpsfield. For the best tandem: 1, Mr. T. Hart, 12, Lexham Mews, South Kensington; 2, Mr G. Hamlin; 3 and r, Mr. E. H. Goad.

TRADESMEN'S TURN-OUTS.

For the best turn-out, used solely for trade purposes, and been in exhibitor's possession for at least two months previous to the date of show: 1, Mr. F. C. Watford, 4, High Street, East Grinstead; 2, Mr. W. F. Skilton, South House, Whyteleafe, and 91, George Street, Croydon; 3, Mr. B. Hall, Ivy Mill, Godstone; r, Messrs. W. and H. Snelling, Oxted.

JUMPING.

For the best jumper, mare or gelding, that had never won a prize over £5 3s., to have been regularly hunted with either the Old Surrey Burstow, Surrey Stag, or the West Kent Hunts: 1, Mr. A. N. Smith; 2, Mrs. Hope, Beckenham; 3, Mr. H. Springett, Sydenham; r, Mr. C. Young, Knightsbridge. Mare or gelding (open): 1, Mr. Philip W. Carr; 2, Mr. J. C. Buckland, Great Chart, Ashford; 3, Mr. C. Young. A prize of five guineas (by the members of the Old Surrey Foxhounds) for the best jumper, mare or gelding, the property of a member of this association, being a tenant farmer, and farming land over which the members of the Old Surrey hunt: 1, Mr. Gerald E. Hoare; r, Mr. J. G. Berry, Oxted Court.

CATTLE.

OPEN CLASSES.

Channel Island bull, any age, which shall stand for service within the radius (service not to exceed 10s.): 2, Mr. W. Wood, Moat Farm, Edenbridge. Bull, any other breed, that shall stand for service within the radius (service not to exceed 10s.): 1, Mr. W. Greenwell; 2, Mr. D. Young, Barrow Green, Oxted; r and he, Mr. A. S. Daniell, Fairchildes, Warlingham; he, Mr. Alex Holm. Jersey Cow, any age: 1, Mr. W. Heasman, Oxted; 2 and he, Mr. W. Wood; r, Mr. A. F. Charrington, East Hill, Oxted; c, Mr. E. B. Forbes, South Godstone. Jersey heifer, under two years: 1, the Ladies E. and D. Hope; 2, Mr. D. Marriott, Tenchleys, Limpsfield; r, Mr. W. Wood. Guernsey cow, any age: 2, Mr. J. D. Toogood Parsons, jun., Ashurst Place, Langton, Tunbridge Wells. Guernsey heifer, under two years: 1, Mr J. D. Toogood Parsons, jun. Shorthorn cow: 1, Mr. Alex. Holm; 2, Mr. R. Cromar, Horne Park, New Chapel; 3, Mr. W. Greenwell. Shorthorn heifer, under three years: 1, Mr. W. Greenwell; 2, Mr. H. Still, Addington, Croydon; r, Mr I. A. Tunmis. Cow, any other breed: 1, Mr. E. Alexander; 2, Mr. A. F. Charrington.

TENANT FARMERS' CLASSES.

Shorthorn bull, under two years six months: 1, Mr. Dan Young; 2, Mr. T. Jones; 3, Mr. H. Harker, Mercer's Farm, Nutfield; r and he, Alex Holm. Shorthorn bull, under one year six months: 1, Mr. Dan Young; 2, Mr. Alex. Holm; r, Mr. A. Young, Nags Hall, Godstone. Shorthorn cow, in calf or with calf at side: 1, Mr. Alex Holm; 2, D. and R. Young, Limpsfield; 3, Mr. T. Jones; r, Mr. R. Cromar. Shorthorn heifer, under three years, in calf or with calf at side: 1, Mr. G. Charlwood, Horne, Blindley Heath; 2, Mr. H. Still; r, Mr. Arthur Jupp, Blindley Heath. Pair Shorthorn heifers, under two years six months, suitable for breeding purposes: 1, Mr. H. Still; 2, Mr. T. Jones; r, Mr. H. H. Young. Pair Shorthorn heifers, under eighteen months: 1, Mr. H. Still. Yearling steer or heifer sired by Mr. E. Alexander's Aberdeen-Angus bull, Jingling Jew: 1 and 2, Messrs. D. and R. Young.

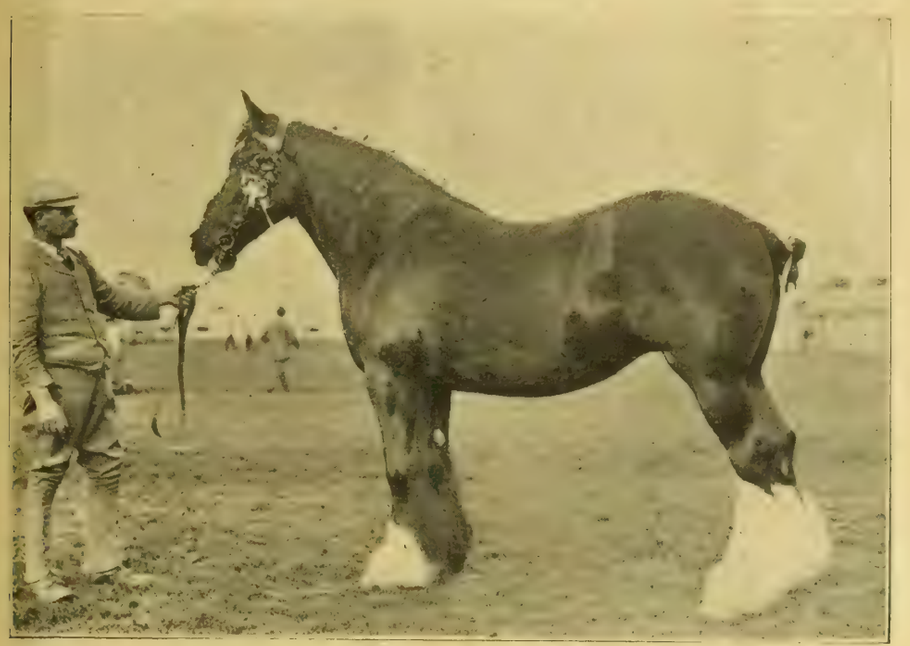
SHEEP.

OPEN CLASSES.

Pen of five ewes, any age or breed, to have each brought up a lamb this year: 1, Mr. J. G. Covell, Norwood Hill, Charlwood; 2, Mr. H. Still; he, Mr. G. Hamlin. Pen of five ewe lambs, any breed: 1, Mr. H. Still; 2, Mr. A. S. Daniell; he, Mr. J. G. Covell. Pen of five Southdown ewe tegs: 1, Mr. Arthur Young. Pen of five ewe tegs, except Southdowns: 1, Mr. H. Still. Best Westdown ram lamb: Mr. H. Still. Best Southdown ram lamb: Mr. W. Greenwell.

TENANT FARMERS' CLASSES.

Pen of five Hampshire or Westdown ewes, any age. Each to have brought up a lamb this year, and been in exhibitor's possession for at least six months: 1, Mr. H. Still; r, Mr. H. H. Young. Pen of five Hampshire or Westdown ewe lambs, bred by exhibitor: 1, Mr. H. Still. Pen of five Southdown ewes, any age. To have each brought up a lamb this year, and been in exhibitor's possession for at least six months: 1, Mr. J. G. Covell; 2, Mr. G. Hamlin. Pen of five Southdown ewe lambs, bred by exhibitor: 1, Mr. J. G. Covell; c, Mr. J. G. Berry. Pen of five ewe tegs, any breed: 1, Mr. H. Still; 2, Mr. A. Young. Pen of five Southdown ewe tegs: 1, Mr. A. Young. Best Westdown ram lamb: Mr. H. Still. Best Southdown ram lamb: Mr. J. G. Covell.



SIR J. B. MAPLE'S CHAMPION SHIRE FILLY, "VICTOR'S QUEEN."

Penistone.

The Penistone Agricultural Society's forty-second annual exhibition took place on Thursday, and was a very successful one from all points of view. The total entries, numbering 1,316, were an improvement on those of a year ago, and almost equal to the highest on record; the prize money was tempting enough to secure some fine exhibits, while the brightness of the day, with its big gate, gladdened the hearts of the promoters of the event. An exceptionally strong feature of the show was the poultry, and amongst the prize-winners in this section were the Prince and Princess of Wales. Below we give a list of the chief prize-winners in the horse, cattle, and sheep classes:—

HARNESS HORSES.

Roadster, gelding or mare, not 14 hands, to be driven in the ring: 1, G. Tyson, Mayfield, Halifax; 2, M. E. Shaw, Bradsley, Ashton-under-Lyne. Cob, gelding or mare, not exceeding 14 hands, driven in the ring: 1, M. E. Shaw; 2, G. Tyson.

HACKNEY OR ROADSTER.

Hackney or roadster, not 14 hands, to be ridden in the ring: 1, G. Tyson; 2, M. E. Shaw. Brood mare, with foal at foot or in field, with her own foal at foot: 1, D. Hopkinson's Exors., Westgate Hill, Bradford; 2, Cockayne Bros., Sheffield. Foal (colt or filly) in field (to Mr. Turner's Nutclough Stallion) this year, foaled in 1900: R. Batty, Holmfirth. Foal (colt or filly), foaled in 1900: 1, W. Crookes, Normandale, Wadsley; 2, Cockayne Bros.

AGRICULTURAL OR TEAM HORSES.

Draught stallion: 1 and 2, A. Lindley, Sandal. Best gelding or mare, with foal at foot, and two young geldings, exhibited to be inside within five miles of Penistone Church: 1 and special and 3, The Brassey Co-operative, 2, C. Cammell and Co., Ltd., Penistone. Gelding or mare for agricultural or team purposes, any age: 1, F. Gilbert, Micklecover, Derby; 2, W. Saul, Retford. Brood mare for agricultural or team purposes, with her own foal at foot, open to farmers residing within five miles of Penistone Church: 1, F. Denman, Denby Dale; 2, R. Gill, Meadhouse, Hepworth. Foal of 1899 for agricultural or team purposes, open to farmers residing within five miles of Penistone Church: 1, R. Gill; 2, J. Kaye. Foal bred in the year of 1900, for agricultural or team purposes, by any horse travelled by Mr. J. Turner, Hazlehead. 1, J. Kaye; 2, T. Mather. Thorough-bred Gelding or mare for agricultural or team purposes, foaled in 1899: 1, F. W. Green; 2, W. Saul. Gelding or filly, for team or agricultural purposes, foaled in 1899: 1, W. Saul; 2, A. Lindley, Sandal.

CATTLE.

Bull, over two years old: 1, A. Blackwell, Oughtibridge; 2, A. Booth, Hattersley, Gee Cross. He Bull under two years old: 1, T. Atkinson, Redvales Farm, Bury; 2, W. E. Inman, Ferny Bridge. Bull, any age, the property of a tenant farmer residing within five miles of Penistone Church: 1, G. Stones, New Chapel; 2, J. H. Ownsworth, Falthwaite, Penistone. Cow, in milk or calf: 1, Exors. of Wentworth Worthey Hall; 2, E. Nadin, 221, Gt. Ecc. Sheffield. Heifer in milk or calf, having not more than four broad teeth: 1, T. H. Bingley, Ellerslie Lodge, Hazlehead; 2, J. Roberts, Kirkburton. Heifer, in milk or calf, having not more than two broad teeth, exhibited to reside within five miles of Penistone Church: 1, T. H. Bingley; 2, J. T. Helliwell.

SHEEP.

Two-shear ram: 1, R. H. Eyre, Load Brook, Stannington; 2, J. Bradley, Old Crown. Shearling ram: 1, R. H. Eyre; 2, G. Stones, New Chapel. Pen of three Leicester or Lincoln ewes: 1, R. H. Eyre; 2, J. Brooke, Hartcliffe. Pen of three Leicester or Lincoln lambs: 1 and 2, R. H. Eyre. Pen of three ewes, any breed, the property of a farmer residing within five miles of Penistone Church: 1 and 2, J. Brooke. Pen of three gimmer lambs, any breed, the property of a farmer residing within five miles of Penistone Church: 1, I. and B. Charlesworth, Penistone; 2, W. Walker, Cranberry. Pen of three tup lambs, any breed (open to previous class): 1, W. Hobson, Sheephouse; 2, I. and B. Charlesworth.

MOORLAND SHEEP.

Pen of three ewes of the above breed: 1 and 2, J. Walker, Whitehouse, Cartworth.

Worthing Horse Show.

Given favourable weather, there are few events in West Sussex that attract a larger and more fashionable gathering than the Worthing Horse Show and jumping and driving competition, and the attendance at Beach House Park on Thursday was one of the largest on record. Judging commenced at eleven o'clock, and, with the exception of a short interval for luncheon, lasted up to six o'clock. The open jumping competition, which is usually regarded as the chief event of the day, had sixteen entrants, the majority of whom cleared the various obstacles in first-class style. Mr. J. C. Buckland's Wood Pigeon, Mr. P. Carr's Imp, Mr. F. W. Henderson's Monarch, and Messrs. Jerome's Comet were singled out for the second trial, and in the end Mr. Henderson's bay gelding, which was splendidly ridden by Miss Williams, was awarded the premier position, with Messrs. Jerome's animal second, and Mr. Buckland's Wood Pigeon third. The brown gelding Omega, belonging to Mrs. Blockley, of Madeley, Staffordshire, unfortunately arrived too late to take part in the competition. In the jumping competition for the United Hunts, Mr. Buckland's Wood Pigeon met with better success, being placed first, while Mr. A. N. Smith, of Danehurst, Nutfield, was a good second with a chestnut mare Little Lady. The tandem and driving classes were also particularly good, the pair of bay geldings, Brilliance and Searchlight, which Mr. Johnson, of Woodbridge, Suffolk, exhibited in the tandem class, being one of the best pairs seen in this part of the country. A silver medal offered by the Hackney Horse Society for the best Hackney or pony mare filly, or filly foal registered or eligible for registration in the Hackney Stud Book, was awarded to Mr. Walter Lloyd, of Heasleands, Haywards Heath, for his bay mare Cordelia. Mr. V. T. Taylor, of Dorman's Land, East Grinstead, being placed in reserve with his chestnut filly Vainglorious. The judging was satisfactorily carried out by Mr. A. W. Coomber, Mr. Louis Mievelle, and Mr. Walter Wayman for the Hackney and harness classes, and by Mr. William Keen and Mr. G. E. Maclean for the jumping classes.

Prize List.

Brood mare, with foal at foot, or with foal to be produced Hackney sire: 1, Mr. W. Lloyd, Heasleands, Haywards Heath (Cordelia); 2, Mr. H. S. Martin, High Street, East Grinstead (Lady Lindsay II); r, Mr. W. S. Simpson, Hoe-Lington House, Worthing.

Filly or gelding, foaled in 1898 or 1899, by a registered Hackney sire: 1, Mr. V. T. Taylor, Ashcroft, Dormans Land, East Grinstead (Vain Glorious); 2, Mr. W. S. Simpson.

Hackney foal, foaled in 1900: 1, Mr. W. Lloyd (Heath Harmony); 2, Mr. H. S. Martin; r, Mr. W. S. Simpson.

Hack, from 14 to 15.2 hands, to be ridden in the ring: 1, Mr. F. W. Henderson, Pavis Farm, Speldhurst, London (Herald); 2, Mrs. J. G. Talbot Hassell, 12, Brunswick Square, Hove (Rosie); r, Mrs. H. Young, Wickham Grange, Peacham (Stella).

SELLING CLASS.

For the above, in single harness, to harness and under saddle, not exceeding 15 hands: 1, Mrs. H. Young; 2, Miss Wright, Surrenden Park, Pluckley, Ashford, Kent (Jetty); 3, Mr. G. Hamlin, Carswell Park, Lingfield.

LADIES' CLASS.

Open to any class of horse: 1, Mr. F. W. Henderson, Wood Pigeon; 2, Miss Wright, Surrenden Park, Pluckley, Ashford, Kent; 3, Mrs. Hope, Beckenham.

Lead to the Hounds, 14 hands and under: 1, Mr. E. Hamlin, Wood Pigeon; 2, Mr. W. Lloyd, Heasleands, Haywards Heath (Cordelia); 3, Mr. H. S. Martin, High Street, East Grinstead (Lady Lindsay II); r, Mr. W. S. Simpson, Hoe-Lington House, Worthing.

liance and Searchlight); 2, Mr. S. Young, 2, Waterloo Street, Hove (Beamsaway and Beauclerk); 3, Mr. G. Hamlin; hc, Mr. H. Silva White, Withdean, Brighton (Roy and Lalla); and Mr. S. Young (Model and Dandy).

For the best horse, 15 hands or over, in single harness, to be driven in the ring: 1, Mr. T. Hart, Lexham Mews, South Kensington (Silver King); 2, Mr. S. Young (Beauclerk); r, Mr. Francis B. Blossett Maule, Danehurst, Hosdle, Lymington (Countess Confidence).

JUMPING.

Competition for the United Hunts, comprising the Old Surrey, the West Kent, the Eridge, the Surrey Union, the Burstow, the Chiddingfold, the Southdown, the East Sussex, the Eastbourne, the Crawley and Horsham Foxhounds, the Surrey, the Surrey Farmers the Warnham and Mid-Kent Staghounds, the Brookside, Brighton, Havant, and Edenbridge Harriers: 1, Mr. J. C. Buckland, Great Chart, Ashford, Kent (Wood Pigeon); 2, Mr. A. N. Smith, Danehurst, Nutfield (Little Lady); r, Captain Theo. V. S. Angier, Hill Crest, Dyke Road, Brighton (Bess).

For the best cob, from 13 to 15 hands, in single harness, to be driven in the ring: 1, Mr. G. J. Johnson (Searchlight); 2, Mrs. Edith Brandon, Northfields, Aldingbourne, Chichester (Maggie); r, Mr. F. B. B. Maule, Hosdle, Lymington (Concord); hc, Mr. S. Young (Carmen); Mr. H. S. Skelton, King's Gardens, Hove (Nani); Mr. W. G. Weager, Buckingham Place, Brighton (Norbarn Doctor); and Miss F. M. Philcox, Woking (Folly).

For the best horse or cob that has never won a first prize, bona-fide the property of residents within a radius of 20 miles of Worthing: 1, Mrs. E. Brandon (Maggie); 2, Mr. W. E. Weager, 47, Buckingham Place, Brighton (Sir Walter); r, Mr. H. Silva White (Roy); hc, Mr. S. Young (Model); and Mr. H. Silva White (Lalla).

Goole.

There was a record entry of nearly 4,000 exhibits at the Goole Agricultural Show, which was held on Thursday in very favourable weather. Close upon £400 was offered in prize money, and this was liberally allotted to the horse and cattle classes, and to the professional classes in the horticultural department, thereby attracting several notable exhibits. The horticultural department was a remarkable one, and the judges stated that they considered the show of fruits, flowers, and plants the best in the county, and far in advance of anything seen at Goole before, or at any of the shows in the district. The chief prize-winners in these sections were Lady Beaumont, Mr. R. Creyke, Mr. R. S. Scholfield, Sand Hall; Mr. G. H. Shaw, Howden; Mr. G. Remmer, Knedlington; Messrs. Simpson and Son, Selby, and others.

The chief awards in the horse, cattle, and pig sses were:—

HORSES AND FOALS.

Agricultural foal, colt or filly: 1, T. H. Sowden, Clifton, York; 2, G. H. Hudson, Hatfield. Agricultural two-year-old gelding or filly: W. Jackson, Knottingley. Agricultural three-year-old gelding or filly: 1, Messrs. Richardson and Pearce-Brown, Selby; 2, G. Sheriff, Airmyn. Agricultural gelding or mare: 1, W. Coulman, Goole; 2, W. Jackson. Roadster foal, colt: 1, A. H. Greatbach; 2, J. Shaw, Howden. Roadster yearling, gelding or filly: 1, A. H. Greatbach; 2, C. O. Bastow, Howden. Roadster two-year-old gelding or filly: 1, J. Wreghitt, Market Weighton; 2, A. H. Greatbach. Roadster three-year-old gelding or mare: 1, F. Pemberton, Knottingley; 2, A. H. Greatbach. Hackney, gelding or mare, to be ridden in the ring: 1, J. Robinson, Hull; 2, G. Tyson, Halifax; 3, Mrs. L. Murgatroyd, Howden. Harness horse or mare, to be driven in the ring: 1, T. Mitchell, Bradford; 2, G. Tyson; 3, Mrs. L. Murgatroyd. Harness horse or mare (open only within a radius of fifteen miles from Goole), to be driven in the ring: 1, Mrs. L. Murgatroyd; 2, J. Heppleston, Rawcliffe Bridge; 3, A. H. Greatbach. Leaper: 1, R. Tomlinson, Cliffe; 2, W. Holmes, Selby; 3, C. Tomlinson, Cliffe.

CATTLE

Milk cow: 1, W. Walsh, Ringley; 2, C. Sherwood, Goole. Cow in calf: 1, C. Yates, Goole; 2, J. Evans, Lincoln. Bullock or heifer, any age: 1 and 2, J. S. Johnson, Hook.

PIGS

Pig, over twelve stones (open): 1 and 2, J. S. Johnson, Hook. Pig, under twelve stones (open): 1 and 2, J. Waterland, Goole.

Border Union.

The Border Union Agricultural Society's annual exhibition was held in the Friar's Park in front of Floors Castle, Kelso, on the 6th inst., and its success was only marred by the unfavourable character of the weather. In the morning it was dull and unpromising, and a leaden sky threatened rain, which began to fall in the forenoon, but the day kept well up for a few hours. In the afternoon, however, there was a renewal of the rainfall, which continued till the close of the show, and during the progress of the popular events of horse-leaping and racing there were some drenching showers, which soon dispersed the crowd of onlookers, the final competitions being carried through amid much discomfort. This year the Society issued a prize schedule on the usual lines, and the full response was an entry of 661, the aggregates for 1899 and 1897 being 691 and 692 respectively. There are no statistics relating to 1898, because in that year the border burgh received a visit from the Highland Show and Agricultural Society. The purely agricultural exhibits did not suffer much by comparison with the entries of a year ago. Cattle showed an increase of 11, and sheep were 40 more, but horses were 24 less. As to the more popular departments, there was a decrease of 67 in dogs.

The outstanding feature of this show is always the sheep section, and this year's display was no exception. Border Leicesters were a strong lot, and competition in all the classes was keen. Mr. Thomas Clark carried off all the prizes for shearling rams with three typical specimens of the Oldhamstocks flock. In the old ram class Mr. M'Intosh, Balquharn, was first with the sheep which was second at Edinburgh and first at Stirling. He is of the same strain as the first prize shearling, both being descended from the famous tup, old Morris Dancer, and he was awarded the special prize as the best ram of the breed. The championship in this section was, however, secured by Messrs. Smith, Galalaw, with their second prize Stirling gimmer, which also won Mr. James Swan's special prize for the best female Leicester. The judging of the half-bred sheep came in for a good deal of criticism by onlookers, and the awards were not received with anything like general satisfaction. Some of the principal prize-takers at Stirling were left out in the cold, and in other cases the decisions of the Highland Society judges were rather rudely upset. Mr. Elliot, Newhall, was deservedly first in the shearling ram class with his Stirling winner, and Mr. Bertram, Addinston, was second and third with sheep which were first and third at Edinburgh, but their positions were otherwise reversed. Mr. Mein's second prize ram at Stirling was, however, entirely passed over. Again, in the aged class, Mr. William Elliot's champion ram at Stirling did not on Monday find a place in the prize list; while Mr. Morley Crossman's gimmer, which won the President's medal at Stirling as the best of the breed, in competition with the rams, was relegated to the second place in her class, Mr. Mein's second prize Stirling gimmer getting the first ticket. The pen of twenty half-bred gimmers from Torwoodlee, which won the special prize at Galashiels, were also unexpectedly put back a place. In four of the six Cheviot classes Mr. John Elliot led the way with a splendid representation of his Hindhope flock. In the aged ram class Messrs. Smith, Leaston, were first with Jamie Burns, the magnificent three-shear sheep of Hindhope breeding, which was bought at the Lothian ram sales two years ago for £23. Mr. Elliot was second with his Highland Society winner, John Clay, which was now beaten for the first time, but being a year younger than the first ram, he competed at a disadvantage. Mr. Elliot took both prizes for shearling rams with two of the best sheep of their age that have been seen out this season. Their positions at Stirling were reversed, but it was purely a matter of taste which should be preferred. The Hindhope flock also secured both the prizes for ewes, but again there was a reversal of the Stirling awards, although there was not much ground for cavilling at the judgment, the decision being quite popular with the spectators. In the gimmer class the Stirling awards were maintained, Mr. John Robson, Newton, being first and Mr. Elliot second. Mr. Elliot was first in the two lamb classes with nice pens direct from the hills and showing plenty of substance. Blackfaces are not much bred in the district, and only two sheep were shown in each of the three classes, the prizes being taken by Mr. Brydon, Burncastle, for rams, and by Mr. Bruce, Priesthaugh, for ewe and tup lambs.

Singularly, the cosmopolitan Shorthorn was the only pure cattle breed represented at the show. They were brought out in stronger numbers than usual, additional competition having arisen from the society which looks after the fortunes of the "red, white, and roan" giving special premiums, and their quality was good. Lord Polwarth, at Mr. Richard Booth's first draft sale during the holding of the Royal at York, purchased for 115gs. the two-year-old bull, Sir Algar Studley, and on the animal now making his début in the showyard he gained the most coveted rosette from Mr. William Bell's (Alnwick) nice entry, a son of Studley's Knight. The issue among the yearling males lay between Mr. Bell's Jockey and Mr. W. C. Hogg's (Kelso) Mountaineer, victory eventually being obtained by the former. The Northumberland bull had previously headed the list at Morpeth, and the Kelso representative had won a second prize at the Berwick Spring Sale. Lady Beatrice and Hawthorn were Lord Polwarth's representatives in a strong class of aged cows, and they beat everything shown against them. The daughter of Nonsuch occupied a lower position at the Royal and Highland the Berwick Spring Sale. Lady Beatrice and Hawthorn, this being her initial outing. She won the chief dairy prize offered by the Shorthorn Society, the second premium going to Mr. James Scott, of Kelso, for a home-bred cow. Mr. Bell's Lady Amy 4th, bred by the Earl of Powis, and purchased at the Birmingham spring sale, is rather small for her age, but a combination of good qualities forced her to the very front of the two-year-old heifers, her companion in honours being a Kelso animal belonging to Messrs. W. and T. Bain. Yearling heifers were very aristocratic, Mr. Bell and the Messrs. Bain sending forward the two best animals.

There was a fairly good show of draught horses, but the usual exhibits from the Seaham Harbour stud were missed. In the brood mare class, Lord Polwarth was first with the ten-year-old Duchess of Robgill, a typical Macgregor mare. Mr. Elliot, Raecleughhead, was second, and won Mr. John Clay's special prize for the best animal in the class belonging to a tenant farmer. Mr. Templeton, Sandyknowe, was awarded Mr. John Crawford's medal for the best foal by his horse Gallant Robert. For yearling fillies, Mr. Cabry, Shidlaw, was first with a promising daughter of Sir Thomas, bred in the west of Scotland; and in the two-year-old class Mr. Howie, Fenwick Steads, had a capital first in his Baron's Pride filly, which was similarly placed at the Northumberland Show. She was also awarded the special prize as the best two-year-old, beating the first prize gelding. Mr. Howie was again to the front in the three-year-old class with a filly by Alfred the Great, but in the competition with Mr. William Elliot's three-year-old gelding she failed to win the special prize. Mr. Daniel Kennedy was first for yeld mares with a good, upstanding mare by Royal Gartly, and she won the special prize given by the town of Kelso as against Mr. Cabry's aged gelding. The best of the geldings was Mr. Elliot's three-year-old, a very fine specimen of the breed, which was second at the Highland Society's Edinburgh Show when the property of Mr. William Clark, Netherlea. Mr. Forsyth's champion Clydesdale at Galashiels last month was on Monday defeated in his class by Mr. Cabry's aged gelding; and in the two-year-old class Mr. Elliot's first gelding at Stirling was placed behind a Montrave Sentinel horse belonging to Mr. Fleming, Roan. The entire colts were only a middling lot, Mr. Cabry being first in the yearling class with a son of Premier Prince; and Mr. Elliot showing the only two-year-old in a get of Royal Alexander.

Hackneys were numerically weak, and after the selection of the winners there was not much to admire. Lady Audley, now the property of Mr. W. P. Drysdale, of Mainshill, Haddington, led the aged mares and geldings into the ring, and it was soon apparent that that would be her place in the winning list. She was there followed by the almost equally noted Flora, the property of Mr. David Mitchell, of Polmont. The pair were again opponents in harness, but the result of the judging was the same as when they were under the saddle. Only a trio of three-year-olds faced the judges. These included Mr. Mitchell's filly Polonia, by Polonius, and Mr. Gilbert Davidson's (Hawick) brown Little Mary, and they were marked in the order named. Ponies filled three classes, and tradesmen had the opportunity of displaying their turnouts. The hunters made more than an average show. The brood mares were headed by the two entries of Mr. Robert Henderson, of East Gordon. One of them was also adorned with a special rosette. The four-year-olds were just a baker's dozen, the class being enriched by the presence therein of Mr. C. J. Cunningham's (Kelso) Jack, and Mr. G. Dove's (St. Boswells) chestnut gelding Inglis. Once more Kelso furnished an outstanding class and special winner in Major Oliver's Lucky Boy, a three-year-old gelding of great substance and power. The two-year-olds were a strong lot, alike in numbers and quality. Mr. T. Aird Smith, of Jedburgh, was first, and Mr. R. Ross, of Roxburgh, second. Mr. Aird Smith also met with the biggest success among the yearlings.

SOCIETIES.

The Royal.

The reports of the various standing committees were presented at the last meeting of the Council, and adopted as below:—

Finance.

Sir Nigel Kingscote (Chairman) reported that the accounts for the period ended June 30th, 1900, as certified by the Society's accountants, showed receipts amounting to £6,357 15s. 3d., and expenditure amounting to £9,133 2s. 11d. The accounts for the period ended July 28th, 1900, showed receipts amounting to £2,655 11s. 2d., and expenditure amounting to £1,433 3s. 1d. Accounts amounting to £11,405 15s. 5d., relating to the York meeting, and to £3,348 19s. 4d. arising out of the ordinary business of the Society, were presented and were recommended for payment. In order to meet the cheques that must be immediately issued, the committee recommended that such an amount as might from time to time prove necessary be borrowed from the Society's bankers on security of the Consols inscribed in the Society's name. The quarterly statement of subscriptions, arrears, and property, as at June 30th, 1900, had been laid upon the table and approved.

Journal.

Sir John Thorold (Chairman) reported that a letter had been received from Dr. Fream resigning the editorship of the Journal, and the Committee recommended that Dr. Fream's resignation be accepted with regret. They had arranged with Dr. Fream that he should continue to act as editor until the completion of the current volume, but that his responsibility for the Journal should cease at the conclusion of the present year. The consideration of the arrangements for the future conduct of the Journal had been postponed until after the recess. Part II. of the current volume (June, 1900) had been duly published and despatched to the members. Various accounts for printing and for literary contributions to the Journal had been passed and referred to the Finance Committee for payment. The arrangements for the forthcoming number had been considered and approved, and the committee recommended that articles on Welsh cattle and Welsh sheep should be prepared for inclusion in the Journal for 1901.

Chemical and Woburn.

Mr. Stanyforth (chairman) reported that the committee had made their annual visit of inspection to the Woburn Experimental Farm on July 11th last. They had decided that during the coming winter a trial should be made upon bullocks of the value of condiments as an addition to ordinary feeding materials, and that the sheep experiments for the winter should take the form of further testing the early use of mangolds and the use of gorse. The committee

had under their consideration proofs of the first detailed report prepared by Dr. Voelcker upon the experiments conducted at the Pot Culture Station since its establishment under the Hills' Bequest in 1897. The report was of somewhat unusual length, but the committee thought it extremely important that the results of the experiments to date should be published, and therefore decided to recommend that the report be published in full in the next number of the Journal. The committee recommended that Mr. John Howard Howard be added to the Chemical and Woburn Committee.

Botanical and Zoological.

Lord Moreton reported, on behalf of Mr. Wheeler, chairman of the committee, that various alterations had been made in the Form of Order for Seeds which had been prepared for issue. Dr. Voelcker had reported progress in the experiments for the extermination of weeds, a further report on which would be presented in due course.

The consulting botanist and the zoologist had presented the following reports:—

REPORT OF CONSULTING BOTANIST.

One hundred and forty-four inquiries have been dealt with since the last report in March. Of these ninety-two referred to seeds, and the remainder had to do with injuries to plants, and weeds in pastures.

A case of injury to barley was received from Cumberland, caused by Ustilago tecta, or covered smut, which was described and figured in the Journal for 1896. From Oxford came some sickly plants of barley attacked by straw blight, an injury figured and described in the Society's Journal in 1872, and about which little more is now known. The injured plants are still under observation, and there is good hope that the life-history of the fungus may be followed and its systematic position determined. Specimens of barley from Hertfordshire were found to be seriously injured by two parasitic fungi which were weakening the vigour of the plants. The one was Oidium monilioides, white mildew, the conidial state of Erysiphe graminis, and the other Helminthosporium gramineum, which formed long markings with a yellowish centre and dark brown margins. Specimens of soft brome grass from Nottinghamshire and Lanarkshire were received very badly attacked by smut, Ustilago bromivora. This grass is not eaten by stock, and if it were the smut would be harmless. Injuries to trees were caused by Peziza Willkommii in larch from Montgomery, on pear trees from Worcester and Hereford by Fusicladium pyrinum, a disease not hitherto noted in this country, and on the roots of beech trees from Norfolk by Agaricus melleus. Scolecotricum was found growing on the leaves of peaches, which had been attacked and seriously injured by an insect. A field of beans in Northampton was injured by an attack of Ascochyta pisi, a disease noted last year in Sussex. Gooseberry bushes suffered severely from an attack of Æcidium grossulariæ, a fungus whose puccinia form is believed to grow on sedges (Carex species). Violet leaves were sent from Worcestshire damaged by Ovularia lactea, and from the same county were received specimens of tulips destroyed by Botrytis parasitica. Information has been given in regard to the following plants, and their names determined:—Ranunculus ficaria, Cardamine hirsuta, Genista tinctoria, Trifolium procumbens, Chærophyllum sylvestre, Galium verum, Sherardia arvensis, Rhinanthus crista galli Prunella vulgaris, Plantago media, Euphorbia lathyrus, Colchicum autumnale, and Carex pendula.

(Signed) WILLIAM CARRUTHERS.

July 31st, 1900.

REPORT OF ZOOLOGIST.

Of the pests injurious to grass and corn crops the frit fly in oats has been the subject of several inquiries, while the wheat-bulb fly and the crane fly have also been complained of.

Cases of wireworm and surface caterpillars in root crops have been reported, but the most interesting case of a root crop pest has been a rather severe attack on turnips and rape by earwigs.

Though there was no inherent improbability in the fact of earwigs injuring turnips, the case was so unusual that the statement was received with some hesitation, and some other pest suspected, but the field was visited by a competent observer, and the insects seen at work.

Earwigs, though usually chiefly injurious in gardens, by devouring the petals of flowers, are very omnivorous, feeding not only on vegetables, but sometimes on aphis and thrips, and even on each other. Various measures were suggested for the mitigation of the pest in the present instance, but there is not the least likelihood of a speedy repetition of the plague.

Of the pests which attack farm stock and domestic animals, advice has been asked with regard to warble fly, sheep bot fly, and tapeworm.

The advisability of crossing Muscovy ducks with the English species was the subject of one inquiry. It appears to be established that the offspring of such a cross are true hybrids, and infertile. (Signed) C. WARBURTON.

July 31st, 1900.

Veterinary.

The Hon. Cecil T. Parker (chairman) reported that a letter had been received from the Royal Veterinary College stating that, as the result of the recent examination of candidates for the Society's silver and bronze medals in cattle pathology, Mr. Harry Thackeray, M.R.C.V.S. (care of Mr. Carless, V.S., Stafford) had obtained first place, and Mr. Reginald John Collings, M.R.C.V.S., of Holmcote, Heavitree Road, Exeter, the second place. The committee therefore recommended that the Society's silver medal be given to Mr. Thackeray, and the bronze medal to Mr. Collings. The committee also recommended that two classes be offered in connection with the horse-shoeing competition at the Cardiff Meeting for shoeing light and heavy horses respectively, the competition to be open, as before, to shoeing-smiths in the United Kingdom.

Stock Prizes.

Mr. Sanday (chairman) reported that various matters arising out of the York Meeting had been considered, and instructions given to the secretary thereon. The committee had considered the recommendations of the sub-committee which was appointed at the meeting of the Council on May 1st, to prepare a draft schedule of prizes to be offered in connection with the Cardiff Meeting of 1901, and would report further thereon. In accordance with the terms of the resolution passed at the meeting of the Council on February 7th, 1900, "That after the York Meeting the competition in the classes for females three years old and upwards shall be limited to cows in milk," the classes of cattle which were formerly open to cows or heifers in-milk or in-calf would now be limited to animals which were in-milk at the time of the Cardiff Show. The committee recommended that in future the Stock Prizes Committee be empowered to accept prizes from breed societies direct, in augmentation of those provided by the Society, instead of, as heretofore, receiving such prizes only through the Local Committee.

Implement.

Mr. Frankish (chairman) reported that the committee had considered and given instructions as to various questions which had arisen in connection with the Society's recent York Meeting. They had also considered the regulations for the trials of ice making plant at Cardiff, and they recommended that they should be amended to read as follows:—

CLASS III.—ICE-MAKING PLANT.

1. The trials of the machines entered in Class III. will be held in the Cardiff showyard during the week preceding the show. Due notice of the exact date of the trials will be given.

2. The Society will provide the usual shedding, 20 feet square for each exhibit, in which trials will take place, and in which the plant will remain during the show, when demonstration of working will be made at times to be regulated by the stewards.

3. Competitors must send a complete specification of their plant, with a general arrangement drawing showing the space occupied.

4. Competitors must provide their own insulated chamber with everything necessary for working the apparatus. The Society will lay on a supply of water for cooling purposes.

5. The power taken will be duly tested, and the efficiency of the machine will be measured by the "thermal units" expended in the cooling of water.

6. In each case the amount and temperature of the cooling water will be carefully measured.

7. The condition of the air as regards moisture in the insulated chamber will be duly noted.

8. The points to which the special attention of the judges and engineers will be directed are:—

(1) Price.
(2) Power taken compared with the output.
(3) Quantity of water used in condenser.
(4) Attendance.
(5) Nature of chemicals used, and cost of same.
(6) Condition of atmosphere in insulated chamber.
(7) In case of compressors, the capacity of the compressor with regard to the output.

The committee recommended that the name of Mr. John Howard Howard be added to the Implement Committee.

Prizes for Windmills.

Mr. Frankish added that the Implement Committee had decided at their last meeting, on May 29th (before the York Show), to recommend that trials of wind engines should be held next year in connection with the Meeting of 1901. At their meeting held on the previous day (July 31st) the committee had considered and amended some draft regulations for the trials of windmills, which had been prepared by the consulting engineer, but did not settle the amount of the prizes to be offered. Since then, it had been represented to him on the Finance Committee that, as the Society was already pledged to two expensive trials (of oil engines and ice-making plant) at Cardiff, it was undesirable in the present state of the Society's finances to add further to the cost of implement trials next year. Under these circumstances, he did not propose to press for the giving of prizes for windmills in 1901.

Mr. Ransome said that the question of abandoning the proposed trials of wind engines at Cardiff had not come before the Implement Committee. On the contrary, they had spent a good deal of time the day before in framing regulations for the conduct of the trials, and he did not think that they ought now to give them up.

Mr. Sanday said that the regulations for the trials of oil engines and ice-making plant had already been publicly issued. These trials would cost a great deal of money, and he thought they would be sufficient, and that the trials of windmills could wait.

Mr. Marshall supported the view of Mr. Frankish. The report of the Implement Committee was then adopted, with the exception of the approval of the draft regulations for the trials of windmills.

Selection.

Sir John Thorold (chairman) reported that the Secretary had presented a report as to his visit to Paris as the representative of the Society at the recent International Agricultural Congress; and the Committee recommended that letters of thanks be sent in the name of the Council to those who gave facilities to the Secretary during his visit. The Committee gave notice of their intention to move at the next meeting of the Council an alteration of the present Bye-law 8, so as to give power to the Council to elect honorary members up to a maximum of fifty, of whom not more than twenty-five should be British subjects.

Education.

Mr. Crutchley reported that the detailed arrangements for the examination for the National Diploma in Dairying were now complete. The Committee recommended that a meeting of the Joint Board be held in October, during the week of the Dairy Show, in order to settle the report on the English and Scottish examinations in dairying for 1900, and the details of both examinations for the year 1901. Mr. Martin Sutton had presented a report as to the International Congress on Agricultural Education held at Paris from June 14th to 16th last, and the Committee recommended that the paper presented by Mr. Sutton to the Congress be printed as a note in the September number of the *Journal*. The Committee further recommended that letters be written to Monsieur Casimir-Périer, the president, and to Monsieur de Lagorsse, the secretary of the Congress, expressing the Society's appreciation of the reception accorded to the Society's representative.

Miscellaneous.

The date of the December General Meeting of governors and members was fixed to be held at the Society's house at 13, Hanover Square, on Thursday, December 13th, 1900 (the Thursday of the Smithfield Show week), and the dates of the Council meetings in 1901 were also settled.

Other business having been transacted, the Council adjourned over the autumn recess until Wednesday, November 7th, 1900.

Suffolk Horse.

A meeting of the Breeding Scheme Committee of the Suffolk Horse Society was held at Ipswich on Tuesday, under the presidency of Mr. C. P. Ogilvie. A report was received from the Society's show, to the Society mares allotted last year to small tenant farmers, and it was decided to again offer three mares to farmers of not more than 200 acres, on the same conditions as obtained last year. With reference to the annual sale, the committee decided to recommend to the Council that it be held about August 1st in subsequent years. Mr. J. M. Long, of Chillesford, and Mr. J. J. Hornby, of Knowsley, were selected to act as judges of nomination foals at the sale to take place at Gippeswyk Park on Thursday, August 30th.

Metropolitan Dairymen's Benevolent Institution.

The monthly meeting of the Committee of Governors was held at 57, Chancery Lane, W.C., on August 9th, Mr. James Leggett in the chair. The Finance Committee submitted a statement showing that the available balance at bank on current account was £248 13s. 8d., and recommended payments to pensioners, etc., amounting to £67. The report was adopted. Applications for further temporary relief were made on behalf of Eliza Boakes and Fanny Burrows, and in each case a grant of £1 per month for ten months was allowed. A letter was read from Mr. E. G. Easton, L.C.C., accepting the invitation from the Committee to occupy the chair at the twenty-sixth anniversary dinner on Thursday, December 13th next; and on the motion of Mr. Leggett, seconded by Mr. Ramsay, he was unanimously elected. A vote of sympathy and condolence with the relatives of the late Mr. W. W. Higgins, sen., of Westbourne Park, was passed. The deceased gentleman was a very old subscriber and friend of the institution.

"Mark Lane Express" Diary.

August.

21. Barnsley Agricultural Society's Show, at Barnsley.
21. North Lonsdale Agricultural Society's Show, at Ulverston.
21. Sale of Shropshires, belonging to Mr. A. Tanner, at Shrawardine, Salop.
22. Belper Horse Show.
22. Lancaster Agricultural Society's Show.
22. Ipswich Sheep Fair.
22. Sale of Mr. W. O. Hammond's Southdown Sheep, at St Alban's Court, Wingham, Kent.
23. Penrith Agricultural Society's Show.
23. East Berks Horse Show, at Maidenhead.
23. Sale of the late Mr. W. T. Talbot Crosbie's herd of Shorthorns, at Audley Abbey, Audley, by [illegible].
23. Sale of Shropshire Sheep, the property of Mr. T. Fenn, Stanebrook House, Tadley.
23. Sale of pedigree Hackneys and Harness Horses, at York Repository.
23. Sale of Mr. Thomas Kirk's stud at Hedon, near Hull.
23 and 24. Royal Jersey Agricultural Society's Show, at St Helier's.
24. Sale of Shropshire Sheep, the property of Messrs. P. A. and G. T. Evans, at Sherlowe, Wellington, Salop.
25. Worksop Agricultural Society's Show.
25. Wem[illegible] Agricultural Society's Show, at St. John's, Chippenham.
25. Sale of Shropshire Sheep, at Somerton, Axminster.
27. Sale of Shropshire Sheep, the property of Mr. D. Buttar, at Corston, Coupar Angus, N.B.
28. Sale of Shropshire Sheep, belonging to Mr. W. Thomas, at the Beam House, Montford Bridge.
29. Sale of Mr. E. York's herd of Shorthorn Cattle, at Eastfield, Leominster.
28, 29, 30 and 31. Royal Dublin Society's Horse and Sheep Show.
29. Show of the Clarbeston and [illegible] Cooperative Society, at the Hundred of Roose, near Haverfordwest.
29. Aspatria Agricultural Society's Show, at Bengaro.
29. North-East Somerset Farmers' Club Show.
29. Cheshire Agricultural Society's Show, at Congleton.
29. Wayford Agricultural and Pony Society's Show, at Watton, Norfolk.
29. Sale of Lincoln Longwool Sheep, the property of Mr. R. Fisher, Lincoln.
29 and 30. Warwickshire Agricultural Society's Show, at Coventry.
29 and 30. Herefordshire Horse Show Society's Show, at Hereford.
30. East Somerset Agricultural Society's Show, at Castle Cary.
30. United Counties Agricultural Society's Show, at Cheltenham.
31. Sale of [illegible] Bull, at Wood Farm, Wood Walton, Peterborough.
31. Sale of Shropshire Sheep, the property of Mr. P. A. Meyer, M.P., [illegible].
31. Craven Agricultural Society's Show, at Skipton.

THE DAIRY.

The Dairy Show.

The British Dairy Farmers' Association last week issued its schedule of prizes for the twenty-fifth annual dairy show at the Royal Agricultural Hall, London, which takes place on Tuesday, October 9th, and three following days. I notice several alterations from last year's list, but they are not of very striking character. There are two alterations in the sections for cows, where the classes again include Shorthorns, Jerseys, Guernseys, Red Poll, Ayrshires, and Kerrys and Dexters, but the last mentioned are to have only two prizes in the milking trials instead of three. The first is £9 and the second £6, whereas last year the sums were: first £12, second £6, and third £4. However, in class 8, which is for cows not eligible to compete in the other classes, a third inspection prize of £2 has been added, and the first and second have been increased to £7 and £4 respectively, as against £5 and £3 last year.

The only change in the heifer section is that a third prize of £2 is added for Guernseys and Red Polls. A third prize is also given this year for Shorthorn and Jersey bulls, whilst in the class for bulls of any other pure breed, in addition to the usual silver medal, three guineas will be given to the best animal of each breed. A new feature is the class for a group of three females (cows or heifers) of the same breed in milk, eligible for the herd book of their respective breed, the property of and bred by the exhibitor. The first prize is £10, and the second £5.

Two alterations are also noticeable in the goat section. Last October the horned and hornless she-goats not eligible for the Toggenburg, and winners of three or more first prize classes, were entered in one class, but this year they are to be separated. The other change consists in the abolition of the class for male kids.

As regards the section for British cheese, a reduction in the value of the prizes has to be recorded, for in the Single Gloster, Leicester, Lancashire, Caerphilly, Wiltshire, and Wensleydale classes the prizes are only £3, £2, and £1, as compared with £5, £3, £2, in 1899. There will be no classes for cheeses of any foreign variety made in England, but instead, a silver medal is offered for the best six cheeses made from machine-skimmed milk. The awards in the Cheese Fair will be exactly the same, but there is only one class for collections of dairy produce. Last year only one entry was received in that for Colonial dairy produce, so that the Society have now made one class for British and Colonial produce, and instead of silver and bronze, offer gold and silver medals. In all other departments the classes and prizes are practically the same.

The various challenge cups are again offered for competition, and several champion cups are given by the Lord Mayor and Corporation of London, who this year include one for the best exhibit in the cheese fair, and another for the best ham. The entries close on Monday, September 10th, with the Secretary, Mr. W. C. Young, 12, Hanover Square, London, W.C.

Chester Cheese Fair.

Mr. Challinor reports upon the cheese fair held in the Market Hall, Chester, on Wednesday last as follows: The pitch was a small one, being much below the average of previous years, while the attendance of buyers was rather above the usual, many new faces being noticeable in the crowd. Prompt at the usual hour (9.30) business commenced, and went on steadily until the lots were cleared. For fine Cheshire there was a good demand, and it was easily disposed of at prices from 55s. to 60s., one or two small lots making a little more than the highest quotation. Medium sold readily at prices from 45s. to 54s. per cwt. The above prices show an improvement in prices made at the corresponding fair last year to the extent of 4s. or 5s. per cwt., and 3s. or 4s. better than the fair held a month back.

Siberian Butter for England.

In his report on the trade of Riga for 1899, Mr. Consul Woodhouse points out that the exportation of eggs from Riga is still steadily increasing, 32,476 tons being shipped in 1899, against 32,094 tons shipped in 1898. An attempt is being made to export butter from Riga, and Mr. Woodhouse understands that arrangements are in progress for quick transport from Western Siberia to meet the steamer service between Riga and London and Hull.

During a thunderstorm which broke over Hertfordshire the other day, the trunk of a tree at Grove Mill, near Hitchin, was struck and destroyed by lightning, which revealed the existence of a colony of bees. From the condition and quantity of comb and honey they had evidently been there some years. A bee-keeper was engaged to obtain the honey, a task which was carried out under great difficulties. The colony was a very strong one, for when a large quantity of honey was removed many thousands of bees could be seen at the base of the hollow.

LITERARY NOTICES.

Both those who have gardens and those who have not will find something to interest them in Sutton's Bulb Catalogue for 1900. This artistic annual offers the prospect of a long succession of beautiful flowers for the adornment of homes, beds, and borders during the short dull days of winter and the opening weeks of spring. But if a brilliant and attractive display is to be realised, preparations must be commenced in good time. This is the secret of success with all floral displays, large or small. The professional gardener is compelled to anticipate the seasons or lose his reputation. Amateurs too often neglect the necessary arrangements until it is too late to ensure the finest results. It is one of the special merits of bulbous flowers that, although they are worthy of conspicuous positions in conservatories, halls, and drawing-rooms, they are equally at home in small town gardens and on the lead flats of houses in populous centres. Even in the windows of cottages their beauty often challenges the attention of passengers in the streets. Messrs. Sutton's lists of these flowers have been compiled with the judgment that comes from long experience. The descriptions, though brief, are distinguished by unusual care and accuracy. Those who are not intimately acquainted with the named varieties, or who wish to incur a definite outlay, have the choice of collections of various sizes suitable for greenhouses, conservatories, homes, and gardens. The pages devoted to Messrs. Sutton's well-known strains of Begonia, Cyclamen, and Gloxinia will arrest the attention of all who possess facilities for the culture of these very handsome flowers. We observe that the gold medal of the Manchester Botanic Society has been awarded for their fine exhibit of Gloxinias. The information contained in this annual is indispensable to the expert horticulturist, and will prove interesting to every lover of flowers either in the country or the town.

"Health for Sheep" is the title of a booklet just published by Messrs. Stephen Pettifer and Sons, Malmesbury, Wilts, the manufacturers of the famous "Santovin," or Herbal Tonic, or Flockmaster's Friend. Naturally, the principal object of the work is to make even more widely known the undoubted merits of "Santovin"; but there is much in it that will prove of great service to flockmasters, and it is well worth considerate reading. It can be had free on application.

The Ashbourne Fair was held on Thursday, when the show of horned stock was an average one, and there was a good attendance. A good trade was done in all classes, recent quotations being well maintained. Best calving cows made £20 to £23, secondary £17 to £19, and calving heifers £14 to £16. Best beef made up to 7d. per lb. Bulls, two years old and upwards, sold at £8 to £12, and yearlings £7 to £9 each. Sheep were about an average show. There was a good trade for best class of store wethers and store lambs. For smaller lambs trade was not very brisk. Lambs 24s. to 31s., and store wethers 35s. to 40s. each. Fat wethers 7½d. to 8½d., and fat ewes 5½d. to 6½d. per lb. There was a poor show in the horse fair. The demand was good for sound, useful animals, but these were scarce and dear.

The Vintage.—In France there is promise of an abundant vintage this year, and the conditions under which the grapes have approached maturity have been such as to lead to the hope that the quality will be satisfactory. The *Wine Trade Review's* Bordeaux correspondent states that much alarm was caused by the excessive heat in July, which threatened to scorch the fruit before its full development, but the subsequent change in the temperature has had a remarkable effect, and has quite revived the hopes of the growers. The prospects in the Champagne, Burgundy, and brandy districts are also encouraging, but, owing to the anticipations of an abundant yield, there is a great demand for casks, and prices have risen in a way that causes considerable inconvenience. The French Minister of Agriculture has prepared an estimate of the vintage, according to which it is expected to be very good in point of quantity in thirty-five departments, good in thirty, fairly good in four, passable in four, and indifferent in one only. It is estimated on this basis that the total yield of wine in France in the coming autumn will be something like 1,200,000,000 gallons, or about 100,000,000 gallons more than in the great year of 1893. The same journal's Mayence correspondent reports that the outlook in Germany is very promising, and a good crop is also expected in Italy, whilst on the Douro their Oporto correspondent states the gathering will be later than it was last year; but the yield will probably be larger, although the excessive heat is threatening danger. In the sherry country, on the other hand, the intensely hot weather has been unfavourable to the grapes, and unless moist nights be experienced the crop in the Afueras will be ridiculously small. The best news we have from Spain is that the new plantations continue to progress well, and that the number of those who are replanting is steadily increasing, the work having become necessary through the ravages by the phylloxera.

BARLEY AND MALT.

By Hordeum.

Harvesting.

After the spell of broken weather finer conditions have again prevailed generally, and but for the great scarcity of labour in many districts harvest would be proceeding properly. As it is, a good deal of corn is being secured in prime condition. Even the colour of straw and of much barley will be very fine.

It is again necessary to refer to the grossly exaggerated and alarming statements made in some quarters about damage done by wind, rain, storm, and flood. Some of these doubtless proceed from men who may honestly believe what they say, but unfortunately they take a gloomy and altogether pessimistic view of things. A few fields here and there of even badly damaged crops do not exert much influence, unless they truly represent widespread or general mischief.

The Trite Old Saying

one swallow does not make a summer is very true. Equally true is it that it takes more than one week's rain to ruin the harvest in Britain. Talking the matter over with one of our most careful and painstaking observers the other day, I was agreeably surprised to hear him say that in one of our best barley districts he lives in he considered, after most careful examination of much of it in the fields, that the sum total of harm done did not equal the great gain to many things, and even in some cases to the barley itself.

It is certainly true in many districts that, notwithstanding the gales and in some localities the torrential rains, the amount of badly or dangerously lodged grain is exceedingly small. In the majority of cases the harm done can be covered by the additional cost of labour for the cutting and (where the pernicious system is adopted of) binding, etc.

Securing barley any year in

Swarthe or Sheaf

remains one of those questions about which both practice and opinions widely differ, but concerning which there has not as yet been adequate discussion.

There can be no doubt that in many normal or average seasons on many soils the finer qualities of malting barleys are distinctly improved by exposure on the ground in swarthe. Old-fashioned and careful farmers assert that the influence of dew under such conditions is mellowing and distinctly beneficial. Others claim for the practice much less liability to grain sprouting if a few days of really wet weather sets in.

When a whole country side can be so seriously affected by two days' rain whilst two-thirds of the corn stands uncut that a clamour is raised about it is to many practical men incredible, if not looked upon by such men as actually ridiculous or worse.

It is a Serious Question

to prejudice a large and important district by such remarks unless they are capable of proof. When such rumours become current many buyers fight shy of the district. Of course, if the desired end is to depress prices, one can quite follow the reasons why such assertions are made; but the circumstances should be fully made known, so that proper conclusions may be drawn.

Reports on conditions made by buyers rarely can run quite on all fours with those current with growers, and in cases where local influences and interests are of a specially peculiar class much watchful care is needed in giving such things circulation. It is not difficult to conceive of districts where any depression in price goes directly into the pockets of buyers. Where such things can be, the reports spread need most careful watching. In some instances they may be looked upon with more than suspicion. Too rapt attention to selfish interests not infrequently make men blind to such things as honesty and truth.

The Balance of Probabilities

as things stand is in favour of much barley of prime malting sorts being safely secured. The great need is that it may be fairly treated, and secure for the growers fair and remunerative prices. All users of malt for any purpose whatever, and especially where it now forms only a part of the brewing material used, can afford to pay a price that should leave the grower a chance to live and reap a little return upon his capital. Happily there are few maltsters or dealers so placed that the reduction in price, where it can be secured, goes directly into the pocket of the buyer. In the majority of cases so direct an incentive to use the tar brush does not occur. But in any and every case in a matter like barley prices no true interest is ultimately served by making the conditions such that men who try to act honestly cannot live. The difference between a living profit and loss is now in the barley trade brought to so fine a point that every friend of the interests concerned should jealously watch every improper attempt to send prices down, from whatever source it may emanate.

FRANK RICHARDSON AND CO., successors to TOPHAM RICHARDSON BROS AND CO., Importers of Selected Foreign Malting Barleys, 6, Duke Street, Southwark, London, S.E. Telegrams, "Essurgeon, London" Telephone, 787, Hop, London; and at Liverpool and Burton-on-Trent.—[ADVT.]

HOPS.

By Lupulin.

Home Notes.

The Borough.

I have it on good authority that stocks of 1899 hops are now almost exhausted, that most of the growers who have hops on hand are taking them off the market, waiting further developments in the plantations, and that consequently quotations have advanced. Assuming the correctness of this statement, I have sought for evidence of its natural results, but regret to say that I fear it cannot be found in the present realisation of much higher prices by growers. The trade is certainly steady, but the demand is comparatively slow, and although the reports from the country do not indicate any solid improvement in the prospects of the crop, no speculative action has been aroused, and buyers still seem to be willing to abide by the issue of events, whatever they may be. In the meantime, there is no doubt that the tendency of values is upward. Holders have in all cases instructed their factors to ask for more money, and however unwilling merchants may be to concede what is required, they must certainly be soon brought to acknowledge the reasonableness of the claims of growers.

We have now passed more than half way through August, and in the ordinary course some new hops will be with us in about a fortnight. Although the main crop will probably be rather late this season, we are practically within touch of the new market. It is therefore quite comprehensible that merchants should deprecate any movement in prices which might give a stronger tone to the commencement of this season's trade. But, despite their efforts, facts will tell in the long run, and I only wish that growers had better regard for their own interests, and the benefits that would accrue to them from co-operative action. The example of our competitors in Oregon and California is before us. The keen Yanks are aware that combination can only be met and defeated by combination, for which we have such excellent opportunities on this side.

From the Plantations.

I have received many reports this week, but they are so generally uniform in character that it appears hardly necessary to print them with separate detail. There appears to be no doubt that the gales have done irreparable and incalculable damage to the greater part of the grounds. Very few acres can be found that are not feeling the effects of the storms in some degree, and the subsequent break-up of the weather, with lowered temperature, coming upon the plants in their most critical stage, practically settled the question of the crop. I cannot see how it can be possible for the more genial climate we are now enjoying to benefit, except by maturing the hops that have already formed or are in course of formation. Bramblings have, perhaps, the best chance, but I fear for the Goldings, which in East Kent are not at all well developed. The better-grown laterals were weighted with the rain and were severely knocked about in all the exposed gardens round Canterbury, the burr being so much bruised that but little of it can make any further advance. This is also the case in the Ashford district. From Teynham I hear of much blind bine, and in other districts it appears that mould is running fast, despite of sulphurating. Similar reports come from Maidstone, the Weald of Kent, and Sussex, complaints being general that the night temperatures are abnormally low, and that prospects are very discouraging. The growers in Worcester and Hereford have had the same experience, although the rainfall has benefited the hops on shallow soils. But here, as elsewhere, the combined effects of a bad start, persistent blight, gales, and unseasonable weather, are apparent in every yard, which, perhaps, are more unfavourably conditioned at present than the southern gardens.

I deeply sympathise with my friends in every district whose anxieties, outlay, and skill, have been so much depreciated by climatic hindrances which they cannot control, and earnestly trust that they will find some compensative in improved values, which they well deserve and should certainly demand.

The Farleighs and District (August 19th).—A correspondent writes:—The late hot weather has brought the hops on very much, but they are very late this year, and picking must be much later than usual. Some pieces are slack of bine, and the stronger pieces are very blind. This neighbourhood gave a very large crop last year. This year it looks as if it would grow about half of last year. A good deal of mould can be found in some grounds.

Teynham.—Except in well-protected gardens the damage done by the recent heavy gales is irreparable. The estimate of the general yield must therefore be much reduced, and the continuation of cold wet weather makes the outlook still more unfavourable. I fear we shall not now reach an average in this district.

Hope (Hereford).—Bine very slack in most yards, some with more bine and well washed are doing better. Blight still about. Some yards will not be worth putting a crib in, the burr is not coming out kindly, and generally the yards have not looked so bad at this time for years.

Withington (Hereford).—Our hop plantations generally started badly this year, many of the older and poorer yards being most deficient of bine, and this, together with severe attacks of aphis blight, has caused a most uneven condition in the prospects of a crop. I believe the plants are fairly clean from both insects and mould just now, but under no conditions of weather can one half of our acreage produce more than 3 cwt. per acre. A large proportion of the remainder will not grow near an average, but with everything favourable there may perhaps be 20 per cent. of the whole that will produce a fair average crop.

The first pocket of East Kent Golding hops arrived in the Borough Hop Market from Upchurch, and was purchased on Friday by Messrs. Smith and Foyer, 16, Southwark Street, Borough, S.E.

Foreign Notes.

Nuremberg.

The trade in hops continues to be steady, though the amount of business done is limited by the reduction of stocks, which are now at a very low point. Values are well maintained, being settled by mutual agreement in each transaction, and buyers are in this respect somewhat at the mercy of holders, who are disposed towards firmness, and generally decline to sell, unless at prices fixed by themselves. Some early samples have made their appearance on the market, and have been sold at the fancy price of about 2s. 6d. per lb.

Reports of the Growing Crop

generally indicate that improvement is taking place. The anxiety created by want of rain three weeks ago has been replaced by confidence and comparative satisfaction in consequence of the salutary showers that have fallen recently, but further moisture is needed to enable the burr to develop into hop, which will be assured if favourable weather should prevail during the present month. A general feeling exists that the quality of the new hops will probably meet the wishes of consumers, but that the actual yield will come somewhat short of that of last year, especially as some districts have suffered severely from recent wind storms.

Belgium.

More encouraging reports as to the condition of the plants checked the recent strength of the market, and values of hops, both of the 1899 and the 1900 growth, receded. This has been succeeded by a firmer tone consequent on the knowledge that the plantations were not making such good progress as was expected. Violent storms have damaged the bine and the laterals, and for a week or more unsettled weather prevailed, with very cold nights and almost sunless days. The return of warmth and sunshine is welcomed, and is giving the plants much help, but as the growth in many grounds was seriously checked by the severity of the attack of blight, it is clear that the crop cannot under the most favourable conditions yield much more than half the quantity that was grown last year, even if it reaches this proportion.

America.

The New York market for hops is distinctly hardening, though its progress upwards is slow. Buyers are showing increased willingness to operate, and although business cannot be described as active, there is enough trade being done to support the ideas of dealers. Supplies are light, and not equal to the outgoings, and the firm tone which marks the present position is encouraged by the reports from the country, which denote pretty plainly that only a moderate harvest can be gathered. Later intelligence shows the maintenance of a firm tone.

Concerning the New Crop

I note the following:—

Oneida Co. (N.Y. State).—Heavy wind and rainstorms have damaged some yards near Waterville. Vines throughout an extensive section were badly beaten, and the laterals were injured. Yards outside the storm area are looking fairly well.

Otsego Co. (N.Y.).—Yards about Fly Creek being in some cases neglected, the average under proper cultivation is reduced by about 20 per cent. Growth is light, but insects are absent.

Madison Co. (N.Y.).—The vines in Madison district are in about usual condition, and are free of insect pests.

New York State.—The crop is now estimated at not exceeding 40,000 bales, which is about two-thirds of an average yield. The feeling of dealers is demonstrated by the contracts which are being made with growers at 12½ to 15 cents, and although such figures might be considered tempting, very few planters are willing to contract thereat.

Oregon.—Some growers state that owing to the scarcity and consequent high value of labour this year, many yards will be left unpicked. It is reported that the hop growers' association recently formed in this State, and controlling a large area of hops, has received an offer for prime hops, of 15 cents certain, with the alternative of the highest figure obtainable for equal quality if the value eventually goes beyond the minimum named. But in order to secure this price the association guarantees that only three-fourths of the crop shall be gathered.

Lane Co. (Oregon).—Hops are looking generally well, and if no drawbacks occur a fair crop will be harvested.

Linn Co. (Oregon).—The acreage in White and Green River Valleys is quite 40 per cent less than last year. There are some lice, which are being dealt with by spraying, otherwise the vines are generally in fair condition.

Washington.—Throughout the greater part of the eastern section of this State hops are fairly promising, but in the western part the outlook is not so good.

Yakima Co. (Wash.).—Vines are healthy and free from vermin, but acreage is about 10 per cent below last year.

California.—It is now estimated that the whole State will produce less hops than last year, and some experts put the reduction at possibly 15 to 20 per cent.

Sacramento Co. (Cal.).—Acreage has been reduced from last year by about 5 per cent. There are no insects, but growth is rather slow, and there are many missed hills. The quality of the crop should be good, but the quantity will not exceed three-fourths of the yield of 1899.

Sonoma Co. (Cal.).—The vines have suffered unusually from cut worms and other pests; the output will therefore be materially reduced. About Petaluma, in this county, the vines are backward, and a good many hills have missed. The average area under cultivation is unchanged.

(*For Hop Market Reports, see pages* 241, 243.)

AGRICULTURAL EDUCATION.

UNIVERSITY COLLEGE OF NORTH WALES, BANGOR.
A constituent College of the University of Wales
AGRICULTURAL DEPARTMENT. IN-COLLEGE COURSES. 1. A complete course in theoretical and practical Agriculture extending over two years, and suitable for farmers and land agents. 2. Advanced course for a third year in Agricultural Chemistry. 3. Short course of eleven weeks, commencing in October and consisting of Agriculture, Chemistry, Bookkeeping, and Land Surveying. The degree of B.Sc. in Agriculture of the University of Wales may be taken by students who pursue a three years' post matriculation course of study at the College. LLEDWIGAN FARM (360 acres) has been taken by the College for teaching and experimental purposes. Diploma (two years) and Degree (three years) students will in future follow courses for at least one year at the farm under the supervision of the Professor of Agriculture. Special arrangements will be made to take farm pupils for practical instruction only. The College is recognised by the Surveyors' Institution as a place of approved professional instruction for land agents. The cost of board and lodging, with tuition fees, varies from £30 to £40 for the College year. The Scholarship examination will commence on September 18.
Prospectus, with full particulars as to Scholarships and Diplomas, may be obtained from
JOHN EDWARD LLOYD, M.A.,
Secretary and Registrar.
July 17th, 1900.

LINCOLN LONGWOOL

DUDDING, HENRY, Riby Grove, Gt. Grimsby, Lincolnshire, has always for inspection and sale a large flock of pure LINCOLN LONGWOOL SHEEP, including many prize-winners, having taken the leading prizes for many years at the Royal and other shows for both rams and ewes, including champion medals at both the Paris Exhibitions, Vienna, Amsterdam, Canada, Australia, New Zealand, and all the leading prizes at Chicago; also the first for the best collection of Lincoln fleeces of wool at the Royal Windsor Show, which proves the character of this flock, which is most famous for their great size and 125 years' good breeding. Rams from this flock made the highest average on record last year. Riby Grove is seven miles from Great Grimsby, and three from Stallingboro' Station. Telegrams, "Dudding, Keelby."

FIELDSEND, C. S., Belmont, S. Willingham, Lincoln. Flock No. 59. Pedigree RAMS and EWES for SALE.

T. C. DIXON, Brandesburton, Hull.—Pure LINCOLN LONGWOOL SHEEP, of best blood. Wool a speciality, with quality and size combined. F.B. 69. Rams, Ewes, and Lambs for Sale. Inspection invited. Telegrams as above.

HOYLES, GEORGE, Manor House, Skidby, near Hull.—Pure LINCOLN LONGWOOL SHEEP. Registered Flock 136. Sires used: Skidby Constitution 3069, sire Skidby Conservative 1346, g. sire Old Constitution 308; Skidby Tory 1583, sire Riby A 358; Leconfield Pride, sire Casswell (16) 1753; Skidby Friar, sire Abbot 1—from the celebrated flocks of Messrs. Henry Dudding, J. Casswell, Hy. Smith, jun., etc. Heavy-wool Sheep for export. Also prize and prize-bred Polled Angus, Shire Horses, and English Ponies for inspection and sale.

SHEEP (*contd.*).

LINCOLN LONGWOOL.

ANDERSON, JOHN, Chapel Farm, Barton-on-Humber, Lincolnshire Breeder of pure-bred LINCOLN LONGWOOL SHEEP. Flock Book 106. These sheep are noted for having hardy constitutions, true character, and long, lustrous wool. — Telegrams: "John Anderson, Barton-on-Humber."

OXFORDSHIRE DOWN.

OXFORDSHIRE DOWNS.— For SALE, 100 pure-bred young EWES and 50 EWE LAMBS. Dispersal of flock, established more than 30 years. During recent years rams have been used from the noted flocks of C. Howard, G. Street, B. Hawkins, and H. J. Peacock. Apply to THOMAS STREET, Milton Ernest, Bedford.

HAMPSHIRE DOWN.

FLOWER, JAMES, Chilmark, Salisbury. Undoubtedly the leading flock of the day; in show yard records at all the largest shows, including the Challenge Cup at the Salisbury Great Prize Sheep Fair six years in succession; also highest average for same period for 100 ram lambs at annual sale, at Britford Fair, August 12.

The Flock is one of the oldest existing combining fine quality, strength, constitution, and true character.

"Fossil," sire of the highest-priced Hampshire Down Ram ever sold, was bred at Chilmark, and in service there last two seasons.

COLES, CARY, late C. and T., Manor House, Winterbourne Stoke, Salisbury.—Registered HAMPSHIRE DOWNS, prize-winners at the Royal, Bath and West, Royal Counties, and other shows. Sheep of all ages for sale; selections from 1,000.

SHROPSHIRE.

COOPER, WILLIAM, AND NEPHEWS, "Cooper's Dip" Works, Berkhamsted, England. Breeders and Exporters of pure Shropshire Sheep. First and Third Prize for Ewes, Royal Show, 1898. Five hundred breeding Ewes. The largest export flock of Shropshires in England. The sires used present season include 310 Guinea Champion "Royal Record," Two First, One Second, and One Third Royal Show Prize winners.

LIVE STOCK AGENTS.

INVERNESS, WEST HIGHLANDS.—JAMES ARNOTT, Scotch Live Stock Agent, Ellandonan, Inverness, established 1870, selects and supplies on commission all classes of SCOTCH STOCK. He attends all the leading markets to purchase Stock at lowest rates. References can be given if desired to customers who have been annually supplied. All orders are personally attended to. List of classes and approximate prices sent on application. Reference required; terms cash. Telegrams: "Arnott, Inverness." J.A. is now booking orders. N.B.—Polled Angus or West Highland Heifers for crossing or feeding, in truck loads, at moderate prices. Fat Stock of all classes also purchased.

LARGEST Live Stock Agency in England.—E. GOODWIN PREECE, Portland House, Shrewsbury, will be glad to receive orders for RAMS, EWES and WETHERS, of various breeds, of which he buys annually large numbers on commission. SHROPSHIRES, CLUNS, and KERRIES, a SPECIALITY. HAMPSHIRES, OXFORDS, SOUTHDOWNS, LINCOLNS, LEICESTERS, and COTSWOLDS. Also CATTLE of various classes for GRAZING or DAIRY. References to practical farmers all over England, who have been regularly supplied for many years. All personally bought. Prices on application.

THURSDAY, SEPTEMBER 13, next.
APPLESHAM FARM, SHOREHAM, SUSSEX.
About 2½ miles from Shoreham and Lancing Stations, L.B. & S.C.R.
Highly important SALE of SHEEP and DAIRY CATTLE.

MR. C. STRIDE has been favoured with instructions from Mr. WALTER WHITE (who is quitting and relinquishing farming) to SELL by AUCTION on the farm on the above date, the whole of his well known hill flock of DORSET DOWN SHEEP, consisting of about 1,500 EWES and LAMBS in ages as follows:—

219 two tooth ewes,
196 four tooth ewes,
179 six tooth ewes,
204 full mouthed ewes,
325 ewe lambs,
335 Wether lambs, rams and ram lambs.

This flock has been in the White family for seventy years, and since being brought into Sussex from Dorsetshire by Mr. Walter White ten years ago, has been crossed with the Southdown.

The Ewes are very prolific and hardy of constitution, possessing the quality of the Southdown with greater size and scale. They will be sold in their natural condition, and work on the Downs for their living until day of sale.

Together with
48 GRAND HEAVY MILKING DAIRY COWS AND HEIFERS,
all with calves at foot or due to calve.

All the above cows and heifers are a Shorthorn and Hereford cross, were bred on the farm from cows specially selected for their milking qualities, and are well worth the attention of buyers.

The remainder of the Dairy Stock, with the Horses and tackle, will be sold on THURSDAY, SEPTEMBER 27 next.

Sale to commence at 1.45 with the Cows.

Luncheon obtainable on the premises.

Catalogues of the Auctioneer, Auction and Estate Agency Offices, 63, East-street, Chichester.

ROYAL PRIZE-WINNING SHROPSHIRE SHEEP.
DUNSMORE, RUGBY.
¾ mile from Clifton Mill Station (L. & N. W. R.), where conveyances will meet Trains, and 2½ miles from Rugby.

LYTHALL and WALTERS will SELL by AUCTION, on FRIDAY NEXT, AUGUST 31ST, by direction of P. A. MUNTZ, Esq., M.P.—

43 Grand pure-bred RAMS, including the invincible Pen of five Shearling Rams, which have secured 1st prizes at the R.A.S.E., S. & W.M., and Leicestershire Shows, and also the winners of 1st and Champion Notts, and 1st Newport, and
60 Beautiful SHEARLING EWES, chiefly sired by four R.A.S.E. winners.

The rams are of immense scale, with plenty of muscle and lean meat, and possessing good coats and skins, and the Ewes are of correct type, with well covered heads, good skins, wool, and mutton.

Luncheon at 1. Sale at 2 o'clock.

Catalogues from the Auctioneers, Bingley Hall, Birmingham, who will execute commissions to purchase.

THIRD ANNUAL SALE OF SUFFOLK HORSES AT IPSWICH, AUGUST 30TH, 1900.

MR. A. H. E. WOOD, of Sudbourn Hall, deciding to keep only one or two Stallions for his own use, is SELLING at the above sale FOUR THREE and TWO-YEAR-OLD STALLIONS, recent winners at the Royal, Richmond, and the Essex and Suffolk County Shows.

The Sudbourn Hall Stud of Suffolk Horses contains more prize-winners than any other stud in England.

AUCTION SALES.

THE QUARRINGTON RAMS.
(Flock Book No. 155).

Important SALE of Grand Lincoln Long-wool SHEARLING RAMS.

MESSRS. HINCKS & TURNER beg to announce their instructions from Mr. F. WARD, to SELL BY AUCTION, upon the premises, QUARRINGTON,

On TUESDAY, SEPTEMBER 4th, 1900,

80
of his Grand Lincoln Shearling
RAMS.

This Flock, established in 1841, has been enriched by purchases of Ewes from the Flocks of the late Mr. Hack, Silk Willoughby; Messrs. Clarke and Son, Ashby-de-la-Launde; late Mr. John Byron, Kirkby Green; Mr. Pinder, of Barrowby; Mr. E. H. Cartwright, Keddington; and Mr. H. Dudding, Riby; four of which were the 1st prize winners at the Louth Show. Notable Stud Rams, purchased at sums varying from 60 to 115 guineas, from amongst others: The Flocks of Mr. Dudding, Mr. J. E. Casswell, Messrs. Dean and Son, Mr. T. Casswell, Mr. Pears, Messrs. Clarke and Son, Mr. Wright, Mr. Goodyear, Mr. Rudkin, Mr. Sharp and Mr. C. Clarke, have been used. The present collection show great size and capital constitution, with plenty of bone, combined with perfect fleeces, and can with confidence be thoroughly recommended. Specimens this year and the last two at the County Show, held at Spalding, Louth, and Lincoln (the only times exhibited), secured high honours.

The place of Sale is within One Mile of Sleaford Station on the Great Northern Railway, Grantham to Boston, and Great Northern and Great Eastern Joint Main Line, London to Doncaster, where Conveyances will meet intending buyers.

Luncheon at 1 o'clock. Sale at 2.30.

Auctioneers' Offices—Sleaford and Leicester.

OXFORD DOWNS, 1900.

THE KELMSCOTT FLOCK, the property of ROBERT W. HOBBS, Kelmscott, Lechlade.

RAM LAMBS
or
SHEARLING RAMS

from this old-established flock will be SOLD by AUCTION at the undermentioned Fairs:—

IPSWICH, AUGUST 22nd.
CIRENCESTER, SEPTEMBER 3rd.
BURY ST. EDMUNDS, SEPTEMBER 4th.
KELSO, SEPTEMBER 14th.
NORTHAMPTON, SEPTEMBER 19th.

Yearling ewes for sale at home privately.

Prizes won by lambs from this flock this year are four firsts and four seconds at the Royal, Bath and West, Royal Counties, and Gloucestershire Shows.

BROADWATER, GODALMING.

Important Sale of the valuable Herd of SHORTHORN DAIRY STOCK, HORSES, SWINE, IMPLEMENTS, and other Agricultural Effects.

MESSRS. MELLERSH have been favoured with instructions from the executrix of the late Lieut.-Gen. Sir FREDERIC MARSHALL, K.C.M.G., to SELL by AUCTION, on the Premises, on SEPTEMBER the 18th and following day, at 12 o'clock, the superior

LIVE & DEAD FARMING STOCK,

comprising upwards of 90 head of well-bred Shorthorn Cattle, including 60 Dairy Cows, especially selected for milking purposes; 11 active and powerful cart horses, Swine, Poultry, excellent dead stock, Milk Carts, Vans, and requisites for the milk trade, and other effects.

Catalogues of Messrs. MELLERSH, Auctioneers, Godalming.

HAYWARD'S "YELLOW" PASTE

THE IMPROVED SULPHUR DIP.

Mixes readily with cold water. Kills all Ticks, Lice, etc. Sticks in the fleece and thus prevents a further crop of Parasites. Keeps off the Maggot Fly, and leaves the Wool in a healthy, lustrous condition.

In Packets, 1s., for 20 to 25 Sheep.

Sold by Agents.

ONLY ADDRESS:

TOMLINSON & HAYWARD, LINCOLN.

RAILWAY ANNOUNCEMENT.

GREAT NORTHERN RAILWAY

ALEXANDRA PALACE
GREAT DOG SHOW,
SEPTEMBER 25, 26, AND 27, 1900,
Under the patronage of
THE KENNEL CLUB.

THE INTERNATIONAL KENNEL CLUB.
Patron: H.R.H. The PRINCE OF WALES.

THE LADIES' KENNEL ASSOCIATION.
Patron: H.R.H. The PRINCESS OF WALES.

The Great Northern Company will convey Dogs, etc., for Exhibition at this Show from Inverness, Aberdeen, Perth, Dundee, Glasgow, Edinburgh, Newcastle, York, Hull, Leeds, Halifax, Bradford, Wakefield, Liverpool, Manchester, Huddersfield, Burnley, Blackburn, Bolton, Sheffield, Barnsley, Rotherham, Derby, Nottingham, Leicester, Lincoln, Grimsby, Boston, Spalding, Lynn, Wisbech, Peterboro', Cambridge, and other towns on and in connection with their system, to Wood Green and Alexandra Palace Stations.

Through Vans will be run for the conveyance of Dogs for Exhibition at this Show, where necessary.

☞ The Rates charged will in no case exceed those in force by any other route.

RETURN TRAFFIC.

Arrangements will also be made for the return of the traffic in Through Vans at the close of the Show, and Exhibitors wishing to avail themselves of these facilities should consign and address their exhibits "Per Great Northern Railway," and be careful to write their names and addresses distinctly on the backs of the direction labels issued by the Show Committee.

A Great Northern representative will be in attendance at the Show, prepared to give every information to exhibitors, and to facilitate the removal of their exhibits. The removal order issued by the Secretary should be sent to the Superintendent of the Line, King's Cross, at commencement of the Show.

For further information apply to the Superintendent of the Line, Great Northern Railway, King's Cross Station, London, N.

CHARLES STEEL,
General Manager.

SILCOCK'S CALF REARING.

CALF MEAL

To rear Calves economically and profitably use SILCOCK'S SOLUBLE CALF MEAL. Thousands of Calves are reared on it annually; it is a true milk substitute, is very easily digested, dissolves at once in water, gives least trouble in preparing, does not scour, is very economical in use, as one pint makes one gallon of thick gruel, and it fits early for cake feeding. It contains about 80 per cent. of soluble feeding digestible ingredients, while in milk, butter-milk, and whey the figures stand at 12½, 9, and 6 per cent. respectively. With the minimum of cost and trouble SILCOCK'S CALF MEAL gives the maximum results. Use SILCOCK'S SOLUBLE CALF MEAL, feed regularly, in right quantity and at correct temperature and you will have little trouble in rearing paying calves.

Price, 12/6 *per cwt., carriage paid. 5 cwt. lots*, 12/-.

WARRINGTON.

BIBBY'S "CREAM EQUIVALENT" for CALVES.

An Ounce of Fact is worth a Ton of Theory.

A STRIKING FACT.

In our Spring number of "Bibby's Quarterly" we reproduced the photographs of two groups of Calves which are now being reared at the Hornby House Farm, Bedale, Yorks, by his Grace the Duke of Leeds.

One of the groups is being fed on New Milk and the other on Separated Milk and "Cream Equivalent."

We asked our readers to tell us which of these groups were fed on New Milk, and 707 Farmers, Farmers' wives, their sons and daughters competed for a small prize which we offered to those who guessed correctly.

445 selected the "Cream Equivalent" fed Calves as having been fed on New Milk.

We think the above striking FACT speaks volumes for "Cream Equivalent."

The "Cream Equivalent" can be had at 15s. per cwt., carriage paid to nearest station.

SOLE MANUFACTURERS:—

J. BIBBY & SONS,
Exchange Chambers, Liverpool.

MACKINDER'S LAMB FOOD

Used on the Royal Farms and by Large Flockmasters everywhere.

Mr. Jas. Bennett, Aure, Glos., writes:—"I have never had any Food of any sort or kind on which lambs did so well."

Mr. F. Jakeman (agent for C. T. Hoare, Esq.), Bicester, writes:—"I find it capital food both for lambs and cattle."

Hundreds of Testimonials, Samples, Pamphlets, etc., free through agents, or direct.

THE REGISTRATION OF FIRMS.

Some time ago a Bill was introduced into Parliament with a view to compelling the registration of firms in such a manner as to enable any person who wished for the information to learn the names and addresses of the partners. It was also proposed to require any individual who traded under any name other than his own to register the fact in a similar manner. The question was admittedly a difficult one, and therefore it is not at all surprising that the matter was referred to a Select Committee. After considerable investigation and inquiry the Committee came to the conclusion that a special report was necessary. This document has just been issued. It is interesting reading, but at the same time disappointing. The nett result is that some legislation is necessary in the matter, but that there are so many difficulties that nothing can be done at present, and that much more consideration must be given to the matter before a practical solution can be arrived at. The importance of the matter is perhaps greater than appears to most people. An illustration will, perhaps, be the best way of explaining matters. A man who is nobody, and who has nothing behind him, may take it into his head to start in business with a high-sounding name. This Mr. John Smith may become the Blankshire Feeding Stuffs and Artificial Manure Company. The innocent farmer who goes to his shop, or warehouse, or whatever he may be pleased to call it, may possibly be under the impression that he is dealing with a large company whose extensive business throughout the country enables it to offer the best of goods at the lowest possible price, while, in reality, he is only purchasing from a commission agent with a dummy stock, and who will certainly supply the cheapest and most rubbishy profitable goods that come to hand.

The evil undoubtedly exists to a very considerable extent. It is intensified by the action of certain third-class firms whose reputation does not enable them to sell their goods in competition with honest traders who are prepared to sell a good article at a reasonable price. This being the case, they have resource to agents who receive a good commission for disposing of second-rate goods. To do this it is absolutely necessary to have a high-sounding name which, unfortunately, too often deceives those who buy at the first place they come across without taking the trouble to find out anything about it. The point raised applies to all classes of business, but it is probable that no one suffers more in this respect than the farmer. He has over and over again been victimised in such manner with food stuffs, manures, and particularly with regard to seeds. The registration proposed would not, perhaps, be a perfect cure for the disease, but it would certainly alleviate the trouble. If people knew that their customers could learn their real names and addresses they would be more careful in their dealings, and consequently only good could result. We regret that the report of the Committee is so colourless, but at the same time readily admit that there are very considerable difficulties in the way of immediate legislation. The great difficulty which seems to have presented itself to the Committee was as to which Government department should accept the responsibility of carrying out any enactment which might be passed for such a purpose. The Board of Trade would seem to be the proper authority, but there seems to be considerable difficulty about a central registration office and local records such as we should have expected might have been kept in the various County Court centres. We trust that the matter will not be lost sight of; and that a modified measure will again be introduced into Parliament.

SAMPLES.

By a Man of Mark Lane.

A Reuter's telegram from Bombay on Friday states that there are serious floods in the Madras Presidency, owing to the overflow of the Godavery. Many persons have been drowned, and great damage has been done to the crops and other property.

It is time (says the agricultural correspondent of the *Standard*) that some effort should be made to prevent the re-naming of existing varieties of cereals and vegetables, and selling them as new kinds. Some of the best varieties of potatoes, mangolds, and turnips are sold by different firms under different names. The Up-to-date potato, for example, has at least three names, and in comparative trials it is commonly found competing against itself under these different denominations. When a man raises a new variety of any vegetable or fruit, he ought to have the sole credit and advantage.

Dr. D. Morris, C.M.G., the Imperial Commissioner of Agriculture for the West Indies, has just arrived in this country. I am informed that he called at the Colonial Office on Saturday.

The receipts on account of Revenue from April 1st, 1900, when there was a balance of £3,517,047, to August 18th, 1900, were £38,560,843, against £39,430,446 in the corresponding period of the preceding financial year, which began with a balance of £8,919,173. The net expenditure was £65,523,738 against £41,993,724 to the same date in the previous year. The Treasury balances on August 18th, 1900, amounted to £6,120,951, and at the same date in 1899 to £3,806,615.

I notice that the South Lincolnshire agriculturists are combining with London merchants to make themselves independent of the railways by establishing a service of steamers between a port at Fosdyke, on the Welland, near Spalding, and Hull and the Metropolis, where warehouses are being prepared; and agricultural meetings are shortly to be held to consider the details. If the experiment succeeds the example is sure to be followed by other seaboard counties; and the railway companies, if they remain obdurate, run a chance of losing some of their best customers. The London market is largely supplied with potatoes from Lincolnshire, Norfolk, Suffolk, and Essex, while Kent, Sussex, and Hampshire all have their staple products to transmit to the capital. Wheat, fruit, vegetables—and I see no reason why sheep and cattle should not be added to the list—may all in turn be taken to a great extent out of the hands of the railways, if they do not abate their terms. Hops, cabbages, cherries, strawberries will bear the journey from the English coast at least as well as from the Continent; and I only wonder that, with all the outcry there has been against charges for land carriage, some plan of the kind has not been thought of before.

The *Standard*, in some comments on this subject, remarks that the "railways have obtained a monopoly, and have supposed that they could not be dispensed with. This comfortable conviction is now likely to be put to the test. It remains to be seen whether the advantage of superior rapidity is sufficient to counterbalance the drawback of heavy charges. The men engaged in the new enterprise are not likely to have embarked on it without counting the cost. They must be well aware of the difficulties of carriage by sea. If they have well weighed the question, and have come to the conclusion that ships will convey their goods both to Hull and to London without any material injury accruing to them from the sea voyage, they ought not to be doubtful of success. It may be, however, that the threat of competition will be enough, and that the railway companies will at the eleventh hour take the case of their agricultural customers into consideration.

PRACTICE WITH SCIENCE.

Lord Denbigh's Experiments.

On the home farm at Newnham Padox the Earl of Denbigh has been experimenting in the cultivation of various crops, including sugar beet and new varieties of wheat and oats. Upon the whole the trials seem to have been successful, and the many tenants and friends, who a few days ago accepted his invitation to inspect, with Lord Denbigh, what had been done, seemed very well impressed with what they saw. Amongst those present, in addition to his lordship and his agent Mr. H. H. Cave, were Messrs. J. Harrison, J. Brierly, J. P. Toone, Dr. Mason, W. Kenney, V. Kenney, W. F. Ferriman, Hodgetts, J. Davy, W. Cooper, Kibble (2), J. L. Harrison, J. Wright, W. Wright, A. Wotherspoon, E. Colban, T. Foster, Lockton, Dunn, F. Terrell, G. Wood, A. Sanders, etc.

Upon tables erected in the field above the stack-yard were set out fine specimens of mangolds and of different varieties of sugar beet, grown on adjoining land, and these first of all attracted the close attention of the visitors. The sugar beet, which, by the way, is white in colour, was "scrooped," and found to be very sweet, whilst the mangolds were of such a size and quality as to elicit warm encomiums from the practical agriculturists. Then Mr. Cave led the way into the garden close, where the mangolds and sugar beet, in a very healthy and thriving condition, were growing. The land had been cultivated exactly the same throughout the entire field, which in 1899 bore a very moderate crop of wheat. As soon as this was harvested, the land was ploughed about eight inches deep, and later on it was ridged, and left in ridges all the winter. Early in the spring about ten loads of farmyard manure to one acre were spread along the ridges, and the ridges were then split back over the manure, but the land was found to be so rough that it was necessary to again break up the ridges and work the land; and just before ridging for the roots, dissolved bones at the rate of 5 cwt. to one acre were spread. For the mangolds the ground was ridged as near as possible 27 inches apart. The seed of all the roots was sown in the first week of May. The mangolds were intended to be set out 12 inches apart, but the distance is nearer 15 inches. The ridges for the sugar beet were meant to be 15 inches apart, but they are slightly irregular. Possibly some difficulty was experienced in setting out the ridges at such a distance, but it was determined that as the ground for the mangolds was ridged with the plough, the sugar beet should be ridged in the same way. The beet was set out as near 6 inches apart as possible. As soon as this was done, 1 cwt. of nitrate of soda was sown along the rows, and later on a like quantity was put to the plants. All the roots were hoed by hand round the plants, and by horse hoe between the rows; but unfortunately this did not have all the attention required, and at one time the land where the sugar beet grew was very hard and dry, and the crop has suffered.

The seed sown in the field was as follows:—Plot 1, on the east side of the field nearest to the garden spinney, was sown with Sutton's Golden Tankard Mangold, claimed to be "the richest feeding mangold in the world." Plot 2 was sown with Wanzelben sugar beet. Plot 3 with French Vilmorin (originals); plot 4, Mettle Vilmorin; plot 5, Brenstedt; plot 6, Aderstedt; plot 7, Sutton's Prize-winner Yellow Globe Mangold. Messrs. Sutton give the weight of roots that have been grown as something extraordinary, and 55 tons an acre seems a bad crop, 80 tons would be a fair one, and for one crop the weight per acre is said to have been 105 tons 17cwt. 2qrs. Mr. Cave humorously remarked that the crop on the home farm was not intended to exceed this last weight—which some of those present regarded as fabulous, and they agreed pretty nearly that 55 tons an acre was as much as could reasonably be hoped for.

Lord Denbigh wishes to show by these root crops that, under usual and ordinary cultivation, a paying crop of sugar beet can be grown. It is believed that, for cattle, sugar beet would prove remunerative, and Mr. Wotherspoon, one of the tenants on the estate, has promised to test this during the coming winter.

Two excellent yields of wheat were next visited. The first was a crop of Messrs. Hunters new breed, White Monarch. It was not so upright as on the day of the Monks Kirby Farmers' Show, owing to the strong winds and heavy [illegible] which prevailed, but for all that it was a fine crop. The wheat was [illegible] on October 11th last year, on about 5½ acres of Highway Close, at the rate of about 2½ bushels to the acre. The [illegible] was [illegible]

and rye grass, which was mown twice. The clover ley was ploughed in September to a depth of about 8 inches, and the field was harrowed several times before, and also after the wheat was sown. The crop was very thin and weak all the winter, and, as soon as it was dry enough in the spring, the land was again harrowed three or four times, and after each harrowing the colour and appearance of the wheat improved. No manure of any sort was used for this crop, the growth of which is attributed to the fact that for some years the land has always been ploughed to a depth of from 8 to 10 inches.

The Garton system of plant improvement by cross-fertilisation is interesting, and if it should prove reliable and permanent cannot fail to have a beneficial effect upon agriculture. Mr. Garton claims to have proved it to be possible that by a proper system of cross-fertilisation the crops now grown can be increased from 15 to 20 per cent. without any increase in the cost of cultivation, so that in future farmers should be able to grow 40 bushels of wheat at the same expense that it now takes to produce 32 bushels. Mr. Garton's system may be put summarily as follows:—Some sorts of wheat and other grains are noted for the strength and length of the straw, others for the quality of the grain, as, for instance, white wheat is better than red wheat. Again, some wheats—the Rivett, for instance—are more prolific than others. The White Monarch wheat, grown this year at Newnham Paddox, is from the cross-fertilisation of Hunter's White—probably one of the best wheats grown—with Rivett, one of the most prolific. The result of this cross is again mated with Victoria Red. The character of the new breed is described as follows:—"Grain white, large, and plump; straw long and very strong; vigorous constitution; ear very compact and long."

Again it is urged that the quality of the wheat growing in America is better for millers than the wheat grown in this country, and some people contend that the Americans have a better class of wheat. Mr. Garton would utilise this, and he is bringing out a new breed this year, produced as follows:—Lincoln Red—a very good and productive wheat—is crossed with Michigan Bronze, a variety grown extensively in the United States. The result of this cross is then mated to the Waterloo, an old white wheat of exceptionally fine quality, and much grown some years ago. The result is Red King, with the following qualities:—Early, grain medium large, colour light red, straw medium long and very strong, head long and compact. The special points in favour of Red King are extreme productiveness, strength of straw, and fine quality of grain. This is Mr. Garton's description, and if he should prove correct, there is every reason to suppose a new wheat of first-rate quality and very productive will soon be on the market. The system is the same for oats and barley, the intention being in all cases to increase the yield, improve the quality of the grain, and obtain a good constitution and a vigorous growth.

It is said there is no such thing as natural cross-fertilisation, and practice seems to bear this out, because there are not many absolutely pure crops grown. Most of them have a mixture of some grains of another sort, and when this seed is again sown the character of the main crop is produced year after year. Mr. Garton holds that it is only by artificial cross-fertilisation that a new breed can be obtained, and doubts were expressed on Saturday whether the White Monarch wheat is likely to remain true to type. Heads of Rivett's and other varieties used in the pedigree were plentiful in the crop, and this appeared to confirm the opinion, freely expressed, that in course of time there would be a reversion to the original breeds that had been used.

A field of Scholey's warp-grown square head wheat was also visited. This was, if anything, better than the other. It had weathered the storms well, and was earlier than the newer breed, being in fact almost "white unto harvest." This wheat was in the Footpath Close of 7¼ acres. It was drilled in the 17th of October last, at the rate of 2½ bushels to the acre. This quantity was put on because the square head wheat does not tiller out like some other wheats. The crop in 1899 was beans, for which about eight loads of farmyard manure were used. The land was ploughed eight inches deep as soon as the beans a good crop were off the field, which was cultivated and harrowed several times before the wheat was sown, and at least three times afterwards. The wheat was always flourishing, and looked extremely well all through the winter and also in the spring. There was no manure used for the crop.

A proposal to have a sweepstake for the best estimate of the quantity of the wheat grown in both fields was readily acted upon, the entrance fee being 1s. for each field, with £1 added money. The envelopes containing the estimates were handed to Lord Denbigh, and they are to remain sealed until the wheat is weighted, which will take place immediately it is harvested and threshed.

Experiments were also made on the farm with Garton's Waverley a new breed of white oats and Scholey's warp grown Eastoft Champion oats, both drilled in the Hovel Close, and following a wretched crop of swedes. The oats suffered from wireworm in the spring, and the result can still be seen in the crop, so that this trial was less satisfactory than the experiments with beet and wheat.

At tea, which was subsequently served, a vote of thanks was passed to the Earl of Denbigh. As his lordship had been obliged to leave Mr. Cave replied. He said there was always a difference of opinion about things. With regard to what had been said as to the desirability of having the mangels thicker, he could only say that as they walked up the field one gentleman "blew him up" for having them too near, and said that if they had been grown farther apart it would have been better. (Laughter.) Their only idea of growing Garton's wheat was to see if it was better than the other varieties. He did not think there was any better wheat at the present day than the old Square Head, although he did not believe that even was so good as several kinds that had gone out of cultivation. That field was rather a noted one for growing wheat, as Mr. Davy could tell them. Mr. Garton contended that by increasing the size of the grain, he could increase the produce of the wheat crop from 16 to 20 per cent., and if that was true, he was doing something wonderful, and they would be very pleased to take advantage of it. With regard to potatoes, some of the varieties were very short lived, and he wondered why it was that the old Myatt's Ashleaf kept so good. He had grown it for thirty years, and it was as good now as ever it was. The Ashleaf Kidney had gone long ago, although it was really better than the Myatt's Ashleaf. It was the intention of the Earl of Denbigh to make some further experiments next year in the growth of new breeds of oats, but the small acreage of the home farm would not allow of any trials with wheat in 1900-1. If, however, any tenant had suitable land, and would care to try any of the Garton wheats, his lordship would be willing to provide the seed if the condition of the land was considered satisfactory, and if the tenant would agree that if more than 32 bushels an acre were grown, the surplus should be returned to make good the outlay on the seed wheat. Several seemed to be of the opinion that this was not a very strong inducement. Mr. Cave said he was under the impression that 32 bushels an acre was about the average in this part of the country, but if they thought the average was 40 he would raise his condition to that quantity. The seed was £5 a quarter, and so was rather expensive. In reply to Mr. Wright, it was stated that Scholey's square head wheat cost 2½gs. a quarter. Mr. Cave said the only thing about that was that the seed came from the warp land. The great thing in growing wheat was to have a good change of seed. It was no good growing their wheat from the same class of land. They must have an absolute change, and this warp land was a great change. He was very much obliged to them for having come that day, and he was quite certain he had picked up some wrinkles from them, which he hoped would bear fruit in time to come. (Applause.) His lordship asked him to mention that if they liked to walk round the gardens he would be very pleased for them to do so. (Hear, hear.) With regard to the roots, they grew beet-root last year, but the idea got abroad that they did it too well, and Lord Denbigh wanted him this year to grow the sugar beet without any extra cultivation. There had not been a single thing done to the sugar beet more than had been done to the mangolds, but apart from that he was not quite sure whether, from a farmer's point of view, they could beat the mangolds. If they could grow mangolds like those they had seen on that farm it would take a good deal of sugar beet to surpass them, even with a factory close to. About getting the wheat to stand, they were of course sheltered, but he had always held that the way to make their wheat stand up was deep cultivation. If their roots did not go deep into the ground they could not expect the wheat to keep up. The deeper the roots went into the ground the stronger and better would be the straw, and the better it would stand against storms when they came.

THE DAIRY.

Bath and West and Southern Counties Society.

The second draft (nearly 50 cwt.) of this year's cheese made during the month of May at the Cheese School carried on by the Bath and West and Southern Counties Society for the Somerset County Council, at Vale Farm, Batcombe, Evercreech, has just been sold to Messrs. Hill Bros., of Evercreech, at 64s. per cwt. of 112lb. 6,027 gallons of milk made 6,048lb. of green cheese, which, when sold at an average age of thirteen weeks, weighed 5,577lb., showing a shrinkage of about 7¾ per cent. Thirty-one students have already entered for instruction at the School, and other applications are being received.

Home Production of Milk, Butter and Cheese.

In the course of their Australasian Dairy Produce Review for the season 1899-1900 Messrs. Weddell and Co. make some remarks on the production of butter, milk, and cheese in England. They state that from the year 1895 there has been a slow but steady increase in the number of cows and heifers until last year and the present, when the increase numbered 51,300 and 97,700 respectively. This augmentation of the milking herd of the United Kingdom by 149,000 in two years has raised it to the highest number during the past fourteen years. It will be seen that though the milking herd has been steadily growing since 1895, it was not until last year that it overtook the growth of the population, when the number of cows per thousand persons rose from 99.7 to exactly 100.0. This year it has risen by nearly two cows per thousand, and now stands at 101.9. The average for the past ten years is 103.0, so that there is still considerable ground to be recovered. The agricultural returns made on 4th June last are not yet available, but from the very unfavourable season during the last half of 1899 it is almost certain that the rate of recovery has been checked. Although the crop of grass hay in 1899 was up to the average for the past ten years and amounted to 8,491,000 tons, the root crops were the worst for many years, and even the pastures from the end of June was very deficient; consequently the number of cows and heifers kept over for the winter would be reduced owing to the scarcity of fodder.

The quantity of milk estimated as produced by the 4,133,000 cows and heifers in the milking herd of the United Kingdom for the year ended 30th June last was 7,329,000 tons, and the amount of butter in the same period was 83,760 tons, which was a reduction in milk and butter on the previous year of 316,000 tons and 3,600 tons respectively. In the matter of cheese the reduction was much greater than in butter, as very deficient pastures were experienced during four out of the six months of the cheese-making season, and it is estimated that the production of cheese fell from the high amount of 150,000 tons in the previous year to 130,000 tons, or a fall of over 13 per cent., while the production of butter fell only 4 per cent.

Australasian Dairy Produce.

Messrs. W. Weddel and Co. have now issued their Australian Dairy Produce review for the season 1899-1900. They state that the Australasian butter season of 1899-1900 established two records, both of which are highly complimentary to the energy and enterprise of the Australasian dairy farmers, and must be particularly satisfactory after four disastrous seasons of drought. The first record is the remarkable fact that in the eight months ended April 30th, 1900, nearly 25,000 tons of Australasian butter entered the United Kingdom, which exceeds the previous highest yearly import by 10,200 tons; and the second record is that the increase of the season over its immediate predecessor was the enormous amount of 11,000 tons, which is nearly double the increase in any one year that any country in the world ever made. The greatest increase that even Denmark, whose progress has been phenomenal, succeeded in making was 6,467 tons in 1898 over 1897, but that was in twelve months, while the Australasian increase was the result of only eight months' import!

The season exhibited two other interesting but less noteworthy features. It began earlier and continued later than any season before, and from the first week in October to the very end of April, with only nominal exceptions, values pursued a slow but steady decline. In the beginning of October the "Choicest" brands of Australasian butter brought 126s. per cwt., and at the end of April they sold for 94s., or a decline of 32s. from the highest figure.

An examination of the imports of the season from the various Colonies which are known as Australasia shows, as might be expected, that Victoria heads the list both in total amount and largeness of increase over the previous season, the import for the eight months from that Colony being 12,635 tons, or an increase of 5,367 tons over the previous season. New Zealand comes next with a total import of 7,465 tons, or an increase of 3,398 tons. The third place is taken by New South Wales with a total import of 3,820 tons, or an increase of 1,735 tons. South Australia's total is only 386 tons, and the increase 220 tons; while Queensland's total import shows 365 tons and the increase 228 tons, although in the case of this Colony a considerable quantity of its butter is transhipped at Sydney, and is entered in the Customs Returns as belonging to New South Wales. Thus there is a most satisfactory increase all along the line. Summing up these figures, it is seen that the total import for the season from Australia is 17,207 tons, and the increase over the previous season 7,550 tons; while the total from New Zealand is 7,465, and the increase 3,398 tons.

Canada is also very satisfactorily increasing its export of Colonial butter to the United Kingdom. Like New Zealand, this Colony exhibits season by season a steady increase without that periodical retrogression which unfortunately has been one of the characteristics of the dairy industry in every Colony of Australia. The total import from Canada during the Australasian season (not for the year) was 7,322 tons, which was an increase over the previous season of only 723 tons. It is, however, scarcely fair to compare the growth of Canadian imports merely for the period of the eight months which constitute the Australasian season. If we take the Canadian imports for the year ended June 30th and compare them from year to year, the total and the growth are both much more favourable to Canada. For instance, during the year ended June 30th, 1900, the total

import from Canada was 11,932 tons, and the increase over the previous year 3,781 tons.

During the season 1898-99, there was a closer drawing together of the prices of "Choicest" and "Finest" qualities of butter than in any previous period, and this same characteristic was maintained during the season 1899-1900. This peculiar position of the market values of these two grades does not coincide with their intrinsic qualities, for while the market valuation differs by not more than 4s. per cwt., the intrinsic difference is at least 10s. per cwt. The "Choicest" grade undoubtedly is worth more money than it realises, but the assertion of agents for several years that Australasian butter is specially suited for retailing at a shilling has created a belief among buyers that a shilling is the proper retail figure for it. The "Choicest" grade, however, should be exempt from this prejudice, and if there were any properly organised butter committee to regulate the sale of Australasian butter in British markets, as there is of all other classes of butter, then "Choicest" brands should fetch a halfpenny to a penny per lb. more than they do now.

The average price for the season 1899-1900 works out at the same figure as for the previous season, but this is due to the extraordinarily high prices which prevailed during the two months September and October, when only comparatively small quantities of butter were on the market. The average for the other six months when the bulk of the Australasian butter arrived was 3s. per cwt. below the previous season. The most important point regarding the prices of Australasian butter during the season 1899-1900 was its decreased value relatively to Danish butter, compared with that of previous seasons.

The following figures show how the value of Australasian butter has this season depreciated in comparison with Danish since the previous season:—Season 1898-99: October, 6s. 2d.; November, 8s. 6d.; December, 12s.; January, 10s. 6d.; February, 11s. 6d.; March, 14s. 6d.; April, 7s. 2d.; average for season, 10s. Season 1899-1900: September 10s.; October, 10s.; November, 11s. 6d.; December, 17s. 5d.; January, 14s. 4d.; February, 10s.; March, 10s.; April, 11s. 6d.; average for season, 13s. 3d.

It is thus seen that Australasian lost ground comparatively with Danish in five out of the seven months (where a comparison can be made) to the extent of 4s. 1d. per cwt., while it gained in two of the months to the extent of 3s. only. In some months the difference was very great, notably in January, when it was 17s. 5d., while for the four months October, November, December, January, when three-fourths of the Australasian butter arrived, the average difference was 13s. 3d. per cwt. During the same four months in the previous season the average difference was only 9s. 3d. The principal reason for this temporary increased disparity in prices was the diminished supply of Danish, and the greatly increased quantity of Australasian butter on the market.

Whitchurch Cheese Fair.

The August Cheese Fair at Whitchurch took place on Wednesday, when factors had to give 7s. to 8s. per cwt. more than at the July fair. The quality all round was good, and all the best makes were quickly bought up at prices ranging from 58s. to 64s. Scarcely a lot was sold under 50s., and business was over an hour and a-half from the time the market opened.

Seizure of Putrid Meat.—Joseph Burton, a butcher, of 22, Tennyson Road, Kilburn, appeared before Mr. Plowden, at the Marylebone Police Court, on the 10th inst., to a summons, issued at the instance of the Willesden District Council, for exposing for sale meat that was unwholesome and unfit for food.—Mr. Greig, solicitor, who prosecuted, pointed out that the defendant was liable to a penalty of 20s. for each piece of meat so exposed, and as there were thirty-two pieces he was liable to be fined a sum of £640.—Herbert Woods, inspector of nuisances, said that on July 28th, he saw a barrow laden with all kinds of meat being pushed along Glengall Road, Kilburn. Noticing, as it passed him, that it smelt very offensively, he stopped the man in charge and examined it. The load consisted of six pigs' heads, one calf's head, five breasts of mutton, nine scrags, five livers, and six pieces of mutton of various kinds, weighing in all 125lb. All the meat was jumbled together, and was stinking, the greater part of it being quite putrid. He seized it, and it was subsequently condemned by Dr. Brookfield and destroyed. The defendant pleaded that it was all right when he purchased it at the market that morning. He had been a butcher twenty years.—Mr. Plowden said it was clear he was utterly regardless of the injury or suffering he was likely to inflict upon those who were foolish or ignorant enough to buy this nasty, loathsome mass of putrid meat he was trying to foist upon the public. He would be fined £5. with 2s. costs, or in default one month.

BARLEY AND MALT.

By Hordeum.

Barley Threshing.

The time to think of threshing is coming, and unhappily, some men think it is already on us, for new samples are being offered in many markets. Modern views are gaining ground upon the very crucial question of *when* to thresh, as well as *how*, and it is more difficult in the one case than in the other to know what is best.

When the grave factor of what the barley feeches can be dismissed there can be no question in the mind of any practical man, whose opinion is worth having, about the impropriety or otherwise of threshing before Michaelmas or (when harvest is as late as it is this year) of even a month later.

There must be no misimpression about this point, as it is one of the gravest importance. No barley grown in Britain this summer is yet ready to thresh

Every Acre of Barley

grown this year needs to go into barn or rick, to mature or mellow, if it is fit to be bought by a maltster to make brewers' malt. The peculiar conditions of our very extraordinary summer and also of the trying time for ingathering makes this one condition more imperative than it has been any time for more than half a generation, if not, indeed, since 1868, or a full generation ago.

Early and unsweated samples, if steeped too soon, will give about as safe and satisfactory a guide to the actual malting value of this year's grain as the action of a cargo of Californian would throw light on the quality of Queensland barley.

More than usual caution is needed, for no living man has before seen barley ripened and harvested under similar conditions to those ruling this season. That, at least, is one fact which no intelligent person will venture to contradict, however much he may disagree with any other of the opinions I may express.

The Price Obtained

at market has, however, most unfortunately more to do with the action of growers when determining when to thresh than any other consideration, if not, indeed, all other considerations put together. When a man finds more than one season after another that barleys of inferior value fetch more when rushed on to market early than better barleys realise at a later date, it is only reasonable to find him setting the machine to work at the first chance. Thus we get his samples very early, and in a short time every market will be teeming with samples from not only all such men whose experience of the past few seasons has shown such action to be desirable, but from the much larger class of men also who rarely think or act for themselves, but imitate the action of certain of their shrewder or sharper neighbours.

I have met quite a number of men who have had two lots of barley alike, but still one inferior to the other. The poorer lot has been sold in October for 30s. or 32s.; the better sample has only produced 25s. or 27s. after Christmas. As stated, this is by no means a solitary experience, and in the face of it to tender advice to hold and not rush on early to sell seems strange somewhere.

It is one of those cases where the few benefit at the

Cost of Many.

Every sensible man knows what the effect must be when all rush to sell, and although in the earlier days of such action a lucky few may gain, it works inevitably to the disadvantage of all sellers later on.

There is another aspect of the question which is far too seldom spoken of, but which is yearly growing in the intensity and cruelty of its action. Many good growers have worked out their own capital, and can only keep on with help from the bank. As a fact, many men who are doing well also do not hesitate to employ capital borrowed from bankers. In so fluctuating a business as arable farming it is a sign of sound, shrewd business capacity, or indicates the possession of common sense to do this. As things go one of the first things to turn into cash at Michaelmas is barley; and when rents and nearly all other of the heavier expenses of the year culminate is just the time selected by bank managers to indicate to the customer, by one of the many sweet ways they so well know how to use, that the overdraft has got to be reduced.

They know all about the prime stacks of barley standing in safety, but they also are sure of two things—their value will not be enhanced by longer keeping, and anyway they would like to see the account substantially reduced.

The Sovereigns are Safe;

but there is no telling what barley may fetch here on is how they argue. Perhaps already has shown a tendency to fall, as naturally it must when sellers are more eager than buyers. Then, finally, as most country banks are in close touch with brewers, who commonly run very different accounts to barley growers (a generous one has been the rule of late) the brewers would rather pay a good price for home-grown barley, but be already ready stocked by the season and won't be buying in a little while.

Barclays and Co., of Duke Street, Southwark, and Messrs. WOODLEY, WATNEY AND RICHARDSON, 78 Mark Lane, and Old Change Exchange, London, E.C. (Advt.)

HOPS.

By Lupulin.

Home Notes.

The Borough.

With the holiday season about us, and with the uncertainty which still hangs over the prospects of the coming crop, it is not to be expected that there can be much to record on [illegible] present business. But although the market is necessarily quiet, there is a solid tone about it, which betokens the probability of higher prices when the arrival of new hops in some quantity allows operations to be made that do not now exist. Buyers complain that the chief hindrance to business are the prohibitive figures put by holders on their stock. This may be partially true, but nevertheless business has been done this week at higher rates than have been obtainable at any time within the past six months, and it is my humble opinion that even better values will be forthcoming if holders continue to be firm in the maintenance of their present attitude.

Regarding the New Crop,

I cannot do better than refer to the special reports printed in the present issue, which emanate from responsible and skilled authorities within the last two days. They may therefore be accepted as the most recent intelligence and entirely trustworthy. Other information is of similar character. "Only half a crop," "a very small crop," "not above 6 cwts. per acre," "one third of last year's yield," "far below the crop of last year," "in most cases hops will be small," "much of the burr will not come into hop," "hops in this parish very inferior"—such are the expressions generally used. It being quite exceptional to meet with a grower who can give a fairly satisfactory account of his gardens. The conclusions must be unmistakable, and are tersely expressed by one of our leading factors in their circular of Monday last, which states: "As the crop advances to maturity it is more than evident that it will not reach half of last year." Some progress towards development in the best washed and cultivated grounds has doubtless been made, under the influence of the higher day temperature, but this was checked by the too cold nights, and has been further interfered with by the return of unseasonable weather during the past week. Should this continues present estimates, which have in no case exceeded an average of seven cwts., will be lowered, and I understand that some skilled observers have already brought down their expectations to six cwts., which will not yield a total of over 300,000 cwts. Under these circumstances, and taking into consideration the reduced crops on the Continent and in America, we are justified in anticipating

Considerable Improvement in Prices

when the new market opens. But there are to be found certain pessimists who argue that brewers will not be ready buyers for some time to come, and that, therefore, the trade will be slow, and that the absence of demand will more than counterbalance the deficiency of supply. I have been told that brewers are complaining of slackness of beer consumption, attributing it to the war and other causes. It is undeniable that over 200,000 men, the majority of whom are beer drinkers, have been deported to South Africa, where, by the regulations of the Commander of our forces, they are not consuming [illegible] per day for 160,000 men, the home consumption has been reduced at the rate of about 550 barrels per day, or over 16,000 barrels per month, creating a shortage of probably 150,000 barrels during the [illegible] months now drawing to a close. This is not an important factor in the calculation, but against this must be placed the additional thirst aroused by the [illegible] enthusiasm of the [illegible] population, whose [illegible] at the many [illegible] of the troops, and on the memorable Ladysmith, Kimberley, and Mafeking days, have given [illegible] records, reducing the loss sustained by the absence of the boys at the front. Upon reference also to the Board of Trade returns, I find that our exports of beer during the seven months ending July 31st were 294,630 barrels, exceeding the same period of the previous year by over 7,000 barrels, which is principally accounted for by the additional quantity shipped to South Africa. I am therefore of opinion that there is practically nothing in the alleged [illegible] factors at brewers that should affect our market; that, in fact, the full average [illegible] has been [illegible] during the past year, and that the

All official reports and notices of the National Association of English Hop Growers will be printed in the MARK LANE EXPRESS, *which will also contain all current information likely to be of interest and benefit to the members of the society.*

usual inquiries for new hops will be forthcoming as soon as they are brought to market.

It is as yet impossible to say

What Prices will be Realised

when the new trade opens. In the week corresponding to this one a hundred years ago hops were sold at Worcester at £20 per cwt. It is, of course, too much to expect that history will thus repeat itself in the present year of grace, nor can I anticipate that the expectation of one of my correspondents for £10 will be realised; but growers certainly hold the key to the market door, and I trust they will think twice or thrice before they open it, and that they will make up their minds to be fully remunerated for past losses before they admit buyers into trading association. If I may venture upon advice, let me ask them to consider 1s. per lb. as their minimum, and figures above 1s. as their valuations of better qualities. They deserve such prices this year, and as consumers can well afford to pay them it is only right that growers should demand and obtain them.

Monday Morning.

Reports just to hand state that the shortage of the crop is confirmed by experimental pickings last week in Kent, Sussex, Surrey, and Hereford. Many plantations which look well externally are found within to be diseased to a very serious extent, and hundreds of acres will most likely not be picked. The ravages of red mould and red spider are much more disastrous than was anticipated. The crop throughout Kent is now expected to be exceptionally small. I trust that growers will decide to pick only matured and sound hops, and thus save the character of the crop from depreciation, which can only result in hindering the legitimate advance in value that is fully justified by present circumstances.

Plantation Reports.

SPECIAL TO SECRETARY, N.A.E.H.

EAST SUTTON AND SUTTON VALENCE.—Hops in these parishes will be very short crop, there having been much damage by wind and vermin. With genial weather the quality should be good. Picking will be late.

WYE AND BOUGHTON ALUPH.—There are one or two fine pieces of hops which were well sheltered, and will produce about two-thirds of last year. There are several more may grow from a third to half of last year, and a few pieces badly blighted, and now struck with mould. The best quality will be where there is the greatest quantity.

TEYNHAM.—Slight showers have caused hops to develope well, so that prospects have further improved; there are for the year some excellent gardens here. I estimate the yield at two-thirds of last year.

FAVERSHAM.—Short crop, about 8 to 10cwt. per acre, probably the latter, good quality.

BIDDENDEN.—The hops in this parish will only grow 4 to 5cwt. per acre, the quality will entirely depend on the weather we are going to have. We have no mould to speak of.

GOUDHURST.—The crop cannot reach more than half the quantity that was grown last year. The persistent blight and heavy gales have left their marks in many gardens. There is general complaint that many of the hops do not develope kindly, while mould is still troublesome.

SISSINGHURST. Hops in this neighbourhood very uneven. Quality likely to be good, but decidedly less than half last year's crop.

RYE.—There is considerable improvement visible in the gardens round here. The favourable weather has brought the unbruised hops out well. Near Cadborough there are some good looking pieces, and at Peasmarsh two gardens are in excellent form. Exposed gardens have suffered severely from the gales, and in some places hardly a hop is to be found on the poles.

FRANT.—This parish will grow about a third of last year's crop, and by present appearances should develop well and make first-class samples. There is little mould. The Sussex crop generally must be very short of average.

HEADLEY (HANTS).—Our hops have improved lately, but the prospect of the crop is still very disappointing. The yield will be very short, not over 3cwt. to 4cwt. per acre, although I hope the quality will be generally pretty good.

PETERSFIELD.—The hops in this neighbourhood have improved a good deal the last few days where they have been well washed and thoroughly cultivated, but unwashed or partially washed pieces will only grow a very small crop, some hardly worth picking. Under the most favourable circumstances one half the crop of last year can hardly be expected.

BENTLEY, FARNHAM.—Hops have improved with a week of hot sun. Half an average crop will be grown of good quality unless this second wet and windy weather should continue.

[illegible] (SURREY).—Hops have suffered from the weather, and the outlook for the crop in this district does not exceed one-third of last year.

MUCH COWARNE (HEREFORD).—We are not expected to grow more than two-fifths of last year's crop. The quality promises to be very good. No disease to speak of at present. In the neglected yards hardly any hops will be grown. Picking will commence about September 6th.

TARRINGTON (HEREFORD).—Hops in this parish vary as much as anywhere, from 1 to 14 cwt. per acre. This change to wet and cold weather is greatly against them. Hardly any disease at present. Commence picking about September 11th. On the whole the crop will be less than half of last year.

LEDBURY.—I have not seen hops so bad since 1890. Where there is any bine, on looking into the yards the effects of blight and washing are to be seen. I have not met with a dozen yards that are really good, and many are not worth picking. If Kent can show no better results, hops should be worth at least £10 per cwt., and we could rule the market if growers would stand for good prices.

SUCKLEY (WORCESTER).—Since my last report we have had two unusually severe gales, sweeping away not less than 2 cwt. an acre from all the best-grown hops. I do not think under most favourable circumstances the crop can much exceed half that of last year. What hops there are are now doing well, and with fair weather should be excellent quality, as I believe they are almost free from disease of any kind.

Foreign Notes.

Nuremberg.

Pending the arrival of new hops, this market has assumed a quieter tone, and for the limited business that has been done somewhat easier prices have been accepted by holders of medium and low qualities, which they are now desirous to clear out. The few better parcels that are in hand are, however, still quoted at recent rates, and for such grades values are firm. Some early deliveries of the new growth have been readily sold at prices ranging from 115s. to 125s., and small special lots have realised 135s. first cost.

Recent Plantation Reports

may be summarised as follows:—Spatt will produce a little more than last year. Neustadt crop will about equal last year. Hersbruck, Hallertau, Kinding, Tettnang, Rottenburg, and Baden are estimated at a lower quantity than last year, the deficiency in Hallertau district being reckoned at one-fourth to one-third.

The Austrian crop, taken as a whole, promises to be fairly satisfactory, but the reverse may be stated of the probable results throughout Bavaria.

The total output of this section of the European continent may therefore be safely taken as likely to come substantially short of the yield of 1899.

Burgundy.

The plantations have suffered from excessive heat and want of rain, and being for the greater part old and poorly cultivated, they are not in a condition to withstand the effects of a high temperature following a period of cold weather. The plant is therefore making little progress, and is generally weakly. In order to improve the prospect, rain is urgently needed, as the present position is rapidly assuming a critical phase. The yield in any case must be small, and buyers are demonstrating their sense of the probable value of the product by advancing their offers to 100 or 110 francs, which growers are slow to accept.

Belgium.

The improved weather is benefiting the plantations, although the recovery from recent hindrances is comparatively slow. Throughout Poperinghe the white bines are showing hops, and in Alost the plants are everywhere in burr. Taking a general survey of the probabilities of the new crop, it is now admitted that it can hardly amount to half of the yield of last year. Buyers of Alost 8 marks new growth are offering 87½ to 90 francs, but growers are very reserved. It is expected that higher prices will be realised when the crop is brought to market.

America.

Business at New York is chiefly confined to the completion of old contracts, very little new trade being done, buyers waiting for the development of the new crop, now so near at hand. Small sample parcels of 1900 growth have been received, of which the quality was choice, giving promise of a crop of excellent character. In the meantime values remain unchanged and firm, with a distinct inclination towards higher figures.

Reports from the Country

are somewhat limited this week, but I hear that conservative estimates of the Otsego (N.Y.) crop, make it at least one-third less than the yield of last season. But though the quantity will be short, the quality promises to be superior, the yards having been practically free from lice and mould during the greater part of the period of growth.

In Yakima, co. Washington, the situation is reported to be encouraging, the crop being in good form, well advanced, with contracts being made at prices satisfactory to growers.

In some sections of Oregon farmers are busy spraying to check a rather severe attack of lice.

Estimates of the Total Crop

are now being freely circulated. In a private letter from New York just to hand, my correspondent says that the sum of the deficiency from last year may probably amount to 50,000 bales, but he is careful to add that as yet there is not much reliable data on which to base a correct calculation. From another source I hear that the Pacific Coast yield will certainly be 10,000 to 20,000 bales below that of 1899, and that New York will be short by 20,000 bales. A careful estimator, whose experience claims respect, states in a letter shown to me yesterday, that although there is little doubt that the American crop will be short of last year's total, the deficiency will not be so marked as has been declared. After careful observation, he concludes that from 10,000 to 20,000 bales will probably represent the shortage, and I am inclined to confirm this estimate until I am furnished with more exact information than is at present available.

The Consumption of Beer

in the U.S.A. appears to be steadily increasing, as the official returns of internal revenue from fermented liquors during June last show a total increment of over 120,000 dollars when compared with the corresponding month of 1899, and this additional revenue is derived from the barrel tax, by which the output of beer is measured. This fact suggests an improved demand for new hops, which, with the estimated deficiency in the crop, should certainly harden the market, and bring prices up to a point which will necessarily limit exportation.

(*For Hop Market Reports, see pages* 271, 273.)

MILLING.

Economy in Transmitting Power About the Mill.

The return of the bad weather which marked the early days of August, bodes ill for the miller as well as the farmer. It is true that a great deal of the crop has been harvested in the South, and that some very fair samples have been put upon the market; but the bulk is in soft condition, and will require special preparation before being milled. Samples vary very much, but none, or hardly any, are equal to the quality of the past two years, while others show signs of incipient growth, and are not desirable at any price. If the showers and damp weather continue, it is certain that a good deal of the crop will contain sprouted grains. Samples of this kind are hopeless, and millers will do best to let them alone altogether. If the wheat is merely damp, either by being imperfectly developed, or by having been threshed in damp weather, it can be brought into fair milling condition by passing it through good dryers, leaving the heat to do a portion, at any rate, of that which the absence of sunlight has left undone. Every miller who handles home-grown wheat should possess one of these handy appliances, which, owing to the uncertainty of harvests in this country, will pay for itself in the saving of power and the enlarged yield in a very short time.

British millers are learning more than ever

The Value of Conditioning,

in some way, all kinds of wheat before subjecting them to the process of breaking down. The application of water, in more or less quantity, according to the nature of the wheat, and of heat, at various temperatures, has, during the past few years, almost revolutionised the milling of wheat. In the case of unripe, or at any rate undeveloped, wheat, such as is sure to be much in evidence after the present harvest, only heat is required, and this if applied at the right temperature and under certain conditions, will develop the gluten and alter the nature of the berry. Speaking generally the produce of this year will weigh from two to four lbs. less per imperial bushel than that of last, and this is a serious consideration for the miller when he comes to calculate his flour yield. There is very little old wheat left, but where it can be obtained millers are willing to pay two or three shillings a quarter more for it than they will give for the new.

The trade in flour is very dull, with a downward tendency in spite of the uncertain weather. On the other hand, offals are very brisk, and in some parts bran is making 5s. per ton more money than a week or ten days ago. It is rather hard to account for this in August, especially when the grass is flourishing and the root crops are so good. It may be that many persons, anticipating a scarcity in colder weather, are stocking it. But whatever the cause, the sale of offals still pays better than anything else.

A Potent Factor in Profit-Earning.

Noticing the effects of grinding ill-conditioned wheat, and the extra power required for the operation, leads one to consider the question of the economising of power in a general way throughout the mill. It is not only necessary to look closely into the economy of the prime motor, especially if it be a steam engine, but the thoughtfulness and care of the miller must go further than that. He may have the best and most up-to-date of engines and the most economic of boilers, both being fitted with all power-saving appliances, but that is not enough. To begin well is not sufficient; the economic transmission of power throughout the mill is equally important and necessary.

Many millers do not in the slightest degree realise what a potent factor in profit-making the saving of power is; and especially at the present time, with coal at such high prices, it is necessary to reduce the cost of making flour to its lowest point consis-

tent with the purity of the product. How often does one see badly designed, badly lubricated shafting, and not only this, but shafting of much larger diameter (and so costing more power to rotate) than is necessary to do the work. Any power consumed by shafting beyond that which is necessary to overcome friction is so much waste. Everyone knows that shafting, to say nothing of the machines which it drives, must take up a certain amount of power owing to the friction in the bearings, and to some extent owing to the resistance of the air to the pulleys. But in

Well-designed Shafting

this should only be little. The diameter necessary is easily calculated, but that is more the work of the engineer than of the miller, and, given shafting of necessary strength and perfectly aligned, another point must be considered, and that is the correct distance between the bearings which support it. Tables of distances are given in most manuals on the subject, and in cases where all these points as to diameter of shafting, distance between bearings, and adequate couplings, etc., are considered, it is almost incredible what may be saved in the cost of fuel in the course of a year.

Other points, too, in the saving of power, and so cost, can be raised in connection with the rigidity of machines, the driving of the same either by belts or gear wheels, the correct adjustment of all bearings, and the careful lubrication of the same. The supply of oil for the latter should be just sufficient; an over supply, which soon becomes dirty and clogged, is almost as bad as an insufficient one. Like everything else in a flour mill, there is a point in lubrication which will give more satisfactory results than any other. Of course, in the case of automatic lubrication, where the dirty oil is either filtered before again going its round, or collected for filtration, the most satisfactory results are obtained. But all millers are not blessed with self-lubricating engines and machines.

Slipping Belts.

The battle between belts and gears was fought out long ago, and now in most cases the latter are preferred. Both, however, have their advantages and disadvantages—if gears consume more power and are noisy, belts are apt to slip unless provision is made against this difficulty by skilfully adjusting them as to tightness and covering pulleys with brown paper or some substance which has more holding power than a smooth surface. As a loser of power, however, the slipping belt can be cured—enlarge the pulleys and increase the speed or replace it with a wider one. The latter is the cheaper, and gives the least trouble where it can be done. It is easy to see that the travelling velocity of the belt is increased by increasing the size of the pulley; in other words, its power-transmitting capacity is increased, and this is the reason why it is not so liable to slip. Where gears are necessary, those with double-helical teeth are to be preferred, as they are not nearly so noisy as ordinary gear wheels, and cost little or no more. From what has been said it will be understood what an important matter the saving of power is. As yet, only the borders of the subject have been touched, however, but in future articles the economy of power transmission will be further considered.

MILLER-FARMER.

Irish Agricultural Statistics for 1900.

The annual general abstracts of agricultural statistics for Ireland, which give, by counties and provinces, the acreage under crops and the number and description of live stock in Ireland in 1900, have just been published. The materials necessary for the compilation of these statistics were obtained by members of the Royal Irish Constabulary and Metropolitan Police, who discharged this important duty with zeal and efficiency. It is as follows:—

Division of Land.

The total area under crops in 1900 is 4,658,627 acres, being, as compared with the area in 1899, an increase of 31,082 acres, or 0.7 per cent. There was an increase in the area under crops in Munster of 16,957 acres, or 1.4 per cent.; in Ulster, of 10,911 acres, or 0.7 per cent.; in Connaught, of 2,409 acres, or 0.4 per cent.; and in Leinster, of 805 acres, or 0.1 per cent.

In 1899 the area returned under grass was 10,575,012 acres; in 1900 the amount returned is 10,557,745 acres, being a decrease of 17,267 acres; the area returned as fallow in 1899 was 13,086 acres, and in 1900, 12,645 acres; the area under woods and plantations was 308,495 acres in 1899, and 311,863 acres in 1900; and the area returned under "Turf Bog, Marsh, Barren, Mountain Land, etc.," was 4,809,206 acres in 1899, and 4,792,464 acres in 1900, being a decrease of 16,742 acres; of the area thus returned in 1900, 1,187,208 acres have been entered by the enumerators as turf bog, 390,302 acres as marsh, and 2,235,539 acres as barren mountain land.

Total Area under Crops.

CEREAL CROPS.—Compared with 1899 there appears an increase of 1,931 acres in the area under wheat; a decrease of 30,688 acres under oats; an increase of 4,557 acres under barley; a decrease of 734 acres under bere and rye, and an increase of 324 acres under beans and pease; showing a net decrease of 24,630 acres in the area under cereal crops.

GREEN CROPS.—The area under potatoes has decreased by 8,501 acres; that under turnips by 3,554 acres; and vetches and rape by 385 acres; mangold wurzel has increased by 6,124 acres; cabbage by 1,229 acres; and carrots, parsnips, and other green crops by 1,917 acres, leaving a net decrease of 3,170 acres in the area under green crops.

FLAX.—The area under flax in 1899 was 34,989 acres; the area returned under this crop in 1900 is 47,327 acres, being an increase of 12,338 acres, or 35.3 per cent.

In the returns the area under meadow and clover is shown as the area "for hay only," subdivided under the headings "clover, sainfoin, and grasses under rotation" and "permanent pasture, or grass not broken up in rotation." The area for hay under "clover, etc.," in 1899, was 624,163 acres; this year it is 607,367 acres, being a decrease of 16,796 acres. The area for hay on permanent pasture in 1899 was 1,494,744 acres, and in 1900 it is 1,558,084 acres, showing an increase of 63,340 acres. There is, therefore, an increase of 46,544 acres in the total area under meadow and clover.

The following table shows the area under the several crops in each year from 1896 to 1900, inclusive:—

CROPS.	1896.	1897.	1898.	1899.	1900.
	Acres.	Acres.	Acres.	Acres.	Acres.
Wheat	38,019	47,235	52,708	54,866	53,797
Oats	1,103,581	1,175,118	1,165,359	1,135,536	1,104,848
Barley	173,032	170,504	138,012	160,169	174,006
Bere and Rye	14,098	13,296	12,538	12,322	11,588
Beans and Pease	2,090	1,817	2,247	2,415	2,739
Potatoes	705,605	677,216	664,864	662,914	654,413
Turnips	303,471	308,966	306,929	301,449	297,895
Mangel Wurzel and Beet Root	54,301	54,649	55,355	61,711	67,835
Cabbage	44,198	40,597	44,285	41,071	42,300
Vetches and Rape	10,314	9,945	8,254	7,933	7,553
Carrots, Parsnips, and other Green Crops	24,774	24,074	23,880	25,355	27,272
Flax	72,262	45,537	34,469	34,989	47,327
Clover, Sainfoin, and Grasses under Rotation (Meadow)	655,071	637,128	652,040	624,163	607,367
Permanent Pasture, or Grass not broken up in Rotation (Meadow)	1,547,353	1,599,014	1,522,149	1,494,744	1,558,084
Total Area under Crops	4,803,220	4,759,600	4,704,560	4,625,545	4,658,627

Returns of Live Stock.

It appears from the following Table that between 1899 and 1900 there has been a decrease of 12,774 in the number of horses and mules. The mules increased by 548, but horses show a decrease of 13,322. Cattle, on the other hand, exhibit an increase of 100,826, sheep an increase of 22,190, while there has been a decrease of 53,350 in the number of pigs. Of the live stock returned in 1901, 1,000,000 were turkeys, 2,007,673 were geese, 3,027,040 were [illegible] and 12,505,147 were [illegible] fowl.

Table showing the number of live stock in each year from 1891 to 1900, inclusive:—

YEARS.	Horses and Mules	Asses	Cattle	Sheep	Pigs	Goats
1891	624,179	216,401	4,812,501	3,856,241	1,237,761	36,778
1892	633,213	217,491	4,818,126	3,911,779	1,267,111	36,778
1893	643,129	218,779	4,844,124	3,994,112	1,284,854	36,778
1894	652,530	224,344	4,886,145	4,014,477	1,288,388	36,778
1895	660,445	230,153	4,939,153	4,030,183	1,290,183	36,778
1896	670,153	236,180	4,986,220	4,038,220	1,290,183	36,778
1897	680,453	237,157	5,043,220	4,044,441	1,290,183	36,778
1898	686,441	240,236	5,087,220	4,060,441	1,290,183	36,778
1899	690,641	242,236	5,087,220	4,060,441	1,290,183	36,778
1900	677,319	242,236	5,188,046	4,082,631	1,236,833	36,778
Decrease in Numbers between 1899 and 1900	13,322	—	Increase 100,826	Increase 22,190	Decrease 53,350	—

Scutching Mills.

In conection with the area under flax, it is stated that the number of scutching mills entered in 1900 is as follows:—In the province of Ulster, 805; Leinster, 11; Munster, 4; and Connaught, 6; making a total of 826 for Ireland.

Agricultural Imports.

The following is an account showing the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week ended August 18, 1900, together with the quantities imported in the corresponding week of the previous year:—

	1899.	1900.		1899.	1900.

* Great Hundreds.
† Included with other Fruit previously [illegible].
‡ Entered by the Bushel prior to 1900.
§ Included with Other Vegetable [illegible].

The Palestine Wine and Trading Company, Ltd., of 11, Bevis Marks, London, E.C., inform us that the Jewish Colonies in Palestine have obtained at the Paris Universal Exhibition of 1900 a gold medal for their wines and grape brandy, and a silver medal for fruit trees and fruits.

Adulterated Milk. William [illegible], farmer, of Semple Cleeves, Winsford, Hants, and Annie Edwards, trading as Edwards Bros., of 59, Grafton Street, Kentish Town, were summoned, at Messrs. Petty Petty Court, on Thursday, for having sold adulterated milk, on the 31st July. The former was fined 10 per cent. of added water, and the second to the extent of 10 per cent. Mr. [illegible] Hopkins £10, with £2 2s. costs, and Edwards £5, with £1 3s. costs.

FARM PROSPECTS.

Carmarthen.

The weather is again causing great anxiety here. The abundant hay crops have been successfully harvested and gathered in excellent condition, but the heat was almost unbearable to work in then, and they were got in cheaply. The expense is not as great as with fickle weather. Our attention was drawn hopefully to the fine fields of corn, but the storms of wind and rain have altered the appearance of them woefully. The promising crops are all beaten down in such a shocking manner that the harvesting will be rendered more difficult and expensive than usual, owing to the unfortunate twisting and flattening which the corn has received. The oldest inhabitants do not remember

Such a Devastation

caused by a midsummer hurricane as we have just had, which is so unusual at this time of year. It was thought that corn would not be ripe so early this year, but, owing to the effects of the heat wave, corn has ripened very fast, and, but for the wet, windy weather of the last fortnight, most of it would have been cut. The weather continues very showery, and crops are ripe, waiting to be cut, and farmers are anxiously looking for prospects of finer weather. As the labour question is such a perplexing one, men cannot be got, and many farmers will have to

Work Hard Amongst Themselves

and families to secure their crops. In exposed places the ground was strewn with unripe apples and plums, which were more than usually promising this year. The present showery weather suits our green crops, and they are looking very promising. Since the storms and thunder we have had, the potatoes are very much

Affected with Disease,

and are getting worse every day. They appeared an excellent, healthy crop a month ago. With the present good crop of grass, store cattle continue to sell well at our fairs. Horses are in great request. Sheep and pigs are advancing in price.—D. P. (August 23rd).

Cornwall.

In the Wadebridge district we are having a very wet and stormy time for the harvest, the corn is beaten down badly, so that but little can be cut with the self-binding reaper, and most of it has to be cut by scythes or by the self-raking reaper going one way. This makes slow work, and I hope we shall have better weather soon to secure the crops. Wheat is a fine crop of straw, but the grain is small and deficient, so that it will be below an average crop. Barley is a heavy crop, but much damaged. Oats are a heavy crop of grain and straw, but much damaged by the weather, and it is difficult to say what the return will be. Mangolds are a good crop. Swedes and turnips are backward, but growing fast, and promise to be a full crop. Grass is plentiful, and live stock generally are doing well. There is a good demand for beef and lambs, but mutton does not sell so well. Store ewes are not so high as might be expected, but may sell better next month. Wool is very low, only 4½d. per lb. for unwashed Longwool.—R. S. O. (August 22nd).

Derbyshire.

The weather is exceedingly wet and bad for the corn harvest. All the oats are cut and nearly all the wheat, both of which were very badly down. Many crops have had to be cut with the scythe. All root crops are doing fairly well, but seem short of heat. There is abundance of grass and milk cows keep up the supplies fairly well. Sheep seem to be doing fairly well, but badly troubled with foot-rot. Clover leys are being broken up for wheat, but the wet weather keeps them very green. The young clover roots seem remarkably even and full of roots. Labour continues to be very scarce and dear, good men being exceedingly hard to get. Mushrooms are very plentiful, but of a large kind; very few small ones to be got. The fruit crop is abundant.—C. C. M. (August 25th).

Hunts.

This last has not been an ideal harvest week by any means. It commenced and on Monday a considerable amount of corn was carted, perhaps not so much as would have been had it not appeared as though fine weather had at last set in. Early on Tuesday some rain fell. A few farmers carted wheat which will not be fit to thresh until the March winds have blown through the stacks. Wednesday and Thursday were showery locally. On Friday, about 4 p.m., a sharp thunderstorm visited St. Ives. To-day has been fine but dull and threatening, a slight shower falling about 8.15 p.m. Complaints of a short yield of wheat are general amongst the few farmers who have threshed. Crops go into small bulk.—S. S. (August 25th).

Leicester.

In the northern part of the county we have still a few bits of hay out. The harvest is now half cut. I have been over a large area of ground, and not seen a wheat crop that I can estimate at 5qr. to the acre; we have some not over 2qr., the average will be under 3½qr. Oats the worst crop we have had for several years. I have not seen one field that I can estimate at 6qr. per acre; several fields

Cannot Meet the Labour Expenses;

a few would be better with the filth consumed to ashes on the spot. Barleys just a little pretty crop. Wireworm and the grub have made great destruction in many crops, oats have been nearly destroyed by them in some fields. Roots will be a fairly good crop. Pastures good, much improved by the late rains, best beef making 8s. per stone down to 6s. according to quality. Mutton from 6d. to 8d. per lb. —W. C. (August 23rd).

Mid-Essex.

Harvest is now in full swing, and a good bit of corn is being carted. Wheat will be a much lighter crop than last year. Barley will be about the same, but the quality will scarcely be as good, but much depends now upon the weather. Beans are a bad crop generally, although there are a few good pieces. Peas are a fair crop. Fruit is abundant this year, especially plums and greengages. Apples are also a fairly good crop. The rains have very considerably improved sheep feed, which make sheep and lambs hard in price as a consequence. At places lambs are doing bad, and some dying. Red clover seed bids fair to be scarce; the clovers are heading out very badly, especially where cut once for hay. Men at places are not so scarce as last year, and with a decrease in the building trade labour should not be so scarce in future. There seems to be a good average sprinkling of partridges and pheasants, although some of the coveys are small.—(August 21st).

North Lincolnshire.

A very small number of people attended the market at Brigg yesterday, the harvest keeping them at home. Those who were there had a very despondING tone, as the wet was daily spoiling their crops; if not actually sprouted, yet the colour and freshness of all the samples of both barley and oats are entirely gone. A splendid sample of new white oats I expected to thresh has depreciated according to the dealers' views 3s. per quarter. Of course, I cannot thresh them now. I and my neighbours are still without stacks, but a commencement is just being made. I will not mention "sparrows"—the word irritates me.

I am generally wrong in my conclusions, but if I mistake not, potato disease will be most rampant this season. Many people have sprayed a few acres, but I doubt the good of it this season. Potatoes will be small, as the haulms will die prematurely, and thus stop growth.—North Lindsey (August 24th).

Salop.

Rain in the night has stopped harvesting again. It gives little promise of fine weather, although there is a lot of corn out yet. Farmers have been very busy every opportunity, carrying all that was dry and saving it in the stacks. May we hope for wind and sun again to finish all up. Fields are green, but a full bite of grass is only on the richest ground. The orchard trees bend under the weight of fruit, and stocks are healthy and well.—J. G. (August 24th).

Worcestershire.

A fortnight of nice harvest weather from August 7th to 21st gave an opportunity for cutting nearly all corn crops, but very little is carried, and now the weather is very wet and unsettled again. Wheat has cut up to a nice crop, probably 30 to 33 bushels per acre. Barley is very light, and, as a rule, of poor quality; does not appear to be more than four quarters per acre. Oats are barely an average, crop about five quarters per acre. Beans light; few grown. Peas not more than two-thirds of a crop, mostly gathered green for market. Hay about an average crop, and for the most part well ended. Mangolds looking well. Swedes and turnips nearly spoilt by fly and for want of moisture in early stage. What with difficulties in harvesting, increasing expenses, and low prices of all farm produce, prospects are anything but bright.—R. B. (Aug. 24th).

Yorkshire.

Since writing my last report two months ago, I cannot say that there has been in the West Riding any material increase in agricultural prospects. The chief matter to note is the great improvement in the prospect of the turnip and root crop, and this has been brought about by the abundance of rain we have had during the last three weeks in this district. We now look like having a fair crop of roots, although the crops that have been thinned by the turnip fly cannot possibly be full ones; still there are a many others that have plenty of plant, and now look very well. The rains that we have had latterly came too late to be of service to the corn crops, and have instead damaged them to a considerable extent by knocking them down very much, thereby making them more difficult to cut, and also through lack of sunshine when ripening causing them to be rather a bad colour; and whenever corn is a bad colour it does not yield well. We have had more than sufficient rain for the present, and now require two or three weeks of fine weather, when all the corn in this district will be gathered in. Grass has very much improved latterly, and there is now a prospect of plenty of winter keep.—A. M. (August 23rd).

North Yorkshire.

is quite ready, is being delayed on account of the excessive rainfall. Thunderstorms succeed each other with wonderful regularity, and no sooner do binders get to work than they are stopped again. The corn is very much laid and twisted on account of the hurricane of rain and wind early in the month, and dry weather is urgently needed. Without it the sample will not be up to the average. The harvest prospects before the storm were fairly good—almost, but not quite, an average—but now there will be a

Deficiency Both in Quantity and Quality.

Root crops have done well of late, and there will be a fair crop of turnips. Many farmers are substituting mangolds for a portion of the latter crop. The land seems to have grown turnips so often that it is tired of them. Potatoes are looking well; there is a lot of disease in gardens, but it is too early to speak of the fields. I was pleased to read your leader on

Swine Fever.

Just on the borders of Durham and Yorkshire we are sadly plagued by vexatious and utterly useless restrictions, imposed by men who are absolutely ignorant of agriculture and its requirements. Twenty years ago Darlington market was the best pig market in this district, but there is no market at all there now. A covered pig market was erected by the Corporation, but it is doubtful if a single pig has been in it the last three or four years. This market, at which large sums of money would have been spent weekly, has been killed, not by swine fever, for there has never been more than an odd case in the neighbourhood, but by senseless restrictions. The Durham County Council is responsible for it. I trust you will continue your crusade against the present methods of dealing with swine fever.—W. P. (August 24th).

Foreign Prospects.

France.—The wheat crop is reported to be turning out irregularly, the intense heat having scorched the plants in central and western districts. Barley in some instances is disappointing, but oats are all the better for recent showers. Business at Paris and other markets remains inactive, millers and dealers waiting for the flow of new grain which cannot be much longer delayed.

Belgium.—The wheat crop is carried in some provinces, but a good deal is still in the fields, the yield is over an average, while barley and oats give moderate satisfaction, but harvest is not yet finished. Potatoes and beets are full of promise.

Holland.—After some days of fine, dry, and warm weather, heavy thunderstorms and rainfalls were experienced, which have done much harm. During last week farmers were eagerly engaged in housing their crops, and but little is now left outstanding.

Germany.—The harvesting of wheat has progressed under favourable conditions, and the yield promises results fully equal to anticipations, particularly in the province of Saxony, which our correspondent describes as "the wheat granary of Berlin."

Hungary.—Rain has interfered with threshing, but potatoes are doing well. Beyond the satisfaction of immediate requirements there is not much doing in the wheat market of Budapest, yesterday's report coming quiet, steady.

Austria.—According to official report all the crops have been carried in good condition. The quality of the rye is unsatisfactory, and the yield in Bohemia, Moravia, Silesia, and Galicia amounts to only one-third of last year's. Wheat is mostly of good quality, only a little indifferent in the eastern provinces. The ingathering of the barley was delayed by rain, and Galicia and Bukovina show a material deficit.

Italy.—The wheat crop in the whole peninsula is estimated at 15,650,000 qrs. or 1,720,000 qrs. less than last year's. Maize promises a very abundant yield.

Roumania.—Harvesting was effected with favourable weather, being only in a few localities interrupted by a little rain, which benefited maize. Wheat in the aggregate gives a good medium and has not suffered from "rust." The natural weight of wheat is between 59½lb. and 63½lb. per bushel, and rye 55½lb. to 58lb. per bushel. Barley is a poorer crop, only the Autumn sown being good. The oat crop is irregular.

Bulgaria.—Threshings are not yet effected owing to the delay in the collection of the tithe dues, so that the bulk of the crops are almost everywhere exposed to weather influences. Respecting the wheat yield it may with certainty be accepted that it will make amends both in quality and quantity for the deficient harvests of the last three years. Prospects for the maize crop are excellent in the whole north-east, but the great heat may have affected the fields in some localities.

Russia.—Advices as to crop results are conflicting, but, taken altogether, they do not bear out the earlier promise of a large wheat crop. Supplies come for-

ward very slowly, and none of the Black Sea or Azov port markets display activity.

UNITED STATES.—The *Cincinnati Price Current* published on Thursday says maize has improved in some sections, but conditions are lower in Kansas and in a few localities elsewhere. The average position, however, is not much changed. Some curtailment in the winter wheat movement is indicated, but the estimates of the wheat yield are unchanged.

INDIA.—The latest news points to considerable amelioration of the agricultural position and improved food crop prospects. In Madras Presidency the copious rains have caused heavy floods and considerable damage to railways and crops, and several people were drowned.

ARGENTINA.—To-day's cables from Buenos Ayres say that complaints of too much rain are received from the agricultural districts.—*Dornbusch.*

Harvest Notes.

(*From Various Journals.*)

The *Agricultural Gazette* gives to-day the last set of the harvest reports with which its correspondents have obliged it during the last five weeks, representing all the English counties and the greater portions of Wales, Scotland, and Ireland. It says: "For the whole kingdom, so fas as can be judged from the reports, there is no doubt that the wheat crop is below the standard, but not much below, because the proportion of very unfavourable reports is nearly as small as that of over-average estimates. Of the white-straw crops barley is decidedly the best, and this appears to be the case in all the main districts of England, though oats are nearly as well estimated in some parts of the northern counties of England, as well as in Wales and Scotland. In short, oats are nearly or quite as good as barley in the parts of the kingdom which suffered least, or not at all, from the hot drought. . . . The complaints of smut in this crop are exceptionally numerous. We have rarely had a more favourable set of reports on the pulse crops. Beans vary a good deal, but appear to be surprisingly good on the whole, considering the character of the season. . . . Peas, however, are generally much better than beans, and we are not certain that they should not be placed above even barley as the corn crop of the season, although many pieces on sharp soils died off too quickly, so that the grain will be small. . . . In spite of gappiness, the potatoe crop has turned out a bulky one in all divisions of the kingdom; but we fear that disease has spread widely since the earlier of our reports were written. For this reason the main crop is likely to prove less satisfactory than the early division. . . . The turnip crop, which was in a very bad way at one time, now promises to be well up to the mark, though there are great variations. The mangold crop is one of the best grown for some years. . . . With respect to the quality of the crops, it is to be expected that wheat will turn out somewhat small in berry, and not heavy, while the proportion of tail in it is likely to be large. Barley will vary greatly, and we hear of some very good malting samples; but we fear that these will not be nearly as common as they were last year, because the season has not been favourable to the formation of a delicate skin, while the lodging of a large proportion of the crop is against a full body and a good colour. Oats, it is to be feared, will be light to a great extent, while peas and beans on soils that suffered from drought must be small. The quality of early and second-early potatoes has proved excellent, but disease and possibly super-tuberation are likely to tell against the main crop, while scab is too common in some places. Hay for the most part was got up in capital order, but was too woody when the crop was cut, and contains too small a proportion of the finer grasses and clovers to be first-rate. Roots, if we have occasional rains, should be well up to the mark in quality. Taking all classes of crops into account, including potatoes and roots, the harvest of 1900 may be classed as a passable one, but not a good one. . . . The corn harvest alone must be regarded as a little below average."

Harvest operations in Berkshire, which had been in full swing since the beginning of the month, received a severe check last week in consequence of the heavy rains which thoroughly drenched the sheaves and temporarily stopped carrying and rick building. The condition of the wheat shown at Newbury market on Thursday was less satisfactory than was expected, and did not compare favourably with last year's parcels. The top figure realised was 31s. per quarter, whereas old wheat fetched 33s. per quarter.

Although farmers in South Bucks are experiencing great difficulty in harvesting their crops on account of the dearth of labourers, it was reported at a meeting of the High Wycombe Board of Guardians that the casual wards at the Union house were abnormally full. The Master said that a few nights ago there were so many tramps admitted that he was obliged to have them bedded down on the floor, and he gave his whole attention to them, and saw that they performed the customary task before quitting the institution the next morning. The Chairman and other Guardians deplored the fact that such men, who were able-bodied, should be allowed to lazily roam about the country when there was plenty of work for them to do in agricultural and other pursuits. The Master said that as a rule the tramping fraternity were so lazy that they were not worth a farthing per week to the farmers of the district.

In direct contrast to the above county, Lincolnshire has too many harvest men, owing to an influx from Ireland, and in the Spalding district harvest wages have gone down. It is thought that never in the history of the county has so much corn been cut and tied and stacked in a week as this year. This is, in some measure, due to the increasing use which is being made of harvesting machinery; but the result to the harvest labourer is that he will not be able to earn nearly so much money as usual. In one district this falling off is put at nearly one half.

Sunday harvesting was witnessed at Tydd St. Mary, in the south of Lincolnshire, on the 19th inst. A local farmer, part of whose crop had been damaged by heavy rains, determined to run no further risks, and, accordingly, was leading the corn from morn till night. Eight shillings a day, with beer and food, was paid for the labour.

The poor law authorities of Maidstone, the centre of the great Kentish hop-growing district, have caused notices to be extensively posted in the poor districts of Lambeth and Southwark respecting poor law relief to casuals. The notice commences by stating that from now till September 15th no person will be admitted into the casual wards of the Maidstone Union without an order. Any person applying for admission twice or more times within a period of four weeks from the date of his or her previous admission will be treated as an ordinary casual, and will not be entitled to take his or her discharge until the fourth day after admission, and will have to perform the task of work prescribed for casual paupers by Act of Parliament. The guardians advise that no one should come into the district for hop-picking unless he or she has certain work to come to, and has been engaged beforehand.

There is such an abundance of fruit in Lincolnshire this year that growers are experiencing the greatest difficulty in getting rid of their supplies. Gooseberries have been selling as low as threepence per stone, and apples are now beginning to glut the markets. In many cases the sales have not realised sufficient to pay the cost of carriage, and stones of fruit have been returned as unsaleable. Some growers are said to have given unsold lots away rather than be saddled with the expense of carriage home. Plums are a record crop this year, and, when ripe, it is feared that, from a marketing point of view, they will be almost worthless.

The condition of the crops in Surrey is, on the whole, satisfactory to the farmer. In the Guildford district, wheat, barley, oats, and peas are below the average, and the hay crop upon the dry meadows has been light, though in the low-lying meadows it has been very good. Potatoes are not expected to be a very good crop. The oats crop is the lightest for many years.

The reaping machines are in the harvest field all over Lancashire and on very many farms the crops are in the hattock. The labour question has become so serious that arable farmers have been compelled to spend larger sums than they have done for years in labour-saving implements and machinery. The condition of the cereal crops varies considerably, but the fruit crops all round are most promising.

The rumour that the main crop of English potatoes may be spoiled by blight appears to be unfounded. A contemporary has taken the trouble to collect information from some counties where the potato is raised in considerable quantity, and the result of the enquiries may be summarised as follows: In Lincolnshire the potatoes are turning out remarkably clean. In Cambridgeshire adverse climatic conditions may somewhat affect the crop, but there is nothing wrong to date. In Essex the crop is never an extensive one, but, with few exceptions, it is this year practically free from disease, although in a few neighbourhoods the early varieties have been affected by the cold winds and the drought. Suffolk growers are not so optimistic. The prevailing opinion is that the crop is only a poor one, and that, should there be any more wet weather, it will be seriously affected by disease. It is believed, therefore, that the supply for the winter trade will probably be short. There is, however, no reason to fear that the potato crop as a whole will be deficient.

A severe thunderstorm passed over Lincolnshire on Friday afternoon, rain falling in torrents. The registrations in some places showed that upwards of 50 tons an acre fell in less than half an hour. Many low-lying places were flooded as a result of this and previous storms, and the land has got into a terribly soddened condition. This has given a serious check to harvest operations, and the outlook generally is causing much anxiety, as many acres of corn are yet uncut.

By order of the War Office authorities, a large contingent of the 3rd Battalion Oxfordshire Light Infantry (better known as the Bucks Militia) have returned to their headquarters at High Wycombe from special garrison duty at Kilworth, Ireland, where the main body of the regiment is embodied, under the command of Colonel the Earl of Orkney. The men, who are on furlough (the duration of which is not specified), have doffed their military attire and been supplied with civilian clothing. They have been sent home, it is stated, to help meet the demand there is at the present time in connection with the harvesting operations.

THE WEATHER.

MONDAY (August 20th).—Dull, overcast weather, with a good deal of local gloom, was reported very generally, considerable quantities of rain being measured at a number of places in the west and north. There was a close, heavy feeling in the atmosphere, with all the usual indications of impending thunderstorms. After a warm night, with minimum temperatures of nearly sixty degrees in some southern situations, the thermometer did not rise much during the day, parts of North Britain failing to touch sixty degrees.

TUESDAY (August 21st).—Weather of a very unstable character was general over the United Kingdom, due to the existence of a large and fairly deep system of low pressure off the Irish coast travelling slowly eastward, a number of small secondary areas existing elsewhere at the same time, and the barometer maintaining a downward tendency all over western Europe throughout the day. There was scarcely a breath of wind stirring, and the sky in all districts presented rather a dull, threatening appearance, rain falling in several places at times. England and Ireland had had a warm night, but there was no decided rise of temperature during the day, most districts failing to pass above sixty-five degrees, some northern and western ones remaining below sixty degrees. London reached a maximum of seventy-two degrees.

WEDNESDAY (August 23rd).—The conditions had become still more unsettled, fresh or strong westerly winds being felt over the southern counties, and from the eastward in the north. There was a great deal of variation in the aspect of the sky during the day, from clear to bright to dull and gloomy, rain being experienced nearly everywhere, large quantities being measured over Ireland and Wales, and also in France. Another very mild night had been experienced, especially in the South, where some of the minimum temperatures were as high as sixty degrees. Only London touched seventy degrees in the afternoon, the air being appreciably cooler.

THURSDAY (August 23rd).—No change of any importance was reported in the atmospheric conditions over western Europe. The cyclonic disturbance of the previous day had made no progress, its centre still occupying our western districts, with the barometer exhibiting a slight upward movement all round. The winds maintained a regular circulation in the depression, but while, in most neighbourhoods, they had diminished in strength, at some of the more exposed situations on the western coasts a gale was experienced. Rain fell over the whole of the United Kingdom, very heavily in some localities, more than an inch being registered in the north-east of Scotland. During the day thunderstorms occurred in various parts of England, a small one visiting London at noon, preceded by a good deal of rain, followed immediately by better, though changeable, weather. Temperature was lower everywhere, most of the afternoon maxima being from sixty to sixty-five degrees.

FRIDAY (August 24th).—The weather over the British Isles was distinctly better than that of preceding days, although the cyclonic area which had occasioned the general and heavy rains still maintained its position over the whole kingdom. It was, however, diminishing greatly in intensity, and showed signs of complete dispersal by the close of the week. Showers were experienced here and there in the West and North, and a thunderstorm passed along the South coast of Ireland in the evening, otherwise a gradual improvement was taking place in the weather, which was fine and bright in some districts. After a fairly mild night temperature rose slowly, few of the maxima exceeding sixty-five degrees, London touching seventy degrees.

SATURDAY AND SUNDAY (August 25th and 26th).—The recent cyclonic system disappeared early on Saturday, and an anticyclone spreading down from the far north has brought a more seasonable type of weather to all parts. There were a few showers over the southern counties on Saturday, and in London nearly half an inch of rain fell during a thunderstorm in the afternoon. As a rule, however, the air has been much drier, although at times the sky has been very cloudy and threatening, and the mornings have become rather misty. Northerly to easterly winds have been experienced all round, the movement generally being very weak, but it was inclined to be rather brisk over the south of England on Sunday. In many of the southern and western districts the afternoon temperatures have failed to reach sixty degrees, and in the south only the Channel Islands have passed above the sixties.

CORN MARKETS.

LONDON.

Mark Lane, Monday.—Malt: The demand continues limited, prices unaltered. Barley: No change to notice. Wheat: Quiet at about late rates. Oats: 3d dearer on the week. Maize fetched rather more money. Flour unchanged. —NIXON, GOWER, AND CO.

Mark Lane, Wednesday.—Influenced by reassuring reports from America and Liverpool, the market began well, although subdued to-day, and there was nothing to indicate extra caution as business progressed, but the attendance of buyers was again restricted. Feeding stuffs reacted. Old home-grown wheat is very sparingly offered, while the supply on hand becomes more and more exhausted, and prices are in sellers' favour. New crop is also upheld, and very little is submitted either here or on the country exchanges at present. Fine white of the latter rules at 31s to 32s, and red 30s to 31s per qr. 504lb. American descriptions rather firmer, apart from stocks being fairly plentiful. Nothing fresh can be said respecting the flour market, the consumptive sale to-day being but slight. The London Millers' Association made no alteration at their meeting this afternoon. Among feeding stuffs, maize occupied the main share of attention, flat being again dearer. Mixed American held for 20s ex ship, 20s 6d ex quay. A good supply is due Odessa, old, 24s ex ship, 24s 6d ex quay. Grinding barley maintained, the supply on hand being still chiefly confined to Persian, 17s 9d ex ship, 18s ex quay. Some Odessa is expected shortly. The market for oats tended rather better since last Monday. American mixed clipped, ordinary, quoted at 14s 3d ex ship, 15s ex quay, and white clipped in these positions, 15s 9d and 16s 3d respectively. Vologda's, 14s to 14s 3d. Fine weather retards movements in beans and peas, and the trade passing continues insufficient to test prices, but holders retain firmness.

Mark Lane, Friday.—To-day's market was favourably influenced by encouraging news from America, while heavy rainfall both at the Western and Northern counties in the middle of the week has also assisted in stimulating prices, but, with only a limited attendance, the amount of business since noon was devoid of significance. The yield of new crop wheat has become more backward, dearness and scarcity of labour still forming a drawback, and threshings are impeded. Fine white quoted at 32s, and red, of similar sample, at 31s per qr 504lb. Away from American descriptions being fairly plentiful holders were again demanding full rates. Although there was again some hesitancy among consumers in the flour market, both English and American brands were decidedly better in tone by 3d in most cases, being however, nominal. The London Millers' Association made no alteration at their meeting this afternoon. Town households, 25s 6d; whites, 28s 6d per sack. Among feeding stuffs, grinding barley continues scarce, and Persian, which still supplies wants, is 3d firmer, at 18s ex ship, 18s 3d ex quay. Oats well maintained, both American and Russia, in fact, being advanced 3d since last Friday, and further Government demands for shipment to South Africa are understood to have been forthcoming. Flat maize was again a favoured cereal, being 3d dearer to-day, while showing an advance to 6d to 9d since this day week. Mixed American held for 20s 3d ex ship, 20s 9d ex quay. Odessa, old, 24s ex ship 24s 6d ex quay. The market for beans and peas tends in holders' favour, the latter cereal, in fact, being advanced while scarcity continues.

COUNTRY.

Ashford, Tuesday.—White wheat, 30s to 32s; red ditto, 29s to 30s; barley, grinding, 20s to 22s; white oats, 20s to 23s; black oats, 20s to 22s; mazagan beans, 30s to 32s; tick ditto, 32s to 35s; round maize, 26s to 27s; flat ditto, 20s to 22s 6d; flour scaling, 23s; seconds, 25s; households, 26s; whites, 28s. There was very little new wheat or oats sold, but the former sold up to 31s, and the latter from 18s to 21s.

Aylesbury, Saturday.—A few samples of new wheat on offer, but prices were irregular—about 26s to 28s—some of it not being in good condition. Old wheat realised 30s to 32s; all other articles unchanged.

Banbury Thursday.—Wheat, white (old), 30s to 31s per qr; barley (old), 33s to 34s per qr; oats, 25s to 26s per qr. Markets very firm for both English and foreign, to 6d per qr dearer. A small quantity of new on offer in fair condition.

Braintree, Wednesday. — Small attendance, and little trade done. Red wheat made from 29s to 31s; white, 30s to 32s per qr. A few samples of new corn offering.

Brigg, Thursday.—Fair attendance, but the business transacted was not extensive. A few samples of new wheat were offered, the quality of which was scarcely equal to last year's crop. Prices are hardly yet fixed, though 28s to 30s per qr were named, and about 29s seemed the value of good samples. Old wheat about 30s per qr. New oats 18s 6d per 24 stones. Little or nothing doing in barley.

Bristol, Thursday.—There has been since our last a moderate trade in wheat and a good demand for feeding stuffs. At to-day's market there were several samples of new English wheat offering, which made 27s 6d to 28s. Foreign firm at late rates. Grinding barley 6d to 9d dearer. Plate and flat maize 3d higher. Round unchanged. Oats unaltered. Flour quiet.—GRACE BROTHERS.

Driffield, Thursday.—Not much grain offering. Holders were asking up to 31s per qr for wheat, which buyers were not disposed to give, but some sales were effected at 6d less. Oats were firm at 21s to 22s per qr. A few samples of new white oats were on offer, but they were much "weathered," and were sold at 18s to 18s 6d per qr.

Cambridge, Saturday.—During the week the wheat trade has been firm, with small supplies. The weather has been very showery, which delays harvest operations, and causes farmers to be very indifferent sellers. Quality and condition of corn vary a good deal, most of it inferior to last year's good crop. At this market to-day there was a fair supply of wheat, which found buyers at rather over last week's rates, dry lots being sought after. Red, 27s to 30s; and white up to 30s per 504lb; old wheat, 31s. Barley was more freely offered, but prices are irregular, and quotations are yet unreliable. Oats are from 8½d to 10d, old up to 1s per stone.

Canterbury, Saturday.—Wheat trade firmer. New oats just arriving. Winter tares inquired for. Closing quotations: White wheat, 31s to 33s 6d; red ditto, 29s to 32s; grinding barley, 20s to 24s; white oats, 18s to 21s; ditto black, 16s to 20s; peas, 29s to 31s; tick beans, 30s to 32s; mazagans, 28s to 29s; flat maize, 21s 6d to 22s; round ditto, 26s to 27s per quarter; winter tares, 6s 6d to 7s per bushel.

Carlisle, Saturday.—Very small supply of oats in our market to-day, and unchanged prices. 22s to 24s per 336lbs. —THOMAS ROBINSON.

Chester, Saturday.—A few samples of new English grain were shown, but did not change hands. There was no alteration in price of old wheat. Quotations:—Wheat, white and red, 4s 5d to 4s 6d per 75lb; grinding barley, 3s to 3s 6d per 64lb; beans, 5s to 5s 6d per 80lb; oats, old, 2s 9d to 3s per 46lb; Indian corn—new, 10s 6d to 10s 9d; old, 11s to 11s 3d per 240lb.

Chichester Wednesday. Small supply of new wheats, and a fair business done at 29s to 30s per quarter, prices being firm with an upward tendency. Plenty of inquiries for old wheats, which are generally of better quality than the new yet offered and best sorts commanded 31s per quarter. Feeding stuffs were in fair demand, and prices were steady. Flour unchanged.

Colchester, Saturday.—Not much new wheat offering, quality interior, prices 28s to 30s; old wheat firm and rather dearer. A few samples of new barley offering at irregular prices, also some new oats, value 16s to 20s per qr.—FRANCIS AND CO.

Dorchester, Saturday.—There was a fair attendance but not much business was done. Samples of new wheat were again offered, and sold at prices ranging from 26s to 30s per quarter. Foreign quiet, at last week's prices. Grinding barley 1s per quarter dearer. Feeding stuffs dear.

Gainsborough, Tuesday.—Very few farmers present, and but few samples changed hands at last week's prices. White wheat made 30s to 31s; red, 29s to 30s; white oats, 20s to 22s; black, 18s to 20s; grinding barley, 23s; English beans, 32s; peas, 23s; small maize, 26s; flat maize, 23s per qr; bran, £4 15s; sharps, £6; and barley meal, £6 10s per ton.

Glasgow, Wednesday.—There was a small attendance at our Corn Exchange to-day. Wheat and flour quiet, with a slightly firmer tone. Indian corn remains unaltered on the week, but with a firmer tendency. Grinding beans steady at an advance of ½d to 3d per boll. Canadian peas on spot slow at barely last week's prices, but firm for forward positions. Foreign oats held for an advance of 3d per boll. Home oats scarce and dearer. Oatmeal—we have had several lots of new crop on our market, which have been sold at irregular prices. Barley firm. Bran and thirds firm and unchanged.—GIBSON AND CLARK.

Hereford, Wednesday.—Small volume of business passing. Few samples of new grain on offer, wheats finding customers at 3s 6d to 3s 8d, new oats 2s 3d to 2s 6d. Old oats very firm, with an upward tendency; maize 3d to 6d dearer on the week. Old beans very firm with an upward tendency. Wholesale prices: Wheat—white 3s 6d to 3s 10d; red, 3s 6d to 3s 8d; barley, 3s to 3s 9d; oats, 2s 3d to 3s; beans, 3s 10d to 4s; maize, 2s 8d to 3s 2d; vetches—winter, 4s to 6s; and spring 3s 6d to 5s.

Hull, Tuesday.—The trade for home-grown wheat was steady at about last week's prices, of 29s to 30s per qr. A few samples of new wheat were shown, but they were very much out of condition. Foreign wheat had a downward tendency, but not quotably lower, at 28s to 32s per qr. Barley sold fairly well at 23s 6d; oats making 18s to 20s. Beans dearer, English selling at 33s per qr., whilst foreign were done at 29s 6d. American maize 21s and Black Sea 24s 6d, being an advance of 6d per quarter.

Ipswich, Tuesday.—Much larger attendance. The supply of old wheat was small, demand dull, and prices in buyers' favour. A few samples of new on offer, quality rather poor and prices irregular. Old red, 30s to 31s; white, 32s per 504lb. Grinding barley firm. Maize 3d dearer. Oats unaltered. Beans and peas quiet.

Leeds, Friday.—Advices as to values of American wheat, Tuesday's prices for both English and foreign are fully maintained, the tendency being the turn higher for choice descriptions held. English varies very much in condition, and makes from 28s to 30s. Peas and maize still favour sellers. No change in flour, oats, beans, or grinding barley.

Leeds, Friday.—Although it may be too early to form a correct estimate of the English wheat crop, all our correspondents report the yield as disappointing and below an average. America's weakness has depressed values in the option market rather than that of actual wheat. Russia ignores it completely, asking prices quite out of reach. Market sales inactive, foreign whites being 3d to 6d lower on the week. Reds unchanged. English fully as dear. Maize 6d to 1s dearer. Beans and oats firm.—DUNNS AND CO.

Leicester, Saturday.—Fair attendance with moderate supplies of wheat in variable condition; trade active for choice samples at 32s to 35s per 36 stones. Beans steady. Fine oats firm.

Lincoln, Friday.—Some new English wheats shown, condition being damp no trade done. Old wheats 6d to 1s dearer; foreign wheats 6d higher on the week; new oats also damp; old, 6d dearer; maize, higher in value; beans and peas firm.

Liverpool, Friday.—Wheat firm, with a fair trade at about 1d per cental over Tuesday's prices. Flour, a moderate trade at Tuesday's prices. Maize, steady with a moderate consumptive demand at unchanged prices for mixed American. European and Plate in very small compass and firmly held at quotations. Barley, slow for feeding, whilst malting has a fair demand for fine qualities, but without alteration in values. Beans are firm and have a good inquiry at last market day's figures. Peas are very firm and 1d per cental higher for white Canadians, other kinds unchanged. Oats are quiet for English, a 1d decline for new. Foreign sorts are slow without change. Oatmeal, quiet trade at quotations. Oilcake has a fair demand for all kinds, Stead's linseed being the turn dearer.—SEGAR AND TUNNICLIFFE.

Maidstone, Thursday.—A fair display of new grain at the market to-day. Wheat, white, 32s per 520lb; new, 28s to 29s per 516lb; peas, 28s to 29s per qr; black oats, 20s to 21s; rye, 26s per qr. Not much trade in old corn. Maize 3d per qr over last week; barley and beans firm. Some new winter tares to hand, 7s to 8s per bushel asked for them, as it is stated the crop is short. No alteration in hemp, brank, sergo, or millet.

Malton, Tuesday.—The official return shows a bigger wheat delivery, with a falling off in spring corn. Details: Wheat (60lb per bushel), 1,021 qr 5 bushels, at £1 8s 6d; barley (50lb per bushel), 11 qr 1 bushel, at £1 4s 5d; and oats (39lb per bushel), 22qr 4 bushels, at 19s 7d per Imperial qr average. Flour sells at 24s to 27s 6d per sack of 20 stones.

Manchester, Thursday. — In some instances English wheat to-day commanded rather better rates than a week ago, but the tone is rather irregular. Flour has lost a trifle on the week, though prices are now steadier. Indian corn is ½d per cental dearer as compared with last Thursday. Peas, oats, and beans, as well as barley, are unchanged.

Market Drayton, Wednesday.—Wheat, white, old, 13s to 13s 9d per 225lb; red, old, 13s to 13s 9d per 225lb; oats, white, old, 14s to 15s per 200lb; barley, malting, 12s to 13s per 210lb; Indian corn, new, 10s 9d to 11s per 240lb; beans, new, 13s to 14s per 240lb; old, 17s to 18s per 240lb; peas, white, 17s to 18s per 240lb.

Market Rasen, Tuesday.—Scarcely anything on offer. All kinds of grain must be quoted firm at late rates.

Newark, Wednesday.—Wheat a small show at about last week's price. A few samples of new wheat were showing at irregular prices according to condition and quality. New oats a small show, at 17s to 20s per qr. New barley 25s to 27s per qr. Old corn firm.

Newcastle, Tuesday.—There was only a thin attendance. Foreign and English wheat neglected, and prices are unchanged. Maize in fair demand at fully late rates. Oats, both Scotch and foreign, favour sellers. Barley unaltered. Peas and beans scarce and firm. Flour slow at last Saturday's quotations.

Newcastle-on-Tyne, Saturday.—Wheat in poor request, and slightly in buyers' favour. American maize 6d to 9d dearer on the week. Scotch oats firm at late rates, foreign steady. Feeding barley, peas, and beans firm in price, demand however, is slow. Flour unchanged. — JOSEPH POLLARD AND CO.

Newcastle-on-Tyne, Saturday.—The heavy rainfall all this week has played a poor part for the farmer, sorry to say. This day's market was moderately attended. Wheat and flour closed firm, and sellers had the advantage. Barley scarce and against buyers. Scotch oats could up 6d per qr on the week; foreign at about late rates. Beans and peas steady unchanged. Maize holds its own, especially round corn.

Newport (Mon.), Wednesday.—A few samples of new English wheat were offered at 3s 4d per bushel of 62lb. The wheat trade was poor, but prices were rather easier than last week. Maize was quoted at 6d to 9d dearer on the week; barley and oats firm and unchanged; beans, 6d to 9d dearer; flour, finest, 24s per sack.

Northampton, Saturday.—Bad weather intercepts harvest operations, small market; few samples of wheat on offer. Small business was done at 1s to 2s over last market day. Very little new wheat on offer. Flour difficult to sell:— White wheat, 31s to 33s per qr; red, 30s to 33s; grinding barley, 22s to 24s; oats, 19s to 24s; beans, 28s to 33s; flour, 23s to 27s.

Norwich, Saturday.—There was very little wheat on offer at our market to-day owing to farmers being busy harvesting, and more money was asked owing to the wet weather. Wet and unsettled weather has prevailed during the past week, much hindering harvest operations. Wheat, red, 30s 6d to 31s 6d per qr, weight 63lbs per bushel imperial. Corn inspector's return for the week ending August 20, 1900:—Wheat, 2,797.6, 28s 1½d.—J. ARTHUR MILLS.

Nottingham, Saturday.—Old wheat in limited supply, and values well supported. The few samples shown of new were of inferior quality and condition. Oats and beans, but few offering, and each made 6d to 1s more money.—ROBT. HUBBLE.

Oxford, Saturday.—Small market; not much new corn offering. Wheat in a good demand at rather over last week's prices, 28s to 32s. Barley, no business reported.

Penrith, Tuesday.—The only grain forward was oats, which were in small supply, stocks being almost exhausted. Prices remain unchanged.

Peterborough, Saturday. — The unsettled weather this week has hindered the harvest work and checked the supply of new corn. The few samples of wheat showing to-day made from 27s to 29s 6d per qr. New oats, 17s to 19s. Good old corn rather dearer.—THOMAS HILL AND SON.

Plymouth, Thursday.—There was a large attendance at our Corn Exchange to-day. Business has much improved since last week. The prices for foreign wheats remain firm, but English are uncertain. Maize has advanced 6d., and barley 9d to 1s dearer, while oats keep to about the same as last week.—ORLANDO DAVIS AND CO.

Reading, Saturday.—The Exchange was well attended to-day, and business ruled firm. Wheat came to hand in moderate quantities only, and old samples fetched most money, realising 29s to 32s per quarter, while new sorts made 20s to 30s per quarter. The price of barley and other kinds of corn remained at the figures obtained last week.

Ripon, Thursday. — English wheat has a firmer tone on account of the wet weather. Prices:—Wheat, English, 29s to 30s; ditto foreign, 31s to 35s; barley, grinding, 24s to 25s; oats, 22s to 25s; round maize, 25s to 27s; flat maize, 23s per qr; beans, 11½d per stone; bran, £4 10s to £5 per ton.

Romford, Wednesday.—Wheat trade showed a decline of 6d per quarter on last week's prices. New wheat was freely offered. Red wheat made 29s to 30s, and white wheat, 30s to 32s per qr.

Scarborough, Thursday.—A small attendance. Some new wheat and oats were on offer. Old wheat brought 29s to 30s; and new wheat 29s to 31s per qr. Old oats very scarce, and made 23s 6d to 27s per qr. of 24 stones. New oats, 22s to 23s.

Sheffield, Tuesday.—A small attendance, and trade was very slow. Needy buyers were obliged to pay former prices. Beans and small corn were 6d to 9d more. Wheat, white, 33s to 33s 6d; red, 32s to 33s per 504lb; oats, old white, 24s; ditto old black, 22s per 335lb; peas, grinding, 28s to 29s; ditto blue, 53s to 70s per 504lb; beans, Egyptian, 33s; ditto, English (new), 31s 6d to 32s per 532lb; barley, grinding, 23s to 24s 6d; ditto malting, 27s to 35s per 448lb; Indian corn, small, 26s to 29s; ditto American mixed, 22s 6d to 23s per 480lb.

Spalding, Tuesday.—A fair amount of new corn offering. The wheats generally were out of condition, and made 26s to 29s per qr. There were a few nice samples of barley on the market, which made 27s to 30s. Hardly any oats on offer. Peas were a small supply of very variable quality, prices ranging from 40s to 50s.

Sunderland, Saturday.—But little grain offering. Wheat firm, and rather dearer. Spring corn in sellers' favour. Arrivals coastwise: Wheat, 637 qrs; foreign nil.—E. AND F. RICHARDSON.

Taunton, Saturday.—Small quantity of both new and old wheat offering at rather easier prices than last week. Deliveries were retarded by the wet weather which prevailed during the week. Maize and barley very firm at hardening prices.

Wakefiled, Friday.—Again we have only a small attendance at our market to-day. We quote foreign wheat 6d to 9d per quarter dearer on the week, whilst English maintains fully last week's prices. A few samples of new Yorkshire barleys on offer, but as high prices were asked, this checked business. Maize and grinding barley 6d per quarter dearer, other feeding stuffs unaltered.—MICHAEL SANDERSON AND SON, LIMITED.

Wakefield, Friday.—With unsettled weather and stronger American advices, wheat is held for 6d to 9d advance from last week, but the demand is not active; new English does not shine either in quality or condition. Maize 6d dearer. Beans and oats firm.—DUNNS AND CO.

Wetherby, Thursday.—Only a poor attendance, and an exceptionally slow trade for all kinds. Prices firm.

Winchester, Saturday.—A short supply of new English wheat on our market to-day, which met a steady trade at 29s to 30s 64lb. Barley firm, grinding descriptions fully 6d dearer. Oats in good demand at late rates. Maize 3d to 6d higher. Flour fair inquiry at 24s to 25s.—FEAR, COLEBROOK, AND CO., LTD.

Wolverhampton, Wednesday.—A quiet market, with unchanged prices. The following were the quotations: English wheat, 13s per 216lb, springs 6s 4d, and Duluths 6s 6d to 6s 7d per cental; oats, 13s 6d to 14s 6d; beans (old), 13s 6d to 14s 6d per 190lb; flat maize, 21s 6d to 22s 3d per 480lb.

Worcester, Saturday.—A few samples of new corn were shown, but the condition was very indifferent on account of the wet weather. Old English wheat in short supply and firmly held. Foreign slightly dearer. Barley and maize made more money, and all feeding corn maintained previous rates. Wheat, white, 30s to 31s 6d; red, 28s to 30s per quarter.

York, Saturday.—Supply of wheat extremely limited, and now and then 6d per quarter advance could be obtained. Fine white wheat, 30s 6d to 31s 6d; and red and mixed, 29s to 30s 6d per quarter of 38 stones. Feeding barley, 24s to 26s per 32 stones. Oats scarce and dear. Short oats, 23s to 24s; white Tartary, 19s to 20s; and black ditto, 21s to 22s per quarter of 24 stones. Rye, 8d; and beans, 10d to 11d per stone.

FOREIGN.

The Antwerp wheat market has presented a firmer tone, with a regular current of business. The French provincial wheat markets have been rather depressed by the pressure of sales on the part of farmers who are compelled to raise money. There has been rather more doing in wheat at Paris: a preference has been given to new wheat over old descriptions, which have shown some weakness. Flour for consumption has shown little change in the French capital. Hard wheat has been quiet at Marseilles, but has at the same time been pretty well maintained. Disposable wheat has shown little change at Dantzic, and Konigsberg wheat market has exhibited a quiet tone. The supplies of wheat have been somewhat restricted upon the Russian provincial markets, but the demand has been weak, and prices have, if anything, been tending downwards. In the Southern Russian ports business

has, however, exhibited a much better tendency, the quality of the new wheat offered has been good, but the supplies brought forward have been comparatively small at present. The foreign demand for wheat at Odessa has slightly increased during the last few days, and a resumption of exports is looked for when new wheat begins to arrive more freely. The harvest has been completed under favourable conditions in Southern Russia. Advices from Ibrail report some improvement in the demand for wheat, and this has given strength to quotations. Some important transactions are stated to have been carried through in the ports of the Upper Danube. The quantity of wheat now *en route* for Europe is returned at 1,180,000qr, as compared with 1,145,000qr at the corresponding date of 1899. The total of 1,180,000qr representing the quantity of wheat now *en route* for the Continent is made up as follows:—France, 55,000qr; Belgium, 455,000qr; Holland, 265,000qr; Germany and the North, 170,000qr; and Italy, Spain, etc., 235,000qr.

Hamburg, Saturday.—Barley report: The weather has been fine since end of last week, but looks more unsettled now, and some rain has fallen. However, our barley crops must be considered secured now, and most is housed in perfect condition. Offers are increasing and holders point to a little more reasonable prices, especially for Bohemians; still they seem not to tempt buyers yet, who expect to operate at less money as soon as supplies are increasing.—FRANCIS M. TH. DUHNE.

Argentina	102,000	—	[illegible]	—	—
Chili	—	—	—	—	—
India	—	—	—	—	—
Australasia	—	[illegible]	—	—	—
Miscellaneous ..	20,000	[illegible]	20,000	[illegible]	10,000
Total	632,000	139,000	468,000	221,000	299,000

POULTRY AND PROVISIONS.

Smithfield, Saturday.—The supplies this morning were heavier, and the trade again ruled slow, prices being lower. Quotations:—Fowls: Yorkshire, 2s 3d to 2s 9d; Essex, 2s 6d to 3s; Boston, 2s to 2s 4d; Surrey, 3s to 3s 9d; Sussex, 2s 6d to 3s 3d; Welsh, 1s 8d to 2s; Irish, 1s 6d to 1s 10d; ducklings, 4s 6d to 6s; Bordeaux pigeons, 10d to 1s; feathered, 8d to 11d; Egyptian quail, 1½d to 1s 3½; Aylesbury ducks, 2s 6d to 3s; country ducks, 2s to 2s 6d; wild rabbits, 8d to 10d; tame, 1s to 1s 3d each; Australian, 7s 6d to 9s per dozen; hares, 3s to 3s 6d; leverets, 1s 9d to 2s 6d each; young grouse, 4s 6d to 5s 6d; old, 2s 9d to 3s per brace. Venison, haunches, 15s to 18s each; ditto forequarters, 3d per lb.

Liverpool, Saturday.—Bacon: The speculative demand has further improved, and with some local buying and firm cables, there is a better feeling with some advance in quotations. Hams are more freely offered, and values, especially of short cut, are easier. Lard is in moderate request, but prices are well maintained. Pork rules firm, with fair enquiry. We quote finest prime mess, 68s to 72s [illegible] The demand has been moderate, and with slightly easier cables, holders have shown some disposition to meet buyers. We quote to-day: Finest cool Canadian, coloured, 52s to 53s; white, 51s 6d to 52s 6d; finest States, coloured, 51s 6d to 52s 6d; white, 51s to 52s. Second grades sell fairly well from 45s to 50s, but there is only a small enquiry for lower qualities, offering from 22s to 38s per cwt. Butter rules firm, but the demand is disappointing for both Canadian and States, which would seem to be special value against Continental and Irish produce.—HODGSON BROTHERS.

HOPS.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

Autumnal rather than summerlike, the weather of the past week has been highly favourable to harvest work wherever the rain kept off. The temperature being mild and equable long days of hard work have been possible, and in such cases the fields have changed from corn to stubble like magic. Folk who have been away for a fortnight's holiday from rural parishes have often left before a field was cut and returned to find the farmer's chief work of the year practically concluded. While this has been the case in a great many parishes there have been many others where frequently recurrent rains have hindered the carrying of the crops in the most vexatious manner. In London we have had heavier rain than has been at all agreeable, but the Thames valley has been rather a stricken area in this respect, and that great granary of England which lies north-east of London, from the Essex and Hertford borders to Lincolnshire and the Fens, has had substantially better weather than Middlesex. The north is making good progress with wheat cutting, but both barley and oats are decidedly backward and want more sun. The weather between the Humber and the Firth of Forth has been fair, but in Scotland beyond the Firth and in Ireland the wet and windy weather has been very bad for the crops. The situation is very "mixed," and the markets vary with the daily weather reports. On the whole they are firmer from the 18th and 20th. Some new barley made its first appearance at Mark Lane on the 22nd, and fetched the by no means startling opening price of 30s. per qr. On the 24th a finer sample made 31s., but two others were sold for 27s. and 28s. respectively. These are not very hopeful quotations for new crop.

The Italian wheat harvest is now officially estimated at some 15,650,000 qrs., so that imports of 4,350,000 qrs. will be required, and not 3,500,000 qrs., as was estimated in July. The crops of Central Europe are up to expectation, but French wheat threshings are seldom giving more than sixteen bushels to the acre, and weight is very irregular. Russia reports an average but by no means a bumper crop of wheat.

In the United States the winter wheat threshings continue to give satisfactory results, and the spring wheat, though a small crop, has at least been secured in fine weather. In Canada and Manitoba the harvest has been got in without frost, a good item of news from a country where frosts from 15th to the end of August have before this blighted the year's grain yields.

The Canadian oats should be good this season, but wheat is below an average not only in the older provinces, but also in Manitoba. South America, where the season is early spring, reports flooding rains over an enormous area. August has still a few days to run, but receipts of breadstuffs into the capital have already been 602,000 qrs., against estimated requirements of about 465,000 qrs. for the entire month. This is a clear cause of the London market finding advance difficult.

The imports into the whole country of foreign breadstuffs have been fairly liberal, but August deliveries of English wheat being always scanty, the total supply of breadstuffs has fallen below estimated requirements by 43,000 qrs.

	Qrs.
Foreign wheat	283,000
„ flour	168,009
Imports	451,000
English wheat	73,000
Total supply	524,000

Stocks in granary have undergone the following change :—

	Qrs.
August 18	2,390,000
Excess of requirements	43,000
August 25	2,347,000

The imports of spring corn for the week are :—

	Qrs.
Maize	280,000
Barley	65,000
Oats	184,000
Beans	8,000
Peas	2,000

Prices of wheat at three leading markets thus compare :

	London. s. d.	Paris. s. d.	New York. s. d.
August 24, 1900	—	34 10	27 3
„ 1899	24 7	34 4	27 3
„ 1898	32 7	38 10	26 3

Prices in 1898 favoured shipments from America to England, but a year ago this was not the case. At the present moment the trade with America is difficult, as the margin is not sufficient to render profit safe.

There were, on the 25th inst., the following estimated quantities of wheat on passage to the United Kingdom :—

	Qrs.
Californian	915,000
Argentine	440,000
American	430,000
Australasian	190,000
Russian	40,000
Other countries	20,000
Total	2,035,000

As compared with previous seasons, figures are:—

	Qrs.
August 25, 1900	2,035,000
„ 1899	1,980,000
„ 1898	1,208,000
„ 1897	835,000
„ 1896	1,205,000
„ 1895	2,500,000

Of spring corn the following are the estimated quantities on passage :—

	Maize. Qrs.	Barley. Qrs.	Beans. Qrs.
1900	695,000	165,000	9,000
1899	860,000	235,000	13,000
1898	687,000	127,000	7,000
1897	740,000	371,000	12,000

The following quantities, in cwts., are also on passage. They are of articles concerning which advices are by no means regular :—

	Cwts.
Poppyseed	14,000
Cottonseed	25,000
Sesame	4,050
Rye	26,500

Very little is doing in imported barley, and the Russian new crop is held back. The samples of Persian offered at Mark Lane fetch 18s. or thereabouts, while Liverpool can boast the novelty of Mexican barley at 23s. to 24s. per qr. The trade in maize has been excellent and the steady sale of this staple in all months and seasons will probably be regarded as the most remarkable corn trade occurrence of the final *lustrum* of the century. The sales for the year ending on 31st will not be accurately known for a week or so, but 13½ million qrs. is already indicated. The American flat maize continues to predominate over the yellow corn of La Plata and the round corn of the East. Oats are in good supply from Russia, but America and Sweden are poor shippers just now, and the total is therefore kept from becoming excessive; value is a trifle firmer on the week. Some new English oats at local markets have made 17s. 6d. to 19s. per qr. Linseed at several places is 1s. dearer on the week, but Roumanian shipments of rapeseed stop that type of oilseed advancing in value.

THE BALTIC.

Sales of arrived cargoes during the week have included Californian wheat at 30s. 1½d., Walla Walla at 29s. 9d. and 29s. (three cargoes at the better price), 29s. 3d. Argentine, and 27s. 3d. hard winter. Cargoes on passage have made 28s. 9d. for Walla Walla wheat, 30s. 6d. for Californian, and 28s. 9d. for Argentine, 18s. 6d. for American maize, 20s. 6d. and 21s. for La Plata, and 24s. 6d. for Odessa, 18s. 9d. for South Russian barley, 24s. 4½d. for Guza, and 26s. 9d. for Californian, 28s. for Barbary beans, 54s. for Calcutta linseed, 22s. for Syrian dari, 26s. for Canadian buckwheat, and 40s. for Tangiers canaryseed—the last a "parcel" or consignment by a steamer engaged in another trade. Sales of futures—that is to say, of cargoes for September, October, November, and December shipment—have been as follows :—

	Sept. s. d.	Oct. s. d.	Nov. s. d.	Dec. s. d.
Manitoba wheat	31 9	—	—	—
Best Duluth wheat	31 6	31 9	—	—
No. 2 red winter wheat	28 9	29 0	—	—
Hard winter wheat	27 3	—	—	—
No. 1 Northern wheat	30 9	—	—	—
Odessa maize	24 6	25 0	—	—
American maize	19 0	19 3	19 6	—
Canadian peas	27 3	27 3	—	—
Russian barley	18 0	18 0	17 9	—
No. 2 clipped oats	14 10½	15 0	14 9	—
Argentine linseed	52 0	51 0	—	48 0

It will be seen that there is little buying for remote futures in any branch of the trade.

Arrivals of grain and seed laden vessels at ports-of-call for the week were 18 wheat (1 Bahia Blanca, 3 Buenos Ayres, 1 Melbourne, 3 Oregon, 3 Rosario, 5 San Francisco, 1 Tacoma, 1 Wallaroo); 1 wheat and peas (New Zealand); 1 beans (Saffi); total, 20.

The sailings of grain and seed laden vessels from ports-of-call for the week were 7 wheat (1 Birkenhead, 3 Hull, 2 Limerick, 1 Sunderland); total, 7.

Since January 1, 1900, the total arrivals have been 243 wheat, 13 wheat and barley, 1 wheat and peas, 6 flour, 10 maize, 1 maize and oats, 23 barley, 15 beans, 7 locust beans, 1 linseed, 2 canary-seed, 5 valonea; total, 327.

Last year during the same time the arrivals were 210 wheat, 10 flour, 3 maize, 6 barley, 1 barley and beans, 1 rye, barley, and oats, 6 beans, 1 locust beans, 5 linseed, 4 canary-seed, and 7 valonea; total, 254.

THIS DAY'S MARKETS.

MARK LANE, MONDAY.

[FIRST REPORT.]

The market to-day was decidedly firmer, and all sorts of grain were held with confidence for rather more money than formerly. New English red makes 29s. for Essex and 30s. for Norfolk. Some fine new white from Kent makes 31s. 6d. per qr. The old wheat seasoned and dry is seldom parted with under 31s. per qr. Supplies of both sorts are small and the weather is against deliveries. A few samples of new malting barley are held for 30s. with buyers at 29s. per qr. There are a few buyers of Persian feeding at 18s. to 18s. 6d., and of Californian brewing at about 27s. per qr. New winter oats from Cambridgeshire are on offer at 18s. 6d. A sample or two of spring oats of the ordinary crop from Lincolnshire are quoted 18s. per qr. The price of foreign oats is well maintained, and American tend in sellers' favour. Maize is strong, 9d. up on the week for flat, and 6d. for other kinds. Beans and peas are steady at full rates Linseed is 1s. dearer on the week. Rapeseed is a fair trade, new Roumanian looked after. A sample or two of new rye is offered at 28s.; fine new winter tares make 58s. per 504lb.

CLOSE OF THE MARKET.

By Telephone, 2 p.m.

THE MARKET CLOSED WITH A DECIDEDLY CONFIDENT FEELING.

THE FLOUR TRADE.

MARK LANE, Aug. 27.

The flour market was firm with 6d. advance asked on London and country makes of English, and paid for good country roller made of the old wheat crop. The American flour market was very firm. Pillsbury's best north-western flour is quoted 25s. 6d., at which price Gold Medal, Morrison's Superlative, and Star, may be quoted also. For Ceresota 26s. is asked. The demand is best for the finest patents. Good secondary American patents are fetching 19s. for Gilt Edge, 19s. 3d. for Nicollet, 19s. 9d. for Iron Duke, and 19s. 6d. for "Princess Royal." Bales of secondary American are not brisk. Kansas fine flour comes at 23s. for Dazzle. Australian fine flour made 23s. 6d. and was a good sale. Hungarian averages at the 30s., but is not in brisk demand.

LONDON TERM MARKET.

This market is held twice a day at South Sea House, and is open to elected members only. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 centals.

The name of the month stands for guaranteed delivery (if required) on or before the last day of that month, and the following have been the prices per cental recently made :—

WHEAT.—	Aug.	Oct.	Dec.
	s. d.	s d.	s. d.
Aug. 20 noon	6 5	6 6	6 7
4 p.m.	6 5	6 6	6 7
Aug. 21 noon	6 5	6 6	6 7
4 p.m.	6 5	6 6	6 7
Aug. 22 noon	6 5	6 6	6 7
4 p.m.	6 5	6 6	6 7
Aug. 23 noon	6 5	6 6	6 7
4 p.m.	6 6	6 7	6 9
Aug. 24 noon	6 7	6 8	6 9
4 p.m.	6 7	6 8	6 9
Aug. 25 noon	6 6	6 8	6 9
To-day noon	6 7	6 8	6 9

Maize is quoted 4s. 1d. per cental for Sept., Oct., and Nov. delivery.

The Term Market standard wheat is No. 1 Northern Spring American sold on the Duluth certificate. Other sorts of wheat can be bought at the above prices plus or minus agreed difference between the other sort and the standard quality. Quotations are by the "true hundredweight" or cental of 100lb. We do not give fractions of a penny per cental. Delivery is understood as being guaranteed on or before the last day of the month named in the quotation. The maize quoted on the Term market is flat grain from the United States.

PROVISIONS.

London, Monday.—The arrivals from Ireland last week were 2,441 bales bacon, and from foreign ports 10,202 bales bacon. The demand for bacon of all description having fallen off very considerably, prices have given way all round, more particularly on Danish, which was some 6s to 8s down from the top selling price of the previous week. Prices ranged :—Irish, 56s to 64s up to 70s; Danish, 50s to 62s up to 69s; Canadian, 54s to 60s up to 62s. The butter market was generally quiet and prices in most cases tended in buyers' favour. Danish, 110s to 120s; French, 96s to 110s; Irish, 98s to 112s; Canadian, 104s to 108s. Lard was quiet, prices unalterd.

HOPS.

London (Borough), Monday, 1 p.m.—The continuance of unfavourable weather and further bad reports from the English plantations have increased the firm tone of the market this morning. The Belgium quotations are much higher. Buyers are now offering 92½ to 95 francs for new hops, but sellers are very reserved.

London (Borough), Monday.—Messrs. W. H. and H. Le May, hop factors, 67, Borough High-street, London, S.E., report: The low temperature is producing mould; how small the crop will finish it is not possible yet to tell, but it is now a certainty that England cannot grow half of last year's crop. The market is very firm; stocks are small.

GRAIN AND FLOUR FACTORS' REPORTS.

Wheat arrivals moderate. Trade firm and prices 6d. per qr. higher. Flour 6d. per sack dearer. Maize 9d., barley and oats 3d. per qr. dearer.—COVENTRY, Mark Lane.

Flour. A strong trade at 3d. to 6d. advance since last Monday.—T. S. MEDILL, Mark Lane.

The market for milling offals remains unchanged at former prices.—RICHARD DOGGETT, Mark Lane.

Offals, demand quiet for present consumption; increased speculative inquiry; prices rather firmer. Weather showery.—GREENHILL BROS., Belfast, August 25.

Flour.—Wheat and flour have firmed up during the last few days with considerably more disposition for forward business. Prices, however, are 3d. to 6d. lower than a week ago. Grain.—Arrivals of corn are heavy, but price is firm owing to higher quotations for shipment. Beans, 3d. dearer. Canadian peas quiet on spot, but 1½d. higher for shipment. Oats, 3d. up. Oatmeal, steady. Mill stuffs.—Bran and thirds firm.—MCKINNON AND MCDONALD, Glasgow, August 25.

Wheat firm with a fair trade at about a 1d. per cental over Tuesday's prices. Flour a moderate trade at Tuesday's prices. Maize steady with a moderate consumptive demand at unchanged prices for mixed American. European and Plate in very small compass and firmly held at quotations. Barley slow for feeding, whilst malting has a fair demand for fine qualities, but without alteration in values. Beans are firm, and have a good inquiry at last market day's figures. Peas are very firm and 1d. per cental higher for white Canadians, other kinds unchanged. Oats are quiet for English, a 1d. decline for new. Foreign sorts are slow without change. Oatmeal, quiet trade at quotations. Oilcake has a fair demand for all kinds. Stead's linseed being the turn dearer.—ROSS T. SMYTH, Liverpool, August 25.

THE BALTIC, MONDAY, 1 p.m.

STATE OF TRADE.

American wheat and maize cargoes for September shipment may be quoted 3d. dearer from Saturday. Other wheat and maize cargoes are well held but not quotably dearer. For cargoes of Russian barley, new crop, late autumn shipment, 3d. advance is obtained. At present there are no changes in oats or oilseeds, but the tone is strengthening.

BUSINESS DONE.

WHEAT.—No. 1 Northern, 30s 9d, September shipment; Duluth, 32s 3d, Dec. shipment; Hard Winter, 27s 7½d, Sept. shipment; No. 2 Red Winter, 29s 6d, Sept. shipment; Argentine, 29s, Sept. shipment; Californian, 30s 6d, Sept. shipment.

MAIZE.—Argentine, 20s 9d, Sept. shipment; American, 19s 9d, Sept. shipment.

BARLEY.—Azoff, 19s 3d, October shipment; Persian, 17s 6d, on passage.

OATS.—Vologda, 14s, September shipment; Canadian, 15s 3d, September shipment.

BEANS.—Egyptian, 28s 3d, September shipment; Smyrna, 27s 9d, September shipment.

LINSEED.—Libau, 49s, November shipment; Argentine, 48s; December shipment.

RAPESEED.—Guzerat, 43s 6d, April shipment; Roumanian, 41s 9d, September shipment.

COTTONSEED.—Egyptian, £6 3s 9d, November shipment.

FEEDING STUFFS.

London, Monday.—Linseed Cake.—Market 2s 6d up; very little foreign cake left. Decorticated cotton cake scarce, and 2s 6d dearer. Egyptian and London made firm. Linseed steady.

English linseed cake	£8	0	0 to	8	2	6 ex mill
American Calcutta linseed cake	7	16	3 to	—		ex quay
American Western linseed cake	7	12	6 to	—		ex quay
Russian oil cake	7	12	6 to	7	15	0 ex quay
Feeding cake, Samuelson's S.P.F. (10 to 12 p.c. oil)	—					ex warehouse
Decorticated cotton cake	6	15	0 to	7	0	0 ex quay
Decorticated cotton meal	6	10	0	6	12	6 ex quay
London made cotton cake (best)	4	7	6 to	—		ex mill
Egyptian cotton cake (in bags)	4	5	0 to	—		ex quay
Burton desiccated ale grains (bags included)	4	10	0			on rail, Burton
Rangoon Rice Meal	—			—		ex warehouse
American linseed in bulk, per 416lbs	2	15	0 to	—		ex warehouse
Calcutta linseed in bags, per 410 lbs	2	14	0 to	—		ex warehouse.
Dutch linseed in bags, per 416lb	3	4	0 to	—		ex warehouse.

—ROBT. AND JOHN HEWETSON.

SEEDS.

London, Monday.—Messrs. John Shaw and Sons, seed merchants, of Great Maze Pond, Borough, London, S.E., report an increasing business in cloverseed at substantially higher rates. American cables meantime describe strong and advancing markets; whilst Germany continues to buy English seed. Trifolium is in somewhat improved request. Alsyke, white, and trefoil are firmly held, and Italian rye grass still tends upwards. Mustard and rapeseed keep steady in value. There is a fair sale for new thousand-headed kale. As regards canaryseed, a further rise of 2s per qr has to be noted; whilst full prices are quoted for millet, niger, sunflower, hemp, and maw seeds. The new blue peas now arriving attract attention. Haricot beans are scarce and firm.

CATTLE.

Metropolitan Market, Islington.

Monday, August 27th, 1900.

	British.	Total.	Aug. 20th, 1900.
Beasts	1,250	1,250	1,257
Sheep and lambs	6,170	6,170	6,800
Calves	—	—	10
Milch cows	50	50	60

Quotations per 8lbs (sinking the offal).

	ENGLISH. Inferior.	Second.	First.
	s. d.	s. d.	s. d.
Beasts	3 0 —	4 2 —	4 10
Sheep	3 4 —	5 4 —	6 0
Lambs	5 8 ..	6 0 ..	6 4

Milch cows, per head, £11 to £21 10s.

British arrivals include as follows:—Scotland, —; Eastern Counties, 41; Midland, Home and Western Counties, 1,209; Devon, 30; Ireland, 83.

There was to-day a small supply in the beast market, the majority as usual at this season of the year arriving from the Midland Counties, principally Herefords and Runts. Trade all round was of a sharper nature, rates being a shade firmer, and a clearance being made. Very few foreign cattle on the market. More demand for and a short supply of fat bulls, both of which sold to better advantage, all being probably sold before noon.

The following are top quotations per 8lb. (sinking the offal):—

	To-day.	Aug. 28th, 1899.
Devons	4s 8d to 4s 9d ..	4s 6d to —
Herefords	4s 9d to 4s 10d ..	4s 5d to 4s 6d
Runts	4s 9d to 4s 10d ..	4s 5d to —
Lincolns	4s 9d to 4s 9d —	3s 10d to 4s 2d
Irish	4s 4d to 4s 6d ..	3s 10d to 4s 2d
Fat cows	3s 10d to 4s 0d ..	3s 4d to 3s 6d

The supply in the sheep market numbered 10 less than on Monday last, though there was an increase of nearly 700 from Ireland, the total from that country being 1,530, whilst 190 Scotch were shown, and 560 from the Eastern counties. Trade for wether sheep showed more life, with an upward tendency in value. Ewes also met with more inquiry, and were quoted at from 2d to 4d per 8lb dearer. The lamb trade was also firm at an advance of fully 2d per 8lb.

Undermentioned quotations are at per 8lbs. (sinking the offal), and are for the best of each class penned :—

	To-day.	Aug. 28th, 1899.
7½ to 8 stone Downs	5s 10d to 6s 0d ..	5s 6d to 5s 8d
9-stone ditto	5s 9d to 5s 10d ..	5s 4d to 5s 6d
10-stone half-breds	5s 6d to 5s 8d ..	5s 2d to 5s 4d
11-stone Lincoln	5s 2d to 5s 4d ..	4s 9d to 4s 10d
10-stone Irish	5s 4d to 5s 6d ..	4s 8d to 4s 10d
10-stone Down ewes	4s 4d to 4s 6d ..	3s 9d to 3s 10d
11-stone half-bred ditto	3s 10d to 4s 0d ..	3s 2d to 3s 4d
5-stone Down lambs	6s 2d to 6s 4d ..	6s 0d to 6s 2d
6-stone half-bred ditto	5s 10d to 6s 0d ..	5s 4d to 5s 6d

London Central, Monday. — Good supplies; trade slow. Beef (carcasses), 3s 8d to 4s; hindquarters, 4s 4d to 4s 8d; roastings, 4s 8d to 5s 2d. Sheep: Ewe, 3s 4d to 3s 8d; wether, 4s 8d to 5s; hindquarters, ewe, 4s 4d to 4s 8d; wether, 5s 6d to 5s 10d. Pigs: Large, 3s to 3s 4d; small, 3s 6d to 4s.

St. Ives (Hunts), Monday.—Beasts, 402; sheep and lambs, 2,223; pigs 306; horses, 130; beef, 7s to 8s; mutton, 7s 7d to 9s 4d; lamb, 8s to 10s; pork, 6s to 7s. Fat and store cattle fair, fat and store sheep and pigs fair. Milch cows, good trade, £14 to £23.

FOREIGN CATTLE.

Deptford, Monday.—Beasts, 818. To-day's supply, compared with Monday last, showed a decrease of 1,692 and consisted of 287 from the United States and 531 from Canada, which were held back on Saturday last. Owing to the firmer tone of the dead meat market trade here was steadier at an advance of fully 4d per 8lbs., as compared with Wednesday last. The best States beasts on offer to dress about 760lbs made from 4s 5d to 4s 6d per 8lb, offal given in. Heavy ditto 4s 3d. Best Canadians 4s 2d. Ranchers 3s 9d to 3s 11d. No sheep on the market. The following were the numbers on offer on the corresponding day last year, with the current top rates :—Beasts, 2,262, 4s 1d per 8lb; sheep, 4,669, 3s 10d per 8lb.

Liverpool, Monday. — Demand somewhat better for cattle, and last week's prices easily maintained. A rather better trade for sheep and lambs at generally late rates, but in some cases a few choice quality made more money. Beef, 7d to 5d per lb; mutton, 7¾d to 5d per lb; lambs, 8d to 5¾d per lb. At market: 1,013 cattle and 9,709 sheep.

The American Apple Crop.

The following report as to the apple crop in America, Canada, and Nova Scotia has been issued by the National Apple Shippers' Association of America:—"From a careful and comprehensive review of all the information in our possession, it is our opinion that the coming apple crop of the United States, Canada, and Nova Scotia will be the largest of any crop within the history of the country. While certain apple-bearing sections of the United States report moderate and even large yields, the proportion of such to the whole is unimportant. The crop of New England, New York, New Jersey, and Pennsylvania is very heavy as a whole. The central, western, southern, and south-western sections of States, while not reporting a generally full crop, all anticipate a moderate yield, while some have the promise of heavy yields in certain sections. The crop of the Provinces will be a full one, while Ontario and Nova Scotia expect the heaviest crops on record."

LIVE STOCK AND MEAT TRADE REVIEW.

(WRITTEN SPECIALLY FOR THE "MARK EXPRESS.")

Trade in London.

The trade for fat beasts of best quality on Monday at Islington opened firm and steady, both in regard to tone and value, but for second quality, as well as for plain descriptions, it ruled extremely dull and dragging, with a marked downward tendency in prices, a clearance not being effected. For both fat butchering cows and bulls there was a slacker demand, with, however, no alteration in value, owing to very light supply, this remark applying to both market days. The majority of fat beasts consisted of Herefords and Lincoln Shorthorns, with a few Runts and Irish. At Deptford markets were again held on three days, trade ruling firm at a slight advance on Monday, with a rise of 2d. per 8lb. on Wednesday, with a similar advance on Saturday, this remark applying to both prime and second quality. Besides the below-mentioned numbers, 813 more were held back. The total offered for sale at both markets was 5,268, consisting of 1,220 British and 4,048 foreign, these latter comprising 2,341 from the United States and 1,707 from Canada. The following were the top rates paid per 8lb. (sinking the offal):—90-stone Herefords, 4s. 8d. to 4s. 10d.; 95-stone Runts, 4s. 8d. to 4s. 9d.; 90-stone Irish, 4s. 6d.; 100-stone Waterfords, 4s. 3d.; 100-stone Lincolns, 4s. 4d. to 4s. 6d.; 110-stone ditto, 4s. 2d.; 100-stone fat cows, 3s. 8d. to 3s. 10d.; 100-stone fat bulls, 3s. 4d. The trade for wether sheep at Islington, owing to a lighter supply, was firm in tone, with an upward tendency in values. On the other hand, ewes were not only lower in price, but more difficult to cash. There being good demand for lambs, these sold steadily at an advance of 2d. per 8lb. At Deptford the few sheep on offer made from 2d. to 4d. per 8lb. more money. The total number penned at both markets was 10,123, of which 9,470 were British and 653 Canadians. Best pens made per 8lb. as follows (sinking the offal):—7½ to 8-stone Downs, 6s.; 9-stone Downs, 5s. 10d.; 8-stone Scotch, 5s. 10d. to 6s.; 10-stone Downs, 5s. 8d.; 10-stone half-breds, 5s. 6d. to 5s. 8d.; 11-stone Lincolns, 5s. 4d. to 5s. 6d.; 10-stone Down ewes, 4s. 2d.; 11-stone half-bred ditto, 3s. 10d.; 5-stone fat Down lambs, 6s. 2d.; 6-stone half-breds, 5s. 10d. The calf trade, with only seventy-five on offer, was firmer at an advance of 2d., the best on offer making 5s. 4d. per 8lb.

Trade in the West.

One of the most encouraging features of the past week's operations has been the gradual hardening in values of nearly every kind of stock. Fat bullocks in some instances have gone up from 10s. to 20s. a head, whilst the improvement in mutton has been in a corresponding rate.

Trade in Ireland.

Thursday's market in Dublin was a large one, and the large supplies had the effect of causing a further depression of from 10s. to 20s. on last week's fall. Best cattle held the price pretty well, but inferior stock met with very slow sale, a number remaining over unsold. A special feature of the cattle market was that a representative of the firm of Messrs. Hicks, Oliver, and Co., of London and Liverpool, was present, and purchased a large number of choice heavy bullocks for shipment to St. Helena to feed the captive Boers. An average of £22 10s. was paid per head for them, and freight to St. Helena will cost from £8 to £10 per head. Prime heifer and ox beef made from 55s. to 60s. per cwt.; second quality from 50s. to 54s.; and inferior, 42s. to 45s. With close upon 12,000 sheep on offer, a dull market was inevitable, and with the exception of prime heifers a further fall of from 1s. to 2s. per head was to be noted. Choice fat lambs met with a good demand, but other sorts were hard to place, even at reduced rates. A poor lot of veal calves; anything choice made 7½d. per lb.; other sorts neglected. Milch cows in fair supply, and moderate demand at late rates. With a limited market of pigs, and a better attendance of buyers, trade was fairly brisk, without any advance in prices.

Trade in Scotland.

John Swan and Sons, Limited, give the following as their report on the above for the current week:—The supplies of fat cattle have been very light all over this week, and the quality fair. An exceedingly good demand has been experienced, and trade has been in advance of last week, the best class of cattle making from 20s. to 30s. a head higher prices. Fat sheep and lambs have been forward in much shorter numbers; there has been a good trade, particularly for good shop sheep, at much similar rates to last week, any change favouring the seller. Fat calves have been about an average show, and continue to sell well, while a fair number of fat pigs have made high prices. In the store market there have been offered considerably larger supplies of sheep and lambs than last week, and the quality of a large proportion has only been secondary. For the best class a fair demand was met at about last week's rates, but owing to the excessively inclement weather there has been little demand for anything but the best, and trade has been dull. Smaller numbers of store cattle were offered, and these being of a fair class met a good inquiry, and were cleared out at about late prices. Milch cows were a good show, and met a fairly good demand. Quotations:—Top price best beef, 8s. 6d. to 9s. per stone; secondary, 8s. to 8s. 6d. per stone; mutton from 7½d. to 8½d. per lb.

LONDON.

London Central, Wednesday. — Fair supplies; trade firmer. Arrivals of beef included 20 tons Scotch, 340 Liverpool sides, 1,600 hindquarters, and 700 forequarters American refrigerated. Beef: Scotch short sides, 4s 4d to 4s 8d; long, 4s 2d to 4s 4d; English, 4s to 4s 2d; American Deptford-killed, 3s 10d to 4s; Liverpool, 3s 8d to 3s 10d; American refrigerated hindquarters, best, 3s 6d, seconds, 3s to 3s 4d; forequarters, 2s 2d to 2s 5d. Mutton: Scotch, 5s 6d to 5s 8d; English wethers, 5s to 5s 4d; ewes, 3s 8d to 3s 10d; English lamb, 5s 8d. Veal: English and Dutch, 3s 8d to 4s 4d per 8lb.

London Central, Friday.—Good supplies, and trade firm. Arrivals of beef included 50 tons Scotch, 630 Liverpool sides, 3,500 hindquarters, and 2,400 hindquarters American refrigerated. Beef: Scotch, short sides, 4s 4d to 4s 8d; long, 4s 2d to 4s 4d; English, 4s to 4s 2d; American, Deptford killed, 3s 10d to 4s; Liverpool, 3s 10d; American refrigerated hindquarters, best, 3s 8d to 3s 10d; seconds, 2s 10d to 3s 2d; forequarters, best, 2s 6d to 2s 8d; seconds, 2s to 2s 4d; New Zealand hindquarters, 3s 1d to 3s 2d; forequarters, 2s 2d to 2s 3d. Mutton: Scotch, 5s 6d to 5s 8d; English wethers, 5s to 5s 2d; ewes, 3s 8d to 4s; Canterbury, 2s 2d to 2s 5d; Wellington, 2s 1d to 2s 3d; Sydney and River Plate, 2s to 2s 1d. Lamb: English, 5s 6d to 5s 8d; New Zealand, 2s 10d to 3s 2d. Veal: English and Dutch, 4s 8d to 5s. Pork: English, 4s to 4s 4d; and Dutch, 3s 10d to 4s per 8lb.

Islington, Thursday.—Only a small supply of beasts, being the same as on Thursday last, and as usual mainly comprised fat bulls and rough cattle. Trade was quiet, but about steady. Sheep entries were only moderate, but a very slow demand prevailed for both wethers and ewes, late prices, however, being without change, 7½ to 8-stone Down wethers, 5s 10d to 6s; 9-stone ditto, 5s 8d to 5s 10d; 10 stone half-breds, 5s 4d to 5s 6d; 10-stone Down ewes, 4s to 4s 2d; 11-stone half-bred ditto, 3s 8d to 3s 10d. Lambs trade firmer; 5-stone fat Downs, 6s to 6s 4d; 6-stone half-bred ditto, 5s 10d. Calves met a fair demand, the best making 5s 4d to 5s 6d per 8lb to sink the offal. Total supplies: 30 beasts, 3,290 sheep and lambs, 70 calves, 60 pigs, and 5 milch cows.

COUNTRY.

Ashford, Tuesday —Trade was rather slow, and the number of stock low. Beef trade slightly better, the best making up to 12s per score. Cow beef at about 8s to 10s. Mutton about 2d per stone better all round. Choice Downs and half-breds, 5s 4d to 5s 7d, while Kents fetched about 5s 2d to 5s 4d. Best veal dearer, making 6s per stone, but the ordinary qualities remained firm at 4s 8d to 5s. Lamb 5s 8d to 6s per stone, Pork cheaper. Best roasters, 9s 6d to 10s per score; hogs, 8s to 8s 6d per score; sows, 5s per score; small pigs from 12s to 13s a piece.

Basingstoke, Wednesday.—At Raynbird and Sons' saleyard there was a fair attendance of buyers to meet a supply of 36 fat beasts, 60 calves, 690 fat sheep and lambs, 81 pigs, and 78 head of dairy and store cattle, for which the following prices were realised:—Fat beasts, £15 to £22 5s; fat calves, 80s to £5 15s; small, 20s to 50s; fat wethers, 36s to 55s; fat ewes, 27s to 40s; lambs, 28s to 48s; fat porkers, 25s 6d to 55s; store pigs, up to 18s; dairy cows, up to £16 15s. For fat beasts there was a slower trade, without material change in values, best Devon steers making up to £22 15s; Shorthorn steers, £20 10s; heifers, £19 10s; and cows, up to £17. Best quality fat sheep and lambs were in good numbers and met a brisk trade, also a clearance made at prices nearly equal to last week's figures. For half-fat and inferior sheep and lambs there was less demand and prices were lower. Hants Down wethers and young ewes made 40s, 45s, 54s, 52s, 42s, 46s, 47s, 50s, 48s, 55s, 48s, 41s, 52s. Eight-months-old Hants Down lambs, 31s, 36s, 47s 6d, 48s, 39s 6d, 36s 6d, 43s 6d, 34s, 44s 6d, 35s, 40s, 41s. Southdown lambs, 35s 6d, 34s. Three-months-old sucking lambs, 30s 6d, 37s 6d, 33s, 31s, 28s, 32s. Old ewes, 39s 6d, 37s, 27s, 30s 6d, 40s, 39s, 36s, 38s 6d. Rams, 50s, 54s, 46s. Kent wethers, 53s. Blackface Scotch wethers, 31s 6d, 29s 6d, 25s 6d. With an average supply of dairy cattle on offer prices ruled a trifle better for the best descriptions of milches. Store cattle continue a slow business. Fat calves met a brisk trade at late rates. Fat porkers are shown in small numbers, selling readily at an advance. Store pigs were disposed of at satisfactory prices. Ruling values:—Prime Devon beasts, 7d to 7¼d per lb; ditto Shorthorn ditto, 6¼d to 6¾d per lb; cows, bulls, and inferior, 5d to 6d per lb. Best quality sheep, 8¾d to 9d; second ditto, 7¾d to 8d; old ewes rams, and inferior ditto, 6d to 7d; fat lambs, 9d to 10d per lb. Fat calves, 7d to 9d per lb. Porkers, up to 10s 6d per score.

Bedale, Tuesday.—The show of calving beasts was an average one, and trade was fair, at £14 to £20 and upwards for calving cows, calving heifers £13 to £16, geld beasts £9 to £12, and stirks £6 to £8 each.

Braintree, Wednesday.— There was a brisk trade at Messrs. Balls' auction mart. Prices: Beef, 4s; and mutton, 5s 6d per stone; pork, 10s 6d per score. Sharp demand for all classes of stock, but supply limited. Store lambs made good prices. Numbers penned: Beasts 16, fat sheep 200, hogs 54, Londoners and store pigs 230, calves 12, cows 4.

Brigg, Thursday.—With a meagre supply of horned stock and thin attendance not sufficient business was done to warrant any quotations.

Calne.—Present prices for prime pigs, in lots of not less than 10, on rail within 100 miles of Calne:—

Prime stores.	Thickness of fat in any part of the back.	Price per sc.
6 sc 10 lbs to 9 sc 10 lbs	2½ in. and under..	9s 6d
Under 10 sc 10 lbs	Not exceeding 2½ in.	9s 0d
Under 11 sc 10 lbs	Not exceeding 2¾ in.	8s 3d
Under 12 sc	Not exceeding 3 in.	—

Any pigs outside these limits at their value. Half truck, 12 pigs. Whole truck, 25.—CHARLES AND THOMAS HARRIS AND CO., Limited, Calne, Wilts.

Cambridge, Monday.—The stock exhibited for sale at this market and the prices obtained were as follows:—Beasts, 47; sheep, 1,078; lambs, 173; pigs, 6. Beef, 7s to 8s per stone; mutton, 5s 4d to 6s; pork, 5s9d to 6s 9d. Very few store beasts. Fat beasts a good number to hand, and prices quite up to last week. Fat sheep, a good show, but not a brisk trade. Stores some very good lots of stock ewes and lambs, but trade rather slow. Fat pigs, short supply, and a brisk trade. Stores, a fair trade.

Canterbury, Saturday.—A good supply of old sheep and lambs evidenced a fair demand. One-lamb ewes realised 41s 6d; old sheep, 15s to 30s; fat lambs, 30s to 34s; strong stores, 20s to 25s, working lambs, 14s to 16s per head.

Carlisle, Saturday. The weather continuing so very wet, the supplies of Irish store cattle were small for the season, and consisted chiefly of heifers, including a number suitable for wintering purposes. Fair attendance, but trade slow, at no change in prices, which were quoted at from £6 10s to £8 10s for small specimens, and from £10 10s to £16 10s for forward examples. Bullocks up to £14 10s; small supply of pigs and slow sale at 15s to 16s.

Chester, Thursday.—Fair supplies of all descriptions of store stock, with slightly improved demand, especially for good dairy stock. Prices were again irregular, but on the whole firmer than last week, and a better tone prevailed throughout. Larger supplies of sheep: prices tended upwards. Quotations:—Milch cows, £14 to £21; calvers, £9 to £13; heifers, £5 to £14; stirks, £5 to £8; bullocks, £10 to £14; sheep, 22s to 26s.

Chichester, Wednesday.—Rather a short supply of fat stock, but sufficient for the demand, trade being firm at late rates. A good many store sheep were penned, and there was a healthy tone about the business in this department, the recent improvement in feeding prospects bringing more buyers to the market. On the whole, prices showed a decidedly better tendency.

Colne, Wednesday.—A fair number of animals offered. Business was brisker at slightly improved rates. English calving beasts sold at £14 to £22 10s; geld beasts, £12 to £20; calving heifers, £14 to £18; cross breds, £8 to £12; bulls £10 £14 each. Beef, 5½d and 6d; mutton, 6½d and 7d; lamb, 7d and 7½d per lb.

Doncaster, Tuesday.—Only a poor supply of cattle and sheep, the former being rather inferior in quality. Prices a shade easier. Beef made 7s 6d to 8s 6d per stone. Ewe mutton, 5d to 6d; shearlings, 7d to 8d; and lambs, 8d to 9d per lb. Veal, 7d to 8d per lb.

Dorchester, Saturday.—Very small supplies and small attendance. Beef sold fairly well. Heifers and calves sold from £12 to £19 15s; cows and calves to £8 13s; barreners, £9 to £12 15s each; fat heifers from £15 to £22 5s Small supplies of sheep. Fat wethers sold from 46s to 50s; ewes, 44s to 52s 6d; crossbred lambs, 26s to 33s 6d.

Dublin, Thursday.—Practically no alteration in price of good cattle. Middling and inferior sorts more difficult to realise and prices still tending in favour of buyers. Slow, dragging trade for sheep and lambs. The very choicest qualities did not touch late rates, while middling and inferior were much lower, many lots remaining unsold. Cattle (best), 31s to 34s per cwt. Inferior descriptions back to 28s per cwt. Mutton, 5d to 7d per lb. Lambs, 11s to 34s each.—GANLY, SONS, AND CO.

Dumfries, Wednesday.—Beef in good demand at late rates. Horned bullocks made up to £15, polled bullocks to £15, Galloway heifers to £16, Galloway cows to £13, Ayrshire cows to £11, and Ayrshire bullocks to £16.

Driffield, Wednesday.—Only a medium show of beef. Trade, which opened fairly well, dropped towards the close. Best beef made 7s 3d to 7s 6d per stone. A fair trade in mutton, shearlings making up to 8lb per lb and ewes 7d to 7½d. There was not a large show of lambs, and prices varied from 29s to 42s per head.

Edinburgh, Wednesday.—Owing to bad weather there was a small attendance of buyers, stock selling at a disadvantage. Half-bred lambs sold to 26s, Cheviots to 24s, grey-faced to 32s, and half-breds to 40s. Bullocks made to £11 10s, stirks to £9 15s, shorthorn cows sold to £24 10s, crosses to £19. Irish £22, Ayrshire £19.

Gainsborough, Tuesday.—Fair show of calves, and moderate demand at 30s to 40s per head.

Gisburn, Wednesday.—Market rather thinly attended, and trade principally representing the English section, was about on an average

Glasgow, Wednesday.—Market well supplied, especially with secondary descriptions, and values for them were a trifle cheaper. Good qualities maintain their price. Top Scotch cattle, 69s per cwt; secondary, 60s; top Irish, 58s to 60s; top mutton, 8d to 8½d per lb; secondary, 7d to 7½d; lambs, 8d to 8½d per lb. Dead meat in fair request at late prices; best Scotch beef, 6d; States, 5½d; home cows, 5d per lb.

Hailsham, Wednesday. — Best beef, 4s 6d to 4s 10d; inferior ditto, 3s 8d to 4s 6d; prime mutton, 4s 8d to 5s 4d; inferior ditto, 4s to 5s; lamb, 6s to 6s 4d; veal 4s 8d to 5s 6d. Good average market; brisk trade everything being sold.

Hereford, Wednesday.—Return of stock brought to the cattle market this day:—Bullocks and cows 349, calves 72, sheep 1,894, lambs 1,401, pigs (fat and sows) 7, sucking pigs 29, pigs (stores, not more than ten) 173, pigs (stores, more than ten) 134. Prices of stock: Best beef, 6d to 7d per lb; wether sheep, 6½d to 8d per lb; ewes, 5½d to 6d per lb; veal, 9d per lb; lamb, 9½d per lb; pork, 4½d to 5d per lb; bacon, 4d to 5d per lb.

Hereford, Wednesday.—Beef a shade easier. Best quality 6¾d to 7d per lb, inferior about 6d. Calves, which varied much in quality, were selling well, the top price being about 7d to 7¼d per lb. A good deal of mutton was bought by weight. Wethers met with a brisker demand at 7½d to 8d, ewes about 5½d to 6½d per lb. Lambs sold pretty well at about 7d to 8d. Porkers went fairly at 5¾d to 6d. Trade for store pigs not so good. Store cattle trade dull.

Lancaster, Tuesday.—Heavy supplies of fat cattle, sheep, and lambs. Prices were in buyers' favour. There was an exceptionally good trade for calving cows, at £18 to £24. Good market for sheep and lambs and fat cattle. Fat heifers, 6¼d to 6¾d; cows, 5½d to 6d; veal calves, 6½d to 7d; shearlings, 8d to 8½d; lambs, 8d to 8½d; and ewes, 6d to 6½d per lb.

Leicester, Wednesday.—Consignments of grass-fed bullocks were larger, and came to hand in excellent condition. Buyers and dealers were well represented, and trade for prime qualities rather brisker, but inferior were neglected. Choice bullocks 6¼d to 6¾d; secondary 6d to 6¼d; cows, 5d to 5½d; heifers, 6¾d per lb. Sheep were a large supply, and sold freely at firm prices, choice wethers making 8d to 8¼d per lb; large sheep, 7d to 7½d; lambs, 8¾d per lb. Calves were flat at 7d to 7½d per lb.

Leicester, Saturday.—Improved deliveries of stock in good condition. Fair attendance of buyers and dealers. Trade steady. Bullocks, a dragging trade at £10 to £13 per head; milch cows, £16 to £22 each; calves and young stock, slow trade.

Lincoln, Tuesday.—Supply of horned stock was smaller than last week, but trade was steady. Good beef made 7s 6d to 8s, and lower qualities 6d to 7s 6d per stone. The number of sheep was about up to the average and demands were fairly numerous. Ewe mutton made 6½d to 7d, wether 8d to 8½d, and lambs 8d to 9d per lb.

Lincoln, Friday.—The improvement in the yeastage has caused practically no alteration in the price of horses. Many beasts fetch from £14 to £20, and to any strong beasts realised £8 to £12, and yearlings £5 to £8 each. No three-year-olds were on offer. A fair number of sheep were penned and met with a moderate demand; drape ewes realised from 35s to 43s; and lambs, 17s to 30s; no game is worth shown. Pigs were stocked in large numbers and found purchasers. Stores at 20s to 22s, and suckers from 16s to 19s each.

Malton, Tuesday. — Not a very heavy show of stock, but a fair attendance of buyers. All classes of beef were in demand, and slightly exceeded last week's quotations. Cows were scarce and dear, making fully 5d per lb. Best lambs sold. Good butter beef sold and other classes as per stone. Heavy sheep were quiet. Good pig sold from 6½d per lb.

Newcastle, Tuesday. — Market quiet; prices have. Numbers of cattle, 1,841; sheep and lambs, 6,0[illegible] calves, 50; pigs, 360. Prices: Sinking the offal, [illegible] beef, 6s to 7s 9d per stone; mutton, 6d to 8d; lamb, 8d to 8½d; veal, 5d to 8d per lb.

Norwich Saturday.—The supply of store cattle showed some increase here to-day. There was more inquiry, fresh arrivals having prepared keep prospects. Fat trade was generally

firm. The supply of fat beasts was moderate. Prices showed a good tone at 7s 6d to 7s 9d and 8s per 14lb. The supply of store sheep was somewhat reduced. Lambs were in rather better demand at 22s to 33s per head, while keeping shearlings brought 40s to 46s per head. Fat sheep made 8s 6d to 9s and 9s 6d per 14lb.

Nottingham, Wednesday.—A very fair supply. Best beef sold at 7s 9d to 8s per stone, best mutton at 8d to 8½d per lb, ewes at 6d, lambs 8d to 8½d, and calves 7½d to 8d.

Penistone, Thursday.—Good attendance, and a capital supply of cattle, both dairy and laying off. There was a good demand for the former. Best milk beasts made £18 to £21; second, £16 to £17; third, £12 to £15; heifers, £12 to £14: and calves, 18s to 26s each. Two pens of lambs on offer at 26s each.

Preston, Wednesday.—Fair attendance, and good supplies, but trade was quiet owing to local holidays. Prices were practically unaltered from last week. Beef, heifers and bullocks, 6½d to 7d; cows and bulls, 5½d to 6d. Mutton, hoggs, 7½d to 8d; tups and ewes, 5½d to 7d; lambs, 8d to 8½d; calves, 5½d to 6½d per lb. At market—172 cattle, 1,960 sheep, and 80 calves.

Romford, Wednesday.—Trade about the same, the supply being good. Best fat beasts made 4s 4d to 4s 6d per stone, and middlings 4s to 4s 2d; calves, 4s 10d to 5s; best sheep 5s 6d to 5s 8d, middlings 5s to 5s 2d; lambs 6s to 6s 2d; small porkers 3s 8d to 4s; large hogs, 2s 8d to 3s.

St. Ives, Monday.—The number of stock entered at this market was:—Beasts, 375; sheep and lambs, 2,022; pigs, 316. Beef, 7s 3d to 8s 3d; mutton, 7s 7d to 9s 11d; lamb, 8s to 10s; pork, 6s to 7s. Fat beasts, sheep, and pigs, good demand; stores fair. Milch cows good trade; for best prices £13 to £23.

Sheffield, Tuesday.—The show of milch beasts was only small, but sufficient to meet the demand, best qualities making from £18 to £23; poorer, from £13 to £15.

Spalding, Tuesday.—A very fair show of both cattle and sheep, with an improving trade. The best beef made fully 8s a stone, and mutton 8d a pound. A better trade for store beasts, and trade for lambs showed a marked improvement.

Stockton, Wednesday.—Numbers on offer, 206 cattle, 2 calves, 323 sheep, and 150 lambs. A small show of best cattle, with a slow trade. Best sorts made 8s to 8s 3d per stone, and rougher kinds 7s to 7s 6d. Young sheep made 8½d per lb, lambs 8½d to 9d, ewes 6d and 7d, and tups about 5d.

Taunton, Saturday.—Moderate supply, fairly good attendance, and rather quiet trade.

Thame, Tuesday.—The good prices that have been realised of late helped to swell the market, and there was again a very full supply of stock of all descriptions, but the trade was not so fast as last week, although the best quality met with a good demand. Mr. Bond had a large supply, his entries comprising 121 fat beasts, 19 down calving heifers and cows and calves, 545 fat sheep and lambs and stores, 64 fat and weaning calves, and 129 fat and store pigs. Fat bullocks made £17 to £23 10s; fat heifers, £14 to £20; down calving heifers, £14 to £17 10s; fat wethers, 45s to 61s 6d; fat ewes, 35s to 49s 6d; fat lambs, 31s to 42s 6d; store lambs, 24s to 30s; fat calves, £3 to £5 1s; cow calves, 24s to 60s; bull calves, 22s to 48s; fat pigs, 9s 6d per score. Stores a better trade.

Wakefield, Wednesday.—A quiet tone prevailed at our market to-day. Beef made from 5d to 6½d per lb. Small sheep, 8d to 8½d per lb; other qualities, 4½d to 7½d; lambs, 8½d to 9d. Numbers at market:—Beasts, 1,366; sheep and lambs, 3,284.

Wakefield, Wednesday.—There is again a slow trade in all departments. Choice beef makes up to 6½d as top price; nice small sheep from 8d to 8½d in some exceptional instances, good strong sheep 7d to 7½d, ewes 6d per lb. Beasts penned 1,366, sheep 3,284.

Wolverhampton, Wednesday.—Moderate supply; fair trade. Quotations: Herefords, 6½d to 7½d; shorthorns, 6½d to 6¾d; calves, 7d; wether mutton, 8d to 8½d; ewes, 6d; lambs, 7½d to 8d per lb; bacon pigs, 9s 6d; porkets, 9s 6d to 9s 9d; sows, 7s to 7s 6d per score.

Worcester, Saturday.—Small supplies and fair trade for cattle at late rates. Mutton firm, without much demand. Calves made full prices. Store trade quiet. Beef, 7d to 8d; inferior, 5d to 6d; wether mutton, 7d to 8d; ewes, 5d to 6d; and veal, 7d to 8d per lb.

York, Thursday.—The show of store cattle was only moderate, but buyers were scarce, and the offer was quite equal to the demand. Fresh three-year-old bullocks were most inquired for, and made up to £15, two-year-olds £10 to £11 10s, and stirks £6 to £8 each. Calving and milch cows were only a moderate trade, and barely maintained late rates, varying from about £15 to £22 10s for the best. This was the first of the large lamb fairs of the season, and a large number were penned, but trade was slow. North-country shearling sheep realised 38s to 46s; Mashams, 37s to 43s; twice crossed, up to 40s; North-country lambs, 26s to 32s; South-country, 26s to 34s 6d; Mashams, 18s to 24s; and twice crossed, up to 28s each.

York, Friday.—Calves, 7½d to 8d per lb; small sheep, 8½d ditto; large sheep, 8d ditto; ewes, 7d ditto; lamb, 9d ditto; small pork pigs, 6s 3d to 6s 6d per stone; large pork pigs, 5s 6d to 6s ditto.

FOREIGN.

Deptford, Thursday.—Beast entries totalled 1,161, this being 186 head less than shown on Wednesday last, and comprised 521 United States and 640 Canadian. Trade ruled steady at 4s to 4s 2d for the former, and 3s 6d to 3s 8d for the latter, per 8lb, to sink the offal. No sheep were offered.

EGGS.

Tuesday.—Bedale: 13 for 1s. Gainsborough, 14 for 1s. Leeds: Yorkshire, 10s to 11s per 120; Irish, 8s to 9s 6d; Danish, 7s 9d to 9s 3d, Austrian blues, 6s 6d to 7s; ditto reds, 5s 7d to 5s 10d. Settle: 12 to 13 for 1s. Sheffield: 12 to 13 for 1s. Spalding: 13 and 14 for 1s.

Wednesday.—Barnsley: 10 and 11 for 1s. Boston: 13 and 16 for 1s. Colne: 1s 7d per score. Goole: 13 for 1s. Hereford: 13 to 14 for 1s. Keighley, 10 to 11 for 1s. Kirbymoorside: 13 and 14 for 1s. Knaresborough: 10 to 11 for 1s. Market Drayton: 12 to 13 for 1s. Market Weighton: 13 to 16 for 1s. Masham: 13 and 14 for 1s. Northallerton: 12 to 13 for 1s. Stockton: 10 to 11 for 1s. Uttoxeter: 1s 6d to 1s 7d per score. Whitby: 11 or 12 for 1s. Worksop: 1s 10d per score.

Thursday.—Brigg: 13 to 14 for 1s. Driffield: 14 for 1s. Penistone: 12 for 1s. Ripon: 11 to 12 for 1s. Scarborough: 9 or 10 for 1s. Wetherby: 11 and 12 for 1s.

Friday.—Derby: 11 for 1s. Chester: 12 for 1s. Crewe: 12 for 1s. Easingwold: 13 and 14 for 1s. Grimsby: Austrian: 5s 9d to 6s 10d per 120; Russian, 6s 6d to 7s.; Danish, 8s to 9s 2d. Leeds: Yorkshire, 10s to 11s per 120; Irish, 8s to 9s 6d; Danish, 7s 9d to 9s 3d; Austrian blues, 6s 6d to 7s; ditto reds, 5s 7d to 5s 10d. Leyburn: 12 or 13 for 1s. Lincoln: 13 for 1s. Otley: 12 or 13 for 1s. Nantwich: 12 for 1s. Stockport: 10 and 11 for 1s. Stratford-on-Avon: 1s 6d to 1s 9d per score. Whitchurch: 12 and 13 for 1s.

BUTTER.

Tuesday.—Bedale: 1s 5d to 1s 7d per roll of 24oz. Gainsborough: 1s 1d per lb. Leeds: Danish, 120s to 126s per 112lb; Irish creameries, 112s to 116s; York lump, 14s 6d to 15s 6d per stone; ditto long rolls, 14lb, 1s 9d to 2s; fresh butter in 1lb prints, 1s 3d per lb. Settle: 1s to 1s 1d per lb. Sheffield: 1s 2d to 1s 3d per lb. Spalding: 1s 1d per lb.

Wednesday.—Barnsley: 1s 2d to 1s 3d per lb. Boston: 1s to 1s 1d per lb. Colne: 1s 1½d per lb. Goole: 1s 3d per lb. Keighley: 1s 2d to 1s 3d per lb. Kirbymoorside: 1s to 1s 3d per lb. Knaresborough: 1s 8d to 1s 10d per roll of 24oz. Hereford: 1s 3d to 1s 6d per lb. Market Drayton: 1s to 1s 1d per lb. Market Weighton: 1s 1d per lb. Masham: 1s 6d to 1s 7d per roll of 24oz. Northallerton: 1s 4d to 1s 6d per roll of 24oz. Stockton: 1s to 1s 3d per lb. Uttoxeter: 1s 1d to 1s 3d per lb.

Thursday.—Brigg: 1s 2d to 1s 3d per lb. Driffield: 1s 1d per lb. Penistone: 1s 2d per lb. Ripon: 1s 6d to 1s 8d per roll of 26oz. Scarborough: 1s 6d per lb. Wetherby: 1s 2d to 1s 3d per lb.

Friday.—Derby: 1s 2d per lb. Easingwold: 1s to 1s 1d per lb. Grimsby: Choicest Danish, 122s to 124s (per 11 lb); Dutch, 115s to 116s; Canadian 106s to 110s per cwt. Helmsley: 1s per lb. Leeds: Danish, 120s to 126s per 112lb; Irish creameries, 112s to 116s; York lump, 14s 6d to 15s 6d per stone; ditto long rolls 1½lb, 1s 9d to 2s; fresh butter in 1lb prints, 1s 3d per lb. Leyburn: 1s 7d to 1s 9d per roll of 24oz. Lincoln: 1s 3d to 1s 4d per lb. Otley: 1s 7d to 1s 8d per roll of 24oz. Sandbach: 1s 2d to 1s 3d per lb. Stockport: 1s 2d to 1s 3d per lb. Stratford-on-Avon: 10d to 1s 3d per lb. Whitchurch: 1s 2d to 1s 3d per lb.

FEEDING STUFFS.

London, Thursday.—Linseed.—The shipments from Calcutta and La Plata last week were nil. This has caused the market to harden, and prices have advanced, especially for forward positions. Linseed cakes continue steady. London made £7 17s 6d, to £8 2s 6d. Russian, £7 10s to £7 15s ex dock. American Westerns, at £7 10s to £7 15s; Cotton cakes continue steady. London made, £4 5s to £4 7s 6d. Rapeseed is firm, but not very active. Cottonseed firm but inactive.—THE PRODUCE BROKERS, COMPANY, LIMITED.

Mark Lane, Monday.—Linseed Cakes.—Supplies continue to come along very slowly in consequence of the high rates asked by shippers, and with only small stocks values are, if anything, the turn dearer. At the same time buyers are not willing to operate far ahead at present prices. Russians are firmly held at a slight advance. Americans remain scarce, but are still obtainable in limited quantity at last week's prices. English find a better inquiry, being relatively cheap at last Monday's quotations. Cotton cakes.—With a slightly improved demand and the prospect of light shipments during the next week or two, holders are inclined to raise prices. Egyptians and English sell freely at the full prices of last week. Decorticated.—Stocks are nearly exhausted, and needy buyers are compelled to pay Monday's prices, while a steamer parcel of very bright meal just arrived may be bought at the turn cheaper. Rape cakes unaltered. Maize germ meal.—Landed parcels of American are unchanged, while 2s 6d per ton less money has been paid in near positions. English is in good request at the turn dearer. Rice meal.—Rangoon in warehouse moves off quietly at last week's quotation, while in forward positions 1s 3d per ton less money would be accepted.

—PINNOCK BROS., Mark Lane.

Hull, Tuesday.—To-day the trade for home-grown wheat is steady, at last week's prices: Foreign, downward tendency, being 3d per qr lower than last Tuesday. Barley firm, at fully late rates. Oats maintain last week's prices. Beans quite as dear. American maize unaltered, Odessa corn 6d per qr dearer, from scarcity. Linseed is in good demand, and a substantial rise in price has been established during the week. Cottonseed.—The improvement reported in our last issue continued during last week. Hemp.—Market firm; inactive.—KEIGHLEY MANSTED AND CO.

WATERLOO ROUND FEEDING CAKES, £6 15s 0d PER TON; WATERLOO ROUND 97 PER CENT. PURE LINSEED CAKES, £8 17s. 6d. PER TON; WATERLOO ANGLO SHAPE 97 PER CENT. PURE LINSEED CAKES, £8 15s. 0d. PER TON; WATERLOO 97 PER CENT. PURE EGYPTIAN COTTONSEED CAKES, £4 10s 0d PER TON. ALL F.O.R. HULL.

WOOL.

London, Friday.—Wool, English, per pack of 240 lb—Fleeces, Southdown hoggs, £8 to £11 10s; half-bred hoggs, £7 to £8 10s; ditto wethers, £6 10s to £8; Kent fleeces, £6 to £7; Southdown ewes and wethers, £8 to £11 10s; Leicester ditto, £6 to £7. Colonial, per lb: Victorian, fleece, superior, 1s 6d to 1s 7d; scoured good, 1s 7d to 1s 7½d; scoured average, 1s 5d to 1s 6d; greasy average to fair, 10½d to 11½d; New South Wales, scoured average, 1s 3d to 1s 4d; greasy average, 8½d to 9½d; South Australian, greasy average, 6¾d to 7d; New Zealand, scoured average, 1s 4½d to 1s 5½d; greasy average, 8½d to 9½d; Cape, scoured superior, 1s 6d to 1s 8d; fleece average, 8d to 9d; greasy average, 6½d to 7d; Natal, scoured, 1s 2d to 1s 3d; greasy average, 7½d to 7¾d. Crossbreds, greasy, Victorian, good to superior, 10d to 1s; New Zealand, fine, 9d to 10d; ditto medium, 7¾d to 8½d; ditto coarse, 6d to 7d.

Bradford, Thursday.—Business slow in the wool market, though the tone generally is steady. Perhaps strong crossbreds are even better to sell. Top makers are at any rate asking for a slight advance. In English the only wools in strong position are bright hoggs. The yarn trade shows rather more steadiness in prices, and possibly a little more business. In piece trade prices are running down.

Canterbury, Saturday.—Trade continues dull at the prices lately current—viz., Kent fleeces, 6d; lamb wool, 4d to 6d; Downs, 8d to 10d per lb.

Leicester, Saturday.—Improved tone in wool, but volume of business not large, the better home-grown produce in very fair demand, and values all round are steady. Inferior classes difficult to sell, even at low rates. In yarns the workpeople are fully employed in keeping pace with the demand under old and new contracts.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—Vegetables [illegible] supply, but sold steadily. Potato trade quiet. Fair supplies of fruit were offered, and cleared [illegible]. Greenstuffs: Cabbages, 2s to 4s, marrows 2s to 4s per tally; peas, 2s to 3s per bag; scarlet beans, 1s to 1s 6d per sieve; carrots, 2s 6d to 3s; turnips, 3s to 3s 6d, parsley 2s to 1s 6d; leeks, 2s to 3s; mint, 2s to 3s per dozen bunches.

POTATOES.

Borough and Spitalfields [illegible]

London (King's Cross) [illegible]

MANURES.

Liverpool [illegible]

Winsford (Cheshire), Saturday.—[illegible] salt at the works. Common white salt 1s 6d per ton; refined rock salt, 3s 6d per ton; to truck loads only.—THE SALT UNION, LIMITED.

FARM.

Tomatoes on the Farm.

Many farmers grow various odd crops [illegible] do not profess to be market gardeners. I went over a farm in Wiltshire the other day where the occupier grew a nice lot of tomatoes in the open. He expects to sell half a ton. He had the opportunity of utilising a wide border by the side of some buildings, and he filled it with tomatoes which are bearing well and will probably ripen off many. Those which do not ripen in the plants can be successfully treated with heat. In ripening artificially this rule should be remembered: It is not light—sunlight—which is most wanted. It is heat. And heat will ripen the fruit without light. The present season may prove a good one for tomatoes as fruit has set and continues to set very freely. The tomato is subject to a disease like the potato disease, and it is also attacked with black rot. There is another trouble known as blight, which attacks the leaves, makes them curl up, turn colour, and drop off, with the result that cropping does not follow. How can this be met? I learn from a correspondent that freshly-slaked lime is a remedy. The experiment was made last season, purposely on land which the previous year had been in tomatoes which had been attacked badly. The result of the application was that the [illegible] on the same land this season, with no further application of lime. The blight is absent as much [illegible] would seem to indicate that [illegible] planting the same land [illegible] and that the lime is only effective when freshly applied. An experiment was made this season [illegible] land that had not been in tomatoes. But there will be no results so far as the [illegible] fresh land shows no [illegible] The great lesson to be learned [illegible] and that a rotation of crops in which neither potatoes nor tomatoes will [illegible] quently than three or [illegible] and potatoes to observe. [illegible] seems to check the blight [illegible] in connection with [illegible] lime should be applied about 15 bushels to the acre in spring, and should [illegible] prepared for planting. [illegible] Lime is sprayed with [illegible] powder, and is given in [illegible]

LIVE STOCK.

OUR ILLUSTRATIONS.

The Tamworth sow Favourite III. is the property of and bred by Mr. D. W. Phillips, The Ashes, Whitacre, Birmingham. This sow, whose sire was Whitacre Welsham 5411, and dam Whitacre Favourite 7830, won first prize at the Royal Counties Agricultural Society's Show at Winchester in June, but at the Bath and West Show, at Bath, it was placed second.

The Jersey bull Perry Farm Duplex is the property of Lord Rothschild, Tring Park, Tring, and was bred by Mr. J. A. Desreaux, St. Mary's, Jersey, its sire being Duplex 2586, and its dam Pansy Lass 3rd 7135. Perry Farm Duplex has met with variable success in the showyards this year. At the Oxford Show he won first prize for the best Jersey bull calved in 1899, and also the male championship of the breed; but at the Bath and West he was passed over altogether. A week later, at the Royal Counties Show at Winchester, he once more came out at the top of his class, but at the Royal, York, he only got a highly commended ticket.

Mr. Harry Livesey, Rotherfield, Sussex, is the owner of the Hackney mare Welcome, her breeder being Mr. J. Wilkinson Crossley, Brian Royd, Greetland, Halifax. She is by Connaught 1453—Althorp Queen 1421, by Confidence 163. In the spring Welcome won first prize in her class, and also the special prize and silver medal for the best young mare at the Hackney Horse Society Show, at Islington; whilst since then she has gained a first at the Bath and West, and a second at the Royal Show at York and the Yorkshire Agricultural Society's Show at Doncaster.

STOCK AND SHOW NOTES

By Herdsman.

After an interval of six years the show of the Warwickshire Agricultural Society (founded in 1830) will be again held at Coventry, on Wednesday and Thursday, August 29th and 30th, Lord Leigh being president. The city, which has always accorded a most hearty welcome to the Society, has again provided a suitable site and a handsome list of local prizes. The showyard will cover about 23 acres, situate at Stoke Green, within the City, and convenient of access to visitors, a frequent service of electric trams running from the Coventry railway station to the show ground. The general entries number 708, of which 504 are stock. This total does not, however, include many jumping and driving horses which, as the entries for those classes need not be made until the day of show, cannot yet be stated. There is a record entry of cattle, the show of which promises to be altogether the best the Society has yet held. There are about the same number of hunters, hackneys, and ponies entered as at Leamington last year, with fewer agricultural horses and sheep.

There is also a large entry in the implement department, and for the field competitions. There will be special jumping classes each afternoon at the Coventry Show of the Warwickshire Agricultural Society, with driving and Coventry tradesmen's turnout classes on the Thursday. The band of the 2nd Volunteer Battalion Royal Warwickshire Regiment will occupy the orchestra each day. There will be poultry and bee driving demonstrations by the Warwickshire County Council's experts both days. Luncheon and refreshments will be provided by Mr. H. Maycock, of Leamington. The railways are giving facilities for conveyance of visitors at cheap fares on the first day with excursions on the second, and if the weather be propitious, a successful meeting may be anticipated.

The annual sale of Shropshire Dunsmore sheep, the property of Mr. P. A. Muntz, M.P., will take place at Dunsmore, Rugby, on Friday next, August 31st, when Messrs. Lythall and Walters, of Birmingham, will submit 43 grand rams and 69 beautiful shearling ewes for public competition. The flock has been founded and maintained with excellent judgment and regardless of expense, high prices having been given for the past twenty years for the most impressive and fashionable sires; in fact, nearly all the leading flocks have been in turn resorted to. The result of this has been shown in this season's showyards by the extraordinary pen of five shearling rams which have been invincible, winning first prizes at the Royal Show at York, the Shropshire and West Midland Show, and the Leicestershire Show, in the strongest competition; and, besides winning other honours at these shows, the flock has also secured first and champion Notts and first Newport, Salop. As all these winners are included in the sale an unequalled opportunity is afforded the leading ram-breeders to secure most reliable sires, while tenant farmers will find the rams to be of immense scale with plenty of muscle and lean meat, and possessing good coats and skins.

Amongst the sires of the Dunsmore sheep are the noted 150gs. Buttar Blue, Mr. David Buttar's winner of first and champion H.A.S., Glasgow; the 100gs. Dunsmore Endon, winner first R.A.S.E., Manchester; Dunsmore Odstone, winner first R.A.S.E., Leicester, and Dunsmore Odstone 2nd, winner second R.A.S.E., Birmingham. The ewes are of quite the correct type, while from their grand breeding they should be invaluable for the establishment or enlargement of a flock. Many winners have been bred from ewes purchased at Dunsmore sales, and the flock itself has secured two first prizes and one second prize for shearling ewes at the Royal Show in consecutive years, while this season honours were secured with the ewes at the Royal, S. and W.M., Leicestershire, and Nottinghamshire shows. The flock has secured several first prizes from the Warwickshire Agricultural Society for the largest number of lambs from a given number of ewes, and has a big local reputation for its prolific character.

Tuesday, September 4th, is the date of this year's sale of Mr. J. E. Farmer's Shropshire sheep, at Felton, Ludlow, Salop. The catalogue comprises about thirty rams, seventy ewes, and also thirty store cattle. Mr. Farmer's flock, I may mention, is one of the oldest extant, having been founded half-a-century ago by Mr. James Hand, from whence it passed into the possession of its present owner in the year 1872. Since that date the object which Mr. Farmer has kept in view has been to produce the best, and realising that constitution is the corner stone upon which all other qualities must rest, he has never allowed a sheep to be used unless good in flesh and of the most vigorous physique, consequently the flock has become famous for the production of sheep full of flesh and of great substance. The sheep to be offered next week have been bred upon the same lines as heretofore, and sheep buyers will be well repaid by attending this sale. Several of the rams are pasture rangers, and suited for crossing purposes, or for getting good butchers' sheep. The proceedings will commence after a one o'clock luncheon, the auctioneers being Messrs. Alfred Mansell and Co.

Cumberland Agricultural Society's Show for 1901 has been fixed for Saturday, July 26th. Entries close July 13th, 1901, to Mr. William Wood, secretary, Carlisle.

The intimation that Germany will probably want to purchase horses from Australia (says the *South Australian Register*) has revived the interest in the horse-breeding industry which was aroused at the time that the contingents were in course of preparation for South Africa. Mr. W. E. Abbott, of Wingen, N.S.W., has, according to the *Pastoralists' Review*, been giving his local experiences and opinions on the breeding of horses suitable for military purposes. Out of about a million horses in Australia, he points out, it has only been possible to get 5,000 or 6,000 of all sorts by the British officers, and those have cost three or four times as much as they ought to have cost. Of those procured the great majority, he declares, were mongrels. To establish a breed of military horses, he argues, it would be necessary to follow the well-known system by which Shorthorn, Hereford, and Devon cattle were established—by selecting from within, carefully avoiding all crosses, and keeping clear of thoroughbreds. One colour should be chosen, and this could easily be preserved. But this proposal could only be carried out by the Government, he says, as the profits would be so far off as to discourage private enterprise.

The Lincoln Longwool Sheep-Breeders' Association's eleventh ram sale will be held in Messrs. J. Smith and Co.'s Field, Lincoln, on Friday, September 7th, at 10.15 a.m. precisely, sales to commence with the eight selected flocks. Among the breeders who have made entries are the following:—Mr. John Anderson, Mr. Thomas Brown, Mr. James Cartwright, Messrs. Casswell Brothers, Mr. J. E. Casswell, Mr. Tom Casswell, Mr. Charles Clarke (Scopwick), Messrs. S. E. Dean and Sons, Mr. C. S. Dickinson, Mr. John Evens, Mr. Henry Goodyear, Mr. E. M. Grantham, Mr. C. F. Hookham, Mr. Edward J. Howard, Mr. Edward W. Howard, Mr. George T. Melbourn, the late Mr. J. Money's executors, Mr. Thomas Neave, Messrs. J. T. and A. W. Needham, Mr. John Pears, Messrs. O. and W. B. B. Quibell, Mr. W. H. Robinson, Mr. William Seagrave, Mr. W. Taylor Sharp, Mr. H. Smith, jun., Sir John H. Thorold, Bart., Mr. W. C. Tong, Messrs. W. and W. H. Watson, and Messrs. R. and W. Wright. The catalogues will be ready about August 31st, and can be had on application to Mr. Stephen Upton, secretary, St. Benedict's Square, Lincoln.

The Wayland Agricultural Society's Show takes place on Wednesday, September 12th, and not on August 29th, as announced in our last issue. The entries close on Thursday this week with Mr. Sydney S. George, secretary, Walton, S.O., Norfolk.

The well-known pig-breeding establishment at Friedrichswerth, near Gotha, was destroyed by fire on Wednesday night, and about 200 pigs of considerable value were burnt to death.

Sir J. Blundell Maple, M.P., has during the past week completed the purchase of a small estate in Derbyshire, comprising between three and four hundred acres, in the parishes of Ballidon and Bradbourne, near Ashbourne, at which he intends to build a stud farm for the breeding of racehorses and hackneys.

The Cumberland Agricultural Society found the change of day for their show from Thursday to Saturday so successful that the Council have decided to hold next year's show on a Saturday, fixing it for the 26th of July.

The Queen's great interest in agriculture is shown by the practical way in which she encourages the industry among her neighbours around Windsor Castle. Her Majesty is patroness of the Royal South Bucks Agricultural Association, whose headquarters are at Slough, and she has given a silver cup for competition in connection with the annual ploughing match and exhibition of the Association at Colnbrook in October next. According to the Association's schedule just out; the cup is of the intrinsic value of twenty guineas, and it is for "the tenant farmer renting not less than 50 acres of arable land who shall show the best cultivated root crops generally." Her Majesty, in addition to this trophy, gives a prize of five guineas for the best ploughman in the field.

The Suffolk Horse Society's third annual sale of pedigree Suffolk horses takes place on Thursday next, August 30th, at Gippeswyk Park, Ipswich, when will be offered sixty animals, consisting of twenty-eight foals, nineteen mares and fillies, seven stallions and entire colts, and six geldings, from the most noted breeders and owners of Suffolk horses. I may mention that all animals of two years old and upwards are sold with a veterinary's certificate of soundness. The nomination of foals will be judged at eleven o'clock, and the sale will commence after a one o'clock luncheon.

The Royal Dublin Society has drawn up a most attractive programme for its Horse and Sheep Show at Balls Bridge, Dublin, this week. To-morrow (Tuesday) is the first day of the show, and the yard will be opened at eight o'clock, and on the three following days at nine o'clock, closing each day, except Friday, at six p.m.; Friday at four p.m. There will be about the usual number of jumping competitions, which will be similar to those of previous occasions, the course including bank and ditch, ditch and bank, stone wall not less than four feet high, double bank, water jump, and hurdle not less than four feet high. Last year the total

money prizes offered by the Royal Dublin Society for this show amounted to £2,153, this being irrespective of the numerous and valuable championship and other cups, gold and silver medals, etc., that will be awarded, and this year the sum mentioned has been somewhat increased. I am sorry to hear that the increase of prizes has not met with a corresponding increase of entries, the number this year being 1,358, as compared with 1,397 in 1899. It was fully expected some short time since that the numbers this year would have been the largest on record, and this expectation would probably have been verified had it not been that since May last large numbers of horses of a superior class have been drawn from Ireland for military and other purposes in connection with the war in South Africa. As it is, however, the numbers actually entered must be regarded as fairly satisfactory.

In consequence of the expiration of his lease, Mr. Richard S. Glover, of Trescowe, Bodmin, Cornwall, will dispose of his entire herd of pure-bred Hereford cattle, without reserve, on Tuesday, September 11th, the auctioneers being Messrs. John Thornton and Co. The Trescowe herd was founded in Mid-Cornwall by Mr. Olver's father about 1844, from stock of the Hewer blood brought into the county by the Earl of St. Germans. Mr. G. Lobb's herd of Lawhitton, in the county, also supplied some good animals by Rory O'More 1711, a celebrated bull bred by Mr. Philip Turner, of The Leen, Herefordshire, the blood of whose excellent stock has been continued in the herd to the present day. The strain of old Walford 871, first prize bull at the R.A.S.E. at Windsor 1851, also the winner of the first prize, and the gold medal for the best bull of any age or breed at the International Show at Paris in 1855, was brought in with stock obtained from Mr. T. Longmore of Walford, Ludlow. Daisy, bought from Mr. R. Davey, of Polsue House, Grampound, was by J. Rea's Zippor 2354, who was a son of the celebrated bull Sir Benjamin 1387. The herd now almost entirely consists of these strains, and will be found entered in the Herd Book from the fourth volume, when females were for the second time recorded.

The herd is remarkably even and uniform, true to type, and of a very high character. Prizes have been always won at the County Show, but it has not been the custom to exhibit elsewhere. In the eighties a large number of animals were sold to the United States of America, and the herd was entered in the U.S.A. Herd Book. Animals have also been sold to the Argentine and Jamaica as well as to home breeders. A fine lot of heifers were selected a few years ago for Her Majesty's herd at Windsor, and from one of them, Ringdove 2nd, that handsome bull Robin 19052, first prize bull at the R.A.S.E. at Birmingham, and first at the Royal Dublin Society Show, 1898, was bred. In addition to the Herefords Mr. Glover possesses a select stud of Shire horses, an old-established herd of large black lop-eared pigs, a large flock of cross-bred Devon Long Wool and Hampshire sheep, and also a great number of cross-bred laying poultry. The horses and pigs will be sold on September 18th, and the sheep and poultry on the following day.

Friday, September 14th, is the date of the year's Buxton Horse Show, at which over £300 will be given in prizes as well as challenge cups, and gold and silver medals. Entries close on September 6th, to the secretaries, Messrs. Hampson Brothers, 20, Spring Gardens, Buxton.

A large marquee erected on the show ground of the North Ribblesdale Agricultural Association, at Settle, was blown down by the wind on Saturday. About fifty pigeons escaped, and a number of cats also got away. Some of the pigeons were valued at £100 each. The exhibition of butter and eggs was damaged considerably.

Found Dead in a Corn Chest.—A horrible discovery has been made at Aboyne, Aberdeenshire. A boy named Charles Thomson, a crofter's son, was missed on the evening of the 11th inst., at the farm of Ba'naeraig. It was supposed he had gone away with his father, who was visiting the farm, but on Monday morning the body was found in a corn chest. He had fallen in, and the lid had closed on him with a snap. The stable was seventy yards from the house, and his cries could not have been heard.

Another Outbreak of Foot-and-Mouth Disease in Wales.

Another outbreak of foot-and-mouth disease was reported on Friday at Bodhyddan, near Rhyl, where fifty sheep and a milch cow are affected. At St. Asaph, on the same day, a large meeting of farmers and butchers was held, at which protests were raised against the restrictions of the Board of Agriculture, which affect an area of twenty-five miles. It was decided to petition the Board to allow cattle to be moved for slaughtering, and to reduce the area. Thousands of sheep are, it was stated, on the farmers' hands in the Vale of Clwyd, and great loss, if not disaster, stared agriculturists in the face.

A telegram states that the Board of Agriculture have ordered the slaughter of fifty sheep and one cow, found to be affected with foot-and-mouth disease, on the Home Farm of the Bodhyddan estate. Extraordinary precautions are being taken to prevent the disease spreading. The roads have been saturated with carbolic acid, and a staff of agricultural inspectors and police are guarding the approaches to the farm all round.

Ardfert Abbey Shorthorn Sale.

On Thursday, Messrs. Thornton and Co. held their final dispersion sale at Ardfert Abbey, co. Kerry, of the Shorthorn herd founded by the late Mr. W. T. Talbot Crosbie. The attendance was extremely large, and included noted breeders from all parts of the United Kingdom. The prices ranged exceptionally high, one nine-months-old heifer calf fetching 115gs., while some in-calf heifers realised as high as 105gs. There were 112 animals sold, some four or five lots being withdrawn, and they realised the handsome total of £3,500. The distinction of paying the top price of the day fell to Mr. Colman, of Surrey, who gave 115gs. for a very promising roan heifer calf by Fair Lord out of Cumbrian Belle, a cow which was herself secured by Mr. Wright, of Prumplestown, at 47gs. Three other lots also ran into three figures. For Riby Anna 22nd, a six-year-old cow by Fair Lord out of Riby Anna 15th, Major Craddock gave 105gs., and at the same figure Earl Grey's representative became the owner of Debdale Belle, a handsome four-year-old red cow by British Hope out of Anna Belle. Another cow for which there was spirited competition was the four-year-old Flower of Aylesby 25th, and the Marquis of Waterford's representative, Mr. Glennie, was the buyer at 105gs. For Flower of Aylesby 29th Mr. Williams, of Yorkshire, gave 82gs., and for Isolda Ruth 6th by Royal Arthur the same buyer gave 62gs. Among the bulls, the one which attracted most attention was, as anticipated, Stephen FitzLavender, who was bred by Mr. Deane Willis, and is now in his third year. He has again become the property of his breeder at 80gs.

Prices and purchasers were as follow:—

COWS, HEIFERS, AND CALVES.

Florentine Fitz-Riby, roan, c March, 1891, s Royal Riby 52056 ..... Mr. W. Percival 20

Sale of Devon Cattle and Exmoor Sheep.

Mr. R. J. Stranger, Court Barton, Northmolton, having given up an off farm, a portion of his well-known herd of Devon cattle and over 400 Exmoor sheep were sold by auction last week by Messrs. Blackford and Son, of Southmolton.

The herd, founded by the vendor's great uncle in 1820, has always borne a first-class character; in fact, it was one of the oldest Devon herds in existence, and for over half a century the best strains of the "Rubies" have been bred on the farm, and the prizes taken at all the leading shows in England of great numbers. Champion honours on various occasions at the Smithfield Show fell to animals from this herd, the gold medal ox of 1870 being bred by Mr. Stranger. In local competitions Mr. Stranger has taken several head prizes. Drafts of the herd have on various occasions been sold to H.M. the Queen, H.R.H. the Prince of Wales, General Sir Redvers Buller, the late Mr. M. Farthing, the late Mr. W. H. Punchard, and others, while animals have also been sent to Australia and the Argentine Republic. The company assembled at the sale was not a large one (probably owing to the brisk harvest operations in the immediate neighbourhood); those however, who did attend were present for the sole object of business, so that the biddings throughout were of a brisk nature, and the prices realised satisfactory, as the following particulars will show: –

COWS AND HEIFERS.

	Gs.

Ed heifers sold as follows: – £12 1s. 6d., £13 7s. 6d., £14 5s., £10 5s., £12 17s. 6d. Two and a half-year-old steers: – 18, £18 5s., £15 12s. 6d., £17. £17 10s., £16 2s. 6d., £15. 15s., £17 12s. 6d., £14 15s., £16 5s., £14, £16, £19 5s. Eighteen-month-old steers: £14 5s., £11 15s. (twice), £6 2s. 6d., £7 12s. 6d., £9 2s. 6d. Calves (steers): £7 17s. 6d.; £7 10s. (twice). £5 15s. (twice).

The following were the prices realised for the sheep:—Cross-bred ewes made 28s. to 30s. 6d., seventy-six full mouth Exmoor horn ewes 27s. to 30s. 6d., forty-three two-teeth ditto 25s. to 26s. 6d., eighty horn wethers 33s. to 34s. 6d., nineteen cross-bred wethers 28s. to 37s., forty-two horn wether lambs 16s. 6d. to 17s. 6d., sixteen cross-bred wether lambs 21s. to 24s. 6d., forty three horn lambs 15s. to 20s. 6d., fifteen cross-bred ewe lambs 17s. 6d. to 23s. 6d., eight horn ram lambs 21s. to 45s., eight horn rams 23s. to 75s.

Marlborough Fair.

At this fair on Wednesday Messrs. Waters and Rawlence held their accustomed sale of ram lambs, being mostly drafts from the undermentioned well-known flocks.—One hundred and ninety-six animals were offered, but the number of rams in the fair (some 500 or more) with only a moderate attendance of buyers precluded an entire clearance being made. The first consignment offered consisted of seventeen rams and one shearling from Mr. T. Palmer, of Berry Court, Wallop, Hants, the whole of which were sold at from 4gs. to 8½gs., or an average of £6. The next lot were forty lambs and two shearlings from Mr. R. Coles, Middleton, Warminster, those sold making from 5gs. to 7gs., average £5 8s. The third lot consisted of fifty-nine lambs from Mr. J. Dean, of Chitterne, Wilts, those sold making from 4½gs. to 6gs., average within a fraction of £5. The last lot offered were forty-seven lambs from Mr. H. C. Stephens, M.P., Cholderton, Wilts, the majority selling at from 4gs. to 13½gs., average £5 14s.

Mr. T. Lavington held his usual sale, when about 11,500 store sheep and 300 ram lambs were penned. Trade was generally good, excepting for young ewes. Lambs met with a more ready demand than ewes, and two-teeth wethers also sold well. Prices were considered about 2s. per head above Britford. Mr. J. B. Stevens, of Ogbourne Manor, secured Mr. Judd's £5 prize for 100 full-mouthed ewes in Class 1, and Mr. W. B. Gauntlett, of Collingbourne Kingstone, gained a similar success in Class 2 for 100 wether lambs, by taking the auctioneer's prize of a similar amount. The best price for full-mouth ewes was 49s. 6d., and prices ranged from that to 35s. 6d.; six-teeth ewes, 43s. 6d. to 36s. 6d.; four-teeth ewes, 53s. to 35s.; two-teeth ewes, 54s. to 35s. 6d.; draft ewes, 40s. to 25s. Mr. Gauntlett's wether lambs made up to 52s., and prices for working lambs ranged from 37s. 6d. to 30s.; chilver lambs, 36s. to 30s.; two-teeth wethers, 47s. to 42s. Mr. G. Judd's rams were sold at prices from 8gs. to 4½gs.; Mr. R. W. Lyne's from 9gs. to 4gs. Mr. J. B. Stevens' ram lambs fetched up to 13gs., the average being close on £6.

YEARLING FILLIES.

Bonnie Florretta ..... Mr. Benj. West	60
Bonnie Jessie ..... Mr. Bainbridge	240
Bay yearling filly ..... Mr. Chambers	25

STALLION.

Master of Hilston ..... Mr. Hickling	200

Chestnut gelding, two years ..... Mr. Chambers	27
Chestnut gelding, one year ..... Mr. A. Fewson	24
Chestnut gelding, one year ..... Mr. A. Fewson	20
Black filly, one year ..... Mr. Chambers	70

The Future of Horses.

Everything indicates an excellent outlook for horses. Even common to poor horses are finding a quicker sale; at low prices to be sure, but much better than those of recent years, while fair to good sorts are doing extremely well in the way of price, and the demand is active. Really fine horses are much sought after, and when found their owners are masters of the price situation. There is a bright promise in the breeding of good horses now, and good horses are almost sure to follow intelligent coupling of sire and dam, and subsequent good care of dam and colt. The use of stallions that are made tough and strong by work will facilitate the work of getting horses that will top the market, for it is vigour and bottom, coupled with style and action that brings the best prices; and vigour and bottom will not come in the same degree from pampered and soft sires as from those whose muscles have been hardened, wind strengthened, and endurance reinforced by judicious labour.

Mr. H. Livesey's Hackney Mare, "Welcome."

HORSES.

Sale of Pedigree Hackneys at Hedon.

At Hedon, near Hull, on Thursday, Mr. R. R. Leonard sold by auction the entire stud of Hackneys belonging to Mr. Thomas Kirk, of Owstwick Hall, and twenty-seven animals from the stud of Mr. John Robinson, of Hedon. Mr. Kirk, who commenced Hackney breeding about fourteen years ago, has had considerable success both at Islington and at the local shows. Mr. John Robinson's stud has produced many high-class animals, notably Wild Agnes, Enid, and Isabel, and his contributions to the sale were of excellent quality. There was a goodly company of buyers, and the prices realised were satisfactory. Mr. Kirk's horses realised a total of 1,501½gs., being an average of 75gs. each, which is a record for this district. Mr. Robinson's realised an aggregate of 727½gs., being an average of 28gs.

The following is a list of the principal prices realised, purchasers, etc.:—

BROOD MARES AND FOALS.

Grey Abbess	Mr. Jno. Fisher	28
Dark Polyanthus	Mr. Jno. Foster	50
Bay filly foal	M.... Mr. A. Fewson	48
Bay Polyanthus	Mr. Thompson	60
Dairymaid	Mr. H. Trowill	220
Foal	Mr. A. Morton	80
May Queen	Sir Walter Gilbey	161
Empress of Holderness	Mr. Jas. Chambers	115
Brown mare	Mr. W. Lloyd	46

THREE-YEAR-OLDS.

Dorris	Mr. H. Lamplough	35
Harbour Farm, Gwendoline	Mr. J. Chambers	1

TWO-YEAR-OLDS.

Bonnie Bertie	Mr. Bainbridge	100
Bonnie Corsena	Mr. Hartley	2

Sale of Horses at York.

Messrs. Walker and Sons held a special sale of pedigree Hackneys and harness horses in the paddock adjoining their repository at York on Thursday, when they offered seventy horses. There was a good attendance, and some fair prices were realised. A chestnut filly, the property of Mr. H. Creaser, realised 96gs., and a chestnut four-year-old, the property of Mr. Riley Briggs, made 72gs. The following is a list of the principal prices realised:

	Gs.
Duke, chestnut horse, three years, 15.3 hands	40
Duchess, chestnut mare, five years, 14.3 hands	46
Brown mare, five years, 15.2 hands	37
Bay mare, five years, 14.3 hands	35
Brown mare, seven years, 15 hands	41
Brown mare, six years, 15.3 hands	35
Chestnut filly, two years, 15.2 hands	30
Chestnut filly, 2 years, 15.1 hands	40
Brown yearling filly, 14.3 hands	30
Chestnut horse, four years, 15 hands	46
Chestnut horse, four years, 15.3 hands	70
Bay gelding, five years, about 15 hands	30
Brown gelding, five years, 15.3 hands	30
Chestnut mare, six years, 15 hands	35
Dark chestnut mare, four years, over 15 hands	37
Clever grey mare, about six years, 15 hands	75
Clever grey mare, about seven years, 15 hands	37
Bay horse, seven years, 15 hands	30
Strawberry roan harness mare, five years, 15 hands	41
Chestnut gelding, six years, 14 hands	33
Bay gelding, five years, 13.2 hands	38
Charley, chestnut horse, five years, 15.2 hands	30
Bay cob mare, six years, 14 hands	

Sale of Southdowns at St. Alban's Court.

The third annual sale from this well-known flock belonging to Mr. W. O. Hammond, was held at St. Alban's Court, near Dover, on Wednesday, by Messrs. John Thornton and Co. The ewes were in rather poor condition, and consequently did not make very high prices, but sold up to 60s. each, the principal purchasers being the Hon. E. V. Bligh, Hon. Ralph Neville, Mr. Marriott (for the Jockey Club), Mr. P. T. Greenstead, Exors. of Mr. John Spanton, and Mr. Garrett Taylor. The average for the 280 yearlings and full-mouthed ewes was nearly £2 10s.

The rams sold well, the Duke of Portland's agent securing three of the yearlings at 26gs., 19gs., and 10gs. respectively. Mr. H. F. Plumptre also gave 22gs. for another. The twenty-eight rams made an average price of £9 17s. 7d. each. There was a large company, and the result must be considered most satisfactory, and creditable to Mr. Crawford, the courteous agent on the estate.

The Shrawardine Shropshires.

Mr. Alfred Tanner held his annual sheep sale at Shrawardine, when, in the presence of a large number of sheep-breeders and farmers, forty rams, thirty-five shearling ewes, and the stock ewes came under the hammer of Messrs Alfred Mansell and Co., of Shrewsbury. Shrawardine has for forty years been the home of a first-class flock of Shropshire sheep, and during recent years Mr. Tanner has introduced into the Shrawardine Shropshires some most valuable blood, including seven first-prize Royal winning rams.

After partaking of an excellent luncheon, the company adjourned to the sale ring, and the business of the day began at once. The stock ram Phenomenon was sold to Mr. W. Barrs at 10gs., and the two-shear ram Corden's Choice went to Mr. J. H. N. Walford for 11gs. The buyers in the shearling ram section were Mr. E. J. Frank, 120gs. (for a ram by Royal Selection); Mr. W. H. Goodall, 25gs.; Mr. W. Thomas, 22gs.; Mr. C. Coxon, 20gs.; Mr. A. E. Mansell, 40gs.; and Mr. Jordan, 15gs. The pasture rangers went to Mr. T. S. Minton, 8gs.; Mr. W. Nunnerley, 19gs.; Mr. King, 8gs.; Lord Harlech, 9gs.; Mr. C. F. Priestley, 9gs. and 8½gs.; Mr. Rogers, seven at 5½gs.; the Earl of Powis, 26gs.; Messrs. Edwards Bros., Stanton Lacy, 12gs.; Mr. J. Davies, 8gs.; Mr. E. Morris, 7½gs. and 5½gs.; Mr. Whitmore, 14gs.; Mr. R. C. Pryce, Shotton, 10gs.; Mr. McIver, 5½gs.; Mr. Kealing, 5½gs.; and Mr. Sankey, 6gs. The first pen of five shearling ewes sold became the property of Mr. F. Horne at £20, and the second quintet were bought by Mr. R. Darlington for £13 15s.

Mr. Thomas Fenn's Shropshires.

Mr. Thomas Fenn's (Downton Castle) annual sale of Shropshire sheep was held on Thursday, and was conducted by Messrs. A. Mansell and Co., auctioneers, Shrewsbury. All the sheep offered were of great size and bone, with lean flesh, lustrous wool, skins, and heads of the true Shropshire type. Luncheon was served at the Brakes Farm, the chair being occupied by Mr. Thomas Fenn. The loyal toasts having been honoured, Mr. W. Blakeway proposed the health of Mr. Fenn, and said since Mr. Fenn had been in the district he had always done what he could for the furtherance of agriculture. He (Mr. Blakeway) was sorry to see such a small number present that day; and he hoped that they had all come to buy. They had had bad times, and some breeders were going in for speckled-faced and Oxfordshire and Hampshire sheep; but they were not following in the same road. He would couple with the toast the name of Mr. Fenn. That gentleman, in responding, said he was afraid he could not congratulate them on farming being much better. If they were not prosperous, he would advise them to go in for breeding pedigree stock—horses, cattle, and sheep as they would be bound to make money. He sold a yearling bull a few years ago to a neighbour, and last year it was sold again for £500, and resold for £620, and some bulls eighteen months old had been sold for £200 and £100. If they turned to Shropshire sheep, they should remember what Mr. Mansell's sheep recently realised, and what better could they do?

The company then adjourned to the ring, where Mr. Alfred Mansell officiated, the following prices being realised: Two-shear rams: 20gs., Mr. Gerrard; 15gs., Mr. T. A. Clive, The Valletts. Shearling rams:—14gs., Mr. Meire, Shrewsbury; 10gs., Mr. Blake; 9gs., Mr. Williams, Stocktonbury; 10gs., Captain Heygate; 8gs., Mr. Barrow; 10gs., Mr. Graham; 8gs., Mr. Hand; 9gs., Mr. Gerrard; 13gs., Mr. S. T. H. Burne, Newport; 7gs., Mr. Harris; 8gs., Mr. W. Griffiths; 7gs., Mr. Heber; 8½gs., Mr. Wilson; 7gs., Mr. Langston; 7½gs., Mr. J. W. Dee; 6gs., Mr. Bishop; 9gs., Mr. Potter; 7gs., Mr. Flower; 5½gs., Mr. Gerrard; 6gs., Mr. Taylor; 6½gs., Mr. Flower; 6gs., Mr. J. Mellings; 5½gs., Mr. W. Blakeway. Shearling ewes:—Five shearling ewes, 52s. each, Mr. T. A. Clive; 47s., Mr. Dugdale; 46s., Mr. Dugdale; 46s., Mr. Dugdale; 44s., Mr. Bassett; 45s., Mr. Bassett; 45s., Mr. Burne; 43s., Mr. Bassett; 44s., Mr. Burne.

Ipswich Lamb Fair.

The annual sale of sheep known as the Ipswich Lamb Fair was held on Handford Hall Meadow on Wednesday, when considerably over 3,000 rams, Southdowns, and Suffolk ewes and lambs and half-breds were offered. There was a poor attendance, but trade was generally equal to expectations, except for Suffolk rams, which made disappointing prices, 4 gns. being the highest. Nine gns. was the highest price for Suffolk ram lambs, the animal being one of Mr. L. Smith's, Hasketon. Other lots ranged from 7½ to 4 gns. Ten Oxford Down ram lambs, bred by Mr. J. White, Charsfield, averaged 5½ gns., seven being top prices. About 1,0 Suffolk and half-bred ewes and lambs were offered by Messrs. R. Bird and Sons, and they realised a good average price. Twenty Suffolk shearling ewes from Mr. G. H. Simpson's, Stonham Aspal, fetched the highest price of the lot 60s. a-piece, whilst twenty first-cross shearling ewes, from the same place, made 58s. 6d. Messrs. Spurling and Sons reported that the numbers penned were slightly in excess of those last year. First cross shearlings, belonging to Mr. W. Long, Winston Hall, offered in twenties, made from 63s. to 50s. 6d. each. Forty Suffolk shearling and three-shear ewes, from Mr. J. Watkins, Claydon Hall, in two lots, were bought for 54s. 6d. and 45s. a-piece. Twenty Suffolk shearling ewes, the property of Mr. J. Hempson, Shotley, made 60s. each, another lot fetching 52s. 6d. Sixty half-bred two-shear ewes, sent by Mr. A. B. Newson, Old Newton, realised 46s. 6d. each, whilst other lots went from 44s. to 25s. 6d. The only Suffolk ewe lambs offered were twenty-two from Mr. B. Hitchcock, Creeting, these fetching 22s. 6d. each. Fifty black-faced wether lambs, from Mr. T. Woodward's Exors., Old Newton, realised 33s. 6d. each, whilst another fifty made 29s. Half-bred ewe and wether lambs, the property of Mr. F. T. Cobbold, were sold in fifties, at 28s., 26s. 6d., and 26s. each. Some choice shearling Southdowns, from Mr. G. Courtauld, Halstead, made 3½ gns., to Capt. Pretyman, M.P., others being bought by Mr. A. H. E. Wood and Mr. W. Nocton. An entry of ten Suffolk ram lambs, from Mr. H. N. Dunnett, sold at prices ranging from 4½ gns., Mr. Wm. Long at £4 4s.

Lockerbie Lamb Sales.

The Lockerbie auctioneers held a three days' lamb sale last week, at which about 24,000 sheep were disposed of. On the first day (Tuesday) about 10,000 feeding sheep and half-bred lambs were sold. There was a large gathering, and keen competition was experienced for all classes. Prices were fully 5s. over those of last year. On Wednesday the pens contained 13,000 Cheviot and blackfaced wedder lambs. The best class sold at 16s. to 21s. 3d.; smaller, 9s. to 14s.; blackfaced wedder lambs, 8s. to 13s. 6d.; and ewe ditto, to 23s. 9d. On the concluding day about 9,000 Cheviot and blackfaced ewe lambs were offered. Trade opened fairly active, and as the sale progressed prices hardened. The demand for Cheviot ewe lambs proved satisfactory. As a general rule prices showed an increase on the year of 2s. Blackfaced lambs also moved off freely at [illegible] smaller increase. Cheviot wedder lambs made 15s. to 25s.; secondary, 11s. to 17s.; blackfaced ewe lambs of the best class, 15s. 3d. to 16s. 3d.; and secondary, 8s. 9d. to 14s. each.

Sheep Sales at Sydney.

The annual sale of stud and flock sheep at Sydney, New South Wales, took place on the first week of last month, commencing on the Monday and continuing until the Friday. The present was a satisfactory one, considering the conditions under which it was conducted. There was still an unprecedented [illegible] of the colony only partly relieved from the drought, whilst in Queensland there was nothing at all. Had the sales of sheep opened the week during which the rains had ever experienced. Taking the above items together with the circumstance that [illegible] hardly be expected to come from the [illegible] colonies, it will be seen that the [illegible] none too rosy for stud sheep breeders. In a [illegible] degree must be added the plague scare, which kept away a number that are annually led into buying. The bidding was more penalty, and [illegible] there been such vagaries exhibited by buyers. It is difficult to assign a [illegible] which was noticed directly the [illegible] over. The best example which can be given of the idiosyncrasies of the buyers was presented in the offers for the Tasmanian sheep. One breeder obtained as low as 15 to 22 guineas for several of his stud sheep, yet on the second day his flock sheep brought as high as 41 guineas.

On the first day Messrs. Weaver and Perry opened proceedings by offering a choice selection from the stud of the Springfield Pastoral and Estates Company, Limited. The [illegible] really high-class lot, but from the beginning there was a hesitancy on the part of the bidders, and the animals did not bring anything like their value. There was no doubt that the best ram offered was Slender Sam, bred by Mr. H. C. White, of Havilah, and purchased by Messrs. H. E. A. and V. White, of Bellbrues, Scone, for 200gs., the top price of the day. Slender Sam is of the good [illegible] dense and nuggetty, and carrying a very even [illegible] of an excellent character. Others from the same flock that realised good prices were: Boxer, 205gs.; Teasing Tom, 235gs.; and Burley Ben, 100gs.; twelve stud rams averaging £[illegible] At the sale of these sheep [illegible] and a number of very fine sheep were sold at ridiculous prices, and it was not until the Company's animals were reached that prices hardened. Only twelve rams had been sold on the [illegible] an average of £66 1s. 3d. The big-framed sheep of Messrs. Lochfield Brothers [illegible] prices; but the very fine lot of rams sent in by Messrs. Clark Brothers were very much [illegible] Their five dense ewes averaged £25 4s. They were certainly the best sent in for the [illegible] The Lincolns and Shropshires did not fare better. The champion Lincoln at the recent show at Sydney went for the absurdly low price of 15gs.

On the Tuesday Messrs. Hill, Clark, and Co., in conjunction with Messrs. Powers, Rutherford, and Co., of Melbourne, were the auctioneers. The catalogue comprised 200 merinos and 300 long-wools, and the lot was disposed of in good time. The sheep were classified in sections of merinos, Lincolns, and Shropshires. The [illegible] satisfactory for merinos. The lot submitted by the Collaroy Company, Limited, averaged 63gs., the highest price paid being 230gs. This was for a stud ram three years old, sired by Green Mountains [illegible] eleven months' wool at the time of sale, the purchaser being Mr. E. Jones, of Cadow, Forbes. The total amount of the sales on this day was £3,563 3s. 3d. for 442 rams and ewes sold.

On the Wednesday and Thursday the sales were conducted by Messrs. Goldsbrough, Mort and Co., whose catalogue was a very heavy one—2,650 merinos. The highest price on these days, and which also proved to be of the whole sales, was 600gs., given for Loyalty II., bred by Mr. Thomas Gibson, Eskvale, Tasmania. The bidding for the ram was exteremely brisk, but by persistently raising the figure, Messrs. G. H. Keach and W. H. Bennett, two Tasmanian stud-masters [illegible] for their flock. Loyalty II. is by Loyalty, a grand son of Royal Hero; dam by [illegible] III. by Billy, by Magenta, by Premier, by Sir Thomas. Apart from his [illegible] the best sent over from Tasmania. Mr. Gibson's eight rams made the fine average of £215 5s. 7d. Another Tasmanian [illegible] John, bred by Mr. W. H. Bennett, of Bloomfield, to Mr. George Bruce, of Loombah, near Molong, for 280gs. Sir John was bred by Mr. John Taylor, of Wynton, and was [illegible] by the Sydney Wool-selling [illegible] the best-conducted [illegible] town, Tasmania, sheep show. The Hon. F. W. Haddy also [illegible] Young Ewe [illegible] years old, brought 310 [illegible] bidding for the sheep of Mr. R. T. Gibson, of Eskvale. Sterling [illegible]

cured at 300gs. by Mr. Stewart, for a Riverina firm, and the other rams sold also well, the eight making the fine average of £163 16s. Thus father and son obtained the two best averages of the sale. Last year Mr. John Taylor, of Winton, obtained the splendid average of £293, but on this occasion he did not send his best, and the result was his average was greatly reduced, fully to as low as £46. Mr. Herbert Gatenby's sheep created a bit of a stir amongst the bidders. The first ram, Royalty, a son of the 1,000-guinea Royalist, was a very fine animal, and at 505gs. Mr. E. Martin, who purchased for a New South Wales pastoralist, secured a valuable ram at a reasonable price. Mr. Martin also secured two other very fine sheep, one in Mr. Russell Gibson's lot, a son of Puritan, at 170gs.; and the other in Mr. S. H. Grueber, jun.'s lot, in Commander-in-Chief, a son of President, at 250gs.

On the concluding day the lots were as usual composed of imported stock. The offerings consisted of 48 Vermont merinos, namely 23 stud rams and five stud ewes, imported by Messrs. Morrison and P. B. Norton, and 43 Spanish and American merino rams and ewes, registered in the Vermont and New York Sheepbreeders' Association. One of Messrs. Morrison and Morton's ewes realised 160gs., which is the highest price paid for a ewe in Sydney for many years past. These two consignments were submitted by Messrs. Hill, Clarke and Co. Messrs. Weaver and Perry also offered 10 Gadegast and four Rambouillet rams imported from Germany. The former lot were with but one exception, which realised 100gs., sold to a Queensland breeder, whose name was not mentioned.

On the whole, in face of the disturbing elements which prevailed previous to the sales, the stud sheep fair of 1900 must be numbered amongst the best. Below we give a summary of the sale.

	Merinos.		
	Total.		Average.
795 stud rams	£21.873 18 6		£27 10 4
227 stud ewes	2,970 19 6		13 1 3
2261 flock rams	12,055 2 0		5 8 7
	British Breeds.		
224 rams	£687 6 0		£3 0 7
53 ewes	138 6 0		2 12 2
3560	£37,726 12 0		

Contagious Diseases of Animals.

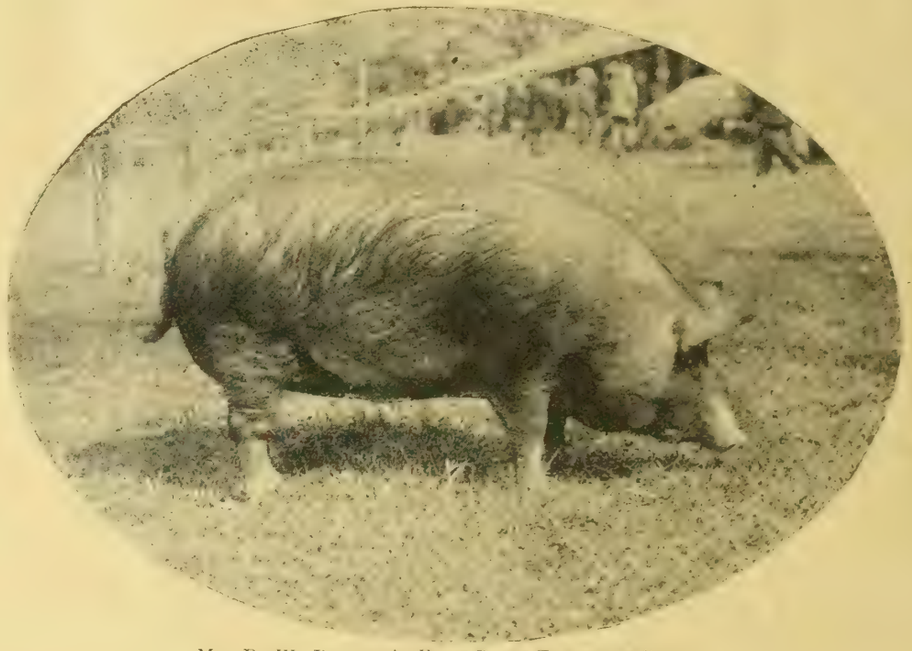
NOTE.—The figures for the current Year are approximate only.

Horncastle Horse Fair.—This annual fair took place last week. The principal day was Monday, when a very large number of all classes of horses were brought into the town, and a numerous company were present. There was a good trade for better class horses, but many of the inferior sort were left unsold. Those suitable for Army purposes found a ready sale. Good cart horses made £60 to £80 each. Van horses were a slow trade, while there was no business whatever among Welsh animals. During the afternoon, Mr. Joseph E. Walter, auctioneer, disposed of thoroughbred horses belonging to Mr. W. Taylor Sharpe, Baumber Park, Horncastle, and Mr. W. E. Elsey, Baumber House, Horncastle. The highest price realised was 95gs.

PIGS.

Too Sour Food for Pigs.

Mildly sour food for hogs is all right. But when the house slops in the swill barrel have turned to acetic acid or vinegar, the matter of sourness is carried too far. Soured skim milk or butter milk is excellent for hogs when mixed with ground grain of some sort, but when it is put into that oversoured swill barrel it soon becomes like the rest of the mass, and such food causes looseness of the bowels and disturbs the digestive organs in many ways. Where maize or maize meal is the exclusive grain food, properly soured slop may be fed with advantage, but when it has reached the vinegar stage it has lost its ability to make fat or growth. For sows nursing pigs such excessively sour stuff is the worst kind of food, being almost sure to cause diarrhœa in the pigs. Such sour stuff often creates an aversion to good food, and an abnormal appetite that earth, sand, old boots, etc., are eaten to satisfy. This is a manifestation of the demand of nature to get alkaline salts into the system to neutralise the gases generated by the acids taken into the stomach.



Mr. D. W. Phillips's First Prize Tamworth Sow.

Transactions in Store Stock.

[*From the Irish Department of Agriculture and Technical Instruction.*]

There was a small fair at Fethard, co. Tipperary, on Tuesday, at which demand was rather slow, and a number of cattle remained unsold. A fair supply of springers only met a moderate demand. Prices: Yearlings, first class, £8 5s. to £9; second class, £6 to £7 12s. 6d.; third class, £5 5s. to £5 10s. Two-year-olds, first class, £11 5s. to £13 15s.; second class, £9 to £11; third class, £7 10s. Three-year-olds, first class, £14 15s.; springers, first class, £14 15s. to £16 10s.; second class, £10 10s. to £13 12s. 6d.; lambs, first class, £1 5s. to £1 7s. 11d.; second class, 19s. to £1 4s.; hoggets, second class, £1 6s.; young pigs, eight to ten weeks old, averaged about 17s. each.

There was a small fair at Cushendall, co. Antrim, on Tuesday, at which cattle in good condition and also sheep sold well. Prices:—Yearlings, second class, £6 10s. to £7 5s.; third class, £3 1s. 3d. to £3 13s. 9d. Two-year-olds, second class, £8 5s. to £9 13s. 4d.; third class, £5 17s. 6d. to £7 10s. Three-year-olds, third class, £7 12s. 6d. to £8. Springers, second class, £10 15s. to £13 2s. 6d.; third class, £8 17s. 6d. Lambs, second class, 19s. to £1 1s.; third class, 10s. 3d. to 14s. Hoggets, second class, £1 5s. to £1 9s.; third class, 16s. to £1 2s. Two-years-old and over, second class, £1 10s. to £1 11s. 3d.; third class, £1 to £1 4s. Young pigs, eight to ten weeks old, averaged about 20s. each.

The fair at Loughrea, co. Galway, held on Monday, was a small one, but proved quite sufficient for the demand, which was by no means brisk, except for Polled cattle, and these were bought up early. A good many young cattle in poor condition remained unsold. The supply of sheep was smaller than usual, and the demand slow, especially for lambs, a large number of which failed to find purchasers. Prices:—Calves, first class, £4 12s. 6d. to £5; second class, £3 12s. 6d. to £4 5s. Yearlings, first class, £7 10s. to £8 5s.; second class, £5 15s. to £6 15s. Two-year-olds, first class, £11 to £11 15s.; second class, £7 15s. to £9 10s.; third class, £6 7s. 6d. to £7. Three-year-olds, first class, £13 10s. to £15 10s.; second class, £10 10s. to £13; third class, £7 15s. to £9 10s. Springers, first class, £15 5s. to £16 10s.; second class, £11 to £13 10s. Lambs, second class, £1 2s. 6d. to £1 5s.; third class, 15s. to 19s. Hoggets, second class, £1 11s. 6d. to £1 13s.; third class, £1 to £1 6s.

At Baltinglass Fair (co. Wicklow), held on Tuesday, there was only a small supply of cattle, and those in good condition sold fairly well, but demand for others was very dull, and a good many remained unsold. Prices: Calves, first class, £5 10s.; yearlings, first class, £9 15s.; second class, £5 12s. 6d. to £6 17s. 6d.; two-year-olds, first class, £12 to £13; second class, £8 10s. to £11 10s. The sheep fair was composed chiefly of Wicklow mountain wethers, and the demand was not very brisk. Two-year-olds and over, second class, made from £1 4s. to £1 14s.

There was a glut of fruit in Covent Garden Market on Wednesday, and the prices ruled very low. A large consignment of greengages were sold in the Floral Hall at the rate of one penny and three halfpence a box.

SHOWS.

Belper Horse Show.

On Wednesday the tenth annual exhibition of the Belper and District Horse Show was held in the pleasantly situated meadows, which are not far from the centre of the town, and form an ideal location for the visiting public. Fortunately, the weather was tolerably fine, a few showers falling about one to two o'clock. They were not of long duration, and only slightly interfered with the proceedings. Though there was a slight numerical falling-off in the entries in the local classes, restricted to a fifteen miles radius, the strength of the open classes was well maintained, and the standard of merit all round was considered by the judges to be a good deal above the average.

Among the prizes offered were a thirty-guinea challenge cup, the gold medal of the Shire Horse Socity, the silver medal of the Hunters' Improvement Society, and the silver medal of the Hackney Society.

In the Shire section there was a very slight falling off in the entries, the diminution, for which no special reason could be assigned, being particularly noticeable in the local classes. In those upon which no restriction of locality was placed, the colts and fillies made a very good show, and many experienced judges expressed the opinion that the filly foals were the strongest lot seen in any show ring in the district this season. The winner in the open filly foal class was Mr. Victor Cavendish's bay filly Holker Minerva. The Belper Horse Society's challenge cup and the Shire Horse Society's silver medal were deservedly awarded to this filly. The open colt class brought out a string of ten, which included some of the best Shire colts to be found in the adjoining counties. The premier award was well won by Mr. R. G. Hanson's beautiful bay by Harold. At the Notts Show he was placed third in a similar class, being beaten on that occasion by Mr. J. Hodson's chestnut colt and Mr. A. P. Muntz's Dunsmore Lieutenant, but on Wednesday this ruling was reversed, Dunsmore Lieutenant, who was second, has a little more substance than the winner, and has won first prizes this season at the Northampton, Leicestershire and Burton Shows, in addition to the second at Nottingham. Outside of the foal classes, there were no particularly notable exhibits in the Shire horse section, though a high level of excellence was generally maintained. In the class for four-year-old mares, Mr. F. W. Lowndes came first with his well-known Rolleston Fuchsia, which has been a prolific prize-winner all over the country. In the light horse section, there were only two open classes of hunters, and in both of these Mr. F. B. Wilkinson, of Edwinstowe, Notts., very nearly swept the board clean of prizes, securing first and second prizes for both mares and foals. There was absolutely no opposition to Mr. Wilkinson's bay mare in the brood mare class, and some people were rather surprised to see her competing at Belper. The hunter colt and filly class resulted very similarly, Mr. Wilkinson again securing both first and second. In the Hackney classes, Mr. G. Welch, of Castle Donington, repeated in the open foal class the success he had gained in the local competition with his bay colt foal by the well-known Grand Cadet. Mr. H. Hole's Chellaston Countess being a very good second. Messrs. Cockayne Bros., of Sheffield, won premier honours in the Hackney mare class with a well-known mare which was well up to show form, Mr. J. T. C. Eadie, Barrow-on-Trent, being placed second and third with a couple of mares of his own breeding. The yearling class brought out nine stylish-looking Hackneys for adjudication. Mr. Hussey's Puzzle at once took the fancy of the judges. This chestnut is a typical Hackney, moving with great dash and style, and, in addition to the first prize in its class, brought the Hackney Horse Society's medal to Mr. Hussey. In the harness and saddle classes, Mr. F. B. Wilkinson repeated his successes amongst the hunters, securing the red rosette for both light and heavy weights. In the pony classes Mr. R. Hussey's Bog Myrtle took first place in the class confined to ponies under 14 hands which had not previously won a first prize in harness, and the same animal was placed second to Mr. A. E. Franklin's ever-victorious Lord Go-Bang in the unrestricted pony class. Lord Go-Bang had no difficulty in heading his class again under the riding test.

Barnsley.

The twentieth annual show of the Barnsley Agricultural and Horticultural Society took place on Wednesday in the Queen's Grounds, Barnsley, and until five o'clock the weather was fine, and then rain fell, but by this time the attendance was assured, and the receipts amounted to nearly £500. Up to two years ago the committee had had exceedingly bad luck, but the last two shows were financially successful, and up to the present there was a substantial balance of £400 in the bank. The prizes offered amounted to about £600, about £50 more than last year. The increase was principally in the awards in the dog section. The total entries were 635, which showed a falling off as compared with previous years. Though cattle and sheep were not numerous they made up in quality what they lacked in quantity. In many of the classes there was little or no competition. The paucity of sheep could only be accounted for by the fact that neighbouring farmers were busy with the hay-st. The horses, so far as quality was concerned were above the average.

The chief awards were as follows:—

Prize List.

CATTLE

(Open to the United Kingdom.)

Shorthorned bull, any age: 1, G. Harrison, Darlington; 2, C. H. Taylor, Middlewood Hall; 3, A. Blackwell, Oughtibridge.

Shorthorned bull, not exceeding two years: 1, T. Atkinson, Barnsley; 2, C. H. Taylor; 3, W. L. Jackson, Hollingthorpe.

Shorthorned cow or heifer in calf or in milk: 1, G. Harrison; 2, Earl of Wharncliffe; 3, J. Atkinson.

Shorthorned heifer, not exceeding two years: 1, G. Harrison; 2, J. and G. Brooke, Denby Dale.

Cow for dairy purposes: 1, C. H. Taylor; 2, J. Grayson, Park Head Farm; 3, A. Swift, Wombwell High Bridge.

Cow or heifer, in calf or milk: 1, J. Grayson; 2 and 3, A. Swift.

SHEEP

(Open to the County of York.)

Ram, any age (short woolled breeds): 1 and 2, B. H. Brookbank, Tickhill; 3, R. Richmond, Carlton.

Ram, any age (long woolled): 1 and 2, J. J. Simpson, Hunmanby.

Pen of three ewes (long woolled), having suckled lambs during 1900: 1, T. Nightingale, Bridlington; 2, C. Howard Taylor.

Pen of three ewes (short woolled), having suckled lambs during 1900: 1 and 2, B. H. Brookbank.

Pen of three tup lambs, of any breed: 1, T. Nightingale; 2, J. J. Simpson; 3, C. Howard Taylor.

Pen of three gimmer lambs, any breed: 1, T. Nightingale; 2, J. J. Simpson.

HORSES

AGRICULTURAL

(Open to residents within a radius of twenty miles of Barnsley.)

Brood mare, with foal at foot: 1, H. Yates, Cleckheaton; 2, F. Turner, Ardsley; 3, J. Hirst, Burton Grange.

Foal, bred 1900: 1, H. Yates; 2, F. Turner.

Yearling colt or filly: 1 and 2, J. Hirst.

Two-year-old gelding or filly: 1, H. Moorhouse, Denby Dale; 2, H. Yates; 3, Barnsley Hematite Steel Company.

Three-year-old gelding or filly: 1, Oldroyd Brothers, Newsam Green; 2, F. Turner.

Draught gelding or mare, four years old or upwards: 1, Oldroyd Brothers; 2, H. Yates; 3, Mrs. Gregson, Wombwell.

Silver cup for best brood mare with foal at foot: F. Turner.

Roadster mare with foal at foot: 1 and 2, D. Hopkinson's Exors., Bradford; 3, G. Clarke, Doncaster.

HUNTERS

(Open to the United Kingdom.)

Brood mare, with foal at foot: 1, J. L. Appleyard, Armthorpe, Doncaster; 2, R. Richmond; 3, R. K. Micklethwait, Ardsley House.

Two-year-old gelding or filly: 1, B. Chambers, Walkeringham; 2, R. K. Micklethwait.

Two-year-old gelding or filly: 1, R. K. Micklethwait; 2, C. R. Perry, Ardsley.

Yearling colt or filly: 1, R. K. Micklethwait; 2, C. R. Perry.

ROADSTERS

(Open to the United Kingdom.)

Hackney or roadster, 14.2 and upwards, any age or sex: 1, J. Robinson, Hull; 2, Mrs. L. Murgatroyd, Howden; 3, G. Tyson, Halifax.

Hackney gelding or mare, above 14.2, any age, ridden: 1, H. Carter and Sons; 2, C. Scorah, Bambrough; 3, W. Revill, Conisborough.

Pony, not exceeding 13 hands, driven: 1, G. E. Franklin, Derby; 2, W. H. Hawksworth, Woodhouse, Sheffield; 3, C. Mellor, Wakefield.

Gelding or mare, 14.2 and upwards, in single harness: 1, M. Pearson, Harrogate; 2, Mrs. F. Holmes, Shipley; 3, G. Tyson, Halifax.

Hackney gelding or filly, not exceeding 14.2, ridden, radius ten miles: 1, H. Carter and Sons; 2, A. P. Robinson, Wakefield; 3, C. Scorah, Bambrough.

Gelding or mare, not exceeding 14.2, in single harness (open): 1, Mrs. F. Holmes; 2, G. E. Franklin; 3, C. Kempe, Castleford.

Roadster gelding or filly, any age, not exceeding 14.2, in single harness, radius ten miles: 1, A. P. Robinson; 2, C. Scorah; 3, W. Revill, Conisborough.

Gelding or mare, not exceeding 14.2, ridden (open): 1, Mrs. F. Holmes; 2, G. E. Franklin; 3, C. Kempe.

Gelding or mare, used for professional or trade purposes, open to residents within the borough of Barnsley: 1, C. E. Smith, Barnsley; 2, H. Carter and Sons; 3, J. Matthewman, Barnsley.

Pony in single harness, open to residents: 1 and 2, C. E. Smith; 3, J. S. Rolfe, Barnsley.

Hunters, four years old and upwards (open): 1, J. Verity, Swinton; 2, W. Lockwood, Shiregreen; 3, A. Wentworth, Wentworth.

JUMPING

(Open to the United Kingdom.)

Best jumper: 1, F. G. Foster, Brailsford; 2, W. Jerome, Sutton-in-Ashfield; 3, Mrs. Blockley, Madeley.

Lancaster.

The thirty-seventh annual show of the Lancaster Agricultural Society was held on Wednesday, and fully maintained the society's reputation for an exhibition of first-class stock. Horses, as usual, formed the chief feature. The total entries numbered 1,163, which is the largest since 1891, when a record was reached. The heavy horse classes, in which the entries numbered 138, an increase of 64 on last year, brought out many of the best specimens of the breed to be found in the Fylde and Garstang districts. The yearling Scotch Light, by Warton Twilight, with which Messrs. E. and J. Whinnerah were winners, was noticed at the Royal Lancashire Show. The Hon. Victor Cavendish was, as usual, a prominent exhibitor and prize-winner. Light horses afforded another proof of the advance that has been made in Hackney breeding in this locality in recent years, the entries having a satisfactory improvement both in number and quality. The Hackney Society's medal was awarded to Golden Girl, a well-known prize-winner, belonging to Mr. Levi Fish, of Bleasdale Steel, Burton, near Preston. The hunter section, though small, contained fair specimens of the cross-country horse to be found in Westmorland and in the Lune Valley. The cattle were a good lot, as were also the sheep, the feature in the latter section being the Wensleydale classes.

The following gentlemen officiated as judges:—Cattle, Mr. A. Dixon, Temple Sowerby, and Mr. J. Howard, Grayrigg. Sheep, Longwools, Mr. Aaron Lewin, Kirkby Lonsdale; and Mr. W. Carr, Colchester; short woods, Mr. H. Tappin, Shelton, Penrith. Heavy Horses, Mr. I. Duckworth, Bury, and Mr. Joseph Hill, Congleton. Hackneys, Mr. Austin C. Carr, Chester. Hunting or Harness Horses, Mr. R. Warfield, Liverpool. Saddle and Harness Ponies, Mr. R. Whitfield and Mr. Austin C. Carr. Hunters, Mr. R. Whitfield. Leapers, Mr. R. Burrow, Mr. J. Turner, and Mr. Marshall Tyson.

Prize List.

CATTLE

Wensleydale [illegible]

[illegible]

Shorthorned bull, [illegible]: 1, J. Dawson, Moss Side; 2, J. Hoodless, Moss Side; 3, J. Dawson.

Shorthorned bull, [illegible]: 1, W. [illegible]; 2, J. Hoodless.

Shorthorned cow or heifer, [illegible]: 1, [illegible]; 2, W. [illegible]; 3, J. Hoodless.

Shorthorned heifer, [illegible]: 1, [illegible]; 2, W. [illegible]; 3, J. Hoodless.

Shorthorned bull, [illegible]: 1, [illegible]; 2, J. Hoodless; 3, W. [illegible].

Shorthorned cow or heifer, [illegible]: 1, [illegible]; 2, J. Hoodless; 3, W. [illegible].

Shorthorned heifer, [illegible]: 1, [illegible]; 2, J. Hoodless; 3, W. [illegible].

five miles of the Lancaster Town Hall: V. C. W. Cavendish, M.P.

Foal, yearling, two-year-old, or three-year-old Shire filly, bred by the exhibitor, within twenty-five miles of the Lancaster Town Hall: V. C. W. Cavendish, M.P.

Shire mare, filly, or filly foal, registered or eligible for registration in the Stud Book: 1, V. C. W. Cavendish, M.P.

Collection of horses for agricultural purposes, the property of a bonâ-fide tenant farmer: 1, E. Thompson; 2, T. Longton.

Collection of three young animals in the agricultural classes, three years old or under, to be in the hands of the breeder: T. Longton.

HACKNEYS.

Yearling colt, gelding, or filly: 1, R. Moore Birley, Houghton Hall, near Preston; 2, Lees Knowles, M.P., Westwood, Pendlebury.

Two-year-old gelding or filly: 1, L. Fish, Blacow Stud, Barton, near Preston; 2, W. Lawson, 20, Alexandra Road, Blackpool.

Three-year-old gelding or filly: 1, W. Lawson; 2, J. Clarkson, Carnforth.

Colt foal: 1, R. Moore Burley, Houghton Hall, near Preston; 2, R. Burrow, Greenbank, Whittington.

Filly foal: 1, T. B. Sykes, Breck House, Poulton-le-Fylde; 2, H. T. Parke, Withnell Fold, near Chorley.

Mare, which has produced a foal in 1900: 1, J. W. Liver, Calder Vale Stud Farm, Barnacre; 2, L. Fish.

Pony mare, three years old and upwards, not exceeding 14 hands high: 1, R. Harrison, Salisbury Mews, Chorley; 2, H. T. Parke.

Foal or yearling or two-year-old by registered Hackney sire (within fifteen miles of Lancaster Town Hall): 1, E. D. McNaughton, St. Anthony's Milnthorpe; 2, Colonel W. H Foster, M.P.; 3, R. Burrow.

Foal, yearling, two-year-old, or three-year-old Hackney filly, bred by the exhibitor, within twenty-five miles of Lancaster Town Hall: 1, T. B. Sykes.

Hackney or pony mare, filly, or filly foal, registered or eligible for registration in Stud Book: 1, L. Fish.

HUNTING OR HARNESS HORSES.

Yearling colt, gelding, or filly: 1, Colonel W. H. Foster, M.P.; 2, J. Kidd, Haverflatts, Milnthorpe; 3, Exors. of R. Dowthwaite, Upper Hall, Priest Hutton.

Two-year-old gelding or filly: 1, J. Kidd; 2, R. Ball, Bolton Holmes, Bolton-le-Sands.

Three-year-old gelding: 1, Exors. of T. Dixon, Priest Hutton; 2, J. Hartley and Co., Mill Head, Carnforth.

Three-year-old filly: 1, R. Newsham, Hornby; 2, T. A. Cornthwaite, Crawthorpe Hall, Burton.

Colt foal: 1, E. Barton, Warton Grange, Carnforth; 2, A. Orr, The Priory Farm, Hornby.

Filly foal: 1, H. L. Storey, Lancaster.

Brood mare, which has produced a foal in 1900: 1, E. Barton; 2, J. Sewell Rigg, Appleby; 3, H. L. Storey.

Three-year-old gelding or filly, in the light horse sections, to be in the hands of the breeder (Challenge Cup Class): 1, W. Lawson, 20, Alexandra Road, Blackpool.

Foal, yearling, two-year-old, or three-year-old hunting filly, bred by the exhibitor, within twenty-five miles of Lancaster Town Hall: 1, R. Ball, Bolton Holmes, Bolton-le-Sands.

Collection of horses in the light horse section, to have been previously entered in the above classes, and young horses, to be in the hands of the breeder: 1, R. Burrow; 2, A. Orr, The Priory Farm, Hornby.

SADDLE CLASSES.

Hackney mare or gelding, over 14½ hands: 1, T. Mitchell, Eccleshill, Bradford; 2, Mrs. F. Holmes, Shipley; 3, J. J. R. Irving, Blackburn.

Cob, mare, or gelding, not exceeding 14½ hands: 1, Mrs. F. Holmes; 2, W. Lawson, Blackpool.

Hackney or cob, mare or gelding, any height (confined to ten miles of Lancaster Town Hall): 1, E. Cousins, Lancaster; 2, Misses Leeming, Lancaster.

HARNESS HORSES.

Single turn-out, including horse over 14½ hands, harness, and two or four wheel conveyance: 1, T. Mitchell; 2, Mrs. F. Holmes.

Single turn-out, including cob 14½ hands, or under, harness, and two or four wheel conveyance: 1, Mrs. F. Holmes; 2, C. V. Howarth, Poulton-le-Fylde.

Turn-out, including horse or pony, any height, harness, and two or four wheel conveyance (confined to ten miles of Lancaster Town Hall): 1, J. W. Liver, Barnacre; 2, E. Cousins. Milk kitter's turn-out, milk kits not included: 1, W. Nelson, Tarnwater, Ashton, near Lancaster; 2, J. W. Fox, Aldcliffe, Lancaster.

Aspatria.

The Aspatria Agricultural Society's annual show was held on Thursday. The attendance was reduced by the heavy rain which fell in the morning, although the afternoon was fine. The entries numbered over 350, which was about the same as last year. The cattle and sheep classes were stronger, cart horses about an average, but there was a decline in the number of light horses shown. Last year the Society accepted an extra donation from Sir Wilfrid Lawson, M.P., the patron of the Society, on condition that the show was conducted on tee-total principles, but the innovation did not find favour with some of the committee, and this year a return was made to the old system, there being a tent where alcoholic liquors could be obtained.

The following were the principal awards:—

Prize List.

CATTLE.

SHORTHORNS.

Bull, two years old and upwards: 1, Messrs. Watson, Westward Parks; 2, J. W. Barnes, Wigton.

Bull, calved in 1898: 1, J. W. Barnes; 2, J. Barnes, Baurgh Syke.

Bull calf, calved in 1900: 1, J. W. Barnes; 2, J. Barnes.

Cow or heifer, in calf or milk: 1, A. Adamson, Keswick; 2, T. and J. Wood, Blencogo.

Heifer, calved in 1898: 1, J. Hayton, Wigton; 2, Messrs. Watson.

Heifer, calved in 1899: 1 and 2, J. W. Barnes.

Heifer calf, calved in 1900: 1, T. Richardson, Wreay; 2, Messrs. Watson.

Cross-bred cow or heifer, in calf or milk: 1 and 2, Messrs. Watson.

Shorthorn bull, from one to three and a half years old, the property of a tenant farmer, within a radius of ten miles: 1, Messrs. Watson; 2, J. W. Barnes.

Cottager's cow, in milk: 1, J. Jackson, Aspatria; 2, H. Topping, Wigton.

HORSES.

CART HORSES

Brood mare: 1, J. Hayton; 2, Messrs. Wood; 3, Messrs. Towers, Ireby.

Colt foal: 1, Messrs. Wood; 2, W. Blamire, Crosby.

Filly foal: 1, J. Hayton; 2, W. Blamire.

Yearling colt or filly: 1, J. Wright and Sons, Silloth Farm; 2, J. Hinde, Seaville Cote.

Yearling cart gelding: 1, M. Mashiter Scales; 2, J. Hope, Leegate House.

Two-year-old cart filly: 1, W. Hodgson and Son, Plumbland; 2, J. Hayton.

Two-year-old cart gelding: 1, T. Littleton, Aspatria; 2, J. Atkinson, Howrigg.

Three-year-old cart filly: 1, J. Hayton; 2, J. Hinde.

Three-year-old cart gelding: 1, W. Griffiths, Castlesteads; 2, Messrs. Grainger, Drumburgh House.

Mr. Jolliffe, Goldicote, Stratford-on-Avon, gave a special prize of £5 for the best pair of cart foals or fillies, one, two, or three years old, within a radius of ten miles of the Society: 1, J. Hayton; 2, W. Hodgson and Son.

Mr. Jonathan Williamson, Brownrigg Hall, Allonby, gave the sum of £3 for foals by his entire horses: 1 and 2, W. Blamire.

A sweepstakes of 5s. each, with £2 added by the Society, for the best horse or mare, brood mares excluded, four years old and upwards: 1, W. Griffiths; 2, W. Donald, Row Hall.

SADDLE HORSES.

Brood mare: 1, J. James, Oughterside; 2, W. H. Mulcaster, Longtown.

Colt or filly foal: 1, J. James; 2, Mrs. Twentyman, The Close.

Yearling filly: 1, E. K. Todd, Aspatria.

Yearling gelding: 1, J. James.

Two-year-old filly: 1, J. James; 2, J. Stalker, Low Blaithwaite

Two-year-old gelding: 2, J. T. Rook, Sleightholme.

Three-year-old filly: 1, Mrs. Twentyman; 2, W. H. Mulcaster.

Three-year-old gelding: 1, W. Parkin-Moore, Whitehall; 2, W. Hodgson and Son.

HARNESS HORSES.

Brood mare: 1, S. and W. R. Hinde; 2, J. W. Wilson.

Colt or filly foal: 1, J. W. Gardhouse, Wigton; 2, W. Donald.

Yearling filly: 1, J. S. Atkinson; 2, W. Riddick.

Yearling gelding: 1, B. Bowe; 2, J. Bell, Silloth.

Two-year-old filly: 1, T. Ivison, Wigton; 2, W. Riddick.

Two-year-old gelding: 1, G. J. Snelus, Ennerdale Hall; 2, I. Ashbridge, Wheyrigg.

Three-year-old filly: 1, I. Wills; 2, J. Fishwick.

East Berks Horse Show.

Very unsettled and threatening weather on Thursday did not deter an exceedingly large and fashionable company assembling at Cannon Hill, Maidenhead, on the occasion of the fourth annual show of the East Berks Horse Show Society; and fortunately very little rain fell. The site, which was kindly lent by Mr. Henry Adams and Mr. Fowlie, was a capital one, and, in spite of the torrents of rain on Wednesday, the grass was in excellent order for jumping and driving. The number of entries compared favourably with last year, and the quality throughout was fully up to the mark, if not better than in former years. The hunters and the Shire horses were particularly good. Naturally very considerable interest was centred in the jumping and driving competitions, and some very fine performances were witnessed by the many people who surrounded the spacious ring, and by those who had an even better position on the stand, which, it is pleasing to note, was very largely patronised. The Hunters' Improvement Society, the Hackney Horse Society, and the Shire Horse Society between them gave five silver medals in addition to the handsome prizes offered by the promoters of the show. The Marquis of Downshire, the President of the Society, who was accompanied by the Marchioness, was present throughout the day, and each evinced the utmost interest in the proceedings.

The following gentlemen acted as judges: Hunters, Mr. W. H. White and Mr. Lousada; Hackneys, riding and driving classes, Colonel Allan Maclean and Mr. Tresham Gilbey; Shire horses, Mr. John Nix; and jumping classes, Mr. P. G. Barthropp and Mr. Seymour Dubourg, M.F.H.

Prize List.

HORSES

Hunters (open).—Mares and foal at foot (for breeding hunters): 1, Mr. G. A. Mullens, Barrow Hills, Long Cross, Surrey; 2, Mr. R. H. Gosling, Manor House, Waltham-St.-Lawrence, Berks; 3, Mr. Ernest Lawrence, Bracknell, Berks; r, Mr. W. H. Barber, Culham Court, Henley-on-Thames.

Hunters (open).—Foal out of a half-bred mare entered with their dams in class 1.: 1, Mr. W. H. Barber; 2, Mr. A. Gorham, Telscombe, Lewes; 3, Mr. R. H. Gosling; r, Sir Robert Wilmot, Bart., Binfield Grove, Bracknell.

Hunters (open).—Mare or gelding, foaled in 1897, calculated to make a hunter: 1, Mr. T. Milbank, Garnish Hall, Margard Roding, Dunmow, Essex; 2 and r, Mr. J. L. Nickisson, Warfield, Bracknell, Berks; 3, Mr. R. H. Gosling.

Hunters (local).—Colt or filly calculated to make a hunter, foaled in 1898, the property of a resident within the radius of twelve miles of Bracknell: 1, Mr. R. H. Gosling.

Hunters (local).—Colt or filly calculated to make a hunter, foaled in 1899, the property of a resident within the radius of twelve miles of Bracknell: 1 and silver medal, Mr. J. L. Nickisson; 2 and 3, Sir Robert Wilmot, Bart.; r and silver medal, Mr. W. H. Barber.

Hunters (open).—Hunters calculated to carry not less than 14st., four years old and upwards: 1, Mr. A. Gorham; 2, Mr. T. Radmore, Cuddington Court, Cheam, Surrey; 3, Mr. J. H. Stokes, Great Bowden, Market Harboro'; r, Mr. W. Cuthbert, Myton, Warwick

Hunters (open).—Hunters calculated to carry less than fourteen stone, four years old and upwards: 1, Mr. J. H. Stokes, and Mr. A. Gorham (equal); 2 and 3, Mr. W. H. Barber; r, Mr. M. A. Leadbetter, Hazelmer Park, High Wycombe, Bucks; hc, Mr. A. H. Jackson, Glenthorn, Harrow Weald, Middlesex

Hunters (local).—Hunters calculated to carry thirteen stone and upwards, the property of a resident within the radius of twelve miles of Bracknell: 1 and 2, Mr. W. H. Barber; 3, the Hon. Mrs. Vivian, Stoke Poges, Bucks; r, Mr. F. T. Hohler, Brook Lodge, Sunninghill, Berks; silver medal, Mr. F. V. Gooch, Sefton Lawn, Windsor.

Hackneys (open).—Registered Hackney stallions, any age: 1, Mr. T. Radmore; 2, Mr. E. J. Vaughan, Mimbridge Stud, Chobham, Surrey; r, General Sir Charles Brownlow, G.C.B., Warfield Hall.

Hackneys (open).—Registered Hackney mare, with foal at foot, or in foal to a fully registered Hackney sire: 1, Mr. R. T. Thornton, Middleton Hall, Brentwood, Essex; r, Mr. C. E. Brinckman, Fetcham Grove, Leatherhead.

Hacks (open).—Mare or gelding, 15 hands and over (ridden): 1, the Hon. Mrs. Vivian; 2, Mr. H. F. De Paravicini, Mill House, Bourne End, Bucks; 3, Sir Robert Wilmot, Bart.; r, Miss Douglas, 15, Easthourne Mews, Paddington, W.; hc, Messrs. Mawes and Babbing, 3, Cowley Place, Oxford

Hacks (open).—Mare or gelding, under fifteen hands (ridden): 1, Mr. J. L. Nickisson; 2, Miss Maggie Shepherd, The Rosery, West Drayton; 3, Miss Benson, Ankerwycke, Wraysbury, Bucks; r, Mr. A. G. Hutchinson, Sonning, Berks.

Driving (open).—For the best pair of horses driven in double harness or as a tandem: 1, Mr. C. J. Wertheimer, Hedsor House, Bourne End, Bucks; 2, Mr. E. S. Dodsell, Stroud, Gloucester; 3, Mrs. Leeming, Holmwood, Maidenhead; r, Mr. E. Albury, Horse Repository, Reading; hc, Mr. E. D. Stern, Fan Court, Chertsey, Surrey.

Driving (open): Mare or gelding, 15 hands and over (driven): 1, Mr. C. J. Wertheimer; 2, Mr. E. S. Godsell; 3, Mr. F. D. Lambert, Moor Hall, Cookham, Berks; r, Mr. E. J. Vaughan; hc, Mr. E. Albury

Driving (local).—Mare or gelding, 15 hands and over, the property of a resident within the radius of twelve miles of Bracknell (driven): 1, Mr. F. V. Gooch; 2, Mr. F. D. Lambert; 3, Mrs. Leeming; r, Capt. G. T. Cattle, Murrell Hill, Binfield, Berks.

Driving (local).—Cob, mare or gelding, under 15 hands, the property of a resident within the radius of twelve miles of Bracknell station (driven): 1, Mrs. Muller, Mill House, Cookham; 2, Mr. W. C. Cunard, Hawthorne Hill, Bracknell; 3, Mr. F. V. Gooch; r, Mr. O. Dixon, Reading; hc, Mr. E. Albury.

Ponies (local).—Pony mare or gelding, not exceeding 13.2, the property of a resident within the radius of twelve miles of Bracknell (ridden); also a special prize of £5 to the child under twelve, adjudged the best rider: 1, Lady Wilmot, Binfield Grove, Bracknell; 2, Mr. M. E. Headington, High Street, Slough, Bucks; 3, and special for child, Master Vere Seymour, Bartletts, Holyport; r, Mr. O. Dixon; hc, and a special for riding (given by the Association), Miss Kathleen Wilmot.

Shire or agricultural horse (open), mare and foal at foot: 1, Mr. R. W. Hudson, Danesfield, Great Marlow, Bucks; r, Mr. T. Chettle (for Reading Sanitary Authority), Manor Farm, Reading.

Shire or agricultural horse (local): Mare and foal at foot, the property of a tenant farmer within the radius of twelve miles of Bracknell: 1, Mr. G. Auckland, Warfield, Bracknell, Berks; r, Mrs. Mary Wilson, Binfield, Bracknell, Berks.

Shire or agricultural horse (local).—Colt or filly foal, the property of a resident within a radius of twelve miles of Bracknell: 1, Mr. R. W. Hudson; 2, Mr. G. Auckland; r, Col. A. F. Walter, Bearwood, Wokingham, Berks.

Shire or agricultural horse (local).—Colt or filly foaled in 1899, the property of a resident within a radius of twelve miles of Bracknell: 1 and 2, Mr. R. W. Hudson; 3, Mr. T. Chettle; r, Col. Makins, Rotherfield Court, Henley-on-Thames.

Shire or agricultural horse (local).—Mare or gelding foaled in 1898, the property of a resident within a radius of twelve miles of Bracknell: 1, Col. Makins; 2, Mr. T. Chettle; r, Col. A. F. Walter; hc, Mr. G. Auckland.

Shire or agricultural horse (local).—Mare or gelding foaled in 1897, the property of a resident within a radius of twelve miles of Bracknell: 1 and silver medal, Mr. R. W. Hudson; 2, Col. A. F. Walter; r, Mr. T. Chettle; hc, Messrs. T. Lawrence and Sons, Bracknell.

Shire or agricultural horse (local).—Mare or gelding, any age, bred by the exhibitor, and the property of a tenant farmer within a radius of twelve miles of Bracknell: 1, Mr. G. Auckland; 2, and hc, Mr. W. Peto, Cannon Court, Maidenhead; 3, Mr. R. Horwood, Hall's Farm, Waltham St. Lawrence; r, Mr. T. W. Purser, Tau House Farm, Colnbrook, Bucks.

Shire or agricultural horse (local).—Mare or gelding, any age, the property of a resident within the radius of twelve miles of Bracknell: 1 and silver medal, Mr. R. W. Hudson; 2, Col. A. F. Walter; 3, Col. Makins; r, Mr. T. Chettle.

Tradesmen's class, for the best horse or cob (local) For the best one-horse turn-out, the bonâ-fide property of a tradesman within a radius of twelve miles of Bracknell station, which has been used by him for three months previous to the day of opening the show, solely for trade purposes (driven): 1 (equal), Messrs. Headington and Son, High Street, Slough, and Mr. J. Harding, 120, High Street, Maidenhead; 3, Mr. P. Thompson, 65, High Street, Maidenhead.

Jumping (open).—Mare or gelding, any height, to be ridden in the ring, jumping to be the only point of merit: 1, Mr. C. A. Darnell, Church Farm, Atworth, Melksham, Wilts; 2, Miss Douglas; 3, Mr. J. Wheeler, Shakespear Farm, Studley; hc, Messrs. C. and J. Jerome, Sutton Coldfield, Surrey.

Jumping (local).—Mare or gelding, any height, to be ridden in the ring, the property of a resident within twelve miles of Bracknell: 1, Mr. F. Johnson; 2, Mr. E. Albury; 3, Mr. P. Thompson; r, Sir Robert Wilmot, Bart.

North Lonsdale.

The North Lonsdale Agricultural Society's Show, held at Ulverston, was worthy of an organisation that can boast of the patronage and aid of two such noblemen as the Duke of Devonshire and the Duke of Buccleuch, to say nothing of the interest always taken in the event by the farmers of the neighbourhood themselves. The £455 given in prizes is devoted to the encouragement of well nigh every branch of agriculture, the entries secured in the classes for both light and heavy horses being numerous, and the quality of a high order. The display of cattle and sheep, though smaller than was the case a year ago, was nevertheless of a representative character. Rain fell in the afternoon, but too late to interfere with the show's success financially.

The judges were:—Cattle, Mr. Anthony Cleasby, Sedbergh. Sheep (other than Herdwicks), Mr. James Isherwood, Gargrave. Sheep Herdwicks, Mr. Tom Newby, Gosforth. Heavy horses, Mr. Jos. Paisley, Waresley Park, Hunts, and Mr. T. Savage, Dalston, Carlisle. Hunters, Mr. T. H. Hutchinson, Catterick. Harness and Hackneys, Mr. J. A. Mather, Dumfries.

Prize List.

CATTLE.

Open only to exhibitors residing in the Hundred of Lonsdale North of the Sands—Bull, above two and under four years old: 1 and special, G. Higgin, Broughton Beck, Ulverston; 2, R. Knowles, Newby Bridge, Ulverston; 3, J. P. Brockbank, Holm Bank, Ulverston.

Bull, above one and under two years old: 1, R. Rawsthorn, Gateside, Cark; 2, T. Cummings, Wraysholme Tower, Grange-over-Sands; 3, G. Ashburner, Low Hall, Kirkby-in-Furness.

Bull calf, under one year and not less than four lunar months old: 1, W. J. Gravestock, The High, Greenodd; 2, W. Mason, Outerthwaite, Grange-over-Sands.

Pair of cows or heifers, in calf or milk, three years old and upwards: 1, W. Stephenson, Hawkswell, Ulverston; 2, T. Wilkes, Templand, Grange-over-Sands; 3, G. Ashburner, Low Hall, Kirkby-in-Furness.

Heifer, in calf or milk, two and under three years old: 1, 2, and special, Victor W. Cavendish, M.P., Holker Hall.

Heifer, above one and under two years old: 1, Victor C. W. Cavendish, M.P.; 2, G. Ashburner.

Heifer calf, under one year and not less than four months old: 1, Victor C. W. Cavendish, M.P.; 2 and special, J. Dacre, Finsthwaite, Newby Bridge.

Cow, best adapted for the dairy: 1, J. Barton, Gargreave, Kirkby-in-Furness; 2, R. Kitching, Ulverston; 3, W. Stephenson, Hawkswell, Ulverston.

SHEEP.

Leicester ram lamb: 1, J. Farrer, Abbotts Reading, Haverthwaite; 2, W. B. Winder, Kirkby Hall, Kirkby-in-Furness. Longwoolled ram, not being Leicester, one-year-old and upwards: 1, J. Phizacklea, Bell Hall, Kirkby-in-Furness; 2, T. K. Postlethwaite, Stank, Barrow-in-Furness. Long-woolled ram, not being Leicester: 1, W. B. Coward, Colt Park, Ulverston; 2, Redmayne Rigg, Wells House Farm, Cartmel. Pen of three white-faced ewes, lamb sucked: 1, R. Rigg; 2, W. B. Coward.

Pen of three white-faced shearling ewes: R. Rigg.

Pen of three white-faced ewe lambs: 1, R. Ormondy, Brest Mill Beck, Dalton-in-Furness; 2, R. Rigg.

Shropshire or other Down ram lamb: 1, R. Rigg; 2, J. Ratcliffe.

Pen of three Shropshire or other Down ewes: 1, J. Ratcliffe; 2, R. Rawsthorne.

Pen of three Shropshire or other Down shearling ewes: 1, J. Ratcliffe; 2, R. Rawsthorne.

Pen of three Shropshire or other Down ewe lambs: 1, J. Ratcliffe; 2, R. Rawsthorne.

Pen of three half-bred shearling ewes, from Herdwick or horned Scotch ewes by a white-faced ram: M. and T. Edmonson, Mansriggs, Ulverston.

Pen of three half-bred ewe lambs, from Herdwick or horned Scotch ewes by a white-faced ram: 1, T. K. Postlethwaite, Stank, Barrow-in-Furness; 2, J. Farrer.

Herdwick ram, one year old and upwards: 1, J. Newby, Aulthurstside, Broughton-in-Furness; 2, J. Dove and Son, Field Head, Outgate, Ambleside.

Pen of three Herdwick ewes, lamb sucked and to show milk: 1, J. Dove and Son; 2, J. Newby.

Pen of three Herdwick ewe lambs: 1, J. Dove and Son; 2, J. Newby.

Pen of three long-woolled ewes, lamb sucked, and three ewe lambs, bred by the exhibitor: 1, R. Rigg; 2, W. B. Coward.

LORD ROTHSCHILD'S JERSEY BULL "PERRY FARM DUPLEX."

HORSES.

AGRICULTURAL.

Mare, either in foal or with foal at foot: 1 and special, W. Dowbiggin, New Hall, Millom; 2, V. C. W. Cavendish, M.P.; 3, R. Harrison, Nether Houses, Ulverston.

Colt foal: 1, W. Dixon, Rosthwaite, Broughton-in-Furness; 2 and special, W. Huddleston, Roose Cote, Barrow-in-Furness.

Filly foal: 1 and special, V. C. W. Cavendish, M.P.; 2, W. Dowbiggin.

Yearling colt or gelding: 1, M. Newton, Hundow Hall, Greenodd; 2, H. Bell, Gleaston Castle, Ulverston.

Yearling filly: 1, V. C. W. Cavendish, M.P.; 2, W. Dowbiggin.

Two-year-old gelding: 1, J. Edmondson, Roosebeck, Ulverston; 2, J. Farrer.

Two-year-old filly: 1, V. C. W. Cavendish, M.P.; 2, W. and J. Barton, Gascow, Ulverston.

Three-year-old filly: 1, W. Cotham, Low Levens, Milnthorpe; 2, J. Teasdade, Trinkeld, Ulverston.

Pair of horses (mares or geldings), shown in gear, the whole to be the property of the exhibitor, who shall be a tenant farmer: W. Dowbiggin.

Single horse (mare or gelding), to be shown in cart, the whole of the turn-out to be the property of the exhibitor, who shall be a tenant farmer: 1, R. Harrison; 2, W. Cottam.

Agricultural mares (any age), the property of tenant farmers, served by any of the Holker Shire horses in the season of 1900: J. Teasdale, Trinkeld, Ulverston, R. Harrison, J. Dickinson, Pit Farm, Grange-over-Sands, equal.

HUNTERS.

Brood mare, in foal or with foal at foot: 1, J. S. Rigg, Elm Bank, Appleby; 2, A. Orr, The Priory Farm, Hornby. 3, G. Fell, King's Arms, Flookburgh.

Colt or filly foal: 1, A. Orr; 2, J. S. Rigg.

Yearling colt, gelding, or filly: 1 and special, A. Haslewood, Fairfield Stud, Buxton; 2, E. Hoyle, Moorlands, Bacup.

Two-year-old gelding or filly: 1, J. Kidd, Haverflats, Milnthorpe; 2, A. Haslewood.

Three-year-old gelding or filly: 1, Exors. of T. Dixon, Priest Hutton, Cornforth; 2, J. Kidd, Haverflats.

HARNESS OR HACKNEYS.

Brood mare, in foal or with foal at foot: 1, J. W. Liver, Calder Vale Stud Farm, Barnacre, Garstang; 2 and special, C. V. Haworth, Thornton Lodge, Poulton-le-Fylde; 3, J. Radcliffe.

Colt or filly foal: 1, R. M. Birley, Preston; 2, J. W. Liver.

Yearling colt, gelding, or filly: 1, R. M. Birley, Hoghton Hall, Preston; 2, J. Ratcliffe.

Two-year-old gelding or filly: 1, W. Lawson, 20, Alexandra Road, South Shore, Blackpool; 2, N. Dixon, Priest Hutton, Cornforth.

Three-year-old gelding or filly: 1, W. Lawson; 2, J. Clarkson, Cornforth.

Hackney foal (colt or filly), by thein Hackney stallion Lord Lindsey 6109: 1, J. P. Pumley, Ewen End Bridge, Ulverston; 2, Conishead Priory Co., Ulverston.

SADDLE HORSES.

Hackney, exceeding 14½ and not exceeding 15 hands high, to be saddled and ridden before the judges: 1, J. Mitchell, Ecclesbill, Bradford; 2, J. W. Lever, Bonnicre, Garstang.

Cob or pony, not exceeding 14½ hands high, to be saddled and ridden before the judges: 1 and 2, H. T. Parker, Withnell Fold, Chorley.

Wensleydale.

For their show at Leyburn on the 18th inst. the Wensleydale Agricultural Society received a record entry 598 and the weather being all that could be desired, the attendance of visitors was a very large one, this number, too, being almost a record. The Society has had bigger shows of both horses and sheep in some other years, but never such cattle classes. The increase in cattle and miscellaneous exhibits accounted for the superior numbers, the cattle totalling 148 as against 136 in 1899 and 97 in 1898, and the miscellaneous exhibits 190, as against 181 and 124 respectively for the two preceding years. Sheep with a total of 124 were well up to the average, but the entries of horses, which numbered 136, though a slight increase on the last two years, were considerably smaller than in the preceding years.

A score of Shorthorn bulls, young and old, were comprised in three classes, and two of the first prizes fell to Mr. Thomas Bradley, of Aysgarth. The pick of the cattle, however, were the milkers, and here Messrs. R. Metcalfe and Son, of Burtersett, Hawes, came well to the front with admirable specimens. Mr. A. Greenwood, of Wensley, too, distinguished himself; indeed, the well-filled class in which his dairy cow had pride of place would have done credit to a county or Royal Show. The best cottager's dairy cow was declared to be that bred and shown by Mr. M. Lambert, of Caldbergh, Middleham. In point of quality the sheep well sustained the reputation of the district, and in all respects this section of the show was a useful exposition of what local flockmasters can do. Longwool rams made a grand spectacle. In the open classes the executors of Thomas Willis had things very much their own way, but in the district classes the principal prize winner was Mr. G. R. Etherington. There was a wonderfully good lot of crossbreds. Half-bred lambs, too, attracted particular attention. The light horses, though fairly creditable, were quite overshadowed by those of the heavy type. For a district show it was a singularly attractive display. One of the judges confessed that he had not expected to see such a capital collection of agricultural horses in Leyburn, and both were vastly pleased. An exceptionally satisfactory group of brood mares went into the ring, the winner being a bay belonging to Mr. H. Marsland. Mr. H. M. Waddington's winning two-year-old, a filly sired by Skewkirk Harold, is also a very nice animal.

The judges were:—Cattle—Mr. George Harrison (Gainford, Darlington) and Mr. John Howard (Gargrave, Skipton). Wensleydale sheep—Mr. Robert Metcalfe (Settle) and Mr. R. Raw (Middleton Tyas). Crossbred sheep—Mr. T. Fenwick (Aldbrough) and Mr. Robert Ewbank (Settle). Hunters and roadsters—Mr. J. E. Cawthorn (Ripon) and Mr. Andrew Moscrop (Thorganby Hall, York). HARNESS.

Horse or mare, of any age, shown in harness, the property of a tenant farmer, and considered by the best judges the most suitable for the purpose: 1, S. R. Smith, Yorks; 2, A. A. Parker, Salmon House, Snape, Bedale. Gelding, mare, or horse, driven in harness, [illegible]; 2, [illegible].

(driving whip for the best coachman): 1 and whip, J. C. Winn, The Grange, Aysgarth. Pony, gelding, or mare, not exceeding 14.2 hands, to be driven in harness in the enclosure: 1, W. R. Allison; 2, H. Johnson, West Burton, Aysgarth. Pony, gelding, or mare, not exceeding 14 hands, to be ridden in the ring: 1, R. Pease; 2, T. Gregory, Leyburn; 3, E. Alderson, Bolton Arms Hotel, Leyburn.

Banwell.

The exhibition of the Banwell and Weston-super-Mare Horse and Agricultural Association took place in the Abbey Grounds, Banwell, on Wednesday, and was favoured with beautiful weather. Entries far exceeded those of any former meeting, being 500 in number, and in this regard the show was a record one. In all there were 150 more entries than last year, mostly in the hunters' mare and foal class. As usual a very large number of visitors, including the president, Mr. Dickinson, M.P., attended the exhibition. Cattle and sheep received a fair share of attention from people engaged in agriculture, but for the general public the riding, driving, and jumping contests had the chief charm. The grand stand was crowded, and the ring thickly lined with people, who watched with keen relish the equestrian feats. Hunters and animals suitable for hunting were well represented, and hacks and harness horses made a very creditable collection. The cart horses were an all-round average lot, the best of them being the two-year-olds, whilst some of the foals were promising. In this department Sir W. H. Wills, Bart., M.P., won several prizes, and was fortunate to gain the championship medal.

Thanks to the enterprise of Sir W. H. Wills, M.P., and some of his neighbours, the cattle in the district of the show have considerably improved in quality. They interest themselves in the farming industry, and have secured some pedigree stock, which they have placed at the disposal of the agriculturists among the beautiful Mendips. Generally speaking, however, the classes were uneven in regard to entries and quality, good animals being found with some by no means up to the standard. The fat cattle were a good lot, if few in number, and the winning animals were of high merit. The bulls of any age were typical of their class, and were essentially useful for tenant farmers, being shown in store condition. The pairs of dairy cows and heifers were useful and sound, but the competition was not very keen. It was rather difficult to deal with the sheep because of the various sorts exhibited together, and there was only one seemingly pure flock among the lot. For a district where sheep-rearing does not receive particular attention the sheep were creditable, but by no means what they ought to be. None of them call for special mention.

HORSES (OPEN CLASSES).

Hunters, weight carriers, up to not less than 15 stone: 1 and 2, Messrs. John and Nixon Gray, St. Fagan's, Cardiff (Colonel and Britain); 3, Messrs. Flower and Mattick, Ston Easton; r, Mr. H. Gillham, Taunton. Hunters, up to 12 stone and under 15 stone: 1, Messrs. John and Nixon Gray (Sportsman); 2, Mr. James Baldwin, Bath (Sportsman); 3, Mr. Edgar Bown, Sherborne (Lady Grey).
